1 and 2. Your letter of March 5 contends that your investigation shows that dissemination of the material to the Washington Post was done by someone "not associated with our inquiry." In your letter of December 18, 1981, you expand this to mean a person "not associated with the Subcommittee." Yet, Mr. Stockton was undeniably associated with both the 1979 "inquiry" and the Subcommittee, if there is any difference between those references. If he was not "associated" with either your "inquiry" or the Subcommittee, then how could he possible in good faith claim congressional immunity during his deposition? And Mr. Stockton testified under oath that he was the one who gave the documents to the Post and that he informed you virtually contemporaneously, probably on the very day in December 1979 I first met with you about this situation. Either you are incorrect, or Mr. Stockton has made false statements under oath and claimed congressional immunity to which he is not entitled.

3. If Mr. Stockton was truthful in his testimony that he informed you that he had provided the material to the Washington Post, then you either knowingly allowed Mr. Brand to base an argument on false information to a Federal Judge when he appeared on behalf of the subpoened Congressional aides and claimed congressional immunity for the four of you as a basis for blocking testimony in my libel suit against the Washington Post, or you have failed to correct Mr. Brand's false representation when you learned of it after the fact.

4. In your letter of November 20, 1979, you make the following statement:

"Comnas received nothing from the remaining partners for his share of Atlas, but did receive $90,000 over three years from Mobil under a consulting contract, for which he performed virtually no services for Mobil. * * * It also appears that William misused corporate assets to buy out George Comnas and enrich his son."

This statement is false and libelous, as I have shown to you and the Securities Exchange Commission through an abundance of evidence. Even the Washington Post "corrected" that charge on December 7, 1979. Yet, you persist as you did in your letter of December 18, 1981, saying the SEC investigation "did not show any of my information to be inaccurate." Mr. Dingell, I challenge you to make this statement without congressional immunity. I can assure you that I will prove in a lawsuit that that statement is false and libelous.

5 and 6. It is clear from Mr. Stockton's testimony, from your December 18 letter, and subsequent information contained in Jonathan Friendly's article of January 4, 1982, in the New York Times that you helped make it possible for one of your staff members to gain remuneration from CBS and ABC in exchange for congressional information by working in a dual capacity as an investigator for your committee and as an investigator for the two networks.

You have made a big issue about disclosure of potential conflicts of interest in connection with my and Mobil's activities. The public would, I believe, be shocked to find that a full-time government employee can work as an investigator for a congressional subcommittee and, at the same time, as a paid investigator for the top two television journalist shows.

For the record, I would like to further comment on some points in your latest letter:

In paragraph one and two, you dispute my charge that you "allowed a misleading, if not false, document to be presented to a U.S. Federal Judge to influence that Judge's decision." You "assume" from the context of my letter that the document I was referring to was your March 5, 1980 letter to me. You are wrong. The false and misleading document you allowed to be presented to a Federal Judge was the Congressional Deponents' Reply memorandum in support of their motion to quash deposition subpenas. In answer to my lawyers' assertions that your March 5 letter was evidence that a subcommittee staffer gave the Washington Post your November 20, 1979 letter to the SEC with attachments, your lawyers argued (at pages 5a and 5b) that:

Perhaps Plaintiff's [sic] most remarkable leap of evidentiary faith is the assertion that a March 5, 1980 letter written to Plain-

tiff provides "conclusive evidence" that Congressional deponents are a source. In reponse to apparent complaints by Plaintiff charging leaks, Chairman Dingell informed Plaintiff that "steps" has been taken to insure against unauthorized disclosures. In that context, the Chairman stated that "[a]pparently, discussions within our staff resulted in someone not associated with our inquiry divulging information." Exhibit 11 to Oppositiion Memorandum. It simply defies logic and the plain meaning of words to assert that a statement specifically disclaiming disclosures [of your November 20, 1979 letter with attachments] by the committee staff can be construed as "conclusive evidence" that they were the source.

In sum, Plaintiff's evidentiary showing is nothing short of fantastic—a montage of unrelated facts, only some of which have been adduced in this litigation—with a gloss of imaginative hypothesis conjointed with assertions that the investigation was "non-official." It fails to establish any predicate for discovery.

As you know, and as you knew then, the "fantasy" which your lawyers argued against turns out to be reality. Under pressure of a Court order and an oath, Stockton has admitted he gave the Post the materials. It was this misleading Reply Memorandum to which I referred. Thus, it was not my counsel which misled the judge. It was yours.

You also state that your March 5 letter referred only to "continued dissemination" by your subcommittee after our December 4, 1979 meeting and not to the dissemination of your November 20, 1979 letter with attachments to Tyler. Again, you are mistaken. At our meeting on December 4, I made clear to you my concern about dissemination of your November 20, 1979 letter with attachments to the Washington Post in November 1979. It was that dissemination which concerned me then and concerns me now. It was that dissemination to which your March 5 letter refers, since it specifically mentions "documents" being "released." And it was that dissemination which caused us to seek to depose your aides, which you and they resisted by moving to quash. That was the subject of your Reply Memorandum and of Mr. Brand's statement in Court again disclaiming any dissemination. Your after-the-fact argument that your March 5 letter referred only to post December 4, 1979 dissemination is a transparent invention.

Paragraph three of your letter complains about dissemination of my November 20, 1981 letter. Your statement about the Times' reporter is inaccurate. And your presumption that my attorneys gave The Wall Street Journal reporter my November 20, 1981 letter, is equally inaccurate. But what does that matter since after your attorneys unsuccessfully tried to put that letter on the record (which would then make it public), your attorneys immediately gave it to the attorneys for The Washington Post. Once again, you are trying to confuse the issue. In any case, I had no reason not to have the letter made public once you ignored its confidential status.

In my previous letter, I stated an oil company source "suggested that I drop my lawsuit, otherwise Mr. Barrett will renew the investigation." In reply, you state Mr. Barrett denies making such a suggestion. If Mr. Barrett continues to deny under oath discussing my lawsuit with this source, I will be glad to elaborate on the facts I have on hand.

Now with respect to your last paragraph and your invitation for me to attend a "hearing" on February 1 to present my evidence, let us see what you are suggesting. We have had an 18-month SEC investigation—which you initiated—costing the government, Mobil and me many hundreds of thousands of dollars. Every facet of the charges made against me by you and your sources was examined in exhausting detail. That investigation has been terminated with a finding that no enforcement proceeding is warranted. It should be obvious to anyone that the SEC investigation failed to substantiate the untruths in your November 20, 1979 letter to the SEC.

You will recall you promised that if the SEC found no evidence to substantiate your charges, you would apologize. After the SEC investigation ended, I wrote to you on August 3, 1981 and asked you to come forth and admit that you were wrong in the original charges. You have failed to reply to that letter.

Subsequently, in the depositions of your staff, we confirmed what we always believed—that is, your staff worked hand in glove with an ambitious Post reporter in an attempt to make newsworthy an old, discredited story of alleged conflict of interest, spiced up with new and totally unsupported charges of currency or tax law violations circulated by persons obviously motivated by malice against me and my son. Mr. Stockton's admission that he used Congressional power and authority to gain publicity for "hearings" by your subcommittee is damning and revealing at one and the same time. Damning, because it is evident there never was to be a hearing. Revealing—and frightening—because such enormous power can be used to advance careers of Congressmen, aides and reporters no matter what the cost to the reputations and careers of those who become the objects of their alleged "investigations." I seriously doubt that the Post would have published its articles based on the words of Comnas alone. The touchstone to publication was the apparent ability to use documents from a "leaked" Congressional "investigation" as a source—even though those documents did nothing but repeat the unsworn, unverified charges of a maliciously motivated person. What Stockton did is, therefore, key to why I and my son must incur enormous expense to clear our reputations.

We now have testimony that you knew about Stockton's actions as early as December 4, 1979. You knew my state of mind then. Why didn't you come forward to reveal at least that much? Instead, you and your staff have stonewalled all efforts to establish how you got your information and your staff's questionable relationships with the press. You and your staff now stand accused. Yet, your suggestion is that the accused conduct a "hearing", and that the accused be judge and jury. What a strange method of jurisprudence. It sounds like something from a Russian novel.

I have a better suggestion. A Federal Judge is reviewing my allegations—and the jury will decide. You will have your chance to explain the conduct of you and your staff as a witness—or even as a defendant if you feel confident enough about your position to step out from behind your immunity so that we can both have an equal position before the Court.

Let's have justice prevail, Mr. Dingell. Forget your immunity and we have the forum—the Federal Court—that's the American way.

Sincerely,

W. P. TAVOULAREAS.

ATTACHMENT B

MOBIL OIL CORP.,
New York, N.Y., November 20, 1981.

Hon. JOHN D. DINGELL,
House of Representatives,
Washington, D.C.

DEAR CONGRESSMAN DINGELL: After nearly two years involving meetings and letters between us, the most recent being my letter to you of August 3, 1981, I have reluctantly come to the following conclusions:

That in your capacity as a member of the House of Representatives, you have deliberately misled a citizen who was rightfully trying to defend his reputation;

That you also allowed a misleading, if not false, document to be presented to a U.S. Federal judge to influence that judge's decision;

That you have retained on the government payroll an individual who claims he is at the same time a reporter for CBS and ABC;

With the result of undue grief to me and my family and large expenditures for me and my son and unnecessary and improper expenditures for the government.

These are strong charges, but they can now be supported by sworn testimony.

As you know, in 1979 the Washington Post published two articles which suggested that I had diverted Mobil assets and had used my position as Mobil president to enrich my son. The articles were based, in large part, on a letter written by you on November 20, 1979, and upon your staff's report, which was attached to that letter.

Some background is in order. Earlier in 1979, I testified before your committee. Although my testimony was probably not what your staff wanted to hear, you, nevertheless, personally thanked me for being willing to testify and later wrote me a note repeating your appreciation. Yet, in November—without calling me or any of the many other people who would have known that the staff report contained false information—you wrote to the SEC and asked that Mobil and I be investigated. It now develops that this action apparently was based upon a memo prepared by your staff only the day before (November 19); that memo was based upon an interview in Massachusetts with a disgruntled former associate of mine two days earler (November 17). Why the rush?

The result was predictable: Hang me in the press before I even knew what the charges were, or before I had a chance to reply. There was no concern for the damage to my family, my reputation, my company and its employees—and if someone complained, the Post and your staff could always invoke the First Amendment and Congressional Immunity.

You will recall that on December 4, 1979, I visited our office, together with two of my associates; Messrs. Barrett, Stockton, and Schooler of your staff were also there. At that time, I objected to your letter, told it was libelous, and requested a copy of both the letter and its attachment, since the Post already had both. You were about to give me copies when Mr. Barrett, et al, objected strenuously. Although you admitted you had authorized release of your letter to the Post, you insisted that the attachment (which was featured in the Post article) was not given to the Post by your staff. You said

it was confidential and had only been sent to the SEC; and for that reason, you could not give it to me. You then added that you would fire any member of your staff who gave out a copy of the report. Your staff seemed greatly relieved; from what I have since learned, I can understand why.

In our meeting, I told you that the Post had strongly implied that they received the letter and the report from your staff, and I asked for your cooperation. In a private meeting between the two of us, you suggested that your staff had gone too far, and you said that you had had no prior knowledge of the matter (i.e., before the November 1979 events), that you know of no investigation.

On March 5, 1980, you wrote me about the "unauthorized disclosures" of the staff report and stated, ". . . apparently discussions within our staff resulted in someone not associated with our inquiry divulging information."

Since that letter was written, I have filed suit against the Washington Post, in what has become a very expensive effort to obtain satisfaction for the injuries to my reputation. The true story is beginning to emerge, although your staff has used every legal device available to try to avoid testifying about their involvement in the preparation of the Washington Post's article. In fact, in May 1981, the House's attorneys used your letter of May 5, 1980, in court on a motion to quash subpoenas as a basis for trying to get your staff relieved from testifying about the report and their involvement in the libelous December 1 Post article. They argued that your letter disclaims any dissemination by Stockton, Schooler or Barrett.

The Post's reporter has now admitted, under oath, that he received your November 20, 1979, letter and report in November 1979.

On November 16, 1981, your Mr. Stockton, under oath, admitted he gave the Post the letter and the report in November 1979 (Mr. Schooler confirmed this), and that you were informed directly by him about that shortly after the meeting I had with you and the staff in early December 1979. (Despite this, you wrote your March 5, 1980, letter.) Stockton admitted that he had an "arrangement" with Post's Tyler to leak it to him alone, in order to get a big headline story. These sworn admissions expose the sordid nature of your March 5, 1980, letter.

[There is another sordid tale to tell. A number of well-known reporters (including Mr. Woodward) had previously looked into these matters and decided there was no story. Yet, the following sequence surfaces:

A reporter interviews an unreliable witness, realizes he doesn't have enough for a story, and talks to Congressional staff.

The staff threatens the unreliable witness with a subpoena, gets the same story the reporter had, prepares a report, secretly gives the report to the reporter, and the reporter writes an article about the "report" and the so-called "investigation."

The Congressman gets a headline, and the reporter gets an exclusive.]

In what I regard as one of the most shocking things I have heard, Mr. Stockton has now testified that in 1980 (presumably while your "investigation" of me and Mobil continued) he was also employed by CBS ("60 Minutes") and ABC ("20/20") while continuing to work on your office staff—and has declined to answer questions about the subjects involved in his work. So now we have a Congressional witness who pleads both legislative immunities and press immunities, presumably under the First Amendment. Although Stockton claims he didn't give information about me or the Mobil-Samarco transaction to "60 Minutes" or "20/20", the unreliable witnesss Stockton interviewed testified he was contacted by "60 Minutes" on this very subject matter.

Finally, you said to me that you would admit being wrong if I were cleared by the SEC. This has now occured, as you know, but I have had no word from you. Yet, I read Mr. Barrett's comment to newspapers that he does not agree with the SEC and that your committee will investigate. In that regard, I have recently heard from an oil company source, who says he recently spoke to Mr. Barrett. That source "suggested" I drop my lawsuit—otherwise Barrett would renew the investigation. This source also had a memo with him repeating the same type of libel reflected in your staff's report. The source refused to tell me where he got the document. I guess I'm supposed to be frightened by what I can only characterize as Gestapo tactics—you should know by now that I am not.

I have given you every chance to live up to your promises and cooperate in the judicial process. Up to this point, I had assumed that your staff might have been acting without your knowledge, but Mr. Schooler's and Mr. Stockton's testimony have now eliminated that possibility.

Nor does it appear that these abuses of power are ended. On November 14, 1981, the New York Times quotes sources close to your committee to the effect that I met with Mr. Campbell of the FTC regarding Mobil's proposed acquisition of Marathon and proposed a plan which was rejected by the FTC staff. Actually, the only accurate statement is that I was present at a meeting. The important thing is that your staff continues to harass me any my company.

These revelations are so shocking that I must call for a full investigation of the entire matter by the appropriate authorities.

Sincerely,

W. P. TAVOULARES.●

CONFERENCE REPORT ON H.R. 6211

Mr. ROSTENKOWSKI submitted the following conference report and statement on the bill (H.R. 6211) to authorize appropriations for construction of certain highways in accordance with title 23, United States Code, for highway safety, for mass transportation in urban and rural areas, and for other purposes:

CONFERENCE REPORT (H. REPT. No. 97-987)

The committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 6211) to authorize appropriations for construction of certain highways in accordance with title 23, United States Code, for highway safety, for mass transportation in urban and rural areas, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its disagreement to the amendment of the Senate and agree to the same with an amendment as follows:

In lieu of the matter proposed to be inserted by the Senate amendment insert the following:

That this Act may be cited as the "Surface Transportation Assistance Act of 1982".

TITLE I

SHORT TITLE

SEC. 101. This title may be cited as the "Highway Improvement Act of 1982".

REVISION OF AUTHORIZATION FOR APPROPRIATIONS FOR THE INTERSTATE SYSTEM

SEC. 102. Subsection (b) of section 108 of the Federal Aid Highway Act of 1956, as amended, is amended by striking out "the additional sum of $3,225,000,000 for the fiscal year ending September 30, 1984," and all that follows down through the period at the end of the sentence and by inserting in lieu thereof the following: "the additional sum of $4,000,000,000 for the fiscal year ending September 30, 1984, the additional sum of $4,000,000,000 for the fiscal year ending September 30, 1985, the additional sum of $4,000,000,000 for the fiscal year ending September 30, 1986, the additional sum of $4,000,000,000 for the fiscal year ending September 30, 1987, and the additional sum of $4,000,000,000 for the fiscal year ending September 30, 1988, the additional sum of $4,000,000,000 for the fiscal year ending September 30, 1989, and the additional sum of $4,000,000,000 for the fiscal year ending September 30, 1990.".

MINIMUM APPORTIONMENT

SEC. 103. (a) For each of the fiscal years 1984, 1985, 1986, and 1987, no State, including the State of Alaska, shall receive less than one-half of 1 per centum of the total apportionment for the Interstate System under section 104(b)(5)(A) of title 23, United States Code. Whenever amounts made available under this subsection for the Interstate System in any State exceed the estimated cost of completing that State's portion of the Interstate System, and exceed the estimated cost of necessary resurfacing, restoration, rehabilitation, and reconstruction of the Interstate System within such State, the excess amount shall be eligible for expenditure for those purposes for which funds apportioned under paragraphs (1), (2), and (6) of such section 104(b) may be expended and shall also be available for expenditure to carry out section 152 of title 23, United States Code.

(b) Section 4(b) of the Federal-Aid Highway Act of 1982 is repealed.

OBLIGATION CEILING

SEC. 104. (a) Notwithstanding any other provision of law, the total of all obligations for Federal-aid highways and higway safety construction programs shall not exceed—

(1) $12,100,000,000 for fiscal year 1983;

(2) $12,750,000,000 for fiscal year 1984;

(3) $13,550,000,000 for fiscal year 1985; and

(4) $14,450,000,000 for fiscal year 1986.

These limitations shall not apply to obligations for emergency relief under section 125 of title 23, United States Code, or projects covered under section 147 of the Surface Transportation Assistance Act of 1978, or section 9 of the Federal-Aid Highway Act of 1981 or section 118 of the National Visitor Center Facilities Act of 1968. No obligation constraints shall be placed upon any ongoing emergency project carried out under section 125 of title 23, United States Code, or section 147 of the Surface Transportation Assistance Act of 1978.

(b) For each of the fiscal years 1983, 1984, 1985, and 1986, the Secretary of Tranportation shall distribute the limitation imposed by subsection (a) by allocation in the ratio

which sums authorized to be appropriated for Federal-aid highways and highway safety construction which are apportioned or allocated to each State for such fiscal year bears to the total of the sums authorized to be appropriated for Federal-aid highways and highway safety construction which are apportioned or allocated to all the States for such fiscal year.

(c) During the period October 1 through December 31, 1982, State shall obligate more than 35 per centum of the amount distributed to such State under subsection (b) for fiscal year 1983, and the total of all State obligations during such period shall not exceed 25 per centum of the total amount distributed to all States under such subsection for such fiscal year.

(d) Notwithstanding subsections (b) and (c), the Secretary shall—

(1) provide all States with authority sufficient to prevent lapses of sums authorized to be appropriated for Federal-aid highways and highway safety construction which have been apportioned or allocated to a State, except in those instances in which a State indicates its intention to lapse sums apportioned under section 104(b)(5)(A) of title 23, United States Code;

(2) after August 1 of each of the fiscal years 1983, 1984, 1985, and 1986, revise a distribution of the funds made available under subsection (b) for such fiscal year if a State will not obligate the amount distributed during such fiscal year and redistribute sufficient amounts to those States able to obligate amounts in addition to those previously distributed during such fiscal year giving priority to those States having large unobligated balances of funds apportioned under section 104 of title 23, United States Code, and giving priority to those States which, because of statutory changes made by this Act and the Federal-Aid Highway Act of 1981, have experienced substantial proportional reductions in their apportionments and allocations; and

(3) not distribute amounts authorized for administrative expenses and forest highways.

(e)(1) Section 1106(b) of the Omnibus Budget Reconciliation Act of 1981 is repealed.

(2) Section 1106(c) of the Omnibus Budget Reconciliation Act of 1981 is amended to read as follows:

"(c) For the fiscal year 1982, the Secretary of Transportation shall distribute the limitation imposed by subsection (a) by allocation in the ratio which sums authorized to be appropriated for Federal-aid highways and highway safety construction which are apportioned to each State for such fiscal year bears to the total of the sums authorized to be appropriated for Federal-aid highways and highway safety construction which are apportioned to all the States for such fiscal year.".

(3) Section 1106(d) of the Omnibus Budget Reconciliation Act of 1981 is amended by striking out "periods" and inserting in lieu thereof "period" and by striking out "and October 1 through December 31, 1982,".

(4) Section 1106(e)(2) of the Omnibus Budget Reconciliation Act of 1981 is amended by striking out "and after August 1, 1983,".

AUTHORIZATIONS

SEC. 105. (a) For the purpose of carrying out the provisions of title 23, United States Code, the following sums are hereby authorized to be appropriated:

(1) For the Federal-aid primary system in rural areas, including the extensions of the Federal-aid primary system in urban areas, and the priority primary routes, out of the Highway Trust Fund, $1,850,000,000 (reduced by the amount authorized by the first sentence of section 4(a)(1) of the Federal-Aid Highway Act of 1982) for the fiscal year ending September 30, 1983, $2,100,000,000 for the fiscal year ending September 30, 1984, $2,300,000,000 for the fiscal year ending September 30, 1985, and $2,450,000,000 for the fiscal year ending September 30, 1986. For the Federal-aid secondary system in rural areas, out of the Highway Trust Fund, $650,000,000 (reduced by the amount authorized by the second sentence of section 4(a)(1) of the Federal-Aid Highway Act of 1982) for the fiscal year ending September 30, 1983, $650,000,000 for the fiscal year ending September 30, 1984, $650,000,000 for the fiscal year ending September 30, 1985, and $650,000,000 for the fiscal year ending September 30, 1986.

(2) For the Federal-aid urban system, out of the Highway Trust Fund, $800,000,000 (reduced by the amount authorized by section 4(a)(2) of the Federal-Aid Highway Act of 1982) for the fiscal year ending September 30, 1983, and $800,000,000 per fiscal year for each of the fiscal years ending September 30, 1984, September 30, 1985, and September 30, 1986.

(3) For Indian reservation roads, out of the Highway Trust Fund, $75,000,000 for the fiscal year ending September 30, 1983, and $100,000,000 per fiscal year for each of the fiscal years ending September 30, 1984, September 30, 1985, and September 30, 1986.

(4) For the Virgin Islands, all such sums as may be required for the continued presence and operation of the office of the territorial representative of the Federal Highway Administration in St. Thomas, Virgin Islands.

(5) For parkways and park highways, out of the Highway Trust Fund, $75,000,000 for the fiscal year ending September 30, 1983 and $100,000,000 per fiscal year for each of the fiscal years ending September 30, 1984, September 30, 1985, and September 30, 1986.

(6) For the forest highways, out of the Highway Trust Fund $50,000,000 (reduced by the amount authorized by section 4(a)(3) of the Federal-Aid Highway Act of 1982) for the fiscal year ending September 30, 1983, and $50,000,000 per fiscal year for each of the fiscal years ending September 30, 1984, September 30, 1985, and September 30, 1986.

(7) For public lands highways, out of the Highway Trust Fund, $50,000,000 (reduced by the amount authorized by section 4(a)(4) of the Federal-Aid Highway Act of 1982) for the fiscal year ending September 30, 1983, and $50,000,000 per fiscal year for each of the fiscal years ending September 30, 1984, September 30, 1985, and September 30, 1986.

(b) Section 151 of the Federal-Aid Highway Act of 1978 is repealed.

(c) In the case of fiscal years 1983 and 1984, each State shall, with respect to any Federal funds available to such State for expenditure on the Federal-aid primary system in excess of the amount apportioned to such State under section 104(b)(1) of title 23, United States Code, for such expenditure in fiscal year 1982, give priority consideration to those priority primary routes designated in Committee Print Numbered 97-61 of the Committee on Public Works and Transportation of the House of Representatives.

(d) Of the sums apportioned to each State under subsections (a)(1) and (a)(2) of this section for each fiscal year, beginning with fiscal year 1984, not less than 40 per centum of such program funds shall be expended by such State on projects for resurfacing, restoring, rehabilitating, and reconstructing existing highways unless the State certifies to the Secretary that such percentage of funds is in excess of the resurfacing, restoring, rehabilitating, and reconstructing needs of existing highways in the State and the Secretary accepts such certification. The requirement of the preceding sentence shall apply only to that portion of a State's apportionment not used for reimbursing such State for bond retirement under section 122 of title 23, United States Code, or for advance construction funding under section 115 of title 23, United States Code.

(e) Section 4(a) of the Federal-Aid Highway Act of 1982 is amended by striking out "a joint resolution making continuing appropriations for such fiscal year," and inserting in lieu thereof "Public Law 97-276,".

(f) Except to the extent that the Secretary determines otherwise, not less than 10 per centum of the amounts authorized to be appropriated under this Act shall be expended with small business concerns owned and controlled by socially and economically disadvantaged individuals as defined by section 8(d) of the Small Business Act (15 U.S.C. section 637(d)) and relevant subcontracting regulations promulgated pursuant thereto.

INTERSTATE RESURFACING

SEC. 106. Section 105 of the Surface Transportation Assistance Act of 1978 is amended by strking out "and not to exceed $800,000,000 for the fiscal year ending September 30, 1984." and inserting in lieu thereof "not to exceed $1,950,000,000 for the fiscal year ending September 30, 1984, not to exceed $2,400,000,000 for the fiscal year ending September 30, 1985, not to exceed $2,800,000,000 for the fiscal year ending September 30, 1986, and not to exceed $3,150,000,000 for the fiscal year ending September 30, 1987.".

INTERSTATE TRANSFERS

SEC. 107. (a)(1) Section 103(e)(4) of title 23, United States Code, is amended by striking out the eighth sentence and inserting in lieu thereof the following: "For the fiscal year ending September 30, 1983, $257,000,000 shall be available out of the Highway Trust Fund for expenditure at the discretion of the Secretary for projects under highway assistance programs. For the fiscal years ending September 30, 1984, September 30, 1985, and September 30, 1986, sums obligated for projects under highway assistance programs shall be paid out of the Highway Trust Fund, and $700,000,000 shall be available for expenditure during each of the fiscal years ending September 30, 1984, and September 30, 1985, and $725,000,000 shall be available for expenditure during the fiscal year ending September 30, 1986. Twenty-five per centum of the funds available from the Highway Trust Fund for each of the fiscal years ending September 30, 1984, September 30, 1985, and September 30, 1986, for substitute highway projects under this paragraph shall be distributed at the discretion of the Secretary. The remaining 75 per centum of such funds shall be apportioned in accordance with cost estimates approved by Congress. The Secretary shall make an estimate of the cost of completing substitute highway projects under this paragraph and transmit the same to the Senate and the House of Representatives as soon as practicable after the date of enactment of this sentence. Upon approval of such cost estimate by Congress, the Secretary shall use the Federal share of such approved estimate in making apportionments for substitute highway projects

for the fiscal year ending September 30, 1984. The Secretary shall make a revised estimate of the cost of completing substitute highway projects under this paragraph and transmit the same to the Senate and the House of Representatives within ten days subsequent to January 2, 1984, and upon approval by Congress, the Secretary shall use the Federal share of such approved estimate in making apportionments for substitute highway projects for the fiscal years ending September 30, 1985, and September 30, 1986. There are authorized to be appropriated for liquidation of obligations incurred under this pararaph the sums provided in section 4(g) of the Urban Mass Transportation Act of 1964. Fifty per centum of the funds appropriated for each fiscal year beginning after September 30, 1983, for carrying out substitute transit projects under this paragrah shall be distributed at the discretion of the Secretary. The remaining 50 per centum of such funds shall be apportioned in accordance with cost estimates approved by Congress. The Secretary shall make an estimate of the cost of completing substitute transit projects under this paragraph and transmit the same to the Senate and the House of Representatives as soon as practicable after the date of enactment of this sentence. Upon approval of such cost estimate by Congress, the Secretary shall use the Federal share of such approved estimate in making apportionments for substitute transit projects for the fiscal year ending September 30, 1984. The Secretary shall make a revised estimate of the cost of completing substitute transit projects under this paragraph and transmit the same to the Senate and the House of Representatives within ten days subsequent to January 2, 1984, and upon approval by Congress, the Secretary shall use the Federal share of such approved estimate in making apportionments for substitute transit projects for the fiscal years ending September 30, 1985, and September 30, 1986.".

(2) Section 103(e)(4) of title 23, United States Code, is amended by striking out the sixth sentence and inserting in lieu thereof the following: "The sums apportioned under this paragraph for public mass transit projects shall remain available for the fiscal year for which apportioned and for the succeeding fiscal year. The sums available for obligation under this paragraph for projects under any highway assistance program shall remain available for the fiscal year for which apportioned and for the succeeding fiscal year. Any sums which are apportioned to a State for a fiscal year and are unobligated (other than an amount which, by itself, is insufficient to pay the Federal share of the cost of a substitute project which has been submitted by the State to the Secretary for approval) at the end of such fiscal year shall be apportioned among those States which have obligated all sums (other than such an amount) apportioned to them for such fiscal year, in accordance with the latest approved estimate of the cost of completing the appropriate substitute projects in such States.".

(b) Section 103(e)(4) of title 23, United States Code, is amended by adding at the end thereof the following: "Any route or segment thereof which was statutorily designed after March 7, 1978, to be on the Interstate System shall not be eligible for withdrawal or substitution under this subsection.".

(c)(1) Section 103(e)(4) of title 23, United States Code, is further amended by—

(A) inserting in the second sentence after the words "approved by Congress," the following: "or up to and including the 1983 interstate cost estimate, whichever is earlier,";

(B) striking out in the second sentence "the date of enactment of the Federal-Aid Highway Act of 1976 or" and "whichever is later, and in accordance with the design of the route or portion thereof that is the basis of the latest cost estimate";

(C) inserting in the second sentence after "approval of each substitute project under this paragraph," the following: "or the date of approval of the 1983 interstate cost estimate, whichever is earlier.".

(2) Notwithstanding any other provision of law, with respect to any route or portion thereof on the Interstate System approval of which is or has been withdrawn under section 103(e)(4) of title 23 United States Code, in any case where the sum determined under the second sentence of such section is less than the cost to complete the withdrawn route or portion (in accordance with the design of such route or portion on the date of such withdrawal) as of June 30, 1980, as a result of decreases in construction costs, the sum which shall be available to the Secretary under such sentence shall be an amount equal to such cost of completion as of June 30, 1980.

(d) The third sentence of section 103(e)(4) of title 23, United States Code, is amended by striking out the period and inserting in lieu thereof the following: ", and except that with respect to any route which on May 12, 1982, is under judicial injunction prohibiting its construction the Secretary may approve substitute projects and withdrawals on such route until September 30, 1985.".

(e)(1) The first sentence of section 103(e)(4) of title 23, United States Code is amended by striking "which is within an urbanized area or which passes through and connects urbanized areas within a State and".

(2) The second sentence of section 103(e)(4) of title 23, United States Code is amended by striking "which will serve the urbanized area and the connecting nonurbanized area corridor from which the interstate route or portion thereof was withdrawn, which are selected by the responsible local officials of the urbanized area or area to be served, and which are submitted by the Governor of the State in which the withdrawn route was located." and inserting in lieu thereof, "which will serve the area or areas from which the interstate route or portion thereof was withdrawn, which are selected by the responsible local officials of the area or areas to be served, and which are selected by the Governor or the Governors of the State or the States in which the withdrawn route was located if the withdrawn route was not within an urbanized area or did not pass through and connect urbanized areas, and which are submitted by the Governors of the States in which the withdrawn route was located.".

(f) The first sentence of section 122 of title 23, United States Code, is amended to read as follows: "Any State that shall use the proceeds of bonds issued by the State, county, city, or other political subdivision of the State for the construction of one or more projects on the Federal-aid primary or Interstate system, or extensions of any of the Federal-aid highway systems in urban areas, or for substitute highway projects approved under section 103(e)(4) of this title, may claim payment of any portion of the sums apportioned to it for expenditure on such system or on highway projects approved under section 103(e)(4) of this title to aid in the retirement of the principal of such bonds the proceeds of which were used for projects on the Federal-aid primary system or extensions of any of the Federal-aid highway systems in urban areas and the retirement of the principal and interest of such bonds the proceeds of which were used for projects on the Interstate System at their maturities, to the extent that the proceeds of such bonds have been actually expended in the construction of one or more of such projects.".

(g) Section 107(e) of the Federal-Aid Highway Act of 1978 is amended by adding at the end thereof the following new sentence: "For purposes of this subsection, the term 'construction' has the meaning such term has under section 101(a) of title 23, United States Code."

FEDERAL-AID PRIMARY FORMULA

SEC. 108. (a) Notwithstanding section 104(b)(1) of title 23, United States Code, and any other provision of law, amounts authorized for fiscal years 1983, 1984, 1985, and 1986 for the Federal-aid primary system (including extensions in urban areas and priority primary routes) shall be apportioned in accordance with this section. The Secretary of Transportation shall determine for each State the higher of (1) the amount which would be apportioned to such State under section 104(b)(1) of title 23, United States Code, and (2) the amount which would be apportioned to such State under the following formula:

One-half in the ratio which the population of rural areas of each State bears to the total population of rural areas of all the States as shown by the latest available Federal census and one-half in the ratio which the population in urban areas in each State bears to the total population in urban areas in all the States as shown by the latest Federal census.

(b) The Secretary of Transportation shall, for each of the fiscal years 1983, 1984, 1985, and 1986, determine the total of the amounts determined for each State under subsection (a) and shall determine the ratio which the total amount authorized for such fiscal year for the Federal-aid primary system bears to the total of such amounts determined under subsection (a) for such fiscal year.

(c) The amount which shall be apportioned to each State for the Federal-aid primary system (including extensions in urban areas and priority primary routes) for each of the fiscal years 1983, 1984, 1985, and 1986 shall be the amount determined for such State under subsection (a), multiplied by the ratio determined under subsection (b).

(d) Notwithstanding any other provision of law, no State shall receive an apportionment under this section for any fiscal year which is less than the lower of (1) the amount which the State would be apportioned for such fiscal year under section 104(b)(1) of title 23, United States Code, and (2) the amount which would be determined under the formula set forth in subsection (a). Notwithstanding any other provision of law, no State shall receive for any such fiscal year less than one-half of 1 per centum of the total apportionment under this section for such fiscal year. For purposes of this paragraph and subsection (b) of section 103 of this title, the Virgin Islands, Guam, American Samoa, and the Commonwealth of the Northern Mariana Islands shall be considered together as one State. The State consisting of the Virgin Islands, Guam, American Samoa, and the Commonwealth of the Mariana Islands shall not receive less than one-half of 1 per centum of each year's apportionment. There are authorized to be appro-

priated such sums as may be necessary out of the Highway Trust Fund to carry out this subsection. Funds authorized by this subsection shall be available for obligation in the same manner and to the same extent as if such funds were apportioned under chapter 1 of title 23, United States Code.

(e) Amounts apportioned under this section shall be deemed to be amounts apportioned under section 104(b)(1) of title 23, United States Code, for purposes of such title and all other provisions of law. Terms used in this section shall have the same meaning such terms have in chapter 1 of title 23, United States Code.

(f) Section 103(b)(1) of title 23, United States Code, is amended by striking out "or Puerto Rico" and inserting in lieu thereof "Puerto Rico, the Virgin Islands, Guam, American Samoa, and the Commonwealth of the Northern Mariana Islands."

ENERGY IMPACTED ROADS

SEC. 109. (a) Section 105 of title 23, United States Code, is amended by adding at the end thereof the following new subsection:

"(h) In preparing programs to submit in accordance with subsection (a) of this section, the State highway departments may give priority to projects for the reconstruction, resurfacing, restoration, or rehabilitation of highways which are incurring a substantial use as a result of transportation activities to meet national energy requirements and which will continue to incur such use, and in approving such programs the Secretary may give priority to such projects.".

(b) Section 120 of title 23, United States Code, is amended by adding at the end thereof the following new subsection:

(k) Nothwithstanding any other provision of this section, the Federal share payable on account of any project under this title to reconstruct, resurface, restore, and rehabilitate any highway which the Secretary determines, at the request of any State, is incurring a substantial use as a result of transportation activities to meet national energy requirements and will continue to incur such use is 85 per centum of the cost of such project.".

RESURFACING STANDARDS

SEC. 110. (a) Section 109 of title 23, United States Code, is amended by adding at the end thereof the following new subsection:

"(o) It is the intent of Congress that any project for resurfacing, restoring, or rehabilitating any highway, other than a highway access to which is fully controlled, in which Federal funds participate shall be constructed in accordance with standards to preserve and extend the service life of highways and enhance highway safety.".

(b) The Secretary of Transportation shall enter into appropriate arrangements with the National Academy of Sciences (1) to conduct a study of the safety cost-effectiveness of geometric design criteria of standards currently in effect for construction and reconstruction of highways, other than highways access to which is fully controlled, to determine the most appropriate minimum standards to apply to resurfacing, restoration, and rehabilitation projects on such highways, which study shall include a study of the cost effectiveness of the hot dip galvanizing process for the installation, repair, or replacement of exposed structural and miscellaneous steel, and (2) to propose standards to preserve and extend the service life of such highways and enhance highway safety. The National Academy of Sciences shall conduct such study in cooperation with the National Transportation Safety Board, the Congressional Budget Office, and the American Association of State Highway and Transportation Officials. Upon completion of such study, the National Academy of Sciences shall submit such study and its proposed standards to the Secretary of Transportation for review. Within ninety days after submission of such standards to the Secretary of Transportation, the Secretary shall submit such study and the proposed standards of the National Academy of Sciences, together with the recommendations of the Secretary, to Congress for approval.

(c)(1) The Secretary of Transportation is directed to coordinate a study with the National Bureau of Standards, the American Society for Testing and Materials, and other organizations as deemed appropriate, (A) to determine the existing quality of design, construction, products, use, and systems for highways and bridges; (B) to determine the need for uniform standards and criteria for design, processing, products, and applications, including personnel training and implementation of enforcement techniques; and (C) to determine the manpower needs and costs of developing a national system for the evaluation and accreditation of testing and inspection agencies.

(2) The Secretary shall submit such study to the Congress not later than one year after the date of enactment of this section.

VENDING MACHINES

SEC. 111. Notwithstanding section 111 of title 23, United States Code, before October 1, 1983, any State may permit the placement of vending machines in rest and recreation areas and in safety rest areas constructed or located on rights-of-way of the National System of Interstate and Defense Highways in such State. Such vending machines may only dispense such food, drink, and other articles as the State highway department determines are appropriate and desirable. Such vending machines may ony be operated by the State. In permitting the placement of vending machines under this Section, the State shall give priority to vending machines which are operated through the State licensing agency designated pursuant to section 2(a)(5) of the Act of June 20, 1936, commonly known as the Randolph-Sheppard Act (20 U.S.C. 107a(a)(5)). The cost of installation, operation, and maintenance of vending machines under this section shall not be eligible for Federal assistance under title 23, United States Code.

LETTING OF CONTRACTS

SEC. 112. Section 112 of title 23, United States Code, is amended—

(1) in subsection (b) by striking out "unless the Secretary shall affirmatively find that, under the circumstances relating to such project, some other method is in the public interest" and inserting in lieu thereof "unless the State highway department demonstrates, to the satisfaction of the Secretary, that some other method is more cost effective"; and

(2) in subsection (e) by striking out the period at the end and, inserting in lieu thereof the following: "except where employees of a political subdivision of a State are working on a project outside such political subdivision.".

CONSTRUCTION IN ADVANCE OF APPORTIONMENT

SEC. 113. (a) Section 115(b)(2) of title 23, United States Code, is amended by striking out "1978" each place it appears and inserting in lieu thereof "1983".

(b) Section 115(b) of title 23, United States Code, is amended by adding at the end thereof the following:

"(3) Subject to the provisions of this paragraph, the cost of construction of a project, the Federal share of which the Secretary is authorized to pay under this subsection, shall include the amount of any interest earned and payable on bonds issued by the State to the extent that the proceeds of such bonds have actually expended in the construction of such project. In no event shall the amount of interest considered as a cost of construction of a project under the preceding sentence be greater than the excess of (A) the amount which would be the estimated cost of construction of the project if the project were to be constructed at the time the project is converted to a regularly funded, project, over (B) the actual cost of construction of such project (not including such interest). The Secretary shall consider changes in construction cost indices in determining the amount under clause (A) of this paragraph.".

(c) Section 115(a) of title 23, United States Code, is amended to read as follows:

"(a)(1) When a State has obligated all funds apportioned or allocated to it under section 103(e)(4), 104, or 144 of this title, other than Interstate funds, and proceeds to construct any highway substitute, Federal-aid system, or bridge project, respectively, other than an Interstate project funded under section 104(b)(5) of this title, without the aid of Federal funds in accordance with all procedures and all requirements applicable to such a project, except insofar as such procedures and requirements limit a State to the construction of projects with the aid of Federal funds previously apportioned to it, the Secretary, upon application by such State and his approval of such application, is authorized to pay to such State the Federal share of the costs of construction of such project when additional funds are apportioned to such State under section 103(e)(4), 104, or 144, respectively, of this title if—

"(A) prior to the construction of the project the Secretary approves the plans and specifications therefor in the same manner as other projects, and

"(B) the project conforms to the applicable standards adopted under section 109 of this title.

"(2) The Secretary may not approve an application under this section unless an authorization for section 103(e)(4), 104, or 144 of the title, as the case may be, is in effect for the fiscal year for which the application is sought beyond the currently authorized funds for such State. No application may be approved which will exceed the State's expected apportionment of such authorizations.".

(d) Section 115(c) of title 23, United States Code, is amended by striking "104" and inserting in lieu thereof "103(e)(4), 104, or 144".

MAINTENANCE

SEC. 114. The second sentence of subsection (c) of section 116 of title 23, United States Code, is amended to read as follows: "If, within ninety days after receipt of such notice, such project has not been put in proper condition of maintenance, the Secretary shall withhold approval of further projects of all types in the State highway district, municipality, county, other political or administrative subdivision of the State, or the entire State in which such project is located, whichever the Secretary deems most appropriate, until such project

shall have been put in proper condition of maintenance.".

INTERSTATE DISCRETIONARY FUNDS

SEC. 115. (a) Section 118(b) of title 23, United States Code, is amended to read as follows:

"(b)(1) Sums apportioned to each Federal-aid system (other than the Interstate System) shall continue available for expenditure in that State for the appropriate Federal-aid system or part thereof (other than the Interstate System) for a period of three years after the close of the fiscal year for which such sums are authorized and any amounts so apportioned remaining unexpended at the end of such period shall lapse.

"(2) Except as otherwise provided in this subsection, sums apportioned for the Interstate System in any State shall remain available for expenditure in that State for the Interstate System until the end of the fiscal year for which authorized. Sums not obligated within the time period prescribed by the preceding sentence shall be made available by the Secretary for projects on the Interstate System (other than projects for which sums are apportioned under section 104(b)(5)(B)) in accordance with the following priorities: First, for high cost projects which directly contribute to the completion of an Interstate segment which is not open to traffic; and second, for projects of high cost in relation to a State's apportionment. Sums may only be made available under this paragraph in any State if the Secretary determines that the State has obligated all of its apportionments other than an amount which, by itself, is insufficient to pay the Federal share of the cost of a project on the Interstate System which has been submitted by such State to the Secretary for approval, and the applicant is willing and able to (A) apply the funds to a ready-to-commence project; and (B) in the case of construction work, begin work within ninety days of obligation. Sums made available under this paragraph shall remain available until expended.

"(3) Any amount apportioned to the States for the Interstate System under subsection (b)(5)(B) of section 104 of this title shall continue to be available for expenditure in that State for a period of two years after the close of the fiscal year for which such sums are authorized. Sums not obligated within the time period prescribed by the preceding sentence shall be made available by the Secretary for projects for resurfacing, restoring, rehabilitating, and reconstructing the Interstate System to any other State applying for such funds, if the Secretary determines that the State has obligated all of its apportionments under such subsection other than an amount which, by itself, is insufficient to pay the Federal share of the cost of such a project which has been submitted by such State to the Secretary for approval, and the applicant is willing and able to (A) obligate the funds within one year of the date the funds are made available; (B) apply them to a ready-to-commence project; and (C) in the case of construction work, begin work within ninety days of obligation. Sums made available under this paragraph shall remain available until expended.

"(4) Sums apportioned to a Federal-aid system for any fiscal year shall be deemed to be expended if a sum equal to the total of the sums apportioned to the State for such fiscal year and previous fiscal years is obligated. Any Federal-aid highway funds released by the payment of the final voucher or by the modification of the formal project agreement shall be credited to the same class of funds, primary, secondary, urban, or interstate, previously apportioned to the State and be immediately available for expenditure."

"(b) Section 118 of title 23 United States Code is amended by relettering subsections (c) and (d) as subsections (e) and (f), respectively, and by adding after subsection (b) thereof the following new subsections:

"(c) Before any apportionment is made under section 104(b)(5)(A) of this title for a fiscal year beginning after September 30, 1983, the Secretary shall set aside $300,000,000. Such amount shall be available only for obligation by the Secretary in accordance with subsection (b)(2) of this section.

"(d) In addition to amounts otherwise available to carry out this section, an amount equal to the amount by which the unobligated apportionment for the Interstate System in any State is reduced under section 103(e)(4) of this title on account of the withdrawal of a route or portion thereof on the Interstate System, which withdrawal is approved after the date of enactment of this subsection, shall be available to the Secretary for obligation in accordance with subsection (b)(2) of this section.".

INTERSTATE SYSTEM RESURFACING TRANSFERS

SEC. 116. (a)(1) Section 119(a) of title 23, United States Code, is amended by inserting after the first sentence the following: "In addition to projects approved under the preceding sentence, beginning with funds apportioned for fiscal year 1984, the Secretary may approve projects for resurfacing, restoring, rehabilitating, and reconstructing those routes or portions thereof on the Interstate System designated before the date of enactment of this sentence under section 139(a) of this title (other than routes on toll roads not subject to a Secretarial agreement provided for in section 105 of the Federal-Aid Highway Act of 1978) which routes or portions were so designated in conjunction with the withdrawal of approval of another route or portion thereof on the Interstate System under section 103(e)(4) of this title.".

(2) The last sentence of section 119(a) of title 23, United States Code, is amended by striking out "designated under sections 103 and 139(c) of this title" and inserting in lieu thereof "under this subsection".

(3) The last sentence of section 139(a) of title 23, United States Code, is amended by striking out the period at the end thereof and inserting in lieu thereof the following: ", except that any State may use funds available to it under section 104(b)(1) of this title and, beginning with funds apportioned for fiscal year 1984, under section 104(b)(5)(B) of this title for the resurfacing, restoring, rehabilitating, and reconstructing of any route or portion thereof on the Interstate System on which a project may be approved under the second sentence of section 119(a) of this title.".

(b) The last subsection of section 119 of title 23, United States Code, is relettered as subsection (c).

(c) Section 119 of title 23, United States Code, is amended by adding at the end thereof the following new subsection:

"(d) Upon application by a State and approval by the Secretary, the Secretary may authorize the transfer of so much of the amount apportioned to such State for any fiscal year under paragraph (5)(A) of subsection (b) of section 104 of this title, as does not exceed the Federal share of the cost of segments of the Interstate System open to traffic in such State (other than high occupancy vehicle lanes), in the most recent cost estimate, to the apportionment under paragraph (5)(B) of subsection (b) of section 104 of this title, except that not more than 50 per centum of the total apportionment under such paragraph (5)(A) for a fiscal year shall be transferred under this subsection for such fiscal year. The next cost estimate submitted to Congress under paragraph (5)(A) of subsection (b) of such section 104 of the cost of completing segments of the Interstate System open to traffic in that State (other than high occupancy vehicle lanes) shall be reduced for such State in an amount equal to the amount transferred under this subsection.".

FEDERAL SHARE

SEC. 117. (a) Section 120(c) of title 23, United States Code, is amended by adding at the end thereof the following new sentence: "Notwithstanding subsection (a) of this section, the Federal share payable on account of any project financed with primary funds on the Interstate System for resurfacing, restoring, rehabilitating, and reconstructing shall be the percentage provided in this subsection.".

(b) Section 120(d) of title 23, United States Code, is amended by inserting "or for pavement marking" after "signalization" and by adding at the end thereof the following: "The Federal share payable on account of any project for traffic control signalization under section 103(e)(4) of this title may amount to 100 per centum of the cost of construction of such project.".

(c) Section 120 of title 23, United States Code, is amended by adding at the end thereof the following new subsection:

"(j) Nothwithstanding any other provision of this section (other than subsection (i)), of this title, or of any other law, in any case where a State elects to use funds apportioned to it for any Federal-aid system for any project under sections 143, 148, and 155, of this title and for those priority primary routes under section 147 of this title designated in Committee Print Numbered 97-61 of the Committee on Public Works and Transportation of the House of Representatives, the Federal share payable on account of such project shall be 95 per centum of the cost thereof, unless—

"(1) such project is on land owned by the United States in which case the Federal share shall be 100 per centum of the cost of such project, or

"(2) a Federal share of the cost of the project greater than 95 per centum is specifically authorized by law.".

FRINGE AND CORRIDOR PARKING

SEC. 118. Section 137 of title 23, United States Code, is amended by inserting the following new subsection (f):

"(f)(1) The Secretary may approve for Federal financial assistance from funds apportioned under section 104(b)(5)(B) of this title, projects for designating existing facilities, or for acquisition of rights of way or construction of new facilities, for use as preferential parking for carpools, provided that such facilities (A) are located outside of a central business district and within an interstate highway corridor, and (B) have as their primary purpose the reduction of vehicular traffic on the interstate highway.

"(2) Nothing in this subsection, or in any rule or regulation issued under this subsection, or in any agreement required by this subsection, shall prohibit (A) any State, political subdivision, or agency or instrumentality thereof, from contracting with any person to operate any parking facility designated or constructed under this subsection,

or (B) any such person from so operating such facility. Any fees charged for the use of any such facility in connection with the purpose of this subsection shall not be in excess of the amount required for operation and maintenance, including compensation to any person for operating the facility.

"(3) For the purposes of this subsection, the terms 'facilities' and 'parking facilities' are synonymous and shall have the same meaning given 'parking facilities' in subsection (c) of this section.".

NONDISCRIMINATION

SEC. 119. (a) The first and third sentences of subsection (a) of section of 140 title 23, United States Code, are amended by striking the words "or national origin" and inserting in lieu thereof the words ", national origin, or sex".

(b) Section 140 of title 23, United States Code, is amended by adding new subsection (c) as follows:

"(c) The Secretary, in cooperation with any other department or agency of the Government, State agency, authority, association, institution, corporation (profit or nonprofit), or any other organization or person, is authorized to develop, conduct, and administer training programs and assistance programs in connection with any program under this title in order that minority businesses may achieve proficiency to compete, on an equal basis, for contracts and subcontracts. Whenever apportionments are made under subsection 104(a) of this title, the Secretary shall deduct such sums as he may deem necessary, not to exceed $10,000,000 per fiscal year, for the administration of this subsection. The provisions of section 3709 of the Revised Statutes, as amended (41 U.S.C. 5), shall not be applicable to contracts and agreements made under the authority herein granted to the Secretary notwithstanding the provisions of section 302(c) of the Federal Property and Administrative Service Act of 1949 (41 U.S.C. 252(e)).".

(c) The title of section 140 of title 23, United States Code, is amended to read as follows:

"§ 140. Nondiscrimination"

and the analysis of chapter 1 of title 23, United States Code, is amended by striking out

"140. Equal employment opportunity."

and inserting in lieu thereof

"140. Nondiscrimination.".

PUBLIC TRANSPORTATION

SEC. 120. (a) The last sentence of section 142(a)(1) of title 23, United States Code, is amended by inserting "and the cost of providing shuttle service to and from the facility" after "of the facility" and by inserting "and for providing such shuttle service" after "operating the facility".

(b) Section 142 of title 23, United States Code, is amended as follows:

(1) In subsection (a)(1) in the first sentence the words "bus lanes" and insert in lieu thereof "high occupancy vehicle lanes" and delete the words "bus and other" and insert in lieu thereof "high occupancy vehicle and".

(2) In subsection (b) delete the word "bus" and insert in lieu thereof "high occupancy vehicle".

(3) In subsection (f) delete the words "public mass transportation systems" and insert in lieu thereof "high occupancy vehicles".

BRIDGE PROGRAM APPORTIONMENT

SEC. 121. (a) Subsection (e) of section 144 of title 23, United States Code, is amended to read as follows:

"(e) Funds authorized to carry out this section shall be apportioned among the several States on October 1 of the fiscal year for which authorized in accordance with this subsection. Each deficient bridge shall be placed into one of the following categories: (1) Federal-aid system bridges eligible for replacement, (2) Federal-aid system bridges eligible for rehabilitation, (3) off-system bridges for replacement, and (4) off-system bridges for rehabilitation. The square footage of deficient bridges in each category shall be multiplied by the respective unit price on a State-by-State basis, as determined by the Secretary; and the total cost in each State divided by the total cost of the deficient bridges in all States shall determine the apportionment factors. No State shall receive more than 10 per centum or less than 0.25 per centum of the total apportionment for any one fiscal year. The Secretary shall make these determinations based upon the latest available data, which shall be updated annually.".

(b) The amendment made by subsection (a) of this section shall take effect October 1, 1982, and shall apply with respect to each fiscal year beginning on or after such date. Notwithstanding subsection (e) of section 144 of title 23, United States Code, as soon as practical after the date of enactment of this Act, the Secretary of Transportation shall apportion under such subsection (e), as amended by subsection (a) of this section, sums authorized to be appropriated to carry out such section 144 for the fiscal year ending September 30, 1983.

HIGHWAY BRIDGE REPLACEMENT AND REHABILITATION

SEC. 122. (a) Subsection (g) of section 144 of title 23, United States Code, is amended by inserting after "(g)" the following: "(1)". Such subsection is further amended by striking out the fourth and fifth sentences and by adding at the end thereof the following:

"(2) Of the amount authorized per fiscal year for each of the fiscal years ending September 30, 1983, September 30, 1984, September 30, 1985, and September 30, 1986, by section 5(a)(1) of the Federal-Aid Highway Act of 1982 and section 202(1) of the Highway Safety Act of 1982, all but $200,000,000 per fiscal year shall be apportioned as provided in subsection (e) of this section $200,000,000 per fiscal year of the amount authorized for each of the fiscal years ending September 30, 1983, September 30, 1984, September 30, 1985, and September 30, 1986, shall be available for obligation on the date of each such apportionment in the same manner and to the same extent as the sums apportioned on such date, except that the obligation of such $200,000,000 shall be at the discretion of the Secretary and shall be only for projects for those highway bridges the replacement or rehabilitation cost of each of which is more than $10,000,000, and for any project for a highway bridge the replacement or rehabilitation costs of which is less than $10,000,000 if such cost is at least twice the amount apportioned to the State in which such bridge is located under subsection (e) of this section for the fiscal year in which application is made for a grant for such bridge. Not less than 15 per centum nor more than 35 per centum of the amount apportioned to each State in each of the fiscal years ending September 30, 1983, September 30, 1984, September 30, 1985, and September 30, 1986, shall be expended for projects to replace or rehabilitate highway bridges located on public roads, other than those on a Federal-aid system. The Secretary after consultation with State and local officials may, with respect to a State, reduce the requirement for expenditure for bridges not on a Federal-aid system when he determines that such State has inadequate needs to justify such expenditure.".

(b) Notwithstanding section 144 of title 23, United States Code, and any other provision of law, the Secretary of Transportation may approve under such section 144 (including subsection (g)) a project to relocate and replace (1) any bridge across a river located on a two-lane Federal-aid highway which is in a slide area, in a flood plain, and in the vicinity of and north of Cloverdale, California, together with (2) all highways and approaches required as a result of such relocation and replacement.

(c) Notwithstanding section 144 of title 23, United States Code, and any other provision of law, the Secretary of Transportation may approve under such section 144 (including subsection (g)) a project to replace the LaSalle Peru Bridge which is part of a complete replacement of United States 51 in a new location.

CARPOOL AND VANPOOL PROJECTS

SEC. 123. (a) Section 120(d) of title 23, United States Code, is amended by inserting before ", may amount to 100 per centum" the following: " or for commuter carpooling and vanpooling".

(b) The Secretary of Transportation is authorized and directed to expend such sums as are necessary out of the administrative funds authorized by subsection (a) of section 104, title 23, United States Code, to carry out the provisions of subsection (d) of section 126 of the Federal-Aid Highway Act of 1978.

ALLOCATION OF URBAN FUNDS

SEC. 124. Section 150 of title 23, United States Code, is amended by adding the following sentence at the end thereof: "Funds allocated to an urbanized area under the provisions of this section may, at the request of the Governor and upon approval of the appropriate local officials of the area and the Secretary, be transferred to the allocation of another such area in the State or to the State for use in any urban area.".

HAZARD ELIMINATION PROGRAM EXTENSION

SEC. 125. Subsection (c) of section 152 of title 23, United States Code, is amended to read as follows:

"(c) Funds authorized to carry out this section shall be available for expenditure on any public road (other than a highway on the Interstate System).".

FEDERAL LANDS HIGHWAYS PROGRAM

SEC. 126. (a) Section 202 of title 23, United States Code, is amended to read as follows:

"§ 202. Allocations

"(a) On October 1 of each fiscal year, the Secretary shall allocate the sums authorized to be appropriated for such fiscal year for forest highways according to the relative needs of the various elements of the national forest system as determined by the Secretary, taking into consideraiton the need for access as identified by the Secretary of Agriculture through renewable resource and land use planning, and the impact of such planning on existing transportation facilities.

"(b) On October 1 of each fiscal year, the Secretary shall allocate the sums authorized to be appropriated for such fiscal year for forest development roads and trails accord-

ing to the relative needs of the various national forests. Such allocation shall be consistent with the renewable resource and land use planning for the various national forests.

"(c) On October 1 of each fiscal year, the Secretary shall allocate the sums authorized to be appropriated for such fiscal year for public lands highways among those States having unappropriated or unreserved public lands, nontaxable Indian lands or other Federal reservations, on the basis of need in such States, respectively, as determined by the Secretary upon application of the State highway departments of the respective States. The Secretary shall give preference to those projects which are significantly impacted by Federal land and resource management activities.

"(d) On October 1 of each fiscal year, the Secretary shall allocate the sums authorized to be appropriated for such fiscal year for park roads and parkways each according to the relative needs of the various elements of the national park system, taking into consideration the need for access as identified through land use planning and the impact of such planning on existing transportation facilities.

"(e) On October 1 of each fiscal year, the Secretary shall allocate the sums authorized to be appropriated for such fiscal year for Indian reservation roads according to the relative needs of the various reservations as jointly identified by the Secretary and the Secretary of the Interior.".

(b) Section 204 of title 23, United States Code, is amended to read as follows:

"§ 204. Federal Lands Highways Program

"(a) Recognizing the need for all Federal roads which are public roads to be treated under the same uniform policies as roads which are on the Federal-aid systems, there is established a coordinated Federal lands highways program which shall consist of the forest highways, public lands highways, park roads, parkways, and Indian reservation roads as defined in section 101 of this title.

"(b) Funds available for forest highways and public lands highways shall be used by the Secretary to pay for the cost of construction and improvement thereof. Funds available for park roads, parkways, and Indian reservation roads shall be used by the Secretary of the Interior to pay for the cost of construction and improvement thereof. In connection therewith, the Secretary and the Secretary of the Interior, as appropriate, may enter into construction contracts and such other contracts with a State or civil subdivision thereof or Indian tribe as deemed advisable. In the case of Indian reservation roads, Indian labor may be employed in such construction and improvement under such rules and regulations as may be prescribed by the Secretary of the Interior. No ceiling on Federal employment shall be applicable to construction or improvement of Indian reservation roads.

"(c) Before approving as a project on an Indian reservation road any project on a Federal-aid system in a State, the Secretary must determine that the obligation of funds for such project is supplementary to and not in lieu of the obligation, for projects on Indian reservation roads of a fair and equitable share of funds apportioned to such State under section 104 of this title.

"(d) Cooperation of States, counties, or other local subdivisions may be accepted in construction and improvement, and any funds received from a State, county, or local subdivision shall be credited to appropriations available for the class of Federal lands highways to which such funds were contributed.

"(e) Construction of each project shall be performed by contract awarded by competitive bidding, unless the Secretary or the Secretary of the Interior shall affirmatively find that, under the circumstances relating to such project, some other method is in the public interest. Notwithstanding the foregoing, the provisions of section 23 of the "Buy Indian" Act of June 25, 1910 (36 Stat. 891), and the provisions of section 7(b) of the Indian Self-Determination and Education Assistance Act of 1975 (88 Stat. 2205) shall apply to all funds administered by the Secretary of the Interior which are appropriated for the construction and improvement of Indian reservation roads.

"(f) All appropriations for the construction and improvement of each class of Federal lands highways shall be administered in conformity with regulations and agreements jointly approved by the Secretary and the Secretary of the appropriate Federal land managing agency.

"(g) The Secretary shall transfer to the Secretary of Agriculture from appropriations for forest highways such amounts as may be needed to cover necessary administrative expenses of the Forest Service in connection with forest highways.

"(h) Funds available for each class of Federal lands highways shall be available for adjacent vehicular parking areas and scenic easements."

(c)(1) The twelfth undesignated paragraph of section 101(a) of title 23, United States Code, defining the term "park roads and trails", is amended to read as follows:

"The term 'park road' means a public road that is located within or provides access to an area in the national park system.".

(2) The tenth undesignated paragraph of section 101(a) of title 23, United States Code, defining the term "Indian reservation roads and bridges" is amended by striking out "The term 'Indian reservation roads and bridges' means roads and bridges, including roads and bridges" and inserting in lieu thereof "The term 'Indian reservation roads' means public roads, including roads".

(3) Section 101(a) of title 23, United States Code, is amended by adding after the third undesignated paragraph, defining the term "county", the following:

"The term 'Federal lands highways' means forest highways, public lands highways, park roads, parkways, and Indian reservation roads which are public roads.".

(d) Sections 206, 207, 208, 209, and 214(c) of title 23, United States Code, are repealed.

(e) The analysis of chapter 2 of title 23, United States Code, is amended—

(1) by striking out

"202. Apportionment for allocation."

and inserting in lieu thereof

"202. Allocations.";

(2) by striking out

"204. Forest highways."

and inserting in lieu thereof

"204. Federal lands highways program.";

and

(3) by striking out

"206. Park roads and trails.
"207. Parkways.
"208. Indian reservation roads.
"209. Public lands highways."

and inserting in lieu thereof

"206. Repealed.
"207. Repealed.
"208. Repealed.
"209. Repealed.".

(f) Sections 201 and 203 of title 23, United States Code, are amended by striking out "park roads and trails" wherever it appears and inserting in lieu thereof "park road".

BICYCLE TRANSPORTATION

SEC. 126. Section 217 of title 23, United States Code, is amended to read as follows:

"§ 217. Bicycle transportation and pedestrian walkway

"(a) To encourage energy conservation and the multiple use of highway rights-of-way, including the development and improvement of pedestrian walkways on or in conjunction with highway rights-of-way, the States may, as Federal-aid highway projects, construct pedestrian walkways. Sums apportioned in accordance with paragraphs (1), (2), and (6) of section 104(b) of this title shall be available for pedestrian walkways authorized under this section and such projects shall be located and designed pursuant to an overall plan which will provide due consideration for safety and contiguous routes.

"(b)(1) To encourage energy conservation, including the development, improvement, and use of bicycle transportation, the States may, as Federal-aid highway projects, construct new or improved lanes, paths, or shoulders; traffic control devices, shelters for and parking facilities for bicycles, and carry out nonconstruction projects related to safe bicycle use. Sums apportioned in accordance with paragraphs (1), (2), and (6) of section 104(b) of this title shall be available for bicycle projects authorized under this section and such projects shall be located and designed pursuant to an overall plan which will provide due consideration for safety and contiguous routes.

"(2) In any case where a highway bridge deck being replaced or rehabilitated with Federal financial participation is located on a highway, other than a highway access to which is fully controlled, on which bicycles are permitted to operate at each end of such bridge, and the Secretary determines that the safe accommodation of bicycles can be provided at reasonable cost as part of such replacement or rehabilitation, then such bridge shall be so replaced or rehabilitated as to provide such safe accommodations.

"(3) No bicycle project shall be authorized by this section unless the Secretary shall have determined that such bicycle project will be principally for transportation, rather than recreation, purposes.

"(c) For all purposes of this title, a pedestrian walkway project authorized by subsection (a) of this section shall be deemed to be a highway project, and the Federal share payable on account of such pedestrian walkway project shall be 100 per centum.

"(d) For all purposes of this title, a bicycle project authorized by subsection (b) of this section shall be deemed to be a highway project, and the Federal share payable on account of such bicycle project shall be 100 per centum.

"(e) Funds authorized for forest highways, forest development roads and trails, public lands development roads and trails, park roads, parkways, Indian reservation roads, and public lands highways shall be available, at the discretion of the department charged with the administration of such funds, for the construction of pedestrian walkways in conjunction with such trails, roads, highways, and parkways.

"(f) Funds authorized for forest highways, forest development roads and trails, public lands development roads and trails, park roads, parkways, Indian reservation roads, and public lands highways shall be available, at the discretion of the department charged with the administration of such funds, for the construction of bicycle routes.

"(g) No motorized vehicles shall be permitted on trails and walkways authorized under this section except for maintenance purposes and, when snow conditions and State or local regulations permit, snowmobiles.

"(h) Not more than $45,000,000 of funds authorized to be appropriated in any fiscal year may be obligated for projects authorized by subsections (a), (b), (e), and (f) of this section. No State shall obligate more than $4,500,000 for such projects in any fiscal year, except that the Secretary may, upon application, waive this limitation for a State for any fiscal year.".

PARKING RAMPS AND FRONTAGE ROADS

SEC. 127. (a) Subsection (b) of section 108 of the Federal-Aid Highway Act of 1956, as amended, is further amended by adding before the last sentence thereof a new sentence as follows: "Notwithstanding any other provision of law, including any other provision of this subsection, where a project is to be constructed (1) to provide parking garage ramps in conjunction with high occupancy vehicle lanes which flow into a distributor system emptying directly into ramps for off-street parking with preferential parking for carpools, vanpools, and buses and the ramps are part of an environmental mitigation effort and are designed to feed into an aerial walkway system, or (2) to provide a parking lot near the terminus of an Interstate System spur route which radiates from an Interstate System beltway which will be used as an intermodal transfer facility for a light rail transit project to be constructed in the median of the spur route and the parking lot is part of an environmental mitigation effort, or (3) to provide a parking garage and associated facilities as part of an intermodal transfer facility with a transit system near or within an Interstate System route right-of-way which will have direct and indirect access to the facility by way of local streets and the parking garage and associated facilities are part of an environmental mitigation effort, or (4) to provide for the comprehensive upgrading of existing high occupancy vehicle lanes, new ramps and parking facilities at mass transit intermodal transfer points on an existing Interstate System route which has temporary high occupancy vehicle lanes in the median and the parking facilities and ramps are part of an environmental mitigation effort, the costs of such parking garage ramps, parking lots, parking garages, associated interchange ramps, high occupancy vehicle lanes, and other associated work eligible under title 23, United States Code, shall be eligible for funds authorized by this subsection as if the costs for these projects were included in the 1981 interstate cost estimated and shall be included as eligible projects in any future interstate cost estimate.".

(b) Notwithstanding the provisions of section 108(b) of the Federal-Aid Highway Act of 1956, as amended, the Secretary of Transportation may approve the expenditure of funds authorized under such section for the construction of a previously approved project which provides for improvements to and reconstruction of ramps and service roads which are being developed as part of a roadway system to relieve a severely congested segment on an Interstate route. Such expenditures shall be limited (1) to work necessary to provide more effective and safe operation of such Interstate route, and (2) to a section of an Interstate route which proceeded to construction contract prior to the date of enactment of such Act and which Interstate route, together with service roads, was constructed without the expenditure of any funds authorized by such section.

PROJECT ELIGIBILITY

SEC. 128. In any case where a project involving a Federal-aid primary route not on the Interstate System, and a route on the Interstate System which was originally constructed without the expenditure of any funds authorized under section 108(b) of the Federal-Aid Highway Act of 1956, as amended, and was subsequently added to the Interstate System, both occupying a common alignment and having elements which have been approved in concept by the Secretary of Transportation as part of a project providing for the upgrading of an interchange on such Interstate route, the cost of improvements in the vicinity of the interchange necessary to upgrade the safety of that part of such Federal-aid primary route not on a common alignment with such Interstate route in an environmentally acceptable manner shall be eligible for the expenditure of funds authorized by such section 108(b).

ACCELERATION OF PROJECTS

SEC. 129. The Secretary of Transportation shall by rule or regulation establish, as soon as practicable, alternative methods for processing projects under title 23, United States Code, so as to reduce the time required from the request for project approval through the completion of construction. In carrying out this section the Secretary shall utilize the knowledge and experience resulting from the demonstration project authorized by and carried out under section 141 of the Federal-Aid Highway Act of 1976.

FOUR-LANE BRIDGES

SEC. 130 Whenever any law of the United States, enacted after January 1, 1970, and before the date of enactment of this Act, authorizes payment, in financing the relocation of an existing road, for the cost of construction of a two-lane bridge with a substructure and deck truss capable of supporting a four-lane bridge, payment for the cost of completing the construction of such bridge as a four-lane bridge is authorized upon the completion of such substructure and deck truss.

DEMONSTRATION PROJECTS

SEC. 131. (a)(1) The Secretary of Transportation is authorized to carry out a demonstration project in Los Angeles County, California, for the purpose of demonstrating methods of improving the motor vehicle transportation of freight to and from areas for the transshipment of waterborne commerce.

(2) There is authorized to be appropriated to carry out this subsection, out of the Highway Trust Fund, not to exceed $19,000,000 for the fiscal year ending September 30, 1983, not to exceed $19,000,000 for the fiscal year ending September 30, 1984, and not to exceed $20,000,000 for the fiscal year ending September 30, 1985.

(3) Funds authorized by this subsection shall be available for obligation in the same manner and to the same extent as if such funds were apportioned under chapter 1 of title 23, United States Code, except that the Federal share of the cost of any project under this subsection shall be 100 per centum of the total cost thereof and such funds shall remain available until expended.

(b)(1) The Secretary of Transportation shall carry out a highway project to demonstrate state of the art technology which can be applied to a section of highway the construction of which will close a gap of not more than 10 miles in a multi-lane limited access approach road through hilly terrain connecting a city (not directly connected to the Interstate System by such an approach road) with a route on such System on which tolls are charged. For comparison purposes, the highway section shall connect both highway construction using current technology and older completed highway construction. The project shall demonstrate the latest high-type geometric design features and new advances in highway traffic control and safety hardware. All design elements, including the highway pavement, shall be designed to provide the best life-cycle costs, thereby minimizing future maintenance costs. The Secretary of Transportation shall provide necessary technical assistance in the design and construction of the project. Upon completion of the project, the highway shall be added to the Federal-aid primary system.

(2) Not later than one year, six years and eleven years after the completion of the state of the art technology project, the Secretary of Transportation shall submit reports to the Congress, including but not limited to the results of such project, the effects of using the best available technology on safety and other considerations, recommendations for applying the results to other highway projects, and any changes that may be necessary by law to permit further use of such features.

(3) There is authorized to be appropriated to carry out this subsection, out of the Highway Trust Fund, not to exceed $5,000,000 for the fiscal year ending September 30, 1983, $10,000,000 for the fiscal year ending September 30, 1984, and $62,000,000 for the fiscal year ending September 30, 1985. Such funds shall be available until expended, shall be available for obligation in the same manner and to the same extent as if apportioned under chapter 1 of title 23, United States Code, and shall not be subject to any obligation limitation. The Federal share payable for the state of the art technology project shall be 100 per centum.

(c)(1) The Secretary of Transportation shall conduct a project to demonstrate state of the art methods of repairing damaged highways, and preventing damage to highways, resulting from shoreline erosion. Such project shall be carried out in the vicinity of Buhne Point, Humboldt Bay, California, at a cost not to exceed $9,000,000 for fiscal years beginning after September 30, 1982, out of the Highway Trust Fund.

(2) The Secretary of Transportation may enter with the heads of other departments, agencies, and instrumentalities of the Federal Government into such arrangements as may be necessary to carry out the provisions of this subsection.

(3) The Secretary of Transportation shall submit to Congress a report on the results of the demonstration project not later than 180 days after completion of such project.

(4) Funds authorized by this subsection shall be available for obligation in the same manner and to the same extent as if such funds were apportioned under chapter 1 of title 23, United States Code, except that the Federal share of the cost of any project under this subsection shall be 100 per centum of the total cost thereof and such funds shall remain available until expended.

(d)(1) The Secretary of Transportation is authorized to carry out a demonstration project in the vicinity of East Baton Rouge, Louisiana, for the purpose of demonstrating the efficacy of reducing traffic congestion in the immediate vicinity of a partial-diamond, partial-cloverleaf interchange which connects an east-west highway on the Interstate System and a four lane highway not on such system by providing a direct access ramp to, and a travel lane on, the Interstate highway and by eliminating a crossover which is used for access to the Interstate highway.

(2) There is authorized to be appropriated to carry out this subsection, out of the Highway Trust Fund, not to exceed $5,000,000 for the fiscal years beginning after September 30, 1982.

(3) Funds authorized by this subsection shall be available for obligation in the same manner and to the same extent as if such funds were apportioned under chapter 1 of title 23, United States Code, except that the Federal share of the cost of any project under this subsection shall be 100 per centum of the total cost thereof and such funds shall remain available until expended.

(e)(1) The Secretary of Transportation is authorized to carry out a demonstration project in the vicinity of Louisville, Kentucky, for the purpose of demonstrating methods of accelerating construction of high traffic sections of highways on the Federal-aid primary system which are directly connected to the Interstate System.

(2) The Secretary of Transportation shall submit to Congress a report on the results of the demonstration project carried out under this subsection not later than 180 days after completion of such project.

(3) There is authorized to be appropriated to carry out this subsection, out of the Highway Trust Fund, not to exceed $25,000,000 for the fiscal year ending September 30, 1983, and not to exceed $27,000,000 for the fiscal year ending September 30, 1984; Any amount obligated after December 1, 1982, and before the date of enactment of this Act for a project described in paragraph (1) of this subsection from funds apportioned under section 104 of title 23, United States Code, may be deobligated and funds authorized by this subsection may be obligated for such project in place of such deobligated amounts. Any amounts deobligated under the preceding sentence shall be recredited to the State's apportionment from which such amount were obligated.

(4) Funds authorized by this subsection shall be available for obligation in the same manner and to the same extent as if such funds were apportioned under chapter 1 of title 23, United States Code, except that the Federal share of the cost of any project under this subsection shall be 100 per centum of the total cost thereof and such funds shall remain available until expended.

VEHICLE WEIGHT, LENGTH, AND WIDTH LIMITATIONS

SEC. 133. (a) Section 127 of title 23 of the United States Code is amended to read:

(f)(1) The Secretary of Transportation, in cooperation with the State of Vermont, shall carry out a project to demonstrate the feasibility of reducing the time and the cost required to complete highway projects, other than projects on the Interstate System, in areas that require improved access between rapidly growing suburban areas and established urban core areas, by extending the coverage of State certifications under section 117(a) of title 23 of the United States Code, to any Federal law, regulation, or policy that applies to such projects.

(2) In implementing this subsection, the Secretary shall review applications for projects submitted by the State of Vermont with respect to which the State agrees to assume the responsibility of the Secretary with regard to any such Federal law, regulation, or policy. The Secretary shall be deemed to have fulfilled his responsibility under such law, regulation, or policy, provided that—

(A) the Secretary finds that the State has procedures which are sufficient to assure that the project will be carried out in accordance with the provisions of such law, regulation, or policy;

(B) the State highway department is authorized and consents to accept the jurisdiction of the Federal courts in any suit brought to enforce any such Federal law or regulation; and

(C) the State highway department certifies that the project has been carried out in accordance with the procedures specified under subparagraph (A) of this paragraph.

(3) In carrying out the demonstration project authorized under this subsection, the Secretary may continue to discharge his responsibilities directly with respect to those laws, regulations, and policies for which he finds State procedures are not sufficient.

(4) In implementing this subsection, the Secretary shall consider the procedures developed pursuant to section 141 of the Federal-Aid Highway Act of 1976, as amended, and shall encourage the State to carry out its responsibilities in cooperation with appropriate political subdivisions of the State.

(5) There is authorized to be appropriated out of the Highway Trust Fund to carry out the project authorized under this subsection a sum not to exceed $50,000,000.

(6) Funds authorized by this subsection shall be available for obligation in the same manner and to the same extent as if such funds were apportioned under chapter 1 of title 23, United States Code, except that the Federal share of the cost of any project under this subsection shall be 100 per centum of the total cost thereof and such funds shall remain available until expended.

(7) Not later than six months after the completion of such project, the Secretary shall submit a report to Congress which includes, but is not limited to, a description of the methods used to accomplish the project and the changes, if any, required to adopt expanded certification. The report should also contain recommendations for applying the methods to other highway projects, and any changes to existing law which may be necessary to permit more widespread use of expanded certification acceptance.

(g)(1) The Secretary of Transportation is authorized to carry out demonstration projects in and around Devils Lake, North Dakota, for the purpose of demonstrating construction techniques to prevent wave erosion on closed basin lakes with grade level highway crossings.

(2) The Secretary is authorized to reimburse from funds authorized by paragraph (3) the State of North Dakota for funds previously expended on projects described in paragraph (1).

(3) There is authorized to be appropriated, out of the Highway Trust Fund, to carry out this subsection not to exceed $4,500,000 for the fiscal year ending September 30, 1983.

(4) Funds authorized by this subsection shall be available for obligation in the same manner and to the same extent as if such funds were apportioned under chapter 1 of title 23, United States Code, except that the Federal share of the cost of any project under this subsection shall not exceed 75 per centum of the total cost thereof and such fund shall remain available until expended.

(h)(1) The Secretary of Transportation is authorized to carry out a demonstration project on the Federal-aid urban system for the construction of a high level bridge over a high volume intercoastal waterway segment. The project shall demonstrate the reduced congestion resulting in the downtown area from the construction of such bridge which serves a major port. Such project shall be subject to the provisions of chapter 1 of title 23, United States Code, applicable to highway projects on the Federal-aid system.

(2) There is authorized to be appropriated to carry out this subsection, out of the Highway Trust Fund, not to exceed $23,000,000 for the fiscal year ending September 30, 1983. Such sums shall remain available until expended.

(3) In carrying out this subsection, the Secretary shall consult with the Secretary of the Army and the Commandant of the Coast Guard concerning permit procedures which will expedite completion of this bridge.

(4) The Secretary shall report to Congress upon completion of this project the result of this demonstration project, together with any recommendations the Secretary deems necessary.

(i)(1) The Secretary of Transportation, in cooperation with the State of Idaho, shall conduct a demonstration project on a primary segment of highway experiencing a high incidence of truck accidents and a project to demonstrate cooperation between two railroads and a small urban area. The highway project shall include an analysis of factors contributing to truck accidents such as weather conditions, sight distance, road curvature, roadway width, and gradient and shall also include an analysis of the benefit-cost ratio of certain safety improvements implemented to correct hazards contributing to truck accidents. The railroad crossing project shall demonstrate the benefits of having no railroad through the center of a small urban community.

(2) There is authorized to be appropriated, out of the Highway Trust Fund, to carry out this subsection not to exceed $8,500,000.

(3) Funds authorized by this subsection shall be available for obligation in the same manner and to the same extent as if such funds were apportioned under chapter 1 of title 23, United States Code, except that the Federal share of the cost of any project under this subsection shall be 100 per centum of the total cost thereof and such funds shall remain available until expended.

(4) The Secretary of Transportation shall submit to Congress a report on the results of the demonstration project not later than 180 days after completion of such project.

(j)(1) The Secretary of Transportation shall conduct a demonstration project in the State of Illinois for the purpose of demonstrating the benefits of constructing usable segments of high-volume facilities, developing methods to achieve the effective implementation of massive capital investments made under Federal programs being discontinued.

(2) There are authorized to be appropriated to carry out this subsection, out of the Highway Trust Fund, $25,000,000 for each fiscal year beginning after September 30, 1982, and ending before October 1, 1986. Such sums shall be available until expended, shall be available for obligation in the same manner and to the same extent as if appor-

tioned under chapter 1 of title 23, United States Code, and shall not be subject to any obligation limitation. The Federal share of the cost of any project under this subsection shall be 50 per centum of the total thereof.

FEDERAL SHARE OF BRIDGE PROJECTS

SEC. 132. Notwithstanding any other provision of law, during the two-year period beginning on the date of enactment of this section, with respect to any project in the State of Tennessee for the replacement or rehabilitation of a bridge which is wholly funded from state and local sources, is eligible for Federal funds under section 144 of title 23, United States Code, is certified by the State to have been carried out in accordance with all standards applicable to such projects under such section 144, and is determined by the Secretary upon completion to be no longer a deficient bridge, any amount expended after July 1, 1982, from such State and local sources for such project in excess of 20 per centum of the cost construction thereof may be credited to the non-Federal share of the cost of other projects in such State which are eligible for Federal funds under such section 144, in accordance with procedures established by the Secretary.

"§ 127. Vehicle weight, limitations—Interstate System

"(a) No funds authorized to be appropriated for any fiscal year under provisions of the Federal-Aid Highway Act of 1956 shall be appointed to any State which does not permit the use of the National System of Interstate and Defense Highways within its boundaries by vehicles with a weight of twenty thousand pounds carried on any one axle, including enforcement tolerances, or with a tandem axle weight of thirty-four thousand pounds, including enfocement tolerances, or a gross weight of at least eighty thousand pounds for vehicle combinations of five axles or more. However, the maximum gross weight to be allowed by any State for vehicles using the National System of Interstate and Defense Highways shall be twenty thousand pounds carried on one axle, including enforcement tolerances, and a tandem axle weight of thirty-four thousand pounds, including enforcement tolerances and with an overall maximum gross weight, including enforcement tolerances, on a group of two or more consecutive axles produced by application of the following formula:

$$W = 500\left(\frac{LN}{N-1} + 12N + 36\right)$$

where W equals overall gross weight on any group of two or more consecutive axles to the nearest five hundred pounds, L equals distance in feet between the extreme of any group of two or more consecutive axles, and N equals number of axles in group under consideration, except that two consecutive sets of tandem axles may carry a gross load of thirty-four thousand pounds each providing the overall distance between the first and last axles of such consecutive sets of tandem axles is thirty-six feet or more: Provided, That such overall gross weight may not exceed eighty thousand pounds, including all enforcement tolerances, except for those vehicles and loads which cannot be easily dismantled or divided and which have been issued special permits in accordance with applicable State laws, or the corresponding maximum weights permitted for vehicles using the public highways of such State under laws or regulations established by appropriate State authority in effect on July 1, 1956, except in the case of the overall gross weight of any group of two or more consecutive axles, on the date of enactment of the Federal-Aid Highway Amendments of 1974, whichever is the greater. Any amount which is withheld from apportionment to any State pursuant to the foregoing provisions shall lapse. This section shall not be construed to deny apportionment to any State allowing the operation within such State of any vehicles or combinations thereof which the State determines could be lawfully operated within such State on July 1, 1956, except in the case of the overall gross weight of any group of two or more consecutive axles, on the date of enactment of the Federal-Aid Highway Amendments of 1974. With respect to the State of Hawaii, laws or regulations in effect on February 1, 1960, shall be applicable for the purposes of this section in lieu of those in effect on July 1, 1956. With respect to the State of Michigan, laws or regulations in effect on May 1, 1982, shall be applicable for the purposes of this subsection.

"(b) No State may enact or enforce any law denying reasonable access to motor vehicles subject to this title to and from the Interstate Highway System to terminals and facilities for food, fuel, repairs, and rest.".

MARTIN LUTHER KING BRIDGE

SEC. 134. The Martin Luther King Bridge which crosses the Mississippi River between St. Louis, Missouri, and East St. Louis, Illinois, and is not on a Federal-aid system shall be eligible for assistance under section 144 of title 23, United States Code, to the same extent that any other bridge which is not on a Federal-aid system is eligible for assistance under such section, except that no such assistance shall be made available with respect to such bridge until such bridge—

(1) has been transferred to one or both of the States of Missouri and Illinois;

(2) is freed from tolls; and

(3) otherwise meets the eligibility requirements of such section, and the rules and regulations promulgated thereunder.

MANPOWER STUDY

SEC. 135. The Secretary of Transportation shall undertake to enter into appropriate arrangements with the National Academy of Sciences' Transportation Research Board to conduct a comprehensive study and investigation of future transportation professional manpower needs, including but not limited to prevailing methods of recruitment, training, and financial and other incentives and disincentives which encourage or discourage retention in service of such professional manpower by Federal, State, and local governments. In entering into any arrangement with the National Academy of Sciences for conducting such study and investigation, the Secretary shall request the National Academy of Sciences to report to the Secretary and the Congress not later than two years after the enactment of this Act on the results of such study and investigation, together with its recommendations. The Secretary shall furnish to the Academy at its request any information which the Academy deems necessary for the purpose of conducting the study and investigation authorized by this section.

FERRYBOAT STUDY

SEC. 136. The Office of Technology Assessment shall conduct a comprehensive investigation and study of the feasibility of a high speed ferryboat operation over the waters of the Caribbean Sea between Saint Croix and Saint Thomas in the Virgin Islands in accordance with this section. The Department of Transportation, the Army Corps of Engineers, the National Oceanic and Atmospheric Administration, and all other agencies, offices, and instrumentalities of the United States shall assist the Office in conducting an objective investigation and study of such projected operation. The Office shall evaluate this projected operation for its feasibility under various degrees of commercial and government sponsorship. The Office shall complete and transmit a report on such investigation and study to the Congress no later than January 1, 1984.

STUDY OF FACTORS IN APPORTIONMENT FORMULAS

SEC. 137. (a) The Secretary of Transportation shall study and determine the need for including weather-related factors, particularly the effects of freezing and thawing, in the apportionment formulas for Federal-aid highways under section 104 of title 23, United States Code. The Secretary shall report to Congress not later than four months after the date of enactment of this Act on the results of such study and shall include in such report specific recommendations for changing such apportionment formulas to take into account weather-related factors.

(b)(1) The Secretary of Transportation shall make a full and complete study regarding the procedures for distributing Federal financial assistance for resurfacing, restoring, rehabilitating, and reconstructing routes on the Interstate System in order to maintain a high level of transportation service. The study shall analyze current conditions and factors including, but not limited to, volume and mix of traffic, weight and size of vehicles, environmental, geographical, and meteorological conditions in various States, and other pertinent factors that can be utilized to determine the most equitable and efficient method of apportioning such Federal financial assistance to the several States. In conducting the study the Secretary shall consider such criteria as need, national importance, impact on individual State highway programs, structural and operational integrity, and any other relevant criteria, to determine the most equitable method of distribution.

(2) In conducting this study the Secretary shall consult with other agencies of the Federal Government, the States and their political subdivisions, and other interested private organizations, groups, and individuals.

(3) The Secretary shall report to Congress not later than four months after the date of enactment of this section the results of such study together with recommendations for necessary legislation.

REPORT REGARDING LONGER COMBINATION COMMERCIAL MOTOR VEHICLES

SEC. 138. (a) Within one year after the date of enactment of this Act, the Secretary of Transportation, after consultation with the transportation officials and Governors of the several States and after an opportunity for public comment, shall submit to Congress a detailed report on the potential benefits and costs, if any, to shippers, receivers, operators of commercial motor vehicles, and the general public, that reasonably may be anticipated from the establishment of a national intercity truck route network for the operation of a special class of longer combination commercial motor vehicles.

(b) For the purposes of this section—

(1) the term "longer combination commercial motor vehicles" means multiple-trailer combinations consisting of (A) truck tractor-semitrailer-full trailer, and (B) truck tractor-semitrailer-full trailer full trailer combinations with an overall length not in excess of one hundred and ten feet; and

(2) the term "national intercity truck route network" means a network consisting of a number of controlled-access, interconnecting segments of the National System of Interstate and Defense Highways and other highways of comparable design and traffic capacity including, but not limited to, all such highways where the operation of longer combination commercial motor vehicles is authorized on the date of enactment of this Act.

(c) The detailed report mandated by this section shall include, but need not be limited to, the following:

(1) a specific plan for the establishment of a national intercity truck route network, including the designation of those specific highway segments which would be required to connect the major distribution centers and markets for long-haul intercity freight service; except that the Secretary of Transportation shall not include in the plan any highway segment which, because of design limitations or other factors, cannot accommodate the safe operation of longer combination commercial motor vehicles;

(2) an analysis of the intercity motor freight volume that reasonably can be anticipated to be transported by longer combination commercial motor vehicles over the national intercity truck route network if such network is established by Congress;

(3) an analysis of the fuel savings that reasonably can be anticpated in the transportation of freight by commercial motor vehicle if such network is established by Congress;

(4) an analysis of the productivity gains that reasonably can be anticipated to be achieved in the transportation of freight by commercial motor vehicle if such network is established by Congress;

(5) an analysis of the fuel conservation and productivity gains historically achieved by operators of longer combination commercial motor vehicles;

(6) an analysis of the safety record of longer combination commercial motor vehicle operations that have been conducted prior to the date of enactment of this Act; and

(7) an analysis of the effect of the size and weight limitations, as in effect after the date of enactment of this Act.

(d) In making the findings and determinations required by subsection (c) of this section, and in making the detailed report to Congress required by this section, the Secretary of Transportation shall assume that the longer combination commercial motor vehicles operating on the national intercity truck route network, if and when established by Congress, would be subject to the single- and tandem-axle weight limits imposed by section 127 of title 23, United States Code. The Secretary of Transportation shall further assume that the overall gross weight of such vehicles on a group of two or more consecutive axles shall be limited by the formula set forth in such section, and only by such formula.

(e) In making the detailed report to Congress required by this section, the Secretary of Transportation shall assume that longer combination commercial motor vehicles operating on the national intercity truck route network will have reasonable access to terminals, combination breakup areas, and food and fuel facilities consistent with safe operations of such vehicles.

(f) Nothing in this section shall be construed to establish Federal policy with regard to highway vehicle weight and size standards, nor shall anything in this section be construed to preempt or to affect any State law establishing highway vehicle weight or size standards. The provisions of this section require an investigation and study on the feasibility and propriety of making changes in vehicle weight and size standards which the Congress may choose to consider in the future.

CHANGE IN LOCATION OF INTERSTATE SEGMENTS

SEC. 139. (a) Notwithstanding the provisions of section 4(b) of the Federal-Aid Highway Act of 1981, the Secretary of Transportation may approve a change in location of any Interstate route or segment and approve, in lieu thereof, the construction of such Interstate route or segment on a new location if the original location of such route or segment meets the following criteria: (1) it has been designated under section 103(e) of title 23, United States Code; (2) it is serving Interstate travel as of the date of enactment of this section; (3) it requires improvements which are eligible under the Federal-Aid Highway Act of 1981, and which would either involve major modifications in order to meet acceptable standards or result in severe environmental impacts and such major modifications or mitigation measures relating to the environmental impacts are not cost effective. The cost of the construction of such Interstate route or segment on new location with funds available under section 108(b) of the Federal Aid Highway Act of 1956, as amended, shall not exceed the estimated cost of the eligible improvements on the original location as eligible under the Federal-Aid Highway Act of 1981 and included in the 1983 interstate cost estimate as approved by the Congress. Such cost shall be increased or decreased, as determined by the Secretary, based on changes in construction costs of the original location of the route or segment as of the date of approval of each project on the new location. Upon approval of a new location, and funds apportioned under section 104(b)(5)(A) of title 23, United States Code, which were expended on the route or segment in the original location shall be refunded to the Highway Trust Fund and credited to the unobligated balance of the State's apportionment made under section 104(b)(5)(A) of title 23, United States Code, and other eligible Federal-aid highway funds may be submitted in lieu thereof at the appropriate Federal share.

(b) Where the Secretary of Transportation approves a relocation of an Interstate route or segment under the provisions of subsection (a) of this section, such route or segment shall not be eligible for withdrawal under the provisions of section 103(e)(4) of title 23, United States Code, and shall be subject to the Interstate System completion deadlines provided in subsections (d) and (e) of section 107 of the Surface Transportation Assistance Act of 1978 or subject to Interstate System completion deadlines as may be determined by Congress.

ACCESS CONTROL DEMONSTRATION PROJECTS

SEC. 140. Section 150(b) of the Federal-Aid Highway Act of 1978 is amended by striking out "1983" and inserting in lieu thereof "1985".

REVISION OF PROJECT AGREEMENT

SEC. 141. Notwithstanding any other provision of law, as a condition of reimbursement of the Federal share of the cost of Federal-aid project 23-D-U-54 (100) in New Jersey, the Secretary of Transportation and the New Jersey Department of Transportation shall revise the project agreement for such project to make available financial assistance not to exceed $1,000,000 for the purpose of compensating businesses in the general vicinity of such project that have suffered monetary losses as a result of the temporary bypass established to accommodate the construction of the project.

INNOVATIVE TECHNOLOGIES

SEC. 142. (a) The Congress hereby finds and declares that it is in the national interest to encourage and promote utilization by the States of highway and bridge surfacing, resurfacing, or restoration materials which are produced from recycled materials or which contain asphalt additives to strengthen the materials. Such materials conserve energy and reduce the cost of resurfacing or restoring our highways.

(b) The Secretary of Transportation is hereby authorized for each of the fiscal years through September 30, 1985, to increase the Federal share as provided in sections 119, 120, and 144 of title 23, United States Code, by 5 per centum of any project submitted by the State highway departments which contains in the plans, specifications, and estimates submitted pursuant to section 106, of title 23, United States Code, the use of the materials described in subsection (a). To be eligible for such supplemental Federal assistance, significant amounts of asphalt additives or recycled materials must be used in each project approved by the Secretary.

(c) The Secretary shall establish a procedure within 90 days of the date of enactment of this Act for increasing the Federal share under this section.

ENFORCEMENT OF HEAVY VEHICLE USE TAX

SEC. 143. (a) Section 141 of title 23, United States Code, is amended by adding subsection (d) as follows:

"(d) The Secretary shall reduce the State's apportionment of Federal-aid highway funds under section 104(b)(5) of this title in an amount up to 25 per centum of the amount to be apportioned in any fiscal year beginning after September 30, 1984, during which heavy vehicles, subject to the use tax imposed by section 4481 of the Internal Revenue Code of 1954, may be lawfully registered in the State without having presented proof of payment, in such form as may be prescribed by the Secretary of the Treasury, of the use tax imposed by section 4481 of such Code. Amounts withheld from apportionment to a State under this subsection shall be apportioned to the other States pursuant to the formulas of section 104(b)(5) of this title and shall be available in the same manner and to the same extent as other Interstate funds apportioned at the same time to other States.".

MONITORING OF EFFECT OF DOUBLE BOTTOM TRUCKS

SEC. 144. (a) The Secretary of Transportation shall undertake to enter into appropriate arrangements with the National Academy of Sciences to monitor the effects on the National System of Interstate and Defense Highways of the use of trucks with two trailing units, in light of the amendments made by this Act providing that no State shall prohibit the use of such vehicle combinations. Such monitoring shall include, but need not be limited to, determining the effects of the use of such vehicle combinations on highways and highway safety in urban and rural areas and in different regions of the coun-

try, taking into account differences in age and design features of highways on the Interstate System.

(b) The Secretary of Transportation shall request the National Academy of Sciences to submit a report to the Secretary and the Congress of such monitoring, not later than two years after appropriate arrangements are entered into under subsection (a). The Secretary shall furnish to the Academy, at its request, any information which the Academy deems necessary for the purpose of conducting such monitoring.

TEMPORARY MATCHING FUND WAIVER

SEC. 145. (a) Notwithstanding any other provision of law, the Federal share of any qualifying project approved by the Secretary of Transportation under section 106(a), and of any qualifying project for which the United States becomes obligated to pay under section 117, of title 23, United States Code, during the period beginning on the date of enactment of this Act and ending September 30, 1984, shall be such percentage of the construction cost as the State highway department requests, up to and including 100 per centum.

(b) For purposes of this section, the term "qualifying project" means a project approved by the Secretary of Transportation under section 106(a) of title 23, United States Code, or a project for which the United States becomes obligated to pay under section 117 of title 23, United States Code, for which the Governor of the State submitting the project has certified, in accordance with regulations established by the Secretary of Transportation, that sufficient funds are not available to pay the cost of the non-Federal share of the project.

(c) The total amount which may be obligated for qualifying projects in any State under subsection (a) shall not be greater than the excess of—

(1) the sum of the amount of obligation authority distributed to such State for fiscal year 1983 under section 104(b) of this Act, plus the amount, if any, available to such State under section 155 of this Act, pertaining to minimum allocation, over

(2) the amount of obligation authority distributed to such State for fiscal year 1982 under section 3(b) of the Federal-Aid Highway Act of 1981.

(d) The total amount of such increases in the Federal share as are made pursuant to subsection (a) for any State shall be repaid to the United States by such State on or before September 30, 1984. Such payments shall be deposited in the Highway Trust Fund and such repaid amounts shall be credited to the appropriate apportionment accounts of such State.

(e) If a State has not made the repayment as required by subsection (d) of this section, the Secretary shall deduct from funds apportioned to such State under section 104(b) of title 23, United States Code, except for paragraph (5)(A), in each of the fiscal years ending September 30, 1985, and September 30, 1986, a pro rata share of each category of such apportioned funds, the total amount of which shall be equal to 50 percentum of the amount needed for repayment. Any amount deducted under this subsection shall be reapportioned for the fiscal years 1985 and 1986 in accordance with section 104(b)(1) of title 23, United States Code, to those states which have not received a higher Federal share under this section and to those states which have made the repayment required by subsection (d).

LANE RESTRICTIONS

SEC. 146. The State of California shall not restrict or require the restriction of the use of any lane on any Federal-aid highway in the unincorporated areas of Alameda County, California, to high occupancy vehicles, exclusive of approaches to controlled access highways, toll roads, or bridges.

UPGRADING CERTAIN INTERCHANGES

SEC. 147. Notwithstanding any other provision of law, in the case of any portion of a route on the Interstate System in the State of California which is open to traffic and which has less than two through lanes in either direction in the area where such route connects with a limited access highway on the Federal-aid primary system, a project to improve the portion of the Interstate route to a design of six lanes and to upgrade the interchange between such Interstate route and primary route to accommodate such design shall be eligible for funds authorized by section 108(b) of the Federal-Aid Highway Act of 1956, as amended, as if the costs of such project were included in the 1981 interstate cost estimate and shall be included as an eligible project in the 1983 interstate cost estimate and any later interstate cost estimate.

CONVICT LABOR

SEC. 148. Section 114(b) of title 23, United States Code, is amended by inserting after "Convict labor" the following: "or materials produced by convict labor".

PREVAILING RATE OF WAGE

SEC. 149. Section 113(a) of title 23, United States Code, is amended by striking out "initial".

MINIMUM ALLOCATION

SEC. 150. (a) Chapter 1 of title 23, United States Code is amended by adding at the end thereof the following new section:

"§ 157. Minimum allocation

"(a) In the fiscal year ending September 30, 1983, as soon as practicable after the date of enactment of this Act, and in each of the fiscal years ending September 30, 1984, September 30, 1985, and September 30, 1986, on October 1, the Secretary of Transportation shall allocate among the States, as defined in section 101 of this title amounts sufficient to insure that a State's percentage of the total apportionments in each such fiscal year of Interstate highway substitute, primary, secondary, Interstate, urban, bridge replacement and rehabilitation, hazard elimination, and rail-highway crossings funds under sections 103(e)(4), 104(b), 144, and 152 of this title and section 203 of the Highway Safety Act of 1973, as amended, shall not be less than 85 per centum of the percentage of estimated tax payments attributable to highway users in that State paid into the Highway Trust Fund, other than the Mass Transit Account, in the latest fiscal year for which data is available.

"(b) Amounts allocated pursuant to subsection (a) of this section shall be available for obligation when allocated for the year authorized plus the three succeeding fiscal years, shall be subject to the provisions of this title 23 and may be obligated for Interstate highway substitute, primary, secondary, Interstate, urban, bridge replacement and rehabilitation, hazard elimination, and rail-highway crossings projects. Obligation limitations for Federal-aid highways and highway safety construction programs established by this Act or any subsequent Act shall not apply to obligations made under this section, except where the provision of law establishing such limitation specifically amends or limits the applicability of this sentence. Sums allocated pursuant to this section shall not be considered to be sums allocated for purposes of section 104(b) of the Highway Improvement Act of 1982.

"(c) In order to carry out this section there is authorized to be appropriated out of the Highway Trust Fund, other than the Mass Transit Account, such sums as may be necessary for each of the fiscal years ending September 30, 1983, September 30, 1984, September 30, 1985, and September 30, 1986.".

(b) The analysis for chapter 1 of title 23, United States Code, is amended by adding at the end thereof the following:

"157. Minimum allocation.".

DEMONSTRATION PROJECTS-RAIL HIGHWAY CROSSINGS

SEC. 151. Section 163(p) of the Federal-Aid Highway Act of 1973, as amended, is amended by inserting after "1982," the following: "and $50,000,000 for the fiscal year ending September 30, 1983, and $50,000,000 for the fiscal year ending September 30, 1984, and $50,000,000 for the fiscal year ending September 30, 1985, and $50,000,000 for the fiscal year ending September 30, 1986," and by adding at the end thereof the following: "Notwithstanding any other provision of this section, any project which is not under construction, according to the Secretary of Transportation, by September 30, 1985, shall not be eligible for additional funds under this authorization.".

STUDY OF METHANE CONVERSION FOR HIGHWAY FUEL USE

SEC. 152. The Secretary of Transportation shall study, out of any funds available to the Secretary of Transportation for research purposes, the potential for recovering methane which is released in the process of offshore oil drilling and converting such methane on a floating conversion plant located at the drilling site into methanol for use as a fuel for highway vehicles. Such study shall include, but need not be limited to, a determination of the quality and quantity of the methane which is released at offshore drilling sites at various locations and the costs involved in recovering such methane and converting it in the manner described in the preceding sentence. The Secretary shall also determine the permitting requirements which would apply to such floating conversion plants and the most effective way to implement those permitting requirements. The Secretary shall report to the Congress the results of the study under this section not later than one year after the date of enactment of this Act.

EMERGENCY RELIEF

SEC. 153. (a)(1) The first sentence of subsection (a) of section 125 of title 23, United States Code, is amended by striking the first sentence thereof and inserting in lieu thereof the following: "An emergency fund is authorized for expenditure by the Secretary, subject to the provisions of this section and section 120 of this title, for the repair or reconstruction of highways, roads, and trails which the Secretary shall find have suffered serious damage as the result of (1) natural disaster over a wide area such as by floods, hurricanes, tidal waves, earthquakes, severe storms, or landslides, or (2) catastrophic failures from any external cause, in any part of the United States. In no event shall funds be used pursuant to this section for the repair or reconstruction of bridges which have been permanently closed to all vehicular traffic by the State or responsible local offical because of imminent danger of

collapse due to structural deficiencies or physical deterioration.".

(2) Subsection (a) of section 125 of title 23, United States Code, is further amended by inserting in the second sentence, as that sentence read prior to the amendments made by paragraph (1) of this subsection, after the word "appropriated" the words "from the Highway Trust Fund".

(b) Notwithstanding any other provision of law, all expenditures made under section 125 of title 23, United States Code, prior to the fiscal year ending September 30, 1978, are authorized to have been appropriated from the Highway Trust Fund.

(c) Subsection (a) of section 125 of title 23, United States Code, is amended by inserting in the second sentence after the words "after September 30, 1976," the words "and not more than $100,000,000 is authorized to be expended in any one fiscal year commencing after September 30, 1980,".

(d) Subsection (b) of section 125 of title 23, United States Code, is amended by striking the period at the end of the first sentence, inserting a colon in lieu thereof, and by adding the following: "Provided, That obligations for projects under this section, including those on highways, roads, and trails mentioned in subsection (c) of this section, resulting from a single natural disaster or a single catastrophic failure shall not exceed $30,000,000 in any State.".

(e) The amendments made by subsection (d) of this section shall apply to natural disasters or catastrophic failures which the Secretary finds eligible for emergency relief subsequent to the date of enactment of this section.

(f) Subsection (f) of section 120 of title 23, United States Code, is amended to read as follows:

"(f) the Federal share payable on account of any repair or reconstruction provided for by funds made available under section 125 of this title shall not exceed 100 per centum of the cost thereof: Provided, That the Federal share payable on account of any repair or reconstruction of forest highways, forest development roads and trails, park roads and trails, parkways, public lands highways, public lands development roads and trails, and Indian reservation roads may amount to 100 per centum of the cost thereof. The total cost of a project may not exceed the cost of repair or reconstruction of a comparable facility. As used in this section with respect to bridges and in section 144 of this title, 'a comparable facility' shall mean a facility which meets the current geometric and construction standards required for the types and volume of traffic which such facility will carry over its design life.".

(g) All obligations for projects resulting from a natural disaster or catastrophic failure which the Secretary finds to be eligible for emergency relief subsequent to the date of enactment of this subsection shall provide for the Federal share required by subsection (f) of section 120 of title 23, United States Code, as amended by this section.

(h)(1) Subsection (b) of section 125 of title 23, United States Code, is amended by striking the words "the Federal-aid highway systems, including the Interstate System" and by inserting in lieu thereof the words "the Interstate System, the Primary System, and on any routes functionally classified as arterials or major collectors," in the two places the stricken words appear.

(2) Subsection (c) of section 125 of title 23, United States Code, is amended by striking the works "on any of the Federal-aid highway systems" and inserting in lieu thereof the words "routes functionally classified as arterials or major collectors".

HIGHLAND SCENIC HIGHWAY

SEC. 154. Section 161(f) of the Federal-Aid Highway Act of 1973 is amended to read as follows:

"(f) The Highland Scenic Highway as authorized by subsection (a) of this section and all associated lands and rights-of-way shall be managed as part of the Monongahela National Forest for scenic and recreational purposes. Vehicle use shall be confined to passenger cars, recreational vehicles, and limited truck traffic to the extent such use is compatible with the purpose for which the highway was constructed. Commercial use by trucks shall be limited and controlled by permit.".

DEFENSE ACCESS ROAD

SEC. 155. Section 210(c) of title 23, United States Code, is amended by striking "Not exceeding $5,000,000 of any funds appropriated under the Act approved October 16, 1951 (65 Stat. 422)", and inserting in lieu thereof "Funds appropriated for defense maneuvers and exercises".

RESEARCH AND PLANNING

SEC. 156. (a) Subsection (c) of section 307, title 23, United States Code, is amended by adding paragraph (5) as follows:

"(5) The sums provided pursuant to paragraph (2) of this subsection shall be combined and administered by the Secretary as a single fund which shall be available for obligation for the same period as funds apportioned under section 104(b)(1) of this title.".

(b) Subsection (c)(2) of section 307, title 23, United States Code, is amended by striking "1964" and inserting in lieu thereof "1983", and by striking "section 104" and inserting in lieu thereof "sections 104 and 144".

(c) Section 120 of title 23, United States Code, is amended by adding a subsection (i) as follows:

"(i) The Federal share payable on account of any project financed under section 307(c) of this title shall be 85 per centum, except that in the case of any State containing nontaxable Indian lands, individual and tribal, and public domain lands (both reserved and unreserved) exclusive of national forests and national parks and monuments, exceeding 5 per centum of the total area of all lands therein, the Federal share shall be increased by a percentage of the remaining cost equal to the percentage that the area of all such lands in such State is of its total area, except that such Federal share payable on any project in any State shall not exceed 95 per centum of the total cost of any such project.".

(d) Section 307(c)(1) of title 23, United States Code, is amended by adding in the last sentence after "highways and highway systems" the words "and for study, research and training on engineering standards and construction materials, including evaluation and accreditation of inspection and testing,".

ALASKA HIGHWAY

SEC. 158. Subsection (a) of section 218 of title 23, United States Code, is amended by adding after the second sentence the following: "Notwithstanding any other provision of law, in addition to such funds, upon agreement with the State of Alaska, the Secretary is authorized to expend on such highway any Federal-aid highway funds apportioned to the State of Alaska under this title at a Federal share of 100 percent. Notwithstanding any other provision of law, any obligation limitation enacted for fiscal year 1983 or for any other fiscal year thereafter shall not apply to projects authorized by the preceding sentence.".

DEFINITION

SEC. 159. The definition of the term "construction" in section 101(a), title 23, United States Code, is amended by striking the period at the end thereof and inserting in lieu thereof the following: "and also includes costs incurred by the State in performing Federal-aid project related audits which directly benefit the Federal-aid highway program."

REPORTS

SEC. 160. (a) Section 307 of title 23, United States Code, is amended by adding a new subsection (e) as follows:

"(e) The Secretary shall report to the Congress in January 1983, and in January of every second year thereafter, estimates of the future highway needs of the Nation."

(b) Section 3 of Public Law 89-139, 79 Stat. 578, August 28, 1965, and section 17 of the Federal-Aid Highway Act of 1968 are hereby repealed.

DISCRETIONARY BRIDGE CRITERIA

SEC. 161. The Secretary of Transportation shall develop a selection process for discretionary bridges authorized to be funded under section 144(g) of title 23, United States Code, and shall propose and issue a final regulation no later than six months after the date of enactment of this Act including a formula resulting in a rating factor based on the following criteria for such process. Such criteria shall give funding priority to those discretionary bridges already eligible under section 144(g) of title 23, United States Code. Eligible bridges after the issuance of a final regulation shall only include those with a rating factor of one hundred or less, based on a scale of zero to infinity. The criteria for such additional bridges which the Secretary shall consider are:

(1) sufficiency rating computed as illustrated in appendix A of the Recording and Coding Guide for the Structure Inventory and Appraisal of the Nation's Bridges USDOT/FHWA (latest edition);

(2) average daily traffic using the most current value from the national bridge inventory data.

(3) average daily truck traffic;

(4) defense highway system status;

(5) the State's unobligated balance of funds received under section 144 of title 23, United States Code, and the total funds received under section 144 of title 23, United States Code;

(6) total project cost; and

(7) special consideration should be given to bridges closed to all traffic or restricted to loads less than ten tons. Other unique consideration and the need to administer the program from a balanced national perspective should also be considered.

WITHDRAWAL AND DESIGNATION OF CERTAIN INTERSTATE ROUTES

SEC. 166. (a) Notwithstanding the first sentence of section 103(e)(4) of title 23, United States Code, the Secretary of Transportation shall, upon application of the State of New Jersey, withdraw under such section 103(e)(4) his approval of the designation on the National System of Interstate and Defense Highways of the portion of Interstate Route 95 and Interstate Route 695 from the intersection with Interstate Route 295 in Hopewell Township, Mercer County, New Jersey, to the proposed intersection with

Interstate Route 287 in Franklin Township, Somerset County, New Jersey.

(b) Notwithstanding any other provision of law, the Secretary of Transportation is authorized and directed, pursuant to section 103 of such title, to designate as part of the Interstate Highway System the New Jersey Turnpike from exit 10 to the interchange with the Pennsylvania Turnpike and the Pennsylvania Turnpike from such interchange to and including the proposed interchange with Interstate Route 95 in Bucks County, Pennsylvania.

(c) The Secretary of Transportation is further authorized and directed to designate the highways described in subsection (b) as Interstate Route 95 and assure through proper sign designations the orderly connection of Interstate Route 95 pursuant to this section.

USE OF HIGH OCCUPANCY LANES

SEC. 167. Notwithstanding any provision of this Act or any other law, no funds shall be appropriated for the construction or resurfacing of Federal aid highways which have lanes designated as carpool lanes unless the use of such lanes includes use by motorcycles. Upon certification by the State to the Secretary of Transportation, the State may restrict such use by motorcycles if such use would create a safety hazard.

INFRASTRUCTURE STUDY

SEC. 168. (a) The Committee on Public Works and Transportation is authorized to contract for the design and preparation of a National Public Works Inventory and Assessment and a preliminary analysis of relevant, existing data.

(b) The Committee on House Administration shall make available not more than $3,000,000 for the purpose specified in subsection (a).

BUY AMERICA

SEC. 169. (a) Notwithstanding any other provision of law, the Secretary of Transportation shall not obligate any funds authorized to be appropriated by this Act or by any Act amended by this Act or, after the date of enactment of this Act, any funds authorized to be appropriated to carry out this Act, title 23, United States Code, the Urban Mass Transportation Act of 1964, or the Surface Transportation Assistance Act of 1978 and administered by the Department of Transportation, unless steel, cement, and manufactured products used in such project are produced in the United States.

(b) The provisions of subsection (a) of this section shall not apply where the Secretary finds—

(1) that their application would be inconsistent with the public interest;

(2) that such materials and products are not produced in the United States in sufficient and reasonably available quantities and of a satisfactory quality;

(3) in the case of the procurement of bus and other rolling stock (including train control, communication, and traction power equipment) under the Urban Mass Transportation Act of 1964, that (A) the cost of components which are produced in the United States is more than 50 per centum of the cost of all components of the vehicle or equipment, and (B) final assembly of the vehicle described in this paragraph has taken place in the United States;

(4) that inclusion of domestic material will increase the cost of the overall project contract by more than 10 per centum in the case of projects for the acquisition of rolling, stock, and 25 per centum in the care of all other projects.

(c) For purposes of this section, in calculating components' costs, labor costs involved in final assembly shall not be included in the calculation.

(d) The Secretary of Transportation shall not impose any limitation or condition on assistance provided under this Act, the Urban Mass Transportation Act of 1964, the Surface Transportation Assistance Act of 1978, or title 23, United States Code, which restricts any State from imposing more stringent requirements than this section on the use of articles, materials, and supplies mined, produced, or manufactured in foreign countries in projects carried out with such assistance or restricts any recipient of such assistance from complying with such State imposed requirements.

(e) Section 401 of the Surface Transportation Assistance Act of 1978 is repealed.

TITLE II

SHORT TITLE

SEC. 201. This title may be cited as the "Highway Safety Act of 1982".

HIGHWAY SAFETY AUTHORIZATIONS

SEC. 202. The following sums are hereby authorized to be appropriated:

(1) For bridge replacement and rehabilitation under section 144 of title 23, United States Code, out of the Highway Trust Fund, $1,600,000,000 (reduced by the amount authorized by section 5(a)(1) of the Federal-Aid Highway Act of 1982) for the fiscal year ending September 30, 1983, $1,650,000,000 for the fiscal year ending September 30, 1984, $1,750,000,000 for the fiscal year ending September 30, 1985, $2,050,000,000 for the fiscal year ending September 30, 1986.

(2) for projects for elimination of hazards under section 152 of title 23, United States Code, out of the Highway Trust Fund, $200,000,000 (reduced by the amount authorized by section 5(a)(2) of the Federal-Aid Highway Act of 1982) for the fiscal year ending September 30, 1983, $200,000,000 for the fiscal year ending September 30, 1984, $200,000,000 for the fiscal year ending September 30, 1985, and $200,000,000 for the fiscal year ending September 30, 1986.

HIGHWAY SAFETY

SEC. 203. (a)(1) There is hereby authorized to be appropriated for carrying out section 402 of title 23, United States Code (relating to highway safety programs), by the National Highway Traffic Safety Administration, out of the Highway Trust Fund, $100,000,000 per fiscal year for each of the fiscal years ending September 30, 1985, and September 30, 1986.

(2) Out of the funds authorized to be appropriated under paragraph (1) of this subsection for each of the fiscal years ending September 30, 1985, and September 30, 1986, not less than $20,000,000 per fiscal year shall be obligated under section 402 of title 23, United States Code, for the purpose of enforcing the fifty-five-miles-per-hour speed limit established by section 154 of such title.

(3) Each State shall expend each fiscal year not less than 2 per centum of the amount apportioned to it for such fiscal year of the sums authorized by paragraph (1) of this subsection, for programs to encourage the use of safety belts by drivers of, and passengers in, motor vehicles.

(b) Notwithstanding any other provision of law, the total of all obligations for highway safety programs carried out by the National Highway Traffic Safety Administration under section 402 of title 23, United States Code, shall not exceed $100,000,000 per fiscal year for each of the fiscal years ending September 30, 1985, and September 30, 1986, and the total of all obligations for highway safety programs carried out by the Federal Highway Administration under section 402 of title 23, United States Code, shall not exceed $10,000,000, per fiscal year for each of such fiscal years.

(c) Section 202 of the Highway Safety Act of 1978 is amended as follows:

(1) Paragraph (2) is amended by striking out "and September 30, 1984," and inserting in lieu thereof "September 30, 1984, September 30, 1985, and September 30, 1986.".

(2) Paragraph (3) is amended by striking out "and September 30, 1984." and inserting in lieu thereof "September 30, 1984, September 30, 1985, and September 30, 1986.".

(3) Paragraph (5) is amended by striking out "and September 30, 1984." and inserting in lieu thereof "September 30, 1984, September 30, 1985, and September 30, 1986.".

(d) Of the funds authorized to be appropriated by section 202(3) of the Highway Safety Act of 1978 for any fiscal year ending before October 1, 1982, which have not been obligated for expenditure before the date of enactment of this Act, $9,600,000 shall not be available for obligation, and shall no longer be authorized, on and after such date of enactment.

55 M.P.H. BENEFITS STUDY

SEC. 204. The Secretary of Transportation shall undertake to enter into appropriate arrangements with the National Academy of Sciences to conduct a comprehensive study and investigation of (1) the benefits, both human and economic, of lowered speeds due to the enactment of the 55 mile per hour National Maximum Speed Limit, with particular attention to savings to the taxpayers, and (2) whether the laws of each State constitute a substantial deterrent to violations of the maximum speed limit on public highways within such State. In entering into any arrangement with the National Academy of Sciences for conducting such study and investigation, the Secretary shall request the National Academy of Sciences to report to the Secretary and the Congress not later than twelve months after the date of enactment of this Act on the results of such study and investigation, together with its recommendations. The Secretary shall furnish to such Academy at its request any information which the Academy deems necessary for the purpose of conducting the investigation and study authorized by this section.

RAIL-HIGHWAY CROSSINGS

SEC. 205. The first sentence of subsection (b) of section 203 of the Highway Safety Act of 1973 (Public Law 93-87), as amended, is amended by inserting "and" after "1979," and by striking out "and September 30, 1982" and all that follows through the period at the end of such sentence and inserting in lieu thereof "September 30, 1982, September 30, 1983, September 30, 1984, September 30, 1985, and September 30, 1986.".

PUBLIC INFORMATION

SEC. 206. Section 209 of the Highway Safety Act of 1978 is amended by striking out ", acting through the Administrator of the Federal Highway administration," each place it appears, in subsection (g) by striking out "Federal Highway Administration to" and inserting in lieu thereof "Secretary of Transportation to", and by adding at the end of such section the following new subsection:

"(i) All provisions of chapter 1 of title 23, United States Code, that are applicable to

Federal-aid primary highway funds, other than provisions relating to the apportionment formula and provisions limiting the expenditure of such funds to the Federal-aid systems, shall apply to the funds authorized to be appropriated to carry out this section, except as determined by the Secretary to be inconsistent with this section.".

SAFETY PERFORMANCE REPORTS

SEC. 207. The Secretary of Transportation shall prepare, publish, and submit to Congress not later than December 31 of each calendar year beginning after December 31, 1982, a report on the highway safety performance of each State in the preceding calendar year. Such report shall provide data on highway fatalities and injuries and motor vehicle accidents involving fatalities and injuries and travel in urban areas of each State for each system of highways and in rural areas of such State for each system of highways. Such report shall be in such form and contain such other information on highway accidents as will permit an evaluation and comparison of highway safety performance of the States. For purposes of this section (1) the systems of highways in a State are the Federal-aid primary system, the Federal-aid secondary system, the Federal-aid urban system, and the Interstate System (as such terms are defined in section 101 of title 23, United States Code) and the other highways in such State which are not on the Federal-aid system, and (2) the terms "State", "rural areas", and "urban area" have the meaning such terms have under such section 101.

ANNUAL APPORTIONMENT FORMULA

SEC. 208. The sixth sentence of section 402(c) of title 23, United States Code, is amended by striking out ", except that the apportionments to the Virgin Islands, Guam, and American Samoa shall not be less than one-third of 1 per centum of the total apportionment".

MINIMUM DRINKING AGE

SEC. 209. The Congress strongly encourages each State to prohibit the sale of alcoholic beverages to persons who are less than 21 years of age.

TITLE III

SHORT TITLE

SEC. 301. This title may be cited as the "Federal Public Transportation Act of 1982".

AUTHORIZATIONS OF APPROPRIATIONS

SEC. 302. (a) The Urban Mass Transportation Act of 1964 is amended by striking out sections 21 and 22 and inserting in lieu thereof the following new section:

"AUTHORIZATIONS OF APPROPRIATIONS

"SEC. 21. (a)(1) There is hereby authorized to be appropriated to carry out the provisions of sections 9 and 18 of this Act not to exceed $2,750,000,000 for the fiscal year ending September 30, 1984, $2,950,000,000 for the fiscal year ending September 30, 1985, and $3,050,000,000 for the fiscal year ending September 30, 1986, and funds appropriated under the subsection shall remain available until expended.

"(2)(A) There shall be available from the Mass Transit Account of the Highway Trust Fund only to carry out sections 9A and 18 of this Act $779,000,000 for fiscal year 1983.

"(B) There shall be available from the Mass Transit Account of the Highway Trust Fund only to carry out sections 3, 4(i), 8, and 16(b) of this Act $1,250,000,000 for fiscal year 1984, $1,100,000,000 for fiscal year 1985, and $1,100,000,000 for fiscal year 1986.

"(C) Notwithstanding any other provision of law, approval by the Secretary of a grant with funds made available under subparagraphs (A) and (B) of this paragraph shall be deemed a contractual obligation of the United States for payment of the Federal share of the cost of the project.

"(3) In fiscal year 1983, 2.93 per centum of the amount made available from the Mass Transit Account of the Highway Trust Fund under paragraph (2) of this subsection shall be available to carry out section 18 of the this Act.

"(4) In each of fiscal years 1984, 1985, and 1986, 2.93 per centum of the amount appropriated from the general fund of the Treasury under paragraph (1) of this subsection shall be available to carry out section 18 of this Act and shall remain available until expended.

"(5) Of the funds available for obligation under paragraph (2)(B), $50,000,000 shall be used in each of fiscal years 1984, 1985, and 1986 for the purposes of section 8 of this Act. Nothing herein shall prevent the use of additional funds available under this subsection for planning purposes.

"(b) There is hereby authorized to be appropriated to carry out sections 6, 10, 11(a), 12(a), and 20 of this Act not to exceed $86,250,000 for the fiscal year ending September 30, 1983, $86,000,000 for the fiscal year ending September 30, 1984, and $90,000,000 per fiscal year for each of the fiscal years ending September 30, 1985, and September 30, 1986. Sums appropriated pursuant to this subsection for financing projects funded under section 6 of this Act shall remain available until expended.".

"(b) The second sentence of section 4(a) of such Act is amended by striking out "80 per centum" and inserting in lieu thereof "75 per centum".

"(c) Section 4(C)(3)(A) of such Act is amended by inserting "and" after "September 30, 1931;" and by striking out "; and $1,580,000,000 for the fiscal year ending September 30, 1983".

"(d) Section 4(f) of such Act is amended by striking out "18, 21, and 22," and inserting in lieu thereof "and 18,".

"(e) Section 4(g) of such Act is amended by striking out "such sums as may be necessary" and inserting in lieu thereof "not to exceed $365,000,000 for the fiscal year ending September 30, 1983, $380,000,000 for the fiscal year ending September 30, 1984, $390,000,000 for the fiscal year ending September 30, 1985, and $400,000,000 for the fiscal year ending September 30, 1986,".

BLOCK GRANTS

SEC. 303. (a) The Urban Mass Transportation Act of 1964 is amended by inserting immediately after section 8 the following new sections:

"BLOCK GRANTS

"SEC. 9. (a)(1) Of the amount appropriated from the general fund of the Treasury under section 21(a) of this Act, 8.64 per centum shall be available for expenditure under this section in each fiscal year only in urbanized areas with a population of less than 200,000.

"(2) Of the amount appropriated from the general fund of the Treasury under section 21(a) of this Act, 88.43 per centum shall be available for expenditure under this section in each fiscal year only in urbanized areas with a population of 200,000 or more.

"(b)(1) Of the funds available under subsection (a)(2) of this section, 33.29 per centum shall be available for expenditure in urbanized areas of 200,000 population or more in accordance with this subsection.

"(2) 95.61 per centum of the amount made available under paragraph (1) of this subsection shall be apportioned as follows:

"(A) 60 per centum of the amount so apportioned multiplied by the ratio which the number of fixed guideway revenue vehicle miles attributable to the urbanized area, as determined by the Secretary, bears to the total number of all fixed guideway revenue vehicle miles attributable to all such urbanized areas; and

"(B) 40 per centum of the amount so apportioned multiplied by the ratio which the number of fixed guideway route miles attributable to the urbanized area, as determined by the Secretary, bears to the total number of all fixed guideway route miles attributable to all such urbanized areas.

No urbanized area in which commuter rail service is provided and which has a population of 750,000 or more shall receive less than 0.75 per centum of the sums made available under this paragraph. Under this paragraph, fixed guideway revenue vehicle or route miles provided, and passengers served thereby, in an urbanized area of less than 200,000 population, where such revenue vehicle miles or route miles and passengers served would otherwise be attributable to an urbanized area with a population of 1,000,000 or more in an adjacent State, shall be attributable to the public body in the State in which such urbanized area of less than 200,000 population is located as if the public body were an urbanized area of 200,000 or more so long as such public body contracts, directly or indirectly, for such service. For the purpose of this subsection, the terms 'fixed guideway revenue vehicle miles' and 'fixed guideway route miles' shall include ferry boat operations directly or under contract by the designated recipient.

"(3) 4.39 per centum of the amount made available for expenditure among urbanized areas of 200,000 population or more under paragraph (1) of this section shall be apportioned as follows: in the ratio that the number of fixed guideway vehicle passenger miles traveled multiplied by the number of fixed guideway vehicle passenger miles traveled for each dollar of operating cost in each such urbanized area bears to the sum of the number of fixed guideway vehicle passenger miles traveled multiplied by the number of fixed guideway vehicle passenger miles traveled for each dollar of operating cost in all such urbanized areas. No urbanized area in which commuter rail service is provided and which has a population of 750,000 or more shall receive less than 0.75 per centum of the sums made available under this paragraph.

"(c)(1) Of the funds available under subsection (a)(2) of this section, 66.71 per centum shall be available for expenditure in urbanized areas with a population of 200,000 or more in accordance with this subsection.

"(2) 90.8 per centum of the amount made available under paragraph (1) of this subsection shall be apportioned as follows:

"(A) 73.39 per centum shall be made available for expenditure in only those urbanized areas with a population of 1,000,000 or more, and on the basis of a formula under which such urbanized area will be entitled to receive an amount equal to the sum of—

"(i) 50 per centum of the amount available under this subparagraph multiplied by the ratio which the total bus revenue vehicle miles operated in or directly serving such urbanized area bears to the total bus revenue vehicle miles in all such urbanized areas;

"(ii) 25 per centum of such amount multiplied by the ratio which the population of such urbanized area bears to the total population of all such urbanized areas as shown by the latest Federal census; and

"(iii) 25 per centum of such amount multiplied by a ratio for that urbanized area determined on the basis of population weighted by a factor of density, as determined by the Secretary; and

"(B) 26.61 per centum shall be made available for expenditure in only those urbanized areas with a population of less than 1,000,000 and on the basis of a formula under which such urbanized areas will be entitled to receive an amount equal to the sum of—

"(i) 50 per centum of the amount available under this subparagraph multiplied by the ratio which the total bus revenue vehicle miles operated in or directly serving such urbanized area bears to the total bus revenue vehicle miles in all such urbanized areas;

"(ii) 25 per centum of such amount multiplied by the ratio which the population of such urbanized area bears to the total population of all such urbanized areas as shown by the latest available Federal census; and

"(iii) 25 per centum of such amount multiplied by a ratio for that urbanized area determined on the basis of population weighted by a factor of density, as determined by the Secretary.

"(3) 9.2 per centum of the amount made available under paragraph (1) of this subsection shall be apportioned among urbanized areas of 200,000 population or more as follows: in the ratio that the number of bus passenger miles traveled multiplied by the number of bus passenger miles traveled for each dollar of operating cost in each such urbanized area bears to the sum of the number of bus passenger miles traveled multiplied by the number of bus passenger miles traveled for each dollar of operating cost in all such urbanized areas.

"(d) Funds available under subsection (a)(1) of this section shall be apportioned on the basis of a formula under which urbanized areas of less than 200,000 population shall be entitled to receive an amount equal to the sum of—

"(1) one-half of the total amount so apportioned multiplied by the ratio which the population of such urbanized area bears to the total population of all such urbanized areas as shown by the latest available Federal census; and

"(2) one-half of the total amount so apportioned multiplied by a ratio for that urbanized area determined on the basis of population weighted by a factor of density, as determined by the Secretary.

As used in this section, the term 'density' means the number of inhabitants per square mile.

"(e)(1) The provisions of sections 3(e), 3(f), 3(g), 5(k)(3), 12(c), 13, and 19 shall apply to this section and to every grant made under this section. No other condition, limitation, or other provision of this Act, other than as provided in this section, shall be applicable to this section and to grants for programs of projects made under this section.

"(2) To receive a grant under this section for any fiscal year, a recipient shall, within the time specified by the Secretary, submit a final program of projects prepared pursuant to subsection (f) and the certifications required by paragraph (3).

"(3) Each recipient (including any person receiving funds from a Governor under this section) shall submit to the Secretary annually a certification that such recipient—

"(A) has or will have the legal, financial, and technical capacity to carry out the proposed program of projects;

"(B) has or will have satisfactory continuing control, through operation of lease or otherwise, over the use of the facilities and equipment, and will maintain such facilities and equipment;

"(C) will comply with requirements of section 5(m) of this Act;

"(D) will give the rate required by section 5(m) of this Act to any person presenting a medicare card duly issued to that person pursuant to title II or title XVIII of the Social Security Act;

"(E) in carrying out procurements under this subsection, will use competitive procurements (as defined or approved by the Secretary), will not use procurements utilizing exclusionary or discriminatory specifications, and will carry out procurements in compliance with applicable By America provisions;

"(F) has complied with the requirements of subsection (f);

"(G) has available and will provide the required amount of funds in accordance with subsection (k)(i) of this section and will comply with the requirements of sections 8 and 16 of this Act; and

"(H) has a locally developed process to solicit and consider public comment prior to raising fares or implementing a major reduction of transit service.

"(f) Each recipient shall—

"(1) make available to the public information concerning the amount of funds available under this subsection and the program of projects that the recipient proposes to undertake with such funds;

"(2) develop a proposed program of projects concerning activities to be funded in consultation with interested parties, including private transportation providers;

"(3) publish a proposed program of projects in such a manner to afford affected citizens, private transportation providers, and as appropriate, local elected officials an opportunity to examine its content and to submit comments on the proposed program of projects and on the performance of the recipient; and

"(4) afford an opportunity for a public hearing to obtain the views of citizens on the proposed program of projects.

In preparing the final program of projects to be submitted to the Secretary, the recipient shall consider any such comments and views, particularly those of private transportation providers, and shall, if deemed appropriate by the recipient, modify the proposed program of projects. The final program of projects shall be made available to the public.

"(g)(1) The Secretary shall, at least on an annual basis, conduct, or require the recipient to have independently conducted, reviews and audits as may be deemed necessary or appropriate by the Secretary to determine whether—

"(A) the recipient has carried out its activities submitted in accordance with subsection (e)(2) in a timely and effective manner and has a continuing capacity to carry out those activities in a timely and effective manner; and

"(B) the recipient has carried out those activities and its certifications and has used its Federal funds in a manner which is consistent with the applicable requirements of this Act and other applicable laws.

Audits of the use of Federal funds shall be conducted in accordance with the auditing procedures of the General Accounting Office.

"(2) In addition to the reviews and audits described in paragraph (1), the Secretary shall, not less than once every three years, perform a full review and evaluation of the performance of a recipient in carrying out the recipient's program, with specific reference to compliance with statutory and administrative requirements, and consistency of actual program activities with the proposed program of projects required under subsection (e)(2) of this section and the planning process required under section 8.

"(3) The Secretary may make appropriate adjustments in the amount of annual grants in accordance with the Secretary's findings under this subsection, and may reduce or withdraw such assistance or take other action as appropriate in accordance with the Secretary's review, evaluation, and audits under this subsection.

"(4) No grant shall be made under this section to any recipient in any fiscal year unless the Secretary has accepted a certification for such fiscal year submitted by such person pursuant to subsection (e) of this section.

"(h) The provisions of section 1001 of title 18, United States Code, apply to any certification or submission under this section. In addition, if any false or fraudulent statement or related act within the meaning of section 1001 of title 18, United States Code, is made in connection with a certification of submission under this subsection, the Secretary may terminate and seek appropriate reimbursement of the affected grant or grants directly or by offsetting funds available under this subsection.

"(i) A recipient may request the Secretary to approve its procurement system. If, after consultation with the Office of Federal Procurement Policy, the Secretary finds that such system provides for competitive procurement, the Secretary shall approve such system for use for all procurements financed under this section. Such approval shall be binding until withdrawn. A certification from the recipient under subsection (e)(3)(E) is still required.

"(j) Grants under this section shall be available to finance the planning, acquisition, construction, improvement, and operating costs of facilities, equipment, and associated capital maintenance items for use, by operation or lease or otherwise, in mass transportation service, including the renovation and improvement of a historic transportation facility with related private investment. As used in this section, the term 'associated capital maintenance items' means any equipment and materials each of which costs no less than 1 per centum of the current fair market value of rolling stock comparable to the rolling stock for which the equipment and materials are to be used.

"(k)(1) The Federal grant for any construction project (including capital maintenance items) under this section shall not exceed 80 per centum of the net project cost of such project. The Federal grant for any project for operating expenses shall not exceed 50 per centum of the net project cost of such project. The remainder shall be provided in cash from sources other than Federal funds or revenues from the operation of public mass transportation systems. Any public or private transit system funds so provided shall be solely from undistributed cash surpluses, replacement or depreciation funds or reserves available in cash, or new capital.

"(2) The amount of funds apportioned under this section which may be used for operating assistance shall not exceed 80 per

centum of the amount of funds apportioned in fiscal year 1982 under paragraphs (1)(A), (2)(A), and (3)(A) of section 5(a) of this Act to an urbanized area with a population of 1,000,000 or more, 90 per centum of funds so apportioned to an urbanized area with a population of 200,000 or more and less than 1,000,000 population; and 95 per centum of funds so apportioned to an urbanized area of less than 200,000 population. Notwithstanding the preceding sentence, an urbanized area that became an urbanized area for the first time under the 1980 census may use not to exceed 40 per centum of its apportionment under this section for operating assistance.

"(3) Notwithstanding any other provision of law, the amount of funds apportioned under section 5 of this Act and available for operating assistance in fiscal year 1983 in an urbanized area shall be subject to the limitations set forth in paragraph (2) of this subsection. Subject to the limitation in the preceding sentence, funds apportioned under section 5(a)(4) of this Act in fiscal year 1983 may be used for operating assistance.

"(l)(1) (A) Notwithstanding the provsions of subsection (k)(l), any recipient may, in fiscal years 1983 and 1984, transfer, for use for operating assistance, a portion of its apportionment under this section that otherwise is available only for capital assistance, except that the recipient's total operating assistance under this section (including any amounts transferred from its capital apportionment) for the fiscal year in which the transfer occurs shall not exceed the amount of Federal funds such recipient was apportioned under sections 5(a)(1)(A), 5(a)(2)(A), and 5(a)(3)(A) of this Act for the fiscal year ending September 30, 1982. The total operating assistance under this section (including any amounts transferred from its capital apportionment) for a recipient in an urbanized area that became an urbanized area for the first time under the 1980 census may not exceed 50 per centum of its apportionment under this section.

"(B) Notwithstanding any other provision of law, a recipient may use its capital apportionment under section 5(a)(4) of this Act in fiscal year 1983 for purposes of carrying out a transfer under this subsection. No source of capital assistance under this Act (other than under section 5(a)(4)) may be used for such a transfer in such fiscal year.

"(2) Any recipient that intends to carry out a transfer under this subsection shall, at the time it submits a proposed program of projects to the Secretary under subsection (e)(2)—

"(A) certify that it has provided public notice of its intent to transfer its capital apportionment (including notice of the funding reductions resulting from utilization of this subsection and other requirements of this subsection) and provided an opportunity for public comment; and

"(B) certify that it has developed a three-year plan to assure that in the fiscal year ending September 30, 1985, it will not need to use and will not use its capital apportionment for operating assistance.

"(3) Whenever any recipient transfers its capital apportionment for operating assistance in accordance with the requirements of this subsection, two-thirds of the amount transferred shall be available to the recipient for operating assistance and the remaining one-third amount shall be available to the Secretary to make discretionary grants under this section. In making such discretionary grants, first priority shall be given to anly urbanized area that is apportioned an amount under this section in fiscal year 1983 which is less than the amount such urbanized area was apportioned under section 5 of this Act for the fiscal year ending September 30, 1982. Any amounts remaining shall be available for discretionary construction grants under this section subject to the second and third sentences of section 40a).

"(4) The authority of recipients to use the provisions of this paragraph shall terminate on September 30, 1984.

"(m)(1) The Governor, responsible local officials, and publicly owned operators of mass transportation services in accordance with the planning process required under section 8 of this Act shall designate a recipient or recipients to receive and dispense the funds appropriated under this section that are attributable to urbanized areas of 200,000 or more population. In any case in which a statewide or regional agency or instrumentality is responsible under State laws for the financing, construction and operation, directly, by lease, contract, or otherwise, of public transportation services, such agency or instrumentality shall be the recipient to receive and dispense such funds. As used in this section, the term 'designated recipient' shall refer to a recipient selected according to the procedures required by this section or to a recipient designated in accordance with section 5(b)(1) of this Act prior to the date of enactment of this section.

"(2) Sums apportioned under this subsection not made available for expenditure by designated recipients in accordance with the terms of paragraph (1) shall be made available to the Governor for expenditure in urbanized areas with populations of less than 200,000.

"(n)(1) The Governor may transfer an amount of the State's apportionment under subsection (d) to supplement funds apportioned to the State under section 18(a) of this Act, or to supplement funds apportioned to urbanized areas with populations of 300,000 or less under this subsection. The Governor may make such transfers only after consultation with responsible local officials and publicly owned operators of mass transportation services in each area to which the funding was originally apportioned pursuant to subsection (d). The Governor may transfer an amount of the State's apportionment under section 18(a) to supplement funds apportioned to the State under subsection (d). Amounts transferred shall be subject to the capital and operating assistance limitations applicable to the original apportionments of such amounts.

"(2) A designated recipient for an urbanized area of 200,000 or more population may transfer its apportionment under this section, or a portion thereof, to the Governor. The Governor shall distribute any such apportionment to urbanized areas in the State, including areas of 200,000 or more population, in accordance with this section. Amounts transferred shall be subject to the capital and operating assistance limitations applicable to the original apportionment of such amounts.

"(o) Sums apportioned under this section shall be available for obligation by the recipient for a period of three years following the close of the fiscal year for which such sums are apportioned. Any amounts so apportioned remaining unobligated at the end of such period shall be added to the amount available for apportionment under this section for the succeeding fiscal year.

"MASS TRANSIT ACCOUNT DISTRIBUTION

"SEC. 9A. (a)(1) Of the amount made available from the Mass Transit Account of the Highway Trust Fund under section 21(a) of this Act in fiscal year 1983, 8.64 per centum shall be available for expenditure under this section in such fiscal year only in urbanized areas with a population of less than 200,000.

"(2) Of the amount made available from the Mass Transit Account of the Highway Trust Fund under section 21(a) of this Act in fiscal year 1983, 88.43 per centum shall be available for expenditure under this section in such fiscal year only in urbanized areas with 200,000 population or more.

"(b)(1) Of the funds available under subsection (a)(2) of this section, 66.71 per centum shall be apportioned among urbanized areas with 200,000 population or more as follows:

"(A) 73.39 per centum shall be made available for expenditure in only those urbanized areas with a population of 1,000,000 or more, and on the basis of a formula under which such urbanized area will be entitled to receive an amount equal to the sum of—

"(i) 50 per centum of the amount available under this subparagraph multiplied by the ratio which the total bus revenue vehicle miles operated in or directly serving such urbanized area bears to the total bus revenue vehicle miles in all such urbanized areas:

"(ii) 25 per centum of such amount multiplied by the ratio which the population of such urbanized area bears to the total population of all such urbanized areas as shown by the latest Federal census; and

"(iii) 25 per centum of such amount multiplied by a ratio for that urbanized area determined on the basis of population weighted by a factor of density, as determined by the Secretary; and

"(B) 26.61 per centum shall be made available for expenditure in only those urbanized areas with a population of less than 1,000,000 and on the basis of a formula under which such urbanized area will be entitled to receive an amount equal to the sum of—

"(i) 50 per centum of the amount available under this subparagraph multiplied by the ratio which the total bus revenue vehicle miles operated in or directly serving such urbanized area bears to the total bus revenue vehicle miles in all such urbanized areas;

"(ii) 25 per centum of such amount multiplied by the ratio which the population of such urbanized area bears to the total population of all such urbanized areas as shown by the latest available Federal census; and

"(iii) 25 per centum of such amount multiplied by a ratio for that urbanized area determined on the basis of population weighted by a factor of density, as determined by the Secretary.

"(2) Of the funds available under subsection (a)(2) of this section, 33.29 per centum shall be apportioned among urbanized areas of 200,000 population or more as follows:

"(A) 60 per centum of the amount so apportioned multiplied by the ratio which the number of fixed guideway revenue vehicle miles attributable to the urbanized area, as determined by the Secretary, bears to the total number of all fixed guideway revenue vehicle miles attributable to all such urbanized areas; and

"(B) 40 per centum of the amount so apportioned multiplied by the ratio which the number of fixed guideway route miles attributable to the urbanized area, as determined

by the Secretary, bears to the total number of all fixed guideway route miles attributable to all such urbanized areas.

No urbanized in which commuter rail service is prescribed and which has a population of 750,000 or more shall receive less than 0.75 per centum of the sums made available under this paragraph. Under this paragraph, fixed guideway revenue vehicle or route miles provided, and passengers served thereby, in an urbanized area of less than 200,000 population, where such revenue vehicle miles or route miles and passengers served would otherwise be attributable to an urbanized area with a population of 1,000,000 or more in an adjacent State, shall be attributable to the public body in the State in which such urbanized area of less than 200,000 population is located as if the public body were an urbanized area of 200,000 or more so long as such public body contracts, directly or indirectly, for such service. For the purpose of this paragraph, the terms 'fixed guideway revenue vehicle miles' and 'fixed guideway route miles' shall include ferry boat operations directly or under contract by the designated recipient.

"(c) Funds available under subsection (a)(1) of this section shall be apportioned on the basis of a formula under which urbanized areas of less than 200,000 population shall be entitled to receive an amount equal to the sum of—

"(1) one-half of the total amount so apportioned multiplied by the ratio which the population of such urbanized area bears to the total population of all such urbanized areas in all the States as shown by the latest available Federal census; and

"(2) one-half of the total amount so apportioned multiplied by a ratio for that urbanized area determined on the basis of population weighted by a factor of density, as determined by the Secretary.

As used in this section, the term 'density' means the number of inhabitants per square mile.

"(d)(1) The provisions of subsections (e), (f), (g), (h), (i), (m), and (n) of section 9 of this Act shall apply to grants made under this section.

"(2)(A) Grants under this section shall be made for the purposes described in subsection (j) of section 9 of this Act, except that such grants may not be used for payment of operating expenses.

"(B) The Federal grant for any project under this section shall not exceed 80 per centum of the net project cost of such project.

"(3) The provisions of subsection (o) of section 9 shall apply to grants made under this section, except that amounts remaining unobligated at the end of the 3-year period shall be added to the amount available under section 3 for the succeeding fiscal year.".

EXISTING CAPITAL GRANT PROGRAM

SEC. 304. (a) Section 3(a)(2)(A) of the Urban Mass Transportation Act of 1964 is amended—

(1) by striking out "and" at the end of clause (i);

(2) by striking out the period at the end of clause (ii) and inserting in lieu thereof "; and"; and

(3) by adding at the end thereof the following:

"(iii) sufficient capability to maintain the facilities and equipment.".

(b) Section 3(a) of the Urban Mass Transportation Act of 1964 is amended by adding at the end thereof the following:

"(5) The Secretary shall take into account the adverse effect of decreased commuter rail service in considering applications for assistance under this section for the acquisition of rail lines and all related facilities used in providing commuter rail service which are owned by a railroad subject to reorganization under title 11, United States Code.

"(6) In making grants under this section in fiscal year 1983, the Secretary shall, to the extent practicable, emphasize projects that are labor intensive and that can begin construction or manufacturing within the shortest possible time.".

(c) Section 15(b) of the Urban Mass Transportation Act of 1964 is amended by striking out "section 5" and inserting in lieu thereof "section 5 or 9".

SEC. 305. Section 3(a)(4) of the Urban Mass Transportation Act of 1964 is amended—

(1) by inserting after the first sentence thereof the following: "At least thirty days prior to the issuance of a letter of intent under this paragraph, the Secretary shall notify, in writing, the Committee on Public Works and Transportation of the House of Representatives and the Committee on Banking, Housing, and Urban Affairs of the Senate, of the proposed issuance of such letter of intent.";

(2) by striking out "in section 4(c)" and inserting in lieu thereof the following "to carry out section 3"; and

(3) by adding at the end thereof the following: "Funding for projects covered by letters of intent or letters of commitment issued, and full funding contracts executed, prior to the date of enactment of the Federal Public Transportation Act of 1982 should be funded under this section while not precluding the funding of a portion of such projects using section 9 capital funds unless such funding would impair the recipient's ability to fund routine capital projects under such section. Notwithstanding the provisions of section 4(a), the Federal share of the total project cost of any project under this section covered by a full funding contract, letter of intent, or letter of commitment in effect on the date of enactment of the Federal Public Transportation Act of 1982, or those projects within the federally agreed upon scope for the Washington, District of Columbia, metropolitan area transit system (as of such date), shall not be altered.".

RESEARCH AND TRAINING GRANTS

SEC. 306. (a) Section 4(d) of the Urban Mass Transportation Act of 1964 is amended by striking out "September 30, 1981, and September 30, 1982" and inserting in lieu thereof "and September 30, 1981, $5,000,000 for the fiscal year ending September 30, 1984, and $10,000,000 per fiscal year for each of the fiscal years ending September 30, 1985, and September 30, 1986".

(b) Section 11(b)(5) of such Act is amended to read as follows:

"(5) As a condition to project approval, the amount of the Federal grant must be equally matched from other than Federal funds.".

(c) The first sentence of section 11(b)(7) of such Act is amended by inserting ", which include bona fide research and training in urban transportation" before the period.

AVAILABILITY OF FUNDS—URBAN MASS TRANSIT PROGRAM

SEC. 307. Section 5 of the Urban Mass Transportation Act of 1964 is amended—

(1) by adding immediately after subsection (c)(4) the following:

"(5) Apportionments under this section for fiscal year 1975 shall be deemed to have lapsed on September 30, 1977, and apportionments under this section for fiscal year 1976 shall be deemed to have lapsed on September 30, 1978."; and

(2) by adding at the end thereof the following new subsection:

"(o) Notwithstanding any other provision of this section, any sums apportioned under this section before October 1, 1982, and available for expenditure in any urbanized area or part thereof on such date shall remain available for expenditure in such area or part in accordance with the provisions of this section until September 30, 1985. Any sums so apportioned remaining unobligated on October 1, 1985, shall be added to amounts available for apportionment under section 9 of this Act for the fiscal year ending September 30, 1986.".

COMPETITIVE PROCUREMENT

SEC. 308. Paragraph (2) of subsection (b) of section 12 of the Urban Mass Transportation Act of 1964 is amended to read as follows:

"(2) In lieu of requiring that contracts for the acquisition of rolling stock be awarded based on consideration of performance, standardization, life-cycle costs and other factors, or on the basis of lowest initial capital cost, such contracts may be awarded based on a competitive procurement process. The Secretary shall report to Congress within a year of enactment of the Federal Public Transportation Act of 1982 on any legislative or administrative revisions required to ensure that procurement procedures are fair and competitive.".

DEFINITIONS

SEC. 309. (a) Section 12(c)(1) of the Uran Mass Transportation Act of 1964 is amended by inserting before the semicolon at the end thereof the following: ", and such term also means any bus rehabilitation project which extends the economic life of a bus five years or more".

(b) Section 12(c)(2) of the Urban Mass Transportation Act of 1964 is amended by inserting "or rails" immediately after "separate right-of-way" and by striking out the semicolon at the end of such section and inserting in lieu thereof a comma and the following: "and also means a public transportation facility which uses a fixed catenary system and utilizes a right-of-way usable by other forms of transportation;".

PERFORMANCE REPORTS

SEC. 310. (a) The Secretary of Transportation shall report to Congress in January of 1984 and in January of every second year thereafter his estimates of the current performance and conditions of public mass transportation systems together with recommendations for any necessary administrative or legislative revisions.

(b) In reporting to Congress pursuant to this section, the Secretary shall prepare a comprehensive assessment of public transportation facilities in the United States. The Secretary shall also assess future needs for such facilities and estimate future capital requirements and operation and maintenance requirements for one-, five-, and ten-year periods at specified levels of service.

CONSTRUCTION CONDITION

SEC. 311. The Secretary of Transportation shall only make available Federal financial assistance to the Metropolitan Atlantic Rapid Transit Authority for the construction of the proposed fixed rail line from Doraville, Georgia, to the Atlanta Hartsfield International Airport on the condition that the portion of such line extending north

from Lenos Station to Doraville and the portion of such line extending south from Lakewood Station to the Atlanta Hartsfield International Airport will be constructed simultaneously in usable segments so that revenue passenger service to Doraville and such airport shall commence at approximately the same time. This section shall apply until priorities different from those set forth in the preceding sentence are adopted after September 30, 1983, by a vaild act of the Georgia General Assembly and by a valid resolution of the Board of the Metropolitan Atlanta Rapid Transit Authority.

LOAN REPAYMENT

SEC. 312. (a) The Massachusetts Bay Transportation Authority shall have no obligation to repay the United States 80 per centum of the principal and the interest owed on the following loans entered into with the Secretary of Transporation under the Urban Mass Transportation Act of 1964 for the acquisition of rights-of-way: the loan numbered MA03-9001 entered into on January 26, 1973, and the loan numbered MA23-9010 entered into on December 20, 1976.

(b)(1) The Secretary of Transportation may convert the remaining 20 per centum of the principal and interest owed on the loans described in subsection (a) to grants under the conditions set forth in paragraph (2).

(2) In lieu of the local matching share otherwise required, the grant agreement may provide that State or local funds shall be committed to public transportation projects in the urbanized area, on a schedule acceptable to the Secretary of Transportation, in an amount equal to the local share that would have been required had the amount of principal and interest forgiven under subsection (a) been the Federal share of a capital grant made when the original loan was made. The State or local funds contributed under the terms of the preceding sentence shall be made available for capital projects eligible for funding under section 3(a) of the Urban Mass Transportation Act of 1964 and may not be used to satisfy the local matching requirements for any other grant project.

ADVANCE ACQUISITION OF RIGHTS-OF-WAY

SEC. 313. Section 3(a)(1)(A) of the Urban Mass Transportation Act of 1964 is amended by striking out "and" the second place it appears and by inserting immediately before the semicolon at the end thereof the following: ", and the acquisition of rights-of-way, and relocation, for fixed guideway corridor development for projects in advanced stages of any such detailed alternatives analyses or preliminary engineering".

FEASIBILITY STUDY

SEC. 314. (a) The Secretary of Transportation shall make a grant to the Massachusetts Bay Transportation Authority to conduct a feasibility study to examine the possibility of replacing either any or all three of the existing electric trolley bus lines (and thereby eliminating the overhead power lines) in Cambridge, Massachusetts, with the more advanced and equally environmentally sound electric bus technology that is being developed in the State of California for the Santa Barbara transit system.

(b) Notwithstanding section 21(a)(2) of the Urban Mass Transportation Act of 1964, of the amount made available by such section 21(a)(2) for the fiscal year ending September 30, 1983, $500,000 shall be available only to carry out this section and such amount shall remain available until expended.

STUDY OF LONG-TERM LEVERAGE FINANCING

SEC. 315. The Secretary of Transportation shall conduct a study on the feasibility of providing an assured flow of Federal funds under long-term contracts with local or State transit authorities for use in leveraging further capital assistance from State or local government or private sector sources. Within six months of the date of enactment of this Act, the Secretary shall submit to the Committee on Banking, Housing, and Urban Affairs of the Senate and the Committee on Public Works and Transportation of the House a report of such study.

FORMULA GRANTS FOR NONURBANIZED AREAS

SEC. 316. (a) Section 18(a) of the Urban Mass Transportation Act of 1964 is amended by striking out "appropriated pursuant to section 4(e) of this Act" and inserting in lieu thereof "made available under section 21(a) of this Act to carry out this section".

(b) Section 18(c) of the Urban Mass Transportation Act of 1964 is amended by striking out "three years" in the first sentence and inserting in lieu thereof "two years".

ASSISTANCE TO MEET SPECIAL NEEDS OF ELDERLY AND HANDICAPPED PERSONS

SEC. 317. (a) Section 16(b) of the Urban Mass Transportation Act of 1964 is amended by striking out "section 4(c)(3) of this Act, 2 per centum" and inserting in lieu thereof "section 21(a)(2) of this Act, 3.5 per centum".

(b) The amendment made by subsection (a) of this section shall take effect October 1, 1983.

(c) Section 16 of the Urban Mass Transportation Act of 1964 is amended by adding at the end thereof the following:

"(c) In carrying out subsection (a) of this section, section 165(b) of the Federal-Aid Highway Act of 1973, and section 504 of the Rehabilitation Act of 1973 (consistent with any applicable Government-wide standards for the implementation of such section 504), the Secretary shall, not later than 90 days after the date of the enactment of this subsection, publish in the Federal Register for public comment, proposed regulation and, not later than 180 days after the date of such enactment, promulgate final regulations, establishing (1) minimum criteria for the provision of transportation services to handicapped and elderly individuals by recipients of Federal financial assistance under this Act or under any provision of law referred to in section 165(b) of the Federal-Aid Highway Act of 1973, and (2) procedures for the Secretary to monitor recipients' compliance with such criteria. Such regulations shall include provisions for ensuring that organizations and groups representing such individuals are given adequate notice of and opportunity to comment on the proposed activities of recipients for the purpose of achieving compliance with such regulations.".

REPEAL OF SAFETY AUTHORITY

SEC. 318. (a) Section 107 of the National Mass Transportation Assistance Act of 1974 (Public Law 93-503) is repealed.

(b) The Urban Mass Transportation Act of 1964 is amended by adding at the end therof the following section:

"SAFETY AUTHORITY

SEC. 22. The Secretary may investigate conditions in any facility, equipment, or manner of operation financed under this Act which the Secretary believes creates a serious hazard of death or injury. The investigation should determine the nature and extent of such conditions and the means which might test be employed to correct or eliminate them. If the Secretary determines that such conditions do create such hazard, he shall require the local public body which has received funds under this Act to submit a plan for correcting or eliminating such conditions. The Secretary may withhold further financial assistance under this Act from the local public body until he approves such plan and the local public body implements such plan.".

TITLE IV

PART A—COMMERCIAL MOTOR VEHICLE SAFETY

DEFINITIONS

SEC. 401. For purposes of this part, unless the context otherwise requires, the term—

(1) "commercial motor vehicle" means any self-propelled or towed vehicle used on the highways in commerce principally to transport passengers or cargo—

(A) if such vehicle has a gross vehicle weight rating of ten thousand or more pounds;

(B) if such vehicle is designed to transport more than ten passengers, including the driver; or

(C) if such vehicle is used in the transportation of materials found by the Secretary to be hazardous for the purposes of the Hazardous Materials Transportation Act, as amended (49 U.S.C. 1801 et seq.);

(2) "employee" means—

(A) a driver of a commercial motor vehicle (including an independent contractor while in the course of personally operating a commercial motor vehicle);

(B) a mechanic;

(C) a freight handler; or

(D) any individual other than an employer;

who is employed by a commercial motor carrier and who in the course of his employment directly affects commercial motor vehicle safety, but such term does not include an employee of the United States, any State, or a political subdivision of a State who is acting within the course of such employment, nor does such term include an individual employed by a commercial motor carrier engaged in the transportation of passengers;

(3) "employer" means any person engaged in a business affecting commerce who owns or leases a commercial motor vehicle in connection with that business, or assigns employees to operate it in commerce, but such term does not include the United States, any State, or a political subdivision of a State;

(4) "person" means one or more individuals, partnerships, associations, corporations, business trusts, or any other organized group of individuals;

(5) "Secretary" means the Secretary of Transportation; and

(6) "State" means a State of the United States, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, American Samoa, Guam, or the Commonwealth of the Northern Marianas.

GRANTS TO STATES

SEC. 402. (a) Under the terms and conditions of this section, subject to the availability of funds, the Secretary is authorized to make grants to States for the development or implementation of programs for the enforcement of Federal rules, regulations, standards, and orders applicable to commercial motor vehicle safety and compatible State rules, regulations, standards, and orders.

(b)(1) The Secretary shall formulate procedures for any State to submit a plan whereby the State agrees to adopt, and to assume responsibility for enforcing Federal rules,

regulations, standards, and orders applicable to commercial motor vehicle safety, or compatible State rules, regulations, standards, and orders. Such plan shall be approved by the Secretary if, in the Secretary's judgment, the plan is adequate to promote the objectives of this section, and the plan—

(A) designates the State motor vehicle safety agency responsible for administering the plan throughout the State;

(B) contains satisfactory assurances that such agency has or will have the legal authority, resources, and qualified personnel necessary for the enforcement of such rules, regulations, standards, and orders;

(C) gives satisfactory assurances that such State will devote adequate funds to the administration of such plan and enforcement of such rules, regulations, standards, and orders;

(D) provides a right of entry and inspection sufficient to enforce such rules, regulations, standards, and orders;

(E) provides that all reports required pursuant to this section be submitted to the State agency, and that such agency make available upon request to the Secretary all such reports;

(F) provides that such State agency will adopt such uniform reporting requirements and use such uniform forms for recordkeeping, inspections, and investigations as may be established and required by the Secretary; and

(G) requires registrants of commercial motor vehicles to make a declaration of knowledge of applicable Federal and State safety rules, regulations, standards, and orders.

(2) If a plan submitted under paragraph (1) of this subsection is rejected, the Secretary shall provide the State a written explanation of the Secretary's action and shall permit the State to modify and resubmit its proposed plan for approval, in accordance with the procedures formulated in such paragraph.

(c) The Secretary shall, on the basis of reports submitted by the State agency, and on the Secretary's own inspections, make a continuing evaluation of the manner in which each State with a plan approved under this section is carrying out such plan. Whenever the Secretary finds, after affording due notice and opportunity for comment, that a State plan previously approved is not being followed or that it has become inadequate to assure the enforcement of Federal rules, regulations, standards, or orders applicable to commercial motor vehicle safety or compatible State rules, regulations, standards, or orders, he shall notify the State of withdrawal of approval of such plan. Upon receipt of such notice such plan shall cease to be in effect. Any State aggrieved by a determination of the Secretary pursuant to this subsection may seek judicial review pursuant to chapter 7 of title 5, United States Code. The State may, however, retain jurisdiction in any administrative or judicial enforcement proceeding commenced before the withdrawal of the plan whenever the issues involved do not directly relate to the reasons for the withdrawal of approval of the plan.

(d) The Secretary shall not approve any plan under this section which does not provide that the aggregate expenditure of funds of the State and political subdivisions thereof, exclusive of Federal funds, for commercial motor vehicle safety programs will be maintained at a level which does not fall below the average level of such expenditure for its last two full fiscal years preceding the date of enactment of this section.

FEDERAL SHARE OF COSTS

SEC. 403. By grants authorized under this part, the Secretary shall reimburse any State an amount not to exceed 80 per centum of the costs incurred by that State in that fiscal year in the development and implementation of programs to enforce commercial motor vehicle rules, regulations, standards, or orders adopted pursuant to this title. The funds of the State and political subdivisions thereof which are required to be expended under section 402(d) of this title shall not be considered to be part of the non-Federal share. The Secretary is authorized to allocate, among the States whose applications for grants have been approved, those amounts appropriated for grants to support such programs, pursuant to such criteria as may be established.

AUTHORIZATIONS

SEC. 404. To carry out the purposes of section 402 of this title, there is authorized to be appropriated out of the Highway Trust Fund not to exceed $10,000,000 in the fiscal year ending September 30, 1984, not to exceed $20,000,000 in the fiscal year ending September 30, 1985, not to exceed $30,000,000 in the fiscal year ending September 30, 1986, not to exceed $40,000,000 in the fiscal year ending September 30, 1987, and not to exceed $50,000,000 in the fiscal year ending September 30, 1988. Appropriated funds authorized by this section shall be used to reimburse States pro rata for the Federal share of costs incurred. Grants made pursuant to the authority of this part shall be for periods not to exceed one fiscal year, ending at the end of a fiscal year.

PROTECTION OF EMPLOYEES

SEC. 405. (a) No person shall discharge, discipline, or in any manner discriminate against any employee with respect to the employee's compensation, terms, conditions, or privileges of employee with respect to the employee's compensation, terms, conditions, or privileges of employment because such employee (or any person acting pursuant to a request of the employee) has filed any complaint or instituted or caused to be instituted any proceeding relating to a violation of a commercial motor vehicle safety rule, regulation, standard, or order, or has testified or is about to testify in any such proceeding.

(b) No person shall discharge, discipline, or in any manner discriminate against an employee with respect to the employee's compensation, terms, conditions, or privileges of employment for refusing to operate a vehicle when such operation constitutes a violation of any Federal rules, regulations, standards, or orders applicable to commercial motor vehicle safety or health, or because of the employee's reasonable apprehension of serious injury to himself or the public due to the unsafe condition of such equipment. The unsafe conditions causing the employee's apprehension of injury must be of such nature that a reasonable person, under the circumstances then confronting the employee, would conclude that there is a bona fide danger of an accident, injury, or serious impairment of health, resulting from the unsafe condition. In order to qualify for protection under this subsection, the employee must have sought from his employer, and have been unable to obtain, correction of the unsafe condition.

(c)(1) Any employee who believes he has been discharged, disciplined, or otherwise discriminated against by any person in violation of subsection (a) or (b) of this section may, within one hundred and eighty days after such alleged violation occurs, file (or have filed by any person on the employee's behalf) a complaint with the Secretary of Labor alleging such discharge, discipline, or discrimination. Upon receipt of such a complaint, the Secretary of Labor shall notify the person named in the complaint of the filing of the complaint.

(2)(A) Within sixty days of receipt of a complaint filed under paragraph (1) of this subsection, the Secretary of Labor shall conduct an investigation and determine whether there is reasonable cause to believe that the complaint has merit and notify the complainant and the person alleged to have committed a violation of this section of his findings. Where the Secretary of Labor has concluded that there is reasonable cause to believe that a violation has occurred, he shall accompany his findings with a preliminary order providing the relief prescribed by subparagraph (B) of this paragraph. Thereafter, either the person alleged to have committed the violation or the complainant may, within thrity days, file objections to the findings or preliminary order, or both, and request a hearing on the record, except that the filing of such objections shall not operate to stay any reinstatement remedy contained in the preliminary order. Such hearings shall be expeditiously conducted. Where a hearing is not timely requested, the preliminary order shall be deemed a final order which is not subject to judicial review. Upon the conclusion of such hearing, the Secretary of Labor shall issue a final order within one hundred and twenty days. In the interim, such proceedings may be terminated at any time on the basis of a settlement agreement entered into by the Secretary of Labor, the complainant, and the person alleged to have committed the violation.

(B) If, in response to a complaint filed under paragraph (1) of this subsection, the Secretary of Labor determines that a violation of subsection (a) or (b) of this section has occurred, the Secretary of Labor shall order (i) the person who committed such violation to take affirmative action to abate the violation, (ii) such person to reinstate the complainant to the complainant's former position together with the compensation (including back pay), terms, conditions, and privileges of the complainant's employment, and (iii) compensatory damages. If such an order is issued, the Secretary of Labor, at the request of the complainant may assess against the person against whom the order is issued a sum equal to the aggregate amount of all costs and expenses (including attorney's fees) reasonably incurred, as determined by the Secretary of Labor, by the complainant for, or in connection with, the bringing of the complaint upon which the order was issued.

(d)(1) Any person adversely affected or aggrieved by an order issued after a hearing under subsection (c) of this section may obtain review of the order in the United States Court of Appeals for the circuit in which the violation, with respect to which the order was issued, allegedly occurred, or the circuit in which such person resided on the date of such violation. The petition for review must be filed within sixty days from the issuance of the Secretary of Labor's order. Such review shall be in accordance with the provisions of chapter 7 of title 5, United States Code, and shall be heard and decided expeditiously.

(2) An order of the Secretary of Labor, with respect to which review could have been obtained under this section, shall not be subject to judicial review in any criminal or other civil proceeding.

(e) Whenever a person has failed to comply with an order issued under subsection (c)(2) of this section, the Secretary of Labor shall file a civil action in the United States district court for the district in which the violation was found to occur in order to enforce such order. In actions brought under this subsection, the district courts shall have jurisdiction to grant all appropriate relief, including injunctive relief, reinstatement, and compensatory damages. Civil actions brought under this subsection shall be heard and decided expeditiously.

MINIMUM FINANCIAL RESPONSIBILITY FOR MOTOR CARRIERS

SEC. 406. (a) Section 30 of the Motor Carrier Act of 1980 is amended in subsections (a) and (b) by striking out "two-year" period each place it appears and inserting in lieu thereof "three and one-half year period".

(b) Section 30(c) of the Motor Carrier Act of 1980 is amended by striking out "(c) Financial" and inserting in lieu thereof "(c)(1) Subject to paragraph (2) of this subsection, financial" and by adding at the end thereof the following new paragraph:

"(2)(A) Any person domiciled in any contiguous foreign country who provides transportation by motor vehicle to which any of the minimal levels of financial responsibility established under this section apply shall have evidence of such financial responsibility in such motor vehicle at any time such person is providing such transportation.

"(B) The Secretary of Transportation and the Secretary of the Treasury shall deny entry into the United States of any motor vehicle in which there is not evidence of financial responsibility required to be in such vehicle under subparagraph (A) of this paragraph.".

(c) Section 30(g) of the Motor Carrier Act of 1980 is amended by redesignating paragraphs (1) and (2) as paragraphs (2) and (3), respectively, and by inserting before paragraph (2) (as so redesignated) the following new paragraph:

"(1) 'Interstate commerce' includes transportation between a place in a State and a place outside the United States, to the extent such transportation is in the United States;".

(d) Section 30(f) of the Motor Carrier Act of 1980 is amended to read as follows:

"(f) This section shall not apply to any motor vehicle having a gross vehicle weight rating of less than ten thousand pounds, if such vehicle is not used to transport any quantity of class A or B explosives, any quantity of poison gas, or a large quantity of radioactive materials in interstate or foreign commerce.".

PART B—COMMERCIAL MOTOR VEHICLE LENGTH LIMITATION

LENGTH LIMITATION ON FEDERALLY ASSISTED HIGHWAYS

SEC. 411. (a) No State shall establish, maintain, or enforce any regulation of commerce which imposes a vehicle length limitation of less than forty-eight feet on the length of the semitrailer unit operating in a truck tractor-semitrailer combination, and of less than twenty-eight feet on the length of any semitrailer or trailer operating in a truck tractor-semitrailer-trailer combination, on any segment of the National System of Interstate and Defense Highways and those classes of qualifying Federal-aid Primary System highways as designated by the Secretary, pursuant to subsection (e) of this section.

(b) Length limitations established, maintained, or enforced by the States under subsection (a) of this section shall apply solely to the semitrailer or trailer or trailers and not to a truck tractor. No State shall establish, maintain, or enforce any regulation of commerce which imposes an overall length limitation on commercial motor vehicles operating in truck-tractor semitrailer or truck tractor semitrailer, trailer combinations. No State shall establish, maintain, or enforce any regulation of commerce which has the effect of prohibiting the use of trailers or semitrailers of such dimensions as those that were in actual and lawful use in such State on December 1, 1982. No State shall establish, maintain, or enforce any regulation of commerce which has the effect of prohibiting the use of existing trailers or semitrailers, of up to twenty-eight and one-half feet in length, in a truck tractor-semitrailer-trailer combination if those trailers or semitrailers were actually and lawfully operating on December 1, 1982, within a sixty-five-foot overall length limit in any State.

(c) No State shall prohibit commercial motor vehicle combinations consisting of a truck tractor and two trailing units on any segment of the National System of Interstate and Defense Highways, and those classes for qualifying Federal-aid Primary System highways as designated by the Secretary pursuant to subsection (e) of this section.

(d) The Secretary is authorized to establish rules to implement the provisions of this section, and to make such determinations as are necessary to accommodate specialized equipment (including, but not limited to, automobile transporters) subject to subsections (a) and (b) of this section.

(e)(1) The Secretary shall designate as qualifying Federal-aid Primary System highways subject to the provisions of subsections (a) and (c) those Primary System highways that are capable of safely accommodating the vehicle lengths set forth therein.

(2) The Secretary shall make an initial determination of which classes of highways shall be designated pursuant to paragraph (1) within 90 days of the date of enactment of this section.

(3) The Secretary shall enact final rules pursuant to paragraph (1) no later than 270 days from the date of enactment of this section and may revise such rules from time to time thereafter.

(f) For the purposes of this section, "truck tractor" shall be defined as the noncargo carrying power unit that operates in combination with a semitrailer or trailer, except that a truck tractor and semitrailer engaged in the transportation of automobiles may transport motor vehicles on part of the power unit.

(g) The provisions of this section shall take effect ninety days after the date of enactment of this title.

(h) The length limitations described in this section shall be exclusive of safety and energy conservation devices, such as rear view mirrors, turn signal lamps, marker lamps, steps and handholds for entry and egress, flexible fender extensions, mudflaps and splash and spray suppressant devices, load-induced tire bulge, refrigeration units or air compressors and other devices, which the Secretary may interpret as necessary for safe and efficient operation of commercial motor vehicles, except that no device excluded under this subsection from the limitations of this section shall have by its design or use the capability to carry cargo.

ACCESS TO THE INTERSTATE SYSTEM

SEC. 412. No State may enact or enforce any law denying reasonable access to commercial motor vehicles subject to this title between (1) the Interstate and Defense Highway System and any other qualifying Federal-aid Primary System highways, as designated by the Secretary, and (2) terminals, facilities for food, fuel, repairs, and rest, and points of loading and unloading for household goods carriers.

ENFORCEMENT

SEC. 413. The Secretary, or, on the request of the Secretary, the Attorney General of the United States, is authorized and directed to institute any civil action for injunctive relief as may be appropriate to assure compliance with the provisions of this title. Such action may be instituted in any district court of the United States in any State where such relief is required to assure compliance with the terms of this title. In any action under this section, the court shall, upon a proper showing, issue a temporary restraining order or preliminary or permanent injunction. In any such action, the court may also issue a mandatory injunction commanding any State or person to comply with any applicable provision of this title, or any rule issued under authority of this title.

SPLASH AND SPRAY SUPPRESSANT DEVICES

SEC. 414. (a) The Congress declares that visibility on wet roadways on the Interstate System should be improved by reducing, by a practicable and reliable means, splash and spray from truck tractors, semitrailers, and trailers.

(b) The Secretary shall be regulation—

(1) within one year after the date of the enactment of this title, establish minimum standards with respect to the performance and installation of splash and spray suppression devices for use on truck tractors, semitrailers, or trailers;

(2) within two years after the date of the enactment of this title, require that all new truck tractors, semitrailers, and trailers operated on the Interstate System be equipped with any splash and spray suppression device which satisfies the standards established pursuant to paragraph (1) of this subsection; and

(3) within five years after the date of the enactment of this title, require that all truck trailers, semitrailers, and trailers operated on the Interstate System be equipped with any splash and spray suppression device which satisfies the standards established pursuant to paragraph (1) of this subsection.

(c) For the purposes of this section, the term—

(1) "truck tractor" means the noncargo carrying power unit that operates in combination with a semitrailer or trailer(s);

(2) "semitrailer" and "trailer" mean any semitrailer or trailer, respectively, with respect to which section 411 of this title applies; and

(3) "Interstate System" has the same meaning provided in section 101 of title 23, United States Code.

REPORT REGARDING LONGER COMBINATION COMMERCIAL MOTOR VEHICLES

SEC. 415. (a) Within 18 months after the date of enactment of this title, the Secretary, after consultation with the transportation officials and Governors of the several States and after an opportunity for public comment, shall submit to Congress a detailed report on the potential benefits and costs if any, to shippers, receivers, operators of commercial motor vehicles, and the general public, that reasonably may be anticipated from the establishment of a National inter-

city truck route network for the operation of a special class of longer combination commercial motor vehicles.

(b) For the purposes of this section, the term—

(1) "longer combination commercial motor vehicles" means multiple-trailer combinations consisting of (A) truck tractor-semitrailer-full trailer, and (B) truck tractor-semitrailer-full trailer-full trailer combinations with an overall length not in excess of one hundred and ten feet; and

(2) "national intercity truck route network" means a network consisting of a number of controlled-access, interconnecting segments of the National System of Interstate and Defense Highways and other highways of comparable design and traffic capacity including, but not limited to, all such highways where the operation of longer combination commercial motor vehicles is authorized on the date of enactment of this section.

(c) The detailed report mandated by this section shall include, but need not be limited to, the following—

(1) a specific plan of the establishment of a national intercity truck route network, including the designation of those specific highway segments which would be required to connect the major distribution centers and markets for long-haul intercity freight service, except that the Secretary shall not include in the plan any highway segment which, because of design limitations or other factors, cannot accommodate the safe operation of longer combination commercial motor vehicles;

(2) an analysis of the intercity motor freight volume that reasonably can be anticipated to be transported by longer combination commercial motor vehicles over the national intercity truck route network if such network is established by Congress;

(3) an analysis of the fuel savings that reasonably can be anticipated in the transportation of freight by commercial motor vehicle if such network is established by Congress;

(4) an analysis of the productivity gains that reasonably can be anticipated to be achieved in the transportation of freight by commercial motor vehicle if such network is established by Congress;

(5) an analysis of the fuel conservation and productivity gains historically achieved by operators of longer combination commercial motor vehicles; and

(6) an analysis of the safety record of longer combination commercial motor vehicle operations that have been conducted prior to the date of enactment of this section.

(d) In making the findings and determinations required by subsection (c) of this section, and in making the detailed report to Congress required by this section, the Secretary shall assume that the longer combination commercial motor vehicles operating on the national intercity truck route network, if and when established by Congress, would be subject to the single- and tandem-axle weight limits imposed by section 127 of title 23, United States Code. The Secretary shall further assume that the overall gross weight of such vehicles on a group of two or more consecutive axles shall be limited by the formula set forth in such section, and only by such formula.

(e) In making the detailed report to Congress required by this section, the Secretary shall assume that longer combination commercial motor vehicles operating on the national intercity truck route network will have reasonable access to terminals, combination breakup areas, and food and fuel facilities consistent with safe operations of such vehicles.

PART C—OTHER PROVISIONS

STATE RECREATIONAL BOATING

SEC. 421. (a) The Federal Boat Safety Act of 1971 (Public Law 92-75; 85 Stat. 213) is amended as follows:

(1) By inserting "contract with, and" immediately after "The Secretary may" in the second sentence of section 25(a) (46 U.S.C. 1474(a)) and in section 26(a) (46 U.S.C. 1475(a)) immediately after "promulgate, may".

(2) In section 26 (b) and (c) (46 U.S.C. 1475 (b) and (c))—

(A) by striking "appropriated" and inserting "authorized to be expended"; and

(B) by adding at the end thereof the following: "His action in doing so shall be deemed a contractual obligation of the United States for the payment of the proportional share of the cost of implementing the program.".

(3) In section 26(d) (46 U.S.C. 1475(d))—

(A) by striking "appropriated" in the third and fourth sentences and inserting in lieu thereof "authorized to be expended";

(B) by inserting immediately after the third sentence the following: "Approval of those elements of a combined program shall be deemed a contractual obligation of the United States for the payment of the proportional share of the cost of implementing State recreational boating safety programs pursuant to this Act."; and

(C) by adding at the end thereof the following: "Approval of those elements of a combined program shall be deemed a contractual obligation of the United States for the payment of the proportional share of the cost of implementing State recreational boating facilities programs pursuant to this Act.".

(4) In section 30 (46 U.S.C. 1479) by striking the section heading and all that follows thereafter and inserting in lieu thereof the following:

"AUTHORIZATION OF CONTRACT SPENDING AUTHORITY FOR STATE RECREATIONAL BOATING SAFETY AND FACILITIES IMPROVEMENT PROGRAMS

"SEC. 30. For the purposes of providing financial assistance for State recreational boating safety and facilities improvement programs, the Secretary is authorized to expend, subject to such amounts as are provided in appropriations Acts for liquidation of contract authority, an amount equal to the revenues accruing each fiscal year from the taxes under section 4041(b) of the Internal Revenue Code of 1954 with respect to special motor fuels used as fuel in motor boats and under section 4081 of such Code with respect to gasoline used as fuel in motor boats. Of the funds available for allocations and distribution for recreational boating safety and facilities improvement programs, one-third shall be allocated for recreational boating safety programs and two-thirds shall be allocated for recreational boating facilities improvement programs beginning with fiscal year 1983. any funds authorized to be expended for State recreational and boating safety improvement programs shall remain available until expended and shall be deemed to have been expended only if a sum equal to the total amounts authorized to be expended under this section for the fiscal year in question and all previous fiscal years have been obligated. Any funds that were previously obligated but are released by payment of a final voucher or modification of a program acceptance shall be credited to the balance of unobligated funds and shall be immediately available for expenditure.".

REFORESTATION

SEC. 422. (a) Sections 303 (d) and (e) of the Act of October 14, 1980 (P.L. 96-451, 16 U.S.C. 160a(d) and (e)), are amended to read as follows:

"(d) During each of the fiscal years 1983, 1984, and 1985, the Secretary of Agriculture shall expend all amounts available in the Trust Fund (including any amounts not expended in previous fiscal years) for—

"(1) reforestation and timber stand improvement as set forth in the Congressional policy in section 3(d) of the Forest and Rangeland Renewable Resources Planning Act of 1974 (16 U.S.C. 1601(d)); and

"(2) administrative costs of the Federal Government properly allocatable to the activities described in paragraph (1).

In no event may the Secretary expend less than $104,000,000 out of the Trust Fund in fiscal year 1983 for the purposes of this subsection.

"(e) It is the intent of Congress that the Secretary shall expend all of the funds available in the Trust Fund in each fiscal year. Any such funds which are not expended in a given fiscal year shall remain available for expenditure without fiscal year limitation; except that any funds not expended prior to October 1, 1985, shall, no later than April 30, 1986, be distributed to the States for use in State forestry programs pursuant to the formula set forth in the Act of May 23, 1908 (16 U.S.C. 500, Public Law 136, Sixtieth Congress)."

(b) In section 303(b)(1) of such Act, strike out "and before October 1, 1985,".

SALTONSTALL-KENNEDY ACT AMENDMENT

SEC. 423. (a) Section 2(e) of the Act of August 11, 1939, commonly referred to as the Saltonstall-Kennedy Act (15 U.S.C. 713c-3 (e)), is amended to read as follows:

"(e) Allocation of Fund Moneys.—(1) Notwithstanding any other provision of law, all moneys in the fund shall be used exclusively for the purpose of promoting United States fisheries in accordance with the provisions of this section, and no such moneys shall be transferred from the fund for any other purpose. With respect to any fiscal year, all moneys in the fund, including the sum of all unexpended moneys carried over into that fiscal year and all moneys transferred to the fund under subsection (b) or any other provision of law with respect to that fiscal year, shall be allocated as follows:

"(A) the Secretary shall use no less than 60 percent of such moneys to make direct industry assistance grants to develop the United States fisheries and to expand domestic and foreign markets for United States fishery products pursuant to subsection (c) of this section; and

"(B) the Secretary shall use the balance of the moneys in the fund to finance those activities of the National Marine Fisheries Service which are directly related to development of the United States fisheries pursuant to subsection (d) of this section.

"(2) The Secretary shall, consistent with the number of meritorious applications received with respect to any fiscal year, obligate or expend all of the moneys in the fund described in paragraph (1). Any such moneys which are not expended in a given fiscal year shall remain available for expenditure in accordance with this section

without fiscal year limitation, except that the Secretary shall not obligate such moneys at a rate less than that necessary to prevent the balance of moneys in the fund from exceeding $3,000,000 at the end of any fiscal year.".

(b) The amendment made by subsection (a) of this section shall take effect on October 1, 1983.

OCEAN DUMPING

SEC. 424. (a) Section 104 of the Marine Protection, Research, and Sanctuaries Act of 1972 (33 U.S.C. 1431(b)) is amended by adding the following new subsections at the end thereof:

"(h) Notwithstanding any provision of title I of the Marine Protection, Research, and Sanctuaries Act of 1972 to the contrary, during the two-year period beginning on the date of enactment of this subsection, no permit may be issued under such title I that authorizes the dumping of any low-level radioactive waste unless the Administrator of the Environmental Protection Agency determines—

"(1) that the proposed dumping is necessary to conduct research—

"(A) on new technology related to ocean dumping, or

"(B) to determine the degree to which the dumping of such substance will degrade the marine environment;

"(2) that the scale of the proposed dumping is limited to the smallest amount of such material and the shortest duration of time that is necessary to fulfill the purposes of the research, such that the dumping will have minimal adverse impact upon human health, welfare, and amenities, and the marine environment, ecological systems, economic potentialities, and other legitimate uses;

"(3) after consultation with the Secretary of Commerce, that the potential benefits of such research will outweigh any such adverse impact; and

"(4) that the proposed dumping will be preceded by appropriate baseline monitoring studies of the proposed dump site and its surrounding environment.

Each permit issued pursuant to this subsection shall be subject to such conditions and restrictions as the Administrator determines to be necessary to minimize possible adverse impact of such dumping.

"(i)(1) Two years after the date of enactment of this subsection, the Administrator may not issue a permit under this title for the disposal of radioactive waste material until the applicant, in addition to complying with all other requirements of this title, prepares, with respect to the site at which the disposal is proposed, a Radioactive Material Disposal Impact Assessment which shall include—

"(A) a listing of all radioactive materials in each container to be disposed, the number of containers to be dumped, the structural diagrams of each container, the number of curies of each material in each container, and the exposure levels in rems at the inside and outside of each container;

"(B) an analysis of the environmental impact of the proposed action, at the site at which the applicant desires to dispose of the material, upon human health and welfare and marine life;

"(C) any adverse environmental effects at the site which cannot be avoided should the proposal be implemented;

"(D) an analysis of the resulting environmental and economic conditions if the containers fail to contain the radioactive waste material when initially deposited at the specific site;

"(E) a plan for the removal or containment of the disposed nuclear material if the container leaks or decomposes;

"(F) a determination by each affected State whether the proposed action is consistent with its approved Coastal Zone Management Program;

"(G) an analysis of the economic impact upon other users of marine resources;

"(H) alternatives to the proposed action;

"(I) comments and results of consultation with State officials and public hearings held in the coastal States that are nearest to the affected areas;

"(J) a comprehensive monitoring plan to be carried out by the applicant to determine the full effect of the disposal on the marine environment, living resources, or human health, which plan shall include, but not be limited to, the monitoring of exterior container radiation samples, the taking of water and sediment samples, and fish and benthic animal samples, adjacent to the containers, and the acquisition of such other information as the Administrator may require; and

"(K) such other information which the Administrator may require in order to determine the full effects of such disposal.

"(2) The Administrator shall include, in any permit to which paragraph (1) applies, such terms and conditions as may be necessary to ensure that the monitoring plan required under paragraph (1)(J) is fully implemented, including the analysis by the Administrator of the samples required to be taken under the plan.

"(3) The Administrator shall submit a copy of the assessment prepared under paragraph (1) with respect to any permit to the Committee on Merchant Marine and Fisheries of the House of Representatives and the Committee on Environment and Public Works of the Senate.

"(4) (A) Upon a determination by the Administrator that a permit to which this subsection applies should be issued, the Administrator shall transmit such a recommendation to the House of Representatives and the Senate.

"(B) No permit may be issued by the Administrator under this act for the disposal of radioactive materials in the ocean unless the Congresss, by approval of a resolution described in paragraph (D) within 90 days of continuous session of the Congress beginning on the date after the date of receipt by the Senate and the House of Representatives of such recommendation, authorizes the Administrator to grant a permit to dispose of radioactive material under this Act.

"(C) For purposes of this subsection—

"(1) continuity of session of the Congress is broken only by an adjournment sine die;

"(2) the days on which either House is not in session because of an adjournment of more than three days to a day certain are excluded in the computation of the 90 day calendar period.

"(D) For the purposes of this subsection, the term "resolution" means a joint resolution, the resolving clause of which is as follows: "That the House of Representatives and the Senate approve and authorize the Administrator of the Environmental Protection Agency to grant a permit to under the Marine Protection, Research, and Sanctuaries Act of 1972 to dispose of radioactive materials in the ocean as recommended by the Administrator to the Congress on ——, 19—."; the first blank space therein to be filled with the appropriate applicant to dispose of nuclear material and the second blank therein to be filled with the date on which the Administrator submits the recommendation to the House of Representatives and the Senate."

THE MERCHANT MARINE ACT, 1936

SEC. 425. Section 1103(f) of the Merchant Marine Act, 1936 (46 U.S.C. 1273(f)), is amended by adding at the end thereof the following new sentence: "No additional limitations may be imposed on new commitments to guarantee loans for any fiscal year, except in such amounts as established in advance in annual authorization Acts. No vessel eligible for guarantees under this title shall be denied eligibility because of its type.".

AIRPORT AND AIRWAY DEVELOPMENT PROGRAM

SEC. 426. (a) Section 507(a) of the Airport and Airway Improvement Act of 1982 (title V, P.L. 97-248, 96 Stat. 679) is amended by redesignating paragraph (3) as paragraph (3)(A) and adding immediately thereafter a new subparagraph (B) as follows:

"(B) There is hereby established a supplementary discretionary fund consisting of those amounts to be credited to such fund pursuant to section 505(a) of this title. Amounts in the supplementary discretionary fund shall be distributed by the Secretary in the same manner and for the same purposes as funds distributed pursuant to subparagraph (A) except that (i) such amounts may only be distributed for projects involving construction, reconstruction, or repair begun after the date of enactment of this subparagraph and not to pay for any such work begun before such date, and (ii) the Secretary shall give preference to those projects that increase the safety or capacity of the airport receiving such funds. If any Act of Congress has the effect of limiting or reducing the amount authorized or available to be obligated for any fiscal year for the purposes of section 505, the Secretary shall implement such limitation or reduction by deferring the distribution of a corresponding amount of supplementary discretionary funds until a subsequent fiscal year. In no event may the Secretary reduce any other apportionment or distribution under this section in order to comply with any such Congressional limitation or reduction unless all of the supplementary discretionary funds available for distribution in such year have been deferred until a subsequent fiscal year.".

(b) Section 505(a) of such Act is amended by—

(1) striking out "$1,050,000,000" and inserting in lieu thereof $1,250,000,000 of which $200,000,000 shall be credited to the supplementary discretionary fund established by paragraph (3)(B) of section 507(a) of this title";

(2) striking out "$1,843,500,000" and inserting in lieu thereof "$2,243,500,000, of which $400,000,000 shall be credited to such fund";

(3) striking out $2,755,500,000" and inserting in lieu thereof "$3,230,500,000, of which $475,000,000 shall be credited to such fund";

(4) striking out $3,772,500,000" and inserting in lieu thereof "$4,247,500,000, of which $475,000,000 shall be credited to such fund";

(5) striking out "$4,789,700,000" and inserting in lieu thereof "$5,264,700,000 of which $475,000,000 shall be credited to such fund"; and

(6) adding at the end thereof the following new sentence: "Those amounts credited to the supplementary discretionary fund pursuant to this subsection shall not be subject

to any of the apportionments or distributions set forth in sections 507(a) (1), (2), (3)(A), or 508(d) of this title.".

(c) The first sentence of section 506(c)(2) of such Act is amended by striking out everything after "section 505" and inserting in lieu thereof "for that fiscal year multiplied by a factor equal to 1.83 in the case of fiscal year 1983; 1.25 in the case of fiscal year 1984; 1.28 in the case of fiscal year 1985; 1.28 in the case of fiscal year 1986; and 1.34 in the case of fiscal year 1987.".

(d) The second sentence of section 507(a)(1)(E) of such Act is amended by inserting ", after complying with the provisions of paragraph (3)(B) of this subsection," immediately after "the Secretary".

(e) Section 9502(d)(1)(A) of the Internal Revenue Code of 1954 is amended by striking out "the Airport and Airway Improvement Act of 1982", the second time it appears therein, and inserting in lieu thereof "the Surface Transportation Assistance Act of 1982".

CODIFICATION CORRECTIONS

SEC. 427. Section 11909(b) of title 49, United States Code, is amended by inserting after "chapter 105 of this title" the following: ", or subject to the jurisdiction of the Commission prior to enactment of the Department of Transportation Act,".

(b) Section 11914(b) of title 49, United States Code, is amended by inserting after "chapter 105 of this title," the following: "or subject to the jurisdiction of the Commission prior to enactment of the Department of Transportation Act,".

TITLE V—HIGHWAY REVENUE ACT OF 1982

Subtitle A—Short Title; Table of Contents; Amendment of 1954 Code

SEC. 501. SHORT TITLE; TABLE OF CONTENTS.

(a) SHORT TITLE.—This title may be cited as the "Highway Revenue Act of 1982".

(b) TABLE OF CONTENTS.—

TITLE V—HIGHWAY REVENUE ACT OF 1982

Subtitle A—Short Title; Table of Contents; Amendment of 1954 Code

Sec. 501. Short title; table of contents.
Sec. 502. Amendment of 1954 Code.

Subtitle B—Tax Changes

Sec. 511. Motor fuel taxes.
Sec. 512. Excise tax on heavy trucks.
Sec. 513. Heavy truck use tax.
Sec. 514. Taxes on heavy truck tires.
Sec. 515. Repeal of tax on lubricating oil.
Sec. 516. Period taxes and exemptions in effect.
Sec. 517. Treatment of certain motor carrier operating authorities acquired by taxpayers other than corporations.

Subtitle C—Floor Stocks Provisions

Sec. 521. Floor stocks taxes.
Sec. 522. Floor stocks refunds.
Sec. 523. Definitions and special rules.

Subtitle D—Highway Trust Fund; Mass Transit Account

Sec. 531. 4-year extension of Highway Trust Fund; codification of Trust Fund in Internal Revenue Code of 1954; establishment of Mass Transit Account.

Subtitle E—Miscellaneous Provisions

Sec. 541. Tax treatment of public utility property.
Sec. 542. No return required of individual whose only gross income is grant of $1,000 from State.
Sec. 543. Deduction for conventions on cruise ships.
Sec. 544. Additional weeks of Federal supplemental compensation.
Sec. 545. Exclusion of certain home energy assistance from income under SSI and AFDC.
Sec. 546. Modifications to chlor-alkali electrolytic cells.
Sec. 547. Interest exempt other than under the Internal Revenue Code of 1954.

SEC. 502. AMENDMENT OF 1954 CODE.

Except as otherwise expressly provided therein, whenever in subtitle B an amendment or repeal is expressed in terms of an amendment to, or repeal of, a section or other provision, the reference shall be considered to be made to a section or other provision of the Internal Revenue Code of 1954.

Subtitle B—Tax Changes

SEC. 511. MOTOR FUEL TAXES.

(a) TAXES ON GASOLINE, DIESEL FUEL, AND SPECIAL MOTOR FUELS INCREASED FROM 4 CENTS A GALLON TO 9 CENTS A GALLON.

(1) GASOLINE TAX.—Subsection (a) of section 4081 (relating to tax on gasoline) is amended by striking out "4 cents a gallon" and inserting in lieu thereof "9 cents a gallon".

(2) DIESEL FUEL AND SPECIAL MOTOR FUELS.—Section 4041 (relating to tax on diesel fuel and special motor fuels) is amended by striking out subsections (a) and (b) and inserting in lieu thereof the following:

"(a) DIESEL FUEL AND SPECIAL MOTOR FUELS.—

"(1) DIESEL FUEL.—There is hereby imposed a tax of 9 cents a gallon on any liquid (other than any product taxable under section 4081)—

"(A) sold by any person to an owner, lessee, or other operator of a diesel-powered highway vehicle for use as a fuel in such vehicle, or

"(B) used by any person as a fuel in a diesel-powered highway vehicle unless there was a taxable sale of such liquid under subparagraph (A).

"(2) SPECIAL MOTOR FUELS.—There is hereby imposed a tax of 9 cents a gallon on benzol, benzene, naphtha, liquified petroleum gas, casing head and natural gasoline, or any other liquid (other than kerosene, gas oil, or fuel oil, or any product taxable under section 4081 or paragraph (1) of this subsection)—

"(A) sold by any person to an owner, lessee, or other operator of a motor vehicle or motorboat for use as a fuel in such motor vehicle or motorboat, or

"(B) used by any person as a fuel in a motor vehicle or motorboat unless there was a taxable sale of such liquid under subparagraph (A)."

(b) EXEMPTION FOR METHANOL AND ETHANOL FUELS.—

(1) IN GENERAL.—Section 4041 is amended by adding at the end of the subsection (b) inserted by subsection (c) of this section the following new paragraph:

"(2) QUALIFIED METHANOL AND ETHANOL FUEL.—

"(A) In general.—No tax shall be imposed by subsection (a) on any qualified methanol or ethanol fuel.

"(B) QUALIFIED METHANOL OR ETHANOL FUEL.—The term 'qualified methanol or ethanol fuel' means any liquid at least 85 percent of which consists of methanol, ethanol, or other alcohol produced from a substance other than petroleum or natural gas.

"(C) TERMINATION.—On and after October 1, 1988, subparagraph (A) shall not apply."

(2) COORDINATION WITH CREDIT.—Subsection (c) of section 44E (relating to coordination of credit for alcohol used as a fuel with exemption from excise tax) is amended by striking out "section 4041(k) or 4081(c)" and inserting in lieu thereof "subsection (b)(2) or (k) of section 4041 or section 4081(c)".

(c) EXEMPTION FOR OFF-HIGHWAY BUSINESS USE.—

(1) GASOLINE.—Subsection (a) of section 6421 (relating to nonhighway use of gasoline) is amended by striking out the first sentence and inserting in lieu thereof the following: "Except as provided in subsection (i), if gasoline is used in an off-highway business use, the Secretary shall pay (without interest) to the ultimate purchaser of such gasoline an amount equal to the amount determined by multiplying the number of gallons so used by the rate at which tax was imposed on such gasoline under section 4081."

(2) DIESEL FUEL AND SPECIAL MOTOR FUELS.—Section 4041 is amended by inserting after subsection (a) the following new subsection:

"(b) EXEMPTION FOR OFF-HIGHWAY BUSINESS USE; EXEMPTION FOR QUALIFIED METHANOL AND ETHANOL FUEL.—

"(1) EXEMPTION FOR OFF-HIGHWAY BUSINESS USE.—

"(A) IN GENERAL.—No tax shall be imposed by subsection (a) on liquids sold for use or used in an off-highway business use.

"(B) TAX WHERE OTHER USE.— If a liquid on which no tax was imposed by reason of subparagraph (A) is used otherwise than in an off-highway business use, a tax shall be imposed by paragraph (1)(B) or (2)(B) of subsection (a) (whichever is appropriate).

"(C) OFF-HIGHWAY BUSINESS USE DEFINED.—For purposes of this subsection, the term 'off-highway business use' has the meaning given to such term by section 6421(d)(2)."

(3) CLERICAL AMENDMENTS.—

(A) Subparagraphs (A) and (B) of section 6421(d)(2) are each amended by striking out "qualified business use" and inserting in lieu thereof "off-highway business use".

(B) The heading for paragraph (2) of section 6421(d) is amended by striking out "QUALIFIED" and inserting in lieu thereof "OFF-HIGHWAY".

(d) RATES OF TAX FOR GASOHOL.—

(1) AMENDMENTS OF SECTION 4081.—

(A) IN GENERAL.—Paragraph (1) of section 4081(c) (relating to gasoline mixed with alcohol) is amended by striking out "no tax shall be imposed by this section on the sale of any gasoline" and inserting in lieu thereof "subsection (a) shall be applied by substituting '4 cents' for '9 cents' in the case of the sale of any gasoline".

(B) TREATMENT OF LATER SEPARATION.—

(i) Paragraph (2) of section 4081(c) is amended by striking out "tax was not imposed by reason of this subsection" and inserting in lieu thereof "tax was imposed under subsection (a) at the rate of 4 cents a gallon by reason of this subsection".

(ii) Paragraph (2) of section 4081(c) is amended by adding at the end thereof the following new sentence: "The amount of tax imposed on any sale of such gasoline by such person shall be 5 cents a gallon."

(2) AMENDMENT OF SECTION 4041.—Subsection (k) of section 4041 (relating to fuels containing alcohol) is amended to read as follows:

"(k) FUELS CONTAINING ALCOHOL.—

"(1) IN GENERAL.—Under regulations prescribed by the Secretary, in the case of the sale or use of any liquid fuel at least 10 percent of which consists of alcohol (as defined in section 4081(c)(3))—

"(A) subsection (a) shall be applied by substituting '4 cents' for '9 cents' each place it appears, and

"(B) no tax shall be imposed by subsection (c).

"(2) LATER SEPARATION.—If any person separates the liquid fuel from a mixture of the liquid fuel and alcohol to which paragraph (1) applied, such separation shall be treated as a sale of the liquid fuel. Any tax imposed on such sale shall be reduced by the amount (if any) of the tax imposed on the sale of such mixture.

"(3) TERMINATION.—Paragraph (1) shall not apply to any sale or use after December 31, 1992."

(3) CREDIT FOR ALCOHOL USED AS A FUEL.—Section 44E (relating to alcohol used as a fuel) is amended—

(A) by striking out "40 cents" each place it appears and inserting in lieu thereof "50 cents", and

(B) by striking out "30 cents" each place it appears and inserting in lieu thereof "37.5 cents".

(4) AMENDMENTS OF SECTION 6427.—Subsection (f) of section 6427 is amended to read as follows:

"(f) GASOLINE USED TO PRODUCE CERTAIN ALOCHOL FUELS.—

"(1) IN GENERAL.—Except as provided in subsection (i), if any gasoline on which a tax is imposed by section 4081 at the rate of 9 cents a gallon is used by any person in producing a mixture described in section 4081(c) which is sold or used in such person's trade or business, the Secretary shall pay (without interest) to such person an amount equal to the amount determined at the rate of 5 cents a gallon. The preceding sentence shall not apply with respect to any mixture sold or used after December 31, 1992.

"(2) COORDINATION WITH OTHER REPAYMENT PROVISIONS.—No amount shall be payable under paragraph (1) with respect to any gasoline with respect to which an amount is payable under subsection (d) or (e) of this section or under section 6420 or 6421."

(5) Tariff on alcohol imported for use as a fuel.—Item 901.50 of the Tariff Schedules of the United States (19 U.S.C. 1202) is amended by striking out "40¢ per gal." each place it appears and inserting in lieu thereof "50¢ per gal."

(e) USE IN CERTAIN TAXICABS.—

(1) IN GENERAL.—Paragraph (1) of section 6427(e) (relating to use in certain taxicabs) is amended by striking out "an amount equal to the aggregate amount of the tax imposed on such gasoline or fuel" and inserting in lieu thereof "an amount determined at the rate of 4 cents a gallon".

(2) EXTENSION OF REPAYMENT.—Paragraph (3) of section 6427(e) (relating to termination) is amended by striking out December 31, 1982" and inserting in lieu thereof "September 30, 1984".

(3) SUSPENSION OF SHARED TRANSPORTATION REQUIREMENT.—Clause (ii) of section 6427(e)(2)(A) (relating to qualified taxicab services) is amended to read as follows:

"(ii) is not prohibited by company policy from furnishing (with the consent of the passengers) shared transportation."

(4) STUDY.—The Secretary of the Treasury or his delegate shall conduct a study of the reduced rate of fuels taxes provided for taxicabs by section 6427(e) of the Internal Revenue Code of 1954. Not later than January 1, 1984, the Secretary shall transmit a report on the study conducted under the preceding sentence to the Congress, together with such recommendations as he may deem advisable.

(f) REFUND OR MOTOR FUEL TAXES TO AERIAL AND OTHER APPLICATORS OF AGRICULTURAL SUBSTANCES.— Paragraph (4) of section 6420(c) (defining use on a farm for farming purposes) is amended to read as follows:

"(4) CERTAIN FARMING USE OTHER THAN BY OWNER, ETC.—In applying paragraph (3)(A) to a use on a farm for any purpose described in paragraph (3)(A) by any person other than the owner, tenant, or operator of such farm—

"(A) the owner, tenant, or operator of such farm shall be treated as the user and ultimate purchaser of the gasoline, except that

"(B) if—

"(i) the person so using the gasoline is an aerial or other applicator of fertilizers or other substances and is the ultimate purchaser of the gasoline, and

"(ii) the person described in subparagraph (A) waives (at such time and in such form and manner as the Secretary shall prescribe) his right to be treated as the user and ultimate purchaser of the gasoline,

then subparagraph (A) of this paragraph shall not apply and the aerial or other applicator shall be treated as having used such gasoline on a farm for farming purposes."

(g) TECHNICAL AND CONFORMING AMENDMENTS.—

(1) GASOLINE USED IN NONCOMMERCIAL AVIATION.—Paragraph (3) of section 4041(c) (relating to noncommercial aviation) is amended to read as follows:

"(3) RATE OF TAX.—The rate of tax imposed by paragraph (2) on any gasoline is the excess of 12 cents a gallon over the rate at which tax was imposed on such gasoline under section 4081."

(2) COMFORMING AMENDMENTS.—

(A) Paragraph (2) of section 6416(b) is amended by striking out "section 4041(a)(1) or (b)(1)" and inserting in lieu thereof "paragraph (1)(A) or (2)(A) of section 4041(a)".

(B) Subsection (a) of section 6427 is amended by striking out "section 4041 (a), (b), or (c)" and inserting in lieu thereof "section 4041 (a) or (c)".

(C) Paragraph (1) of section 6427(b) is amended by striking out "subsection (a) or (b) of section 4041" each place it appears and inserting in lieu thereof "subsection (a) of section 4041".

(D) Subsection (c) of section 6427 is amended by striking out "section 4041 (a), (b) or (c)" and inserting in lieu thereof "section 4041 (a) or (c)".

(h) EFFECTIVE DATE.—

(1) IN GENERAL.—Except as otherwise provided in this subsection, the amendments made by this section shall take effect on April 1, 1983.

(2) TARIFF ON IMPORTED ALCOHOL.—The amendment made by subsection (d)(5) shall apply with respect to articles entered, or withdrawn from warehouse for consumption, after March 31, 1983.

(3) FOR SUBSECTION (E)(2).—The amendment made by subsection (e)(2) shall take effect on January 1, 1983.

(4) SHARED TRANSPORTATION REQUIREMENT.—The amendment made by subsection (e)(3) shall apply with respect to fuel purchased after December 31, 1982, and before January 1, 1984.

SEC. 512. EXCISE TAX ON HEAVY TRUCKS.

(a) CHANGES IN EXISTING MANUFACTURERS EXCISE TAX.—

(1) INCREASE IN THRESHOLD WEIGHTS.—Paragraph (2) of section 4061(a) (relating to exclusion for light-duty trucks, etc.) is amended to read as follows:

"(2) EXCLUSION FOR TRUCKS WITH GROSS VEHICLE WEIGHT OF 33,000 POUNDS OR LESS, AND CERTAIN TRAILERS.—

"(A) The tax imposed by paragraph (1) shall not apply to automobile truck chassis and automobile truck bodies, suitable for use with a vehicle which has a gross vehicle weight of 33,000 pounds or less (as determined under regulations prescribed by the Secretary).

"(B) The tax imposed by paragraph (1) shall not apply to truck trailer and semitrailer chassis and bodies, suitable for use with a trailer or semitrailer which has a gross vehicle weight of 26,000 pounds or less (as determined under regulations prescribed by the Secretary)."

(2) REPEAL OF TAX ON PARTS AND ACCESSORIES, TERMINATION OF TAX IMPOSED AT MANUFACTURES LEVEL.—Section 4061 is amended by adding at the end thereof the following new subsection:

"(c) TERMINATION.—

"(1) TAX ON PARTS AND ACCESSORIES.—On and after the day after the date of the enactment of this subsection, the tax imposed by subsection (b) shall not apply.

"(2) TAX ON TRUCKS.—On and after April 1, 1983, the tax imposed by subsection (a) shall not apply."

(3) EXEMPTION OF CERTAIN RAIL TRAILERS AND VANS.—Subsection (a) of section 4063 (relating to exemptions for specified articles) is amended by adding at the end thereof the following new paragraph:

"(8) RAIL TRAILERS AND RAIL VANS.—The tax imposed under section 4061 shall not apply in the case of—

"(A) any chassis or body of a trailer or semitrailer which is designed for use both as a highway vehicle and a railroad car, and

"(B) any parts or accessories designed primarily for use on or in connection with an article described in subparagraph (A).

For purposes of this paragraph, a piggy-back trailer or semitrailer shall not be treated as designed for use as a railroad car."

(4) EFFECTIVE DATE.—The amendments made by this subsection shall take effect on the day after the date of the enactment of this Act.

(b) IMPOSITION OF RETAIL TAX ON SALE OF HEAVY TRUCKS AND TRAILERS.—

(1) IN GENERAL.—Chapter 31 is amended by adding at the end thereof the following new subchapter:

"Subchapter B—Heavy Trucks and Trailers

"Sec. 4051. Imposition of tax on heavy trucks and trailers sold at retail.

"Sec. 4052. Definitions and special rules.

"Sec. 4053. Exemptions.

"SEC. 4051. IMPOSITION OF TAX ON HEAVY TRUCKS AND TRAILERS SOLD AT RETAIL.

"(a) IMPOSITION OF TAX.—

"(1) IN GENERAL.—There is hereby imposed on the first retail sale of the following articles (including in each case parts or accessories sold on or in connection therewith or with the sale thereof) a tax of 12 percent of the amount for which the article is so sold:

"(A) Automobile truck chassis.

"(B) Automobile truck bodies.

"(C) Truck trailer and semitrailer chassis

"(D) Truck trailer and semitrailer bodies.

"(E) Tractors of the kind chiefly used for highway transportation in combination with a trailer or semitrailer.

"(2) EXCLUSION FOR TRUCKS WEIGHING 33,000 POUNDS OR LESS.—The tax imposed by paragraph (1) shall not apply to automobile truck chassis and automobile truck bodies, suitable for use with a vehicle which has a

gross vehicle weight of 33,000 pounds or less (as determined under regulations prescribed by the Secretary).

"(3) EXCLUSION FOR TRAILERS WEIGHING 26,000 POUNDS OR LESS.—The tax imposed by paragraph (1) shall not apply to truck trailer and semitrailer chassis and bodies, suitable for use with a trailer or semitrailer which has a gross vehicle weight of 26,000 pounds or less (as determined under regulations prescribed by the Secretary.

"(4) SALE OF TRUCKS, ETC., TREATED AS SALE OF CHASSIS AND BODY.—For purposes of this subsection, a sale of an automobile truck or truck trailer or semitrailer shall be considered to be a sale of a chassis and of a body described in paragraph (1).

"(b) SEPARATE PURCHASE OF TRUCK OR TRAILER AND PARTS AND ACCESSORIES THEREFOR.—Under regulations prescribed by the Secretary—

"(1) IN GENERAL.—If—

"(A) the owner, lessee, or operator of any vehicle which contains an article taxable under subsection (a) installs (or causes to be installed) any part or accessory on such vehicle, and

"(B) such installation is not later than the date 6 months after the date such vehicle (as it contains such article) was first placed in service,

then there is hereby imposed on such installation a tax equal to 12 percent of the price of such part or accessory and its installation.

"(2) EXCEPTIONS.—Paragraph (1) shall not apply if—

"(A) the part or accessory installed is a replacement part or accessory, or

"(B) the aggregate price of the parts and accessories (and their installation) described in paragraph (1) with respect to any vehicle does not exceed $200 (or such other amount or amounts as the Secretary may by regulations prescribe).

"(3) INSTALLERS SECONDARILY LIABLE FOR TAX.—In addition to the owner, lessee, or operator of the vehicle, the owner of the trade or business installing the part or accessory shall be liable for the tax imposed by paragraph (1).

"(c) TERMINATION.—On and after October 1, 1988, the taxes imposed by this section shall not apply.

"(d) TRANSITIONAL RULE.—In the case of any article taxable under subsection (a) on which tax was imposed under section 4061(a), subsection (a) shall be applied by substituting '2 percent' for '12 percent'.

"SEC. 4052. DEFINITIONS AND SPECIAL RULES.

"(a) FIRST RETAIL SALE.—For purposes of this subchapter—

"(1) IN GENERAL.—The term 'first retail sale' means the first sale, for a purpose other than for resale, after manufacture, production, or importation.

"(2) LEASES CONSIDERED AS SALES.—Rules similar to the rules of section 4217 shall apply.

"(3) USE TREATED AS SALE.—

"(A) IN GENERAL.—If any person uses an article taxable under section 4051 before the first retail sale of such article, then such person shall be liable for tax under section 4051 in the same manner as if such article were sold at retail by him.

"(B) EXEMPTION FOR USE IN FURTHER MANUFACTURE.—Subparagraph (A) shall not apply to use of an article as material in the manufacture or production of, or as a component part of, another article to be manufactured or produced by him.

"(C) COMPUTATION OF TAX.—In the case of any person made liable for tax by subparagraph (A), the tax shall be computed on the price at which similar articles are sold at retail in the ordinary course of trade, as determined by the Secretary.

"(b) DETERMINATION OF PRICE.—

"(1) IN GENERAL.—In determining price for purposes of this subchapter—

"(A) there shall be included any charge incident to placing the article in condition ready for use,

"(B) there shall be excluded—

"(i) the amount of the tax imposed by this subchapter,

"(ii) if stated as a separate charge, the amount of any retail sales tax imposed by any State or political subdivision thereof or the District of Columbia, whether the liability for such tax is imposed on the vendor or vendee, and

"(iii) the fair market value (including any tax imposed by section 4071) at retail of any tires (not including any metal rim or rim base), and

"(C) the price shall be determined without regard to any trade-in.

"(2) SALES NOT AT ARM'S LENGTH.—In the case of any article sold (otherwise than through an arm's-length transaction) at less than the fair market price, the tax under this subchapter shall be computed on the price for which similar articles are sold at retail in the ordinary course of trade, as determined by the Secretary.

"(c) CERTAIN COMBINATIONS NOT TREATED AS MANUFACTURE.—For purposes of this subchapter (other than subsection (a)(3)(B)), a person shall not be treated as engaged in the manufacture of any article by reason of merely combining such article with any equipment or other item listed in section 4063(d).

"(d) CERTAIN OTHER RULES MADE APPLICABLE.—Under regulations prescribed by the Secretary, rules similar to the rules of—

"(1) subsections (c) and (d) of section 4216 (relating to partial payments), and

"(2) section 4222 (relating to registration), shall apply for purposes of this subchapter.

SEC. 4053. EXEMPTIONS.

"(a) EXEMPTION OF SPECIFIED ARTICLES.—No tax shall be imposed under section 4051 on any article specified in subsection (a) of section 4063.

"(b) CERTAIN EXEMPTIONS MADE APPLICABLE.—The exemptions provided by section 4221(a) are hereby extended to the tax imposed by section 4051."

(2) TECHNICAL AND CONFORMING AMENDMENTS.—

(A) Chapter 31 is amended by striking out the chapter heading and inserting in lieu thereof the following:

"CHAPTER 31—RETAIL EXCISE TAXES

"Subchapter A. Special fuels.

"Subchapter B. Heavy trucks and trailers.

"Subchapter A—Special Fuels".

(B) The table of chapters for subtitle D is amended by striking out the item relating to chapter 31 and inserting in lieu thereof the following new item:

"Chapter 31. Retail excise taxes."

(C) Paragraph (2) of section 6416(b), as amended by this Act, is amended by inserting "or under section 4051" after "section 4041(a)".

(D) Paragraph (1) of section 6416(a) is amended by striking out "chapter 31 (special fuels")" and inserting in lieu thereof "chapter 31 (relating to retail excise taxes)".

(3) EFFECTIVE DATE.—The amendments made by this subsection shall take effect on April 1, 1983.

SEC. 513. HEAVY TRUCK USE TAX.

(a) INCREASE IN RATE OF TAX.—Subsection (a) of section 4481 (relating to imposition of tax) is amended to read as follows:

(a) IMPOSITION OF TAX.—A tax is hereby imposed on the use of any highway motor vehicle which (together with the semitrailers and trailers customarily used in connection with highway motor vehicles of the same type as such highway motor vehicle) has a taxable gross weight of at least 33,000 pounds at the rate specified in the following table:

"(1) IN GENERAL.—

"Taxable gross weight		
At least	But less than	Rate of tax
33,000 pounds.....	55,000 pounds.....	$50 a year, plus $25 for each 1,000 pounds or fraction thereof in excess of 33,000 pounds.
55,000 pounds.....	80,000 pounds.....	$600 a year, plus the applicable rate for each 1,000 pounds or fraction thereof in excess of 55,000 pounds.
80,000 pounds or more.	.....	The maximum tax a year"

"(2) DEFINITIONS.—For purposes of paragraph (1)—

"In the case of the taxable period beginning on July 1 of:	The applicable rate is:.	The maximum tax is:
1984.....	$40.....	$1,600
1985.....	40.....	1,600
1986.....	44.....	1,700
1987.....	48.....	1,800
1988 or thereafter.	52.....	1,900

(b) EXEMPTION WHERE TRUCK USED FOR LESS THAN 5,000 MILES ON PUBLIC HIGHWAYS.—Section 4483 (relating to exemption from highway use tax) is amended by adding after subsection (c) thereof the following new subsection:

"(d) EXEMPTION FOR TRUCKS USED FOR LESS THAN 5,000 MILES ON PUBLIC HIGHWAYS.—

"(1) SUSPENSION OF TAX.—

"(A) IN GENERAL.—If—

"(i) it is reasonable to expect that the use of highway motor vehicle on public highways during any taxable period will be less than 5,000 miles, and

"(ii) the owner of such vehicle furnishes such information as the Secretary may by forms or regulations require with respect to the expected use of such vehicle,

then the collection of the tax imposed by section 4481 with respect to the use of such vehicle shall be suspended during the taxable period.

"(B) SUSPENSION CEASES TO APPLY WHERE USE EXCEEDS 5,000 MILES.—Subparagraph (A) shall cease to apply with respect to any highway motor vehicle whenever the use of such vehicle on public highways during the taxable period exceeds 5,000 miles.

"(2) EXEMPTION.—If—

"(A) the collection of the tax imposed by section 4481 with respect to any highway motor vehicle is suspended under paragraph (1),

"(B) such vehicle is not used during the taxable period of public highways for more than 5,000 miles, and

"(C) except as otherwise provided in regulations, the owner of such vehicle furnishes such information as the Secretary may require with respect to the use of such vehicle during the taxable period,

then no tax shall be imposed by section 4481 on the use of such vehicle for the taxable period.

"(3) REFUND WHERE TAX PAID AND VEHICLE NOT USED FOR MORE THAN 5,000 MILES.—If—

"(A) the tax imposed by section 4481 is paid with respect to any highway motor vehicle for any taxable period, and

"(B) the requirements of subparagraphs (B) and (C) of paragraph (2) are met with respect to such taxable period,

the amount of such tax shall be credited or refunded (without interest) to the person who paid such tax.

"RELIEF FROM LIABILITY FOR TAX UNDER CERTAIN CIRCUMSTANCES WHERE TRUCKS IS TRANSFERRED.—Under regulations prescribed by the Secretary, the owner of a highway motor vehicle with respect to which the collection of the tax imposed by section 4481 is suspended under paragraph (1) shall not be liable for the tax imposed by section 4481 (and the new owner shall be liable for such tax) with respect to such vehicle if—

"(A) such vehicle is transferred to a new owner,

"(B) such suspension is in effect at the time of such transfer, and

"(C) the old owner furnishes such information as the Secretary by forms and regulations requires with respect to the transfer of such vehicle.

"(5) OWNER DEFINED.—For purposes of this subsection, the term 'owner' means, with respect to any highway motor vehicle, the person described in section 4481(b)."

(c) CLARIFICATION OF TRAILERS CUSTOMARILY USED IN CONNECTION WITH HIGHWAY MOTOR VEHICLES.—

"(1) Subsection (c) of section 4482 is amended by adding at the end thereof the following new paragraph:

"(5) CUSTOMARY USE.—A semitralier or trailer shall be treated as customarily used in connection with a highway motor vehicle if such vehicle is equipped to tow such semitrailer or trailer."

"(2) The heading for subsection (c) of section 4482 is amended by inserting "AND SPECIAL RULE" after "DEFINITIONS".

(d) PRORATION OF TAX WHERE VEHICLE DESTROYED.—Subsection (c) of section 4481 (relating to proration of tax) is amended to read as follows:

"(c) PRORATION OF TAX.—

"(1) WHERE FIRST USE OCCURS AFTER FIRST MONTH.—If in any taxable period the first use of the highway motor vehicle is after the first month in such period, the tax shall be reckoned proportionately from the first day of the month in which such use occurs to and including the last day in such taxable period.

"(2) WHERE VEHICLE DESTROYED OR STOLEN.—

"(A) IN GENERAL.—If in any taxable period a highway motor vehicle is destroyed or stolen before the first day of the last month in such period and not subsequently used during such taxable period, the tax shall be reckoned proportionately from the first day of the month in such period in which the first use of such highway motor vehicle occurs to and including the last day of the month in which such highway motor vehicle was destroyed or stolen.

"(B) DESTROYED.—For purposes of subparagraph (A), a highway motor vehicle is destroyed if such vehicle is damaged by reason of an accident or other casualty to such an extent that it is not economic to rebuild."

(e) SPECIAL RULE FOR TAXABLE PERIOD IN WHICH TERMINATION DATE OCCURS.—Section 4482 is amended by adding at the end thereof the following new subsection:

"(d) SPECIAL RULE FOR TAXABLE PERIOD IN WHICH TERMINATION DATE OCCURS.—In the case of the taxable period which ends on September 30, 1988, the amount of the tax imposed by section 4481 with respect to any highway motor vehicle shall be determined by reducing each dollar amount in the table contained in section 4481(a) by 75 percent."

(f) EFFECTIVE DATE—

(1) IN GENERAL.—Except as otherwise provided in this subsection, the amendments made by this section shall take effect on July 1, 1984.

(2) SPECIAL RULE IN THE CASE OF CERTAIN OWNER-OPERATORS.—

(A) IN GENERAL.—In the case of a small owner-operator, paragraph (1) of this subsection and paragraph (2) of section 4481(a) of the Internal Revenue Code of 1954 (as added by this section) shall be applied by substituting for each date contained in such paragraphs a date which is 1 year after the date so contained.

(B) SMALL OWNER OPERATOR.—For purposes of this paragraph, the term "small owner-operator" means any person who owns and operates at any time during the taxable period no more than 5 highway motor vehicles with respect to which a tax is imposed by section 4481 of such Code for such taxable period.

(D) AGGREGATION OF VEHICLE OWNERSHIPS.—For purposes of subparagraph (B), all highway motor vehicles with respect to which a tax is imposed by section 4481 of such Code which are owned by—

(i) any trade or business (whether or not incorporated) which is under common control with the taxpayer (within the meaning of section 52 (b)), or

(ii) any member of any controlled groups of corporations of which the taxpayer is a member, for any taxable period shall be treated as being owned by the taxpayer during such period. The Secretary shall prescribe regulations which provide attribution rules that take into account, in addition to the persons and entities described in the preceding sentence, taxpayers who own highway motor vehicles through partnerships, joint ventures, and corporations.

(E) CONTROLLED GROUPS OF CORPORATIONS.—For purposes of this paragraph, the term "controlled group of corporations" has the meaning given to such term by section 1563(a), except that—

(i) "more than 50 percent" shall be substituted for "at least 80 percent" each place it appears in section 1563(a)(1), and

(ii) the determination shall be made without regard to subsections (a)(4) and (e)(3)(C) of section 1563.

(F) HIGHWAY MOTOR VEHICLES.—For purposes of this paragraph, the term "highway motor vehicle" has the meaning given to such term by section 4482(a) of such Code.

(g) STUDY OF ALTERNATIVES TO TAX ON USE OF HEAVY TRUCKS.—

(1) IN GENERAL.—The Secretary of Transportation (in consultation with the Secretary of the Treasury) shall conduct a study of—

(A) alternatives to the tax on heavy vehicles imposed by section 4481(a) of the Internal Revenue Code of 1954, and

(B) plans for improving the collecting and enforcement of such tax and alternatives to such tax.

(2) ALTERNATIVES INCLUDED.—The alternatives studied under paragraph (1) shall include taxes based either singly or in suitable combinations on vehicle size or configuration; vehicle weight, both registered and actual operating weight; and distance traveled. Plans for improving tax collection and enforcement shall, to the extent practical, provide for Federal and State co-operation in such activities.

(3) CONSULTATION WITH STATE OFFICIALS AND OTHER AFFECTED PARTIES.—The study required under subsection (a) shall be conducted in consultation with State officials, motor carriers, and other affected parties.

(4) REPORT.—Not later than January 1, 1985, the Secretary of Transportation shall submit to the Committee on Ways and Means of the House of Representatives and the Committee on Finance of the Senate a report on the study conducted under paragraph (1) together with such recommendations as he may deem advisable.

SEC.514. TAXES ON HEAVY TRUCK TIRES.

(a) GENERAL RULES.—Subsection (a) of section 4071 (relating to imposition and rate of tax on tires and tubes) is amended to read as follows:

"(a) IMPOSITION AND RATE OF TAX.—There is hereby imposed on tires of the type used on highway vehicles, if wholly or in part made of rubber, sold by the manufacturer, producer, or importer a tax at the following rates:

"If the tire weighs:	The rate of tax is:
Not more than 40 lbs.	No tax.
More than 40 lbs. but not more than 70 lbs.	15 cents per lb. in excess of 40 lbs.
More than 70 lbs. but not more than 90 lbs.	$4.50 plus 30 cents per lb. in excess of 70 lbs.
More than 90 lbs.	$10.50 plus 50 cents per lb. in excess of 90 lbs."

(b) EFFECTIVE DATE.—The amendment made by this section shall apply to articles sold on or after January 1, 1984.

SEC. 515. REPEAL OF TAX ON LUBRICATING OIL.

(a) GENERAL RULE.—Subpart B of part III of subchapter A of chapter 32 (relating to tax on lubricating oil) is hereby repealed.

(b) TECHNICAL AMENDMENTS.—

(1) Subsection (c) of section 4221 is amended by striking out "4083, or 4093" and inserting in lieu thereof "or 4083".

(2) Subsection (d) of section 4222 is amended by striking out "4093,".

(3)(A) Section 6206 is amended by striking out "4091 (with respect to payments under section 6424)," and by striking out "6424," each place it appears in the heading and the text.

(B) The table of sections for subchapter A of chapter 63 is amended by striking out "6424," in the item relating to section 6206.

(4) Paragraph (2) of section 6416(b) is amended—

(A) by striking out subparagraph (N),

(B) by striking out the next to the last sentence,

(C) by inserting "or" at the end of subparagraph (L), and

(D) by striking out "; or" at the end of subparagraph (M) and inserting in lieu thereof a period.

(5) Section 6424 (relating to lubricating oil used for certain nontaxable purposes) is hereby repealed.

(6)(A) Subsection (a) of section 39 is amended by striking out paragraph (3), by redesignating paragraph (4) as paragraph (3), and by inserting "and" at the end of paragraph (2).

(B) Subsection (b) of section 39 is amended—

(i) by striking out "section 6421, 6424, or 6427" and inserting in lieu thereof "section 6421 or 6427", and

(ii) by striking out "section 6421(i), 6424(f), or 6427(i)" and inserting in lieu thereof "section 6421(i) or 6427(i)".

(C) The heading for section 39 is amended by striking out ", SPECIAL FUELS, AND LUBRICATING OIL" and inserting in lieu thereof "AND SPECIAL FUELS".

(D) The table of sections for subpart A of part IV of subchapter A of chapter 1 is amended by striking out ", special fuels, and lubricating oil" in the item relating to section 39 and inserting in lieu thereof "and special fuels".

(E) Sections 874(a) and 6201(a)(4) are each amended by striking out ", special fuels, and lubricating oil" and inserting in lieu thereof "and special fuels".

(F) Paragraph (2) of section 882(c) is amended by striking out "and lubricating oil".

(7) Subparagraph (C) of section 642(d)(2) is amended by striking out ", special motor fuels, and lubricating oil" and inserting in lieu thereof "and special motor fuels".

(8) Section 4101 is amended by striking out "or section 4091".

(9) Section 4102 is amended by striking out "or lubricating oils".

(10) Paragraph (9) of section 6504 is amended by striking out "6424 (relating to lubricating oil used for certain nontaxable purposes)," and by striking out "6424,".

(11)(A) Subsection (a) of section 6675 is amended by striking out "6424 (relating to lubricating oil used for certain nontaxable purposes),".

(B) Paragraph (1) of section 6675 is amended by striking out "6424".

(C) The heading for section 6675(b) is amended by striking out "OR LUBRICATING OIL".

(D) The table of sections for subchapter B of chapter 68 is amended by striking out "or lubricating oil" in the item relating to section 6675.

(12) Sections 7210, 7603, 7604, 7605, 7699(c)(1), and 7610(c) are each amended by striking out "6424(d)(2)," each place it appears.

(13) The table of subparts for part III of subchapter A of chapter 32 is amended by striking out the item relating to subpart B.

(14) The table of sections for subchapter B of chapter 65 is amended by striking out the item relating to section 6424.

(c) EFFECTIVE DATE.—The amendments made by this section shall apply with respect to articles sold after the date of the enactment of this Act.

SEC. 516. PERIOD TAXES AND EXEMPTIONS IN EFFECT.

(a) PERIOD TAXES IN EFFECT.—

(1) SPECIAL FUELS TAX.—

(A) Subsection (a) of section 4041 (as amended by this Act) is amended by adding at the end thereof the following new paragraph:

"(3) TERMINATION.—On and after October 1, 1988, the taxes imposed by this subsection shall not apply."

(B) Subsection (e) of section 4041 is hereby repealed.

(2) TIRES AND TREAD RUBBER.—Subsection (d) of section 4071 is amended to read as follows:

"(d) TERMINATION.—On and after October 1, 1988, the taxes imposed by subsection (a) shall not apply."

(3) GASOLINE.—Subsection (b) of section 4081 is amended to read as follows:

"(b) TERMINATION.—On and after October 1 1988, the taxes imposed by this section shall not apply."

(4) HIGHWAY USE TAX.—Sections 4481(e) and 4482(c)(4) are each amended by striking out "1984" each place it appears and inserting in lieu thereof "1988".

(5) FLOOR STOCKS TAXES.—Paragraph (1) of section 6412(a) (relating to floor stocks refunds) is amended—

(A) by striking out "1985" each place it appears and inserting in lieu thereof "1989", and

(B) by striking out "1984" each place it appears and inserting in lieu thereof "1988".

(6) OTHER PROVISIONS.—Paragraph (2) of section 6156(e) (relating to installment payments of tax on use of highway motor vehicles) and subsection (h) of section 6421 (relating to tax on gasoline used for certain nonhighway purposes or by local transit systems) are each amended by striking out "1984" and inserting in lieu thereof "1988".

(b) TERMINATION OF EXEMPTIONS.—

(1)(A) Subsection (f) of section 4041 is amended by adding at the end thereof the following new paragraph:

"(3) TERMINATION.—On and after October 1, 1988, paragraph (1) shall not apply."

(B) Subsection (g) of section 4041 is amended by adding at the end thereof the following new sentence: "Paragraphs (2) and (4) shall not apply on and after October 1, 1988."

(2) Subsection (a) of section 4221 (relating to certain tax resales) is amended by adding at the end thereof the following new sentence: "In the case of taxes imposed by section 4051, 4071, or 4081, paragraphs (4) and (5) shall not apply on and after October 1, 1988."

(3) Section 4483 (relating to exemption for highway use tax) is amended by adding after subsection (d) thereof the following new subsection:

"(e) TERMINATION OF EXEMPTIONS.—Subsections (a) and (c) shall not apply on and after October 1, 1988."

(4) Section 6420 (relating to gasoline used on farms) is amended by redesignating subsection (h) as subsection (i) and by inserting after subsection (g) the following new subsection:

"(h) TERMINATION.—This section shall apply only with respect to gasoline purchased before October 1, 1988."

(5) Section 6427 is amended by redesignating subsection (k) as subsection (l) and by inserting after subsection (j) the following new subsection:

"(k) TERMINATION OF SUBSECTIONS (a), (b), (c), AND (d).—Subsections (a), (b), (c), and (d) shall only apply with respect to fuels purchased before October 1, 1988."

SEC. 517. TREATMENT OF CERTAIN MOTOR CARRIER OPERATING AUTHORITIES ACQUIRED BY TAXPAYERS OTHER THAN CORPORATIONS.

(a) GENERAL RULE.—Paragraph (2) of section 266(c) of the Economic Recovery Tax Act of 1981 (relating to stock acquisitions of motor carrier operating authorities) is amended by redesignating subparagraph (B) as subparagraph (C) and by inserting after subparagraph (A) the following new subparagraph:

"(B) TREATMENT OF CERTAIN NONCORPORATE TAXPAYERS.—Under regulations prescribed by the Secretary of the Treasury of his delegate, and at the election of the holder of the authority, in any case in which—

"(i) a noncorporate taxpayer or group of noncorporate taxpayers on or before July 1, 1980, acquired in one purchase stock in a corporation which held, directly or indirectly, any motor carrier operating authority at the time of such acquisition, and

"(ii) the acquisition referred to in clause (i) would have satisfied the requirements of subparagraph (A) if the stock had been acquired by a corporation,

the, for purposes of subparagraphs (A) and (C), the noncorporate taxpayer or group of noncorporate taxpayers referred to in clause (i) shall be treated as a corporation. The preceding sentence shall apply only if such noncorporate taxpayer (or group of noncorporate taxpayers) on July 1, 1980, held stock constituting control (within the meaning of section 368(c) of the Internal Revenue Code of 1954) of the corporation holding (directly or indirectly) the motor carrier operating authority."

(b) EFFECTIVE DATE.—The amendment made by subsection (a) shall apply to taxable years ending after July 30, 1980.

SEC. 518. EXTENSION OF PAYMENT DUE DATE FOR CERTAIN FUEL TAXES.

(a) 14-DAY EXTENSION.—The Secretary shall prescribe regulations which permit any qualified person whose liability for tax under section 4081 of the Internal Revenue Code of 1954 is payable with respect to semimonthly periods to pay such tax on or before the day which is 14 days after the close of such semi-monthly period if such payment is made by wire transfer to any government depository authorized under section 6302 of such Code.

(b) QUALIFIED PERSON DEFINED.—For purposes of this section—

(1) IN GENERAL.—The term "qualified person" means—

(A) any person other than any person whose average daily production of crude oil for the preceding calendar quarter exceeds 1,000 barrels, and

(B) any independent refiner (within the meaning of section 4995(b)(4) of such Code).

(2) AGGREGATION RULES.—For purposes of paragraph (1), in determining whether any person's production exceeds 1,000 barrels per day, rules similar to the rules of section 4992(3) of the Internal Revenue Code of 1954 shall apply.

(c) SPECIAL RULE WHERE 14TH DAY FALLS ON SATURDAY, SUNDAY, OR HOLIDAY.—If, but for this subsection, the due date under subsection (a) would fall on a Saturday, Sunday, or a holiday in the District of Columbia, such due date shall be deemed to be the immediately preceding day which is not a Saturday, Sunday, or such a holiday.

Subtitle C—Floor Stock Provisions

SEC. 521. FLOOR STOCKS TAXES.

(a) 1983 TAX ON GASOLINE.—On gasoline subject to tax under section 4081 which, on April 1, 1983, is held by a dealer for sale, there is hereby imposed a floor stocks tax at the rate of 5 cents a gallon.

(b) 1984 TAX ON TIRES.—On any article which would be subject to tax under section 4071(a) if sold by the manufacturer, producer, or importer on or after January 1, 1984, which on January 1, 1984, is held by a dealer and has not been used and is intended for sale, there shall be imposed a floor stocks tax equal to the excess of the amount of tax which would be imposed on such article if it were sold by the manufacturer, producer, or importer after January 1, 1984, over the amount of tax imposed under section 4071(a) on the sale of such article by the manufacturer, producer, or importer.

(c) OVERPAYMENT OF FLOOR STOCKS TAXES.—Section 6416 shall apply in respect of the floor stocks taxes imposed by this section, so as to entitle, subject to all provi-

sions of section 6416, any person paying such floor stocks taxes to a credit or refund thereof for any of the reasons specified in section 6416.

(d) DUE DATE OF TAXES.—The taxes imposed by this section shall be paid at such time after—

(1) May 15, 1983, in the case of the tax imposed by subsection (a), or

(2) February 15, 1984, in the case of the tax imposed by subsection (b),

as may be prescribed by the Secretary of the Treasury or his delegate.

(e) TRANSFER OF FLOOR STOCKS TAXES TO HIGHWAY TRUST FUND.—For purposes of determining the amount transferred to the Highway Trust Fund for any period, the taxes imposed by this section shall be treated as if they were imposed by section 4081 or 4071 of the Internal Revenue Code of 1954, whichever is appropriate.

SEC. 522. FLOOR STOCKS REFUNDS.

(a) GENERAL RULE.—

(1) IN GENERAL.—Where, before the day after the date of the enactment of this Act, any tax-repealed article has been sold by the manufacturer, producer, or importer and on such day is held by a dealer and has not been used and is intended for sale, there shall be credited or refunded (without interest) to the manufacturer, producer, or importer an amount equal to the tax paid by such manufacturer, producer, or importer on his sale of the article if—

(A) claim for such credit or refund is filed with the Secretary of the Treasury or his delegate before October 1, 1983, based on a request submitted to the manufacturer, producer, or importer before July 1, 1983, by the dealer who held the article in respect of which the credit or refund is claimed, and

(B) on or before October 1, 1983, reimbursement has been made to the dealer by the manufacturer, producer, or importer in an amount equal to the tax paid on the article or written consent has been obtained from the dealer to allowance of the credit or refund.

(2) LIMITATION ON ELIGIBILITY FOR CREDIT OR REFUND.—No manufacturer, producer, or importer shall be entitled to credit or refund under paragraph (1) unless he has in his possession such evidence of the inventories with respect to which the credit or refund is claimed as may be required by regulations prescribed by the Secretary of the Treasury or his delegate under this subsection.

(3) OTHER LAWS APPLICABLE.—All provisions of law, including penalties, applicable with respect to the taxes imposed by section 4061, 4071, or 4091 (whichever is appropriate) shall, insofar as applicable and not inconsistent with paragraphs (1) and (2) of this subsection, apply in respect of the credits and refunds provided for in paragraph (1) to the same extent as if the credits or refunds constituted overpayments of the tax.

(b) REFUNDS WITH RESPECT TO CERTAIN CONSUMER PURCHASES OF TRUCKS AND TRAILERS.—

(1) IN GENERAL.—Except as otherwise provided in paragraph (2), where after December 2, 1982, and before the day after the date of the enactment of this Act, a tax-repealed article on which tax was imposed by section 406(a) has been sold to an ultimate purchaser, there shall be credited or refunded (without interest) to the manufacturer, producer, or importer of such article an amount equal to the tax paid by such manufacturer, producer, or importer on his sale of the article.

(2) LIMITATION OF ELIGIBILITY FOR CREDIT OR REFUND.—No manufacturer, producer, or importer shall be entitled to a credit or refund under paragraph (1) with respect to an article unless—

(A) he has in his possession such evidence of the sale of the article to an ultimate purchaser, and of the reimbursement of the tax to such purchaser, as may be required by regulations prescribed by the Secretary of the Treasury or his delegate under this subsection.

(B) claim for such credit or refund is filed with the Secretary of the Treasury or his delegate before October 1, 1983, based on information submitted to the manufacturer, producer, or importer before July 1, 1983, by the person who sold the article (in respect of which the credit or refund is claimed) to the ultimate purchaser, and

(C) on or before October 1, 1983, reimbursement has been made to the ultimate purchaser in an amount equal to the tax paid on the article.

(3) OTHER LAWS APPLICABLE.—All provisions of law, including penalties, applicable with respect to the taxes imposed by section 4061(a) shall, insofar as applicable and not inconsistent with paragraph (1) or (2) of this subsection, apply in respect of the credits and refunds provided for in paragraph (1) to the same extent as if the credits or refunds constituted overpayments of the tax.

(c) CERTAIN USES BY MANUFACTURER, ETC.—In the case of any article which was subject to the tax imposed by section 4061(a) (as in effect on the day before the date of the enactment of this Act), any tax paid by reason of section 4218(a) (relating to use by manufacturer or importer considered sale) with respect to a tax-repealed article shall be deemed to be an overpayment of such tax if tax was imposed on such article after December 2, 1982, by reason of section 4218(a).

(d) TRANSFER OF FLOOR STOCKS REFUNDS FROM HIGHWAY TRUST FUND.—The Secretary of the Treasury shall pay for time to time from the Highway Trust Fund into the general fund of the Treasury amounts equivalent to the floor stocks refunds made under this section.

SEC. 523. DEFINITIONS AND SPECIAL RULE.

(a) IN GENERAL.—For purposes of this subtitle—

(1) The term "dealer" includes a wholesaler, jobber, distributor, or retailer.

(2) An article shall be considered as "held by a dealer" if title thereto has passed to such dealer (whether or not delivery to him has been made) and if for purposes of consumption title to such article or possession thereof has not at any time been transferred to any person other than a dealer.

(3) The term "tax-repealed article" means any article on which a tax was imposed by section 4061(a), 4061(b), or section 4091 as in effect on the day before the date of the enactment of this Act, and which will not be subject to tax under section 4061(a), 4061(b) or 4091 as in effect on the day after the date of the enactment of this Act.

(4) Except as otherwise expressly provided herein, any reference in this subtitle to a section or other provision shall be treated as a reference to a section or other provision of the Internal Revenue Code of 1954.

(b) 1984 EXTENSION OF FLOOR STOCKS REFUND TO TIRES.—

(1) IN GENERAL.—In the case of an article on which a tax was imposed by section 4071(a) as in effect on December 31, 1983, and which will not be subject to tax under such section as in effect on January 1, 1984, such article shall be treated as a tax-repealed article for purposes of subsection (a) of section 522.

(2) ALLOWANCE OF REFUND.—In the case of a tax-repealed article to which paragraph (1) applies, subsection (a) of section 522 shall be applied—

(A) by treating January 1, 1984, as the day after the date of the enactment of this Act, and

(B) by substituting "1984" for "1983" each place it appears in paragraph (1) of such subsection (a).

Subtitle D—Highway Trust Fund; Mass Transit Account

SEC. 531. 4-YEAR EXTENSION OF HIGHWAY TRUST FUND; CODIFICATION OF TRUST FUND IN INTERNAL REVENUE CODE OF 1954; ESTABLISHMENT OF MASS TRANSIT ACCOUNT.

(a) GENERAL RULE.—Subchapter A of chapter 98 of the Internal Revenue Code (relating to Trust Fund Code) is amended by adding at the end thereof the following new section:

"SEC. 9503. HIGHWAY TRUST FUND.

"(a) CREATION OF TRUST FUND.—There is established in the Treasury of the United States a trust fund to be known as the 'Highway Trust Fund', consisting of such amounts as may be appropriated or credited to the Highway Trust Fund as provided in this section or section 9602(b).

"(b) TRANSFER TO HIGHWAY TRUST FUND OF AMOUNTS EQUIVALENT TO CERTAIN TAXES.—

"(1) IN GENERAL.—There are hereby appropriated to the Highway Trust Fund amounts equivalent to the taxes received in the Treasury before October 1, 1988, under the following provisions—

"(A) section 4041 (relating to taxes on diesel fuels and special motor fuels),

"(B) section 4051 (relating to retail tax on heavy trucks and trailers),

"(C) section 4061 (relating to tax on trucks and truck parts),

"(D) section 4071 (relating to tax on tires and tread rubber),

"(E) section 4081 (relating to tax on gasoline),

"(F) section 4091 (relating to tax on lubricating oil), and

"(G) section 4481 (relating to tax on use of certain vehicles).

"(2) LIABILITIES INCURRED BEFORE OCTOBER 1, 1988.—There are hereby appropriated to the Highway Trust Fund amounts equivalent to the taxes which are received in the Treasury after September 30, 1988, and before July 1, 1989, and which are attributable to liability for tax incurred before October 1, 1988, under the provisions described in paragraph (1).

"(3) ADJUSTMENTS FOR AVIATION USES.—The amounts described in paragraphs (1) and (2) with respect to any period shall (before the application of this subsection) be reduced by appropriate amounts to reflect any amounts transferred to the Airport and Airway Trust Fund under section 9502(b) with respect to such period.

"(c) EXPENDITURES FROM HIGHWAY TRUST FUND.—

"(1) FEDERAL-AID HIGHWAY PROGRAM.—Each as provided in subsection (e), amounts in the Highway Trust Fund shall be available, as provided by appropriation Acts, for making expenditures before October 1, 1988, to meet those obligations of the United States heretofore or hereafter incurred which are—

"(A) authorized by law to be paid out of the Highway Trust Fund established by section 209 of the Highway Revenue Act of 1956,

"(B) authorized to be paid out of the Highway Trust Fund under title I or II of the Surface Transportation Assistance Act of 1982, or

"(C) hereafter authorized by a law which does not authorize the expenditure out of the Highway Trust Fund of any amount for a general purpose not covered by subparagraph (A) or (B) as in effect on December 31, 1982.

"(2) TRANSFERS FROM HIGHWAY TRUST FUND FOR CERTAIN REPAYMENTS AND CREDITS.—

"(A) IN GENERAL.—The Secretary shall pay from time to time from the Highway Trust Fund into the general fund of the Treasury amounts equivalent to—

"(i) the amounts paid before July 1, 1989, under—

"(I) section 6420 (relating to amounts paid in respect of gasoline used on farms),

"(II) section 6421 (relating to amounts paid in respect of gasoline used for certain nonhighway purposes or by local transit systems),

"(III) section 6424 (relating to amounts paid in respect of lubricating oil used for certain nontaxable purposes), and

"(IV) section 6427 (relating to fuels not used for taxable purposes),

on the basis of claims filed for periods ending before October 1, 1988, and

"(ii) the credits allowed under section 39 (relating to credit for certain uses of gasoline, special fuels, and lubricating oil) with respect to gasoline, special fuels, and lubricating oil used before October 1, 1988.

"(B) TRANSFERS BASED ON ESTIMATES.—Transfers under subparagraph (A) shall be made on the basis of estimates by the Secretary, and proper adjustments shall be made in amounts subsequently transferred to the extent prior estimates were in excess or less than the amounts required to be transferred.

"(C) EXCEPTION FOR USE IN AIRCRAFT AND MOTORBOATS.—This paragraph shall not apply to amounts estimated by the Secretary as attributable to use of gasoline and special fuels in motorboats or in aircraft.

"(3) 1988 FLOOR STOCKS REFUNDS.—The Secretary shall pay from time to time from the Highway Trust Fund into the general fund of the Treasury amounts equivalent to the floor stocks refunds made before July 1, 1989, under section 6412(a).

"(4) TRANSFERS FROM THE TRUST FUND FOR MOTORBOAT FUEL TAXES.—

"(A) TRANSFERS TO NATIONAL RECREATIONAL BOATING SAFETY AND FACILITIES IMPROVEMENT FUND.—

"(i) IN GENERAL.—The Secretary shall pay from time to time from the Highway Trust Fund into the National Recreational Boating Safety and Facilities Improvement Fund established by section 202 of the Recreational Boating Fund Act amounts (as determined by him) equivalent to the motorboat fuel taxes received on or after October 1, 1980, and before October 1, 1988.

"(ii) LIMITATIONS.—

"(I) LIMIT ON TRANSFERS DURING ANY FISCAL YEAR.—The aggregate amount transferred under this subparagraph during any fiscal year shall not exceed $45,000,000.

"(II) LIMIT ON AMOUNT IN FUND.—No amount shall be transferred under this subparagraph if the Secretary determines that such transfer would result in increasing the amount in the National Recreational Boating Safety and Facilities Improvement Fund to a sum in excess of $45,000,000.

"(B) EXCESS FUNDS TRANSFERRED TO LAND AND WATER CONSERVATION FUND.—Any amount received in the Highway Trust Fund which is attributable to motorboat fuel taxes and which is not transferred from the Highway Trust Fund under subparagraph (A) shall be transferred by the Secretary from the Highway Trust Fund into the land and water conservation fund provided for in title I of the Land and Water Conservation Fund Act of 1965.

"(C) MOTORBOAT FUEL TAXES.—For purposes of this paragraph, the term 'motorboat fuel taxes' means the taxes under section 4041(a)(2) with respect to special motor fuels used as fuel in motorboats and under section 4081 with respect to gasoline used as fuel in motorboats.

"(d) ADJUSTMENTS OF APPORTIONMENTS.—

"(1) ESTIMATES OF UNFUNDED HIGHWAY AUTHORIZATIONS AND NET HIGHWAY RECEIPTS.—The Secretary of the Treasury, not less frequently than once in each calendar quarter, after consultation with the Secretary of Transportation, shall estimate—

"(A) the amount which would (but for this subsection) be the unfunded highway authorizations at the close of the next fiscal year, and

"(B) the net highway receipts for the 24-month period beginning at the close of such fiscal year.

"(2) PROCEDURE WHERE THERE IS EXCESS UNFUNDED HIGHWAY AUTHORIZATIONS.—If the Secretary of the Treasury determines for any fiscal year that the amount described in paragraph (1)(A) exceeds the amount described in paragraph (1)(B)—

"(A) he shall so advise the Secretary of Transportation, and

"(B) he shall further advise the Secretary of Transportation as to the amount of such excess.

"(3) ADJUSTMENT OF APPORTIONMENTS WHERE UNFUNDED AUTHORIZATIONS EXCEED 2 YEARS' RECEIPTS.—

"(A) DETERMINATION OF PERCENTAGE.—If, before any apportionment to the States is made, in the most recent estimate made by the Secretary of the Treasury there is an excess referred to in paragraph (2)(B), the Secretary of Transportation shall determine the percentage which—

"(i) the excess referred to in paragraph (2)(B), is of

"(ii) the amount authorized to be appropriated from the Trust Fund for the fiscal year for apportionment to the States.

If, but for this sentence, the most recent estimate would be one which was made on a date which will be more than 3 months before the date of the apportionment, the Secretary of the Treasury shall make a new estimate under paragraph (1) for the appropriate fiscal year.

"(B) ADJUSTMENT OF APPORTIONMENTS.—If the Secretary of Transportation determines a percentage under subparagraph (A) for purposes of any apportionment, notwithstanding any other provision of law, the Secretary of Transportation shall apportion to the States (in lieu of the amount which, but for the provisions of this subsection, would be so apportioned) the amount obtained by reducing the amount authorized to be so apportioned by such percentage.

"(4) APPORTIONMENT OF AMOUNTS PREVIOUSLY WITHHELD FROM APPORTIONMENT.—If, after funds have been withheld from apportionment under paragraph (3)(B), the Secretary of the Treasury determines that the amount described in paragraph (1)(A) does not exceed the amount described in paragraph (1)(B) or that the excess described in paragraph (1)(B) is less than the amount previously determined, he shall so advise the Secretary of Transportation. The Secretary of Transportation shall apportion to the States such portion of the funds so withheld from apportionment as the Secretary of the Treasury has advised him may be so apportioned without causing the amount described in paragraph (1)(A) to exceed the amount described in paragraph (1)(B). Any funds apportioned pursuant to the preceding sentence shall remain available for the period for which they would be available if such apportionment took effect with the fiscal year in which they are apportioned pursuant to the preceding sentence.

"(5) DEFINITIONS.—For purposes of this subsection—

"(A) UNFUNDED HIGHWAY AUTHORIZATIONS.—The term 'unfunded highway authorizations' means, at any time, the excess (if any) of—

"(i) the total potential unpaid commitments at such time as a result of the apportionment to the States of the amounts authorized to be appropriated from the Highway Trust Fund, over

"(ii) the amount available in the Highway Trust Fund at such time to defray such commitments (after all other unpaid commitments at such time which are payable from the Highway Trust Fund have been defrayed).

"(B) NET HIGHWAY RECEIPTS.—The term 'net highway receipts' means, with respect to any period, the excess of—

"(i) the receipts (including interest) of the Highway Trust Fund during such period, over

"(ii) the amounts to be transferred during such period from such Fund under subsection (c) (other than paragraph (1) thereof).

"(6) REPORTS.—Any estimate under paragraph (1) and any determination under paragraph (2) shall be reported by the Secretary of the Treasury to the Committee on Ways and Means of the House of Representatives, the Committee on Finance of the Senate, the Committees on the Budget of both Houses, the Committee on Public Works and Transportation of the House of Representatives, and the Committee on Environment and Public Works of the Senate.

"(e) ESTABLISHMENT OF MASS TRANSIT ACCOUNT.—

"(1) CREATION OF ACCOUNT.—There is established in the Highway Trust Fund a separate account to be known as the 'Mass Transit Account' consisting of such amounts as may be transferred or credited to the Mass Transit Account as provided in this subsection or section 9602(b).

"(2) TRANSFERS TO MASS TRANSIT ACCOUNT.—The Secretary of the Treasury shall transfer to the Mass Transit Account one-ninth of the amounts appropriated to the Highway Trust Fund under subsection (b) which are attributable to taxes under sections 4041 and 4081 imposed after March 31, 1983.

"(3) EXPENDITURES FROM ACCOUNTS.—Amounts in the Mass Transit Account shall be available, as provided by appropriation Acts, for making capital expenditures before October 1, 1988 (including capital expenditures for new projects) in accordance with section 21(a)(2) of the Urban Mass Transportation Act of 1964.

"(4) LIMITATION.—Rules similar to the rules of subsection (d) shall apply to the Mass Transit Account except that subsection (d)(1) shall be applied by substituting '12-month' for '24-month'."

(b) REPEAL OF SECTION 209 OF THE HIGHWAY REVENUES ACT OF 1956.—Section 209 of the Highway Revenue Act of 1956 (other than subsection (b) thereof) is hereby repealed.

(c) CONFORMING AMENDMENTS TO LAND AND WATER CONSERVATION FUND.—Subsection (b) of section 201 of the Land and Water Conservation Fund Act of 1965 (16 U.S.C. 4601-11) is amended—

(1) by striking out "1985" each place it appears and inserting in lieu thereof "1989"; and

(2) by striking out "1984" and inserting in lieu thereof "1988".

(d) CLERICAL AMENDMENT.—The table of sections for subchapter A of chapter 98 of such Code is amended by adding at the end thereof the following new item:

"Sec. 9503. Highway Trust Fund."

(e) EFFECTIVE DATE; SAVING PROVISIONS.—

(1) IN GENERAL.—The amendments made by this section shall take effect on January 1, 1983.

(2) NEW HIGHWAY TRUST FUND TREATED AS CONTINUATION OF OLD.—The Highway Trust Fund established by the amendments made by this section shall be treated for all purposes of law as the continuation of the Highway Trust Fund established by section 209 of the Highway Revenue Act of 1956. Any reference in any law to the Highway Trust Fund established by such section 209 shall be deemed to include (wherever appropriate) a reference to the Highway Trust Fund established by the amendments made by this section.

Subtitle E—Miscellaneous Provisions

SEC. 541. TAX TREATMENT OF PUBLIC UTILITY PROPERTY.

(a) NORMALIZATION METHOD FOR PURPOSES OF DEPRECIATION.—

(1) IN GENERAL.—Paragraph (3) of section 168(e) (relating to special rule for certain public utility property) is amended by redesignating subparagraph (C) as subparagraph (D) and by inserting after subparagraph (B) the following new subparagraph:

"(C) USE OF INCONSISTENT ESTIMATES AND PROJECTIONS, ETC.—

"(i) IN GENERAL.—One way in which the requirements of subparagraph (B) are not met is if the taxpayer, for ratemaking purposes, uses a procedure or adjustment which is inconsistent with the requirements of subparagraph (B).

"(ii) USE OF INCONSISTENT ESTIMATES AND PROJECTIONS.—The procedures and adjustments which are to be treated as inconsistent for purposes of clause (1) shall include any procedure or adjustment for ratemaking purposes which uses an estimate or projection of the taxpayer's tax expense, depreciation expense, or reserve for deferred taxes under subparagraph (B)(ii) unless such estimate or projection is also used, for ratemaking purposes, with respect to the other 2 such items and with respect to the rate base.

"(iii) REGULATORY AUTHORITY.—The Secretary may by regulations prescribe procedures and adjustments (in addition to those specified in clause (ii)) which are to be treated as inconsistent for purposes of clause (i).".

(2) AMENDMENT OF SECTION 167 (l).—Subparagraph (G) of section 167(l)(3) (defining normalization method of accounting) is amended by adding at the end thereof the following new sentence: "For purposes of this subparagraph, rules similar to the rules of section 168(e)(3)(C) shall apply."

(b) COMPUTATIONS FOR PURPOSES OF INVESTMENT CREDIT.—Subsection (f) of section 46 (relating to limitation in case of certain regulated companies) is amended by adding at the end thereof the following new paragraph:

"(10) USE OF INCONSISTENT ESTIMATES AND PROJECTIONS, ETC., FOR PURPOSES OF PARAGRAPHS (1) AND (2).—

"(A) IN GENERAL.—One way in which the requirements of paragraph (1) or (2) are not met is if the taxpayer, for ratemaking purposes, uses a procedure or adjustment which is inconsistent with the requirements of paragraph (1) or paragraph (2), as the case may be.

"(B) USE OF INCONSISTENT ESTIMATES AND PROJECTIONS.—The procedures and adjustments which are to be treated as inconsistent for purposes of subparagraph (A) shall include any procedure or adjustment for ratemaking purposes which uses an estimate or projection of the taxpayer's qualified investment for purposes of the credit allowable by section 38 unless such estimate or projection is consistent with the estimates and projections of property which are used, for ratemaking purposes, with respect to the taxpayer's depreciation expense and rate base.

"(C) REGULATORY AUTHORITY.—The Secretary may by regulations prescribe procedures and adjustments (in addition to those specified in subparagraph (B)) which are to be treated as inconsistent for purposes of subparagraph (A)."

(c) EFFECTIVE DATES.—

(1) GENERAL RULE.—The amendments made by subsections (a) and (b) shall apply to taxable years beginning after December 31, 1979.

(2) SPECIAL RULE FOR PERIODS BEGINNING BEFORE MARCH 1980.—

(A) IN GENERAL.—Subject to the provisions of paragraphs (3) and (4), notwithstanding the provisions of sections 167(l) and 46(f) of the Internal Revenue Code of 1954 and of any regulations prescribed by the Secretary of the Treasury (or his delegate) under such sections, the use for ratemaking purposes or for reflecting operating results in the taxpayer's regulated books of account, for any period before March 1, 1980, of—

(i) any estimates or projections relating to the amounts of the taxpayer's tax expense, depreciation expense, deferred tax reserve, credit allowable under section 38 of such code, or rate base, or

(ii) any adjustments to the taxpayer's rate of return.

shall not be treated as inconsistent with the requirements of subparagraph (G) of such section 167(l)(3) nor inconsistent with the requirements of paragraph (1) or (2) of such section 46(f), where such estimates or projections, or such rate of return adjustments, were included in a qualified order.

(B) QUALIFIED ORDER DEFINED.—For purposes of this subsection, the term "qualified order" means an order—

(i) by a public utility commission which was entered before March 13, 1980,

(ii) which used the estimates, projections, or rate of return adjustments referred to in subparagraph (A) to determine the amount of the rates to be collected by the taxpayer or the amount of a refund with respect to rates previously collected, and

(iii) which ordered such rates to be collected or refunds to be made (whether or not such order actually was implemented or enforced).

(3) LIMITATIONS ON APPLICATION OF PARAGRAPH (2).—

(A) PARAGRAPH (2) NOT TO APPLY TO AMOUNTS ACTUALLY FLOWED THROUGH.—Paragraph (2) shall not apply to the amount of any—

(i) rate reduction, or

(ii) refund,

which was actually made pursuant to a qualified order.

(B) TAXPAYER MUST ENTER INTO CLOSING AGREEMENT BEFORE PARAGRAPH (2) APPLIES.—Paragraph (2) shall not apply to any taxpayer unless, before the later of—

(i) July 1, 1983, or

(ii) 6 months after the refunds or rate reductions are actually made pursuant to a qualified order;

the taxpayer enters into a closing agreement (within the meaning of section 7121 of the Internal Revenue Code of 1954) which provides for the payment by the taxpayer of the amount of which paragraph (2) does not apply by reason of subparagraph (A).

(4) SPECIAL RULES RELATING TO PAYMENT OF REFUNDS OR INTEREST BY THE UNITED STATES OR THE TAXPAYER.—

(A) REFUNDS DEFINED.—For purposes of this subsection, the term "refund" shall include any credit allowed by the taxpayer under a qualified order but shall not include interest payable with respect to any refund (or credit) under such order.

(B) NO INTEREST PAYABLE BY UNITED STATES.—No interest shall be payable under section 6611 of the Internal Revenue Code of 1954 on any overpayment of tax which is attributable to the application of paragraph (2).

(C) PAYMENTS MAY BE MADE IN TWO EQUAL INSTALLMENTS.—

(i) IN GENERAL.—The taxpayer may make any payment required by reason of paragraph (3) in 2 equal installments, the first installment being due on the last date on which a taxpayer may enter into a closing agreement under paragraph (3)(B), and the second payment being due 1 year after the last date for the first payment.

(ii) INTEREST PAYMENT.—For purposes of section 6601 of such Code, the last date prescribed for payment with respect to any payment required by reason of paragraph (3) shall be the last date on which such payment is due under clause (i).

(5) NO INFERENCE.—The application of subparagraph (G) of section 167(1)(3) of the Internal Revenue Code of 1954, and the application of paragraphs (1) and (2) of section 46(f) of such Code, to taxable years beginning before January 1, 1980, shall be determined without any inference drawn from the amendments made by subsections (a) and (b) of this section or from the rules contained in paragraphs (2), (3), and (4). Nothing in the preceding sentence shall be construed to limit the relief provided by paragraphs (2), (3), and (4).

SEC. 542. NO RETURN REQUIRED OF INDIVIDUAL WHOSE ONLY GROSS INCOME IS GRANT OF $1,000 FROM STATE.

(a) IN GENERAL.—Nothing in section 6012(a) of the Internal Revenue Code of 1954 shall be construed to require the filing of a return with respect to income taxes under subtitle A of such code by an individual whose only gross income for the taxable year is a grant of $1,000 received from a State which made such grants generally to residents of such State.

(b) EFFECTIVE DATE.—Subsection (a) shall apply to taxable years beginning after December 31, 1981.

SEC. 543. DEDUCTION FOR CONVENTIONS ON CRUISE SHIPS.

(a) IN GENERAL.—Subsection (h) of section 274 (relating to disallowance of certain entertainment, etc., expenses) is amended—

(d) by striking out the period at the end of paragraph (2) and inserting in lieu thereof a comma and the following: "unless the taxpayer meets the requirements of paragraph (5) and establishes that the meeting is directly related to the active conduct of his trade or business or to an activity described in section 212 and that—

"(A) the cruise ship is a vessel registered in the United States; and

"(B) all ports of call of such cruise ship are located in the United States or in possessions of the United States.

With respect to cruises beginning in any calendar year, not more than $2,000 of the expenses attributable to an individual attending one or more meetings may be taken into account under section 162 or 212 by reason of the preceding sentence.", and

(2) by adding at the end thereof the following new paragraph:

"(5) REPORTING REQUIREMENTS.—No deduction shall be allowed under section 162 or 212 for expenses allocable to attendance at a convention, seminar, or similar meeting on any cruise ship unless the taxpayer claiming the deduction attaches to the return of tax on which the deduction is claimed—

"(A) a written statement signed by the individual attending the meeting which includes—

"(i) information with respect to the total days of the trip, excluding the days of transportation to and from the cruise ship port, and the number of hours of each day of the trip which such individual devoted to scheduled business activities,

"(ii) a program of the scheduled business activities of the meeting, and

"(iii) such other information as may be required in regulations prescribed by the Secretary; and

"(B) a written statement signed by an officer of the organization or group sponsoring the meeting which includes—

"(i) a schedule of the business activities of each day of the meeting,

"(ii) the number of hours which the individual attending the meeting attended such scheduled business activities, and

"(iii) such other information as may be required in regulations prescribed by the Secretary."

(b) The amendments made by this section shall apply to taxable years beginning after December 31, 1982.

SEC. 544. ADDITIONAL WEEKS OF FEDERAL SUPPLEMENTAL COMPENSATION.

(a) Section 602(e) of the Tax Equity and Fiscal Responsibility Act of 1982 is amended—

(1) in paragraph (2)(A)(i), by striking out "50" and inserting in lieu thereof "65";

(2) in paragraph (2)(A)(ii), by striking out "6" and inserting in lieu thereof "8"; and

(3) by striking out subparagraphs (B) and (C) of paragraph (2) and inserting in lieu thereof the following:

"(B) In the case of any State, subparagraph (A) shall be applied—

"(i) with respect to weeks during a higher unemployment period, by substituting '16' and '8' in clause (ii) thereof;

"(ii) with respect to weeks which are not during a higher unemployment period and which are weeks beginning on or after the first week of an extended benefit period (which was in effect under the Federal-State Extended Unemployment Compensation Act of 1970 for any week beginning on or after June 1, 1982, on or before the date of the enactment of the Highway Revenue Act of 1982, and before the week for which the compensation is paid), by substituting '14' for '8' in clause (ii) thereof;

"(iii) with respect to weeks during a high unemployment period, or which would be weeks described in clause (ii) except that the extended benefit period began after the date of enactment of the Highway Revenue Act of 1982, by substituting '12' for '8' in clause (ii) thereof; and

"(iv) with respect to weeks during an intermediate unemployment period, by substituting '10' for '8'.

"(C) For purposes of subparagraph (B), the term 'higher unemployment period' means, with respect to any State, the period—

"(i) which begins with the third week after the first week in which the rate of insured unemployment in the State for the period consisting of such week and the immediately preceding 12 weeks equals or exceeds 6.0 percent, and

"(ii) which ends with the third week after the first week in which the rate of insured unemployment in the State for the period consisting of such week and the immediately preceding 12 weeks is less than 6.0 percent;

except that no higher unemployment period shall last for a period of less than 4 weeks.

"(D) For purposes of subparagraph (B), the term 'high unemployment period' means, with respect to any State, the period—

"(i) which begins with the third week after the first week in which the rate of insured unemployment in the State for the period consisting of such week and the immediately preceding 12 weeks equals or exceeds 4.5 percent but is less than 6.0 percent, and

"(ii) which ends with the third week after the first week in which the rate of insured unemployment in the State for the period consisting of such week and the immediately preceding 12 weeks is less than 4.5 percent or equals or exceeds 6.0 percent;

except that no high unemployment period shall last for a period of less than 4 weeks unless such State enters a higher unemployment period or a period described in subparagraph (B)(ii).

"(E) For purposes of subparagraph (B), the term 'intermediate unemployment period' means with respect to any State, the period—

"(i) which begins with the third week after the first week in which the rate of insured unemployment in the State for the period consisting of such week and the immediately preceding 12 weeks equals or exceeds 3.5 percent but is less than 4.5 percent, and

"(ii) which ends with the third week after the first week in which the rate of insured unemployment in the State for the period consisting of such week and the immediately preceding 12 weeks is less than 3.5 percent or equals or exeeds 4.5 percent;

Except that no intermediate unemployment period shall last for a period of less that 4 weeks unless such State enters a high unemployment period, a higher unemployment period, or a period described in subparagraph (B)(ii) or (iii).

"(F) For purposes of this subsection, the rate of insured unemployment for any period shall be determined in the same manner as determined for purposes of section 203 of the Federal-State Extended Unemployment Compensation Act of 1970.

"(3) The amount of Federal supplemental compensation payable to an eligible individual shall not exceed the amount in such individual's account established under this subsection."

(b) The amendments made by subsection (a) shall apply to Federal supplemental compensation payable for weeks beginning on or after the date of the enactment of this Act. In the case of any eligible individual to whom any Federal supplemental compensation was payable for any week beginning prior to such date of enactment and who exhausted his rights to such compensation (by reason of the payment of all the amount in his Federal supplemental compensation account) prior to the first week beginning on or after such date of enactment, such individual's eligibility for additional weeks of compensation by reason of the amendments made by this section shall not be limited or terminated by reason of any event, or failure to meet any requirement of law relating to eligibility for unemployment compensation, occurring after the date of such exhaustion of rights and prior to the date of the enactment of this Act (and such weeks shall not be counted for purposes of determining the expiration of the two years following the end of his benefits year for purposes of section 602(b) of the Tax Equity and Fiscal Responsibility Act of 1982).

(c) The Secretary of Labor shall, at the earliest practicable date after the date of the enactment of this Act, propose to each State with which he has in effect an agreement under section 602 of the Tax Equity and Fiscal Responsibility Act of 1982 a modification of such agreement designed to provide for the payment of Federal supplemental compensation under such Act in accordance with the amendments made by this Act. Notwithstanding any other provision of law, if any State fails or refuses, within the three-week period beginning on the date the Secretary of Labor proposes such a modification to such State, to enter into such a modification of such agreement, the Secretary of Labor shall terminate such agreement effective with the end of the last week which ends on or before such three-week period.

(d) Paragraph (3) of section 602(d) of the Tax Equity and Fiscal Responsibility Act of 1982 (as added by section 310 of the Technical Corrections Act of 1982) is amended by striking out "the number '6', '8', or '10', whichever is applicable" and inserting in lieu thereof "the number applicable".

SEC. 545. EXCLUSION OF CERTAIN HOME ENERGY ASSISTANCE FROM INCOME UNDER SSI AND AFDC.

(a) Section 1612 (b) of the Social Security Act amended—

(1) by striking out "and" at the end of paragraph (11);

(2) by striking out the period at the end of paragraph (12) and inserting in lieu thereof "; and"; and

(3) by adding at the end thereof the following new paragraph:

"(13) any assistance received to assist in meeting the costs of home energy, including both heating and cooling, which (as determined under regulations of the Secretary by such State agency as the chief executive officer of the State may designate) (A) is based on need for such assistance, and (B) is (i) assistance furnished in kind by a private nonprofit agency, or (ii) assistance furnished by a supplier of home heating oil or gas, by an entity providing home energy whose revenues are primarily derived on a rate-of-return basis regulated by a State or Federal governmental entity, or by a municipal utility providing home energy."

(b) Section 402(a) of such Act is amended—

(1) by striking out "and" at the end of paragraph (34);

(2) by striking out the period at the end of paragraph (35) and inserting in lieu thereof "; and"; and

(3) by adding at the end thereof the following new paragraph:

"(36) provide, at the option of the State, that in making the determination for any month under paragraph (7) the State agency shall not include as income any assistance received to assist in meeting the costs of home energy, including both heating and cooling, which (as determined under regulations of the Secretary by such State agency as the chief executive officer of the State

may designate) (A) is based on need for such assistance, and (B) is (i) assistance furnished in kind by a private nonprofit agency, or (ii) assistance furnished by a supplier of home heating oil or gas, by an entity whose revenues are primarily derived on a rate-of-return basis regulated by a State or Federal governmental entity, or by a municipal utility providing home energy.".

(c) The amendments made by subsections (a) and (b) shall be effective with respect to home energy assistance received in months beginning on or after the date of the enactment of this Act and prior to July 1, 1985.

(d) The Secretary of Health and Human Services shall submit a report to the Congress, prior to April 1, 1985, on the implementation and results of the provisions of sections 1612(b)(13) and 402(a)(36) of the Social Security Act, including any recommendations with respect to whether such provisions should be extended in the same or modified form or allowed to expire.

SEC. 546. MODIFICATIONS TO CHLOR-ALKALI ELECTROLYTIC CELLS.

(a) Paragraph (5) of section 48(l) (defining specially defined energy property) is amended—

(1) by striking out "or" at the end of subparagraph (L), and

(2) by redesignating subparagraph (M) as subparagraph (N) and by inserting after subparagraph (L) the following new subparagraph:

"(M) modifications to chlor-alkali electrolytic cells, or"; and

(3) by striking out "(M)" in the second sentence and inserting in lieu thereof "(N)".

(b) The table contained in clause (i) of section 46(a)(2)(C) (relating to amount of credit) is amended by adding at the end thereof the following new subsection:

"VII. Chlor-Alkali Electrolytic Cells—Property described in section 48(l)(5)(M).	10 percent	Jan. 1, 1980.	Dec. 31, 1982."

SEC. 547. INTEREST EXEMPT OTHER THAN UNDER THE INTERNAL REVENUE CODE OF 1954.

(a) IN GENERAL.—Section 153 (relating to interest on certain governmental obligations) is amended by redesignating subsection (m) as subsection (n) and by inserting after subsection (l) the following new subsection:

"(m) OBLIGATIONS EXEMPT OTHER THAN UNDER THIS TITLE.—

"(1) PRIOR EXEMPTIONS.—For purposes of this title, notwithstanding any provisions of this section or section 103A any obligation the interest on which is exempt from taxation under this title under any provision of law which is in effect on the date of the enactment of this subsection (other than a provision of this title) shall be treated as an obligation described in subsection (a).

"(2) NO OTHER INTEREST TO BE EXEMPT EXCEPT AS PROVIDED BY THIS TITLE.—Notwithstanding any other provision of law, no interest on any obligation shall be exempt from taxation under this title unless such interest—

"(A) is on an obligation described in paragraph (1), or

"(B) is exempt from taxation under any provision of this title.".

(b) CONFORMING AMENDMENTS.—

(1) Section 851(b) (relating to definition of regulated investment company) is amended by striking out "103(a)(1)" and inserting in lieu thereof "103(a)".

(2) Section 852 (relating to taxation of regulated investment companies and their shareholders) is amended by striking out "103(a)(1)" each place it appears and inserting in lieu thereof "103(a)".

(3) Section 3454(a)(2)(B) (relating to definitions of interest, dividend, and patronage dividends) is amended by striking out "law" and inserting in lieu thereof "this title".

(4) Section 6049(b)(2)(B) (relating to returns regarding payments of interest) is amended by striking out "law" and inserting in lieu thereof "this title".

(5) Section 6362(b)(4)(A) (relating to qualified State individual income taxes) is amended by striking out "103(a)(1)" and inserting in lieu thereof "103(a)".

And the Senate agree to the same.

JOINT EXPLANATORY STATEMENT OF THE COMMITTEE OF CONFERENCE

The managers on the part of the House and the Senate at the conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 6211) to authorize appropriations for construction of certain highways in accordance with title 23, United States Code, for highway safety, for mass transportation in urban and rural areas, and for other purposes, submit the following joint statement to the House and the Senate in explanation of the effect of the action agreed upon by the managers and recommended in the accompanying conference report:

The Senate amendment struck out all of the House bill after the enacting clause and inserted a substitute text.

The House recedes from its disagreement to the amendment of the Senate with an amendment which is a substitute for the House bill and the Senate amendment. The differences between the House bill, the Senate amendment, and the substitute agreed to in conference are noted below, except for clerical corrections, conforming changes made necessary by agreements reached by the conferees, and minor drafting and clarifying changes.

SHORT TITLE OF BILL

House bill

Provides that the Act may be cited as the "Surface Transportation Assistance Act of 1982".

Senate amendment

Provides that the Act may be cited as the "Surface Transportation Act of 1982".

SHORT TITLE OF TITLE I

House bill

Provides that the first title may be cited as the "Highway Improvement Act of 1982".

Senate amendment

Provides that the title may be cited as the "Federal-Aid Highway Improvement Act of 1982".

REVISION OF AUTHORIZATION FOR APPROPRIATIONS FOR THE INTERSTATE SYSTEM

House bill

Revises authorizations for interstate construction for each of the fiscal years 1984 through 1990 to $4,000,000,000 per fiscal year.

Senate amendment

Authorizes $3,625 billion for fiscal year 1984, $3.8 billion for fiscal years 1985 and 1986, and $4.0 billion for each of fiscal years 1987 through 1990 for the Interstate Highway System construction program.

APPROVAL OF INTERSTATE COST ESTIMATE

House bill

Approves the use of the apportionment factors contained in revised table 5 of the Committee Print numbered 97-53 of the House Committee on Public Works and Transportation to apportion the Interstate construction funds for fiscal year 1984 and provides that for such fiscal year no State shall be apportioned for Interstate construction less than ½ of 1 per centum of the amount authorized for such State immediately before the date of enactment. In addition if any State's apportionment exceeds the established cost of completing that State's portion of the Interstate System and the 4R program in such State, such excess amount shall be available for expenditure on the Federal-aid primary, secondary, and urban systems.

Senate amendment

No comparable provision.

OBLIGATION CEILING

House bill

Provides a limitation of $12.2 billion for fiscal year 1983, $12.7 billion for fiscal year 1984, $13.5 billion for fiscal year 1985, and $14.4 billion for fiscal year 1986 on obligations for Federal-aid highways and highway safety construction programs, excluding obligations for emergency relief, for the U.S. Grant Bridge and the East Huntington Bridge in Ohio and West Virginia, and for the Woodrow Wilson Bridge located in the District of Columbia, Maryland, and Virginia.

Specifies a formula to distribute available obligational authority in fiscal year 1983, 1984, 1985, and 1986, based upon funds apportioned by legislative or administrative formula and upon funds allocated without a formula.

Provides that, during the fiscal year 1983, 1984, 1985, and 1986, no State may obligate more than 35 percent of its annual obligational authority allocation during the first quarter of the fiscal year for which the authority was allocated. No more than 25 percent of the total amount allocated to all the

States may be obligated during the first quarter of the fiscal year for which the authority was allocated.

Provides that sufficient authority be provided by the Secretary to all States to prevent lapse of funds except to the extent States indicate an intention to lapse Interstate construction funds. After August 1 of each of the fiscal years 1983 through 1986, obligational authority shall be withdrawn from any State not able to obligate its share and redistributed to States which are able to obligate, with priority given to States having large balances of unobligated apportioned funds. The Secretary shall not allocate amounts authorized for administrative expenses and forest highways.

Conforms the Omnibus Budget Reconciliation Act of 1981 to the provisions of this section.

Senate amendment

Establishes an obligation limitation of $12 billion for fiscal year 1983, $12.8 billion for fiscal year 1984, $13.6 billion for fiscal year 1985, $14.5 billion for fiscal year 1986, and $14.9 billion for fiscal year 1987, excluding emergency relief projects, rehabilitation of a federally-owned bridge, and a highway construction project at Union Station. The obligational authority for each year would be allocated to the States in the same ratio in which sums to be appropriated to the States for Federal-aid highways and highway safety construction are apportioned or allocated. Collectively, the States can obligate no more than 25 percent during the first quarter of fiscal year 1983.

In revising the redistribution each year, the Secretary shall give priority to those States which have experienced substantial proportional reductions in their apportionments and allocations because of statutory changes under this Act and under P.L 97-134.

AUTHORIZATIONS

House bill

Provides authorizations for each of the fiscal years 1983 through 1986 to carry out the provisions of title 23, United States Code, as follows:

(1)(A) For the Federal-aid primary system, out of the Highway Trust Fund, $2,000,000,000 reduced by the amount authorized for such system by the Federal-Aid Highway Act of 1982 for fiscal year 1983, $2.1 billion for fiscal year 1984, $2.2 billion for fiscal year 1985, and $2.5 billion for fiscal year 1986.

(B) For the Federal-aid secondary system, out of the Highway Trust Fund, $600,000,000 reduced by the amount authorized for such system under the Federal-Aid Highway Act of 1982 for fiscal year 1983 and $600,000,000 per fiscal year for fiscal years 1984 through 1986.

(2) For the Federal-aid urban system, out of the Highway Trust Fund $800,000,000 per fiscal year for fiscal years 1983 through 1986, except that the authorization for fiscal year 1983 is reduced by amounts authorized for such systems under the Federal-Aid Highway Act of 1982.

(3) For Indian reservation roads and bridges, $83,000,000 per fiscal year for fiscal year 1983 through 1986.

(4) For the Virgin Islands, such sums as may be necessary to continue the presence and operation of the territorial representatives of the FHA in the Virgin Islands.

(5) For the Commonwealth of the Northern Mariana Islands, $1,000,000 per fiscal year for fiscal years 1983 through 1986.

(6) For the forest highways, out of the Highway Trust Fund, $33,000,000 per fiscal year for fiscal years 1983 through 1986, except for the reduction of amounts authorized by the Federal-Aid Highway Act of 1982 for such highways.

(7) For public lands highways, out of the Highway Trust Fund, $16,000,000 per fiscal year for fiscal years 1983 through 1986, except for the reduction of amounts authorized by the Federal-Aid Highway Act of 1982 for such highways.

Repeals of section 151 of the Federal-Aid Highway Act of 1978 which provides connector primary demonstration projects to upgrade roads on the primary system between Las Cruces, New Mexico, and Amarillo, Texas, and between Lubbock, Texas and Interstate route 10.

Provides that in fiscal years 1983 and 1984 each State with funds available for obligation on the primary system in excess of the amount apportioned to such State for fiscal year 1982 shall give priority consideration to those priority primary routes designated in Committee Print 97-61 of the House Committee on Public Works and Transportation.

Provides that in fiscal years 1983 and 1984 each State with funds available for obligation on the primary, secondary, or urban systems in excess of the amount of primary, secondary, and urban funds respectively apportioned to such State for fiscal year 1982 shall give priority consideration to railroad-in-highway crossings demonstrations authorized by section 163 of the Federal-Aid Highway Act of 1973 on such respective system.

Provides that not less than 10 percent of amounts authorized to be appropriated under the bill shall be expended with small business concerns owned and controlled by socially and economically disadvantaged individuals.

Senate amendment

Authorizes the appropriation, out of the Highway Trust Fund, of the following sums for fiscal years, 1983, 1984, 1985, 1986, and 1987.

For the Federal-aid primary program, $1.7 billion for fiscal year 1983, $2.1 billion for fiscal year 1984, $2.4 billion for each of fiscal years 1985 and 1986, and $2.6 billion for fiscal year 1987; for the Federal-aid rural program, $0.7 billion for each of fiscal years 1983 through 1987; for the Federal-aid urban program, $0.8 billion for each of fiscal years 1983 through 1987; for forest highways, $50 million for each of fiscal years 1983 through 1987; for public lands highways, $50 million for each of fiscal years 1983 through 1987; for parkways and park highways, $75 million for fiscal year 1983 and $100 million for each of fiscal years 1984 through 1987; for Indian Reservation roads, $75 million for fiscal year 1983 and $100 million for each of fiscal years 1984 through 1987; for bridge replacement and rehabilitation (23 U.S.C. 144), $1.7 billion for each of fiscal years 1983 and 1984, and $1.8 billion for fiscal year 1985, and $2.0 billion for each of fiscal years 1986 and 1987; and for the highway safety improvement program, $0.4 billion for each of fiscal years 1983 through 1987.

Subsection (b) rescinds the unapportioned or unallocated balance of sums authorized by sections 4 and 5 of the Federal-Aid Highway Act of 1982.

Subsection (c)(1) provides a minimum apportionment of one-half of one percent of Interstate construction funds to each State, including Alaska. Whenever this amount exceeds a State's need for Interstate construction and Interstate resurfacing, restoration, rehabilitation, and reconstruction, the State may transfer the excess amount of the Primary System, the Rural Program, or the Urban Program.

Subsection (d) requires that 60 percent of the funds expended by the States on the primary system and on the urban and rural program must be for resurfacing, restoring, rehabilitating and reconstructing roads including upgrading of existing facilities. If these sums are in excess of the States resurfacing, restoring, rehabilitation and reconstruction needs on existing facilities, the State may so certify to the Secretary.

INTERSTATE RESURFACING

House bill

Revises the authorization for Interstate resurfacing (Interstate 4R) from $800 million to $2.1 billion for the fiscal year 1984 and provides new authorizations for Interstate 4R of $2.4 billion for the fiscal year 1985, $2.8 billion for the fiscal year 1986, and $3.1 billion for the fiscal year 1987.

Senate amendment

Provides authorizations for Interstate resurfacing, restoring, rehabilitation and reconstructing (4R), out of the Highway Trust Fund, of $1.8 billion for fiscal year 1984, $2.4 billion for fiscal year 1985, $2.8 billion for fiscal year 1986, $3.2 billion for fiscal year 1987, and $3.4 billion for fiscal year 1988. The requirement that Interstate 4R funds be used only on lanes in use for more than five years is discontinued. The transfer of 4R funds to primary apportionments is permitted when the 4R funds are excess to resurfacing and reconstruction needs.

INTERSTATE TRANSFERS

House bill

Strikes the eighth sentence of 23 U.S.C. 103(e)(4), which provides that "there are authorized to be appropriated for liquidation of the obligations incurred under this paragraph such sums as may be necessary out of the general fund of the treasury." For FY 1983, $257 million is made available out of the Highway Trust Fund for substitute highway projects approved at the discretion of the Secretary. Additional provisions would be inserted in lieu of the eighth sentence which would make available $775 million per fiscal year for each of the fiscal years 1984, 1985, and 1986 out of the Highway Trust Fund (HTF) for substitute highway projects. The availability of HTF financing would restore contract authority to substitute highway projects. Twenty-five percent of the funds available in a fiscal year for substitute highway projects would be allocated at the discretion of the Secretary of Transportion. The remaining 75 percent would be apportioned on the basis of estimates of the cost to complete substitute highway projects prepared by the Secretary of Transportation and approved by the Congress. The first cost estimate would be submitted to the Congress as soon as practicable after enactment of paragraph (a)(1) and when approved by the Congress would be the basis for apportionments for the fiscal year 1984. A revised cost estimate would be submitted to the Congress within ten days subsequent to January 2, 1984, and when approved by the Congress would be the basis for apportionments for the fiscal years 1985 and 1986.

Authorizes such sums as may be necessary from the general funds of the Treasury for substitute transit projects. Funds appropriated for substitute transit projects would be distributed in a manner like that proposed for funds authorized for substitute highway projects. Twenty-five percent of the funds

would be allocated at the discretion of the Secretary of Transportion and 75 percent would be apportioned based upon estimates of the cost to complete substitute transit projects prepared by the Secretary and approved by the Congress.

Section 103(e)(4) of title 23, United States Code, is amended to provide a one-year period of availability for substitute and transit apportioned funds. Apportioned sums not obligated, except for an unusable amount, shall be reapportioned among other States having substitute projects.

Section 103(e)(4) is further amended to provide that no Interstate route or segment statutorily designated after March 7, 1978, shall be eligible for withdrawal or substitution.

Existing provisions are limited to provide that the base cost of a withdrawal is as shown in the latest approved Interstate Cost Estimate. The 1983 cost estimate is used to establish the base cost for all withdrawals approved after the approval of the 1983 cost estimate. Inflation adjustments in base costs are made until the date of approval of the 1983 cost estimate or the date of project approval of a substitute project, whichever is earlier.

The Secretary of Transportation is allowed to make an exception from the September 30, 1983, deadline for concept approval of Interstate route withdrawals where a judicial injunction in effect on May 12, 1982, is prohibiting the construction of that route. The Secretary may extend such date for a reasonable period of time.

The advance construction procedures of 23 U.S.C. 115 now applicable to the Interstate system are extended to substitute highway projects approved under 23 U.S.C. 103(e)(4).

The bond retirement provisions of 23 U.S.C. 122 now applicable to the Interstate System are extended to substitute highway projects approved under 23 U.S.C. 103(e)(4).

Section 107(e) of the Federal-Aid Highway Act of 1975 is amended to give the term "construction" the meaning such term has under title 23 for purposes of determining whether a portion of the Interstate System will be completed.

Senate amendment

Authorizes in addition to any funds authorized to be appropriated out of the General Fund, $500 million for fiscal year 1983, $600 million for each of fiscal years 1984 and 1985, and $650 million for each of fiscal years 1986 and 1987, out of the Highway Trust Fund, for substitute highway projects under 23 U.S.C. 103(e)(4). The effect of this authorization is to grant contract authority for substitute highway projects. Funds for mass transit substitute projects will continue to come from the General Fund of the Treasury.

Amends 23 U.S.C. 103(e)(4) to allow withdrawal of, and to include as eligible for the benefits of withdrawal and substitution any Interstate routes including those in rural areas, except those routes or segments of routes added to the Interstate System by specific legislation after March 7, 1978.

Provide that the inflation adjustment will be based on charges in construction costs as of June 30, 1980.

Prohibits withdrawal and substitution for routes or segments of routes added to the Interstate System by specific legislation after March 7, 1978.

Clarifies that 100 percent Federal share shall also apply to traffic control signalization projects which might be included as part of an Interstate substitution project under 23 U.S.C. 103(e)(4). Present law now permits 100 percent Federal share for projects for traffic control signalization funded from all other Federal-aid categories.

Clarifies that "concept programs" for substitution projects may not be approved after September 30, 1983.

PRIMARY SYSTEM

House bill

Amends 23 U.S.C. 104(b)(1) to change the formula to apportion Federal-aid primary authorizations. The new formula would be based one-half on rural population and one-half on urban population. The present formula is based upon area, rural population, mileage of postal routes, and urban population.

The Virgin Islands, Guam, and American Samoa are made one State for purposes of the Federal-aid primary system. Such State is guaranteed one-half of 1 per centum of each year's primary system apportionment. The territorial highway program under section 215 of title 23 is not reauthorized.

Senate amendment

Eliminates the priority primary program (23 U.S.C. 147). Any unobligated authority for the priority primary program, effective the date of enactment of this section, would be apportioned by the Secretary of Transportation in the same manner as primary funds and would therafter remain available for obligation for the same period as if the funds were apportioned like primary funds. Pertinent sections of title 23, United States Code, would be amended to reflect the elimination of the priority primary program. This section would also permit the District of Columbia to receive a minimum one-half of 1 percent of each year's primary apportionment.

INTERSTATE SYSTEM REHABILITATION AND RECONSTRUCTION

House bill

Provides for a change in the Interstate 4R apportionment formula. For resurfacing, restoration, rehabilitation, and reconstruction (Interstate 4R) funds apportioned in accordance with 23 U.S.C. 104(b)(5)(B), beginning with fiscal year 1984 to be apportioned on October 1, 1982, the distribution formula will be based one-third on vehicle miles traveled, one-third on gasoline used, and one-third on diesel fuel used in the individual States.

Senate amendment

Establishes a new interstate 4R apportionment formula. The new formula is based 60 percent on the ratio of the number of lane miles on Interstate routes (other than those on toll roads not subject to a Secretarial agreement) each State has of the total lane miles in all States, and 40 percent on the ratio each State has of the total vehicle miles traveled on those lanes on Interstate routes (other than those on toll roads not subject to a Secretarial agreement). This section also establishes a minimum one-half of one percent guarantee of Interstate 4R apportionments for each State.

The Secretary is directed to study the procedures for distributing Interstate 4R funds to the States. The purpose of the study is to analyze current conditions and factors including volume and mix of traffic, weight and size of vehicles, environmental, geographical, and meteorological conditions in various States, and any other factors that may contribute to the deterioration of the Interstate system. The Secretary shall consider such criteria as need, national importance, impact on individual State highway programs, structural and operational integrity, and any other relevant criteria, to determine the most equitable method of distribution. The Secretary is directed to report the results of the study together with recommendations for legislation not later than 2 years after the date of enactment of this section.

FEDERAL-AID URBAN PROGRAM

House bill

No provision.

Senate amendment

Establishes the Federal-aid urban program. The existing Federal-aid urban system would be abolished, allowing for a wider range of transportation programs in urban areas. The changes will facilitate the achievement of goals relating to equity of programs, energy conservation, center-city revitalization, economic development, and reindustrialization.

All public roads in urban areas would be eligible, except those on the primary system and Interstate System. Transit capital projects and transportation system management (TSM) projects would also be eligible as would projects previously categorized as safer-off-system. Consolidated safety programs incorporated by section 112 of this bill, the Highway Safety Improvement Program, are eligible for funding as part of the urban program.

The Certification Acceptance Procedures as provided by section 117(a) and the Secondary Road Plan procedures as provided by section 117(f) of title 23, United States Code, may be utilized by the States for projects under this program.

FEDERAL-AID RURAL PROGRAM

House bill

No provision.

Senate amendment

Amends section 103 of title 23, United States Code. It combines the secondary program and eligible projects now under the nonsafety portion of the safer-off-system program, the Great River Road program, the access to lakes program, the bridges on Federal dams program and the economic growth center program. This would result in a consolidated rural program and end the secondary system designation, thus making funds available for all rural and nonurban roads, other than primary and Interstate System roads. Projects eligible for funding would be expanded to include nonurban public transportation and projects previously categorized as safer-off-system roads. Consolidated safety programs incorporated by section 112 of the bill, the Highway Safety Improvement Program, are eligible for funding as part of the Rural Program. Consolidating the funds for the above mentioned programs and terminating the secondary system designation would increase the flexibility for use of the funds as well as simplify grant and project administration and management.

The Certification Acceptance procedures as provided by section 117(a) and the Secondary Road Plan procedures as provided by section 117(f) of title 23, United States Code, may be utilized by the State for projects under this program.

ENERGY-INSPECTED ROADS

House bill

The Federal share increased to 85 per centum for 4R projects on roads which the Secretary has determined, at a State's re-

quest, are energy-impacted roads. The provision also allows the States to give priority to such projects in their annual program to utilize title 23 funds and allows the Secretary to give priority to such projects when approving programs.

Senate amendment

Essentially the same as the House provision.

COST REDUCTION

House bill

Directs the Secretary of Transportation to require that every project on any Federal-aid system which will have construction costs of $2 million or above be subjected to value engineering design review.

Senate amendment

No comparable provision.

RESURFACING STANDARDS

House bill

Section 109 of title 23, United States Code, is amended to express the Congressional intent that resurfacing, restoring, and rehabilitating standards for highways, other than fully controlled access highways, shall be for the purpose of preserving and extending the service life of highways and enhancing highway safety.

The National Academy of Sciences is (1) to conduct a study of the safety cost-effectiveness of geometric design criteria of standards for construction and reconstruction of highways to determine the most appropriate minimum standards to apply to resurfacing, restoration, and rehabilitation projects, including a study of the cost-effectiveness of the hot dip galvanizing process for installation, repair, or replacement of exposed structural steel, and (2) to propose standards to preserve and extend highway service life and enhance highway safety. Such study and proposed standards are to be submitted to the Secretary of Transportation for review and submitted to Congress for approval.

Senate amendment

No comparable provision.

VENDING MACHINES

House bill

Amends section 111 of title 23, United States Code, by inserting a new subsection (b) therein. This new provision allows States to permit the placement of vending machines in rest and recreation areas and in safety rest areas on the Interstate System.

The vending machines which States may permit to be placed in these areas are limited to those which dispense such food, drink, and other articles as the State highway department determines appropriate and desirable. The machines are to be operated by a State agency authorized to issue licenses for the operation of concessions located on Federal property and operated by the blind, and the costs of installation, operation, and maintenance are not eligible for Federal reimbursement.

Senate amendment

Permits vending machines on Interstate rights-of-way for the benefit of the traveling public without cost to the Federal Government. The facilities at which vending machines would be permitted include rest areas, weigh stations and visitor information areas. First priority is given under this section to Randolph/Sheppard Act agencies to operate such facilities.

LETTING OF CONTRACTS

House bill

Changes the exception to the general requirements of competitive bidding (23 U.S.C. section 112) from a finding by the Secretary that some other method is in the public interest to a demonstration by the State highway department to the satisfaction of the Secretary that some other method is more cost-effective and also repeals the exemption from competitive bidding requirements for Federal-aid secondary projects advanced under certification acceptance.

Senate amendment

No comparable provision.

CONSTRUCTION BY STATES IN ADVANCE OF APPORTIONMENT

House bill

Amends 23 U.S.C. 115 by changing from January 1, 1978, to January 1, 1983, the date governing the payment of bond interest as an eligible cost of construction for advance construction of Interstate projects which are under construction on, and converted to regular funding after, the governing date.

Authorizes the Secretary to pay interest on bonds issued after the date of enactment of this Act to the extent that the proceeds from the sale of bonds are expended for the construction of projects on the Interstate System.

If the rate of inflation in construction (over the life of the project) exceeds the rate of interest on the bonds, the entire amount of the interest is eligible for reimbursement from future apportionments. If the rate of inflation in construction is less than the rate of interest on the bonds, only the amount of interest calculated at the rate of inflation may be reimbursed.

Senate amendment

No comparable provision.

ADVANCE CONSTRUCTION FOR BRIDGE AND HIGHWAY SUBSTITUTE PROJECTS

House bill

Extends the availability of advance construction provisions to bridge projects under the Highway Bridge Replacement and Rehabilitation Program (23 U.S.C. 144). The approval of a bridge project under this provision is conditioned on the availability of an authorization which is in effect for the fiscal year for which the application is sought beyond the currently authorized funds for such State and that the approval will not exceed the State's expected apportionment of such authorization.

Another provision of the bill extends the availability of advance construction provisions to substitute highway projects under section 103(e)(4).

Senate amendment

Amends the existing advance construction provision to permit construction by States of highway substitute and bridge projects in advance of apportionment of highway substitute and bridge funds apportioned under 23 U.S.C. 103(e)(4) and 144.

MAINTENANCE

House bill

Amends subsection 116(c) of title 23, United States Code, to permit the Secretary to withhold project approval on the Federal-aid system involved for projects in specific areas within a State, or for the entire State, where the Secretary finds that a project is not being properly maintained.

Senate amendment

Subsection 116(b) of title 23, United States Code, requires maintenance agreements between a State without authority to maintain a project constructed "on the Federal-aid secondary system, or within a municipality," and the appropriate county or municipal officials. This section would amend subsection (b) to require maintenance agreements when a State does not have authority to maintain any project.

This section would amend subsection 116(c) of title 23, United States Code, to permit the Secretary to withhold project approval for projects in specific areas on one or more of the Federal-aid systems or programs within a State, or for the entire State, where the Secretary finds that a project is not being properly maintained. Under present law, the Secretary must withhold project approval for the entire State for all projects when a single project is not being properly maintained.

INTERSTATE DISCRETIONARY FUNDS

House bill

The Interstate Discretionary Fund is made discretionary rather than providing the funding on a first-come first-served basis. In addition, the Secretary is permitted to prioritize the allocation of funds in the fund, first, for high-cost projects which are on segments not open to traffic and, second, for projects which are high cost in relation to a State's apportionment. In addition to lapsed funds, $300,000,000 is set aside from Interstate construction funds for deposit into the fund and the reduction to a State's unobligated balance associated with 23 U.S.C. 103(e)(4) withdrawals will also be deposited into the fund.

In addition, an Interstate 4R discretionary fund is created.

Senate amendment

No comparable provision.

INTERSTATE SYSTEM RESURFACING TRANSFERS

House bill

Sections 119(a) and 139(a) of title 23, United States Code, are amended, beginning with funds apportioned for fiscal year 1984, to allow the Secretary of Transportation to approve 4R projects on the Interstate System designated, before the date of enactment of the Act, under section 139(a) of title 23 in conjunction with the withdrawal of approval of another route on the Interstate System under section 103(e)(4) of title 23.

Section 119 of title 23 is amended to permit the transfer of Interstate construction apportionments that do not exceed the Federal share of the cost of the Interstate segments open to traffic (other than high-occupancy vehicle lanes) in the most recent cost estimate to Interstate 4R apportionments. Not more than one-half of a State's Interstate construction apportionment for a fiscal year may be transferred in that fiscal year. Subsequent Interstate cost estimates shall be reduced in an amount equal to the amount transferred.

Senate amendment

Permits the transfer of up to 50 percent of a State's Interstate construction apportionment for a fiscal year to the State's Interstate 4R apportionment. The transfers are limited to the amounts expected to be apportioned to the State for Interstate 4R for the next two fiscal years. The State is required to restore the amounts transferred within the next two fiscal years, and it fails to do so the cost of completion of the Inter-

state System in that State, as reflected in the next Interstate cost estimate, shall be reduced in an amount equal to the amount transferred.

TRANSFERABILITY

House bill

No comparable provision.

Senate amendment

This section amends 23 U.S.C. 104 to permit transfers between primary system and rural program apportionments and between primary system and urban program apportionments of up to 100 percent. Current law now permits 50 percent transfers between primary and secondary systems and between primary and urban systems.

FEDERAL SHARE

House bill

Section 120(c) of title 23 is amended to establish a Federal share for Interstate Resurfacing (4R) projects financed with primary funds as if the projects were financed with Interstate 4R funds.

Section 120(d) of title 23 is amended to permit a Federal share of 100 percent for certain pavement marking and traffic control signalization projects.

Provide a Federal share of at least 95 percent for economic growth center development highways projects, carpool and vanpool projects, Great River Road projects, projects for access highways to public recreation areas on certain lakes, bicycle projects, certain railroad-highway crossing demonstration projects, and certain priority primary projects which the House Committee on Public Works and Transportation has identified as eligible routes.

Senate amendment

Same as the House regarding traffic control signalization projects under section 103(e)(4).

HIGHWAY BEAUTIFICATION

House bill

The House bill restructures the current outdoor advertising control program in a number of ways. It removes the Federal Government from the day-to-day oversight of State programs and leaves the details of those programs to the States. The bill essentially retains current controls along the Interstate and primary systems, including the requirement to remove signs with compensation. The costs of acquiring signs are transferred to the States. Federal authorizations are required only to meet obligations under the 1958 bonus program, applicable in 23 States.

The States are encouraged to maintain certain specified minimum regulatory control through the incentive of a ten percent reduction of Federal-aid highway funds. The minimum controls are not mandatory and the States are not coerced in this regard since they may unilaterally determine not to comply and forego these additional funds.

The essentials of effective control are set forth as follows:

(1) Signs must be limited to commercial and industrial areas or to unzoned commercial and industrial areas as the State may deem appropriate. The existing exemptions found in section 131(c) are also retained.

(2) Signs may not be erected in areas where funds have been expended to cause their removal.

(3) The compensation provisions of the current law are expanded to protect sign owners from the impairment of the customary use or maintenance of signs. States would be required to pay compensation to cover these situations. The bill also makes clear that traditional concepts of eminent domain and condemnation proceedings also apply to sign acquisitions.

(4) The States are encouraged to provide for scenic areas where signs would not be permitted.

The Governor of each State must certify the State's program to the Secretary. The Secretary's oversight would be limited to assuring that the State makes a proper certification and controls signs in accord with that certification. The penalty provision of the current law is retained to permit the Secretary to enforce the law.

The bill makes no changes in the 1958 bonus program, the junkyard control program, the specific information signing (logo) program, and the information center program.

No specific authorizations are made.

Senate amendment

No comparable provision.

APPROACHES

House bill

Existing law authorizes the expenditure of Federal-air funds on projects approaching toll roads, bridges, and tunnels only to a point that such projects would have some use other than simply feeding traffic directly onto the toll facility. This restriction is eliminated and authorize the use of Federal-aid funds for projects which feed all traffic directly onto the toll facility, provided the Secretary is given the authority to define the extent of such projects.

Senate amendment.

No comparable provision.

PARKING FACILITIES

House bill

Expands the authority to acquire land and construct fringe and corridor parking facilities on the Interstate System. Provided the facilities are for the exclusive use of carpools and vanpools, they do not have to be located and designed in conjunction with existing or planned public transportation facilities. Funds apportioned for resurfacing, restoring, rehabilitating and reconstructing the Interstate System shall be used to pay the Federal share of the cost of these projects.

Senate amendment

This section amends section 137 of title 23, United States Code, by adding a new subsection (f) which allows Interstate 4R funds to be used for projects providing preferential parking for carpools. It incorporates the same restrictions as other fringe parking facilities with respect to being outside the central business district and within an Interstate corridor, and the primary purpose of reducing vehicular traffic on the Interstate highway. Other standard features concerning contracting and fees charged are also included.

EQUAL OPPORTUNITY

House bill

Section 140 of title 23 is amended to authorize training and assistance programs for minority contractors and authorizes the use of an additional $10 million per fiscal year to conduct and finance such programs. The $10 million set-aside from annual apportionments is continued for construction training and supportive services programs.

23 U.S.C. 140 is also amended to assure that equal employment opportunity must be provided without regard to sex.

Senate amendment

This section amends 140 of title 23, United States Code, to assure that equal employment opportunity must be provided without regard to sex; to authorize the Secretary of Transportation to conduct and finance minority business enterprise training programs and assistance programs; and to authorize the use of $10 million per fiscal year from the sums apportioned under 23 U.S.C. 104(b) to conduct and finance minority business enterprise training programs and assistance programs. These training and assistance programs are specifically provided for the benefit of women and minorities.

PUBLIC TRANSPORTATION

House bill

Permits the cost of providing shuttle service to and from fringe and corridor parking facilities constructed with Federal-aid funds to be included in the eligible fees that may be charged for the use of the parking facilities.

Senate amendment

This section amends section 142(a)(1), (b) and (f) of title 23, United States Code, by substituting "high occupancy vehicle passengers" for "bus lanes," "high occupancy vehicle passengers", and "high occupancy vehicles" for "public mass transportation systems". The overall effect is to expand the scope of the projects eligible for funding under section 142 to include carpool and vanpool vehicles and passengers. Also, it allows such projects to include eligible facilities for carpools and vanpools only, without the presence of buses or rail transit.

BRIDGE PROGRAM APPORTIONMENT

House bill

Procedures are established for determining the bridge program apportionment factors annually for each State using the latest available Federal-aid and off-system bridge inventory data.

The maximum share of apportioned bridge funds a State may receive is raised from eight percent to ten percent.

Senate amendment

This section provides for an annual apportionment starting in fiscal year 1983 based upon the following formula; All deficient bridges will be divided into four categories: (1) Federal-aid system bridges and bridges on public roads functionally classified as arterials or major collectors eligible for replacement, (2) Federal-aid system bridges and bridges on public roads functionally classified as arterials or major collectors eligible for rehabilitations, (3) Off-system bridges and bridges on public roads not functionally classified as arterials or major collectors eligible for replacement, and (4) Off-system bridges and bridges on public roads not functionally classified as arterials or major collectors eligible for rehabilitation. The square footage of deficient Federal-aid system bridges, and bridges on public roads functionally classified as arterials or major collectors, both those eligible for replacement and those eligible for rehabilitation, shall be multiplied by a factor of two. The square footage of deficient bridges in each category shall be multiplied by a national average unit cost on a State-by-State basis and the total cost in each divided by the total cost of the Nation's deficient bridges to yield the apportionment factors, except that no State shall receive less than one-quarter of one percent nor more than 9.25 percent of the annual apportionment. These funds are available for 4 years.

HIGHWAY BRIDGE REPLACEMENT AND REHABILITATION

House bill

Provides a $200 million set-aside from authorizations for highway bridge replacement and rehabilitation for each of the fiscal years, 1983, 1984, 1985, and 1986 for the bridge discretionary program. Conditions for allocating bridge discretionary funds are unchanged from existing law except for language making the La Salle Peru (Illinois) Bridge replacement project and replacement the Russian River Bridge and Preston Overhead north of Cloverdale, California, necessitated by the unstable soil conditions which are causing the structure to shift, including such relocation of the highway approaches as is occasioned by the replacement of the structures on a site outside the slide area where soil conditions are stable, eligible for discretionary bridge funding.

Senate amendment

Subsection (c)(2) provides for a Discretionary Bridge Fund of $300 million for each of fiscal years 1983 through 1987. Funds are available for a period of 4 years. Projects eligible for the funds are those costing more than $10 million or those costing at least twice a State's annual bridge fund apportionment. A technical amendment is also made to 23 U.S.C. 144(g) to change the requirement of expenditures on bridges off the Federal-aid systems to a requirement of at least 15 per centum of expenditures on bridges on public roads not functionally classified as arterials or major collectors. The provision also deletes the provision of 23 U.S.C. 144(g) which prohibits the expenditure of more than 35 per centum of a State's bridge apportionments off the Federal-aid systems.

Another provision of the Senate amendment directs the Secretary to develop a selection process for discretionary bridges authorized under section 144(g). This selection process is to include a formula resulting in a rating factor which is based on criteria including the sufficiency rating, average daily traffic, average daily truck traffic, defense highway system status and the State's unobligated balance of funds received under section 144. In addition, the Secretary is directed to give consideration to bridges that are closed to all traffic or that have a load restriction of 10 tons or less. Those bridges already eligible for discretionary bridge funds will remain eligible. After the issuance of a final regulation, eligible bridges will be limited to those with a rating factor of 100 or less, based on a scale of 0 to infinity. Makes eligible under section 144(g) of title 23 a project to replace the La Salle-Peru Bridge in Illinois.

CARPOOL AND VANPOOL PROJECTS

House bill

Conforms section 146 of title 23 to the increase in the Federal-aid participation level in carpool and vanpool projects from 75 percent to 95 percent.

Senate amendment

Amends section 120(d) of title 23, United States Code, to allow up to 100 percent Federal share on projects for the acquisition of vehicles for carpooling and vanpooling.

Subsection (b) authorizes and directs the Secretary of Transportation to expend such sums as are necessary out of Federal Highway Administration administrative funds to carry out the national policy of promoting commuter modes of transportation which conserve energy, reduce pollution, and reduce traffic congestion.

ALLOCATION OF URBAN FUNDS

House bill

23 U.S.C. 150 is revised to permit Federal-aid urban system funds that are allocated to urbanized areas of 200,000 or more population to be used in other urbanized areas within the State or any urban areas within the State. The additional flexibility in use of the funds for urban projects would be subject to the approval of the local officials, the governor, and the Secretary.

Senate amendment

Permits the transfer of funds attributable to an urbanized area of 200,000 or more population to the allocation of another urbanized area in the State or to any other urban area in the State. A transfer, requested by the State, would be subject to the approval of the Secretary and the local officials of the urbanized area from which the funds are to be transferred.

HAZARD ELIMINATION PROGRAM EXTENSION

House bill

Section 152 of title 23, United States Code, is amended to extend the eligibility of hazard elimination funds to highway safety improvement projects off the Federal-aid systems.

Senate amendment

Repeals section 152 of title 23 as the hazard elimination program is incorporated in the highway safety improvement program.

FEDERAL LAND HIGHWAYS

House bill

The separate provisions of chapter 2 of title 23, United States Code, which provide for forest highways (section 204), park roads (section 206), parkways (section 207), Indian reservation roads and bridges (section 208), and public lands highways (section 209) are eliminated and in lieu thereof a coordinated Federal lands highways program is established and the classes of Federal lands highways are continued. The Secretary of Transportation is made responsible for oversight and coordinating the Federal lands highways in order to ensure that such highways are treated under the same uniform policies.

Jurisdiction of the Federal lands highways is not transferred from the agencies that currently manage the respective Federal lands. The Department of the Interior is involved in coordination with the land managing agency in the planning studies and program development of public Federal lands highways. The Department of the Interior would also provide design and construction assistance to the Federal land managing agencies.

The allocation criteria relative to forest highways and public lands highways are revised in order to reflect the policies and directions mandated by renewable resource and land use planning legislation. Similarly, allocation criteria are established for park roads, parkways, and Indian reservation roads and bridges.

One and one-half percent of funds appropriated for Federal lands highways will be available for planning and research purposes.

Senate amendment

Establishes a Federal Lands Highway Program which would include forest highway, park roads, parkways, Indian reservation roads, and public lands highways.

Allocation criteria are modified for forest highways and forest development roads and trails and allocation criteria are established for park roads, parkways, and Indian reservation roads. For public lands highways, the criteria are the same as in existing law, but a new provision would provide that preference be given to those highway projects which are significantly impacted by Federal land and resource management activities.

The new section authorizing the Federal Lands Highways Program places on the Secretary of Transportation the oversight and coordinating responsibility for Federal Lands Highways in order to ensure that such highways are treated under the same uniform policies as roads which are on the Federal-aid systems.

This proposal would not transfer jurisdiction of the Federal roads from the agencies that currently manage the respective Federal lands. Rather, it would involve DOT in coordination with the land managing agency, in the planning studies and program development of public Federal lands highways roads. The DOT would also provide design and construction assistance to the land managing agencies.

The Secretary must continue to determine that the Indian roads funds are spent in addition to, and not in lieu of, the States Regular Federal-aid funds.

This section would also add to title 23, United States Code, a definition of the term Federal Lands Highways, amend the definitions of the terms Indian reservation roads and park roads to include public roads only, and make technical changes to conform affected sections of title 23, United States Code, with the new Federal Lands Highways Program.

BICYCLE TRANSPORTATION

House bill

The Federal share payable for bicycle facilities changed to 95 percent rather than the share applicable to the category of Federal-aid system from which funds for such projects are made available. The types of projects that can be funded with Federal-aid highways funds (except Interstate) is expanded to include projects not on or adjacent to a Federal-aid highway project and nonconstruction projects related to safe bicycle use.

Projects funded under this provision must be principally for transportation, as determined by the Secretary as part of the normal review process, rather than recreational purposes. On highways without full control of access where a bridge deck is being replaced or rehabilitated, the bridge shall be made accessible for the safe accommodation of bicycles when it can be done at reasonable cost and where bicycles are permitted at either end.

Senate amendment

Broadens current authority to allow Federal-aid highway funds to participate in a greater variety of projects to encourage bicycle transportation and to provide pedestrian facilities. It would allow States greater flexibility in developing federally assisted bicycle and pedestrian projects by (1) eliminating the requirement that bicycle or pedestrian projects be "on or in conjunction with highway rights-of-way"; (2) eliminating the limitation on the expediture of Federal-aid highway funds for bicycle or pedestrain projects; and (3) specifically allowing Federal-aid highway funds to participate in nonconstruction projects that are expected to enhance bicycle safety and use. The Federal share for bicycle projects would be increased to 100 percent.

PARKING RAMPS AND FRONTAGE ROADS

House bill

Assures that certain parking facilities in the State of Minnesota will be added to the 1981 Interstate cost estimate. The parking ramps, which will include spaces for interstate construction funds in connection with the I-394 project in Minneapolis.

The Secretary of Transportation is authorizes to approve the expenditure of funds under section 108(b) of the Federal-Aid Highway Act of 1956 for construction of a previously approved project providing improvements to and reconstruction of ramps and service roads which are developed as part of a roadway system to relieve congestion on a segment of the Interstate System.

Senate amendment

Clarifies the eligibility for interstate funding for four projects for fringe parking facilities along Interstate routes.

PROJECT ELIGIBILITY

House bill

The cost of improvements in the vicinity of an interchange on an Interstate route in the State of Massachusetts which interchange has been approved in concept by the Secretary of Transportation is made eligible for Interstate construction funds if such improvements are necessary to upgrade the safety of a Federal aid primary route not on a common alignment with such Interstate route.

Senate amendment

No comparable provision.

ACCELERATION OF PROJECTS

House bill

The Secretary of Transportation is directed to establish accelerated methods for processing projects under title 23 of the United States Code.

Senate amendment

No comparable provision.

FOUR-LANE BRIDGES

House bill

Payments for additional construction of a specifice type of bridge when initial authorization for payments was between January 1, 1970, and the date of the enactment of this Act are authorized. Only two-lane bridges with a substructure and deck trust capable of supporting four-lane bridges are eligible.

Senate amendment

No comparable provision.

DEMONSTRATION PROJECTS

House bill

The following demonstration projects are authorized:

(1) In Los Angeles County, California, a project demonstrating methods of improving the motor vehicle transportation of freight to and from areas for the transshipment of water borne commerce at a cost not to exceed $19,000,000 per fiscal year for fiscal years 1983 and 1984 and $20,000,000 for fiscal year 1985.

(2) A project in the State of Pennsylvania in the vicinity of Altoona on Route 220 to demonstrate state of the art technology enclosing a gap of a multi-lane limited access approach road at a cost not to exceed $5,000,000 for fiscal year 1983, $10,000,000 for fiscal year 1984, and $62,000,000 for fiscal year 1985.

(3) A project in the vicinity of Buhne Point, Humboldt Bay, California, to demonstrate state of the art methods of repairing damaged highways resulting from shoreline erosion at a cost not to exceed $9,000,000.

(4) A project in the vicinity of East Baton Rouge, Louisiana, to demonstrate the efficacy of reducing traffic congestion in the immediate vicinity of a partial-diamond, partial-cloverleaf interchange at not to exceed $5,000,000.

(5) A project in the vicinity of Louisville, Kentucky, to demonstrate methods of accelerating construction of high traffic sections of highways on the primary system directly connected to the Interstate System at a cost not to exceed $25,000,000 for fiscal year 1983 and $27,000,000 for fiscal year 1984.

Senate amendment

The following demonstration projects are authorized:

(1) Projects in and around Devils Lake, North Dakota which demonstrate the use of construction techniques which will prevent wave erosion on roadways which cross closed basin lakes at grade level.

(2) A project in cooperation with the State of Idaho to determine what factors contribute to a high incidence of truck accidents.

(3) A project on the Federal-aid urban system to show how downtown congestion can be relieved by the construction of a high-level bridge over a segment of intercoastal waterway. $23 million is authorized in contract authority to carry out this provision.

(4) A demonstration project for East Baton Rouge, Louisiana.

(5) A project in cooperation with the State of Vermont, which will demonstrate the feasibility of extending the coverage of State certifications under section 117(a) of title 23, United States Code. The purpose of the demonstration project is to determine to what extent States are able to carry out the requirements of Federal law, both title 23 and nontitle 23 requirements, and to determine what kinds of problems may be encountered under such procedures. The project shall also document those areas where savings can be made in time and paperwork without adverse impacts on public participtionor the environment.

MANPOWER NEEDS STUDY

House bill

Directs the Secretary to enter into an agreement with the National Academy of Science's Transportation Research Board to conduct a study of future transportation professional manpower needs. The study is to include, among other things, prevailing methods of recruitment, training and financial, and other incentives and disincentives which encourage or discourage retention in service of transportation manpower by Federal, State, and local governments. The report is to be submitted to Congress in two years, and the Secretary is to furnish the Academy information deemed necessary by the Academy for the study.

Senate amendment

No comparable provision.

VEHICLE WEIGHT, LENGTH, AND WIDTH LIMITATIONS

House bill

Section 127 of title 23, United States Code, is amended to provide for national uniform vehicle axle and gross weight limits for the Interstate System. These limits are set at 20,000 pounds for a single axle and 34,000 pounds on a tandem axle. The overall gross vehicle weight is to be limited by operation of the bridge formula to a maximum of 80,000 pounds, except for nondivisible loads for which special permits have been issued by States in accordance with applicable State laws. No funds authorized to be appropriated under the 1956 Highway Act may be apportioned to a State which does not permit the operation of such vehicles at such maximum weights on the Interstate System within that State. Amounts so withheld will lapse.

The new section also provides, however, that apportionments shall not be denied to States which allow the operation of vehicles which that State determines, in consultation with the Secretary, could have legally operated in the State on July 1, 1956, or in the case of overall gross weight of any group of two or more consecutive axles, on the date of enactment of the Federal-Aid Highway Act of 1974. For the State of Hawaii, the applicable date is February 1, 1960, rather than July 1, 1956. For the State of Michigan, laws or regulations in effect on May 1, 1982, are applicable for the purposes of this subsection of title 23.

Subsection (b) of section 127 of title 23 provides that funds under the 1956 Highway Act may not be apportioned to a State with (1) a vehicle length limitation of less than 48 feet on the length of a semitrailer in a truck tractor-semitrailer combination, (2) a vehicle length limitation of less than 28 feet on the length of any semitrailer or trailer in a "double" combination, or (3) a vehicle width limitation other than 102 inches on the Interstate System.

Subsection (c) of section 127 of title 23 provides that the length limitations of (b) above do not apply to a truck tractor. States are further precluded from prohibiting the use of trailers or semitrailers of such dimensions as those that were in actual and lawful use in such State on the date of enactment of this Act.

While the bill establishes 28 feet as the uniform standard trailer length applicable to doubles, it also provides that no State shall prohibit or restrict the use of existing doubles trailers of up to 28½ feet for the life of those traiers.

Subsection (d) of section 127 of title 23 provides that "doubles" shall not be prohibited from operating nationwide on the Interstate System.

Subsection (e) of section 127 of title 23 provides the Secretary with general authority to implement this section by regulation and specifically authorizes the Secretary to make determinations necessary to accommodate specialized equipment such as automobile transporters.

Subsection (f) of section 127 of title 23 defines "truck tractor" as the noncargo carrying power unit in a combination vehicle.

Subsection (g) of section 127 of title 23 excludes such safety and energy conservation devices as shall be designated by the Secretary from the limits described in subsection (b) and (c) of section 127 of title 23. This would allow the use of the devices set forth in the bill and similar devices without increasing the cargo-carrying capacity of a vehicle. However, any device capable of carrying cargo would be included in the length and width of a vehicle for the purposes of subsections (b) and (c).

Subsection (h) of section 127 of title 23 provides that States must permit vehicles subject to this section reasonable access to and from the Interstate System, terminals, and facilities for food, fuel, and rest. This provision is not intended to preempt a State's reasonable exercise of its police powers with respect to safeguarding public safety on roads within the area of its jurisdiction.

The amendment to section 127 takes effect only upon enactment of a more equitable tax structure for highway users.

Senate amendment

SEC. 246. This provision amends section 126 of title 23, United States Code, to establish a national uniform maximum weight per axle and by gross weight. The limits are set at 20,000 pounds for single axles, 34,000 pounds on a tandem axle and an overall gross weight of 80,000 pounds as limited by the bridge formula contained in section 127.

The provision also clarifies the application of the "grandfather clauses" authorized by the Federal-Aid Highway Act of 1956 and the Federal-Aid Highway Amendments of 1975. Under this provision States will determine the weight of vehicles and classes of vehicles eligible under the grandfather provision as it applies to their State, concerning length limitations, the Senate amendment prohibits States from imposing trailer limitations if less than 48 feet for trailers in a "single" combination or 28 feet for "double" combinations on any segment of the interstate system or Federal-aid highways except with respect to certain qualifying Federal-aid highways. Assures that State regulation may not apply to the length of truck tractors or the overall length of singles and doubles. (The bill is neutral with respect to State regulation of "triples" or straight trucks involving no combinations.) States are prohibited from imposing regulations that have the effect of being more restrictive than those in force on December 1, 1982. Existing trailers or semitrailers of up to twenty eight and a half feet in length, in a truck tractor-semitrailer-trailer combination are allowed to continue to operate in Commerce if actually operating on December 1, 1982 within a 65 foot overall length limit in any State.

Prohibits States from precluding "double" combination units from the interstate and federal-aid highway system—except with respect to such qualifying Federal-aid highways designated pursuant to subsection (e) of this section.

Gives the Secretary of Transportation the authority to establish our guidelines for the implementation of the provisions of the section and to make such determinations as are necessary to accommodate specialized equipment.

Authorizes the Secretary of Transportation and the States to restrict the application of the federal standards for length on Federal-aid highways if the application of such standards to specific Federal-aid highways would adversely affect the public safety.

Defines "truck tractor" as the non-cargo carrying power unit that operates in combination with a semi-trailer or trailer(s).

Provides that the provisions of the section take effect six months after the enactment of the bill.

Concerning commercial motor vehicle width regulations, States are required to allow commercial motor vehicles to operate on highways at a width of 102 inches provided the traffic laws are designed to be a width of 12 feet or more.

The length and width limitations are exclusive of a number of fuel conservation and safety devices listed.

No State may deny reasonable access to and from the interstate and federal aid system and terminals and facilities for food, fuel, repairs, and rest.

MARTIN LUTHER KING BRIDGE

House bill

Establishes specific criteria under which the Martin Luther King Bridge, which crosses the Mississippi River between St. Louis, Missouri, and East St. Louis, Illinois, would be eligible for assistance under section 144, Highway Bridge Replacement and Rehabilitation Program, of title 23, United States Code.

Senate amendment

No comparable provision.

FERRY BOAT STUDY

House bill

Directs the Office of Technology Assessment (OTA) to study the feasibility of a high speed ferry boat operation from St. Croix and St. Thomas in the Virgin Islands. Other agencies of the Federal Government are directed to assist the OTA, and a report is due to the Congress no later than January 1, 1984.

Senate amendment

No comparable provision.

STUDY OF WEATHER-RELATED FACTORS IN APPORTIONMENT FORMULAS

House bill

Requires the Secretary to conduct a study and report to Congress within one year with specific recommendations for changing apportionment formulas to take into account weather-related factors.

Senate amendment

No comparable provision.

REPORT REGARDING LONGER COMBINATION COMMERCIAL MOTOR VEHICLES

House bill

Requires the Secretary to make a report to the Congress on the potential benefits and costs associated with the establishment of a national intercity truck route network for the operation of longer combination vehicles.

Provides that the Secretary shall make a report within one year after consultation with the States and opportunity for public comment. The report is to consider the potential benefits and costs for such a network for shippers receivers, operators of commercial motor vehicles, and the general public.

"Longer combination commercial motor vehicles" as defined as multiple trailer combinations consisting of (1) truck tractor-semitrailer-full trailer or (2) truck tractor-semitrailer-full trailer-full trailer. The overall length, however, would not exceed 110 feet. "National intercity truck route network" as defined as consisting of a number of controlled access, interconnecting segments of the Interstate System and other highways of comparable design and traffic capacity including, but not limited to, all highways where longer combination vehicles are authorized on the date of enactment of this Act.

The report is to include a specific plan for the establishment of the network including the designation of the specific segments involved and analyses of the freight volume which might be transported in such longer vehicles, the projected fuel savings, anticipated productivity gains, the fuel conservation and productivity gains historically achieved by the use of longer vehicles, and the safety record of longer vehicles. This subsection also requires an analysis of the impacts of the size and weight limitations in effect after enactment of this Act, including the effect on intermodel competition.

The Secretary shall assume, for purposes of the report, that the axle weight limits are as established in section 127 of title 23, United States Code, and the overall gross weight limit would be determined by the bridge formula alone.

The Secretary is required to further assume that reasonable access to terminals, combination breakup areas, and food and fuel facilities will be provided.

The provision makes clear that this section intends only that a study of the issue of longer vehicles be made at this time with final Congressional action to follow.

Senate amendment

The Secretary of Transportation is required to study and report on the potential benefits and costs that may result from the establishment of a National intercity truck route network for the operation of a special class of longer-combination commercial motor vehicles.

CHANGE IN LOCATION OF INTERSTATE SEGMENTS

House bill

The Secretary of Transportation may approve a change in location of an Interstate route if construction of the Interstate route at the new location does not exceed the estimated costs of eligible improvements at the original location, if the original location of such route is open to traffic before the date of enactment of this Act, and if the eligible improvements at the original location involve major modifications in order to meet acceptable standards or result in severe environmental impacts or mitigation measures relating to the environmental impact are not cost effective.

Senate amendment

Essentially the same as the House bill. The Senate amendment does not include a provision in the House bill which would allow an increase or decrease in the cost of construction on the new location based on changes in construction costs.

ACCESS CONTROL DEMONSTRATION PROJECTS

House bill

The deadline for the report on results of access control demonstration projects carried out under section 150 of the Federal-Aid Highway Act of 1978 is extended from September 30, 1983, to September 30, 1985.

Senate amendment

No comparable provision.

REVISION OF PROJECT AGREEMENT

House bill

The Secretary of Transportation and the New Jersey Department of Transportation are directed to revise the agreement for the Federal-aid project 23-D-U-54 (100) in New Jersey to make available financial assistance not to exceed $1,000,000 for relocation of businesses that have suffered monetary losses as a result of such project.

Senate amendment

No comparable provision.

USE OF SUBSTANCES FROM RECYCLED TIRES IN PAVING MATERIALS

House bill

Authorizes the Secretary to make grants to each State which adopts and implements a program that requires utilization of significant volumes of substances or materials produced in substantial part from rubber recovered from recycled tires on projects on Federal-aid highways. The grants may only be used to implement and enforce such programs. There is authorized out of the Highway Trust Fund $5 million for FY 1983 and $25 million for each of FYs 1984 and 1985.

Senate amendment

No comparable provision.

ENFORCEMENT OF HEAVY VEHICLE USE TAX

House bill

Amends section 141 of title 23, United States Code, to provide that no funds for Interstate construction or 4R shall be apportioned to a State for any fiscal year during which heavy vehicles which are subject to the use tax imposed under section 4481 of the Internal Revenue Code of 1954 may be lawfully registered in the State without having presented proof of payment of such tax. Withheld amounts are reapportioned to other States.

Senate amendment

MONITORING OF EFFECT OF DOUBLE BOTTOM TRUCKS

House bill

Provides that the Secretary shall enter into arrangements with the National Academy of Sciences to monitor the effect on Interstate highways of the use of trucks with two trailing units. Another amendment in the bill provides that no State shall prohibit the use of such vehicle combinations. The Academy is to report to the Secretary and Congress within two years.

Senate amendment

No comparable provision.

ADVANCEMENT OF NON-FEDERAL SHARE

House bill

Provides a Federal share up to 100 percent through FY 1983 for a highway project if the Governor of the State submitting the project certifies, in accordance with regulations established by the Secretary, that sufficient State funds are not available to pay the non-Federal share of the project. The total which may be obligated for these projects shall not be greater than the amount of the excess of (1) the sum of the obligational authority distributed to the State for FY 1983 plus any amounts received by the State under the minimum apportionment provision, over (2) the amount of obligational authority distributed to the State for FY 1982.

The State is required to repay the amount of any increases in Federal share received under this provision by the end of FY 1984. The repayments shall be deposited in the Highway Trust Fund and credited to the appropriate apportionment accounts of the State.

If the State does not fully repay by the end of FY 1984, the amount not repaid shall be deducted on a pro rata basis from the States apportionments under section 104(b) of title 23 (other than the apportionment for Interstate construction), 50 percent from FY 1985 apportionments and 50 percent from FY 1986 apportionments.

Senate amendment

Same as the House bill except for technical differences.

LANE RESTRICTIONS

House bill

Prohibits the State of California from restricting the use of certain lanes in Alameda County, California, to high occupancy vehicles.

Senate amendment

No comparable provision.

UPGRADING CERTAIN INTERCHANGES

House bill

This section permits the use of Interstate construction funds for upgrading certain interchanges in the State of California.

Senate amendment

No comparable provision.

CONVICT LABOR

House bill

Section 114(b) of title 23, United States Code, which prohibits the use of convict labor on highway construction projects, is amended to also prohibit the use of materials produced by convict labor.

Senate amendment

No comparable provision.

PREVAILING RATE OF WAGE

House bill

This section amends section 113(a) of title 23, United States Code, relating to the application of the Davis-Bacon Act. The provision currently applies to "initial construction work performed on highway projects on the Federal-aid systems". This amendment deletes the word "initial".

Senate amendment

Same as House bill.

MINIMUM ALLOCATION

House bill

Provides that the Secretary shall allocate sufficient amounts to States to insure that each State's percentage of the total apportionments in each fiscal year of funds for Interstate highway substitute, primary, secondary, Interstate, urban, bridge replacement and rehabilitation, hazard elimination and rail-highway crossings under sections 103(e)(4), 104(b), 144, and 152 of title 23 and section 203 of the Highway Safety Act of 1973 shall not be less than 85 percent of the percentage of estimated tax payments attributable to highway users in that State paid into the Highway Trust Fund, other than the Mass Transit Account, in the latest fiscal year for which data is available.

Amounts so allocated are available for four fiscal years, are subject to the provisions of title 23, and are available for Interstate highway substitute, primary, secondary, Interstate, urban, bridge replacement and rehabilitation, hazard elimination and rail-highway crossings projects. Obligation ceilings shall not apply to these amounts.

$420,000,000 is authorized out of the Highway Trust Fund for fiscal year 1983, and such sums as may be necessary are authorized for fiscal years 1984, 1985, and 1986.

Senate amendment

Same as House bill except that Interstate highway substitute apportionments are not included in the 85 percent computation and the amount authorized for fiscal year 1983 is $526,000,000.

STUDY OF METHANE CONVERSION FOR HIGHWAY FUEL USE

House bill

Provides that the Secretary, using research funds, shall study the potential for recovering methane released in the process of offshore oil drilling and converting it into methanol on floating conversion plants for use as fuel in highway vehicles. The Secretary shall report to Congress the results of the study within one year.

Senate amendment

No comparable provision.

DEMONSTRATION PROJECTS—RAIL-HIGHWAY CROSSINGS

House bill

Extends the authorization for rail-highway crossing demonstration projects at $50 million per fiscal year for fiscal years 1983 through 1986, and adds a provision that any project not under construction by September 30, 1985, shall not be eligible for additional funds.

Senate amendment

No comparable provision.

FEASIBILITY STUDY

House bill

The Secretary of Transportation is directed to study the feasibility, and determine the costs, of designating and constructing a highway in the State of South Carolina connecting I-95 with United States Route 17 in Myrtle Beach, South Carolina, as a part of the Interstate System or primary system. $500,000 is authorized out of the Highway Trust Fund to carry out such study for fiscal year 1983.

HIGHLAND SCENIC HIGHWAY

House bill

No comparable provision.

Senate amendment

Amends section 161(f) of the Federal-Aid Highway Act of 1973 to remove a technical problem presently preventing the State of West Virginia from maintaining the Highland Scenic Highway, located partially within and adjacent to the Monogahela National Forest in the State. It would also allow local light truck traffic and limited commercial truck traffic on a permit basis only.

EMERGENCY RELIEF

House bill

No comparable provision.

Senate amendment

Amends subsection (a) of section 125, title 23, United States Code, to make clear that the term "catastrophic failure" means failures which are sudden, unexpected, and result from external forces, natural catastrophies in narrow or limited areas such as localized hurricane force winds, earthquakes, landslides, and the like. "Catastrophic failure", for purposes of this section, does not mean failure which is the result of structural deficiencies or physical deterioration.

Provides that all expenditures for emergency relief under 23 U.S.C. 125, whether past or future, shall come from the Highway Trust Fund and not from the General Fund of the Treasury.

Deletes the reference to bridges which have been closed to traffic between December 31, 1967 and December 31, 1970.

Authorizes, from the Highway Trust Fund, $100 million per year for emergency relief projects.

Amends 23 U.S.C. 125(b) to provide that expenditures for projects resulting from a single natural disaster or a single catastrophic failure shall not exceed $30 million in a State.

Applies the amendment made by subsection (d) to natural disasters or catastrophic failures which the Secretary finds to be eligible for emergency relief subsequent to the enactment of this section.

Amends 23 United States Code 120(f), which pertains to the Federal share for highway emergency relief projects. Under current law, the Secretary can increase the Federal share to 100 percent. Under this subsection, the Federal share would be limited to 75 percent, except for forest highways, forest development roads and trails, park roads and trails, parkways, public lands highways, public lands development roads and trails and Indian reservation

roads, which would still receive 100 percent Federal funding.

Applies to provisions of 23 United States Code 120(f), as amended by the bill, to all natural disasters or catastrophic failures which the Secretary finds to be eligible for emergency relief subsequent to the enactment of the bill.

DEFENSE ACCESS ROADS

House bill

No comparable provision.

Senate amendment

Amends section 210(c) of title 23, United States Code, to permit funds appropriated for defense maneuvers and exercises to be used for work on highways which have been or may be used for training of the Armed Forces.

CONSTRUCTION

House bill

No comparable provision.

Senate amendment

Section 114 of title 23, United States Code, now requires that the Secretary inspect each highway construction project. This amendment would remove that requirement. The Secretary would establish procedures for inspecting and approving construction but would not have to inspect each project.

RESEARCH AND PLANNING

House bill

No comparable provision.

Senate amendment

Amends 23 U.S.C. 307 to confirm the legal basis for pooling 1½ percent highway planning and research (HPR) funds into a single fund and to establish a uniform period of availability, and a standard Federal matching share. This section also clarifies that the States may use these funds for study, research and training on engineering standards and construction materials, including evaluation and accreditation of inspection and testing.

PROGRAM CONSOLIDATION

House bill

No comparable provision.

Senate amendment

Repeals the Economic Growth Center Development program, National Scenic and Recreational Highway program, Access Highways to Public Recreation Areas on Certain Lakes program, Highway Crossing Federal Projects program, and the Railroad Highway Crossings Demonstration Project.

Provides that any unobligated balance of contract authority or unexpended balance of sums appropriated prior to enactment will remain available for these programs under the conditions applicable prior to such enactment. The unappropriated balance of sums authorized prior to enactment for the National Scenic and Recreational Highway program, Access Highways to Public Recreation Areas on Certain Lakes, and Highways Crossing Other Federal Projects is rescinded.

INTERAGENCY AGREEMENTS

House bill

No comparable provision.

Senate amendment

Adds a new section to title 23, United States Code, under which the Secretary of Transportation would be required to enter into memoranda of understanding with other Federal agencies to coordinate the various environmental compliance reviews that apply to Federal and Federal-aid highway projects. The purpose of such memoranda is to minimize, to the maximum extent practicable, duplication, needless paper work, and delays in approval of projects under title 23, United States Code.

CERTIFICATION ACCEPTANCE

House bill

No comparable provision

Senate Amendment

Amends 23 U.S.C. 117 to provide for (1) the application of certification acceptance to the physical construction phase of Interstate 4R projects; (2) the elimination of the requirement to make a final inspection on every project under both the certification acceptance and secondary road plan programs; and (3) the extension of coverage under the secondary road plan program to: "projects, as defined by the Secretary and which are not on the Interstate System." These changes in no way would relieve the State highway departments from the requirement of entering into formal project agreements with the Secretary pursuant to section 110 of title 23. Certification acceptance would be available to Interstate restoration projects once they reach the construction phase; thus it would apply only to those work areas such as time extensions, construction contract change orders, assessment of liquidated damages, etc., which take place subsequent to the actual construction project being authorized.

HIGHWAY SAFETY IMPROVEMENT PROGRAM

House bill

No comparable provision.

Senate amendment

Establishes a single highway safety improvement program by combining all safety categories—Hazard Elimination, Rail Highway Crossings, Rail Relocation Projects, Safer-Off-System Roads, and highway related safety activities under section 402.

Each State must develop and implement a continuous highway safety improvement program which includes procedures for planning, implementation and evaluation of highway safety improvement projects. As part of this program, each State must have a process for inventorying and analyzing accident, traffic, and highway data, for conducting engineering surveys of hazardous locations, sections, and elements; and for maintaining and implementing a prioritized schedule of projects for the improvement of the hazards identified. Any highway safety improvement project on a public road, except the Interstate, may be funded under this section. The Federal share under this section is 90 percent except for rail-highway crossing projects, in which case the Federal share is that provided in section 120(d) of title 23, United States Code. Any remaining unobligated balance of contract authority for carrying out section 402 with respect to highway-related safety programs will remain available for obligation, and will lapse not later than September 30, 1984. Highway safety funds are apportioned to the States according to a formula based on population and road mileage.

This section also provides that each State shall expend 35 percent of the funds apportioned to it for highway safety improvements for rail grade crossing projects authorized by section 203 of the 1973 Highway Safety Act. This minimum percentage of use of such funds may be waived by the Secretary of Transportation upon application of the State if the Secretary finds that the State has demonstrated that it has other safety projects of a higher priority.

One-half of one percent of the highway safety funds is made available to the Secretary of the Interior of carrying out section 151 safety activities on Indian reservations. The section 151 funds are available as if they were primary funds except where inconsistent with the purposes of this section. In addition, primary system, urban program and rural program funds may be used for all consolidated safety projects.

The States are required to evaluate the results of the highway safety improvement program and to report annually to the Secretary. The Secretary is required to report annually to the Congress. The State's existing safety reports to the Secretary of Transportation under section 203 of the Highway Safety Act of 1973 for rail-highway crossings, the section 151 report on pavement markings and the section 152 report on hazard eliminations are repealed, as the comparable reports are now included under the one consolidated report provided by subsection (a), which contains a new section 151(h) on highway safety improvement program reports.

INNOVATIVE TECHNOLOGIES

House bill

No comparable provision.

Senate amendment

Authorizes an increase in the Federal share when a State uses innovative technologies in constructing a road or in an overlay is placed on an existing roadway. Regardless of which highway category a project is proposed for, the Federal share would be increased by 5 percent when recycled materials or commercially available additives are used in pavements.

RELOCATION OF UTILITY FACILITIES

House bill

No comparable provision.

Senate amendment

Amends the definition of "construction" to make clear that the relocation of utilities for safety purposes is eligible work for Federal reimbursement under title 23 of the United States Code.

Amends 23 U.S.C. 123, Relocation of Utility Facilities, to permit payment for utility relocations on any Federal-aid system or under any Federal-aid program and to provide that the Secretary may waive certain provisions of 23 U.S.C. 123(a) to allow Federal participation in costs incurred by the State in relocating utilities for purposes of eliminating hazards, then he determines that such a waiver facilities the State's safety improvement program.

REPORTS

House bill

No comparable provision.

Senate amendment

Codifies the highway needs report submitted to the Congress every 2 years pursuant to section 3 of Public Law 89-139 and section 17 of the Federal-Aid Highway Act of 1968.

DEFINITION

House bill

No comparable provision.

Senate amendment

Changes the definition of "construction" to permit Federal participation in State highway agency audit costs incurred in performing Federal-aid project related audits which directly benefit the Federal-aid highway program.

DESIGN AND CONSTRUCTION QUALITY ASSURANCE STUDY

House bill

No comparable provision.

Senate amendment

Requests the Secretary of Transportation, the National Bureau of Standards, the American Society for Testing and Materials, and any other appropriate organizations to provide information on training and accreditation needs of testing facilities.

ACCELERATION OF BRIDGE PROJECTS

House bill

No comparable provision.

Senate amendment

Repeals the acceleration of bridge project programs which provides special funding for the U.S. Grant Bridge in Kentucky and the East Huntington Bridge in West Virgina. Funds authorized for this program would remain available for obligation for two years under the same conditions which existed prior to the repeal of this section.

TERRITORIAL HIGHWAY PROGRAM

House bill

Does not contain separate authorizations for the territorial highways, but does include the Virgin Islands, Guam, and American Samoa as one State in the primary system apportionment and provides a minimum of ½ percent of the total apportionment to those territories collectively.

Senate amendment

Repeals section 215 (Territorial Highway Program) of title 23, United States Code.

Provides that outstanding funds authorized or appropriated for carrying out repealed section 215 shall remain available for obligation under the conditions applicable prior to such repeal.

ALASKA HIGHWAY

House bill

No comparable provision.

Senate amendment

Amends section 218(a) of title 23, United States Code, to allow the State of Alaska to use its apportioned Federal-aid highway funds on the continued construction of the portions of the Alaska highway located in Canada.

RESOLUTION ON HIGHWAY TRUST FUND OBLIGATIONS

House bill

No comparable provision.

Senate amendment

States the sense of the Congress that the administrators of the Federal Highway Trust Fund shall act to expedite highway program obligations, to the maximum extent that such can be accelerated under law.

WITHDRAWAL AND DESIGNATION AT CERTAIN ROUTES ON THE INTERSTATE SYSTEM

House bill

No comparable provision.

Senate amendment

Requires the Secretary of Transportation to approve the withdrawal from the Interstate System of a portion of Interstate Routes 95 and 695 in New Jersey. The Secretary is further authorized and directed to designate a portion of the New Jersey and Pennsylvania Turnpikes as part of the Interstate System.

TITLE II—HIGHWAY SAFETY ACT OF 1982

SHORT TITLE

House bill

This section provides that this title may be cited as the "Highway Safety Act of 1982."

Senate amendment

No comparable provision.

HIGHWAY SAFETY AUTHORIZATIONS

House bill

This section provides authorizations for bridge replacement and rehabilitation of $1.5 billion (minus the amount authorized by the Federal-Aid Highway Act of 1982) for FY 1983, $1.6 billion for FY 1984, $1.7 billion for FY 1985, and $2.1 billion for FY 1986. Projects for the elimination of hazards under section 152 of title 23, U.S. Code, are authorized at $200 million annually (reduced in FY 1985 by the amount authorized by the Federal-Aid Highway Act of 1982).

Senate amendment

Provides authorizations for bridge replacement and rehabilitation of $1.7 billion for each of FY 1983 and FY 1984, $1.8 billion for FY 1985, and $2 billion for each of FY 1986 and FY 1987. The hazard elimination program is repealed, but is covered by the new highway safety improvement program.

HIGHWAY SAFETY

House bill

This section provides authorizations for appropriations and limitations on the obligation of highway safety funds. Subsection (a)(1) provides authorizations for appropriations out of the Highway Trust Fund for carrying out the highway safety programs under section 402, title 23, U.S. Code, by the National Highway Traffic Safety Administration in the amount of $100 million per fiscal year for each of fiscal years 1985 and 1986.

Subsection (a)(2) provides that, out of the funds authorized to be appropriated under subsection (a)(1) for each of fiscal years 1985 and 1986, not less than $20 million per fiscal year shall be obligated under section 402 of title 23, U.S. Code, for enforcing the national maximum speed limit established by section 154 of title 23.

Subsection (a)(3) requires that each State shall expend in each fiscal year not less than two percent of the amount apportioned to it for the fiscal year of the sums authorized by subsection (a)(1) for highway safety programs which encourage the use of safety belts by drivers and passengers of motor vehicles.

Subsection (b)(1) provides that, notwithstanding any other provision of law, the total of all obligations for highway safety programs carried out by the National Highway Traffic Safety Administration under section 402 of title 23, U.S. Code, shall not exceed $100,000,000 for each of fiscal years 1983 through 1986. The total of all obligations for the highway safety programs carried out by the Federal Highway Administration under section 402 of title 23, U.S. Code, shall not exceed $10 million per fiscal year for each of fiscal years 1983 through 1986.

Subsection (b)(2) amends section 1107(b) of the Omnibus Budget Reconciliation Act of 1981 to strike obligational amounts which do not conform to those provided by subsection (b)(1).

Subsection (c) amends section 202 of the Highway Safety Act of 1978 to extend: (1) the $31 million authorization per fiscal year for section 403 of title 23, U.S. Code, relating to highway safety research and development through fiscal years 1985 and 1986; (2) the $10 million authorization per fiscal year for carrying out section 402 of title 23, U.S. Code, highway safety programs by the Federal Highway Administration, through fiscal years 1985 and 1986; and (3) the $13 million authorization per fiscal year for carrying out sections 307(a) and 403 of title 23, U.S. Code, relating to highway safety research and development by the Federal Highway Administration through fiscal year 1985 and 1986.

Subsection (d) rescinds $9.6 million of obligational authority for carrying out highway safety programs under section 402 by the Federal Highway Administration.

Senate amendment

Extends the authorization of $13 million per fiscal year for carrying out sections 307(a) and 403 of title 23 by the Federal Highway Administration through FY 1988. Extends the authorization of $100 million per fiscal year for carrying out section 402 of title 23 by the National Highway Traffic Safety Administration through FY 1988. Extends the authorization of $31 million per fiscal year for carrying out section 403 of title 23 by NHTSA through FY 1988.

MAXIMUM SPEED LIMIT

House bill

This section amends section 154(a) of title 23, U.S. Code, to prohibit the Secretary from approving any project under section 106 of the title in any State whose laws do not constitute a substantial deferrent to violations of the national maximum speed limit of its highways.

Senate amendment

No comparable provision.

RAIL-HIGHWAY CROSSINGS

House bill

This section provides annual authorizations of $190 million to carry out projects for the elimination of hazards at rail-highway crossings under section 203 of the Federal-Aid Highway Act of 1973.

Senate amendment

Does not provide a separate authorization for projects under section 203 of the Federal-Aid-Highway Act of 1973, but requires that each State spend 35 percent of its apportionment of funds under the highway safety improvement program for these projects unless the State request a waiver and the Secretary finds that other safety projects are of a higher priority.

PUBLIC INFORMATION

House bill

This section provides contract authority for funds authorized for highway safety and information under section 209 of the Highway Safety Act of 1978.

Senate amendment

No comparable provision.

SAFETY PERFORMANCE REPORTS

House bill

This section requires the Secretary to prepare, publish, and submit to Congress a report on the highway safety performance of each state in the preceding calendar year. This report is to be submitted to Congress not later than December 31 of each year beginning after December 31, 1982. This report is to provide data on highway fatalities and injuries and motor vehicle accidents involving fatalities and injuries and travel in urban areas of each state for each system of

highways and in rural areas of such state for each system of highways.

Senate amendment

No comparable provision.

ANNUAL APPORTIONMENT FORMULA

House bill

This section provides that the Virgin Islands, Guam, and American Samoa shall be treated the same as the States for purposes of the apportionment formula under the section 402 State and Community Highway Safety Program, guaranteeing each a minimum apportionment of one-half of one percent.

Senate amendment

Eliminates the definition of "State" which includes the Virgin Islands, Guam, and American Samoa for purposes of chapter 4 of title 23, United States Code.

MINIMUM DRINKING AGE

House bill

Under this section, the Congress strongly encourages each State to prohibit the sale of alcoholic beverages to persons who are less than 21 years of age.

Senate amendment

No comparable provision.

TITLE III—FEDERAL PUBLIC TRANSPORTATION ACT OF 1982

SHORT TITLE

House bill

This section provides that this title may be cited as the "Federal Public Transportation Act of 1982."

Senate amendment

Same as the House bill.

AUTHORIZATIONS

House bill

This section sets forth a new section 21 of the Urban Mass Transportation Act. Section 21 revises and extends the funding authorizations to carry out the section 3 discretionary capital grant program, the section 4(i) innovative methods and techniques grant program, the section 6 research and development program, the section 8 planning program, the section 10 training grant program, the section 11(a) university research grant program, the section 16(b) program to meet the special needs of the elderly and handicapped, the section 18 formula grant program for other than urbanized areas, the section 20 human resource grant program, and for administrative expenses. Section 21 also provides funding authorizations for a newly created section 9 block grant program.

Section 21(a)(1) creates a unitary authorization for fiscal years 1983 to 1986, inclusive, to carry out the provisions of sections 3, 4(i), 8, 9, 16(b) and 18 of the Urban Mass Transportation Act. These authorizations total $16.1 billion for fiscal years 1983 to 1986, inclusive.

Section 21(a)(2) provides that an amount equal to 25 percent of the amount authorized to be appropriated pursuant to section 21(a)(1) shall be available from the transit account of the Highway Trust Fund to fund programs under sections 3, 4(i), 8 and 16(b) of the Urban Mass Transportation Act.

Sums provided from the transit account of the Highway Trust Fund would be expended on the basis of contract authority. The remaining 75 percent of the unitary authorization is subject to the regular appropriations process and is to be apportioned by formula as provided in new sections 21(a)(3) and 9(a).

Section 21(a)(3) stipulates that, of the amounts appropriated out of the general fund under section 21(a) for each fiscal year, 2.93 percent shall be available for the section 18 formula grant program for other than urbanized areas.

Section 21(b) sets forth authorizations of $90,000,000 for highways for the various research and development programs authorized under sections 6, 10, 11(a) and 20 of the Urban Mass Transportation Act and for administrative expenses. Funds appropriated pursuant to section 21(b) for the section 6 research and development program shall remain available until expended. All other funds appropriated pursuant to section 21(b) shall remain available during the fiscal year for which appropriated.

This section 302(a) also repeals the existing sections 21 and 22 of the Urban Mass Transportation Act. Section 21 currently authorizes grants for the terminal development program. The existing section 22 authorizes grants for intercity bus service.

Senate amendment

A three year comprehensive authorization for the mass transit program is established at $3.13 billion per year for fiscal year 1983, 1984, 1985 which includes funding for all programs except interstate transfer. From the funds appropriated under this authorization up to seventy-five million dollars is authorized for appropriations for research, development, and administrative expenses. From the remainder of the total amount appropriated:

(a) 24 percent of the funds must be made available for discretionary grants under Section 3 (until 1985 when it shall be 10 percent).

(b) 67.25 percent of the funds must be made available for formula grants for urbanized areas with populations greater than 200,000 (until 1985 when it shall be 79.63 percent).

(c) 6.5 percent of the funds must be made available for formula grants for urbanized areas with populations of less than 200,000 but greater than 50,000 (until 1985 when it shall be 7.7 percent).

(d) 2.25 percent of the funds must be made available for grants to urbanized areas of less than 50,000 in population (until 1985 when it shall be 2.67 percent).

Fifty million dollars will be available for planning grants made under the authority of Section 8. These grants will be funded from the funds available for Section 3. Furthermore, urbanized areas are allowed to decide to use block grant funds for additional planning activities.

An overall authorization of $3.495 billion will cap total appropriations for all transit programs including all titles of this Act, the Interstate Transfer program, and the so-called Stark-Harris funding for the Washington, D.C. Metro System.

BLOCK GRANTS

House bill

This section creates a block grant program for projects in urbanized areas. Recipients of these funds would be provided funds through an annual grant agreement instead of through project-by-project grants.

The program created by this section would be authorized in section 9 of the Urban Mass Transportation Act. Section 9(a) stipulates that 88.34 percent of the amounts appropriated pursuant to the section 21(a)(1) unitary authorization from the general fund of the Treasury shall be available to urbanized areas with populations of 200,000 or more and that 8.73 percent shall be available to urbanized areas with populations of less than 200,000.

As provided in section 9(b)(1), the block grant assistance for urbanized areas with populations less than 200,000 would be delivered half on the basis of the ratio which the population of each such urbanized area bears to the total population of all such urbanized areas and half on the basis of a ratio for each such urbanized area determined by population weighted by a factor of density. The latest available periodic Federal census would be used as the source for these calculations.

Section 9(b)(2) sets forth a series of factors upon which the 8.34 percent authorized for urbanized areas with populations of 200,000 or more would be delivered.

50.64 percent of the funds appropriated pursuant to the unitary authorization and from the general fund of the Treasury shall be made available to the larger urbanized areas on the basis of one-fourth population, one-fourth population weighted by a factor of density, one-half bus revenue vehicle mile formula.

28.6 percent of the funds appropriated pursuant to the unitary authorization and from the general fund of the Treasury shall be made available to the larger urbanized areas, 70 percent on the basis of fixed guideway revenue vehicle miles and 30 percent on the basis of fixed guideway route miles.

6.5 percent of the funds appropriated pursuant to the unitary authorization and from the general fund of the Treasury shall be made available to the larger urbanized areas on the basis of an incentive formula based on the operating efficiency of the bus systems in larger urbanized areas.

The remaining 2.6 percent appropriated pursuant to the unitary authorization and from the general fund of the Treasury shall be made available to the larger urbanized areas on the basis of an incentive formula based on the operating efficiency of the rail systems in larger urbanized areas.

The concept of vehicles directly serving a large urbanized area has been clarified so that service outside of an urbanized area which brings passengers into the urbanized area and is not otherwise included in the formula apportionment would be included in that urbanized area's apportionment.

Section 9(c) provides that the governor shall receive and distributes fairly and equitably block grant funds for urbanized areas of less than 200,000. It also provides for the selection of designated recipients to receive and dispense funds for urbanized areas of 200,000 or more.

Section 9(d) sets forth a maximum 80 percent Federal share for capital projects and a maximum 50 percent Federal share of operating deficits for the payment of operating expenses. However, the Federal share for capital projects may increase to as much as 95 percent under the provisions of an incentive mechanism provided in section 9(h).

Section 9(e)(1) requires block grant recipients to comply with the section 3(e) private enterprise participation provision, the section 3(f) charter bus provision, the section 3(g) school bus provision, section 8 planning provisions, section 13 labor protection and standards provisions, the section 16 provisions to meet special needs of the elderly and the handicapped, and section 19 nondiscrimination provisions of the Urban Mass Transportation Act.

Section 9(e)(1) also applies the definitions set forth in section 12(c) of the Urban Mass Transportation Act to all section 9 block grants and authorizes the Secretary to

make advance or progress payments on account of any grant or contract made pursuant to section 9. Furthermore, section 9(e)(1) would ensure that no requirements under the Urban Mass Transportation Act, except for those requirements expressly specified in section 9, would be applicable to the section 9 program. Cross-cutting Federal requirements, such as title VI of the Civil Rights Act of 1964, the Uniform Relocation Assistance and Land Acquisition Policies Act of 1970, the National Flood Insurance Act of 1968, and the National Environmental Policy Act of 1969, would not be changed by the section 9 program.

In addition to the section 9(e)(1) requirements and as a precondition to receiving section 9 assistance, each block grant recipient must, in compliance with section 9(e)(2), certify annually: (A) legal, financial, and technical capacity to carry out the proposed program; (B) continuing control over the use of facilities and equipment and maintenance of those facilities and equipment in operational order; (C) a competitive procurement process; (D) compliance with the Buy America provision of the Surface Transportation Act of 1978; (e) compliance with specific public hearing requirements; (F) compliance with the half-fare requirements for elderly and handicapped persons in accordance with section 5(m) of the Urban Mass Transportation Act; and (G) inclusion of medicare cardholder among the persons protected by the section 5(m) half-fare requirements.

Section 9(f) stipulates that the Secretary must accept a recipient's section 9(a)(2) certification before he can award a section 9 grant to that recipient. Section (9(f) also permits the Secretary to rescind his acceptance of a section 9(e)(2) certification if he finds it necessary to do so.

Section 9(g)(1) extends the reporting requirements of section 15 of the Urban Mass Transportation Act to the recipients of grants under section 9. Section 15 currently requires recipients of section 5 urban formula grants to provide UMTA with certain public mass transportation financial and operating information using a uniform system.

Section 9(g)(2) sets forth the audit requirements for block grant recipients. The provision would require each recipient to submit to the Secretary an annual, independently conducted audit. This audit would indicate to the Secretary whether the recipient has carried out and can continue to carry out its activities in a timely manner and in compliance with the grant agreement and the applicable provisions of the Urban Mass Transportation Act, including the requirement to maintain facilities and equipment purchased with Federal funds. Section 9(g)(2) authorizes the Secretary to make adjustments in existing or future section 9 grants if he determines on the basis of the audit that such an adjustment is justified.

Section 9(h)(1) stipulates that section 9 grant recipients may use those grants to meet either capital or operating expenses. However, section 9(h)(2)A) limits the amounts of section 9 funds that a recipient may use as operating assistance the lesser of either the amount of funds apportioned to it under the first three tiers of section 5 of the Urban Mass Transportation Act for operating assistance in fiscal year 1982 or the amount allocated from those tiers for operating assistance in fiscal year 1982. Furthermore, any recipient located in an urbanized area which was an urbanized area based upon 1970 census data and which had total maintenance expenditures in fiscal year 1982 of more than twice its section 5 operating assistance apportionment or allocation from fiscal year 1982, is required by section 9(h)(2)(A) to expend that portion of its section 9 apportionment or allocation which it expends for other than capital purposes on maintenance expenses. If maintenance expenditures for the recipient in such urbanized areas were less than twice its section 5 operating assistance apportionment or allocation, any such recipient who elects to expend funds for other than construction purposes is required by section 9(h)(2)(A) to expend such funds only for maintenance until the expenditures equal an amount equal to at least half of the total expenditure by such recipient for maintenance in fiscal year 1982. Any recipient in an urbanized area which became an urbanized area based upon the 1980 census is required to give priority to its maintenance expenses.

Section 9(h)(2)(B) creates an incentive mechanism to encourage recipients to use section 9 operating funds for capital expenses. This provision raises the Federal share for any construction project or parts thereof paid for with funds available for operating and maintenance assistance from the 80 percent share specified in section 9(d) to 95 percent of the cost of the project or part thereof. In addition, if in any given fiscal year, a recipient uses all of its operating and maintenance funds on construction projects, the Federal share paid for with section 9 funds available for capital only or with section 3 funds shall be raised from the 80 percent share specified in section 9(d) to 90 percent. Finally, if in any given fiscal year, a recipient uses more than half but less than all of the funds available for operating and maintenance assistance on construction projects, the Federal share paid for with section 9 funds available for capital only or with section 3 funds shall be raised to 85 percent.

Section 9(i) provides that section 9 funds will be available to the urbanized areas for a period of four years.

The House bill amends section 3(a)(1)B) of the Urban Mass Transportation Act to ensure that routine bus and bus-related needs are met out of the section 9 block grant.

A technical amendment is made to section 4(a) of the Urban Mass Transportation Act to conform with the section 9(h)(B) incentive mechanism.

The House bill amends the section 3 discretionary capital grant program to require that recipients of capital grants have the technical and financial capability to maintain facilities and equipment that are purchased with Federal funds.

The House bill provides that no urbanized area shall receive less in FY 1983 under the new section 9 than it received under section 5 for FY 1982 and authorized $2 million for each of fiscal years 1983 through 1986 to carry out this section.

A final provision requires the Secretary to apportion the full amount of funds authorized for operating assistance for FY 1983 within 30 days of enactment.

Senate amendment

The legislation authorizes a new block grant program to replace the formula grants now made under section 5 of the Urban Mass Transportation of 1964. The new section 9 of the Urban Mass Transportation of 1964 provides funds to urbanized areas to finance the planning, acquisition, construction, improvement, and operating costs of facilities, equipment, and associated maintenance activities in mass transportation services. The inclusion of associated maintenance activities is the only change in eligible expenses from the current section 5 program. For purposes of this section, associated maintenance activities means equipment and materials each of which costs at least one percent of the fair market value of the bus or rail car for which the equipment is to be used.

Grants made to urbanized areas of greater than 200,000 population under section 9 will be made on the basis of a formula that divides 68 percent of the available funds on the basis of each area's total bus revenue miles, each area's population, and each area's population weighed by a factor of density. The bus revenue mile factor will be used to distribute 50 percent of the funds. The population factor and the density factor will each be used to distribute 25 percent of the funds. Of this 68 percent distributed by bus related factors, three fourths of the funds are for urbanized areas over 1 million population and one fourth is reserved for areas of less than 1 million population.

The remaining 32 percent of the available funds will be distributed to areas that operate fixed guideway rail service. The funds will be distributed on the basis of 60 percent of a an area's fixed guideway vehicle miles and 40 percent of an area's fixed guideway route miles. Each urbanized area with at least 750,000 population which provides commuter rail service is guranteed at least 0.75 percent of the rail funds. Service and route miles provided in a state adjacent to the state or state in which the urbanized area is located and passengers served shall be attributed to the public body which contracts for the service as if the public body was an urbanized area of 200,000 or more. In addition ferry boat operations are included in fixed guideway vehicle miles and route miles.

For urbanized areas of less than 200,000 population that receive a section 9 grant, the formula will distribute funds on the basis of population and population weighted by density. Each factor will count equally.

The federal share of the cost of any project furded under section 9 is limited to 80% of the cost of the project for capital projects. The federal share of operating costs is limited to 50% of the cost.

With regard to operating subsidies, an area may in general not spend more than 80% of its 1982 operating apportionment if it has a population of more than 1 million, 90% of its 1982 operating apportionment if it has a population of more than 200,000 but less than 1 million, 95% of its 1982 operating apportionment if it has a population of less than 200,000. Where an area first became eligible for an apportionment in 1980, that area cannot use more than 40% of its apportionment for operating costs.

An area may however, transfer funds for operating expenses up to its 1982 operating apportionment if the area:

(a) certifies that it has provided public notice of its intent to use additional operating funds and that it will lose some funds as described in (c) below.

(b) certifies that it has a three year plan which demonstrates how the area will operate its transit system without transferring capital funds in fiscal year 1986.

(c) agrees to forfeit one dollar for every two dollars transferred to operating expense use. (These forfeited amounts are used for discretionary grants made by the Secretary.)

The Secretary of Transportation is prohibited from permitting an area to use the transfer option after September 30, 1984.

Funds available for discretionary grants due to a forfeiture under the transfer option shall be made available on a priority basis to areas that did not receive as large a block grant under section 9 as was received under section 5 in 1982. Discretionary grants will be available to recipients under the same local matching share requirements for section 3 grants.

Sums apportioned under section 9 for areas of less than 200,000 in population are made available to the Governor for expenditure in accordance with the planning process required under section 8.

Funds made available to the Governor may be transferred to areas eligible under section 18 of the Act or to areas with populations of less than 300,000 in population. The Governor may make such transfers only after consulting with local officials.

Funds apportioned under this section shall remain available for three years. Funds which remain unobligated at the end of that period will be reapportioned the following year.

To receive a grant under section 9 a recipient must comply with title VI of the Civil Rights Act, subsections (e), (f), and (g) of section 3 of this Act, as well as sections 8, 13, 16, and 19 of this Act. The recipient must also submit a statement of activities to be funded and the certifications required by the Act.

The recipient must certify that it has the legal, financial and technical capacity to carry out the proposed projects; has the authority to apply for the grant; will conform to the Uniform Relocation Assistance and Land Acquisition Policies Act of 1970 and section 7 of this Act; will have continuing control over the equipment purchased and will maintain the facilities and equipment; will use competitive procurement procedures complying with section 401 of PL 95-599; will comply with National Flood Insurance Act of 1968; has complied with section 12; will meet the local match requirements of section 4; and that it has a locally developed process for soliciting and considering public comment prior to raising fares or reducing services.

Each recipient must solicit public comment by making public the amount of funds available, the activities the recipient proposes to undertake with such funds, and publish a proposed statement in a manner which will provide citizens and elected officials an opportunity to comment on the proposed program. The program must be developed in consultation with all interested parties including private transportation providers. Recipients will also hold at least one public hearing to receive comment on the proposed program.

The Secretary may issue regulations which permit recipients to assume the responsibilities of compliance with the National Environmental Policy Act. However, these regulations must be developed in consultation with the Council on Environmental Quality. To release funds under this section, the recipient must submit the environmental certification 15 days in advance and the Secretary must accept the certification. The environmental certification by the recipient must be in a form acceptable to the Secretary, be executed by the chief executive officer, specify that the recipient has carried out its responsibilities, and that the certifying officer consents to assume the status of a responsible federal official under NEPA and he consent to accept the jurisdiction of federal courts for the purposes of enforcement of his responsibiities as such an official.

The Secretary shall not approve a grant unless he finds that the project is part of an approved program of projects required by the section 8 planning process.

The Secretary shall enter into an annual projects agreement with the Governor or the designated recipient of each urbanized area as soon as practicable after the application is submitted.

Each recipient shall submit to the Secretary an annual report concerning the use of the funds and how such use compares to the statement submitted in the original application. The Secretary shall require annual independent reviews and audits as deemed appropriate by the Secretary.

The Secretary shall determine whether the recipients' activities have been carried out in a timely and effective manner and that the recipient has a continuing capacity to carry out those activities. The Secretary shall also determine whether the recipient has carried out its activities and certifications in accordance with this Act and applicable laws.

Not less than every three years the Secretary shall preform a full review and evaluation of the performance of the recipient in carrying out its program. The Secretary shall determine if the local recipient's program has been in compliance with statutory and administrative requirements and the extent to which the actual program was consistent with the proposed statement and the section 8 planning process.

The Secretary may make adjustments in annual grants on the basis of his findings and may reduce or withdraw such assistance or take other appropriate action in accordance with the required reviews and audits.

Section 1001 of title 18 of the United States Code applies to any submission under this section. If any false or fraudulent statements are made in connection with a submission, the Secretary may terminate and seek reimbursement of the affected grant or grants.

A recipient may request the Secretary to approve its procurement system. If the Secretary approves the local procurement system as consistent with the Act, the Secretary shall approve the use of that system for all procurements financed under this Act.

In making discretionary grants, the Secretary is required to take into account the adverse effects of decreased commuter rail service resulting from railroad bankruptcy.

The current section 15 of UMTA reporting requirements are amended to also include grants under the new section 9.

Sections 21 and 22 of the Act are repealed.

LETTER OF INTENT

House bill

This section requires the Secretary to notify, in writing, the House Committee on Public Works and Transportation and the Senate Committee on Banking, Housing, and Urban Affairs at least thirty days prior to the issuance of a letter of intent to obligate future Appropriation Act funds for a project. Section 304(b) is a technical amendment to conform with the change in the funding source for the section 3 discretionary capital grant program.

Senate amendment

A requirement is added that the Secretary must inform the Committee on Public Works and Transportation of the House of Representatives and the Committee on Banking, Housing and Urban Affairs of the Senate 30 days prior to the issuance a letter of intent.

The Secretary shall give priority to grant requests to fund programs included in letters of intent or full funding contracts issued prior to the enactment of this Act. Terms and conditions of such letters of intent and full funding contracts may not be altered unless agreed to by all parties. The Secretary is also prohibited from taking any direct or indirect action regarding future available budget authority except by the letter of intent procedure in the statute. This prevents for example any further use of so-called letters of commitment.

RESEARCH AND TRAINING GRANT

House bill

Extends the funding authorizations to carry out the section 11(b) university operating grants. The House bill authorizes $10 million in each fiscal year from 1983 to 1986, inclusive.

Removes a restriction in the existing Urban Mass Transportation Act that required the 50 percent local match for university operating projects to come from State funds. This amendment permits the local share to consist of any non-Federal funds.

Senate amendment

Strikes out section 4(d) the Urban Mass Transportation Act of 1964 which authorizes funding for university operating grants.

PROCUREMENT FACTORS

House bill

Amends section 12(b)(2) of the Urban Mass Transportation Act to permit contracts for the purchase of rolling stock to be awarded based on a competitive procurement process insted of performance, standardization, life-cycle costs, and other factors as is presently permitted by section 12(b)(2). The Secretary is required to report to Congress within a year on revisions required to ensure fair and competitive procurement procedures.

Senate amendment

No comparable provision.

DEFINITION OF FIXED GUIDEWAY

House bill

Revises the definition of "fixed guideway" in section 12(c)(2) of the Urban Mass Transportation Act of 1964 to clarify that rails that are used exclusively by transit vehicles operating in mixed traffic and electric catenary systems for trolley buses are to be included in the section 9(a)(2) formula apportionments.

Senate amendment

The definition of fixed guideway systems is amended to include public transportation facilities which utilize a right-of-way rail usable by other forms of transportation and the definition of construction is expanded to include bus rehabilitation projects which extend the economic life of a bus 5 years or more.

Conference substitute

Uses House definition of fixed guideway and Senate definition of construction.

ADVERTISING FOR BIDS

House bill

Repeals the current bus seat specification provision in section 12 of the Urban Mass Transportation Act.

Senate amendment

No comparable provision.

PERFORMANCE REPORTS

House bill

Requires the Secretary to report to Congress every two years on the ability of the nation's transit systems to provide transportation and on the general condition of these transit systems.

Senate amendment

No comparable provision.

Conference substitute

CONSTRUCTION CONDITION

House bill

Provides that any new grants or grant amendments to the Metropolitan Atlanta Rapid Transit Authority (MARTA) must meet a legislative requirement that the north and south lines of the MARTA system will be constructed in equivalent segment lengths that are open to operations at approximately the same time. This section shall apply until priorities different from those set forth in the provision are adopted after September 30, 1983, by a valid act of the Georgia General Assembly and by a valid resolution of the Board of the Metropolitan Atlanta Rapid Transit Authority.

Senate amendment

No comparable provision.

Conference substitute

LOAN REPAYMENT

House bill

Would excuse the Massachusetts Bay Transportation Authority from repaying the Federal Government for 80 percent of the balance of transit funds that were borrowed to acquire certain rights-of-way.

The Secretary may convert the remaining 20 percent of the loans to a grant. The Secretary would have the further discretion to waive the local share requirement for this grant if the Authority agreed to complete transit projects worth a certain amount without using Federal funds. These State or local funds would have to be used for section 3 capital projects on a schedule acceptable to the Secretary.

Senate amendment

No comparable provision.

Conference substitute

ADVANCE ACQUISITION OF RIGHTS-OF-WAY

House bill

This section amends section 3 of the Urban Mass Transportation Act to authorize financial assistance for the acquisition of rights-of-way, and relocation, for fixed guideway corridor development for projects in advanced stages of detailed alternatives analysis or preliminary engineering.

Senate amendment

No comparable provision.

Conference substitute

FEASIBILITY STUDY

House bill

Authorizes the Secretary to make a grant to the Massachusetts Bay Transportation Authority for a feasibility study of the possibility of replacing any or all of the three electric trolley bus lines in Cambridge, Massachusetts, with the electric bus technology being developed in Santa Barbara, California. $500,000 is authorized from the amount made available by section 21(a)(2) of the Urban Mass Transportation Act for this study.

Senate amendment

No comparable provision.

Conference substitute

STUDY OF LONG-TERM LEVERAGE FINANCING

House bill

Provides that the Secretary shall study leverage financing mechanisms under which the United States would assure a flow of Federal funds under long-term contracts with local or State transit authorities for use in raising further capital assistance from State or local government or private sector sources.

Senate amendment

No comparable provision.

Conference substitute

CHANGES TO SECTION 3 CAPITAL GRANT PROGRAM

House bill

No comparable provision.

Senate amendment

Section 4(a) of the Urban Mass Transportation Act of 1964 is amended to require a 40 percent local match for new fixed guideway projects or for extensions to an existing system funded with discretionary grant. Other discretionary projects funded by section 3 will require a 30 percent local match. These higher local matching requirements will allow the more limited Federal discretionary funds to support those projects which have high local priority. However, these changes will not affect previous commitments made prior to this Act including those to the Washington, D.C. system.

URBAN MASS TRANSIT PROGRAM

House bill

No comparable provision.

Senate amendment

The bill clarifies that apportionments made pursuant to section 5 for fiscal year 1975 shall be deemed to have lapsed on September 30, 1977 and apportionments for fiscal year 1976 shall be deemed to have lapsed on September 30, 1978. This clarification will avoid any confusion created by the transition quarter. Moreover, sums apportioned pursuant to section 5 shall remain available as initially apportioned to the urbanized areas for expenditure in accordance with the provisions of this section until September 30, 1985.

AMENDMENTS TO FORMULA GRANTS FOR NONURBANIZED AREAS

House bill

No comparable provision.

Section 18 of UMTA is amended to conform with the balance of the bill with lapsed funds remaining unobligated after September 30, 1982 reallocated under the requirements of this Act.

SPECIAL NEEDS OF THE ELDERLY AND HANDICAPPED

House bill

No comparable provision.

Senate amendment

The authorization for planning and designing of mass transportation facilities to meet the special needs of the elderly and the handicapped is increased from 2 percent to 3.5 percent of the funds available for discretionary grants under section 3.

Conference substitute

WATERBORNE TRANSPORTATION DEMONSTRATION PROJECT

House bill

No comparable provision.

Senate amendment

The authorization for Waterborne Transportation Demonstration Act is de-authorized as of September 30, 1982.

Conference substitute

TRANSIT CAPITAL INFRASTRUCTURE PROGRAM

House bill

No comparable provision.

Senate amendment

A new capital infrastructure program is authorized to be financed by revenues allocated to transit by an additional tax on gasoline. Authorized at a level of $550 million for 1983 and $1.1 billion for 1984 and 1985, the program is a discretionary fund administered by the Secretary of Transportation within the requirements of the section 3 program.

In addition to the requirements of section 3, grants under this program will be limited to: The acquisition, rehabilitation, and replacement of rolling stock, the construction, rehabilitation, and modernization of commuter rail and fixed guideway systems, the construction, rehabilitation, modernization, and replacement of bus facilities and related equipment, and other projects.

Although this program is primarily a transit program, if a state will not receive at least .5 percent of the funds available under this title, the Secretary is authorized to make grants for highway projects eligible under Title 23 of the United States Code in that state, including the acquisition of railroad rights of way. The Secretary shall not approve grants for highway projects in a state to the extent that grants used for such projects and for transit related projects in such state would exceed one half of one percent of the funds available under this section.

The new infrastructure program will expire on September 30, 1984. After that date the proceeds of the gas tax will be used to fund section 3 of the UMTA Act.

Conference substitute

TITLE IV.—BUY AMERICA

House bill

The House bill provides that the Secretary shall not obligate funds authorized by this Act or any Act amended by this Act or funds authorized to carry out this Act, title 23, the Urban Mass Transportation Act of 1964, or the Surface Transportation Assistance Act of 1978, and administered by DOT unless steel, cement, and manufactured products used in the project are produced in the United States. This provision shall not apply where the Secretary determines that the products are not produced in the United States in sufficient and reasonably available quantities and of a satisfactory quality.

Another exception to the provision is made for the procurement of buses, other rolling stock, and certain support equipment, in which the manufactured products may be of foreign origin to the extent of 50 percent of the cost of all components. Final assembly of the vehicles must take place in the United States.

In calculating component costs, labor costs involved in final assembly shall not be included.

The Secretary shall not impose limitations or conditions on assistance under any of the Acts cited above, which restricts any State from imposing more stringent requirements than are imposed by this section or restricts any recipient from complying with such State requirements.

COMMERCIAL MOTOR VEHICLE SAFETY DEFINITIONS

House bill

No comparable provision.

Senate amendment

This section defines certain terms used in Title IV (except where the context otherwise requires).

One of the definitions is "commerce". At present, the Secretary of Transportation is empowered to regulate commercial motor vehicle safety primarily with regard to vehicles that cross State lines or national boundaries or perform the intrastate portion of a continuous interstate movement. This class of vehicles is operated primarily by the approximately 17,000 carriers who must obtain operating authority from the Interstate Commerce Commission (ICC) plus the approximately 140,000 private and exempt interstate carriers. This definition would authorize the Secretary to promulgate regulations regarding the safety of commercial motor vehicle operations both in and affecting interstate and foreign commerce.

The definition of "commercial motor vehicle" includes vehicles used on the highways in commerce which are (1) 10,000 pounds gross vehicle weight rating or more or (2) designed to transport more than 10 passengers, including the driver, or (3) used in the transportation of hazardous materials (found to be hazardous by the Secretary for purposes of the Hazardous Materials Transportation Act (49 U.S.C. 1801 et seq.). All vehicles designed to transport 10 or more persons would also be covered to assure the highest levels of safety in this particularly important transportation area. Also vehicles transporting hazardous materials would be covered because of the potentially greater safety dangers in this area.

The definition of "employee includes any individual other than an employer who is employed by a commercial motor carrier and directly affects commercial motor vehicle safety, such as (a) a driver of a commercial motor vehicle (including for purposes of this title any independent contractor while in the course of personally operating a commercial motor vehicle); (b) a mechanic; or (c) a freight handler.

An employer is defined as any person engaged in a business affecting commerce who owns or leases a commercial motor vehicle in connection with that business, or assigns employees to operate it in commerce.

The definition of employee includes mechanics and freight handlers who are employed by a commercial motor carrier and in the course of their employment directly affect commercial motor vehicle safety. For example, in loading a truck it is important for highway safety that the load be balanced.

An independent owner-operator who has the primary responsibility for the maintenance and operation of his commercial motor vehicle or vehicles be an employer and be subject to the penalty provisions for employers.

This section also defines the terms "person", "Secretary", and "State".

DUTIES

House bill

No comparable provision.

Senate amendment

This section requires each employee and employer to comply with the safety and health rules, regulations, standards, and orders issued pursuant to this title.

REGULATORY AUTHORITY AND STANDARDS

House bill

No comparable provision.

Senate amendment

The Senate amendment requires the Secretary of Transportation to establish and revise rules, regulations, standards, and orders as may be necessary to further the purpose of this title and to provide that they shall be directed to assuring that (1) commercial motor vehicles are safely maintained, equipped, loaded, and operated; (2) the responsibilities imposed on a driver do not impair his ability to operate the vehicle safely; (3) the physical condition of drivers is adequate to enable them to drive safely; and (4) the operation of commercial motor vehicles does not create deleterious effects on the physical condition of such drivers.

The Secretary is required to consider, where practicable, costs and benefits of such rules, regulations, standards, and orders.

The Senate amendment requires the Secretary of Transportation to promulgate rules or regulations within 1 year after commencing a proceeding. If this is not possible, the Secretary is required to keep the Congress informed of the reasons for the delay and the efforts and progress being made to complete the proceeding.

The Senate amendment also requires that all rules, regulations, standards, and orders issued under this section be promulgated in accordance with section 553 of title 5, United States Code (without regard to sections 556 and 557 of that title), except that the time periods specified in the preceding paragraph apply to such promulgation.

The Senate amendment allows the Secretary to waive the application of any rule, regulation, standard, or order if such waiver is in the public interest and is consistent with the safe operation of commercial motor vehicles. This provision should be used with extreme care and this waiver provision should only be used if the Secretary has developed sufficient information to provide adequate assurance that such waiver will not adversely affect the safe operation of commercial motor vehicles. It should not be enough to exempt a group merely because it is a small part of the commercial motor vehicle industry.

The Senate amendment directs the Secretary of Transportation and Director of the National Institute for Occupational Safety and Health (NIOSH), in consultation with the Secretary of Labor, to conduct a study of health hazards to which employees engaged in the operation of commercial motor vehicles are exposed and to develop recommendations regarding the most appropriate method for regulating and protecting the health of operators of commercial motor vehicles. This section authorizes an appropriation of $1.5 million out of the Highway Trust Fund for fiscal 1984 to conduct this study.

The Senate amendment requires the Secretary of Transportation, the Director of the National Institute for Occupational Safety and Health, and the Secretary of Labor to coordinate their activities to ensure adequate protection of the safety and health of operators of commercial motor vehicles.

DUTIES

House bill

No comparable provision.

Senate amendment

This section requires each employee and employer to comply with the safety and health rules, regulations, standards, and orders issued pursuant to this title.

Conference substitute

The Senate amendment does not provide additional or new regulatory authority to the Secretary of Labor or the Director of the National Institute for Occupational Safety and Health. The DOT Secretary is mandated under this act the authority to assure the protection of safety and health of operators while operating commercial motor vehicles. This section requires the Secretaries and the Director to make every attempt to avoid overlap or duplication of activities and to coordinate their efforts. The Committee intends, in the exercise of its regular oversight authority, to follow further developments in this area of concern.

GENERAL POWERS

House bill

No comparable provision.

Senate amendment

This section provides the Secretary of Transportation with broad administrative powers to assist in the implementation of this title. This section includes provision for the Secretary to delegate enforcement functions, as he determines appropriate, under this title to a State with a plan approved under this title.

INSPECTIONS AND WARRANTS

House bill

No comparable provision.

Senate amendment

The Senate amendment authorizes the conditions under which the Secretary of Transportation can carry out inspections or searches. Employers and employees and their duly designated representatives shall be offered a right of accompaniment.

Specifically, the amendment provides that an administrative warrant shall be required for any entry or administrative inspection unless the entry of inspection is: (1) with the consent of the employer, employee, or agent of the employer in charge of the business, establishment, or premises; (2) in situations where there is reasonable cause to believe that the mobility of the motor vehicle makes it impractical to obtain a warrant; (3) in any other exceptional or emergency circumstance where time or opportunity to apply for a warrant is lacking; (4) for access to and examination of books, records, and any other documentary evidence which can be easily altered, manufactured, or falsified; or (5) in any other situations where a warrant is not constitutionally required.

The amendment provides for the issuance and execution of adminstrative inspection warrants. Any judge of the United States or of a State court of record, or any United States magistrate, may within his territorial jurisdiction, and upon proper oath or affirmation showing probable cause, issue warrants to conduct administrative inspections and to impound motor vehicles or their equipment. This section also sets forth in detail the circumstances under which a warrant shall be issued and the contents of the warrant. Details of the execution and return are also set forth in detail.

DUTY TO INVESTIGATE COMPLAINTS, PROTECTION OF COMPLAINANTS

House bill

No comparable provision.

Senate amendment

This section requires the Secretary of Transportation to investigate nonfrivolous written complaints alleging a material violation of the title. The Secretary is also re-

quired to take steps to protect the identity of persons complaining of safety violations.

PENALTIES

House bill

No comparable provision.

Senate amendment

This section sets forth the penalties available to the Secretary of Transportation in enforcing violations of this title. The section provides for both civil and criminal penalties, subsections (b) and (e), injunctive relief, subsection (h), and imminent hazard authority, subsection (d).

Subsection (a) sets out the procedure for the Secretary to follow if he finds that a violation under this title has occurred.

Subsection (b) provides for a civil penalty of up to $500 for a recordkeeping violation. The total of all recordkeeping offenses relating to any single recordkeeping violation shall not exceed $10,000. If the Secretary determines that a substantial health or safety violation exists or has occurred which could reasonably lead to or has resulted in serious personal injury or death, he may assess a civil penalty of up to $10,000 for each offense. However, no civil penalty, except recordkeeping penalties, may be assessed against an employee unless the employee is the operator of a commercial motor vehicle and the Secretary of Transportation determines that the employee's actions constituted gross negligence or reckless disregard for safety, in which case such employee shall be liable for a civil penalty up to $1,000. In assessing civil penalties the Secretary is to take into account the nature, circumstances, extent, and gravity of the violation and the degree of culpability, history of prior offenses, ability to pay, and effect on ability to continue to do business of the violator. The assessment is to be calculated to induce further compliance.

For the purposes of this title only an owner-operator while in the course of personally operating a commercial motor vehicle for a commercial motor carrier is considered an employee for penalty purposes. When the owner-operator is not acting in such capacity, for purposes of this title he shall be treated as an employer. However, the Secretary, in assessing a civil penalty, is directed to take into account, among other criteria, the ability to pay and effect on ability to do business.

Subsection (c) authorizes the Secretary to require a violator to post a copy of a notice of violation or a statement thereof.

Subsection (d) authorizes the Secretary to place a vehicle out of operation or to order an employer to cease all or part of his commercial motor vehicle operations if the Secretary determines that an imminent hazard to safety exists.

Subsection (e) provides for criminal penalties for employers and employees who are operating a commercial motor vehicle who knowingly or willfully violate the act. Penalties for an employer are a fine of up to $25,000 and or imprisonment not to exceed 1 year. An employee is subject to a $2,500 fine.

Subsection (f) requires the Secretary to promulgate regulations establishing penalty schedules designed to induce timely compliance for those failing to comply promptly with the requirements set forth in notices and orders.

Subsection (g) establishes a procedure whereby any aggrieved person who, after a hearing is adversely affected by a final order issued by the Secretary, may petition for review of the order in the U.S. Court of Appeals.

Subsection (h) authorizes the Secretary to obtain enforcement of any penalty or order issued under this section by applying to the United States District Court. In addition, to granting enforcement, the District Court may assess a penalty for noncompliance.

Subsection (i) provides that penalties and fines imposed shall be deposited into the Treasury as miscellaneous receipts.

Subsection (j) provides that subpenas for witnesses who are required to attend a District Court may run into any District.

Subsection (k) provides procedures for proceedings for criminal contempt in accordance with the Federal Rules of Criminal Procedure.

House bill

No comparable provision.

Senate amendment

The section authorizes the General Counsel of the Department of Transportation to appear for and represent the Secretary in all proceedings and in any civil litigation brought under this title, except as otherwise provided.

PROTECTION OF EMPLOYEES

House bill

No comparable provision.

Senate amendment

Subsection (a) prohibits any person from disciplining, discriminating against, or discharging an employee for filing a complaint or exercising a right afforded by this title or other authorities of the Secretary of transportation concerning commercial motor vehicle safety.

Subsection (b) provides for protection of an employee who refuses to operate an unsafe vehicle. In order to qualify for protection under this subsection, the employee must have sought from his employer and have been unable to obtain, correction of the unsafe condition. The employee's refusal to operate the vehicle must be of such nature that a reasonable person, under the circumstances then confronting the employee, would conclude that there is a bona fide danger of an accident, injury or serious impairment of health, resulting from the unsafe condition.

Subsection (c) provides the procedure an employee may follow if the employee believes he has been discriminated against, disciplined or discharged in violation of subsection (a) or (b). An employee may file a complaint, within 180 days after the alleged violation occurs with the Secretary of Labor. The Secretary of Labor is then required to conduct an investigation within 60 days of receipt of a complaint and report his findings and conclusions to the affected parties. If the Secretary of Labor determines that there is reasonable cause to believe that the complaint has merit, he shall notify the complainant and the person alleged to have committed the violation. Thereafter, either the person alleged to have committed the violation or the complainant may, within 30 days file objections to the proposed order and request a hearing on the record. Where a hearing is not timely requested, the Secretary shall issue a final order not subject to judicial review. Where a hearing is requested, it is to be expeditiously conducted with a final order issued within 120 days after conclusion of the hearing. If, in response to a complaint, the Secretary of Labor determines that a violation of subsection (a) or (b) has occurred, he shall order (1) the person who committed such violation to take affirmative action to abate the violation, (2) such person to reinstate the complainant to the complainant's former position, (3) compensatory damages, and (4) where appropriate, exemplary damages. If such an order is issued, the Secretary of Labor may assess against the person against whom the order is issued a sum equal to the aggregate amount of all costs and expenses reasonably incurred by the complainant for, or in connection with, the bringing of the complaint.

Subsection (d) allows any person adversely affected by a subsection (c) order to obtain review of the order in the United States Court of Appeals.

Subsection (e) authorizes the Secretary of Labor to obtain enforcement of its order in the United District Courts.

GRANT TO STATES

House bill

No comparable provision.

Senate amendment

This section authorizes the Secretary to make grants to the States for the development or implementation of programs to enforce commercial motor vehicle safety laws and regulations.

STATE ENFORCEMENT

House bill

No comparable provision.

Senate amendment

Subsection (a) requires the Secretary of Transportation to formulate procedures for a State to submit a plan whereby the State agrees to adopt and assume responsibility for enforcing rules, regulations, standards, and orders in compliance with this title.

Subsection (b) requires the Secretary to make a continuing evaluation of the manner in which each State with an approved plan is carrying out the plan or enforcing the rules, regulations, standards, or orders under this title. A State whose approved plan is withdrawn by the Secretary may seek judicial review.

Subsection (c) provides that no State plan shall be approved which does not provide for funding for commerical motor vehicle safety programs at a level which does not fall below the average level of such expenditures by the State for the last 2 fiscal years preceding the date of enactment of this Act.

STATE REGULATIONS

House bill

No comparable provision.

Senate amendment

Generally, subsection (a) allows a State to adopt additional or more stringent commercial motor vehicle safety rules if the rules do not create a burden on commerce or are not inconsistent with the Federal rules, regulations, standards, or orders issued under this title.

Subsection (b) states that this act shall not affect existing State hours-of-service regulations applying to commercial motor vehicles operations occurring wholly within the State unless the Secretary of Transportation finds upon review of a State's hours-of-service regulations that such State regulation materially diminishes commercial motor vehicle safety or health, is not required by compelling local conditions, or unduly burdens interstate commerce.

FEDERAL SHARE OF COSTS

House bill

No comparable provision.

Senate amendment

This section authorizes the Secretary to reimburse a State for up to 80 percent of

costs incurred by the State in the development and implementation of programs to enforce commercial motor vehicle safety laws and regulations.

AUTHORIZATIONS

House bill

No comparable provision.

Senate amendment

This section authorizes appropriations out of the Highway Trust Fund not to exceed $10 million in fiscal 1984, $20 million in fiscal 1985, $30 million in fiscal 1986, $40 million in fiscal 1987, and $50 million in fiscal 1988 to reimburse to States the Federal pro rata share of costs incurred the grant program and the State enforcement program.

ANNUAL REPORT

House bill

No comparable provision.

Senate amendment

Requires the Secretary of Transportation to annually report to Congress concerning his efforts and plans to upgrade the safety and health of operators of commercial motor vehicles.

APPLICABILITY

House bill

No comparable provision.

Senate amendment

This section exempts from commercial motor vehicle regulation . . . the Senate amendment of the operation of any vehicles engaged in farming activities and logging operations as defined by the Secretary.

COMMERCIAL MOTOR VEHICLE SAFETY ADVISORY COMMITTEE

House bill

No comparable provision.

Senate amendment

This section establishes a Commercial Motor Vehicle Safety Advisory Committee with the Secretary of Transportation and 15 members appointed by the Secretary. The Advisory Committee is to advise, consult with and make recommendations to the Secretary on matters relating to the activities and functions of the Department of Transportation in the field of commercial motor vehicle safety. An appropriation of not to exceed $125,000 for each of fiscal years 1984, 1985, and 1986 is authorized for carrying out this section.

NATIONAL UNIFORM STATE REGULATION

House bill

No comparable provision.

Senate amendment

This section provides that a working group be established to review the various State licensing and State taxing requirements of interstate motor carriers by highway. This working group will recommend standards to the Secretary of Transportation. The Secretary may then initiate a rulemaking action to adopt or otherwise implement these standards. As a minimum such standards are to include: (1) standardized procedures and forms; (2) base State certification; (3) a single State unit for filings, applications, and permits; (4) payment of fees and taxes to the base State; (5) equitable distribution of revenues; (6) a common basis for taxation in each area of requirements; and (7) reasonable limits on fees paid for identification stickers, plates or other indicia.

Subsection (a) establishes a working group.

Subsection (b) defines the responsibilities of the working group. The working group is to develop uniform State procedural standards for vehicle registration, fuel tax, and third structural tax requirements.

Subsection (c) provides for the expenses to be paid to the members of the working group.

Subsection (d) provides that after the working group has completed its work, it must submit recommended standards to the Secretary, Department of Transportation, within 18 months of the date of enactment of this Act.

Subsection (c) provides that the Secretary may initiate rulemaking to implement the recommended standards found acceptable.

Subsection (f) provides that, if the working group fails to act, the Secretary may develop such standards and initiate rulemaking. The Secretary may act in any area or on any subject on which the working group fails to act after 18 months.

This section authorizes Federal preemption of certain State procedures, e.g., the manner in which States collect fuel taxes; administer vehicle registration.

Conference substitute

MINIMUM FINANCIAL RESPONSIBILITY FOR MOTOR CARRIERS

House bill

No comparable provision.

Senate amendment

This section amends the financial responsibility requirements contained in section 30 of the Motor Carrier Act of 1980 for motor carriers of property.

Subsection (a) would remove the limitation on the levels of financial responsibility for motor carriers of property established by the Secretary and allow the Secretary to determine appropriate levels through public rulemaking action.

Subsection (c) would do three things: (1) complement the proposed amendment to section 30(b)(1) and subject motor vehicles transporting certain specified hazardous materials, substances, or wastes in foreign commerce to the financial responsibility provisions of section 30; (2) change the language of subsection (c) to be consistent with the Department's hazardous materials regulations; and (3) remove the limitations on the levels of financial responsibility established by the Secretary, and allow the Secretary to determine future appropriate levels through public rulemaking action.

Subsection (d) would also do three things: (1) complement the proposed amendment to section 30(b)(1) and subject motor vehicles transporting other hazardous materials, substances, or wastes in foreign commerce to the financial responsibility of section 30; (2) remove the limitations on the levels of financial responsibility established by the Secretary and allow the Secretary to determine future appropriate levels required through public rulemaking action; and (3) effectively exempt many more small businesses from the financial responsibility requirements of section 30 without compromising highway safety.

Subsection (e) would also do two things: (1) complement the proposed amendment to section 30(b)(1) and subject motor vehicles transporting any hazardous materials, substances, and wastes in foreign commerce to the financial responsibility provisions of section 30; and (2) remove the limitation on the limits established by the Secretary and allow the Secretary to determine future appropriate levels required through public rulemaking action.

Subsection (f) amends the 10,000 pound GVWR exemption to section 30. It would exclude from the 10,000 pound GVWR exemption those vehicles transporting any quantity of Class A or B explosives, poison gas, or large quantity radioactive materials in interstate foreign commerce.

Conference substitute

ENFORCEMENT

House bill

No comparable provision.

Senate amendment

This provision allows the Secretary of Transportation to seek injunctive relief to require compliance with the provisions of the Act.

SPLASH AND SPRAY SUPPRESSANT DEVICES

House bill

No comparable provision.

Senate amendment

The Secretary of Transportation is required to set standards for the use of splash and spray suppressant devices for tractors, semi-trailers, and trailers.

AIRPORT AND AIRWAY DEVELOPMENT PROGRAM

House bill

No comparable provision.

Senate amendment

This section increases airport development spending $475 million over the next 3 years, 1983–1985. This is accomplished by shifting $112.5 million from both 1986 and 1987 and distributing the funds in 1983, 1984 and 1985. Also an additional $250 million is drawn from the Aviation Trust Fund surplus and is allocated in 1983, 1984 and 1985. The result of this is to increase the authorized level in 1983 by $200 million; 1984 by $200 million and 1985 by $75 million.

The additional funds shall be discretionary funds and they shall be spent for new construction.

The Secretary may, in no event, reduce any other apportionment or entitlement of the Airport and Airway Improvement Act of 1982.

RECREATIONAL BOATING AND REFORESTATION TRUST FUND AMENDMENT

House bill

No comparable provision.

Senate amendment

Subsection (a) amends Public Law 96–451 to provide the Secretary of Transportation authority to contract with the States to implement and administer a national recreational boating safety and facilities improvement program. A contractual obligation of the United States to distribute motorboat gasoline fuel tax revenues to the States is created when the Secretary of Transportation approves specified elements of the State program.

The formula for distribution is unchanged from current law. The current limitation on amounts which may be held in the Trust Fund is removed, so that all motorboat gasoline fuel tax revenues are transferred into the Fund.

Subsection (b) would require the expenditure of funds collected in the Reforestation Trust Fund created by Public Law 96–451. This is accomplished by repealing the current legal prerequisites to expenditure of the funds by the Secretary of Agriculture. In no case may the Secretary spend, in fiscal year 1983, less than the $104,000,000 now held in the Trust Fund. Any funds remaining in the Trust Fund at the end of

fiscal year 1985 are to be distributed to the States for use in State forestry programs.

Conference substitute

AMENDMENT TO SALTONSTALL-KENNEDY BILL

House bill

No comparable provision.

Senate amendment

This section would require that all money in the Saltonstall-Kennedy Fund be used in support of the United States fishing industry. Specifically, up to 40 percent of the Fund could be used to support activities within the National Marine Fisheries Service as long as those activities were related to fisheries development.

At least 60 percent of the Fund would have to go directly for industry grants. Since the Fund is currently collecting approximately $28 million per year, at least $17 million would have to go for grants, and the rest could go to the National Marine Fisheries Service fisheries development programs.

Conference substitute

AMENDMENT TO MERCHANT MARINE ACT, 1936

House bill

No comparable provision.

Senate amendment

This section provides that no ceiling shall be placed on the title XI of the Merchant Marine Act, 1936 loan guarantee program other than a ceiling imposed by authorizing legislation.

Conference substitute

The conference substitute adopts many of the provisions of the House bill and Senate amendment. Other provisions included in the conference substitute are compromises of provisions of the House bill and Senate amendment.

I. HIGHWAY-RELATED REVENUE PROVISIONS

A. MOTOR FUELS TAXES

1. Taxes on gasoline, diesel fuel, and special motor fuels

Present law

Present law imposes a manufacturers excise tax of 4 cents per gallon on the sale of gasoline. A retailers excise tax of 4 cents per gallon is imposed on the sale of diesel fuel for use in a highway vehicle and on the sale of special motor fuels. These taxes are scheduled to decline to 1-½ cents per gallon on October 1, 1984.

House bill

The House bill increases the taxes on gasoline, diesel fuel, and special motor fuels from 4 cents per gallon to 9 cents per gallon, effective for sales after March 31, 1983, and before October 1, 1988.

Senate amendment

The Senate amendment is the same as the House bill except the increased tax rates apply through September 30, 1989.

Conference agreement

The conference agreement follows the House bill.

2. Taxes on motorboat fuels

Present law

The 4-cents-per-gallon taxes on gasoline and special fuels apply to such fuels used in motorboats (other than motorboats used in fisheries). For fiscal years 1981 through 1983, an amount equivalent to the revenues from these taxes, not exceeding $20 million per year, is transferred to the National Boating Safety and Facilities Improvement Fund.[1] The balance of these revenues is deposited in the Land and Water Conservation Fund.

House bill

The House bill increases the taxes on gasoline and special motor fuels used in motorboats to 9 cents per gallon, effective for sales after March 31, 1983, and before October 1, 1983. The maximum amount of these revenues that can be transferred to the Boating Safety Fund is increased to $45 million per year and the maximum allowable balance in that Fund is also increased to $45 million. The Fund is extended through September 30, 1988.

Senate amendment

The Senate amendment is the same as the House bill, except the Boating Safety Fund, and the transfers of revenue thereto, are extended through September 30, 1989.

Conference agreement

The conference agreement follows the House bill.

3. Exemptions from motor fuel taxes

Present law

Present law includes exemptions from the motor fuels taxes, equal to the 4-cents-per-gallon rate, for the following purposes: a fuels mixture (gasohol) which contains at least 10 percent alcohol of 190 proof (through 1992); use in intercity, local, or school buses; use in qualified taxicabs; use by State and local governments; use by nonprofit educational institutions; and farming use. An exemption of 2 cents per gallon is included for fuels used in a nonhighway qualified business use.

House bill

The House bill includes exemptions from the motor fuels taxes, as follows:

a. *Gasohol.*—An exemption of 4 cents per gallon through September 30, 1988.

b. *Intercity, school, and local buses.*—An exemption of 9 cents per gallon through September 30, 1988.

c. *Qualified taxicabs.*—An exemption of 4 cents per gallon through September 30, 1984. (Additionally, the Treasury Department is directed to conduct a study on the effectiveness of this exemption.)

d. *State and local government use.*—An exemption of 9 cents per gallon through September 30, 1988.

e. *Nonprofit educational institutions.*—An exemption of 9 cents per gallon through September 30, 1938.

f. *Farming use.*—An exemption of 9 cents per gallon through September 30, 1988.

g. *Nonhighway qualified business use.*—An exemption of 9 cents per gallon through September 30, 1988.

h. *Certain alcohol fuels.*—An exemption of 9 cents per gallon for alcohol fuels consisting of 85 percent or more methanol, ethanol, or other alcohols derived from sources other than petroleum, through September 30, 1988.

In addition, the House bill permits ground applicators of certain farm processes (e.g., fertilizer) to claim the fuels tax exemption directly for fuels used by them in farming purposes.

Senate amendment

The Senate amendment generally follows the House bill, with modifications. The exemptions terminated after September 30, 1988, under the House bill are terminated after September 30, 1989, by the Senate amendment. The Senate amendment also makes the following additional changes in the exemptions:

a. *Gasohol.*—An exemption of 9 cents per gallon, through December 31, 1992.

b. *Qualified taxicabs.*—An additional exemption of 4 cents per gallon for one year for certain taxicabs that do not qualify under present law because they are not permitted under local law to offer ridesharing, January 1, 1983 through December 31, 1983.

c. *Certain alcohol fuels.*—An exemption of 9 cents per gallon for alcohol fuels consisting of 85 percent or more methanol, ethanol, and other alcohols derived from sources other than petroleum or natural gas.

d. *Certain vanpool vehicles.*—An exemption of 9 cents per gallon for vehicles carrying 8 or more adults (not including the driver) if used more than 80 percent for commuting to and from work. The vehicle owner can be the employer, the operator, or a third party leasing to the employer or operator.

Conference agreement

The conference agreement follows the House bill and the Senate amendment, with modifications. Specifically, the conference agreement provides the following exemptions:

a. *Gasohol.*—The conference agreement provides an exemption equal to 5 cents per gallon effective through December 31, 1992.

b. *Intercity, school, and local buses.*—The conference agreement follows the House bill.

c. *Qualified taxicabs.*—The conference agreement follows the Senate amendment.

December 31, 1982.

House bill

No provision.

Senate amendment

The Senate amendment increases the tariff to 90 cents per gallon on imported alcohol fuels, effective on April 1, 1983 through December 31, 1992.

Conference agreement

The conference agreement increases the tariff to 50 cents per gallon effective after March 31, 1983 and before January 1, 1993.

6. Time for payment of gasoline tax

Present law

Under present law, the tax on gasoline generally is paid for a semimonthly period, with payments due 9 days after the close of the close of the taxable period. There is no requirement for payment by electronic wire transfer.

House bill

No provision.

Senate amendment

The Senate amendment provides an additional 6 days, for a total of 15 days, after the close of the semimonthly period for payment of the gasoline tax. The additional time is available only to oil jobbers who sell fewer than 2 million gallons of gasoline during the taxable period and who elect to pay the tax by electronic wire transfer. The provision is effective on April 1, 1983.

Conference agreement

The conference agreement follows the Senate amendment, with modifications. The agreeement provides an additional 5 days, for a total of 14 days, after the close of the semimonthly period for payment of the gasoline tax in the case of taxpayers who pay

[1] The Boating Safety Fund is also subject to the additional restriction that its balance cannot exceed $20 million at any given time. Thus, transfers to the Fund are less than the $20 million per year maximum if the Fund has an outstanding balance.

by electronic transfer. If the payment date falls on a Saturday, Sunday, or holiday, payment shall be due on the preceding Friday (or Thursday, in the case of a Friday holiday).

Under the conference agreement, the additional time is available to any person other than a refiner producing more than 1,000 barrels of oil per day.

d. *State and local government use.*—The conference agreement follows the House bill.

e. *Nonprofit educational institutions.*—The conference agreement follows the House bill.

f. *Farming use.*—The conference agreement follows the House bill.

g. *Nonhighway qualified business use.*—The conference agreement follows the House bill.

h. *Vanpool vehicles.*—The conference agreement follows the House bill.

i. *Certain alcohol fuels.*—The conference agreement follows the Senate amendment.

j. *Ground fertilizer applicators.*—The conference agreement follows the House bill and the Senate amendment.

4. Alcohol fuels income tax credit

Present law

Present law provides a 40-cents-per-gallon income tax credit for certain alcohol fuels. The credit is not allowable if an excise tax exemption is claimed for the same fuels. This credit is effective through December 31, 1992.

House bill

The income tax credit is terminated after September 30, 1986.

Senate amendment

The income tax credit is increased to 90 cents per gallon, effective on April 1, 1983. The present law termination date of December 31, 1992 is retained.

Conference agreement

The conference agreement increases the income tax credit to 50 cents per gallon effective through December 31, 1992.

5. Tariff on imported alcohol fuels

Present law

A tariff of 40 cents per gallon is imposed on imported alcohol fuels, effective after December 31, 1982, and before January 1, 1993. The tariff is 20 cents per gallon through * * *.

B. EXCISE TAXES ON SALES OF TRUCKS AND TRUCK PARTS

Present law

Trucks and truck trailers

A 10-percent manufacturers excise tax is imposed on the sale of truck chassis and bodies, truck trailer and semitrailer chassis and bodies, and highway tractors used in combination with a trailer or semitrailer (including related parts and accessories). Truck chassis and bodies are taxable only if they are suitable for use with a vehicle whose gross vehicle weight is over 10,000 pounds. Truck trailer and semitrailer chassis and bodies are taxable only if they are suitable for use with a trailer or semitrailer whose gross vehicle weight is over 10,000 pounds. Certain articles (not including rail trailers or livestock carriers) are specifically exempt.

The rate of tax is scheduled to fall to 5 percent on October 1, 1984.

Truck parts and accessories

An 8-percent manufacturers excise tax is imposed on the sale of parts or accessories (other than tires or inner tubes) for truck chassis and bodies, truck trailer and semitrailer chassis and bodies, and highway tractors used in combination with a trailer or semitrailer. Parts to be resold in connection with the first retail sale of a light-duty truck (10,000 pounds or less) are exempt. Parts for certain articles (not including rail trailers or livestock carriers) are specifically exempt.

The rate of tax is scheduled to fall to 5 percent on October 1, 1984.

House bill

Trucks and truck trailers

The threshold weights over which articles become taxable are raised to 33,000 pounds for truck chassis and bodies and 26,000 pounds for truck trailer and semitrailer chassis and bodies. A new exemption is provided for rail trailers and rail vans (not including piggy-back trailers or semitrailers) which are designed primarily for railroad use and include as an integral part at least one rail axle. These provisions are effective the day after enactment.

The House bill converts the current 10-percent manufacturers tax into a 12-percent retail tax on April 1, 1983. It provides a 2-percent retail tax for articles taxable under the retail tax and for which the 10-percent manufacturers tax has been paid. Current exemptions under the manufacturers tax and the exemption for rail trailers will apply under the retail tax. To deter tax avoidance, the 12-percent retail tax also applies to the installation of parts or accessories on a taxable vehicle, if it occurs within 6 months after the vehicle is first placed in service. However, an installation is not taxed if the vehicle is purchased fully equipped for service, the part is a replacement, or the aggregate price of installed parts does not exceed $200 (or another amount as the Secretary may prescribe by regulations).

The retail excise tax on trucks and trailers will expire on October 1, 1988.

Truck parts and accessories

The House bill repeals the manufacturers excise tax on truck parts and accessories, effective on the day after the date of enactment. However, as described above, certain installations of parts are taxable under the retail tax on trucks.

Senate amendment

Trucks and truck trailers

The Senate amendment is generally the same as the House bill. However, under the Senate amendment, the expemption for rail trailers and vans (not including piggy-backs) is for vehicles which are designed for use both as a highway vehicle and a railroad car. Also, the Senate amendment provides a new exemption for farm equipment uniquely designed to transport livestock to and on farms, effective the day after enactment. The retail tax will expire on October 1, 1989.

Truck parts and accessories

Under the Senate amendment, parts and accessories that are suitable for use (and ordinarily used) on a vehicle having a gross vehicle weight of 10,000 pounds or less are exempt from the manufacturers excise tax on parts and accessories, effective the day after enactments. Parts for the rail trailers and livestock carriers which are excluded from the excise tax on trucks by the Senate amendment are subject to the manufacturers excise tax as under present law.

The rate of tax increases to 10 percent on April 1, 1983. This tax will expire on October 1, 1989.

Conference agreement

The conference agreement follows the House bill and the Senate amendment on new trucks except that it follows the Senate amendment on rail trailers and the House bill on livestock carriers. The agreement follows the House bill with respect to the effective date and the expiration date. The conference agreement follows the House bill on the tax on parts and accessories.

C. HEAVY VEHICLE USE TAX

Present law

An excise tax is imposed on the use on the public highways of any highway motor vehicle which (together with semitrailers and trailers customarily used in connection with highway motor vehicles of the same type as the vehicle) has a taxable gross weight of more than 26,000 pounds. The rate of tax is $3 a year for each 1,000 pounds or fraction thereof.

The taxable period for the use tax is generally the one-year period beginning on July 1. The amount of tax is prorated only when the first use of the vehicle occurs later than the first month of the taxable period; no refund of tax is made when the owner stops using the taxed vehicle during the taxable period. No de minimus exemption is provided for limited uses of the public highways.

The tax is scheduled to expire on October 1, 1984.

House bill

The House bill provides a new, graduated tax rate structure, as follows:

If the taxable gross weight is—		
At least:	But less than:	The rate of tax is:
33,000 pounds.....	55,000 pounds.....	$60 per year, plus $20 for each 1,000 pounds or fraction thereof in excess of 33,000 pounds.
55,000 pounds.....	80,00 pounds.....	$500 per year, plus $60 for each 1,000 pounds or fraction thereof in excess of 55,000 pounds.
80,000 pounds.....		$2,000 a year.

Note.—No tax is imposed on vehicles under 33,000 pounds.

The House bill provides a new de minimus exemption for vehicles which are used on the public highways for 2,500 miles or less during a taxable period. In addition, it directs the Secretary of Transportation (in consultation with the Secretary of the Treasury and other parties) to study alternative forms of the highway use tax and report findings and recommendations to the tax-writing commitees of Congress before January 2, 1985. Beginning January 1, 1985, a State must require proof of payment of the highway use tax before registering a vehicle in the State in order to qualify for its highway apportionment for the fiscal year.

These provisions are effective on January 1, 1984. To accommodate this effective date, two short taxable periods are provided in lieu of the one-year taxable period that would otherwise begin on July 1, 1983.

Under the House bill, the use tax expires on October 1, 1988.

Senate amendment

The Senate amendment is similar to the House bill, but provides a 5,000-mile de minimus exemption, a different (and phased-in) tax rate structure, and an October 1, 1989, expiration date. In addition, the Senate amendment allows a prorated credit or refund for tax paid, where there is a reasonable expectation that the owner will not use the vehicle for the remainder of the taxable period or the vehicle is transferred and the transferee certifies he has paid the correct amount of tax for the remainder of the taxable period. The Senate amendment does not provide for State enforcement of the use tax.

The graduated tax structure under the Senate amendment is as follows:

If the taxable gross weight is—		
At least:	But less than:	The rate of tax is:
33,000 pounds	55,000 pounds	$80 per year, plus $10 for each 1,000 pounds or fraction thereof in excess of 33,000 pounds.
55,000 pounds	70,000 pounds	$300 per year, plus $20 for each 1,000 pounds or fraction thereof in excess of 55,000 pounds.
70,000 pounds	80,000 pounds	$600 per year, plus $60 for each 1,000 pounds or fraction thereof in excess of 70,000 pounds.
80,000 pounds		$1,200 a year.

Note.—No tax is imposed on vehicles under 33,000 pounds.

One-third of the tax rate change provided by the Senate amendment is effective of January 1, 1984, and two-thirds is effective on January 1, 1985. In general, the entire change is effective on January 1, 1986. However, the entire change is not effective until January 1, 1987, for persons who own and operate no more than 3 taxable vehicles. To accomodate this phase-in schedule, six (eight, in the case of small owner-operators) short taxable periods are provided in lieu of the one-year taxable periods are provided in lieu of one one-year taxable periods that would otherwise begin on July 1 of 1983, 1984, and 1985 (and 1986, in the case of small owner-operators).

Conference agreement

The conference agreement incorporates a graduated use tax schedule. In addition, the conference agreement follows the Senate amendment on the 5,000 mile *de minimus* exemption. The agreement follows the Senate amendment and allows a prorated credit and refund for tax paid but with an amendment generally limiting it to situations involving theft or destruction of the equipment. The conference agreement follows the House bill on State enforcement of the use tax. It follows the Senate amendment with an amendment allowing a one-year delay of the use tax increases for truck fleets of 5 or less vehicles.

The conference agreement provides the following rate of use tax:

Taxable gross weight		
At least:	But less than:	Rate of tax:
33,000 pounds	55,000 pounds	$50 per year, plus $25 for each 1,000 pounds or fraction thereof in excess of 33,000 pounds.
55,000 pounds	80,000 pounds	$600 per year, plus the applicable rate for each 1,000 pounds or fraction thereof in excess of 55,000 pounds.
70,000 pounds		The maximum amount.

The applicable rate and maximum amount are as follows:

Taxable period beginning on July 1 of—	Applicable rate	Maximum amount
1984	$40	$1,600
1985	$40	$1,600
1986	$44	$1,700
1987	$48	$1,800
1988 or thereafter	$52	$1,900

D. TAXES ON TIRES, TREAD RUBBER, AND INNER TUBES

1. Tires

Present law

There are excise taxes imposed on the sale by a manufacturer, producer or importer of tires, based upon weight: tires for highway vehicles are taxed at 9.75 cents per pound; nonhighway tires generally are taxed at 4.875 cents per pound; and laminated tires (tires not designed for highway use) are taxed at 1 cent per pound. On and after October 1, 1984, the tax on highway tires is scheduled to decrease to the non-highway rate of 4.875 cents per pound.

House bill

Under the House bill, the tax on highway tires weighing over 100 pounds is increased to 25 cents per pound, effective January 1, 1984. The tax on such tires of 100 pounds or less is repealed on that date, as are the taxes on non-highway tires and laminated tires. The tax on highway tires will terminate on October 1, 1988.

Senate amendment

Under the Senate amendment, there is a graduated tax on highway tires at the following rates and poundage brackets: 10 cents per pound for the first 50 pounds, 15 cents per pound for the next 50 pounds, and 25 cents per pound for tires over 100 pounds. The taxes on non-highway tires and laminated tires are repealed. These changes are effective on April 1, 1983, through September 30, 1989. The tax on highway tires will terminate on October 1, 1989.

Conference agreement

Under the conference agreement, there is a graduated tax on highway tires at the following rates and poundage brackets: no tax on tires under 40 pounds; 15 cents per pound for tires between 40 and 70 pounds; 30 cents per pound for tires between 70 and 90 pounds; and 50 cents per pound for tires of 90 pounds and over. These changes are effective on January 1, 1984, through September 30, 1988, after which time the tax terminates.

In addition, the taxes on nonhighway and laminated tires are repealed, effective on January 1, 1984.

2. Tread rubber

Present law

An excise tax of 5 cents per pound is imposed on the sale by a manufacturer, producer, or importer of tread rubber. The tax is imposed on tread rubber for use in recapping or retreading highway type tires. The tax on tread rubber is scheduled to expire on October 1, 1984.

House bill

Under the House bill, the tax on tread rubber is increased to 25 cents per pound, if for highway tires weighing over 100 pounds. The tax on tread rubber for other tires is repealed. These changes are effective on January 1, 1984, through September 30, 1988. The tax is terminated on October 1, 1984.

Senate Amendment

Under the Senate amendment, the tax on tread rubber is increased to 6 cents per pound. The tax terminates on October 1, 1989.

Conference agreement

Under the conference agreement, the tax on tread rubber is repealed, effective on January 1, 1984.

3. Inner tubes

Present law

Under present law, there is an excise tax imposed on the sale by a manufacturer, producer or importer of inner tubes for tires, based upon weight. The tax currently is 10 cents per pound, and is scheduled to decline to 9 cents per pound on October 1, 1984.

House bill

Under the House bill, the tax on inner tubes is repealed, effective on January 1, 1984.

Senate amendment

Under the Senate amendment, the tax on inner tubes is retained at 10 cents per pound through September 30, 1989, after which time the tax will terminate.

Conference agreement

The conference agreement follows the House bill.

E. TAX ON LUBRICATING OIL

Present law

The sale of lubricating oil is subject to a 6-cents per-gallon tax that is levied on the manufacturer or producer. Exemptions are provided for oil sold for use in cutting or machining operations on metals. An exemption also applies to sales of rerefined oil. Rerefined oil must be composed of at least 25 percent used or waste lubricating oil that has been cleaned and no more than 55 percent previously unused lubricating oil.

House bill

The House bill repeals the tax on lubricating oil, effective on date of enactment.

Senate amendment

The Senate amendment retains the present tax on lubricating oil, and extends the tax to synthetic lubricating oil effective on April 1, 1983.

Conference agreement

The conference agreement follows the House bill.

F. FLOOR STOCKS PROVISIONS

1. Floor stocks taxes

Present law

Present law imposes no floor stocks taxes with respect to the Highway Trust Fund taxes since these taxes have not been increased since 1959. Floor stocks taxes are one-time taxes imposed with respect to inventories when manufacturers excise tax rates are increased.

House bill

The House bill imposes floor stocks taxes with respect to gasoline, tires over 100 pounds and tread rubber used in recapping such tires, and trucks and trailers over the taxable weight thresholds provided by the bill. The floor stocks taxes are equal to the increase in the applicable tax rates and are due by return, on May 15, 1983. Revenues from the floor stocks taxes will be deposited in the Highway Trust Fund.

Senate amendment

The Senate amendment generally follows the House bill except the floor stocks taxes apply to additional items on which the manufacturers excise taxes are increased, i.e., synthetic lubricating oil and truck and trailer parts and accessories for trucks and trailers with a gross vehicle weight over 10,000 pounds.

Conference agreement

2. Floor stocks refunds

Present law

Floor stocks refunds are provided with respect to inventories when a manufacturers excise tax is repealed or reduced. Present law includes provisions for floor stocks refunds with respect to the Highway Trust Fund taxes that are scheduled to expire or be reduced on October 1, 1984.

House bill

The House bill provides for floor stocks refunds of tax paid on articles on which the manufactures excise taxes are repealed, if certain conditions are satisfied. Generally, the refunds are made with respect to articles held by dealers on the effective date of the repeal and are made to manufacturers upon proof of reimbursement to the dealer. Tax-repealed articles include trucks with taxable weight of 33,000 pounds or less, trailers with a like weight of 26,000 pounds or less, laminated tires and nonhighway tires, highway tires under 100 pounds, intertubes, and parts and accessories for trucks and trailers.

The House bill also includes a provision for floor stock refunds to manufacturers with respect to trucks and truck trailers below the increased taxable weight thresholds provided by the bill which are purchased by consumers between December 2, 1982 and the date of the bill's enactment (the date on which the tax on such trucks is repealed). One requirement for these refunds is proof that the consumer has been reimbursed for the amount of the previously paid tax.

Amounts equivalent to the amount of the floor stocks refunds will be transferred from the Highway Trust Fund to the general fund of the Treasury so the Trust Fund will bear the cost of these refunds.

Senate amendment

The Senate amendment generally follows the House bill, with modifications. The list of tax-repealed articles is changed to reflect the other provisions of the Senate amendment. Thus, under the Senate amendment, tax-repealed articles include trucks with a gross weight of 33,000 pounds or less, trailers with a like weight of 26,000 pounds or less, laminated tires, nonhighway tires, and parts and accessories for trucks and trailers weighing 10,000 pounds or less.

The beginning of the period during which refunds are permitted for consumer purchases to trucks and trailers is changed from December 2, 1982, to November 28, 1982.

Conference agreement

The Conference agreement follows the House bill, with modification to reflect the repeal of the tax on tires under 40 pounds and tread rubber.

G. HIGHWAY TRUST FUND PROVISIONS

Original enactment of the Highway Trust Fund

Present law

The Highway Trust Fund was established in 1956 to provide financing specifically earmarked for the new Interstate Highway System and continuation of other Federal-aid highway programs. The other highway-aid programs previously had been financed through the general fund.

The 1956 Act provided for a highway cost allocation study to determine the fair distribution of highway-related user taxes among the various users. In addition, the 1956 Act also contained the "Byrd Amendment" which was included to prevent the Trust Fund from reaching a deficit position. In general, this provision originally required a proportionate reduction of the Interstate Highway System apportionment, if trust fund balances and estimated future receipts would be inadequate to cover obligations as they become due.

Subsequent extensions of the Highway Trust Fund

The Highway Trust Fund and the related earmarked highway excise taxes transferred to the trust fund have been extended three times since 1961: the Federal-Aid Highway Act of 1970; the Federal-Aid Highway Act of 1976; and the Surface Transportation Assistance Act of 1978.

In the 1978 Act, the "Byrd Amendment" was modified to require that when anticipated revenues are insufficient to cover expenditures, reductions would be made on a pro rata basis to all apportioned highway funds, rather than to interstate apportionments only. Finally, two studies were required: a cost allocation study to be conducted by the Department of Transportation, which was submitted to Congress in May 1982; and a study of the highway excise tax structure to be conducted by the Department of Treasury, which was sent to Congress on December 15, 1982.

Highway Trust Fund expenditure purposes

Since its enactment in 1956 and through legislation since then, the Highway Trust Fund has been used to finance construction of the Interstate Highway System, other Federal-aid highways, and for other Federal highway-aid programs. The highway programs currently supported by expenditures from the trust fund are listed below:

(1) *Interstate highway system*—(a) Construction to close gaps in the nearly completed basic Interstate system; (b) Resurfacing, restoring, rehabilitating and reconstructing ("4Rs") previously completed sections.

(2) *Primary highway system*—(a) Construction and reconstruction and related planning; (b) Resurfacing, restoring, rehabilitating these highways.

(3) *Urban and rural areas transportation program*—Assistance in urban and rural areas in construction, rehabilitation and reconstruction of local roads, and related planning and research; public transportation capital expenditures; safety improvements and traffic system management. (Urban areas have more than 50,000 persons; rural areas less than that population.)

(4) *Bridge program*—Rehabilitating or replacing structurally deficient bridges.

(5) *Construction and other highway-related safety programs*—Establishment of safety programs and to build safety into highways during their construction, including such things as pavement marking, and elimination of roadside hazards and highway rail crossings.

(6) *Emergency highway relief programs*—Highway funds relating to disaster relief.

(7) *Administration and research through the federal highway administration*—Involving (a) coordination and direction of various public programs and requirements, (b) general program support affecting policy plans and projections and administrative support, and (c) engineering and financial assistance.

(8) *Additional programs*—The Highway Trust Fund contributes a share of costs of certain other programs, including the following: Forest and public lands highways; economic growth center highways; national scenic and recreational highways; railroad-highway crossing demonstration projects; rural highway public transportation demonstration projects; bicycle pathway programs; highway safety research and development; car and van pool projects; right-of-way revolving fund.

House bill

H.R. 6211, as passed by the House, would extend the Highway Trust Fund for four additional years and would make several other adjustments in present law.

Extension of the trust fund

The Highway Trust Fund would be extended for 4 years, from September 30, 1984, through September 30, 1988. To simplify codification of tax law, the trust fund would be transferred to the Internal Revenue Code (as a new section 9503) on January 1, 1983, and the present statutory provision for the trust fund in section 209 of the Highway Revenue Act of 1956 would be repealed simultaneously. For all purposes of law and any reference in any law, the Highway Trust Fund established in the Internal Revenue Code would be treated as a continuation of this trust fund in its earlier statutory provisions.

Revenues appropriated to the trust fund

There would be appropriated to the Highway Trust Fund amounts equivalent to the taxes received in the Treasury under the provisions relating to the taxes on gasoline and other motor fuels, heavy trucks and trailers, truck parts, tires and tread rubber, lubricating oil and use of certain vehicles. Taxes received after the expiration date of the trust fund and before July 1, 1989, that are attributable to liabilities incurred before October 1, 1988, also would be appropriated to the trust fund. Amounts appropriated to the Airport and Airway Trust Fund from the tax on aviation fuels would be deducted beforehand from the amounts deposited in the Highway Trust Fund.

Expenditures and transfers from the trust fund

Expenditures could be made before October 1, 1988, from the trust fund, as provided by appropriation Acts, to meet obligations incurred after authorization by law and to be paid out of the Highway Trust Fund es-

tablished by section 209 of the Highway Revenue Act of 1956, or authorized by law to be paid out of the Highway Trust Fund (in sec. 9503 of the code) under title I or II of the Surface Transportation Assistance Act of 1982. Expenditures also could be made from the trust fund to meet obligations that have been incurred after authorization by a law which does not authorize the expenditure out of the Highway Trust Fund of any amount for a general purpose not covered in the 1956 Act and the 1982 Act cited above, as in effect on December 31, 1982.

Expenditures from the Highway Trust Fund for highway purposes could not be made from the Mass Transit Account, described in section H, below.

Transfers of funds may be made from the trust fund to the general fund for amounts paid before July 1, 1989, for tax credits, other payments attributable to non-highway uses of motor fuels and lubricating oil, and for floor stock refunds on the basis of claims filed for periods ending before October 1, 1988.

Motorboat fuels taxes (or equivalent amounts) would be transferred to the National Recreational Boating Safety and Facilities Improvement Fund through September 30, 1988. The aggregate amount transferred in any fiscal year could not exceed $45 million, and no transfers of these amounts could be made if the accumulated balance in the Boating Safety Fund would be $45 million. Any other amounts of motorboat fuels taxes would be transferred to the Land and Water Conservation Fund.

Anti-deficit provision ("Byrd amendment")

The "Byrd amendment" assures that the Highway Trust Fund is maintained as a self financing entity and only would be revised to clarify certain ambiguities and to improve its operation.

As a result, at least once in each calendar quarter, the Secretary of Treasury—after consultation with the Secretary of Transportation—would estimate the unfunded highway authorizations at the close of the next fiscal year and the net receipts of the Highway Trust Fund for the 24-month period beginning at the close of such fiscal year. In the event the unfunded authorizations would exceed the estimated receipts, the Secretary of Transportation would reduce the apportionment to the States by the percentage of excess apportionment. If a subsequent quarterly estimate indicates that the excess unfunded authorizations would be a smaller amount, or there would be no such excess, the apportionments to the States would be adjusted accordingly.

The provision that authorizes repayable advances from the general fund to the Highway Trust Fund would be repealed.

These provisions would become effective on January 1, 1983.

Senate amendment

The changes made in the House bill by the Senate amendment were the following.

Extension of the trust fund

The Highway Trust Fund would be extended for 5 years, through September 30, 1989

Revenues appropriated to the trust fund

Amounts equivalent to the revenues received in the Treasury under the provisions relating to the highway excise taxes would continue to be appropriated to the Highway Trust Fund through September 30, 1989. Taxes received after September 30, 1989, and before July 1, 1990, that are attributable to liabilities incurred before October 1, 1989, also would be appropriated to the trust fund.

Expenditures and transfers from the trust fund

Expenditures would be made from the trust fund before October 1, 1990, as provided by appropriation Acts, to meet obligations which have been incurred after authorization by law to be paid out of the Highway Trust Fund established by section 209 of the Highway Revenue Act of 1956. Eligible obligations would be those incurred under the Federal-Aid Road Act of July 11, 1916, as amended and supplemented, including administrative expenses of the Federal Highway Administration.

Transfers could be made from the trust fund to the general fund through July 1, 1990, instead of through July 1, 1988, as in the House bill. The purposes for such transfers were unchanged from the House bill.

The Senate amendment extended the transfer of motorboat fuels taxes to the Boating Safety Fund and the Land and Water Conservation Fund through September 30, 1989, one year later than in the House. No other changes were made in the Senate amendment with respect to these provisions.

Expenditures for highway purposes could not be made from the Mass Transit Account.

Anti-deficit provision ("Byrd amendment")

The "Byrd Amendment" would be retained without change, including the authority for repayable advances.

The extension of the Highway Trust Fund provisions generally would be effective for October 1, 1985—September 30, 1989, except for the 9-month period (through June 30, 1990) for receipt of pre-October 1, 1989, highway excise tax liabilities and certain transfers from the trust fund.

Conference agreement

The conference agreement follows the House bill.

H. MASS TRANSIT ACCOUNT

Present law

The is no transit account in the Highway Trust Fund and no transit trust fund that receives tax receipts designated for deposit in such an account or fund.

House bill

A separate Mass Transit Account would be established in the Highway Trust Fund. It would consist of the revenue equivalent of 1 cent a gallon of the 9 cents a gallon excise taxes imposed on gasoline and diesel and special motorboat fuels. These amounts would be transferred to the Mass Transit Account with the same regularity and under the same conditions as amounts from these taxes would be are transferred to the Highway Trust Fund. Interest earned as a result of investment in United States securities on the portion of amounts in the Highway Trust Fund that would be attributable to the Mass Transit Account would be credited to the Mass Transit Account.

Amounts in the Mass Transit Account would be available, as provided by appropriation Acts, for making capital expenditures (including capital expenditures for new projects) before October 1, 1989, under section 3 of the Urban Mass Transportation Act of 1964. Expenditures from the Mass Transit Account could be made only for mass transit capital purposes, and no expenditures could be made from this account for highway purposes.

In approving capital expenditures for new transit systems, the House believed that preference should be given to projects which maximize the cost-effectiveness of the federal contribution including use of existing infrastructure, like existing track, or substantial non-federal capital contribution.

Unfunded authorizations also would be limited to the estimated net receipts for the Mass Transit Account. The procedure would be the same as that specified for unfunded highway authorizations to be paid from the Highway Trust Fund, except that for the Mass Transit Account, unfunded authorizations for any fiscal year could not exceed 12 months of estimated net receipts.

The provision establishing the Mass Transit Account shall take effect on January 1, 1983.

Senate amendment

The provisions of the Senate amendment were generally the same as in the House bill, except for four items.

(1) The Mass Transit Account would be authorized through September 30, 1989, one year longer than in the House bill.

(2) The Senate amendment refers to section 22 of the Urban Mass Transportation Act of 1964, including capital expenditures to new starts.

(3) The Senate amendment did not limit the amount of unfunded authorizations at the end of any fiscal year to any specified estimate of future net receipts.

(4) The Senate amendment would authorize the making of repayable advances from the general fund to the Mass Transit Account. Repayments would include the amount of the advance plus interest.

Conference agreement

The conference agreement follows the House bill.

The conferees intend that a fair share of the funds to be set aside for mass transit be allocated to rapidly growing cities to fund cost-effective new rail construction, bus fleet expansion and other related needs at local option. While recognizing the importance of rehabilitating existing transit facilities which may be in disrepair, the Committee believes it is equally important that pressing needs for new facilities in other areas of the country also receive due consideration. In this regard, the Committee notes the commitment of the Administration to permit new tax revenues to be directed toward cost-effective new rail construction.

In approving capital expenditures for new transit systems, it is the conferees belief that preference should be given to projects which maximize the cost-effectiveness of the federal contribution including use of existing infrastructure, like existing track, or substantial non-federal capital contribution.

I. TREATMENT OF MOTOR CARRIER OPERATING AUTHORITIES HELD BY CORPORATIONS ACQUIRED BY NONCORPORATE TAXPAYERS

Present law

The Economic Recovery Tax Act of 1981 provided that an ordinary deduction is allowed ratably over a 60-month period for taxpayers who held one or more motor carrier operating authorities on July 1, 1980. The amount of the deduction is the total adjusted bases of all motor carrier operating authorities either held by the taxpayer on July 1, 1980, or acquired after that date under a binding contract in effect on July 1, 1980. The 60-month period begins July 1, 1980 (or, at the taxpayer's election, with the first month of the taxpayer's first taxable year beginning after July 1, 1980).

Under the Act, adjustments are to be made to the basis of operating authorities held on July 1, 1980 (or acquired Thereafter under a binding contract in effect on July 1, 1980) to reflect amounts allowable as deductions.

Under regulations to be prescribed by the Treasury Department, an election may be made by the taxpayer holding an operating authority on July 1, 1980, to allocate to the operating authority a portion of the cost basis to the acquiring corporation of stock in an acquired corporation. The election is available only if the operating authority was held directly by the acquired corporation at the time its stock was acquired or was held indirectly through one or more other corporations. In either case, a portion of the stock basis may be allocated to the operating authority only if the acquiring corporation would have been able, if it had received the operating authority in one or more corporate liquidations immediately following the stock acquisition, to allocate such portion to the operating authority under section 334(b)(2). The election applies only if the stock was acquired on or before July 1, 1980 (or pursuant to a binding contract in effect on such date) and only if, on the date the stock was acquired, the acquired corporation held, directly or indirectly, the operating authority.

In all cases, adjustments are also to be made to the basis of the acquiring corporation in the stock of the acquired corporation to take into account any allocation of the basis in the stock to an operating authority. In addition, the Treasury regulations are in all cases to provide for an appropriate adjustment to the basis of other assets.

House bill

If one or more noncorporate taxpayers on or before July 1, 1980, acquired in one stock purchase the stock of a corporation which, at the time of acquisition, held directly or indirectly any motor carrier operating authority, the acquisition shall be treated, for purposes of the provisions of section 266(c)(2) of ERTA (relating to certain stock acquired), as having been acquired by a single corporation. Thus, the basis of the operating authority may be adjusted to reflect the stock acquisition price. In order to qualify for these adjustments, the purchasers must have held at least 80 percent of the corporate stock on July 1, 1980.

Rules similar to the rules applicable to authorities held by corporations acquired by a corporate purchaser are to apply to authorities of corporations acquired by noncorporate purchasers.

The provision is effective for taxable years ending after June 30, 1980.

Senate amendment

The Senate amendment is identical to the House bill provision.

Conference agreement

The conference agreement follows the House bill and the Senate amendment.

II. Other Revenue Provisions

A. Modification of Effective Date for Generation Skipping Tax

Present law

The Tax Reform Act of 1976 imposed a tranfer tax on generation skipping transfers. As amended, the tax generally was effective with respect to generation skipping transfers made after June 11, 1976. As originally enacted in the Tax Reform Act of 1976, the effective date of the generation skipping tax was transfers made after April 30, 1976. The April 30, 1976 date was changed to June 11, 1976, by the Revenue Act of 1973 (Pub. L. 95-600). However, under a transitional rule, the tax did not apply in the case of transfers under irrevocable trusts in existence on June 11, 1976, or, in the case of decedents dying before January 1, 1982, pursuant to a will (or revocable crust) which was in existence on June 11, 1976, and which was not amended (except in respects which did not result in the creation of, or increase the amount of, a generation-skipping transfer) at any time after June 11, 1976. In addition, the 1982 date was extended if the testator was incompetent until 2 years after the testator regained competency.

The Economic Recovery Tax Act of 1981 (ERTA) postponed the January 1, 1982, date one additional year until January 1, 1983.

House bill

No provision.

Senate amendment

The Senate amendment basically postpones the effective date of the generation skipping tax to generation skipping trusts created after December 31, 1983.

Conference agreement

The conference agreement does not include the Senate amendment.

B. Study on Tax Status of Certain Members of Religious Orders

Present law

Present law exempts from the term "employment", for FICA tax purposes, service performed by a duly ordained, commissioned or licensed minister of a church in the exercise of the ministry or by a member of a religious order in the exercise of duties required by such order. Likewise, "wages", for purposes of income tax withholding, does not include remuneration paid from similar services.

The Internal Revenue Service generally takes the position that a member of a religious order who is instructed by the order's supervisors to obtain employment with a third party is a employee of the third party, not of the religious order, and must include the remuneration remitted to the order in gross income, whether or not the member has taken a vow of poverty. Under this position, the remuneration is subject to FICA and income tax withholding.

House bill

No provision.

Senate amendment

The Senate amendment orders the Treasury Department to conduct a study of the effects of treating members of the religious orders who perform certain services as the agents of the orders.

Conference agreement

The conference agreement does not include the Senate amendment. However, the Treasury Department has agreed to submit a report within 6 months.

C. Exclusive From Gross Income With Respect to Cancellation of Certain Student Loans

Present law

Under present law, gross income means all income, from whatever source derived, including income from discharge of indebtedness, unless otherwise provided by law. However, subject to certain limitations, gross income does not include any amount received as a scholarship or a fellowship grant (sec. 117(a)). With the exception of certain Federal grants for tuition, an amount paid to an individual to enable him or her to pursue studies or research does not qualify as a scholarship or fellowship grant if such amount represents compensation for past, present, or future employment services or if such studies or research are primarily for the benefit of the greater (Treas. Reg. sec. 1.117-4(c)).

Under certain student loan programs established by the United States and by State and local governments, all or a portion of the loan indebtedness may be discharged if the student performs certain services for a period of time in certain geographical areas pursuant to conditions in the loan agreements. In 1973, the Internal Revenue Service rules on a situation in which a State medical education loan scholarship program provided that portions of the loan indebtedness were discharged on the condition that the recipient practice medicine in a rural area of the State. The Service determined that amounts received from such a loan program were included in the gross income of the recipient to the extent that repayment of a portion of the loan was no longer required (Rev. Rul. 73-256, 1973-1 C.B. 56).

Section 2117 of the Tax Reform Act of 1976 (P.L. 94-455) provided that in the case of loans forgiven prior to January 1, 1979, no amount was to be included in gross income by reason of the discharge of all or part of the indebtedness of the individual under certain student loan programs. The exclusion applies to a discharge of indebtedness if the discharge was pursuant to a provision of the loan agreement under which all or part of the indebtedness would be discharged if the individual works for a certain period of time in certain professions in certain geographical areas or for certain classes of employers. The amendment made by the 1976 Act applies to student loans made to an individual to assist in attending an educational institution only if the loan was made by the United States or an instrumentality or agency thereof or by a State or local government either directly or pursuant to an agreement with an educational institution.

The Revenue Act of 1978 extended the student loan cancellation provisions to loans forgiven prior to January 1, 1983.

House bill

No provision.

Senate amendment

The Senate amendment extends, for one additional year, the exclusion from income provided by the Tax Reform Act of 1976 with respect to the cancellation of certain student loans. Thus, no amount will be included in gross income by reason of the discharge of all or part of a student loan of the type described in section 2117 of the 1976 Act if the loan is forgiven prior to January 1, 1984.

The provision is effective upon enactment.

Conference agreement

The conference agreement does not include the Senate amendment.

D. Energy Credit for Chlor-Alkali Electrolytic Cells

Present law

An energy investment tax credit of 10 percent is allowed for specially defined energy property. Such property includes equipment used for heat transfer or heat conservation purposes, an automatic energy control system, a combustible gas recovery system, and modifications to alumina electrolytic cells.

In addition, the Secretary of the Treasury has the authority to add items to the list of

specially defined energy property that have as their principal purpose reducing the amount of energy consumed in an existing industrial or commercial process and that are installed in connection with an existing commercial or industrial facility. The Secretary, however, may not specify an item for the list unless the item meets several minimum energy conservation and efficiency standards (sec. 44(c)(9)). The Secretary has not yet added any items to the list under the administrative discretion provided to him in this section.

Under present law, the credit for specially defined energy property generally terminates on December 31, 1982. However, for projects that take more than 2 years to construct, the credits apply through 1990 if certain affirmative commitments are made (affirmative commitment rule).

House bill

No provision.

Senate amendment

The Senate amendment would modify the definition of specially defined energy property to include modifications to chlor-alkali electrolytic cells.

Qualifying modifications involve redesign of the use of electricity in the electrolytic process to achieve an energy savings, a modification closely resembling in function modifications to alumina electrolytic cells, which qualify under present law as specially defined energy property. The modifications must be a substitution or substantial change in technology and not periodic replacement, cleaning, or repairs of cell components. For example, qualifying modifications include energy-saving additions to, or substitutions of, components of the electrolytic reduction cell or pot, such as changes to annode or cathode configurations and the addition of thermal insulation.

The credit would apply for periods beginning after December 31, 1980, and ending before January 1, 1983 (January 1, 1991, if the affirmative commitment rule applies).

Conference agreement

The conference agreement follows the Senate amendment, except that under the conference agreement the affirmative commitment rule does not apply.

E. AFFIRMATIVE COMMITMENT RULE FOR CERTAIN ENERGY CREDITS

Present law

In general, the 10-percent business energy credits expire at the end of 1982. However, certain of those credits apply through 1990 for long-term projects (i.e., projects that take at least 2 years to construct) for which affirmative commitments are made.

To satisfy the affirmative commitment requirement, the taxpayer must (1) complete all studies and obtain all permits required under Federal, State, or local law in connection with commencement of construction of the project by January 1, 1983, and (2) enter into binding contracts for 50 project of the estimated cost of components specially designed for the project by January 1, 1986.

House bill

The House bill has no provision.

Senate amendment

The Senate amendment modifies the affirmative commitment rule by extending the January 1, 1983, date required for completion of permits and studies by two years to January 1, 1985. The amendment applies only for synthetic fuels production equipment, coal conversion equipment, shale oil equipment, and related pollution control and handling equipment.

Conference agreement

The conference agreement does not include the Senate amendment.

F. INCOME TAX RETURN FILING REQUIREMENT FOR DEPENDENTS

Present law

In general, under present law, individuals, including dependents who are children or students, must file income tax returns if they have gross income of the exemption amount (currently $1,000) or more during the year.

House bill

No provision.

Senate amendment

The amendment provides that children and students need file only if they have gross income *in excess* of the exemption amount. The amendment was intended to raise the filing requirement for all individuals. The amendment applies for taxable years beginning after December 31, 1981.

Conference agreement

The conference agreement provides that an individual whose only gross income for Federal income tax purposes is a grant of $1,000 received from a State government need not file in income tax return with the Internal Revenue Service.

Revenue effect

This provision will not affect budget receipts.

G. ALLOWANCE OF REGULATED INVESTMENT COMPANY STATUS TO CERTAIN SMALL BUSINESS DEVELOPMENT COMPANIES

Present law

Under present law, a regulated investment company (commonly called a "mutual fund" or "money market fund") is treated, in essence, as a conduit for tax purposes. This treatment is achieved by allowing a regulated investment company a deduction for dividends paid to its shareholders.

To qualify as a regulated investment company under the Code, several requirements must be satisfied. One of these requirements is that the company must either (1) be registered with the Securities and Exchange Commission at all times during the taxable year as a management company or unit investment trust under the Investment Company Act of 1940, or (2) be a common trust fund or similar fund which is not included in the term "common trust fund" under the Code and which is excluded by the Investment Company Act from the definition of investment company (Code sec. 851(a)). To register under the Investment Company Act of 1940, a corporation must have at least 100 stockholders or must be making or presently proposing to make a public offering (the "public offering requirement").

Under the Small Business Incentive Act of 1980 (P.L. 96-477), certain investment companies providing capital and management assistance to small businesses (called "business development companies") may elect an alternative form of regulation in lieu of registering under the Investment Company Act. Any business development company electing this alternative form of regulation is precluded from qualifying as a regulated investment company under the Code because the company did not register under the Investment Company Act.

House bill

No provision.

Senate amendment

The Senate amendment enables a business development company electing the alternative form of regulation under the Small Business Incentive Act of 1980 to qualify as a regulated investment company if the company could qualify for registration under the Investment Company Act of 1940. Thus, only companies that have at least 100 stockholders or which satisfy the public offering requirement can qualify as regulated investment companies. The amendment applies with respect to taxable years ending after the date of enactment.

Conference agreement

The conference agreement does not include the Senate amendment.

H. QUALIFYING ROLLOVER DISTRIBUTIONS TO AN IRA

Present law

If a lump sum distribution is paid to an employee under a qualified pension, profitsharing, or stock bonus plan, tax is deferred on the portion of the distribution rolled over, within 60 days, to another qualified plan or to an IRA (an individual retirement account, annuity, or bond).

A distribution from a qualified plan is not a lump sum distribution unless it consists of the balance to the credit of the employee under the plan and is made within one taxable year of the recipient. Because of these rules, and because of then-existing uncertainty as to the application of certain rules relating to prohibited self-dealing, certain distributions made in 1976 and 1977 were not qualifying rollover contributions.

House bill

No provision.

Senate amendment

The amendment allows special relief for certain pension plan distributions received from a qualified terminated pension plan on December 6, 1976, and January 6 and 21, 1977, and subsequently rolled over to an IRA on January 21, 1977. Under the provision, the transfers would be treated as qualifying rollover contributions. Thus, to the extent the payments were, in fact, rolled over to an IRA within 60 days of receipt, the distributions would not be includible in income.

In addition, the amendment would extend the usual period of limitation for filing a claim for credit or refund of taxes paid (generally, three years after the later of (1) the date prescribed for filing the tax return, or (2) the date the return was actually filed). Under the amendment, the period of limitation would be extended to permit the filing of a claim for credit or refund, attributable to changes made by the amendment, within one year after the date of enactment.

Conference agreement

The conference agreement does not include the Senate amendment.

I. DELAY OF WITHDRAWAL LIABILITY PAYMENTS UNDER MULTIEMPLOYER PENSION PLANS

Present law

Under the Multiemployer Pension Plan Amendments Act of 1980 (MPPAA), an employer who totally or partially withdraws from a multiemployer pension plan generally is liable for a portion of the plan's unfunded obligations determined before the withdrawal. The amount of liability allocated to a withdrawing employer is determined under one of several alternative formulas which may be adopted by a plan.

As soon as practicable after an employer's complete or partial withdrawal from a multiemployer plan, the plan sponsor must notify the employer of the amount of withdrawal liability and a payment schedule for paying off the liability. Payment of withdrawal liability must begin no later than 60 days after the date on which the plan sponsor demands payment. The withdrawing employer generally is required to make level annual payments to the plan (for up to 20 years) in equal quarterly installments. If any employer defaults in payment of its withdrawal liability, the plan sponsor may require immediate payment of the balance of the liability.

Although the provisions of MPPAA generally became effective on September 26, 1980 (the date of enactment), the withdrawal liability provisions generally apply to withdrawals after April 28, 1980 (the date of a markup by the Committee on Finance of the Senate on a bill extending prior law).

House bill

No provision.

Senate amendments

Effective upon enactment, the amendment delays until after December 31, 1983, the due date for making certain payments of withdrawal liability. Under the provision, an employer which incurred withdrawal liability on account of a complete or partial withdrawal from a multiemployer plan is not required to make payments of withdrawal liability to the plan before December 31, 1983, if certain requirements are met. The withdrawing employer must have announced on July 30, 1980, its intent to cease operations as of August 8, 1980. In addition, the employer must have begun the winding down of business by August 8, 1980, and completely terminated business by August 31, 1980.

Conference agreement

The conference agreement does not include the Senate amendment.

J. POLICE AND FIRE WORKER PENSION PLANS

Present law

The Employee Retirement Income Security Act of 1974 (ERISA) provided overall limits on contributions and benefits under qualified pension, etc., plans. The Tax Equity and Fiscal Responsibility Act of 1982 (TEFRA) reduced the dollar limits on contributions and benefits under qualified plans.

Under the amendments made by TEFRA, the age below which the limit on the dollar amount of the annual benefit under a qualified defined benefit pension plan is reduced was changed from age 55 to age 62. Accordingly, benefits payable before age 62 are generally limited to the actuarial equivalent of $90,000 payable at age 62. The $90,000 limit is indexed for inflation beginning in 1986. Also, the Act provided a special floor on the limitation so that the dollar limit at age 55 and above is not less than $75,000 (no indexing is provided on the floor limit). Under the Act, the limit for ages below age 55 is determined on the basis of the usual $90,000 limit (with indexing) or the $75,000 limit, whichever is greater.

House bill

No provision.

Senate amendment

The amendment increases the dollar limit on annual benefits payable to certain police and fire workers to the equivalent of $90,000 beginning at age 55, adjusted for inflation under the same rules that apply to the $90,000 limit on benefits payable at age 62.

The amendment applies to the benefits provided under a defined benefit plan maintained by a State, or political subdivision thereof, for the benefit of all full-time employees of any police department or fire department. However, the amendment will only apply if the number of years the employee was employed on a full-time basis by the State or political subdivision in a police or fire department, when added to the number of years the employee served in the armed forces of the United States (to the extent considered in the plan), equals or exceeds 20.

The amendment will be effective as if it had been included in TEFRA.

Conference agreement

The conference agreement does not include the Senate amendment.

K. CRUISE SHIP CONVENTION DEDUCTIONS

Present law

Expenses of attending a business convention, seminar, or similar meeting that is held on a cruise ship are not deductible.

House bill

No provision. However, on December 16, the House passed H.R. 3191, as amended, which would allow deductions for conventions and similar meetings held on U.S. flag cruise ships, but only if (1) the cruise ship calls on ports only in the North American area (the United States, the U.S. possessions, the Trust Territory of the Pacific, Canada and Mexico), and (2) the taxpayer meets certain detailed substantiation requirements. The bill would apply to cruises beginning after December 31, 1982.

Senate amendment

The Senate amendment allows a business expense deduction for the cost of attending conventions, seminars, and similar meetings held on a U.S. flag cruise ship, but only in the amount of $2,000 per taxpayer per year ($1,000 in the case of a married individual filing separately), and only if two further requirements are met: (1) all ports of call on the cruise must be in the United States or the U.S. possessions, and (2) the taxpayer claiming the deduction must attach to his tax return for the year in question two written statements, described below.

One statement, signed by the individual attending the meeting, is to include information with respect to the total days of the trip (excluding the days of transportation to and from the cruise ship port) and the number of hours of each day of the trip that the individual devoted to scheduled business activity, a program of the scheduled business activity of the meeting, and such other information as the Secretary may require by regulations. The other statement must be signed by a representative of the sponsoring organization or group and must include a schedule of the business activity of each day of the meeting, the number of hours during which the individual attending the meeting attended such scheduled business activities, and such other information as the Secretary may require by regulations.

No deductions are available for cruises on foreign flag vessels, or for cruises calling on foreign ports.

The provision applies to taxable years beginning after December 31, 1982.

Conference agreement

The conference agreement follows the Senate amendment with a technical amendment that specifies that the maximum deduction available per individual per year is $2,000, even in a case of a married individual filing separately. Thus, under the conference agreement, if two married individuals filing a joint return each attended otherwise deductible cruise ship conventions at a cost of $2,000 each during a taxable year, a total of $4,000 would be deductible by those persons on their return for that year. If a married individual attended an otherwise deductible cruise ship convention at a cost of $3,000 (while his spouse attended no such convention), however, only $2,000 would be deductible for that year, whether a joint return or a separate return was filed for that year.

L. DELAY IN INTEREST REPORTING EFFECTIVE DATE

Present law

The Tax Equity and Fiscal Responsibility Act of 1982 (TEFRA) expanded the interest reporting provisions with respect to amounts paid, or treated as paid, after December 31, 1982. Under these rules, every person making a payment of interest aggregating $10 or more in any calendar year, or making payments of interest subject to withholding (withholding is generally effective for payments made after June 30, 1983), must file an information return with the Secretary. In general, interest means interest on obligations issued in registered form or publicly offered obligations (other than short-term obligations held by corporations), interest paid on bank deposits, or deposits with other financial institutions, as well as such other amounts as the Secretary may designate as interest by regulations. Under TEFRA, original issue discount on any obligation generally is subject to reporting at the time includible in income without regard to subsequent purchaser's cost basis.

House bill

No provision.

Senate amendment

Under the Senate amendment, the interest reporting provisions of TEFRA generally would not apply to payments of interest, or amounts treated as paid, prior to July 1, 1983. However, the interest reporting requirements would continue to apply to any payment to the extent reporting was required under prior law and to any payment by a payor with respect to its own obligations.

Conference agreement

The conference agreement does not include the Senate amendment.

M. TAX EXEMPT DIVIDENDS OF REGULATED INVESTMENT COMPANIES

Present law

The Tax Reform Act of 1976 amended the rules applicable to the taxation of regulated investment companies (commonly referred to as "mutual funds") and their shareholders to allow the pass through or conduit treatment of tax exempt interest. Under those rules, if more than 50 percent of the assets of a regulated investment company are assets described in section 103(a)(1), then the portion of the dividends paid to its shareholders which are paid from interest which is exempt from tax under section 103(a)(1) is treated in the hands of the shareholder as income which is exempt from tax under section 103(a)(1). (See sec. 852(b)(5)).

In addition to the special treatment accorded obligations described in section 103(a)(1) under section 852(b)(5), there are a number of other provisions in the Internal Revenue Code where special treatment is accorded to obligations which are described

in section 103(a) or the income from those obligations.

Section 103(a)(1) provides that gross income does not include interest on the obligations of a State, a Territory, or a possession of the United States, or any political subdivision of those entities, or of the District of Columbia. In addition to obligations described in section 103(a)(1), present law also provides exemption for interest on a number of obligations which are not described in section 103(a)(1). For example, exemption is provided to certain qualified scholarship fundings bonds (under section 103(a)(2)), certain obligations of housing agencies (under section 11(b) of the Housing Act of 1949), and certain obligations of Puerto Rico and the Virgin Islands. Interest on these obligations which are not described in section 103(a)(1) does not qualify for the pass-through or conduit treatment of regulated investment companies.

House bill

No provision.

Senate amendment

The Senate amendment broadens the types of obligations described in section 103(a)(1) to include all obligations on which the interest is exempt from Federal income tax under all provisions of Federal law outside of the Internal Revenue Code (as those provisions of law were in effect on the date of enactment of this bill). Thus, obligations described in section 11(b) of the Housing Act of 1949 and obligations of Puerto Rico and the Virgin Islands would be included in the obligations described in section 103(a)(1). The interest on such obligations would be considered interest described in section 103(a)(1) for all purposes of the Internal Revenue Code, including the pass-through or conduit treatment accorded to tax exempt interest under section 103(a)(1) of regulated investment companies. Obligations described in these other provisions of law are not subject to the rules applicable to industrial development bonds or arbitrage bonds.

The Senate amendment also provides that only provisions in the Internal Revenue Code may provide for the exemption of interest on obligations. Thus, after enactment of this provision, interest on obligations described in section 11(b) of the Housing Act of 1949 or obligations of Puerto Rico or the Virgin Islands is exempt from tax under section 103(a)(1) of the Internal Revenue Code and not pursuant to laws describing those obligations under present law.

Conference agreement

The conference agreement follows the Senate amendment.

N. STUDY OF TRAVEL AND TRANSPORTATION EXPENSES OF CONSTRUCTION WORKERS

Present law

Under present law, a taxpayer is allowed a deduction for traveling expenses incurred while away from home in the pursuit of a trade or business. For purposes of this deduction, the taxpayer's employment at a location away from home must be temporary. The Internal Revenue Service has ruled that, if the anticipated and actual duration of employment at a particular location is less than a year, the employment will normally be considered to be temporary. However, the courts do not necessarily apply this mechanical test and instead, look to the facts and circumstances to determine whether the employment is temporary or permanent.

House bill

No provision.

Senate amendment

Under the Senate amendment, the Secretary of the Treasury is directed to submit, by July 1, 1983, to the House Committee on Ways and Means and the Senate Committee on Finance a study of the tax treatment of travel and transportation expenses of construction workers at job sites away from home.

Conference agreement

The conference agreement does not include the Senate amendment.

O. EXPENDITURES TO REMOVE ARCHITECTURAL AND TRANSPORTATION BARRIERS TO THE HANDICAPPED AND ELDERLY

Present law

A taxpayer may deduct in a taxable year the expenses incurred in removing a qualified architectural and transportation barrier to the handicapped and elderly. These deductions otherwise would be charged to the taxpayer's capital account.

A qualified deductin is an expenditure to make any facility or public transportation vehicle more accessible to, and usable by, handicapped and elderly individuals. To take a qualified deduction, the taxpayer must establish that the barrier removal meets standards set by the Secretary and the Architectural and Transporation Barriers Compliance Board as prescribed in regulations.

A handicapped individual means an individual who has a mental or physical disability (including blindness or deafness) which (1) constitutes a functional limitation to employment or (2) substantially limits one or more major life activities of the individual.

The deduction may not exceed $25,000 for any taxable year.

The provision expires after December 31, 1982.

House bill

No provision.

Senate amendment

The expiration date of the deduction for qualified architectural and transportation barrier removal expenses is extended for one year, through December 31, 1983.

Conference agreement

The conference agreement does not include the Senate amendment.

P. NORMALIZATION METHOD FOR PUBLIC UTILITY PROPERTY

Present law

Under present law, normalization generally requires that tax benefits attributable to the investment tax credit, accelerated depreciation and accelerated cost recovery be taken into account for ratemaking purposes over the service life of the asset that generates the tax benefits.

House bill

There is no provision under H.R. 6211. However, H.R. 1524 as passed by the House restates and makes more specific the normalization rules relating to the investment tax credit, accelerated depreciation and accelerated cost recovery. Under this bill, special transition rules are also provided to preclude the loss of eligibility for these investment incentives with respect to rate orders entered into prior to March 13, 1980 affecting three California utilities (Pacific Telephone and Telegraph Company, General Telephone Company of California, and Southern California Gas Company).

Senate amendment

The Senate amendment generally follows the provisions of H.R. 1524, but modifies the special transition rules.

First, to obtain relief under these transition rules, a portion of the tax benefits would have to be repaid to the Treasury over a 2-year period generally beginning June 30, 1983. The portion to be repaid would be limited to the tax benefits which were actually flowed through to consumers too rapidly. If timely paid during the 2-year period, no interest would be charged to the utilities with respect to the repayments. For Federal income tax purposes (including the treatment of property dispositions and the amount of depreciation deductions), so much of the taxpayer's investment in property as is necessary to produce the tax benefits required to be repaid shall be treated as not having satisfied the normalization requirements.

Second, the remaining portion of the tax benefits, which would otherwise have to be repaid as a result of a disqualifying rate order, will be eligible for protection under the transition rule only if the taxpayers enter into closing agreements with the Internal Revenue Service, generally before July 1, 1983.

Third, the Internal Revenue Service would pay no interest on refunds due to the utilities with respect to amounts previously repaid to the Treasury.

Conference agreement

The conference agreement follows the Senate amendment.

Q. EFFECT OF SALE IN BANKRUPTCY OF AIRCRAFT SUBJECT TO SAFE-HARBOR LEASE

Present law

In general, the regular investment credit applies to tangible personal property and other tangible property (generally not including a building or structural component) used in connection with manufacturing, production, or certain other activities. Property used predominantly outside the United States generally is not eligible.

Recapture of investment credit is required if the property either is disposed of or ceases to be used for a qualifying purpose prior to the end of the recovery period used for computing ACRS deductions. For example, recapture is required if 5-year recovery property is used predominantly outside the United States before the end of the 5-year recovery period.

The general rule requiring recapture upon sale of property does not apply when property subject to a safe-harbor lease is sold as a result of the bankruptcy of the lessee, if certain requirements are met (bankruptcy rule). Among the requirements that must be met is a requirement that the person who purchases the property use the property predominantly within the United States.

The safe-harbor lease rules were modified by the Tax Equity and Fiscal Responsibility Act of 1982. Those modifications do not affect either the general recapture rule or the special bankruptcy rule. The modifications do not apply to transitional safe-harbor lease property, including certain aircraft.

House bill

No provision.

Senate amendment

For aircraft covered by the safe-harbor lease transitional rules, the Senate amendment provides that no recapture will be required upon sale of the aircraft in bankrupt-

cy to a person who uses the property predominantly outside the United States if the other requirements of the bankruptcy rule (other than the prohibition against foreign use) are met.

Conference agreement

The conference agreement does not include the Senate amendment.

III. OTHER PROVISIONS

A. SOCIAL SECURITY ACT PROVISIONS: DISREGARD OF CERTAIN ENERGY ASSISTANCE IN SUPPLEMENTAL SECURITY INCOME (SSI) AND AID TO FAMILIES WITH DEPENDENT CHILDREN (AFDC) PROGRAMS

Present law

In the welfare programs of SSI and AFDC, the monthly payment to each recipient is determined by subtracting that person's other income from a specified assistance standard. The AFDC and SSI statutes specify certain limited types of income which are not to be counted in making these determinations. Otherwise, all income serves to reduce the assistance payment. (In the case of SSI, in-kind income is explicitly included in the definition of income.)

House bill

No provision.

Senate amendment

The Senate amendment would add to the items which are not counted as income certain types of assistance provided to help AFDC and SSI recipients meet their energy needs. Any such assistance in cash or kind would be excluded from income if it is based on the need for assistance with home energy costs and is furnished by a home heating oil or gas supplier or by a utility company (including a municipal utility) which provides home energy. Assistance of this type provided by a non-profit organization would also be excluded from income but only if it is in-kind assistance. In the case of the AFDC program, the exclusion provided by the amendment would be optional with each State. The amendment would apply to assistance provided from the month after enactment through June 1985. Prior to April 1985, the Secretary of Health and Human Services would be required to report on the implementation of the amendment.

Conference agreement

The conference agreement follows the Senate amendment.

B. UNEMPLOYMENT COMPENSATION PROVISIONS: EXTENSION OF FEDERAL SUPPLEMENTAL COMPENSATION (FSC) BENEFITS

Present law

Most States provide up to a maximum of 26 weeks of State unemployment compensation benefits to unemployed individuals who meet the qualifying requirements of State law. Many claimants qualify for less than the maximum 26 weeks of State benefits. State benefits are financed out of State unemployment trust funds.

Under the permanent Federal-State extended benefits (EB) program, additional weeks of unemployment compensation are payable to individuals who exhaust their State benefits during periods of high unemployment. No one may receive more than 13 weeks of extended benefits, or more than 39 weeks of State plus extended benefits. Extended benefits are financed one-half out of State unemployment trust funds and one-half out of Federal unemployment trust funds.

Effective September 12, 1982 through March 31, 1983, up to 10 additional weeks of unemployment compensation benefits are available for unemployed workers in States in which extended benefits are being paid or have been paid at any time since June 1, 1982. Up to 8 additional weeks of benefits are provided in States in which the extended benefit trigger rate equals or exceeds 3.5 percent. Up to 6 additional weeks of unemployment benefits are provided in all other States.

If at any time 10 additional weeks of benefits are or become payable in a State, qualified unemployed workers in the State will be able to receive up to 10 weeks of benefits throughout the duration of the program, regardless of changes in the extended benefit trigger rates in the State. These benefits are financed totally by the Federal Treasury.

The additional weeks of benefits are paid to unemployed workers whose entitlement to State benefits (i.e., benefit year) or extended benefits ended on or after June 1, 1982; and

(a) who have no rights to regular or other State benefits or Federal/State extended benefits;

(b) who have worked 20 or more weeks or have the equivalent in wages (i.e., 40 times the weekly benefit amount or one and one-half times high quarter wages, as specified in the extended benefits program) during the State defined base-period (generally a 12 month period prior to the time the person filed for State unemployment compensation); and,

(c) who continue to meet all other State and extended benefit requirements.

Except in States in which 10 additional weeks are or become payable, and individual's eligibility is determined on a week by week basis according to the situation prevailing in the State. For example, an individual who initially qualifies for 6 weeks of benefits under this program (because the State extended benefit trigger rate is under 3.5 percent) may receive an additional 2 or 4 weeks of benefits if the rate subsequently increases (even if this occurs some weeks after he exhausts his 6-week entitlement). Similarly, an individual who draws his first week of benefits under this program at a time when the State meets the 8-week criteria will not be eligible for a seventh or eighth week of benefits if the State extended benefit trigger rate drops below 3.5 percent before he receives the seventh and eighth week of benefits.

The determination of whether a State has a rate of 3.5 percent or more is determined in the same manner as the extended benefit triggers: that is, on the basis of the average of the rates prevailing during a 13-week period ending 3 weeks previously.

House bill

No provision.

Senate amendment

The Senate amendment modifies the number of weeks payable under the Federal Supplemental Compensation program as follows: 16 weeks are payable in States with an insured unemployment rate of 6 percent or more; 14 weeks are payable in States with less than 6 percent insured unemployment if the State was eligible for extended benefits at any time between June 1, 1982, and enactment; 12 weeks are payable in States where the insured unemployment rate is below 6 percent but at least 4.5 percent or if the State becomes eligible for extended benefits after enactment; 10 weeks are payable in States where the insured unemployment rate is below 4.5 percent but not below 3.5 percent; 8 weeks in all other States.

The program will still expire on March 31, 1983.

Conference agreement

The conference agreement follows the Senate amendment with a technical modification. This modifies a provision in H.R. 6056, The Technical Corrections Act of 1982, pertaining to the payment of interstate claims for FSC benefits, to conform this provision to the changes contained in this agreement.

SENATE BILLS AND JOINT AND CONCURRENT RESOLUTIONS REFERRED

Bills and joint and concurrent resolutions of the Senate of the following titles were taken from the Speaker's table and, under the rule, referred as follows:

S. 1705. An act to amend the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701) to permit temporary use by Federal departments and agencies of public lands controlled by the Bureau of Land Management, Department of the Interior; to the Committee on Interior and Insular Affairs;

S. 1867. An act to amend and supplement the acreage limitation and residency provisions of the Federal reclamation law, as amended and supplemented, and for other purposes; to the Committee on Energy and Commerce and Public Works and Transportation;

S. 1999. An act to authorize the Secretary of the Interior to install pump casings in the southern Nevada water project; to the Committee on Interior and Insular Affairs;

S. 1963. An act to improve the internal security of the United States by clarifying the

notification requirements for foreign agents under section 951 of title 18, United States Code, and to increase the penalties for failure to notify; to the Committee on the Judiciary;

S. 1939. An act to amend the Public Health Service Act to establish a National Institute on Arthritis and Musculoskeletal and Skin Diseases; to the Committee on Energy and Commerce;

S. 2279. An act to designate the Alben Barkley National Historic Site; to the Committee on Interior and Insular Affairs;

S. 2308. An act to direct the Secretary of Agriculture to convey certain property to the city of Show Low, Arizona; to the Committee on Interior and Insular Affairs;

S.J. Res. 155. Joint resolution redesignating the Saint Croix Island National Monument in the State of Maine as the "Saint Croix Island International Historic Site"; to the Committee on Interior and Insular Affairs and Public Works and Transportation; and

S.J. Res. 265. Joint resolution to authorize and request the President to proclaim 1983 as the "National Year of Voluntarism"; to the Committee on Post Office and Civil Service;

S. Con. Res. 46. Concurrent resolution expressing the sense of the Congress with regard to the mutual security efforts of the United States and Japan; to the Committee on Foreign Affairs; and

S. Con. Res. 122. Concurrent resolution relating to the processed product share of U.S. agricultural exports; to the Committee on Agriculture, Banking, Finance and Urban Affairs, Foreign Affairs, and Ways and Means.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Mr. RUSSO (at the request of Mr. WRIGHT), for today, on account of illness in the family.

Mr. LONG of Louisiana (at the request of Mr. WRIGHT), for December 20 and 21, on account of illness.

Mr. LUKEN (at the request of Mr. WRIGHT), for today, on account of illness.

Mr. CAMPBELL (at the request of Mr. MICHEL), for today after 8 p.m., on account of illness.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. LOEFFLER) to revise and extend their remarks and include extraneous material:)

Mr. JEFFORDS, for 30 minutes, today.

(The following Members (at the request of Mr. KILDEE) to revise and extend their remarks and include extraneous material:)

Mr. WEISS, for 30 minutes, today.

Mr. SHELBY, for 5 minutes, today.

Mr. NELSON, for 5 minutes, today.

Mr. FORD, OF MICHIGAN, for 5 minutes, today.

Mr. LAFALCE, for 60 minutes, today.

Mr. PEPPER, for 10 minutes, today.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. HANSEN of Idaho and to include extraneous matter in five instances on official matters concerning the Washington Public Power Supply System, notwithstanding the fact that they exceed two pages of the RECORD and are estimated by the Public Printer to cost $2,023 in the first instance, $1,309 in the second instance, $1,190 in the third instance, $714 in the fourth instance, and $237.50 in the fifth instance.

Mr. LENT to revise and extend his remarks and to include extraneous material notwithstanding the fact that it exceeds two pages of the RECORD and is estimated by the Public Printer to cost $4,046.

Mr. JEFFORDS to place remarks in the RECORD in favor of House Concurrent Resolution 236 after remarks of the gentleman from Virginia.

SENATE ENROLLED BILLS AND JOINT RESOLUTION SIGNED

The SPEAKER announced his signature to enrolled bills and a joint resolution of the Senate of the following titles:

S. 625. An act to revise the boundary of Voyageurs National Park in the State of Minnesota, and for other purposes;

S. 717. An act for the relief of Carole Joy Maxfield-Raynor and Bruce Sherlock Maxfield-Raynor, wife and husband, and their children Charlton Bruce Maxfield-Raynor and Maxine Anne Maxfield-Raynor;

S. 835. An act for the relief of Jerry L. Crow and Ralph D. and Connie V. Hubbell;

S. 1364. An act for the relief of Jose Ramon Beltron Aivenda Ostler;

S. 1501. An act entitled the "Educational Mining Act of 1982";

S. 1838. An act for the relief of Cesar Noel Jump;

S. 1965. An act to designate certain lands in the Mark Twain National Forest in Missouri, which comprise approximately 6,888 acres, and which are generally depicted on a map entitled "Paddy Creek Wilderness Area," as a component of the National Wilderness Preservation System;

S. 1986. An act to provide for the use and distribution of funds awarded to the Blackfeet and Gros Ventre Tribes of Indians and the Assiniboine Tribe of Fort Belknap Indian Community, in certain dockets of the United States Court of Claims and of funds awarded to the Papago Tribe of Arizona in dockets numbered 345 and 102 of the Indian Claims Commission, and for other purposes.

S. 2059. An act to change the coverage of officials and the standards for the appointment of a special prosecutor in the special prosecutor provisions of the Ethics in Government Act of 1978, and for other purposes;

S. 2355. An act to amend the Communications Act of 1934 to provide reasonable access to telephone service for persons with impaired hearing and to enable telephone companies to accommodate persons with other physical disabilities;

S. 2623. An act to amend the extend the Tribally Controlled Community College Assistance Act of 1978, and for other purposes.

S. 2955. An act to establish the Cheaha Wilderness in Talladega National Forest, Ala.

S. 3103. An act to amend section 1304(e) of title 5, United States Code; and

S.J. Res. 270. Joint resolution to designate 1983 as the "Bicentennial of Air and Space Flight."

SENATE ENROLLED BILLS SIGNED

The SPEAKER announced his signature to enrolled bills of the Senate of the following titles:

[Inadvertently omitted from record on December 20, 1982.]

S. 187. An act to authorize the Secretary of the Interior to convey certain lands near Miles City, Mont., and to remove certain reservations from prior conveyances; and

S. 3113. An act to make certain minor and technical amendments to the Job Training Partnership Act.

ENROLLED BILLS SIGNED

Mr. HAWKINS, from the Committee on House Administration, reported that that committee had examined and found truly enrolled bills of the House of the following titles, which were thereupon signed by the Speaker:

[Inadvertantly omitted from Congressional Record of December 20, 1982.]

H.R. 1952. An act authorizing appropriations to carry out conservation programs on military, reservations and public lands during fiscal year 1983, 1984, and 1985, and for other purposes;

H.R. 5204. An act to authorize and direct the Secretary of the Interior to accept certain lands for the benefit of the Sycuan Band of Mission Indians;

H.R. 6588. An act to provide for Federal recognition of the Cow Creek Band of Umpqua Tribe of Indians, to institute for such tribe those Federal Services provided to Indians who are recognized by the Federal Government and who receive such services because of the Federal trust responsibility, and for other purposes;

H.R. 6946. An act to amend title 18 of the United States Code to provide penalties for certain false identification related crimes;

H.R. 7144. An act making appropriations for the government of the District of Columbia and other activities chargeable in whole or in part against the revenues of said District for the fiscal year ending September 30, 1983, and for other purposes;

H.R. 7155. An act to settle certain Indian land claims within the State of Florida, and for other purposes; and

H.R. 7377. An act to designate the Lakeview Lake project, Mountain Creek Texas, as the "Joe Pool Lake."

SINE DIE ADJOURNMENT

Mr. WRIGHT. Mr. Speaker, I move that the House do now adjourn sine die.

The motion was agreed to.

The SPEAKER pro tempore. In accordance with the provisions of House Concurrent Resolution 438, the Chair declares the 2d session of the 97th Congress adjourned sine die.

Thereupon (at 9 o'clock and 56 minutes p.m.), pursuant to House Concur-

rent Resolution 438, the House adjourned sine die.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

[*December 21 (legislative day, December 19) 1982*]

5319. A letter from the Secretary of the Department of the Interior, transmitting notice of a detailed soil survey and land classification of additional lands to be served by the Central Arizona project, Arizona, have been completed by the Bureau of Reclamation, pursuant to Public Law 83-172; to the Committee on Appropriations.

5320. A letter from the Assistant Secretary, Environmental Protection, Safety, and Emergency Preparedness, transmitting a copy of the final Northeast regional environmental impact statement, pursuant to the Powerplant and Industrial Fuel Use Act of 1978, as amended; to the Committee on Energy and Commerce.

5321. A letter from the Director of Policy, Planning and Analysis, Department of Energy, transmitting the Secretary's fourth annual report to Congress, pursuant to section 18(d), Public Law 93-275; to the Committee on Energy and Commerce.

5322. A letter from the Secretary of Energy, transmitting the annual report on financing, supply, and installation activities of public utilities in connection with the residential conservation service, pursuant to section 216(g) of the National Energy Conservation Policy Act, as amended; to the Committee on Energy and Commerce.

5323. A letter from the Assistant Secretary of State for Congressional Relations, transmitting a report on gifts of more than minimal value purchased with appropriated funds which were given to a foreign individual by the U.S. Government during fiscal year 1982, pursuant to section 515(b)(2) of Public Law 95-105; to the Committee on Foreign Affairs.

5324. A letter from the Secretary General, North Atlantic Assembly, transmitting texts of the recommendations and resolutions adopted at the Assembly's 28 Annual Session, held in London from November 14 to 19, 1982; to the Committee on Foreign Affairs.

5325. A letter from the Clerk, U.S. Court of Claims, transmitting a copy of the court's judgment order in Docket Nos. 212, 213, *Wyandotte Tribe and Nation* v. *The United States*; to the Committee on Interior and Insular Affairs.

5326. A letter from the Chairman, Administrative Conference of the United States, transmitting the first annual report on the agency's activities under the Equal Access to Justice Act, pursuant to 5 U.S.C. 504(e); to the Committee on the Judiciary.

5327. A letter from the Director, Federal Judicial Center, transmitting the 1982 annual report of the Federal Judicial Center, pursuant to 28 U.S.C. 623(b); to the Committee on the Judiciary.

5328. A letter from the Secretary of Energy, transmitting the fourth annual report on the automotive technology development program for fiscal year 1982, pursuant to sections 310(a) and 304(f) of Public Law 95-328; to the Committee on Science and Technology.

5329. A letter from the Comptroller General of the United States, transmitting a report on reducing data processing costs at Army and Air Force Exchange Service, (GAO/AFMD-83-17, December 21, 1982); jointly, to the Committees on Government Operations and Armed Services.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

[*December 21 (legislative day, December 19) 1982*]

Mr. ROSTENKOWSKI: Committee of conference. Conference report on H.R. 5470 (Rept. No. 97-984). Ordered to be printed.

Mr. ROSTENKOWSKI: Committee of conference. Conference report on H.R. 7093 (Rept. No. 97-985). Ordered to be printed.

Mr. ROSTENKOWSKI: Committee of conference. Conference report on H.R. 6056 (Rept. No. 97-986). Order to be printed.

Mr. ROSTENKOWSKI: Committee of conference. Conference report on H.R. 6211 (Rept. No. 97-987). Ordered to be printed.

Mr. ROSTENKOWSKI: Committee of conference. Conference report on H.R. 6094 (Rept. No. 97-988). Ordered to be printed.

Mr. GIBBONS: Committee of conference. Conference report on H.R. 4566 (Rept. No. 97-989). Ordered to be printed.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

[*December 21 (legislative day, December 19), 1982*]

By Mr. WHITTEN:

H.R. 7454. A bill making appropriations to provide for productive employment for the fiscal year 1983, and for other purposes; to the Committee on Appropriations;

H.R. 7455. A bill to restore the U.S. share of world trade, to provide for payment-in-kind, which shall be considered a payment to American farmers for their financial losses suffered by reason of the Government having held American farm commodities off world markets, and for other purposes; to the Committee on Agriculture.

By Mr. LOWRY of Washington (for himself, Mr. BONIOR of Michigan, Mr. EMERY, and Mr. FOGLIETTA):

H.R. 7456. A bill to give priority to conserving the biological integrity and genetic diversity of naturally spawning populations of anadromous fish; to the Committee on Merchant Marine and Fisheries.

By Mr. PICKLE:

H.R. 7457. A bill to amend title II of the Social Security Act to make miscellaneous and technical improvements relating to cash management, gender-based distinctions, coverage, and other matters under the old-age, survivors, and disability insurance program; to the Committee on Ways and Means.

By Mr. ROSTENKOWSKI:

H. Con. Res. 439. Concurrent resolution providing for clarification of Indian tribal government in the case of Alaska Natives; considered and agreed to.

MEMORIALS

Under clause 4 of rule XXII, memorials were presented and referred as follow:

[*December 21 (legislative day, December 19), 1982*]

520. By the Speaker. Memorial of the Legislature of the State of Indiana, relative to the Amtrak Cincinnati-Indianapolis rail line; to the Committee on Energy and Commerce.

521. Also, memorial of the Legislature of the State of Indiana, relative to authorization of a boat marina within the Indiana Dunes National Lakeshore to be named "The Adam Benjamin, Jr., Memorial Marina"; to the Committee on Interior and Insular Affairs.

522. Also, memorial of the voters of the State of New Jersey, relative to nuclear arms freeze; jointly, to the Committees on Armed Services and Foreign Affairs.

H.R. 4484: Mr. HUGHES, Mr. EMERY, Mr. FORD of Tennessee, Mr. BADHAM, Mr. QUILLEN, Mr. TAUZIN, Mr. MINETA, Mr. FOGLIETTA, Mr. DYMALLY, Mr. PEPPER, Mr. DE LA GARZA, and Mr. OXLEY.

H.R. 6916: Mr. DYSON.

H.R. 6928: Mr. OBERSTAR and Mr. RATCHFORD.

H.R. 7309: Mr. GRAY.

H.R. 7321: Mr. SENSENBRENNER and Mr. GILMAN.

H.R. 7362: Mr. SMITH of New Jersey, Mr. MATSUI, Mr. BLILEY, Mr. STOKES, Mr. WILLIAM J. COYNE, Mr. GONZALEZ, Mr. WYLIE, Mr. STARK, Mr. PEPPER, Mr. SHAMANSKY, Mr. ROSENTHAL, Mr. LOWRY of Washington, Mrs. MARTIN of Illinois, Mr. DANIEL B. CRANE, Mr. RANGEL, Mr. D'AMOURS, Mr. SCHEUER, Mr. WASHINGTON, Mr. GOODLING, Mr. RUSSO, Mr. ROE, Mr. FOGLIETTA, Mr. REGULA, and Mr. MINISH.

H.R. 7379: Mr. BEDELL and Mr. BEREUTER.

H.J. Res. 420: Mr. LONG of Maryland.

H.J. Res. 585: Mr. SIMON and Mr. WYLIE.

H. Res. 606: Mr. ROE.

PETITIONS, ETC.

Under clause 1 of rule XXII,

[*December 21 (legislative day, December 19), 1982*]

681. The SPEAKER presented a petition of the Western States Land Commissioners Association, relative to H.R. 5121 and S. 2305, natural resource royalties on Federal lands; which was referred to the Committee on Interior and Insular Affairs.

MESSAGES FROM THE SENATE

Pursuant to the permission granted in the Rules of the House of Representatives, the Clerk received the following messages from the Secretary of the Senate:

On December 22, 1982:

That the Senate agrees to the reports of the committees of conference on the disa-

greeing votes of the two Houses on the amendments of the Senate to the bills H.R. 4566, H.R. 5470, H.R. 6065, H.R. 6094, and H.R. 7093.

That the Senate passed without amendment H.R. 7406.

On December 23, 1982:

That the Senate agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill H.R. 6211.

That the Senate passed without amendment H.R. 4568, H.R. 5027, H.R. 6519, H.R. 7410, House Joint Resolution 630, and House Concurrent Resolution 439.

ENROLLED BILLS SIGNED AFTER SINE DIE ADJOURNMENT

Mr. HAWKINS, from the Committee on House Administration, reported that that committee had examined and found truly enrolled bills of the House of the following titles, which were thereupon signed by the Speaker:

On December 22, 1982:

H.R. 2330. An act to authorize appropriations to the Nuclear Regulatory Commission in accordance with section 261 of the Atomic Energy Act of 1954, as amended and section 305 of the Energy Reorganization Act of 1974, as amended, and for other purposes;

Mr. HOWARD: Committee on Public Works and Transportation. Report on summary of activities of the Committee on Public Works and Transportation during the 97th Congress (Rept. No. 97-1013). Referred to the Committee of the Whole House on the State of the Union.

SENATE ENROLLED BILLS AND JOINT RESOLUTIONS SIGNED AFTER SINE DIE ADJOURNMENT

The SPEAKER announced his signature to enrolled bills and joint resolutions of the Senate of the following titles:

S. 503. An act to authorize the purchase, sale, and exchange of lands by Indian tribes and by the Devils Lake Sioux Tribe of the Devils Lake Sioux Reservation of North Dakota specifically, and for other purposes;

S. 705. An act to authorize the Secretary of Agriculture to convey certain National Forest System lands, and for other purposes;

S. 1540. An act to revise the boundaries of the Saratoga National Historical Park in the State of New York, and for other purposes;

S. 2273. An act to amend the Earthquake Hazards Reduction Act of 1977 to extend authorizations of appropriations, and for other purposes;

S. 2863. An act to amend title 28 to provide protection to all jurors in Federal cases to clarify the compensation of attorneys for jurors in protecting their employment rights, and authorizing the service of jury summonses by ordinary mail;

S. 3105. An act to modify the judicial districts of West Virginia, and for other purposes;

S.J. Res. 101. Joint resolution designating "National High School Activities Week";

S.J. Res. 240. Joint resolution to authorize and request the President to designate the week of January 16, 1983, through January 22, 1983, as "National Jaycee Week";

S.J. Res. 258. Joint resolution to authorize and request the President to designate the month of December 1982 as "National Closed-Captioned Television Month";

S.J. Res. 260. Joint resolution to designate the period commencing January 1, 1983, ending December 31, 1983, as the "Tricentennial Anniversary Year of German Settlement in American";

S.J. Res. 264. Joint resolution to designate the week of March 13, 1983, through March 19, 1983, as "National Children and Television Week"; and

S.J. Res. 271. Joint resolution to make technical corrections in certain banking and related statutes.

ENROLLED BILLS AND JOINT RESOLUTIONS SIGNED AFTER SINE DIE ADJOURNMENT

Mr. HAWKINS, from the Committee on House Administration, reported that that committee had examined and found truly enrolled bills and joint resolutions of the House of the following titles, which were thereupon signed by the Speaker:

H.R. 9. An act to designate components of the National Wilderness Preservation System in the State of Florida;

H.R. 2475. An act to modify a withdrawal of certain lands in Mono County, Calif., to facilitate an exchange for certain other lands in Mono County, Calif., and for other purposes;

H.R. 2481. An act for the relief of Cynthia Gambon Rabena;

H.R. 3420. An act making technical corrections to the Natural Gas Pipeline Safety Act of 1968 and the Hazardous Liquid Pipeline Safety Act of 1979, and for other purposes;

H.R. 3731. An act to amend the act of October 19, 1973 (87 Stat. 466), relating to the use or distribution of certain judgment funds awarded by the Indian Claims Commission or the Court of Claims;

H.R. 3809. An act to provide for the development of repositories for the disposal of high-level radioactive waste and spent nuclear fuel, to establish a program of research, development, and demonstration regarding the disposal of high-level radioactive waste and spent nuclear fuel, and for other purposes;

H.R. 3963. An act to amend the Contract Service for Drug Dependent Federal Offenders Act of 1978 to extend the periods for which funds are authorized to be appropriated;

H.R. 4001. An act to authorize the exchange of certain land held in trust by the United States for the Navajo Tribe, and for other purposes;

H.R. 4350. An act for the relief of Arthur J. Grauf;

H.R. 4491. An act to exempt the U.S. Capitol Historical Society from certain taxes;

H.R. 4496. An act to grant Federal recognition to the Texas Band of Kickapoo Indians; to clarify the status of the members of the band; to provide trust lands to the band, and for other purposes;

H.R. 4566. An act to reduce certain duties, to suspend temporarily certain duties, to extend certain existing suspensions of duties, and for other purposes;

H.R. 4568. An act to direct the Secretary of the Interior to release on behalf of the United States certain restrictions contained in a previous conveyance of land to the city of Albuquerque, N. Mex. and for other purposes;

H.R. 4746. An act for the relief of Kin Chi Eng Sims;

H.R. 5002. An act to improve fishery conservation and management;

H.R. 5027. An act to designate the building known as the U.S. Post Office and Courthouse in Norfolk, Va., as the "Walker E. Hoffman U.S. Courthouse";

H.R. 5029. An act to designate the Federal building in Fresno, Calif., as the "B. F. Sisk Federal Building";

H.R. 5121. An act to insure that all oil and gas originated on the public lands and on the Outer Continental Shelf are properly accounted for under the direction of the Secretary of the Interior, and for other purposes;

H.R. 5161. An act to designate certain lands in the Monongahela National Forest, W.Va., as wilderness; and to designate management of certain lands for uses other than wilderness;

H.R. 5447. An act to extend the Commodity Exchange Act, and for other purposes;

H.R. 5456. An act to amend the Plant Quarantine Act of August 20, 1912, as amended, to eliminate certain unnecessary regulatory requirements;

H.R. 5470. An act to amend the Internal Revenue Code of 1954 with respect to the tax treatment of periodic payments for damages received on account of personal injury or sickness, and for other purposes;

H.R. 5633. An act for the relief of Dana Braford Baretto;

H.R. 5826. An act to provide for the reinstatement and validation of U.S. oil and gas lease numbered W-24153;

H.R. 5916. An act to declare certain Federal lands acquired for the benefit of Indians to be held in trust of the tribes of such Indians;

H.R. 6056. An act to make technical corrections in the Economic Recovery Tax Act of 1981 and certain other recent tax legislation;

H.R. 6094. An act to authorize appropriations for the U.S. International Trade Commission, the U.S. Customs Service, and the Office of the U.S. Trade Representative for fiscal year 1983, and for other purposes;

H.R. 6211. An act to authorize appropriations for construction of certain highways in accordance with title 23, United States Code, for highway safety, for mass transportation in urban and rural areas, and for other purposes;

H.R. 6243. An act to provide for the distribution of Warm Springs judgment funds awarded in docket numbered 198 before the Indian Claims Commission, and for other purposes;

H.R. 6419. An act to direct the Secretary of the Interior to release certain conditions contained in a patent concerning certain land conveyed by the United States to Eastern Washington University;

H.R. 6519. An act to amend title 5, United States Code, to allow student interns of the Internal Revenue Service to have access to certain information required by such students in the performance of their official duties;

H.R. 6538. An act to designate the Federal building in Lima, Ohio, as the "Tennyson Guyer Federal Building";

H.R. 6679. An act to authorize the Secretary of Agriculture to assess civil penalties with respect to violations of certain acts relating to the prevention of the introduction and dissemination into the United States of plant pests, plant diseases, and livestock and poultry diseases, to increase the amount of criminal fines which may be imposed with respect to violations of such act, and for other purposes;

H.R. 6993. An act to revise codify, and enact without substantive change certain general and permanent laws related to transportation as subtitle I and chapter 31 of subtitle II of title 49, United States Code, "Transportation";

H.R. 7005. An act to amend the Federal seed Act with respect to prohibitions relating to interstate commerce in seed mixture intended for lawn and turf purposes and prohibitions relating to importations of certain seeds, and for other purposes;

H.R. 7093. An act to amend the Internal Revenue Code of 1954 to reduce the rate of certain taxes paid to the Virgin Islands on Virgin Islands source income, to amend the Social Security Act to provide for a temporary period that payment of disability benefits may continue through the hearing stage of the appeals process, and for other purposes;

H.R. 7102. An act to provide for the protection of migrant and seasonal agricultural workers and for the registration of contractors of migrant and seasonal agricultural labor and for other purposes;

H.R. 7143. An act to amend the Foreign Assistance Act of 1961 to extend for an additional year the agricultural and productive credit and self-help community development programs;

H.R. 7154. An act to amend the Federal Rules of Civil Procedure with respect to certain service of process by mail, and for other purposes;

H.R. 7159. An act to amend the Federal Water Pollution Control Act to allow modifications of certain effluent limitations relating to biochemical oxygen demand and pH;

H.R. 7316. An act to establish the national park system visitor facilities fund, and for other purposes;

H.R. 7336. An act to make certain technical amendments to improve implementation of the Education Consolidation and Improvement Act of 1981;

H.R. 7378. An act to codify without substantive change recent laws related to money and finance and to improve the United States Code;

H.R. 7406. An act to designate a certain Federal building in Springfield, Ill., the "Paul Findley Building";

H.R. 7410. An act to amend title 13, United States Code, to transfer responsibility for the quarterly financial report from the Federal Trade Commission to the Secretary of Commerce, and for other purposes;

H.R. 7420. An act to name the fish hatchery at the Warm Springs Dam component of the Russian River, Dry Creek, Calif. project at the "Don H. Clausen Fish Hatchery";

H.R. 7423. An act to recognize the organization known as Former Members of Congress;

H.J. Res. 459. Joint resolution authorizing the President to proclaim May 13, 1983, as "American Indian Day";

H.J. Res. 619. Joint resolution designating January 17, 1983, as "Public Employees' Appreciation Day";

H.J. Res. 630. Joint resolution to commemorate the 150th anniversary of the founding of Greene County, Mo.; and

H.J. Res. 635. Joint resolution establishing the dates for submission of the budget and economic report.

BILLS AND JOINT RESOLUTIONS APPROVED AFTER SINE DIE ADJOURNMENT

The PRESIDENT, subsequent to the sine die adjournment of the Congress, notified the Clerk of the House that on the following dates he had approved and signed bills and joint resolutions of the House of the following titles:

December 17, 1982:

H.J. Res. 595. Joint resolution designating December 11, 1982, as "Fiorello H. La Guardia Memorial Day."

December 18, 1982:

H.R. 7019. An act making appropriations for the Department of Transportation and related agencies for the fiscal year ending September 30, 1983, and for other purposes; and

H.R. 7072. An act making appropriations for Agriculture, rural development, and related agencies programs for the fiscal year ending September 30, 1983, and for other purposes.

December 20, 1982:

H.R. 5795. An act to provide for the use and distribution of the funds awarded to the Shawnee Tribe of Indians in dockets 64, 335, and 338 by the Indian Claims Commission and the docket 64-A by the U.S. Court of Claims, and for other purposes; and

H.R. 6403. An act to provide for the use and distribution of funds to the Wyandot Tribe of Indians in docket 139 before the Indian Claims Commission and docket 141 before the U.S. Court of Claims, and for other purposes.

December 21, 1982:

H.R. 5553. An act to provide for the use and disposition of Miama Indians judgment funds in dockets 124-B and 254 before the U.S. Court of Claims, and for other purposes;

H.R. 6005. An act to discontinue or amend certain requirements for agency reports to Congress; and

H.J. Res. 631. Joint resolution making further continuing appropriations and providing for productive employment for the fiscal year 1983, and for other purposes.

December 22, 1982:

H.R. 6417. An act to amend Public Law 96-432 relating to the U.S. Capitol Grounds;

H.R. 7144. An act making appropriations for the government of the District of Columbia and other activities chargeable in whole or in part against the revenues of said District for the fiscal year ending September 30, 1983, and for other purposes;

December 23, 1982:

H.R. 2329. An act conferring jurisdiction on certain courts of the United States to hear and render judgment in connection with certain claims of the Cherokee Nation of Oklahoma; and

H.R. 4364. An act to declare that the United States holds in trust for the Pascua Yaqui Tribe of Arizona certain lands in Pima County, Ariz.

December 29, 1982:

H.R. 3942. An act to amend the Commercial Fisheries Research and Development Act of 1964;

H.R. 6204. An act to provide for appointment and authority of the Supreme Court Police, and for other purposes;

H.R. 6588. An act to provide for Federal recognition of the Cow Creek Band of Umpqua Tribe of Indians, to institute for such tribe those Federal services provided to Indians who are recognized by the Federal Government and who receive such services because of the Federal Trust responsibility, and for other purposes; and

H.R. 6758. An act to authorize the sale of defense articles to U.S. companies for incorporation into end items to be sold to friendly foreign countries.

December 30, 1982:

H.R. 7356. An act making appropriations for the Department of the Interior and related agencies for the fiscal year ending September 30, 1983, and for other purposes.

December 31, 1982:

H.R. 1952. An act authorizing appropriations to carry out conservation programs on military reservations and public lands during fiscal years 1983, 1984, and 1985, and for other purposes;

H.R. 5204. An act to authorize and direct the Secretary of the Interior to accept certain lands for the benefit of the Sycuan Band of Mission Indians;

H.R. 6946. An act to amend title 18 of the United States Code to provide penalties for certain false identification related crimes;

H.R. 7155. An act to settle certain Indian land claims within the State of Florida, and for other purposes; and

H.R. 7377. An act to designate the Lakeview Lake project, Mountain Creek, Tex., as the "Joe Pool Lake."

January 3, 1982:

H.R. 2520 An act for the relief of Emanuel F. Lenkersdorf.

January 4, 1983:

H.R. 2330. An act to authorize appropriations to the Nuclear Regulatory Commission in accordance with section 261 of the Atomic Energy Act of 1954, as amended, and section 305 of the Energy Reorganization Act of 1974, as amended, and for other purposes;

H.R. 2481. An act for the relief of Cynthia Gambon Rabena;

H.R. 5238. An act to amend the Federal Food, Drug, and Cosmetic Act to facilitate the development of drugs for rare diseases and conditions, and for other purposes;

H.R. 6120. An act to reauthorize the Deep Seabed Hard Mineral Resources Act for fiscal years 1983 and 1984;

H.R. 6254. An act to amend title 3, United States Code, to clarify the function of the U.S. Secret Service Uniformed Division with respect to certain foreign diplomatic missions in the United States, and for other purposes;

H.R. 6804. An act to provide subsistence allowances for members of the Coast Guard officer candidate program, and for other purposes;

H.R. 7406. An act to designate a certain Federal building in Springfield, Ill., the "Paul Findley Building";

H.R. 7420. An act to name the fish hatchery at the Warm Springs Dam component of the Russian River, Dry Creek, California, project as the Don H. Clausen Fish Hatchery;

H.J. Res. 619. Joint resolution designating January 17, 1983, as "Public Employees' Appreciation Day"; and

H.J. Res. 630. Joint resolution to commemorate the 150th anniversary of the funding of Greene County, Mo.

January 6, 1983:

H.R. 4746. An act for the relief of Kin Chi Eng Sims;

H.R. 5633. An act for the relief of Dana Braford Baretto; and

H.R. 6211. An act to authorize appropriations for construction of certain highways in accordance with title 23, United States Code, for highway safety, for mass transportation in urban and rural areas, and for other purposes.

January 7, 1983:

H.R. 3809. An act to provide for the development of repositories for the disposal of high-level radioactive waste and spent nuclear fuel, to establish a program of research, development, and demonstration regarding the disposal of high-level radioactive waste and spent nuclear fuel, and for other purposes.

January 8, 1983:

H.R. 2475. An act to modify a withdrawal of certain lands in Mono County, Calif., to facilitate an exchange for certain other lands in Mono County, Calif., and for other purposes;

H.R. 4001. An act to authorize the exchange of certain land held in trust by the United States for the Navajo Tribe, and for other purposes;

H.R. 4496. An act to grant Federal recognition to the Texas Band of Kickappo Indians; to clarify the status of the members of the band; to provide trust lands to the band, and for other purposes;

H.R. 4568. An act to direct the Secretary of the Interior to release on behalf of the United States certain restrictions contained in a previous conveyance of land to the city of Albuquerque, N. Mex., and for other purposes;

H.R. 5027. An act to designate the building known as the United States Post Office and Courthouse in Norfolk, Va., as the "Walter E. Hoffman U.S. Courthouse";

H.R. 5456. An act to amend the Plant Quarantine Act of August 20, 1912, as amended, to eliminate certain unnecessary regulatory requirements;

H.R. 5826. An act to provide for the reinstatement and validation of United States oil and gas lease numbered W-24153;

H.R. 5916. An act to declare certain Federal lands acquired for the benefit of Indians to be held in trust for the Tribes of such Indians;

H.R. 6243. An act to provide for the distribution of Warm Springs judgment funds awarded in docket numbered 198 before the Indian Claims Commission, and for other purposes;

H.R. 6419. An act to direct the Secretary of the Interior to release certain conditions contained in a patent concerning certain land conveyed by the United States to Eastern Washington University;

H.R. 6519. An act to amend title 5, United States Code, to allow student interns of the Internal Revenue Service to have access to certain information required by such students in the performance of their official duties;

H.R. 7005. An act to amend the Federal Seed Act with respect to prohibitions relating to interstate commerce in seed mixtures intended for lawn and turf purposes and prohibitions relating to importation of certain seeds, and for other purposes;

H.R. 7143. An act to amend the Foreign Assistance Act of 1961 to extend for an additional year the Agricultural and Productive Credit and Self-Help Community Development Programs;

H.R. 7159. An act to amend the Federal Water Pollution Control Act to allow modifications of certain effluent limitations relating to biochemical oxygen demand and pH;

H.R. 7316. An act to establish the National Park System Visitor Facilities Fund, and for other purposes; and

H.R. 7423. An act to recognize the organization known as Former Members of Congress.

Janurary 11, 1983:

H.R. 5447. An act to extend the Commodity Exchange Act, and for other purposes.

January 12, 1983:

H.R. 3731. An act to amend the act of October 19, 1973 (87 Stat. 466), relating to the use or distribution of certain judgment funds awarded by the Indian Claims Commission or the Court of Claims;

H.R. 4350. An act for the relief of Arthur J. Grauf;

H.R. 4491. An act to exempt the U.S. Capitol Historical Society from certain taxes;

H.R. 4566. An act to reduce certain duties, to suspend temporarily certain duties, to extend certain existing suspensions of duties, and for other purposes;

H.R. 5002. An act to improve fishery conservation and management;

H.R. 5029. An act to designate the Federal Building in Fresno, Calif., as the "B. F. Sisk Federal Building";

H.R. 5121. An act to insure that all oil and gas originated on the public lands and on the Outer Continental Shelf are properly accounted for under the direction of the Secretary of the Interior, and for other purposes;

H.R. 6056. An act to make technical corrections in the Economic Recovery Tax Act, of 1981 and certain other recent tax legislation;

H.R. 6094. An act to authorize appropriations for the U.S. International Trade Commission, the U.S. Customs Service, and the Office of the U.S. Trade Representative for fiscal year 1983, and for other purposes;

H.R. 6679. An act to authorize the Secretary of Agriculture to assess civil penalties with respect to violations of certain acts relating to the prevention of the introduction and dissemination into the United States of plant pests, plant diseases, and livestock and poultry diseases, to increase the amount of criminal fines which may be imposed with respect to violations of such acts, and for other purposes;

H.R. 6693. An act to revise, codify and enact without substantive change, certain general and permanent laws related to transportation as subtitle I and chapter 31 of subtitle II of title 49, United States Code, "Transportation";

H.R. 7093. An act to amend the Internal Revenue Code of 1954 to reduce the rate of certain taxes paid to the Virgin Islands on Virgin Islands source income, to amend the Social Security Act to provide for a temporary period that payment of disability benefits may continue through the hearing stage of the appeals process, and for other purposes;

H.R. 7154. An act to amend Federal Rules of Civil Procedure with respect to certain service of process by mail, and for other purposes;

H.R. 7378. An act to codify without substantive change recent laws related to money and finance and to improve the United States Code;

H.R. 7410. An act to amend title 13, United States Code, to transfer responsibility for the quarterly financial report from the Federal Trade Commission to the Secretary of Commerce, and for other purposes; and

H.J. Res. 459. Joint resolution authorizing the President to proclaim May 13, 1983, as "American Indian Day."

January 13, 1983:

H.R. 5161. An act to designate certain lands in the Monongahela National Forest, W.Va., as wilderness; and to designate management of certain lands for uses other than wilderness.

January 14, 1983:

H.R. 3420. An act making technical corrections to the Natural Gas Pipeline Safety Act of 1968 and the Hazardous Liquid Pipeline Safety Act of 1979, and for other purposes;

H.R. 5470. An act to amend the Internal Revenue Code of 1954 with respect to the tax treatment of periodic payments for damages received on account of personal injury or sickness, and for other purposes;

H.R. 6548. An act to designate the Federal Building in Lima, Ohio, as the "Tennyson Guyer Federal Building";

H.R. 7102. An act to provide for the protection of migrant and seasonal agricultural workers and for the registration of contractors of migrant and seasonal agricultural labor and for other purposes; and

H.J. Res. 635. Joint resolution establishing the dates for submission of the Budget and Economic Report.

BILLS DISAPPROVED AFTER SINE DIE ADJOURNMENT

The PRESIDENT announced his disapproval of the following bills with memorandums as follows:

H.R. 5858—MEMORANDUM OF DISAPPROVAL

I am withholding my approval of H.R. 5858, a bill for the relief of three silver dealers who suffered business losses as a result of their short market positions resulting from a decision by the Department of the Treasury to terminate the sale of Government-owned silver on May 18, 1967, without honoring the dealers' telephonic requests made that day to purchase almost seven million ounces of silver.

These claims were the subject of very extensive proceedings before the former United States Court of Claims, which on May 18, 1967, held that no legally binding contracts to purchase the silver had been established by these claimants, because the claimants (1) were clearly on notice that the Treasury's involvement in the silver market was altogether inseparable from monetary policy, (2) had reason to expect that Treasury would abandon the marketplace just as soon as doing so would serve monetary policy, and (3) knew that Government silver sales would end soon in view of the published report that Treasury's supply of silver was being rapidly depleted. (*Primary Metal & Mineral Corp.* v. *United States*, 556 F.2d 507 (Ct.Cl. 1977).)

In parallel proceedings before a trial commissioner of the same court pursuant to a Congressional Reference proceeding under 28 U.S.C. Sections 1494 and 2509 (1970), the trial commissioner had earlier found that the same dealers had valid breach of contract claims, even though he, too, found that they were well aware of the potential for a sudden termination of the sales program. After the court had rejected his analysis, he nevertheless concluded that the claimants had "equitable" claims sufficient to justify private relief legislation merely because (in his opinion) the Court of Claims was wrong in disagreeing with his legal theory. In its report to the Congress, a review panel of three trial commissioners, without explaining its reasoning, stated that it agreed with this unprecedented rationale for the existence of an equitable claim against the Government.

To permit the silver dealers covered by H.R. 5858 to recover over $3.3 million without any findings that they received inequitable treatment from the Government, in the face of the unappealed holding of the Court of Claims that they had no legal claims against the Treasury, would establish an undesirable precedent for payment of a host of claims to claimants who may have encountered hardships due to business decisions made with full awareness of the risks that a change in a Government property disposal program might entail. No doubt many similarly situated individuals have had their expectations frustrated in the past by similar program changes. To single out these three claimants for special relief would be unjust to the others, while payment to all for frustrated expectations would result in an unacceptable interference with the Government's ability to decisively and expeditiously respond to developments affecting vital national policies. For these reasons I find the bill unacceptable.

RONALD REAGAN.

THE WHITE HOUSE, *January 4, 1983.*

S. 2623—MEMORANDUM OF DISAPPROVAL

I am withholding my approval of S. 2623, which would amend the Tribally Controlled Community Colleges Assistance Act of 1978 and extend its authorities through 1987.

I am taking this action with reluctance, because my Administration is deeply committed to providing educational opportunities for American Indians. Education is critical to economic betterment for all elements of our society. It is an equally important aspect of increasing self-determination for American Indians. I support fully the intent of S. 2623 to improve existing Indian community college programs. My Administration is dedicated to furthering this goal. The bill which is before me, however, includes a number of provisions that are unacceptable and that do not contribute to enhancement of Indian education.

Foremost among the unacceptable provisions of this bill is section 2, which would declare the Federal government's support of tribal community colleges to be a part of its trust responsibility toward Indian tribes. College level Indian education has never been characterized in law or treaty as a trust responsibility of the Federal government, and to do so now would potentially create legal obligations and entitlements that are not clearly intended or understood. Such a declaration is wholly unnecessary to the continuation of a successful program of Federal assistance to tribally controlled community colleges.

Although the conference report on S. 2623 suggests that "Federal policy (on Indian education) should be clear and unequivocal", the enrolled bill is highly ambiguous as to the nature and extent of this new policy of trust responsibility. S. 2623 imposes what the conference report itself admits is a "very general" trust responsibility. However, neither the bill nor the report makes any attempt to define the nature or extent of that responsibility, except to suggest—in nonbinding report language—some concepts that are *not* intended. This vague nonstatutory language could be interpreted by the courts in a variety of ways. It could be read as establishing a trust relationship that creates an absolute responsibility to provide assistance to tribal colleges and Indian students regardless of need, and it could establish a highly undesirable precedent for making all Indian social service programs a part of the Federal government's "very general" trust responsibility.

Finally, section 2 would also provide that grants could be used for the improvement and expansion of physical facilities. When the program of assistance to tribally controlled community colleges was originally conceived, the Congress contemplated use of existing community facilities. To begin a major new building program when there are so many other competing tribal needs would be duplicative, unwarranted, and ill-advised under current economic conditions. Funds provided through the Bureau of Indian Affairs for the tribally controlled community colleges assistance program are for program support only, and should remain so.

Another unacceptable provision is in section 14(b) of this bill, which would subject regulations issued by the Secretary of the Interior under the program to an unconstitutional legislative veto device presently found in section 431 of the General Education Provisions Act. The Attorney General has advised me, and I agree, that two Houses of Congress cannot bind the Executive Branch by passing a concurrent resolution that is not presented to me for approval or veto. Such a provision unconstitutionally encroaches on the principle of separation of powers that is at the foundation of our government.

In addition to these strong objections, I also have serious reservations about a number of other provisions of the bill, which could significantly increase Federal expenditures in a time that demands fiscal restraint. Those reservations have been explained in reports and testimony of the Department of the Interior on the bill.

The authorities in the Tribally Controlled Community Colleges Assistance Act are not scheduled to expire until September 30, 1984, under current law. Accordingly, there will be no interruption of our current successful program activities as a result of my disapproval of S. 2623. It is my hope that Congress will reconsider legislation extending the Act early in the next session and enact a bill which both advances the program's objectives and meets the Administration's objections to S. 2623.

RONALD REAGAN.

THE WHITE HOUSE, *January 3, 1983.*

H.R. 7336—MEMORANDUM OF DISAPPROVAL

I am withholding my approval of H.R. 7336, which would make certain amendments intended to improve the implementation of the Education Consolidation and Improvement Act of 1981.

I continue to support the objectives of both Chapter 1 and Chapter 2 of the Education Consolidation and Improvement Act. However, I cannot approve H.R. 7336 because the bill makes

substantive changes to the Education Consolidation and Improvement Act that are unacceptable, as well as amendments to the legislative veto provision of the General Education Provisions Act that I believe to be an unwarranted intrusion on the Executive branch's constitutional authority.

Among the unacceptable provisions is section 17(a)(1), which would declare the Federal government's assistance to disadvantaged Indian students under ECIA Chapter 1 to be a part of its trust responsibility toward Indian tribes. This provision is the same as one included in S. 2623, the Tribally Controlled Community College Assistance Act Amendments, from which I recently withheld my approval. The provision of Federal education assistance to Indian students is not characterized in law or treaty as a trust responsibility, and has not been held by the courts to be so. As I noted in my Memorandum of Disapproval on S. 2623, to declare the provision of education to Indian students a trust responsibility would potentially create legal obligations and entitlements that are not clearly intended or understood. This provision of H.R. 7336 is unnecessary to the administration of the Chapter 1 program.

Also unacceptable is section 16(b) of H.R. 7336, which would make certain amendments to a two-House legislative veto device presently contained in section 431 of the General Education Provisions Act. The Attorney General has advised me, and I agree, that two Houses of Congress cannot bind the Executive branch by passing a concurrent resolution that is not presented to me for approval or veto.

Another objectionable provision of H.R. 7336, section 1, would require continuation under Chapter 1 of the definition of a currently migratory child that was in use under the antecedent Title I program. This requirement would prevent the Administration from focusing the limited resources available for migrant services under Chapter 1 on those children whose education is actually interrupted as a result of their migrant status.

Other amendments in the bill relating to the Education Consolidation and Improvement Act could be construed to reinstate requirements and procedures contrary to the intent of the Act to provide greater authority and flexibility for State and local educational agencies.

My disapproval of H.R. 7336 in no way reflects upon the efforts of the author of this bill, Representative William Goodling, of Pennsylvania. Mr. Goodling worked closely with the Department of Education to clarify specific weaknesses in the Education Consolidation and Improvement Act and to reflect that effort in the House report language. Despite his efforts, there are substantive provisions in H.R. 7336 that do not eliminate the ambiguities in the language of the existing ECIA and seem to restore undesirable complexity to the administration of ECIA programs.

Although the bill would make several desirable changes to the Education Consolidation and Improvement Act, the objectionable provisions far outweigh any of its benefits.

For these reasons, I cannot approve the bill.

RONALD REAGAN.

THE WHITE HOUSE, *January 12, 1983.*

H.R. 9 MEMORANDUM OF DISAPPROVAL

After careful consideration, I have determined, for the reasons stated below, to withhold my approval of H.R. 9. I regret that this action is necessary, because I support the designation of additions to the National Wilderness Preservation System in the State of Florida, as recommended by the Administration and set forth in this bill. My Administration has proposed almost two million acres of land for designation as wilderness and the unique natural habitat designated in H.R. 9 would be particularly valuable additions to the national wilderness system.

Although H.R. 9 is intended to resolve an issue that has been in contention during three prior Administrations, it does so in a way that is unnecessarily costly to the Federal taxpayer. Because of administrative actions taken earlier this week by the Secretary of the Interior, my disapproval of this legislation will not have the effect of permitting phosphate mining to proceed in the Osceola National Forest. I do not object to legislative efforts to preclude phosphate mining in the Osceola National Forest. I do object, however, to the provisions of this bill that would vest previously contingent property rights in certain mining companies. This could require the Federal government to pay those mining companies as much as $200 million for those property rights—rights that, absent this legislation, might not otherwise have existed.

Specifically, this bill attempts to convey to several mining companies the rights to, and value from, 41 preference right lease applications for deposits of phosphates underlying the Osceola National Forest. Under present law, these mining companies are entitled to these mining leases only if the Secretary of the Interior determines that the phosphate deposits underlying this land are valuable deposits. H.R. 9 would establish property rights to the lease in specific companies by requiring the Secretary of the Interior, and ultimately the courts, to judge the lease applications without reference to the cost of compliance with current applicable statutory and regulatory requirements for environmental protection. Such requirements include those established under the National Environmental Policy Act, the Clean Water Act, and the Clean Air Act. Hence, under this legislation, the determination of whether these phosphate deposits are "valuable" would not take into consideration the cost of returning the Osceola National Forest lands to their natural state as required by current law.

This Administration is opposed to a policy of conveying interests in public resources by waiving applicable statutory requirements that are designed to protect the environment.

Moreover, having required the mineral rights to be conveyed to the companies by the Secretary of the Interior, this bill would then prohibit mining on the leases and require the Federal government to purchase the conveyed lease rights back from the companies. Thus, the bill would, in effect, force Federal purchase of rights that under current law would remain in Federal ownership in the first place.

Analyses available to the Department of the Interior indicate that no current technology is capable of returning the mined lands to the reclamation standards required by current Federal laws and regulations. The Department of the Interior is faced with an administrative record regarding restoration that demonstrates that the applicant mining companies cannot meet the valuable deposit test required by current law for lease issuance. Consequently, the Secretary of the Interior has advised me that, based on that administrative record, mining should not now take place in the Osceola National Forest, and that he has rejected the preference right lease applications.

However, because H.R. 9 specifies a less strenuous standard than current law, the lease applicants would most likely be found to have met the valuable deposit test were this measure to become law. The Department of the Interior would then have to determine the fair market value of the interests and extend monetary credits to the lease applicants. Further, though the bill provides that the fair market value is to be determined by taking into account all environmental laws, any Secretarial action valuing these leases in a way adverse to the applicants' expectations would likely result in costly litigation, and the possible recovery in the United States Claims Court of payments to these companies for loss of their "rights" in public resources to which they would not be entitled absent this legislation.

The administrative decision process, necessary under current law to resolve this issue, is being brought to conclusion under my Administration. To the extent that further litigation is entered into on this issue, it should be

decided under current law applicable to all similar cases.

RONALD REAGAN.

THE WHITE HOUSE, *January 14, 1983.*

H.R. 3963—MEMORANDUM OF DISAPPROVAL

I am withholding my approval of H.R. 3963, a bill concerning criminal law matters, because its disadvantages far outweigh any intended benefits.

In late September 1982, the Senate overwhelmingly approved a major crime bill by a vote of 95 to 1. That measure, the Violent Crime and Drug Enforcement Improvements Act of 1982 (S. 2572), would have resulted in urgently needed reforms in Federal bail laws to put an end to our "revolving door" system of justice, comprehensive reforms in Federal forfeiture laws to strip away the enormous assets and profits of narcotics traffickers and organized crime syndicates, and sweeping sentencing reforms to insure more uniform, determinate prison sentences for those convicted of Federal crimes. That major crime bill also contained other criminal law reforms. I strongly supported the principal elements of the Violent Crime and Drug Enforcement Improvements Act, especially the bail, sentencing, and forfeiture provisions.

The House of Representatives failed to approve this measure. It adopted a miscellaneous assortment of criminal justice proposals, H.R. 3963, which was approved in the waning hours of the 97th Congress. Although some elements of the House-initiated bill are good, other provisions are misguided or seriously flawed, possibly even unconstitutional. While its provisions on forfeiture of criminal assets and profits fall short of what the Administration proposed, they are clearly desirable. Had they been presented to me as a separate measure, I would have been pleased to give my approval. But H.R. 3963 does not deal with bail reform, nor does it address sentencing reform. Both are subjects long overdue for congressional action.

In addition to its failure to address some of the most serious problems facing Federal law enforcement, this "mini-crime bill" would in several respects hamper existing enforcement activity. I am particularly concerned about its adverse impact on our efforts to combat drug abuse.

The Act would create a drug director and a new bureaucracy within the Executive Branch with the power to coordinate and direct all domestic and international Federal drug efforts, including law enforcement operations. The creation of another layer of bureaucracy within the Executive Branch would produce friction, disrupt effective law enforcement, and could threaten the integrity of criminal investigations and prosecutions—the very opposite of what its proponents apparently intend.

The seriousness of this threat is underscored by the overwhelming opposition to this provision by the Federal law enforcement community as well as by such groups as the International Association of Chiefs of Police and the National Association of Attorney's General. The so-called "drug Czar" provision was enacted hastily without thoughtful debate and without benefit of any hearings. Although its aim—with which I am in full agreement—is to promote coordination, this can be and is being achieved through existing administrative structures.

Upon taking office, I directed the Attorney General and other senior officials of the Administration to improve the coordination and efficiency of Federal law enforcement efforts, with particular emphasis on drug-related crime. This has been accomplished through the establishment of the Cabinet Council on Legal Policy, which is chaired by the Attorney General and whose membership includes all Cabinet officers with responsibility for narcotics law enforcement. Working through the Cabinet Council, the White House Office on Drug Policy is an integral part of the process by which a comprehensive and coordinated narcotics enforcement policy is carried out.

I am pleased with the results of this process, which last Fall led to the creation of a nationwide task force effort to combat organized crime and narcotics trafficking. The war on crime and drugs does not need more bureaucracy in Washington. It does need more action in the field, and that is where my Administration will focus its efforts.

H.R. 3963 would also authorize the Federal prosecution of an armed robber or burglar who has twice been convicted in State court. This provision includes an unworkable and possibly unconstitutional restraint upon Federal prosecutions in this area, by allowing a State or local prosecutor to veto any Federal prosecution under his or her authority, even if the Attorney General had approved the prosecution. Such a restraint on Federal prosecutorial discretion and the delegation of Executive responsibility it entails raise grave constitutional and practical concerns. It would, for example, surely increase friction among Federal, State, and local prosecutors at a time when we are doing so much to decrease it.

Other provisions of H.R. 3963 are also defective. For example, the provision that expands Federal jurisdiction whenever food, drugs, or other products are tampered with, an expansion that I strongly support, was drafted to include tampering that occurs in an injured consumer's own home. It also fails to distinguish between tampering that results in injury and tampering that results in death. These are, however, essentially technical matters which might have been overcome but for the press of time in the closing days of Congress. I share the widespread public desire for new legislation on tampering and will work with the new Congress to produce an acceptable bill on that subject.

My Administration has proposed significant legislation to strengthen law enforcement and restore the balance between the forces of law and the forces of crime. Changes in sentencing, bail laws, the exclusionary rule, the insanity defense, and other substantive reforms in criminal law were not passed by the 97th Congress. Such reforms, if enacted, could make a real difference in the quality of justice in this country.

It would have given me great pleasure to be able to approve substantive criminal justice legislation. I completely support some of the features of H.R. 3963, such as the Federal Intelligence Personnel Protection Act. Others I agree with in principle. But the disadvantages of this bill greatly outweigh its benefits. I look forward to approving legislation that does not contain the serious detriments of the present bill, and my Administration will work closely with Chairman THURMOND and Chairman RODINO to secure passage of substantive criminal justice reforms.

RONALD REAGAN.

THE WHITE HOUSE, *January 14, 1983.*

EXTENSIONS OF REMARKS

WILSON RILES

HON. JERRY LEWIS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 16, 1982

● Mr. LEWIS. Mr. Speaker, it would seem difficult to add much to the accounts which my colleagues have already given. Wilson Riles is, however, a most remarkable man and no description of his achievements and life would be complete without some mention of the man and his vision.

Wilson Riles believes in a system of education that embraces all children and every child; a system that meets common and unique needs alike. Riles' programs are designed to accommodate the students rather than force fit students into an arbitrary structure. Equity, choice, and equality must be assured to all in Riles' view.

Wilson Riles believes that those closest to the learning child are in the best position to effect change and assess educational progress. Accordingly, Riles believes that as much discretion and authority as possible should be left to the school site and its primary participants—teachers, parents, site administrators, and even older students.

Wilson Riles believes that leadership is best realized through the building of consensus; through coalition. Educational leadership is exercised, and educational change brought about at school, district or State levels when all parties with an interest in education cooperate in pursuit of goals that are consensually set and mutually beneficial.

Finally, Wilson Riles believes that education is society's best investment in the future and, like any investment, Riles believes that handsome future returns can only be assured through appropriate current support and resources.

As we have heard, this extraordinary man has been uncommonly successful in bringing his dreams into reality. During his incumbency as California's educational leader, Wilson Riles has:

Proposed and obtained legislation that ensures each child in California Public Schools will achieve basic competency in reading, arithmetic and language by the third grade.

Led coalitions to obtain the passage of three major school finance bills.

Developed a plan in response to the Serrano decision that brought equity to all districts alike, rich or poor.

Formed a coalition that enabled school districts to deal in an orderly way with the 10 percent cuts imposed by proposition 13.

Built the finest schools in the country for deaf and blind students.

Created State management assistance teams to assist local school districts in improving their administrative practices.

Streamlined the textbook adoption process.

Advocated achievement standards that reflect specific competencies and skills, rather than numbers of courses and hours of attendance.

Established minimum competency requirements for all students graduating from all California public schools.

Strengthened admission requirements to state universities and colleges.

Someday I hope to ask Wilson Riles how he managed to do all of these things while maintaining a happy marriage for over 40 years to an equally remarkable lady, Louise Riles. Together, Wilson and Louise have raised four children who are now well established with families of their own.

I would like to close my comments with a quote from Wilson Riles that seems to me to reflect his personal philosophy very well. When asked whether American education had perhaps passed its zenith in recent years, Riles replied, "Excellence is a journey, not a destination."●

WILSON RILES

HON. NORMAN Y. MINETA

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday , December 16, 1982

● Mr. MINETA. Mr. Speaker, I would like to join my colleagues in paying tribute to Wilson Riles whose accomplishments have extended well beyond the traditional territory of educational policy as well as the borders of California.

During the course of his illustrious career, Wilson Riles has been appointed to the National Council of Educational Research by three Presidents. He has served on no less than 34 national and statewide boards. Commissions and task forces.

Most of his service has related to educational concerns, but Wilson Riles has also served with distinction in the effort to expand and extend human rights.

A long time member of the NAACP, Wilson Riles was afforded the association's highest honor in 1973 when he was awarded the Springarn Medal.

In 1978, Riles was awarded the Robert Maynard Hutchins Award by the Encyclopedia Britannica, and the Distinguished Service Award by the Harvard Club of San Francisco.

In the early stages of his career, Wilson Riles served as Southwest regional secretary for the Fellowship of Reconciliation (FOR), a Quaker organization tha worked with religious leaders and community groups for non-violent social change.

Riles has come to the attention of FOR leadership when, as head of the all black Dunbar School in Flagstaff after World War II he resurrected a defunct chapter of the NAACP that successfully desegregated local movie theaters. In 1952, he was a leader in the ultimately successful efforts to desegregate Arizona's schools.

Riles' FOR experience, based in Los Angeles, took him throughout the Southwest and brought him to the attention of the Rev. Dr. Martin Luther King, who offered him a top post in the Southern Christian Leadership Conference, Riles declined.

Instead, he took a California civil service test and placed among the top three contenders—the only black to do so. In 1958, he became the first black consultant—the entry-level professional position in the California Department of Education.

During his employment with the department of education, and of course, after his election to the chief position in that agency, Wilson Riles has repeatedly reached out to involve the larger community in educational matters while he participated in that community in a variety of ways.

Wilson Riles has been a prime advocate of teaching economics in the publics schools. He serves today on the board of the foundation for Teaching Economics, and he was instrumental in the establishment of basic proficiency requirements for California students which stress life skills in the world of work.

When certain major auto industry plants were recently forced to close their doors in California, Wilson Riles successfully brought industry, labor and schools together to provide retraining of the laid-off workers.

I think it worth noting that Riles' reputation for sound judgment and broad understanding has led to his appointment on the board of directors of three major corporations.

From virtually every perspective, Wilson Riles has made a positive contribution to his times. He is richly deserving of such honors as we can bestow upon him today.●

DR. WILSON RILES

HON. CARL D. PERKINS

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 16, 1982

● Mr. PERKINS. Mr. Speaker, it is a pleasure for me to associate myself with the remarks of my California colleagues concerning that great American educator, Dr. Wilson Riles, who will retire shortly from the position of State superintendent of public instruction for California.

I first became acquainted with Wilson when he was the California State director of title I of the Elementary and Secondary Education Act. Beginning then, and throughout my years as chairman of the Education and Labor Committee, I have called on Wilson many times for advice and help, and he has never failed to respond fully, with intelligent and concise answers to some very difficult questions. He has also participated fully in our annual struggles to obtain more adequate funding for education programs.

I am sure that Wilson will be back here working with us and testifying before our committee, as he goes into what I am sure will be an active retirement. The welcome mat will always be out for him so long as I am chairman of the committee.

I am glad that you have honored him today. I join you in saluting a great American and a great educator, Wilson Riles. I wish him well in his future activities, which I know will involve continued service to the schoolchildren of America, and I extend to him the hand of friendship.●

DONALD G. BUTLER, FORMER MAYOR OF PITTSFIELD, MASS.

HON. SILVIO O. CONTE

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Sunday, December 19, 1982

● Mr. CONTE. Mr. Speaker, on December 12, Pittsfield, Mass., lost one of its most forward-thinking leaders of the century—Donald Butler, former mayor of Pittsfield, who died at the age of 66. He served the city of Pittsfield as a city councilor for 18 years before becoming mayor in 1967, where he served for 6 years.

Donald Butler was the consummate public servant. His service in city government was based on a deeply rooted sense of care and love for the city and its people. To him, people did not represent votes or margins of victory, but rather individuals with needs, hopes, and feelings who wanted community leaders who understood these needs. To that end, Donald Butler established a record of community service second to none. His work with local charitable organizations, hospitals, service groups, and educational institutions showed a solid commitment to the people of Pittsfield and Berkshire Counties.

At this time, I insert for the RECORD, the following obituary and editorial from the Pittsfield, Mass., Berkshire Eagle:

[From the Berkshire Eagle, Dec. 13, 1982]

DONALD BUTLER, DEAD AT 66, WAS 3-TERM PITTSFIELD MAYOR

(By Grier Horner)

Donald G. Butler, who as mayor presided over a six-year period of municipal accomplishment and efforts to improve the lot of the underprivileged, died early yesterday morning of a heart attack.

Stricken at home, he was taken to the Berkshire Medical Center by police ambulance but was dead on arrival. Br. Butler had sufferd another heart attack several years ago.

The day before his death the former three-term mayor, who was 66, had been ringing a bell at the Salvation Army collection booth on North Street. The act symbolized his long-standing concern for those less fortunate than himself.

A belief that all was well with the city made it difficult at first for him to understand the thrust of the antipoverty movement here or to believe the charges of racial inequality that sprung up locally after the assassination of Martin Luther King Jr. in 1968.

But shortly after King's death he said, "My eyes have been opened."

"Many think everyone on welfare is a freeloader or a deadbeat," Mr. Butler said. "I don't buy that. Unfortunately things happen . . . A marriage doesn't work and the kids are there. You just can't turn your backs on them."

After that he was instrumental in the formation of the city's Urban Coalition and appointed a special commission headed by Thomas M. Connolly and the Rev. Patrick A. Sullivan that, with his support, persuaded the City Council to approve construction of the Morningside and West Side Community schools to replace deteriorating grammar schools in those two lower-income neighborhoods.

"A lot of the projects were very difficult to get going and he was always in the background with the strong backbone to get things off the ground," Connolly recalled yesterday.

During this period, Butler made repeated trips into the depressed areas of the city to try to defuse tensions. He brought City Hall to the Christian Center on a regularly scheduled basis.

While plans for housing and community schools and the strategy for dealing with things like a City Hall "sit-in for housing" were swirling around him, he was not too busy to personally find a refrigerator for someone who needed one or to get the heat turned on for a shivering family. And he did those small things without telling reporters or issuing press releases about them.

Seldom an initiator, Butler gave his backing to a wide variety of projects that could not have gone forward without his support.

Among these were construction of the community schools, construction of a new library, construction of a major sewer plant expansion and setting up the Early Childhood Development Center, of which he was particularly proud.

THREE HOUSING PROJECTS

West-side rehabilitation, long overdue, began during his tenure. Three public housing projects—the first built here in years—were constructed. The old Bradford Block was renovated for apartments for the elderly. Brattlebrook Park and Onota Lake's water rights were purchased by the city. He initiated reconstruction of miles of potholed streets.

One of Butler's frustrations, like those of mayors before and after him, was trying to get downtown redevelopment started.

Although he retired in April 1971 from his job as assistant treasurer of the City Savings Bank, he was retained by the bank as a consultant and had continued to go to work daily. He had a desk on the main floor there and served as something of a major domo, talking to customers, guiding and assisting them.

He knew an incredible number of people, as one friend put it. One result was that he was constantly going to wakes. The last he attended was for Harold T. Grandshaw, the city's superintendent of public buildings, a man he held in great respect. Mr. Grandshaw died last week.

WALKED TO WORK

As mayor, Butler walked to work from his home on Boylston Street Extension and started the day at the Court Square restaurant. There he met with a group that consisted of Thomas Litwiler of General Electric, James O'Brien of Western Mass. Supply, then Police Chief John Killeen and others. The stock in trade there was the Don Rickles one-liner. If Bulter liked someone, he greeted him with an insult. The worse the insult, the deeper the friendship was likely to be. This proved disconcerting to people who weren't in on the practice.

Mr. Butler was married to the former Doreen M. Cooper for 37 years. Other survivors are a daughter, Mrs. Jeanne Vanasse of Pittsfield, and two grandsons, Matt and Jack Vanasse of Pittsfield. He is also survived by a sister, Mrs. Betty C. Biron of Pittsfield.

Butler, a Republican, had deep roots in the city. His family had settled here in the 1740s. His greatgrandfather was on the city's first common council in 1890 and his grandfather, John H. Butler, ran unsuccessfully for mayor in 1906 and was postmaster. His grandfather built the First Methodist Church, where Mayor Butler served on the board.

SCOOPING ICE CREAM

Born in Pittsfield, son of Ralph and Helen Slagar Butler, he graduated from Pittsfield High School during the Depression. The day after graduation, he began scooping 5-cent ice cream cones at the old Double Dip on First Street, a popular hangout for youths. In 1936 he went to work at General Electric as a punch-press operator in the distribution transformer department. He was promoted to assistant production supervisor in the chemical department, where he served eight years. In 1947, he was to be promoted, but the promotion meant transfer out of Pittsfield and he left GE rather than leave the city.

Butler managed the Berkshire News for four years, then joined Pioneer Credit Corp. He told colorful tales of the lengths he had to go to in repossessing cars and other equipment from people who failed to make their payments. He was the regional manager for Pioneer when he joined City Savings

in 1961. He holds the bank's Silver Bearer award for community service.

Before becoming mayor by defeating Remo Del Gallo in 1967, Butler had been a councilman for 18 years.

During his long public career, he had received recognition from a number of organizations and had served on the boards of numerous groups.

HONORARY CHAIRMAN

In 1980 he was the honorary chairman of the Berkshire County committee for the international year of disabled persons. In 1976 he was named the Child Advocate of the Year by the Council for Children. He was made an honorary alumnus of the Clark School for the Deaf. His interest in the deaf was aroused by his wife's deafness. A former president of Rotary, he received that group's Service above Self award twice. This year he received the Exchange Club's Golden Deeds award. The Red Cross gave him a pin for his donation of 16 gallons of blood over the years.

He had served on the board of Goodwill Industries, the Automobile Club of Berkshire County, the Berkshire County Association for Retarded Persons, the Urban Coalition, the Massachusetts Commission Against Discrimination, the Council on Aging, the Berkshire Athenaeum, the Free Care Committee at Berkshire Medical Center, Hillcrest Hospital, the Berkshire Rehabilitation Center, the Special Olympics and Berkshire Housing. He was past master of the Crescent Lodge of Masons.

DONALD G. BUTLER

Former Mayor Donald G. Butler, who died yesterday at the age of 66, was a native son with deep and distinguished roots in the community. He demonstrated his sense of place early in life when, as a young man of 31, he was offered a promotion by General Electric that would have taken him out of the city and instead elected to leave the company and stay in Pittsfield.

We can all be thankful for that decision. As a dedicated city councilor for 18 years, and as an exceptionally conscientious and popular mayor for six years thereafter, he set a high standard of public service. Plain-speaking integrity, accessibility to the public and a genuine concern for the less fortunate members of the community were the hallmarks of his career at City Hall.

But Don Butler's success in political office was only the most visible manifestation of his impact on Pittsfield. More important, and more characteristic, was his truly remarkable record of quiet service to a multitude of community organizations, large and small. The fact that he was honored not once but twice with the Rotary Club's "Service Above Self" Award reflected the community's awareness of its debt to him, but it didn't tell the whole story. Dozens of good causes and deserving individuals were beneficiaries of his concern in ways that were never publicized.

Indeed it would be safe to say that few citizens in Pittsfield's long history have demonstrated as deep and abiding an affection for the community as did Don Butler. He showed his faith by his works, and in doing so he enriched his fellow citizens.●

NICARAGUA'S AMBASSADOR RESIGNS OVER CENSORSHIP

HON. MICHAEL D. BARNES

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Sunday, December 19, 1982

● Mr. BARNES. Mr. Speaker, Nicaragua has lost another Ambassador. Francisco Fiallos, Nicaragua's Ambassador to Washington, has resigned in frustration over the direction his country is taking. This is not an isolated incident. Ambassador Fiallos' predecessor, Arturo Cruz, resigned for basically the same reason.

Fiallos' resignation was precipitated when he gave an interview to a Nicaraguan newspaper in which he had the temerity to suggest that the Sandinista regime could do itself a favor by revoking press censorship, calling "free, just, and honest elections," following a "genuinely nonalined" foreign policy, and treating the Nicaraguan church with a respect commensurate with the deeply held religious beliefs of the Nicaraguan people. When the government censored the interview, Ambassador Fiallos decided that he could no longer in good conscience represent that government. A copy of the interview was obtained by the New York Times and is described in an article which appears at the conclusion of my remarks.

Mr. Speaker, Francisco Fiallos and Arturo Cruz are among the most able ambassadors that the Sandinistas are ever likely to find. When people of their caliber, with their concern for the people of Nicaragua, find themselves unable to support the current direction of the Nicaraguan revolution, then I grieve for Nicaragua.

From the day that I became chairman of the Subcommittee on Inter-American Affairs, I have fought against the administration's covert action campaign to destabilize the Nicaraguan Government. I am the author of a bill to prohibit such activities, which was the basis for action recently taken by the House. I have fought against the use of Honduras as a staging area for U.S.-supported military actions against Nicaragua, including the improvement of airfields for that purpose. I have fought for a positive response by my Government to every responsible Central American peace initiative. I will continue to do these things.

In an attempt to be constructive, for 2 years I have practiced quite diplomacy, muting my criticisms of the direction of the Nicaraguan revolution out of fear that they would be used by Nicaragua's enemies. I have traveled to Nicaragua, received Nicaraguan officials in my office, and engaged in private correspondence with Nicaraguan leaders, all with the objective of making the same points in private to the Nicaraguan Government that Ambassador Fiallos sought to exercise his right as a Nicaraguan citizen to make publicly: That to maintain any understanding in the international community, Nicaragua must now, unequivocally, choose the path of freedom, democracy, nonalinement, and respect of basic freedoms for its people. Most recently, on September 29 I joined six other Members of the House in addressing a private letter stating these concerns to the Nicaraguan junta and directorate. That letter has not been answered.

Mr. Speaker, I must now say to the leaders of Nicaragua: What do we have to show for our efforts? What do we have to show for our forbearance? How much longer do you expect us to remain silent in the face of what seems to be the slow but inexorable destruction of the ideals of your revolution?

I make this statement with full knowledge that it will be used by those who wish Nicaragua ill. But the seriousness of the situation demands it. Nicaragua must change course, and it must do so now. If it does not, it will achieve by its own actions the very isolation, the very ostracism by the democratic world, that some outside of Nicaragua are now trying to impose on it.

[From the New York Times, Dec. 13, 1982]

DRAMATIC CHANGE IN NICARAGUA URGED BY ITS ENVOY TO U.S.

(By Alan Riding)

MANAGUA, NICARAGUA, Dec. 11.—Nicaragua's Ambassador to Washington has called for a "dramatic change" in the direction of the Sandinist Government, saying that it could ease its isolation by improving relations with neighboring governments and by increasing political freedom at home.

The Ambassador, Francisco Fiallos Navarro, made his comments in an interview that local authorities here banned from an opposition newspaper.

Circulation of photostatic copies of the interview among officials and opposition leaders here immediately stirred speculation that Mr. Fiallos had decided to leave his post after less than a year.

[Repeated efforts, both by telephone and through Nicaraguan officials, to reach Mr. Fiallos, who was believed to be in the United States, were unsuccessful this weekend. A spokesman for the Nicaraguan Embassy in Washington declined to comment on the interview.]

In the interview, which was censored out of Friday's issue of the daily La Prensa, the largest circulation newspaper in Nicaragua, Mr. Fiallos also sharply criticized "fanatical elements" in the Sandinist movement as well as the foreign policy of the Nicaraguan Government and its "dreadful handling" of relations with the Roman Catholic Church.

"SWING OF RUDDER" URGED

Referring to limitations on political freedom inside Nicaragua, he said, "I believe that a substantial improvement is necessary, even a dramatic change, a sharp swing of the rudder in the conduct of the revolutionary process."

Sources at La Prensa said that Mr. Fiallos had provided written answers for the interview, which was prepared six weeks ago with the understanding that it would be published after Dec. 8, a religious holiday in Nicaragua. Before the interview was banned, La Prensa editors provided the local censor with the original text, carrying Mr. Fiallos' signature on every page, to prove its authenticity.

La Prensa, which was a leading voice against the Somoza regime that was toppled by the Sandinist revolution, has been a source of irritation for the current Government, publishing complaints of business and political opposition groups. The paper, which has a circulation of around 70,000, has also adopted some pro-United States, anti-Soviet positions on international issues and campaigned openly on its editorial page against Marxism-Leninism and totalitarianism.

Mr. Fiallos's predecessor as Ambassador, Arturo Cruz, resigned late in 1981, expressing disillusionment with the Sandinists, who took power in Nicagarua in July 1979.

"DIFFICULT" RELATIONS WITH U.S.

Well-placed officials here said that while Mr. Fiallos was close to the Foreign Minister, the Rev. Miguel d'Escoto Brockman, he did not enjoy the confidence of the nine-member Sandinist National Directorate, the country's top ruling body. A 36-year-old lawyer, Mr. Fiallos joined the Government soon after the revolution, serving as Deputy Foreign Minister and Ambassador to Canada before being assigned to Washington.

In the interview, the Ambassador described Nicaragua's relations with the Reagan Administration as "difficult, extremely difficult, with little probability of improving in the foreseeable future." Referring to American support for anti-Sandinist rebels based in Honduras, he warned that the Reagan Administration was pushing other Central American countries toward a "confrontation" with Nicaragua.

But he said that "if the internal situation is one of division and confrontation" in Nicaragua, 'it will be very difficult to overcome the difficulties in the international field."

"I think a vicious circle exists," he went on. "On the one hand, it is said that a tough stance is necessary to neutralize the effects of the harassment. On the other hand, strong measures strengthen those who are harassing. It is necessary to break out of this circle. The Popular Sandinist Revolution is strong enough to do so. Contrary to what some radicals believe, some measures of relaxation and détente would strengthen the Government."

Most of the interview was dedicated to analyzing the domestic situation here and to urging the Sandinists to take "unavoidable and unpostponable" measures, among them:

To revoke the Emergency Law, "especially some measures that have caused great harm to the revolution, such as press censorship."

To call "free, just and honest elections" since "every attempt to suffocate or frustrate the will" of the people "disguises tyrannical intentions that should be combated directly and with decision."

To follow a "genuinely nonaligned" foreign policy instead of taking sides in the struggle of the superpowers.

To recognize the prominent role of the church in the "conscience" of the Nicaraguan people, even though "entrenched Marxist-Leninist ideologues and even less Stalinists" would find that impossible to understand.●

HON. JIM MATTOX

HON. RICHARD C. WHITE

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 16, 1982

● Mr. WHITE. Mr. Speaker, I wish to add my accolades to those of others who have extolled the excellence of my friend JIM MATTOX of Texas. JIM may be the only U.S. House Member to return directly to statewide office at the State level—achieved by a mixture of courage and determination, an indefatigable campaigning style that overcomes all obstacles. In this new high responsibility of attorney general of Texas, he will be heard, both statewide and nationally, and will be watched with pride by his many friends in the Texas delegation and in the House. We wish him the good fortune he deserves.●

EDWARD J. DERWINSKI

HON. PETER W. RODINO, JR.

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 30, 1982

● Mr. RODINO. Mr. Speaker, I want to take this opportunity to recognize a distinguished Member of this House who will be leaving Congress at the end of this term.

Congressman EDWARD DERWINSKI has served this institution with dignity and honor for the last 23 years. As a senior member of the Foreign Affairs Committee, ED DERWINSKI's leadership on foreign policy issues has been intelligent and fairminded. While we have not always agreed on issues, I have always appreciated his sincerity and honesty, and wit.

The people of Illinois and the American public have had a dedicated public servant in ED DERWINSKI, and I hope he continues his service when he leaves this House.

I wish ED all the best in the future.●

WILLIAM BRODHEAD

HON. CECIL (CEC) HEFTEL

OF HAWAII

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 8, 1982

● Mr. HEFTEL. Mr. Speaker, I am pleased to join my fellow colleagues in commending BILL BRODHEAD for his many accomplishments in the Congress.

Elected in the "Watergate class" of 1974, BILL's career has spanned a tumultuous era in American political life. Throughout this period, however, BILL has remained steadfast to the finest traditions of the Democratic Party.

Principle has always governed BILL's career in Congress, yet it is not blind allegiance but reasoned judgment that has given him direction. At a time when the policy direction of the Democratic Party is being reassessed from within the party, BILL's measured perspective has focused our attentions on the party's traditional social conscience.

Through his work as chairman of the Democratic Study Group, BILL has given leadership and guidance to his fellow Members on the entire spectrum of complicated issues we face in Congress. For this service, we all owe BILL a great debt.

BILL BRODHEAD has maintained his principles even at times when it was not vogue to do so. The perspective which he has provided the Congress will always be valuable and it is my sincere hope that he will continue to be in touch with us often in the coming years.●

TRIBUTE TO BILL BRODHEAD

HON. JOHN D. DINGELL

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 8, 1982

● Mr. DINGELL. Mr. Speaker, one of the finest Members of the House of Representatives with whom I have had the pleasure to serve is the Honorable WILLIAM BRODHEAD of our Michigan delegation.

BILL has been a conscientious and respected Member of this body, serving his constituency with conviction, integrity, and dedication to the public interest.

BILL first served with me on the Energy and Power Subcommittee where we worked together to mold and direct new and urgent national energy laws to protect the Nation and its consumers.

His subsequent assignment to the Ways and Means Committee further exemplified his guiding leadership on major national issues affecting the well-being of so many Americans.

We will miss BILL as will his constituency, but wish him well in his future endeavors.●

HON. TOBY MOFFETT

HON. CARL D. PERKINS

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 14, 1982

● Mr. PERKINS. Mr. Speaker, I am happy to join my colleagues in honoring the contributions of TOBY MOFFETT, who will be leaving us—temporarily I hope—at the end of this Congress.

TOBY MOFFETT is, by almost any measurement, one of the outstanding young men to have served in this House in the past decade.

His energy, his keen understanding and his integrity were noted from his first weeks here back in 1974, and he has grown as fast in statesmanship as he has in the esteem with which he is held by his colleagues.

TOBY MOFFETT could always be found on the side of the people against the interests, and whether he won or lost, he pursued his beliefs with an energy and an ability that invited admiration.

Although he is only in his thirties today, he has already amassed a distinguished vita. Because we know him, we know that his recent loss in an election campaign will not put a period at the end of a still-burgeoning career.

We will hear more of TOBY MOFFETT in the future—and for this Member, that will be welcome news indeed.●

55: A LAW WE CAN LIVE WITH

HON. MICHAEL D. BARNES

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Monday, December 20, 1982

● Mr. BARNES. Mr. Speaker, the No. 1 killer of people under the age of 35 years in the United States is perhaps the most violent, yet preventable, tragedy threatening the health and safety of our citizens—that is, the motor vehicle crash.

Every day more than 140 Americans die violently on our highways, and we know that over one-half are due to drunk driving. In the past few years, the Federal Government and numerous States and localities have taken some sorely needed first steps aimed at finally bringing under control the drunk driving epidemic.

Back in 1974, in response to the shortage crisis, the Congress enacted legislation, authored by our colleague JAMES HOWARD of New Jersey, setting the national speed limit at 55-miles per hour. In doing so, what resulted was the most effective highway safety tool put to use to date, which, according to the National Safety Council, has saved as many as 40,000 lives on the Nation's roads.

As a member of the Presidential Commission on Drunk Driving, I was honored last week to join my fellow commissioners at the White House to present to President Reagan our "Interim Report to the Nation," which advocates the critical need to continue enforcing the Federal 55-miles-per-hour standard.

Without question, keeping intoxicated persons from getting behind the wheel of a car and increasing safety-belt usage will reduce significantly the tragic daily deaths and crippling injuries. It is equally important at this juncture to remind ourselves of the great life saver—the 55-mile-per-hour speed limit. I strongly urge our colleagues to read the following article written by JAMES HOWARD which appeared recently in the New York Times:

[From the New York Times, Nov. 7, 1982]

KEEP THE 55-M.P.H. SPEED LIMIT

(By James J. Howard)

On Oct. 2, the New York Times carried an article by an advertising executive who opposes the Federal 55-miles-an-hour speed limit and who "relies heavily on a CB radio" to rescue him from radar traps and patrolling police officers.

He contends that most of today's limited-access highways are safe at 70 miles an hour or more and that we are "underusing" them at 55. Violation of the Federal law, he says, is merely a "political" or an "economic" offense and should not be prosecuted under the criminal-justice system.

As the sponsor of that Federal speed law, I am dismayed by this light-hearted, "Whose life is it, anyway?" approach to the daily slaughter on our streets and highways.

Perhaps the original intent of Congress when this law was enacted in 1974 was largely economic: The need to conserve fuel in response to the Arab oil embargo. And in that sense, it has most certainly achieved its purposes.

More than five billion gallons of gasoline have been saved since the law requiring the states to enforce the 55 m.p.h. speed limit, or lose a portion of their Federal highway funds, went into effect.

But events proved rather quickly that energy-saving was only a secondary benefit. The big reward has come in the saving of human life.

The National Safety Council estimates that 40,000 or more men, women and children who would otherwise have died on our highways are alive today because of this "economic and political" law. And many times that number have been spared crippling injuries.

What would happen if this law were to be repealed, if all those "it's-my-life" drivers were to have their way? Again, I defer to the professionals of the National Safety Council.

If the speed limit were raised to 65 or 70 m.p.h., the council experts say, the effect in any one state would be 20 percent to 30 percent more deaths on limited-access roads and 25 percent to 35 percent on state and county roads. Nationally, 5,300 to 8,000 more lives a year would be lost.

The tragic implications of repeal may have been lost on some heavy-footed motorists and even some misguised public officials, but not on the overwhelming majority of the American people—the law-abiding motorists who do not regard our streets and highways as some sort of Disneyland where collisions are part of the fun.

All the latest option polls—by Gallup, by the press and by Government agencies—show that 75 percent of the American people support the 55 m.p.h. law and want it enforced.

Most of the recent clamor for repeal comes from the West, where the twin banners of "States Rights" and "Get the Government Off Our Backs" are being raised by some political office-holders, who see a vote-getting potential in this issue.

Their argument, somewhat akin to that of our Eastern advertising executive, runs something like this: "We have lots of wide-open space, the Interstates were designed for speeds of 70 m.p.h. or more and it's a time-consuming bore to plod along at 55 over miles and miles of empty highway."

Certainly our limited-access highways were designed for high-speed driving, but today's cars and drivers were not. Today's smaller, lighter automobiles pose new problems for the driver, and greater risk of death or injury in the event of an accident, than the heavier vehicles that predominated in the United States when these highways were new.

The blunt truth is that if you are involved in a collison on an American highway today at 55 m.p.h., there's a 30 to 1 chance that you will survive. At 70 m.p.h. you have a 50-50 chance; it's an even-money bet that you will die.

And there is no assurance that an empty stretch of highway guarantees your safety at high speed. Statistics just in for 1981 show almost 2.9 million single-vehicle accidents on our streets and highways during that year; 32 percent of our 50,000-plus fatalities resulted from single-vehicle accidents.

I find it puzzling and disturbing that the loudest opposition to the 55 m.p.h. law comes from those areas where the highway death toll is proportionately the greatest. The nation's highest highway death rates per vehicle mile are in States like Arizona, Nevada, Montana and Wyoming, where there is no serious enforcement of the 55 m.p.h. law and, as yet, no serious crackdown by the responsible Federal authorities.

Those states record 4.8 to 5.2 deaths per 100 million vehicle miles a year, whereas my home state of New Jersey, where the law is enforced strictly, has one of the lowest death rates.

The 55 m.p.h. standard was not some arbitrary number picked at random when this law was approved by Congress. It was adopted as a result of long and careful research by public and private experts, including both automotive manufacturers and the operators of commercial truck fleets.

What a tragic folly it would be to abandon it now and repeal the only law on the Federal statute books that is a proven lifesaver.

Whose life is it, anyway?

It's yours and mine. It's the lives of our families, our friends and our neighbors, of all the millions and millions of our fellow citizens who travel the streets and highways of America.

Keep the 55 m.p.h.●

HUMAN RIGHTS AND THE NEED FOR ASYLUM REVIEW

HON. SHIRLEY CHISHOLM

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Sunday, December 19, 1982

● Mrs. CHISHOLM. Mr. Speaker, the shortness of the lame-duck session did not permit the consideration of the Immigration Reform Act, H.R. 7357. While I had serious reservations about the bill in several areas. I believe that the asylum adjudication provisions in the House bill were a significant improvement over Senate provisions and would have gone a long way in removing the ideological bias which current-

ly permeates our asylum process. I would have hoped that additional amendments, in the area of judicial review and right to counsel, would have further improved these provisions. The need for reform, in this area, is all too evident. The administration has continued to reflect an ideological and racial bias in its conduct of U.S. refugee and asylum policy. I have enclosed for my colleagues' consideration a critique of "The Reagan Administration's Human Rights: A Mid-Term Review" prepared by Americas Watch, The Helsinki Watch, and the Lawyers' Committee for International Human Rights. I am hopeful that the Congress will address the concerns raised in this report by adopting the revised asylum procedures put forth in H.R. 7357 with a greater focus on the issue of judicial review and right to counsel.

U.S. REFUGEE AND ASYLUM POLICY

One aspect of the United States' domestic human rights performance warrants special consideration: the treatment of refugees and applicants for political asylum.

Historically, United States refugee policy has been an extension of foreign policy, permitting the admission of hundreds of thousands of people fleeing from communist countries while denying admission to those fleeing from right-wing dictatorships. Thus in the last twenty years the United States has accepted nearly a million Cubans, over 600,000 people from Indochina, and hundreds of thousands of refugees from the Soviet Union and Eastern Europe. Indeed, until 1980, United States law actually defined the term "refugee" to mean only those fleeing from "Communist or Communist dominated" countries. The Refugee Act of 1980 removed the ideological definition, which now includes anyone with a well-founded fear of persecution because of race, religion, nationality, membership in a particular social group, or political opinion. In practice, however, this change has had little effect on either overseas refugee admissions or on asylum cases in the United States.

REFUGEE PROGRAMS

For fiscal year 1981 the Carter Administration proposed, and Congress authorized, 217,000 overseas refugee admissions including 165,000 from Indochina and 37,500 from the Soviet Union and Eastern Europe. In contrast, only 4,000 admissions were designated for all of Latin America and only 3,000 for Africa. The number of refugees actually admitted from these regions was even smaller: 2,017 from Latin America and 2,119 from Africa. During 1981, moreover, the United States did not take a single refugee from Haiti, Guatemala or El Salvador under this overseas admission program.

For fiscal year 1982, the Reagan Administration proposed a total of 173,000 admissions including 120,000 from Asia and 42,500 from the Soviet Union and Eastern Europe. The number for Africa, (3,000), remained the same, while the number for Latin America was cut to 3,000. Again, not a single Haitian, Guatemalan or Salvadoran received refugee status. Of the 3,000 permitted entry from Latin America, only 579 were admitted, and of these 577 were from Cuba. For fiscal year 1983, the total refugee admission ceiling has dropped to 90,000.

ASYLUM POLICY

Aliens in the United States must prove refugee status by filing an application for political asylum. Like the quotas for refugee admissions, the asylum system still works in favor of those fleeing from communist persecution. In fiscal year 1981, only five Haitians were granted political asylum in the Unites States (out of more than 5,000 applications), while, in contrast, 201 cases were approved for applicants from Afghanistan (out of just over 1,000 applications). For the same period, only two Salvadorans were granted asylum in the United States (out of more than 6,000 applications), while 297 cases were approved for Nicaraguans (out of just over 9,000 applications).

The administration has extended its efforts to discourage asylum-seekers to the United States beyond denying refugee status to applicants from non-communist countries. In July of 1981, Attorney General William French Smith announced the Reagan Administration's three-point plan to stem increasing asylum applications: detention of undocumented aliens, including those seeking political asylum; interdiction of boats on the high seas; and a substantially expedited adjudication procedure for asylum claims. Almost immediately, all three procedures were applied to Haitians arriving in South Florida. Some 2,500 were apprehended and imprisoned at the Krome detention facility in the Everglades 25 miles from Miami. When the makeshift accommodations became overcrowded, many of these Haitians were transferred to a dozen facilities throughout the county, from Ponce, Puerto Rico to LaTuna, Texas, and Lake Placid, New York. After months of detention in these isolated facilities, often without access to legal counsel or to friends, some of the Haitians, abandoned their claims for asylum and agreed to accept "voluntary" return to Haiti. Most stayed, however, and, in June of 1982, a federal Judge in Miami ordered the class (then 1900) released—ruling that the detention had been effected in violation of statutory requirements. Those Haitians have now been released, pending the adjudication of their asylum claims. Ironically, challenges to the Haitian detention program prompted the Administration to promulgate federal regulations in October of 1982 which make the detention of arriving, undocumented aliens the rule, and make release the exception. As a result of this policy, asylum applicants from a number of countries including Afghanistan, Iran, Iraq, and Haiti have been detained, pending the adjudication of their cases, and many remain in detention.

The deterrence model implemented by the Reagan Administration has denied asylum applicants a fair opportunity to present and to develop their claims for political asylum. Immigration and Naturalization personnel have subjected Haitians and Salvadorans to coercion, which has discouraged some from asserting their asylum claims, and encouraged others to return to their countries of origin, where they may face persecution. Federal courts have intervened, particularly on behalf of Salvadorans, and required that arriving aliens be given notice of the right to apply for political asylum and of the right to counsel. These and similar expedited adjudication practices are the subject of proposed and contemplated legislation which is being advocated by the Reagan Administration.

In addition, the Reagan Administration has undertaken a long-term alien detention policy, particularly with respect to Cubans. The Cubans are being detained indefinitely in federal prisons after denial of their asylum claims, and following exhaustion of efforts to return them to Cuba.

One area where the Administration deserves credit is for its change of position concerning Ethiopians. In July 1982, reacting to strong congressional and public pressure, the Administration reversed an earlier decision to cancel a program that had provided temporary refuge to more than 15,000 Ethiopians in the U.S. Within the Administration, Assistant Secretary of State Elliott Abrams was credited with spearheading the move to change the policy back to the program of "extended voluntary departure," permitting Ethiopians to remain in the United States indefinitely without facing deportation hearings.●

MILLIONS OF AMERICANS ENTER HOLIDAYS WITHOUT JOBS

HON. JAMES R. JONES

OF OKLAHOMA

IN THE HOUSE OF REPRESENTATIVES

Sunday, December 19, 1982

● Mr. JONES of Oklahoma. Mr. Speaker, this Christmas season is one of the saddest in my lifetime. Millions of Americans enter holidays without jobs and without any bright hopes for the winter months ahead. It is very clear that the Reagan administration and the Congress must pull together in the next few months if we hope to avert continued hard times in the remainder of this century.

One shining example of teamwork and devotion to those who desperately need our help exists in Tulsa, Okla., Neighbor for Neighbor, a community-based organization devoted to the war on poverty, has worked harder than ever before this year to help every person in need of spiritual and material assistance. In the past fiscal year, Neighbor for Neighbor has provided services valued at $1.1 million to the disenfranchised in our community. In the past 18 months, NFN has distributed over 185,000 pounds of food to Oklahomans, and has delivered health services to over 4,700 persons.

I congratulate Dan Allen, director of Neighbor for Neighbor in Tulsa, and his devoted staff for their good work for our community this past year. They have been a vital part of our community for 15 years, and they continue to be a saving force for thousands of Oklahomans. I hope that this administration and this Congress will do their jobs next year so we can alleviate the burgeoning workload of Neighbor for Neighbor.●

JOB PARTNERSHIP TRAINING ACT OF 1982

HON. SILVIO O. CONTE

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Sunday, December 19, 1982

● Mr. CONTE. Mr. Speaker, the national jobless rate reached its highest point since 1940—10.8 percent. Unemployment is undisputably the No. 1 economic challenge facing the country today.

With this distressing statistic in mind, I was pleased that the President supported and signed into law on October 13, 1982 the Job Training Partnership Act. Some estimates conclude that the new program would train more than 1 million people annually in skills to be used in private sector jobs.

The important and innovative provision in this legislation, as opposed to CETA, is the role of the private sector. "The partnership" aspect of the program will encourage that cooperation of State and local government officials with the private sector—where the permanent jobs are created and maintained. The participants should be trained for jobs that actually exist in the private sector. The program is important and innovative for this reason: It tailors local employment programs to private sector labor needs.

As the recession continues and unemployment becomes more severe, another long term problem has developed: dislocated workers. For the first time, this program is aimed specifically at retraining workers who have lost their jobs as a result of structural economic changes.

Even though the transitional stage from CETA to new training programs will be in place during fiscal year 1983, preliminary estimates are available concerning the new law's impact on Massachusetts. According to the Massachusetts Department of Manpower Development, the State will recieve approximately 2.31 percent of the total funds allocated. Assuming that fiscal year 1984 appropriations will be somewhat similar to previous years ($3.7 billion total), $68 million will be available to Massachusetts. In the western part of the State—composing much of the First Congressional District—the prime sponsor in Pittsfield could recieve $1.6 million while the Springfield prime sponsor could receive almost $5 million. Ultimately, thousands of Massachusetts residents could be trained in this program.

Mr. Speaker, many Members of this House had reservation about various provisons of this legislation—myself included. However, during this period of extraordinary unemployment complicated by swiftly changing "international economy," employment training programs are necessary to keep America working.●

HON. BO GINN

HON. BILL ALEXANDER

OF ARKANSAS

IN THE HOUSE OF REPRESENTATIVES

Monday, December 6, 1982

● Mr. ALEXANDER. Mr. Speaker, I welcome the opportunity to honor the record of service to our people that has been compiled by a talented and able colleague whose voluntary departure from our ranks will be sorely felt.

It has been my privilege to work with Bo GINN on both the Committee on Appropriations and on our Subcommittee on Military Construction Appropriations. During these years my respect for and appreciation of Bo GINN's abilities has grown.

But, even before our Appropriations experiences, I had learned of Bo GINN's dedication as we were brought in more frequent contacts by our shared interests in stimulating and supporting private business and private sector job development; in building, repairing of rehabilitating our transportation network; and in improving our national defense system to achieve peace through strength.

Bo GINN's knowledge of the way Government works and his willingness to understand the concerns and problems of the people of other congressional districts have served to benefit people in communities all across our Nation.●

INSURANCE FILM TARGETS TEENAGE DRUNK DRIVING

HON. MICHAEL D. BARNES

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Sunday, December 19, 1982

● Mr. BARNES. Mr. Speaker, one of our society's most serious problems today is drunk driving—particularly among teenagers. It is a stubborn problem which is killing off our young people—our future—at an alarming rate.

The No. 1 health problem of our teens is not disease, fire, dope, or handguns, but the family car driven by an alcohol-impaired youngster. When the final tally is in this year, about 8,000 teenagers will have died in alcohol-related crashes. Another 40,000 will be injured.

It is obvious we need innovative approaches to combat the strong peer pressures to drink and drive. One such approach, a film aimed at teenage audiences, produced by the National Association of Independent Insurers, is described in a recent column by Judy Mann of the Washington Post. The column very aptly zeroes in on the filmmaker's successful effort to bring the "don't drink and drive" message to teenagers without scolding, threatening, or preaching.

It will be made available on a free rotating loan basis to any high school that requests it early next year. I commend the NAII, the world's largest property casualty insurance trade association representing more than 500 companies, for such a worthwhile undertaking. I urge my colleagues to read this article. The article follows:

[From the Washington Post, Dec. 17, 1982]

TEEN DRINKING

(By Judy Mann)

Lowell R. Beck, president of the National Association of Independent Insurers, stood before an audience of about 100 people in a hotel meeting room Wednesday and warned them of what they were about to see. Noting that he was the parent of three teenagers, he said: "If you're not involved with kids, you're going to be a little uncomfortable with this film, because you're going to see them doing what they do."

The NAII then showed the audience of government officials, congressional staffers, insurance executives, educators and law enforcement officials a movie called "Just Along for the Ride." The film—part of an industry response to the enormous cost in lives, injuries and therefore premiums caused by drunken drivers—is aimed particularly at teen-agers, a group that is four times more likely to have an alcohol-related crash than any other group of drivers.

The film shows why.

It is the story of three likable youngsters, their friends, and how an ordinary day and a typical teen-agers' party degenerates into tragedy. There are no adults in the movie, except at the end. The homes are upscale, suburban, with long driveways and wooded grounds. The three main characters are shown doing chores and thinking about grades. One, Danny, talks about facing a trigonometry exam and refers to himself as "the future chief of surgery." His girlfriend, Lisa, nudges him about studying for a Spanish exam.

Most of the actors were professionals who spent a week making the film in Ohio. But the third main character, "D. J.," was played by John Mitchell, a sophomore theatre major at Northwestern University.

"It started out with a regular script," he said. "When we got ahold of it, we realized it was totally outdated in terms of language. It was really preachy. Through the whole process, we improvised off the script."

The result is a look into the social lives of teen-agers that will ring true to a teen-aged audience and any parent of teen-agers who has been paying attention.

These are not troubled or delinquent kids; they are happy, clowning, fun-loving, enamored of cars and bent on having a good time. "That's all there is," says D. J. at one point, "is having a good time. You sip some brew and have a good time."

The film shows the kids beginning to drink casually in the afternoon. Lisa is an exception. She doesn't drink much, and she cautions Danny to "lay off the stuff. If you start drinking at four, your party's going to be over at five." He resents it.

The film shows the peer pressure, the ready availability of liquor in parents' homes, the absence of the parents, and the ignorance that young people have about

how much they can handle. Mike, a college student who travels with a cooler of beer in his car trunk, declares at one point: "I don't care how wasted I get. I'm in control. I drive better wasted than most people do sober."

Three girls are seen sitting in a house, sipping wine, beer and tequila and making plans for the party. The boys show up in front of the picture window, holding cans of beer, clowning around and pretending to shoot each other. The scene, Mitchell said, just happened. But the symbolism is there.

The party is a parent's nightmare: beer and liquor abound. Nearly everyone is drinking, except Lisa. When the kids leave to get pizza, she wants to drive, but Danny, telling her she makes him feel like a baby, refuses. She goes with another boy who also has been drinking, but who tells his girlfriend to drive. Both cars leave, with Danny barely in control of D. J.'s car. He weaves and then misses a stop sign. D. J. yells "There's a car coming." They crash, and suddenly the screen is filled with Lisa's bloodied face and anguished expression.

It cost the NAII $200,000 to film a painfully realistic look into the beer-laced world of many American teen-agers. The organization is going to lend the movie to schools around the country. Fittingly, it was previewed here during the week that President Reagan has designated to focus national attention on drunken driving.

This is a film written, not by adults but by young people, with their feelings, their antics, and their jargon; it is the kind of film that may make others think twice before drinking and driving.

In a society that loses about 8,000 of its youths a year from alcohol-related accidents, that is surely one of the best investments the industry has made.●

HUMAN RIGHTS POLICY: A MIDTERM REVIEW

HON. MICKEY LELAND

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Sunday, December 19, 1982

● Mr. LELAND. Mr. Speaker, I am inserting the following report by Americas Watch, Helsinki Watch, and the Lawyers Committee for International Human Rights. The report presents a midterm review of the Reagan administration's human rights policy. I would urge the membership to read this report.

The report follows:

THE REAGAN ADMINISTRATION'S HUMAN RIGHTS POLICY: A MIDTERM REVIEW, DECEMBER 10, 1982

(Prepared by Americas Watch, Helsinki Watch, and Lawyers Committee for International Human Rights)

COLOMBIA

By 1980, the Carter Administration had virtually terminated military assistance to Colombia and, instead, was furnishing economic assistance. The Reagan Administration has reversed field, ending economic assistance and providing only military assistance. Though human rights considerations did not loom large in the policies toward Colombia by either the Carter or Reagan Administrations, the effect of giving only military aid is to identify the United States with the element of Colombian society that commits major human rights violations.

Colombia is a democracy with a newly elected government that appears dedicated to improving the country's human rights record. The crucial question for human rights in Colombia is whether the civilian government has the strength to stop serious abuses by its own armed forces. This makes U.S. identification with the Colombian armed forces particularly unfortunate.

HAITI

Domestic debate over the status of Haitians seeking asylum in the United States, rather a candid assessment of conditions under President-for-Life Jean Claude Duvalier, has dictated the Reagan Administration's reaction to human rights violations in Haiti. The Administration's unwillingness to grant political asylum to virtually any of the several thousand Haitians currently seeking asylum in the United States has led it to overlook Haiti's consistent pattern of human rights violations. The Administration's desire to support the Duvalier government because of its reliable opposition to Fidel Castro in Cuba causes it to give undeserved support to ineffective, cosmetic actions taken by the Haitian government in the name of improving human rights conditions.

To receive political asylum, the Haitians in the United States must prove that they are unable or unwilling to return to Haiti "because of persecution or well-founded fear of persecution." Because granting refugee status would be tantamount to admitting that the Duvalier government regularly practices persecution, the Reagan Administration has taken the line, along with the Haitian te Associate Attorney General Rudolph W. Giuliani in May, "have done so in search of economic betterment, and do not have a well-founded fear that they will be personally persecuted if they return." INS maintains this in face of evidence that Haitian security forces, including the Tonton Macoutes, continue to terrorize much of the rural and urban populations. Recent reports indicate that security forces continue to arbitrarily arrest, detain and torture perceived opponents of the government. The government continues to suppress any political activity, to curtail freedom of the press and association. In the last two years free trade unions have been seriously undermined, as has the Haitian League for Human Rights.

The Department of State has taken a similar stance in evaluating the domestic situation in Haiti. Section 721(b) of the International Security and Development Cooperation Act of 1981 required that the Administration report to Congress on human rights conditions in Haiti, as a condition for voting foreign assistance. Addressing this provision on April 5, 1981, Secretary of State Alexander Haig simply informed the Congress that "the Government of Haiti is not engaged in a consistent pattern of gross violations of internationally recognized human rights." In so doing the Administration and authorized the granting of direct foreign assistance to Haiti, as well as the extension of credits and guarantees under the Arms Export Control Act.

The Department's 1981 Country Report on Human Rights Practices also displayed selective treatment. It suffers from outright omissions, particularly in its analysis of the government's respect for civil and political liberties. It states, for example, that "there were no reports of torture in 1981," when there were, in fact, a number of such reports. Many of the cases involves prominent people, such as Sylvio Claude, leader of the Christian Democratic Party, cases that were well known to the State Department.

Ignoring such facts, the Reagan Administration focused instead on the formation in April 1982 of a Haitian government agency called the National Commission on Human Rights. In a speech announcing the formation of the Commission President Duvalier told the Legislative Assembly that the Commission was part of his "revolutionary vision." Creation of the National Commission is reminiscent of the establishment, in November 1979, of a Human Rights Division in the Ministry of Foreign Affairs. To date the Human Rights Division has never issued any substantive statements nor intervened publicly in any human rights matters.

HONDURAS

The Reagan Administration continued the Carter Administration's policy of aligning itself with the advocates of a return to democracy in Honduras. This policy was helpful in producing a democratic election in Honduras in November, 1981 and a civilian government that took over in January 1982.

Regrettably, this alignment with democracy was accompanied in 1982 with an enormous increase in U.S. military assistance to Honduras, making it second only to El Salvador as a beneficiary of this kind of assistance from the U.S. in the Western hemisphere. Partly as a consequence, the strength of the armed forces in Honduran society has grown precisely at a moment of ostensible civilianization and democratization of the government. Human rights abuses increased dramatically during 1982, with the armed forces of Honduras apparently to blame. During 1982 there were more than 80 disappearances.

The major human rights question in Honduras is whether the democratically elected civilian government has either the will or the strength to control abuses by the armed forces. By its very strong identification with the Honduran armed forces, the Reagan Administration has undone much of what it accomplished for human rights by aiding the return to democracy and has identified the United States with those responsible for increasingly serious abuses of human rights.

HUNGARY

Human rights abuses occur in Hungary particularly in the area of free expression. Intellectuals who speak out or sign petitions, such as those who protested the crackdown on Charter 77 in Czechoslovakia, have been fired from their jobs and denied passports.

Because Hungary enjoys most favored nation trading status with the U.S. and prizes its conomic relations with the U.S., the U.S. has more leverage with Hungary than with some other countries aligned with the Soviet Union. We are aware of at least one instance in which U.S. influence has been used in quiet diplomacy by the Reagan Administration to aid Hungarian intellectuals persecuted for expressing their views. We applaud this action.●

MARY BONINO JONES

HON. JERRY M. PATTERSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Sunday, December 19, 1982

● Mr. PATTERSON. Mr. Speaker, I would like to share with my colleagues, the contributions of a most dynamic citizen who has a record of

voluntary and professional service that spans more than 33 years. It is important that the career of Mrs. Mary Bonino Jones be acknowledged before the Congress and thereby throughout the Nation. In doing so, I know that others will be inspired to make similar contributions to their community, and will seek to excel in their own career.

Those of us in the 38th Congressional District of California and all of Orange County already know Mary Jones to be a person who possesses many exemplary qualities. At a time when she has announced her retirement from her professional career, it is fitting to highlight her record of service from a seemingly endless list of activities.

To begin, Mrs. Jones has been a distinguished leader in the public relations field. For 20 years, she has held the prestigious and demanding position of community affairs manager for the Disneyland Division of Walt Disney Productions. This role encompassed the administration of the "Annual Disneyland Community Service Awards program." Under her direction, this celebrated program has been administered effectively and impartially as a means by which hundreds of philanthropic organizations are recognized for their humanitarian accomplishments.

In the area of civic and charitable affairs, Mrs. Jones' influence has been visible through her service as a Girl Scout troop leader of 15 years. She has also been a founder and vice president of the Anaheim Arts Council, and the founding chair of the Orange County Arts Alliance. The always friendly and vivacious Mary Jones has somehow found the time to serve as member of the Anaheim YWCA Board of Directors, the KOCE-TV Citizens Advisory Council, the Guardian Angels of Anaheim Memorial Hospital, the communications division of the Orange County United Way North/South, and two of the citizens capital improvement committees for the city of Anaheim. In essence, Mrs. Jones has shown continuous devotion to her family, her church, her employer, her city, and the county. Based upon this track record, I anticipate that despite her professional retirement, she will never leave the mainstream of our community.

Mary Jones has previously been honored by the Orange County Board of Supervisors, the Anaheim City Council, the Anaheim Chamber of Commerce, and the Orange County Chapter of the National Conference of Christians and Jews. I am now pleased to extend my own recognition as a Member of Congress, on behalf of myself, and many constituents whom I know to be equally appreciative of this remarkable woman. Mr. Speaker, it is with pride that I ask my colleagues to join me in saluting the fine career of Mary Bonino Jones.●

HARP AND HOODED SEALS

HON. JAMES M. JEFFORDS

OF VERMONT

IN THE HOUSE OF REPRESENTATIVES

Sunday, December 19, 1982

● Mr. JEFFORDS. Mr. Speaker, last Friday the Council of Ministers of the European Community adopted a resolution asking each member country to impose a ban on the import of pelts from young harp and hooded seals. This ban will last until March of 1983, at which time the Council will again consider the issue.

Although this ban is not permanent and it is, in effect, voluntary, it should be viewed as progress toward the goal of ending the much-publicized seal clubbing on the ice floes off Newfoundland each spring. Several years ago, we in the United States recognized that if we cut off demand for the seal pelts, we remove the incentive for this brutal seal hunt. That was the motivation behind section 101(a) of the Marine Mammal Protection Act.

Mr. Speaker, I want to take this opportunity to thank the 218 Members of this House who joined me in sending a Telex to the President of the European Commission, urging adoption of this ban. I am informed by leaders of this movement in Europe that this type of input is appreciated and very influential.

And, on behalf of all Americans who have expressed concern and outrage about the seal hunt, I wish to commend the Council of Ministers for its wise action on this matter. We will all watch the next vote on a permanent ban very closely.

For the information of the Members, I am having printed in the RECORD a factsheet by the Department of Commerce's National Marine Fisheries Service on harp seals and the harp seal hunt. I am also including an article by one of the leaders of the movement to ban seal imports in Europe.

HARP SEALS

The harvest of harp seals takes place each spring in the Gulf of St. Lawrence and in waters off Labrador and Newfoundland. The hunt is conducted by Canadian and Norwegian nationals over which the United States has no control. The management of these seals came under the sole authority of Canada upon extension of that country's fishing zone to 200 miles on January 1, 1977. Until that time, the management and protection of the harp seal was under the auspices of the International Commission for the Northwest Atlantic Fisheries (ICNAF). Effective December 31, 1976, the United States withdrew from membership in ICNAF as required by the Fishery Conservation and Management Act of 1976.

In 1971, Canada and Norway agreed to limit the number of harp seals allowed to be taken to about 245,000 in response to recommendations by a panel of ICNAF scientists. The quota was reduced to 150,000 in 1972 and remained at this level until 1976 when it was reduced to 127,000. For 1977 and 1978, it was determined that a total allowable take of 170,000 and 180,000 would permit the stock to increase to a size of 1,250,000 to 1,500,000 by 1983, if the kill rate is kept near this level in future years. The 1978 total allowable take of 180,000 remained the same for 1979. The harp seal is considered the second most abundant species of seal (the northern fur seal is first) in the world.

As far as we know, no U.S. nationals participate in this harvest. Further, the Marine Mammal Protection Act of 1972 provides that no marine mammal which is less than eight months old or nursing at the time of taking, whichever occurs later—or the product of such a mammal—may be imported in the United States except for scientific research. The Secretary of Commerce has not waived the moratorium on the importation of harp seals, and no such waiver is contemplated.

[From the Sunday Telegraph Magazine]

SUPPORT THE CALL AND HELP STOP THE CULL

(By Stanley Johnson)

Last March the European Parliament in Strasbourg voted overwhelmingly—by 160 votes to 10—in favour of a resolution which called upon the EEC Commission (which is the European's Community's executive arm) to prepare a draft regulation to ban the import into the EEC of products coming from young harp and hood seals, as well as products from seals whose stocks were being depleted, threatened or endangered.

As the author of the original motion, I was delighted by the result. It is probably fair to say that no issue excited such a degree of public interest in the Parliament since the first direct elections in June 1979. British MEPs alone received well over 30,000 letters from their constituents. I received over 2,000 letters from Canada (where the annual seal slaughter takes place) in support of the ban.

Some people say there would be less worldwide concern and indignation if seal pups were less "cuddly" and if the method of killing (the animals are clubbed to death in front of their mothers eyes) were less aesthetically objectionable. But this kind of argument misses the point.

Earlier this year I visited the seal herds as they were hauling themselves on to the pack ice in the Gulf of St Lawrence, after their long migration from the Arctic. It was one of the most spectacular sights I have ever seen, only equalled, perhaps, by the movement of vast herds of wildebeest and hartebeest across the Serengeti plains in Africa. For me, the fight against the Canadian seal hunt is part of the wider struggle to protect all forms of wildlife (fauna and flora) against the direct and indirect impact of the human race.

The harp seal population in the northwest Atlantic has probably declined from ten million at the beginning of the century to between one million and 1.5 million today. The hood seal population may be barely a tenth of that. Shall we do to the seals what we have done to the great whales?

And after the seals? The decline and extinction of earth's species at an ever-increasing rate (often through loss of habitat, but often, too, through direct injury inflicted by man) has the making of a tragedy of global proportions. So even if the Canadians an-

nounced tomorrow that they had found a new "humane" method of killing 200,000 seals (this year's quota) I should still object as passionately to the hunt as I do now.

Ten years ago the U.S. banned the import of seal products. Three-quarters of the trade is now directed to Europe. Bar-stools, cigar-cases, for trimmings for ladies coats, toy baby seals made out of real baby seals are the end-products.

Britain in particular bears a heavy responsibility. British companies are deeply implicated in the trade, with Britain the major entrepôt centre. Last year 40,000 skins were imported, almost all for immediate re-export to the luxury market in West Germany.

So far the government has been reluctant to act beyond imposing a labelling requirement. In theory, this means that any seal product should be marked showing the type of seal and the country where it was killed. In practice, because of the nature of the trade, the labelling approach is totally ineffective. With the initiative taken by the European Parliament, we now have the opportunity and the obligation to do better.

Not long ago Mr. Michael Heseltine, the Environment Secretary, earned the applause of conservationists throughout the world by taking the lead in pressing for a ban on the import of all whale products into the EEC. That ban has now taken effect. We must do the same for seals.

The Government must make it clear to the EEC Commission in Brussels that we expect it to respond quickly to the European Parliament's resolution. We must then urge our Common Market partners to support the call for a ban when it comes up before the EEC Council which will make the final decision. Let us hope we will be in time to prevent next year's slaughter.●

CONGRESS SHOULD INVESTIGATE NATURAL GAS IMPORTS

HON. TOM CORCORAN

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Sunday, December 19, 1982

● Mr. CORCORAN. Mr. Speaker, as a member of the Committee on Energy and Commerce, I have participated in a wide range of activities and discussions related to U.S. natural gas policy. Questions related to natural gas are multifaceted. Some aspects affect domestic producers, pipelines, distribution companies, and consumers, while other parts of the natural gas question include significant foreign policy dimensions.

Such is the case with the importation of Algerian liquified natural gas (LNG) and Canadian and Mexican natural gas. For this reason, while we need to pursue a broad range of issues related to natural gas in the context of the Energy and Commerce Committee, I also believe it would be appropriate for the House Foreign Affairs and Senate Foreign Relations Committees to hold hearings on the foreign policy dimensions of natural gas importation. With this thought in mind, I have asked the chairman of these two committees to hold hearings on this important matter as soon as possible during the 98th Congress.

As an indication of the high level of interest that many Members of Congress have regarding this issue, several Members of the Illinois, Ohio, and Missouri congressional delegations today signed letters to the Federal Energy Regulatory Commission and the Economic Regulatory Administration. This letter urges these Federal agencies to use their power to help stop overpriced and unnecessary natural gas imports from Algeria. Additionally, this morning, I testified before the FERC administrative law judge presiding over the hearings regarding the Algerian LNG imports. I urged the judge to do whatever he could to prohibit these price increases from being passed on to consumers.

Mr. Speaker, particularly in view of the fact that more than half of our States are or will be on the receiving end of expensive natural gas imported from Algeria, Canada or Mexico, I strongly urge congressional attention to this matter.●

MISSION TO BERLIN—1982

HON. JERRY M. PATTERSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Sunday, December 19, 1982

● Mr. PATTERSON. Mr. Speaker, the National Conference of Christians and Jews held its International Conference in West Berlin, Germany in August 1982. Accompanying the group of 20 delegates participating in this conference was Dr. Martin M. Weitz of Laguan Hills, Calif. A long time advocate for Judeo-Christian values, Dr. Weitz has willingly shared his experiences of Berlin during several visits over the years. At the International Conference, he spoke about the progress of "Berlin—Past and Present and Future."

Dr. Weitz considers his visits to Berlin a multifaceted "mission" which I would like to share with my colleagues in the House of Representatives. Dr. Weitz sees how much can be accomplished through international cooperation and common objectives. In his words, I submit for my colleagues, Dr. Weitz's perceptions of Germany in his visit to the Spandau sector of West Berlin. I know my House colleagues will be interested in this account of "Berlin—Past and Present and Future."

An exposure to the total Jewish Community of estimated 30,000 in the Federal Republic, in general and a cross-section survey of the Jewish "Gemeindes" of all cities we visited, with conferences with leaders and rabbis and visits to rebuilt synagogues, centers, libraries, hospitals, and homes for the aged.

We represented the World Union for Progressive Judaism and its president, Dr. Solomon B. Freehof of Pittsburgh, in our efforts to help some of the cities secure qualified Rabbis for their untended "Gemeindes."

A series of visits with "foster children" or "graduates" from the Ventnor Foundation, on organization directed by Dr. and Mrs. Hilton S. Read of Ventnor City, New Jersey, and chaired by Dr. I. S. Ravdin of Philadelphia, Pennsylvania, whereby 900 or more medical students from Germany, Holland, France, Poland, Israel and other countries were able to serve as interns in American hospitals one or two years, thus combining American know-how and technique and democracy with European training and culture for the benefit of doctor and patient and for the world community. We were able to have special conferences with many of these "graduates" in Cologne, Munich, Stuttgart and Berlin.

For the Jewish Chautauqua Society of New York City, interested in intergroup appreciation on college campuses, in summer camps, as well as in great libraries in American and increasingly around the world, we were able to have pilot-seminars with university graduate students in Bonn, Hamburg, Tubingen, Frankfurt, Munich and Berlin and conferences with leading university libraries so that select volumes of Biblica and Judaica in English would become gifts of goodwill from Jews of America to German students and professors interested in values beyond all barriers. Among the leading university libraries selected were: Universitas Bibliothek, Cologne; University of Bonn, Bonn, Germany; State and University Library, Hamburg; Library of Free University, Berlin; Library, University of Munich, Munich; Tubingen, Universitas Biobliothek, Wilhelmstrasse; Library of Frankfurt University.

Conferences with outstanding leaders in inter-group communication in every city we visited were held. These included distinguished priests, pastors, rabbis, and civic leaders—all engaged in dialogue at its best, in units similar to our National Conference of Christians and Jews, and its round tables, but ahead of our American experiment in many ways, probably due to the great need in Germany to make up for lost time and lost lives in the past.●

SPACE COMMERCE ACT

HON. DANIEL K. AKAKA

OF HAWAII

IN THE HOUSE OF REPRESENTATIVES

Sunday, December 19, 1982

● Mr. AKAKA. Mr. Speaker, I have introduced a bill which would streamline the current procedure by which a private company is granted permission to launch a vehicle into space. This bill, known as the Space Commerce Act, is of vital importance to the success of private sector involvement in our Nation's space effort. There can be no question that the commercial era of space has dawned with the arrival of the 1980's. As a Congress, we must do what we can to encourage the private sector to invest in space and space-related activities, for as history has shown, an investment in space is one of the soundest economic invest-

ments we can make in our Nation's future.

Under current practice, it is quite difficult for a private company to receive the necessary clearances to launch a vehicle into space. In fact, the process is not only complicated, but often requires a company to spend an inordinate amount of time and money in an effort to receive those clearances. One company which recently conducted a suborbital launch was required to obtain regulatory permissions, clearances, and approvals from five different Federal agencies or bodies: the Federal Aviation Administration, the National Aeronautics and Space Administration, the Department of State, the Federal Communications Commission, and the North American Defense Command. Furthermore, not only did the company have to register with the Internal Revenue Service, but incredible as it may seem, with the Bureau of Alcohol, Tobacco and Firearms as well. As a result of this ponderous procedure, this particular company was required to invest over 6 months and more than a quarter of a million dollars in legal fees to be cleared for launch.

The bill I have introduced simply streamlines the regulatory procedure by establishing a single point of contact within the Federal Government for applicants to obtain permission to launch a space vehicle. Under the terms of this bill, this single point of contact would be responsible for coordinating and facilitating all Federal actions pertinent to private sector space launches. In turn, this single point of contact would issue a comprehensive license for space vehicle launchings to private companies. This bill would in no way abrogate our national security interests, and would certainly result in an efficient and less costly procedure for regulating private space launches.

There can be no doubt that private sector involvement will shape the future of our Nation's space effort in the years ahead. Already, there are at least six companies which have publicly announced their intention to commercialize various aspects of space launch services.

By streamlining the regulatory procedure for companies involved in this activity, this bill encourages the development of new enterprises in the space field—not by subsidy or special treatment, but rather by opening up new opportunities for entrepreneurs. These new business opportunities can be exploited and developed by small and middle size businesses—businesses which form the backbone of our American economy. By streamlining the regulatory procedure, this bill also encourages the creation of new jobs, for as the industry grows, so does the number of people necessary to it.

Passage of this bill will kindle the spark of new investment in America and make clear our commitment to American leadership in new areas of technology and industry.

Passage of this bill will serve to encourage the kind of high productivity which we, as a nation, have long supported.

Passage of this bill, and others like it, can make a real contribution to the health of our economy.

We must not limit our effort in rebuilding America to fixing potholes and decaying bridges. We can, through passage of this legislation, create the conditions necessary for building a bridge to a whole new frontier.

I urge my colleagues to make a commitment to building the bridge to a whole new frontier by supporting this legislation now and in the next Congress.

H.R. 7411

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Space Commerce Act".

FINDINGS AND PURPOSE

SEC. 2. (a) FINDINGS.—The Congress finds and declares that—

(1) the peaceful uses of outer space continue to be of great value and to offer benefits to all mankind;

(2) civilian applications of space technology have achieved a significant level of commercial and economic activity, and offer the potential for growth in the future, particularly in the United States;

(3) new and innovative equipment and services are being sought, created, and offered by entrepreneurs in telecommunications, information services, and remote sensing technology;

(4) the private sector in the United States has the capability of developing and providing private satellite launching and associated services that would supplement the launching and associated services now available from the United States Government;

(5) cost savings could accrue from the private sector developing and providing launching services;

(6) the development of such services would enable the United States to better compete with the launching services now being developed by foreign countries, thereby contributing to the national interest and economic well-being of the United States;

(7) commercial provision of such services is not inconsistent with the national security interests of the United States; and

(8) the United States should encourage and, to the extent reasonably necessary, regulate private sector launching and associated services to provide for the national security and public safety and to carry out the obligations of the United States under international treaties affecting the use of space.

(b) PURPOSE.—It is the purpose of this Act to—

(1) encourage the development by the United States private sector of capabilities for providing launching and associated services;

(2) provide the necessary regulation by the Federal Government to ensure public safety and national security and to carry out obligations of the United States, such as liability for damage from space objects, under applicable international treaties and agreements affecting the use of space;

(3) stimulate private sector applications of Government-developed space technology; and

(4) promote further economic growth and entrepreneurial activity in utilizing the space environment for peaceful purposes.

DEFINITIONS

SEC. 3. As used in this Act, the term—

(1) "launch " means to place, or attempt to place, a space object in a suborbital trajectory, in Earth-orbit in outer space, or in nonearth orbit in outer space, by means of a launch vehicle;

(2) "launch site" is the area defined in the license from which the launch takes place;

(3) "launch vehicle" means any system or systems constructed for the purpose of launching a space object, but does not include the payload;

(4) "license" means a license to launch a space object issued under this Act;

(5) "payload" means an object which an applicant undertakes to launch, including subcomponents of the launch vehicle specifically designed or adapted for that particular payload, but excluding all other parts or components of the launch vehicle;

(6) "person" means an individual or entity, other than an agency or department of the United States Government and other than contractors and subcontractors acting on behalf of any such agency or department;

(7) "Secretary " means the Secretary of Commerce; and

(8) "space object" means any object constructed for launching or operating in space, and includes component parts of such object as well as its launch vehicle and parts thereof and the payload, if any, and parts thereof.

CENTRALIZED RESPONSIBILITY AND AUTHORITY

SEC. 4. (a) The Secretary shall be responsible for carrying out the provisions of this Act, unless otherwise specified.

(b) The Secretary shall designate within the Department of Commerce a primary point of contact for receiving, processing and validating applications for a license under this Act. Such primary point of contact shall coordinate and facilitate all Federal actions pertinent to private sector space launches.

LICENSING FOR LAUNCHING OF SPACE OBJECTS

SEC. 5. (a) IN GENERAL.—(1) Except as provided in section 9(b), no person may launch a space object from the territory of the United States, and no person who is a national of the United States may launch a space object from international waters or air space, except in accordance with a license issued under this section. Any person violating this subsection shall, upon conviction, be subject to a fine of up to $1,000,000 per violation and up to five years in prison or both.

(2) Except for licenses issued under this Act or under the Federal Communications Act of 1934, no license, approval, waiver, or exemption need be obtained from any Federal agency before launching a space object.

(b) AUTHORITY.—The Secretary shall, upon application and in accordance with the provisions of this Act, issue licenses for a launch or launches of space objects.

(c) CONDITIONS.—The Secretary shall issue a license under subsection (b) only if the Secretary—

(1) receives assurances from the applicant sufficient to convince the Secretary that the

applicant will meet the liability insurance requirements of section 6 of this Act;

(2) determines that the proposed space objects and launch sites provide reasonable assurance that there will be no undue risk to the safety of the public or to national security;

(3) determines, in consultation with appropriate Federal agencies, that the applicant would qualify for any license, approval, waiver, or exemption with respect to space object launches required to be obtained under Federal law in effect before the date of enactment of this Act, if such license, approval, waiver, or exemption were still required;

(4) approves the proposed payload, if any; and

(5) determines that there is reasonable assurance that the obligations of the United States under international treaties and agreements affecting outer space will continue to be met.

(d) PROCEDURE.—(1) Any person may file with the Secretary an application for a license to launch a space object. Such application shall be filed not later than one hundred and eighty days before the first proposed launch. The application shall contain the following information:

(A) The name and address of the owner or owners of the proposed space objects.

(B) The proposed launch site or sites.

(C) The proposed trajectories of the launches and proposed orbital parameters.

(D) A description of the space objects.

(E) The proposed and reasonable alternative launch dates and times.

(F) Potential safety and environmental hazards associated with any proposed launch.

(G) Procedures intended to be employed for protecting the public safety with respect to the proposed launches.

(H) A description of the payload, if any.

(I) Such additional information as may be reasonably required by the Secretary.

(2)(A) The applicant must notify the Secretary of any substantial changes of material fact with respect to an application when such changes are known and occur prior to the launch.

(B) Any information submitted by an applicant under this subsection which is labeled as proprietary by the applicant shall not be disclosed to the public.

(3) Within thirty days after receipt of an application under paragraph (1), if the Secretary determines that such application is a full and complete application conforming to the application requirements of this Act, the Secretary shall publish in the Federal Register notice of the receipt of a full and complete application for a license to conduct a launch or launches under this Act. Such notice shall invite public comment for a period of thirty days, and the Secretary shall consider any such comments in determining what action to take on such application.

(4) Within ninety days after the filing referred to in paragraph (1), the Secretary shall act either to issue, deny permanently, or deny temporarily a license to carry out the activities requested by the applicant. The Secretary shall furnish a written report setting forth the basis of such action, including, in the event of a license denial, a discussion of alternative arrangements which would mitigate the reasons for denial.

(5) Any applicant whose application is denied, or is approved with conditions unacceptable to such applicant, under paragraph (4) may file a petition with the Secretary within ten days after such action for reconsideration of such action. Within thirty days after the filing of any such petition for reconsideration, the Secretary shall hold a hearing on the record to consider the issues raised in the petition. Petitioners shall have a reasonable opportunity at such hearing to present their views, to present evidence, including documents, depositions and oral testimony, and to examine witnesses. Within thirty days after such hearing, the Secretary shall enter a final order granting or denying the license.

(6) Subsequent to a final order under paragraph (5), the petitioner may seek judicial review in the United States district court whose jurisdiction includes the location of the proposed launch site, or in the district in which the petitioner resides or may be found or is incorporated.

LIABILITY INSURANCE

SEC. 6. (a) Before launching any space object, the applicant must obtain liability insurance from a financially responsible source which is sufficient to cover the risks associated with such launch and subsequent space operations.

(b) In accordance with the provisions of section 9 of this Act, the Secretary shall issue regulations setting forth the levels of insurance coverage sufficient to satisfy the requirements of subsection (a).

SUSPENSION OR REVOCATION OF A LICENSE

SEC. 7. Whenever a licensee fails to comply with any applicable provision of this Act, or any applicable rule, regulation, restriction, or condition issued or imposed by the Secretary under this Act, the Secretary may suspend or, if the failure to comply is knowing and continues for a period of thirty days after the Secretary, by registered letter, mails notification of such failure to the licensee at its recorded post office address, revoke a license issued under this Act.

EXCLUSIONS

SEC. 8. The provisions of this Act shall not apply to any launch of a space object authorized under the National Aeronautics and Space Act of 1958 by or on behalf of the United States Government.

REGULATIONS

SEC. 9. (a) The Secretary shall, as soon as practicable but not later than one hundred and eighty days after the date of the enactment of this Act, issue regulations implementing the provisions of this Act.

(b) Pending the issuance of regulations under subsection (a), the Secretary shall make provisions to permit launches by private sector entities by granting interim permits to those entities that the Secretary determines will conform to the provisions of this Act.

COMMERCIAL SPACE STUDY COMMISSION

SEC. 10. (a) There is established the Commercial Space Study Commission (hereafter in this Act referred to as the "Commission").

(b) The Commission shall consist of nine members, six of whom shall be selected by the chairman of the Committee on Science and Technology of the House of Representatives and the chairman of the Committee on Commerce, Science, and Transportation of the Senate, in close consultation with the chairman of the House Subcommittee on Space Science and Applications and the Senate Subcommittee on Science, Technology, and Space, from among individuals qualified and expert in the development of commercial space activities. In appointing such members, an attempt shall be made to ensure that Government agencies, private companies contracting to do work for the Government, and private companies without Government contracts have equal voice on the Commission. The Federal Aviation Administration, the Federal Communications Commission, and the National Aeronautics and Space Administration shall be represented by one member each on the Commission.

(c) The Chairman and Vice Chairman of the Commission shall be designated from among the six appointed members of the Commission at the time of appointment.

(d) Vacancies in the membership of the Commission shall not affect the powers of the remaining members to execute the functions of the Commission and shall be filled in the same manner in which the original appointments were made.

(e) The first meeting of the Commission shall be called not more than ninety days after the date of enactment of this Act.

(f) Five members of the Commission shall constitute a quorum, but a smaller number specified by the Commission may conduct hearings.

(g) While away from their homes or regular places of business in the performance of services for the Commission, members of the Commission (including members who are full-time officers of employees of the United States) shall be allowed travel expenses, including per diem, in lieu of subsistence, in the same manner as persons employed intermittently in the Government service are allowed expenses under section 5703 of title 5, United States Code.

(h) Subject to such rules and regulations as may be adopted by the Commission, the Chairman may—

(1) appoint and fix the compensation of an executive director, a general counsel, and such additional staff as he deems necessary, without regard to the provisions of title 5, United States Code, governing appointments in the competitive service, and without regard to chapter 51 and subchapter III of chapter 53 of such title relating to classification and General Schedule pay rates, but at rates not in excess of the maximum rate of pay in effect from time to time for grade GS-18 of the General Schedule under section 5332 of such title; and

(2) procure temporary and intermittent services to the same extent as is authorized by section 3109 of title 5, United States Code, but at rates not to exceed $100 a day for individuals.

(i) Subject to section 552a of title 5, United States Code, the Commission may secure directly from any department or agency of the United States information necessary to enable it to carry out this title. Upon request of the Chairman of the Commission, the head of such department or agency shall furnish such information to the Commission.

(j) The Commission may use the United States mails in the same manner and upon the same conditions as other departments and agencies of the United States.

DUTIES OF THE COMMISSION

SEC. 11. (a) The Commission shall conduct a study of the direction of future Government involvement in, support of, and regulation of private sector commercial activity in outer space.

(b) The Commission shall conduct such hearings as it considers appropriate and shall provide notice of such hearings to the public, including information concerning the date, location and topic of each hearing.

The Commission shall take such other actions as it considers necessary to obtain full public participation in the study undertaken by the Commission. All meetings of the Commission shall be open to the public.

(c) Within one year after the date of its first meeting, the Commission shall publish a draft report of the findings of the study and shall distribute copies of the draft report to appropriate Federal agencies and, upon request, to members of the public. The Commission shall solicit written comments from the organizations and individuals to whom copies of the draft report are distributed.

(d) After taking into consideration any comments submitted to the Commission, the Commission shall issue a final report of the results of its study within nine months after the publication of its draft report. The Commission shall submit copies of the final report and copies of all written comments on the draft submitted to the Commission under paragraph (c) to the President, to the Committee on Science and Technology of the House of Representatives, to the Committee on Commerce, Science, and Transportation of the Senate, to appropriate Federal agencies, and upon request, to members of the public.

(e) The Commission shall make recommendations for appropriate legislative action to the Congress based on its findings and conclusions under subsection (a) of this section.

TERMINATION OF THE COMMISSION

SEC. 12. Upon the expiration of the sixty-day period following the submission of the report required by section 11(d), the Commission shall cease to exist.●

INTERNATIONAL SYMPOSIUM TAKES AIM AT DRUNK DRIVERS

HON. MICHAEL D. BARNES

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Sunday, December 19, 1982

● Mr. BARNES. Mr. Speaker, last month I participated in an International Symposium on Alcohol and Driving, sponsored by the American Insurance Association and the Insurance Information Institute. More than 600 persons active in the day-to-day battle to get drunk drivers off the Nation's highways attended the symposium here in Washington. They were representatives of Federal, State, county, and city governments, including legislators, the judiciary, and regulatory agencies; citizens' groups, academia, the clergy, a variety of business organizations, and the media.

Each of the 50 States was represented as were several foreign countries. Also, it is noteworthy that many of the participants attended the symposium through scholarships funded by individual companies in the insurance and alcoholic beverage industries.

The symposium featured 30 experts on the problems of drunk driving who examined what programs have been effective in curtailing the drinking drivers and how they could be adapted to different locales. One speaker described the symposium as a meeting she had been anticipating for 20 years.

The underlying message from the symposium is that the drinking driver is in trouble. Public outrage and public concern about deaths and injuries caused by the drinking driver is not going to fade. It will not disappear next year with the expiration of the Presidential Commission on Drunk Driving just as it did not subside with the passage of the Federal drunk driving bill so many of my colleagues joined with me in cosponsoring.

The diversity and dedication of the participants of this symposium give me encouragement that, what has been up to now an uncoordinated movement, can be brought together in a way that will lead to effective deterrence of drinking and driving. Prospects for a continuing coalition of public interest groups to address the problem are bright.

The insurance industry plans to use the symposium as a centerpiece in their communications efforts to keep this problem in the public eye as long as it takes to effect the attitude changes necessary to stop people from driving under the influence of alcohol and drugs.

I congratulate the American Insurance Association and the Insurance Information Institute and other groups that sponsored and participated in this highly successful symposium. It is this kind of dedicated action which insures that the American public will never again passively accept the tragedy of more than 25,000 alcohol-related traffic deaths a year.●

THE HONORABLE EDWARD J. DERWINSKI: A CLASS ACT

HON. FRANK R. WOLF

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Sunday, December 19, 1982

● Mr. WOLF. Mr. Speaker, the adjournment of the 97th Congress will mark the end of a distinguished career in Congress for our colleague from Illinois, ED DERWINSKI.

It has been a privilege and honor to have served with ED for the past 2 years on the Post Office and Civil Service Committee. His actions have reflected his dedication and commitment to the best interests of both active and retired Federal employees. He has served the Nation well and he will leave a void on the committee that will be impossible to fill.

It is with regret that I acknowledge his departure from the House, but we are fortunate that he will continue in public service at the State Department and I wish him continued success in his new position.

I would like to share with my colleagues an editorial in a recent edition of the Federal Times which aptly describes ED as "a class act."

[From the Federal Times, Dec. 20, 1982]

CLASS ACT

Republican members of Congress generally do not make it to the top of the popularity charts drawn by organizations representing postal and federal people. We believe Edward J. Derwinski, a 12-term member from the Chicago suburbs, is one of those rare GOP representatives who captured the affection and respect of most of the federal-postal union and management lobbyists who frequent Capitol Hill.

An example of the good will that Derwinski earned, especially in his capacity as ranking minority member of the House Post Office and Civil Service Committee, was clearly manifested at a farewell roast for him at the National Democratic Club a week or so ago.

To our knowledge Derwinski is the first Republican to be so honored at the NDC.

Among Ed's many well-wishers were the leaders of some of the largest unions and management organizations on the federal scene. From their number, George Gould, legislative honcho for the National Association of Letter Carriers, put Derwinski nicely on the griddle. And Representative Bill Ford, D-Mich., PO&CS chairman, also delivered some astute observations on Derwinski.

For our part, we regret Ed's departure from the House this month, an unhappy shift in fortune that was spurred by a bloody redistricting fight last March. *Federal Times* reporters and editors over the years have appreciated Derwinski's wit and wisdom. It was a pleasure to behold Derwinski's puckish sorties against his colleagues on the other side of the aisle and his ability to gently deflate some of the pompous fellows of both political parties who appeared before the committee.

Derwinski often rained on the parades of employee leaders who through the committee hoped to win such things as the right to strike, Hatch Act repeal, the union shop and other goodies near and dear to the hearts of dues-paying unionists. But to Derwinski's credit, we believe, he was a powerful ally of federal workers when it came to preserving their retirement system. And Derwinski probably had no peer when it came to protecting the U.S. Postal Service.

This newspaper respected Ed's integrity and we appreciated his tart sense of humor. We will miss him in the 98th Congress but believe the qualities that endeared him to his friends and ultimately his ideological foes when he was a congressman will lighten things a bit at the State Department, where Derwinski will be employed beginning in January.

Goodbye, Ed. You are a class act.●

TRIBUTE TO HON. DON CLAUSEN

HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 8, 1982

● Mr. BIAGGI. Mr. Speaker, for the past 19 years, the people of the Second Congressional District of California have said with great pride that their Congressman is DON CLAUSEN. I

rise today to pay tribute to a fine man and colleague.

DON, a California native son, born and raised in Humboldt County will be best remembered by his colleagues for his many contributions as the ranking minority member on the House Public Works and Transportation Committee. DON has been especially effective in this position during this session of Congress and one hopes that some of the legislative initiatives to which he lent his name will find their way into becoming law soon.

DON was especially knowledgeable about aviation matters and was one of the main congressional authorities on the subject. This was evidenced by the fact that in his precongressional life DON was chairman of the California Aerospace-Aviation Education Task Force and later and today the current president of the Congressional Flying Club. DON is also the proud recipient of the Frank G. Brewer Trophy, the Nation's highest award for aerospace education.

DON has been a good friend to many in this House and will be missed. His counsel was sought by many and valued by all who received it. The House will miss DON CLAUSEN but is grateful for all he gave to this institution.●

WALL STREET GETS JITTERS FROM BANKRUPTCIES AND DEFAULTS

HON. GEORGE HANSEN

OF IDAHO

IN THE HOUSE OF REPRESENTATIVES

Sunday, December 19, 1982

● Mr. HANSEN of Idaho. Mr. Speaker, Wall Street gets badly shaken by bankruptcies and defaults as described in the following articles, so how are they going to deal with the unbelievable pending $26 billion bond default of the Washington Public Power Supply System (WPPSS)?

The articles follow:

[From the Wall Street Journal, Aug. 17, 1982]

CHASE CDS ARE VIEWED WITH UNEASINESS AFTER LOMBARD FILINGS FOR BANKRUPTCY

(By Tim Carrington)

(Chase's certificates of deposit are being regarded cautiously by traders in the wake of the big bank's exposure to possible losses from the collapse of Lombard Wall Inc. and an allied government securities firm last week.)

NEW YORK—Chase Manhattan Bank's exposure to possible losses in the recent collapse of two affiliated government securities firms has spawned squeamishness among traders toward the bank's certificates of deposit.

The market jitters stem from the latest in a series of financial calamaties that have involved Chase—the bankruptcy filings of Lombard-Wall Inc., a government securities firm, and Lombard-Wall Money Markets Inc., an allied government securities firm. Chase has an unsecured-claim for $45 million against Lombard-Wall Inc., according to papers filed in federal bankruptcy court here by Lombard-Wall Inc.

Chase has said its exposure is considerably less than that, but traders and money managers are looking at the bank's short-term credit with caution. Some are shying away from the CDs entirely, while others are "buying them on the run," or for short periods, says the top trader with one major money manager.

Chase, like other banks, issues certificates of deposit continuously and depends on these short-term securities as a source of funds.

A Chase spokesman said that despite the reported turmoil in the secondary market for the CDs, the bank isn't increasing the interest it pays on newly issued certificates above what other money center banks are paying. Traders, however, say they expect that the bank may be pushed into paying higher interest on its CDs if the marketplace continues to treat the securities as more risky than those issued by the other large banks.

Some of the nervousness is cumulative. The Lombard-Wall bankruptices come on the heels of two other debacles that sent shudders through the financial community—the collapse in May of Dryside Government Securities Inc., which traded through Chase, and the failure in July of Penn Square Bank which sold loans to Chase, and to other large banks.

"It's a matter of the bank being unlucky." said one trader. "It would be nice if they missed something once in a while."

Some believe the market reaction is chiefly emotional. "I haven't changed my attitude toward the Chase at all," said Joseph Di Martino, executive vice president of Dreyfus Corp. But he added, "Whether it's reasonable or not, this is the way people are trading.".

Some market professionals say they're steering clear of Chase CDs not out of fears that the bank won't meet its obligations but out of a desire to avoid the appearance of making risky investments. Managers of money-market funds, for example, have to answer to thousands of shareholders. "When something gets controversial, people stay away from it, not for investment reasons, but because of a feeling of Who needs it?" said Mr. Di Martino.

The market treatment of Chase's certificate echoes the skittish reaction to CDs of Continental Illinois National Bank & Trust Co., although traders say the nervousness over the Chase securities is less intense. Anxiety over the Chicago bank's certificates forced the institution to remove itself last month from the dealers' run of 10 banks whose CDs are interchangeable in terms of price and yield.

Although the Chase CDs are currently receiving less favorable treatment than the remaining eight banks' CDs, traders don't expect that Chase will be forced to withdraw from the "top tier" as Continental did. Continental has been beset by loans it has bought from the failed Penn Square Bank and by other troubled loans it made in the energy area.

In the futures markets, some traders were expressing a reluctance to accept Chase CDs as delivery against CD futures contracts. Continental faced similar problems last month, and asked the Chicago Board of Trade to remove its name from the list of banks whose CDs are approved for delivery against futures contracts. Traders say they don't expect Chase will have to take similar steps.

Meanwhile, the slumping demand for Chase CDs has created trading opportunities for some participants. Edward Kantor, a senior executive vice president of Drexel Burnham Lambert Inc., said "I'm looking at the Chase as a very viable institution: it's an opportunity to buy the paper on a spread." But he said that Drexel's moneymarket fund is showing caution toward Chase CDs as a result of shareholder worries.

[From the Wall Street Journal, Aug. 17, 1982]

LOMBARD-WALL FAILURE MAY CAUSE LOSSES FOR DOZENS OF NEW YORK STATE INSTITUTIONS

(By Daniel Hertzberg)

ALBANY, N.Y.—Dozens of colleges, hospitals and other institutions in New York state face possible financial losses in the collapse of Lombard-Wall Inc., a government securities firm.

The institutions own $305 million in idle cash entrusted to Lombard-Wall by the New York State Dormitory Authority. State officials privately concede that some losses are likely from the Lombard-Wall investments, although William A. Sharkey, executive director of the dormitory authority, predicts that any losses will be "readily manageable." The authority says that $55 million of its loans to Lombard-Wall don't have government securities behind them as collateral.

In any event, some of the organizations could be caught in a cash squeeze, state officials here warned.

Lombard-Wall and an allied government securities firm, Lombard-Wall Money Markets Inc., filed bankruptcy petitions last Thursday that listed the dormitory authority as their largest unsecured creditor.

But dormitory authority officials said yesterday that the funds it lent to Lombard-Wall belong to more than 50 nonprofit institutions in the state that employed the dormitory authority as a financing tool.

"It's their money," Mr. Sharkey said. He asserts that the authority isn't responsible for making up any losses incurred by the various educational and medical institutions.

The dormitory authority has only $15 million of its own funds invested with Lombard-Wall.

The state authority, by selling tax-exempt bonds, is supposed to raise funds at a low cost for the construction of buildings by colleges, hospitals and other institutions in New York. The authority then distributes the money as each project progresses, meanwhile investing any idle funds to earn interest.

REPURCHASE AGREEMENTS

The institutions are ensnarled in the Lombard-Wall situation because of their involvement with the dormitory authority. The identities of most weren't known immediately when the two Lombard firms filed for bankruptcy last week. As previously reported, there also are more than 100 financial institutions that had cash and/or securities at the two firms, and thus also are enmeshed in the situation.

The college and hospital funds were entrusted to Lombard-Wall by the dormitory authority. Lombard-Wall sold the institutions government securities under repurchase agreements. Under those agreements, Lombard-Wall agreed to buy back the securities at a fixed price. In effect, the agree-

ments represented loans to Lombard-Wall, and the institutions were paid interest while the agreements were in effect.

Mr. Sharkey said that the funds invested in Lombard-Wall included about $162 million belonging to units of the City University of New York. A large part of the money eventually was earmarked for major construction programs for York College and Manhattan Community College. "I'm shocked," said Donal Farley, vice chancellor of facilities for City University. "We assumed that this was money that was really safe."

An additional $43.4 million invested with Lombard-Wall is construction money intended for New York Hospital, a private institution, state officials said. Lesser but still considerable sums belong to such institutions as Columbia University, New York University and Long Island Jewish Hillside Medical Center.

CASH SQUEEZE THREAT

Mr. Sharkey said that a more immediate threat is a cash squeeze for a handful of the institutions whose unspent construction funds are 100% invested at Lombard-Wall. It is possible that bankruptcy proceedings could tie up the money for months. Mr. Sharkey said that one such institution, Bronx Community College, will have to find $2.1 million in the next three months to continue its construction program.

However, Mr. Sharkey disclosed that a major bank and a large "investment house" last Friday offered to provide "interim financing" for the dormitory authority. He declined to name either possible lender. He said that the authority, in addition to borrowing, is prepared to sell other securities it holds in order to prevent the suspension of construction work at any of the projects it financed.

At least two other New York public agencies have extensive investments with Lombard-Wall. New York City Housing Development Corp. reports that it has $130 million in repurchase agreements with the securities firm, while the city's Health & Hospitals Corp. has $29.6 million.

Lawyers for the dormitory authority and housing agency asked the federal bankruptcy court in Manhattan yesterday for an order permitted them to sell government securities held under repurchase agreements with Lombard-Wall.

DEFAULTS POSSIBLE

Otherwise, they said, the authority might encounter construction delays. And the housing agency's executive director, Michael C. Smith, warned that the agency might be forced to default on its bond and note debt service, which he said "would have a catastrophic effect" on the agency's "ability to issue new bonds and notes and to continue its construction programs." That, he added, also would hurt note and bond issues of New York City and state, and the municipal bond market in general.

However, Mr. Sharkey cautioned that a gradual sell-off of the securities may be "more prudent" than an immediate sale to prevent losses. Some state officials claimed that if interest rates continue to fall, the resulting rise in securities prices could largely eliminate any losses to institutions that have money with Lombard-Wall.

Some money managers say that part of the current problems stem from the dormitory authority's insistence that the colleges and institutions leave unspent bond-sale funds with the authority for investment. Mr. Sharkey says most of the idle funds—$305 million out of a total of $498 million—were invested with Lombard-Wall in repurchase agreements lasting as long as three years.

Since the Lombard-Wall bankruptcy filing, the authority has altered its investment policy, he says. From now on idle funds will be invested in certificates of deposit of major banks or directly in government securities.●

MARCONI ANNIVERSARY NOTES FIRST TRANSMITTAL BY RADIO

HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Sunday, December 19, 1982

● Mr. BIAGGI. Mr. Speaker, it is with great pride that I bring to the attention of my colleagues the 80th anniversary of the first transmittal of radio across the Atlantic by the famed Italian inventor, Guglielmo Marconi.

Few of us appreciate the importance of this event. Yet, had it not been for Marconi's dedication and diligence—as well as intellect—we would not be able to reap the benefits of radio communication today. Thanks to the tireless dedication of Marconi's daughter, Gioia Marconi Braga, his memory as well as his achievements have been kept alive. I have had the distinct pleasure of working with Mrs. Braga, most recently in helping to coordinate an exhibition of Marconi's work at Columbia University in New York.

For the benefit of my colleagues, I wish to insert into the RECORD an article from the Sunday New York Times which details Marconi's life and work.

[From the New York Times, Dec. 19, 1982]

MARCONI HAILED ON 80TH ANNIVERSARY OF RADIO MESSAGE

(By Richard Severo)

To the Government in Rome, which had spent the better part of three millenniums trying to cope with a peninsula of individualists, Guglielmo Marconi seemed especially presumptuous.

He was not yet 20, expressed disdain at the prospect of going to college, seemed awash on an island of gentle aloofness nurtured by his own dreams, yet had the audacity to go to Rome and ask the Government for research money because of some curious experiments he had conducted in the attic of his parents' villa in Bologna. These, he said, convinced him he could achieve wireless telegraphy. The Italian Government sent him packing.

The 80th anniversary of the first use of Marconi's wireless to transmit messages across the Atlantic was marked Monday. Marconi's daughter, Gioia Marconi Braga, went to the fishing and coal mining town of Glace Bay, Nova Scotia, which was the North American point for the 1902 transmission to England.

COMMEMORATION VIA TELEVISION

Edward R. Schreyer, the Governor General of Canada, and Sandro Pertini, the President of Italy, exchanged messages via trans-Atlantic television, the technological progeny of Marconi's brainchild.

In 1901, a year before Marconi's trans-Atlantic transmission, he had succeeded in transmitting a single letter, "S," across the Atlantic in Morse Code. But it was in 1902 that actual messages were sent and his profound achievement became acknowledged by even skeptics. The result was that modern concepts of time, space, distance and communications became irrevocably altered.

Mrs. Braga, who has homes in New York City and New Jersey, is an elegant woman of much vitality. She reminisced about her father.

THOUGHTFUL FATHER RECALLED

"He was formal, reserved, thoughtful," she said. "Of course, by the time I was born, my father was already in his 40's. He was famous and he traveled a great deal. But when he was with us at home, he was very attentive. I was chubby in those days, and he called me 'Puffet.' And he insisted that we write to him in Italian when he wasn't at home. He was very affectionate and concerned about our studies."

Mrs. Braga also said her father loathed "small talk" at social functions, but became eloquent and "fascinating" if he found someone who wanted to talk about one of his interests, such as science or music.

Marconi himself, she said, was completely bilingual but clung tenaciously to his Italian language and culture. He derived most of his skills in English from his mother, Anne Jameson, an Irish woman of Scottish descent whose family had a distillery in Dublin.

ENCOURAGED BY MOTHER

It was Marconi's mother who encouraged his experiments at Bologna, while Marconi's father, Guiseppe, scowled and said that his son would be better advised to stop monkeying with strange-looking coils in the attic and instead go to the Italian Naval Academy at Leghorn.

Mrs. Braga says her father was very fond of opera and, consistent with his preference for self-instruction, taught himself to play his favorite arias on the piano. He also liked vaudeville, which helped him take his mind off his work.

After he became famous, he was befriended by Pietro Mascagni, Arturo Toscanini and Enrico Caruso, whose music he loved and whose fame his wireless spread to millions of people. Caruso, who loved to sketch, created a cartoon of Marconi in 1912. Mrs. Braga has copies of it, but says she does not know who has the original now.

A FAITH IN SUCCESS

She also recalls that despite his seriousness and his dedication to science's dispassionate pursuit of cosmic truth, Marconi had a kind of mystical faith that his radio waves would cross the Atlantic, without really knowing that the ionosphere would prevent them from straying into outer space.

He also differed from the 19th-century idea of what a scientist should look like, in that he was very careful about his clothes. He did not fit the image of a shaggy man in baggy clothes, forever locked in his laboratory. He liked suits that reflected his own restraint, made by his favorite English tailors in Savile Row.

Another daughter, Degna Marconi Paresce, who now lives in Rome, became his biographer.

Seven years ago, on the 100th anniversary of her father's birth, Mrs. Braga founded the Marconi International Fellowship, an award for researchers in the physical sciences who further telecommunications for

the common good. The prize of $35,000 is administered by the Polytechnic Institute of New York.●

A TRIBUTE TO JIM MATTOX

HON. PHILLIP BURTON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 16, 1982

● Mr. PHILLIP BURTON. Mr. Speaker, I rise to pay tribute to my colleague JIM MATTOX, who will be leaving us at the end of the 97th Congress.

JIM is a dedicated and hard-working legislator who has made many valuable contributions during his 6 years of service in the House. His hard work here has led to his being elected attorney general of the State of Texas. JIM's departure is unfortunate for the House, however, I am sure he will continue his good work for the people of Texas. I wish him the best of luck.●

PROSPECTS FOR PEACE IN THE MIDDLE EAST

HON. JOHN J. LaFALCE

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Sunday, December 19, 1982

● Mr. LaFALCE. Mr. Speaker, during the recent congressional recess, I had the opportunity to join a number of my colleagues in a factfinding trip to the Middle East. I visited Jordan, Egypt, and Israel meeting and talking with King Hussein, President Hosni Mubarak, Prime Minister Menachem Begin, Defense Minister Ariel Sharon, Israeli Labor Party leader Shimon Peres, municipal officials of Jerusalem and the West Bank, professors at Hebrew University, and others. I had the opportunity to hear, personally, in private meetings, their views on the prospects for peace in the Middle East.

We discussed President Reagan's Peace Initiative; the effect of Israeli settlements on the West Bank on both the peace process and the character of Israel; the role of the PLO and of Jordan in continuing peace discussions after Camp David; the need for Israel to be recognized and to live within secure and protected borders; and a host of other issues.

I left for this trip supportive of President Reagan's peace proposal—supportive of his decision to seize the opportunity afforded by the war in Lebanon. The President declared to the Arab nations in his initiative: "The time has come for a new realism on the part of all peoples of the Middle East. The State of Israel is an accomplished fact." He was unwavering in his support for secure borders for Israel. "It deserves unchallenged legitimacy." He opposed a return to the pre-1967 borders. He rejected the establishment of a Palestinian state on the West Bank.

I was able during my discussions with Menachem Begin to feel even more strongly that the PLO, if it is to be a negotiating partner in any peace process, must become a changed PLO. Begin noted that the PLO Charter calls for the destruction of Israel. He said: "How can you deal with an organization that says it wants to destroy you?" Clearly you can't.

I was able to sense King Hussein's desire to be at that peace table. He said:" Time is running out, and running out fast; so we, the United States and everybody have to move fast if we are going to avoid a catastrophe in the Middle East and the world."

I found myself in agreement with Shimon Peres and the academics in Israel as they expressed their concern that Israel would either lose its identity as a Jewish state or as a democratic state, if it absorbed the 1.3 million Arabs on the West Bank against their will. Peres said: "We are coming to de facto annexation which would destroy the character of Israel. . . . It will force Israel to become a dominating nation," and no longer a Jewish nation.

I heard Mubarak talk proudly about Egypt's role in the peace process and its commitment to pursuing peace even further. "We started the peace process, we are committed to the peace process, and we will continue the peace process."

These personal conversations are to be treasured—both for the knowledge and insight gained as well as for the privilege to meet candid, devoted, intelligent leaders. It would be ideal if all of my colleagues, and indeed, all Americans, could have such an opportunity. Obviously, that is not possible. What is possible, however, is to read about the subject and to seek views from many individuals steeped in background and knowledge about the Mideast.

One such individual is Henry Kissinger. Mr. Kissinger talks about prospects for peace in the Middle East in an interview with the Economist of London. Anthony Lewis has highlighted Kissinger's views in a New York Times op-ed piece entitled, "Kissinger on the Mideast."

Kissinger expounds upon the issues I have briefly mentioned. On the question of Israeli de facto annexation of the West Bank, Kissinger begins: "It is not even in the interest of Israel, however narrowly conceived." On the issue of Arab recognition of Israel, Kissinger stresses that mere recognition, verbal formulae is insufficient. The Arabs must negotiate the hard questions of security.

Kissinger praises President Reagan's peace proposal and defines its elements. He calls King Hussein the key actor. He urges Israelis and Arabs to seize the moment. The Economist article begins with Kissinger's statement: "The circumstances for progress in the Middle East are the best I can remember."

I agree and urge my colleagues to read "Kissinger on the Mideast." The article follows:

KISSINGER ON THE MIDEAST

(By Anthony Lewis)

Israel has the undoubted military power now to proceed with the de facto annexation of the West Bank. That process has already gone very far, and it is accelerating. Is it conceivable, then, that there can still be negotiation about the future of the West Bank? That question was put to Henry Kissinger recently. He answered:

"It is not only conceivable; it is imperative. Annexation of the West Bank—overt or disguised—will sow the seeds of endless crises, one of which will inevitably erupt into conflagration. It is not even in the interest of Israel however narrowly conceived.

"The incorporation of Gaza and the West Bank into Israel will sooner or later produce an Arab majority that will destroy the essence of the Jewish state. And if Israel seeks to escape this dilemma by expelling all the Arabs it will lose the moral support of even its best friends. Over an historical period Israel would not be able to withstand the crisis that would result."

Mr. Kissinger talked about prospects for peace in the Middle East in an extended interview with The Economist of London. The interview is must reading for anyone concerned about the area. For it conveys with rare clarity the urgency of the situation for all the immediate parties: Israel, its Arab neighbors, the United States.

In the wake of the Lebanese war, many people see a new opportunity for a peaceful settlement of the Arab-Israeli conflict. Mr. Kissinger says "The circumstances for progress" are "the best I can remember." But he warns that the opportunity is limited, that things may get much worse if the parties let it slip away. And the danger is that both Israel and the Arabs will be immobilized by illusions.

The Israeli illusion, Mr. Kissinger suggests, is that "somehow or other they can maneuver events to a de facto annexation of the West Bank." Thus the Begin Government intends to go on taking land in the occupied territory, building vast suburban developments there and agreeing to negotiate only an "autonomy" for the Palestinian inhabitants so narrow that, as Mr. Kissinger says, it "deprives the word autonomy of its dictionary meaning."

The Arabs' illusion, as he sees it, is that American pressure will force Israeli withdrawal from occupied territory in return for only "verbal formulae"—that is, Arab recognition of Israel without effective protection for its security. Such a course would mean the demoralization of Israel, Mr. Kissinger warns, and the Arabs must not think it will be allowed to happen. They must negotiate the hard questions of security.

He praises President Reagan's peace proposal for the Middle East because it directly addresses those illusions and offers an alternative path of realism. Mr. Kissinger defines its essential elements as follows:

"(1) That the negotiating partners on the West Bank should be Jordan and Israel; (2) that the West Bank authority elected by Palestinians should be associated with Jordan; (3) that annexation of the West

Bank and Gaza by Israel will not be accepted by the United States or by any other country; (4) that there be a moratorium on new Israeli settlements on the West Bank during a peace process; (5) that the negotiation must deal with Israel's security as well as recognition."

If the crucial need for Israel is security undertakings, the Palestinians in the West Bank and Gaza must have "a decisive role, a political role, in determining their political future, within the framework of association with Jordan." As for the P.L.O., Mr. Kissinger says its role will depend on "a true turn towards the political option." It is here that the urgency of movement on the Reagan plan comes in. "Reagan's initiative must yield some tangible results," Mr. Kissinger says, "while the impact of the P.L.O.'s lost military option is still fresh in everybody's mind." If there are no results in 12 to 18 months, the region may slip toward radical visions—and instability as far away as the Persian Gulf.

King Hussein is the key actor now. "If Hussein steps forward and we stick to our course," Mr. Kissinger says, "many Israeli fears will be reduced. . . . In a serious, sustained negotiation with Hussein I do not believe that any Israeli government could maintain opposition in principle to the return of the overwhelming majority of the Arab populations to some form of genuine Arab control."

A month from now the Reagan plan will come to a critical test. King Hussein is to meet the President in Washington Dec. 21. He has spoken favorably of the plan but has not yet done the essential: said he is ready to negotiate with Israel. He needs some gesture of hope and assurance—which in Mr. Kissinger's analysis would be the moratorium on West Bank settlements.

Many of us who criticized Henry Kissinger when he was in office have not changed our view that on such issues as Vietnam and Chile he used power beyond the limits of decency. (We can expect to learn more about his role in Chile in a forthcoming Atlantic Monthly article by Seymour Hersh.) But on the Middle East he has consistently been both practical and far-sighted. Israelis and Arabs should listen to him now, and act before it is too late.●

WPPSS—WALL STREET GETS BILLIONS

HON. GEORGE HANSEN

OF IDAHO

IN THE HOUSE OF REPRESENTATIVES

Sunday, December 19, 1982

● Mr. HANSEN of Idaho. Mr. Speaker, WPPSS, it is as large as the Polish debt, $26 billion, and as disastrous as a Polish joke. Five large nuclear reactors financed and put under construction in the Pacific Northwest by the Washington Public Power Supply System (WPPSS, pronounced WOOPS) in scandalous circumstances which may finally prevent any revenue-producing electrical production and have the Northwest in bondage to Wall Street for an unbelievable $26 billion. This amazing story is told in the following article of the July/August 1982 issue of Pacific Northwest:

WHO'S GETTING RICH OFF WPPSS—WASHINGTON'S NUCLEAR POWER FIASCO HASN'T BEEN A DISASTER FOR EVERYBODY

(By Barry Mitzman)

When God visited a plague of locusts upon the Egyptians, you can bet that the local exterminators made a lot of money. And back in 1889, after Seattle burned to the ground, carpenters could charge pretty much what they wanted, and did. Even when Mount St. Helens blew its top, some people celebrated, especially the makers of ash masks and novelty T-shirts. Let's face it: disasters can be good for business.

So it is with the ill wind that has come to be known as "Whoops," the Washington Public Power Supply System. On the surface, you might think WPPSS has been an unmitigated catastrophe. You might say its plans to build five nuclear plants are in disarray—three projects have been shelved and the one nearing completion may be unsafe to operate. Getting to this dead end, you might note, has so far cost some $8 billion in borrowed money, and may end up costing more than $100 billion, including interest, before the agony is over. You might say the future of the Pacific Northwest has been mortgaged away, and all for nothting.

But look on the bright side. Sure, WPPSS has squandered enough $1 bills to wrap around the earth's equator 30 times over. But that money has not disappeared. It is percolating through the economy. It is creating big profits for construction companies, some of the bond holders, bond underwriters, lawyers, banks, consultants, more lawyers, university professors, and even a few magazine writers. The money flows, often into the most surprising hands, like those of tennis star Bobby Riggs and Washington Post editor Ben Bradlee. The T-shirt people are only now beginning to cash in.

Of course, you may never have thought of WPPSS as an economic boon, because the media have been focusing on the many ratepayers wailing over the electric bills. Yet meanwhile, largely overlooked, thousands of WPPSS beneficiaries are crying all the way to their Caribbean vacations. What is their secret? Can you, too, profit from the runaway spending still to come? Here is how others have been enriched by the WPPSS debacle.

Perhaps the first people to realize the full potential for making money from WPPSS were the contractors, the many construction companies and engineering firms that have been trying to build the nuclear plants at Hanford and Satsop for nearly a decade now. Unlike the WPPSS projects, other nuclear plants have usually been built by one or only a few prime contractors who hire and supervise various specialized subcontractors. Thanks to a recently amended state law, which formerly required WPPSS to let contracts based on competitive bids, many different companies—more than 500 in all—have been able to win multimillion-dollar WPPSS contracts to do various portions of the construction work. Of course, having so many contractors—between 45 and 65 at each site—has caused some problems. They have gotten in one another's way, and they have gotten involved in jurisdictional disputes that cause delay. On plant number two, for example, the mechanical contractor tried to install the cooling system before the architect-engineer had designed it. The installation was wrong, and had to be redone, and some of it redone again, and again, up to 17 times, before the different contractors had a true meeting of the minds.

All this duplication and delay costs money, of course. Yet, paradoxically, contractors have reaped even larger profits than first expected, thanks to the way WPPSS originally wrote its contracts. The agreements guaranteed the contractors a certain profit, a fixed percentage of the total costs of their work. So as the costs ballooned, the contractors' profits ballooned, too. In fact, some cynics suspect that contractors may have deliberately dawdled along and goofed up, just to boost their costs and thus their margins. In any case, the five plants are now several years behind schedule. And their ultimate cost, originally estimated at $5 billion, has risen to $23.8 billion.

Some of the big winners in this high-stakes sweepstakes are well-known corporations: Westinghouse, which has built turbine generators for plant one, two and three; General Electric, responsible for a steam supply system at plant two and for transformers at plant three; and Boeing Construction, which has poured concrete and erected various buildings at plants one and three. New Jersey-based Burns and Roe, which designed the faulty control room at Three Mile Island, is working for WPPSS, as is Babcock and Wilcox, which built the Three Mile Island reactor. Many of the largest WPPSS contracts are held by several firms acting jointly, like the consortium headed by the Seattle construction concern Howard S. Wright. The Wright team took over for the mechanical contractor who made a mess of plant number two. Though the cost of this work was originally set at just under $60 million, the Wright consortium will take in more than $380 million by the time the plant is finished, supposedly next year.

Another contractor whose costs have risen dramatically is a company from Boise which has signed on to perform various construction tasks on plants three and five at Satsop. Before plant five was terminated earlier this year, one of Morrison-Knudsen's contracts had swollen from $40 million to $214 million. (The Boise builder may owe some of its good fortune to a WPPSS director from eastern Washington, Howard Prey, who was one of 23 directors to vote to approve a total of $340 million in new contracts and contract increases for Morrison-Knudsen. As it happens, Prey owns Morrison-Knudsen stock recently worth about $17,000, according to his public-disclosure statement.)

One way these contractors pump up the size of their contracts is by charging WPPSS for a portion of their overhead, or general administrative costs. Companies tend to be creative with these expenses, charging off the costs of executive jets, entertainment, and other "perks." Ebasco Services, chief architect-engineer for the Satsop plants, recently tried to charge WPPSS $11,840 for an executive hunting trip in Texas, according to the agency's records. In 1978, Ebasco charged $157,579 to pay for a convention at the luxurious Breakers Hotel in Palm Beach, Florida. Included in the bill were airfare and gifts for wives, a $5,500 speaking fee paid to Ben Bradlee, and a $2,500 speaking fee plus $1,064 in travel expenses for celebrity tennis player Bobby Riggs.

Though later disallowed by WPPSS auditors, these charges illustrate how generously contractors are willing to share their newfound WPPSS wealth. They do not just hold on to it, they spend it. Much of it goes for the hefty wages paid to construction

workers, like the pipe fitters at Hanford, who are paid $20 an hour to redo the unsafe work they did earlier, also for $20 an hour. Of course, WPPSS directly employs a lot of people too, more than 2,000 of them, most of them supervisory people who spend their days borrowing money and paying it out to contractors. Managing Director Robert Ferguson, for example, takes home $125,000 a year for overseeing the system.

Before plants three and five were terminated, more than 13,000 workers were bumping into one another at the Hanford WPPSS plants, and more than 4,000 were crowded into Satsop. This level of employment boosted the local economies. "A lot of our labor force is attributable to the Satsop project," said George Douglass, manager of the Grays Harbor Chamber of Commerce. Unfortunately, termination of plant five has added to the area's high unemployment rate, recently running in excess of 15 percent.

But if WPPSS is no longer the sugar daddy of Grays Harbor, it still is making a lot of people on Wall Street very rich. In fact, the direct payments for construction and payrolls appear puny when compared with the cash required to pay off WPPSS' current $8 billion debt. Combined principal and interest amount to more than $25 billion, making WPPSS the nation's largest debtor, aside from the federal government itself.

In order to sell bonds, WPPSS must work through Wall Street banks and brokerages. They underwrite the bonds—that is, they buy them from WPPSS and resell them to investors. Some 300 institutions are involved in selling WPPSS bonds, but the four principal underwriters are famous Wall Street names: Salomon Brothers, Goldman Sachs, Merrill Lynch, and Smith Barney. In exchange for their help, the underwriters skim off a small percentage of the bond sale—a small percentage, but a potent one.

When WPPSS sold $850 million worth of bonds last February, for example, the underwriters took 2.798 percent off the top. That may not sound like much, but in this instance it amounted to $23.8 million. WPPSS actually received only about $826 million from the sale, though it must pay off the full $850 million debt. A Merrill Lynch broker brags that WPPSS bond sales "have been the most profitable in our history."

WPPSS has no choice but to pay the underwriters' fees, for it must borrow money, not only to continue construction, but also to pay interest on bonds sold earlier. And there are other costs involved in issuing bonds. Underwriters will not handle them unless they are backed by credit ratings from Moody's and Standard & Poor's, two firms that evaluate whether borrowers are likely to be good for their debts. Both raters recently downgraded some of WPPSS' credit ratings, but WPPSS nevertheless has to pay them each about $25,000 every time it tries to borrow more money.

WPPSS also pays for the services of a financial advisor. Lazard Freres & Co., the firm that led New York City away from the edge of bankruptcy back in 1975, will receive $800,000 in fees for its advice to WPPSS this year, according to the agency's treasurer, James Perko. WPPSS also employs a prestigious New York law firm, Wood & Dawson, for advice on legal matters related to bond sales; the firm gets a retainer plus about $100,000 for every $500 million in bonds sold. A Seattle firm Houghton Cluck Coughlin & Riley, serves as "special counsel." A recent news story in The Seattle Times placed WPPSS' total legal bills from the past years at about $4,2 million.

Yet even all this is small potatoes compared with the really big money—more than $17 billion in interest payments alone—to be had from actually owning WPPSS bonds. As WPPSS has borrowed more and more money, it has had to offer higher and higher interest rates in order to attract investors. Recent issues have carried better than 15 percent annual return, tax free. Last February, if you had bought $10,000 worth of 20-year WPPSS bonds, you would be receiving $1,512 every year for the next 20 years (more than $30,000 in all), plus your original $10,000.

It is a highly attractive investment, made more so by a guarantee from the federal Bonneville Power Administration. Bonneville has agreed to raise the region's electric rates in order to help WPPSS repay its debts from nuclear plants one, two and three. Bonneville's promise does not apply to the $2.25 billion in bonds issued for plants four and five, which makes those bonds riskier, which is why underwriters will not sell any more of them, which is why the plants have been treminated. But bonds for the first three plants, backed by a federal agency and bearing such high interest, are snapped up by investors about as fast as they come on the market.

Among the buyers are many of the nation's largest banks and insurance companies, though no one knows exactly who owns what. Locally, Seafirst Corporation, the holding company for Seattle-First National Bank, owns $16,8 million in WPPSS bonds, while Safeco Insurance has $12 million, and Rainier Bancorporation $10.5 million, according to company executives. Perhaps surprisingly, Northwest institutions now seem reluctant to invest any further in WPPSS. Some say their portfolios are already "saturated" with the bonds, including many older issues carrying only 6 or 7 percent interest. On the used-bond market, these often sell for only about 40 cents on the dollar, their price depressed by the more attractive rates now available. Some investors also admit they are worried about WPPSS' ability to repay its debts on plants four and five. Some institutions have been quietly selling off their bonds for plants four and five, often at a considerable loss. Safeco, for example, once held $10 million in them, but sold all but $2 million two years ago, according to senior vice president Bruce Robb. For all WPPSS bonds, the buyers now are mostly individuals willing to take a risk for potentially large returns.

Even WPPSS headaches, like the threat of default and the ratepayer rebellion, redound to the benefit of some folks. Last fall, Washington voters, angry with WPPSS, enacted Initiative 394, which requires voter approval of the agency's future bond sales. Opponents of the measure, including a lot of contractors and bond underwriters, spent $1.3 million trying to defeat it. That money fattened the advertising revenues of television and radio stations all around the state. And now that three banks, representing WPPSS bondholders, are challenging the initiative in court, a great many lawyers will be kept busy. The Bonneville Power Administration will pay the challengers' legal fees, expected to run at least $750,000, while supporters scramble to raise $200,000 to buy the services of attorney Joseph Califano, late of the Carter administration cabinet.

Not to be left out, academics at Washington State University and the University of Washington have stepped into the WPPSS controversy, recently completing a state-financed study of the need for plants four and five. The study became obsolete when the two plants were terminated, but the couple of dozen professors and graduate students who worked on it cashed in anyway, their salaries making up most of the study's $1.5 million final cost.

And as if all this were not enough, little cottage industries are beginning to spring up around the WPPSS phenomenon. In Kennewick, CF Advertising and Marketing Co. is selling individually packaged "Official WPPSS Mothballs" at 84 cents each to more or less commemorate the shutdown of plant number one. According to owner Debbie Layman, the mothballs "give people something to laugh about, because I think if they don't laugh, they are going to cry." Another small industry was started by Don Meyring, owner of Edmonds Athletic Supply in the city north of Seattle. He is making and selling WPPSS T-shirts, bearing a picture of a boarded-up nuclear plant and the legend: "Whoops! There goes another million kilowatts." Meyring says he has sold about 12 dozen of the shirts at $4.95 each to raise money for his son's slow-pitch softball team. "It was just an idea that occurred to some guys over a pitcher of beer," he said modestly.

Maybe so, but from these humble beginnings may grow a whole new industry. Without stretching the imagination too far, it is possible to foresee a day when stores will be piled high with WPPSS joke books, calendars, ashtrays and cocktail napkins. Maybe there will even be a WPPSS doll. Wind it up and it spends money.

THE EIGHTH WONDER OF THE WORLD

The five nuclear power plants proposed by WPPSS are among the most expensive undertakings in history. Here is how they compare to some of the world's other man-made wonders:

Project and Cost in Current U.S. Dollars	
WPPSS construction estimate for completion of plants 1 through 5	23,800,000,000
Grand Coulee Dam	4,653,000,000
Golden Gate Bridge	555,400,000
Panama Canal	14,916,000,000
Alaska Pipeline	13,501,000,000
Hanging Gardens of Babylon	19,500,000
The Great Wall of China	21,233,000,000
The Taj Mahal	67,600,000
The Great Pyramid (Khufu)	4,317,000,000
Apollo 11 trip to moon (excluding previous flights)	867,000,000
The Vietnam War	40,175,000,000

The estimated cost of completing nuclear plants 1 through 5 was provided by the Washington Public Power Supply System. The final construction cost of the completed Grand Coulee Dam was provided by the U.S. Bureau of Reclamation/Grand Coulee Project. The cost of the original Golden Gate Bridge came from the San Francisco Almanac; the cost of the Panama Canal came from The World Book Encyclopedia; the Alaska Pipeline from the Atlantic Richfield Company; Apollo 11 from U.S. News and World Report; and the Vietnam War from the Congressional Quarterly. Construction costs for all those projects were converted to current dollars with an index provided by Engineering News Record. Cost estimates for the Hanging Gardens of Babylon, the Pyramid at Khufu, the Taj Mahal

and the Great Wall of China assume the use of modern equipmemt and union labor. They were calculated by Peter D. Ackroyd & Associates, a quantity surveying and construction-cost consulting firm based in Seattle.●

FAREWELL TO THREE OHIO COLLEAGUES

HON. LARRY WINN, JR.

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Saturday, December 18, 1982

● Mr. WINN. Mr. Speaker, it is with mixed emotions that I bid farewell to three Ohio colleagues of mine who are leaving Congress. The House will miss BUD BROWN, BILL STANTON, and ED WEBER when we reconvene in January. All three have contributed integrity and dedication to the House and have represented their constituents with distinction.

All of us are familiar with BUD BROWN'S well-known energy expertise. BUD was a great source of information for me as I was considering energy decisions affecting the future of this country. He was also an effective member of the Government Operations and Joint Economic Committee. The people of the Seventh District of Ohio apparently agreed and sent BUD back to Washington nine times in all.

BILL STANTON also served for 18 years. The people of the 11th District were fortunate to have such a well-respected man representing them in Washington. Whether BILL was working skillfully on the floor or attending his committee meetings, his work was always recognized as exemplary.

ED WEBER was not in Washington long, but in the short time he was here, he displayed a strong devotion to reduced spending and lower taxes. Again, the people of the ninth district should be proud of the accomplishments of ED WEBER, whether it be in committee or on the floor. I will always remember ED as a very principled person who held his fundamental beliefs in reverence.

I wish all three of these distinguished men the best of luck in the future. I hope all of them will stay close to the decisionmaking process in some way. They will be missed.●

PRESIDENT REAGAN'S HUMAN RIGHTS POLICY IN REVIEW

HON. TED WEISS

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Sunday, December 19, 1982

● Mr. WEISS. Mr. Speaker, human rights has long been a cornerstone of American foreign policy. President Reagan actively sought to deemphasize human rights in our relations with both allies and enemies from the time he took office. His nomination of Ernest Lefever for the post of Assistant Secretary of State for Human Rights was appropriately met with strong opposition, and Lefever's name was withdrawn.

Many critics remain of the Reagan administration's policy and record on human rights policy. A report prepared by Americas Watch, Helsinki Watch, and the Lawyers Committee for International Human Rights documents problems created by this policy. I want to insert in the CONGRESSIONAL RECORD at this time a portion of that report, evaluating the President's record in Kampuchea, Nicaragua, Pakistan, Paraguay, and the Philippines. The findings presented below add further evidence to the neglect of human rights by this administration.

The work of the organizations who prepared this report and countless other groups around the globe is a vital step toward restoring and assuring fundamental rights for all people, regardless of race, sex, creed, sexual orientation, or ideological belief.

THE REAGAN ADMINISTRATION'S HUMAN RIGHTS POLICY: A MID-TERM REVIEW

KAMPUCHEA

The Reagan Administration has been outspoken in denouncing violations of human rights in Kampuchea. The emphasis has been on violations attributable to the Heng Samrin (Vietnamese sponsored) government. These criticisms are certainly warranted as the Heng Samrin government is totalitarian in character and has been imposed by conquest on the people of Kampuchea. The Administration has taken a strong public stand, as it should, against the detention of political prisoners, severe restrictions on freedom of speech, press and assembly and lack of adequate protections for those who are arrested.

Unfortunately, however, in the process the United States has identified itself with the prior government of Pol Pot, a regime guilty of crimes against humanity on a scale that has few precedents. The Reagan Administration has made it plain that it is far from enthusiastic about the Pol Pot forces. Yet in voting for Democratic Kampuchea to take Cambodia's seat at the United Nations—as the Carter Administration did before it—it places the United States in the awkward position of favoring restoration of a monstous regime to replace a government that engages in systematic violations of human rights. In such difficult circumstances, the only alternative that appears consistent with concern for human rights would be abstention or support for a vacant seat. From the standpoint of human rights, it is wrong for the United States to identify with either side.

NICARAGUA

The Reagan Administration has been more outspoken in criticizing abuses of human rights in Nicaragua than in connection with any other country in the world. Indeed, many serious abuses have been committed by the Nicaraguan government, though some charges by the Reagan Administration are not based on fact.

Unfortunately, the criticisms by the Reagan Administration cannot be said to have had a positive effect on the human rights situation. For one thing, those criticisms stand in marked contrast to the apologies by the Reagan Administration for the abuses in nearby countries. In consequence, the criticisms of Nicaragua do not appear to be rooted in a concern for human rights. Rather they seem to be motivated solely by the geopolitical alignment of the Sandinista government.

A second factor negating the usefulness of the Reagan Administration's criticisms of human rights abuses by Nicaragua has been the administration's support for guerrilla forces seeking to overthrow the Nicaraguan government. The activities of these guerrilla forces have provided the Nicaraguan government with the rationale, or pretext, for many abuses of rights. It is by no means certain that abuses of human rights by the Nicaraguan government would diminish drastically if U.S. support for guerrilla activity were to end. Even so, such support completely undoes any gains for human rights that might be obtained through outspoken U.S. criticism of human rights abuses by the Nicaraguan government.

PAKISTAN

In 1981 the Reagan Administration unveiled a six-year aid package to Pakistan totalling $3.2 billion. Included in that package were 40 F-16 aircraft. In a series of Congressional hearings related to this massive aid package, Administration witnesses carefully steered clear of any discussion of human rights. In one such hearing, before the House Foreign Affairs Committee, the Under-Secretary of State James Buckley described U.S. policy as being designed to help nations in Southwest Asia contribute to their own regional self-defense. Mr. Buckley concluded "we believe this approach is not only the one most likely to succeed but also the one most consistent with our own national principles of non-interference in other people's affairs."

By late 1981, the human rights situation in Pakistan had deteriorated further. The government had suppressed dissent by explicitly prohibiting political activity. It was and still is responsible for hundreds and perhaps thousands of arbitrary arrests, detentions without trial and trials by military tribunals that are not subject to judicial review. Reacting to this increasingly serious situation, Congress added an amendment to the Foreign Assistance Act, in December 1981, Section 620(E), which provides in part that "it is the intent of Congress to promote the expeditious restoration of full civil liberties and representative government in Pakistan." Five months later, in May 1982, the Senate Foreign Relations Committee noted that it was concerned about the "lack of progress" on these issues. The committee report concluded that "the failure to improve the human rights situation and to democratize could also jeopardize authorization and appropriations of assistance in future years."

Undaunted, the Reagan Administration continues to ignore the escalating pattern of human rights violations in Pakistan and to carry on "friendly" relations with the government of President Zia ul-Haq. On Tuesday, December 7, 1982 President Zia met with President Reagan in Washington to discuss mutual concerns. At a meeting characterized by Administration officials by its "openness and warmth" President Reagan did not raise the issue of human rights.

PARAGUAY

In the summer of 1981, the Reagan Administration reversed previous U.S. policy

and voted in favor of an Inter-American Development Bank loan of $7.8 million to Paraguay despite U.S. law forbidding such votes in favor of loans to gross and consistent abusers of human rights. In support of this vote, and similar votes on loans to Argentina, Chile and Uruguay, Secretary of State Alexander Haig said that these loans were justified by "dramatic, dramatic reductions" in human rights violations. The State Department's Country Reports for 1981 retroactively justified this vote on Paraguay by asserting that, "Major violations of the integrity of the individual have decreased over the past three years." These findings contrast with those of Amnesty International which noted in its annual report for the year immediately preceding the loan that "the positive trend noted in the previous AI report . . . was partly reversed." AI continued in the same vein in its report for the year during which the loan was made.

During the year in which the U.S. was portraying improvement, the state of siege—suspending constitutional guarantees—continued in effect in the capital as it has continued in effect since 1954; there was a wave of repression following the assassination in Paraguay of ex-Nicaragua dictator Anastasio Somoza; and an Indian tribe, the Toba-Maskoy, was virtually wiped out as a cultural entity when the government forced it to relocate from the tribe's traditional homeland.

PHILIPPINES

The Reagan Administration's approach to human rights in the Philippines was firmly established by Vice President George Bush during his June 1981 visit to Manila. After meeting with President Marcos, Mr. Bush told the Philippine leader "We love your adherence to democratic principles and the democratic process."

Fifteen months later, in September 1982, during his first visit to the United States in 16 years, President Marcos was warmly welcomed at the White House where President Reagan described him as "a respected voice for reason and moderation." While there was apparently no mention of human rights issues in their private discussions, President Reagan told reporters that the Philippines "had made good progress" on those issues.

In place of human rights interests, Administration policy continues to emphasize U.S. security and economic interests in the Philippines. Talks are scheduled to begin sometime in the spring of 1983 on the renewal of U.S. military base agreements for Subic Bay and Clark Air Force Base. A five year economic support fund program of $200 million is being made available to the Philippine Government as part of the security assistance package tied to the base negotiations. Part of this aid goes directly to the national Police force of the Philippines, called the Philippine Constabulary. This is done without regard for section 660 of the Foreign Assistance Act of 1961 which prohibits any direct assistance to police units or personnel with internal law enforcement responsibilities. In justifying this policy the administration has noted that the United States provides "limited assistance" to the Philippine Constabulary for use in connection with its "internal security responsibilities," as opposed to its "internal law enforcement responsibilities." It is unclear how these are separated.

The Reagan Administration has also reversed the existing United States position in international financial institutions, instructing U.S. Representatives to vote in support of loans to the Philippines; a policy that is clearly at odds with Section 701 of the International Financial Institutions Act. In the first three quarters of 1982, the U.S. voted in favor of 15 loans by multilateral development banks to the Philippines totalling over $107 million. It did not abstain on any proposed loan.

When Administration officials do address themselves to human rights questions in the Philippines, they stress a context of "quiet diplomacy." As one Administration witness told Congress: "We believe this issue (human rights) can best be approached on the basis of friendly relations and grounded in confidence in the United States and its commitments." One result of this approach has been negotiation of a bilateral extradition treaty, which is likely to compel the United States to process extradition requests against prominent Philippine exiles now living in the United States. This treaty was signed by both governments on November 27, 1981 and now awaits assent to ratification by the Senate.

The record of the last two years reveals little to suggest that this approach is working. Since the lifting of martial law in January 1981, there have been continuing reports of arbitrary arrests and detentions, torture, disappearances and extrajudicial executions by government security forces.●

U.S. CONTRIBUTIONS TO INTERNATIONAL ORGANIZATIONS

HON. MICHAEL D. BARNES

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Sunday, December 19, 1982

● Mr. BARNES. Mr. Speaker, today Congress has reaffirmed the importance of strong U.S. participation in international organizations, especially those organizations that provide services to development activities, such as UNDP and UNICEF. Congress has approved a funding level of approximately $249,000,000 of the total International Operations and Programs account, an increase of $34 million over last year's funding level. This year's total includes $140,000,000 for UNDP and $42,500,000 for UNICEF. Congress has shown its willingness to make the financial commitment that these programs deserve, and our contributions for this fiscal year will show that we are serious about progress for development and a better life for the world's children.●

LESSONS LEARNED

HON. MARILYN LLOYD BOUQUARD

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Sunday, December 19, 1982

● Mrs. BOUQUARD. Mr. Speaker, there is a great deal of risk to congressional credibility in releasing confidentially obtained draft reports to the public, especially when the Member releasing such reports attempts to infer his interpretation of the "true" meaning behind the conclusions of the draft report. Although this is a frequent happening on the Hill these days with respect to certain draft GAO reports on nuclear topics, the resulting adverse publicity from such erroneous evaluations does not often reach the national press. When it does, it becomes a meaningful lesson for those of us prudent enough to learn from the mistakes of others. The attached article appeared in the January 1983 issue of Discover magazine and I recommend it strongly to my colleagues who are concerned about the question of such congressional "leaks."

[From Discover Magazine, January 1983]

A MATTER OF RISK

Massachusetts Congressman Edward Markey, chairman of a House interior subcommittee, was up for re-election in a few days, and he could not resist the temptation. He leaked to the Washington Post the results of a complex study on nuclear power plant safety conducted by the Sandia National Laboratories for the Nuclear Regulatory Commission. Rushing into print with the study on November 1, the Post distorted it—as did the UPI and most of the newspapers that repeated the Post story. The result was a spate of scare headlines and television and radio news reports that were wrong by a factor of 10,000.

The Post reported that the "worst case" scenarios—in which more than 100,000 "early" deaths and $300 billion in damages could result—are based on a "Group I" accident, that is, one involving severe core damage, melting of uranium fuel, failure of all safety systems, and the breaching of the containment vessel resulting in the release of massive amounts of radioactive material. The likelihood of such an accident, the Post story explained, was one in 100,000 per reactor-year, which (given the number of reactors operating or planned in the United States) meant a 2 per cent chance of such an accident occurring before the year 2000. That is scary, but woefully misleading.

What the Post obscured, and what most of the rest of the press ignored, is that the worst-case statistics included the worst imaginable weather conditions: no winds at the time of the accident, which would allow the radioactive plume to accumulate, then a wind that would blow it over the heart of a nearby metropolitan area, and finally a rainstorm over the city at the precise moment that the cloud was passing by. The odds against this weather combination, the Sandia study reported, were 10,000 to one—which meant that when all factors were considered the worst-case odds were really one in a billion reactor-years.

In other words, the probability of a worst-case accident in the United States before the year 2000 is not 2 percent, but .0002 percent. That hardly seemed to warrant shutting down nuclear plants. Says David Okrent of UCLA, who specializes in studying low risk, high consequence events, "If society were to stop all activities that have the potential of causing 100,000 deaths, I suspect that we would stop drinking water and eating most of the things we eat. For example, we can calculate that 200,000 people would die from the worst-case failure of a dam in California."

Still, few of the newspapers and television and radio stations that highlighted the original story bothered to correct the facts, and most of the people who learned about

the correction did so only by reading full-page advertisements by the nuclear industry, headlined "Most of the Stories Were Wrong." While the nuclear industry has committed many blunders, it was dead right about the way the Sandia study was reported.

Dade Moeller, chairman of environmental health sciences at the Harvard School of Public Health, says the press seems to think that "nuclear terror sells newspapers." He may be right. A recent study by Public Opinion magazine showed that even before Three Mile Island negative articles outnumbered positive articles two to one and that Ralph Nader was the "expert" most frequently quoted on the subject. Although the small but noisy Union of Concerned Scientists, which is opposed to nuclear power, is continually quoted by the press, the Public Opinion survey found that three out of four energy experts and 99 per cent of nuclear energy scientists believe that the risks of nuclear energy are acceptable. The survey concluded that while "ignorance may explain the superficiality of coverage, it does not explain its direction."

There is another risk that the press should consider. Both America and the Soviet Union will become even more dependent on the Middle East when global economic recovery wipes out the current oil glut. Without alternative sources of energy—like nuclear—the chance of a superpower confrontation, perhaps nuclear, over Middle East oil becomes even greater. The odds against that kind of nuclear catastrophe are much smaller than a billion to one.●

A TRIBUTE TO JIM MATTOX

HON. CHARLES W. STENHOLM

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 16, 1982

● Mr. STENHOLM. Mr. Speaker, it has been a special privilege to serve as a member of the Texas delegation with the Hon. JIM MATTOX and to be able to congratulate him for his recent election as attorney general for the State of Texas.

I know that JIM will do as capable a job as a State official as he has here in Washington and that his efforts will be of benefit to all residents of Texas.

JIM's service in Congress followed a distinguished career in the Texas House and as assistant district attorney for Dallas County. No doubt both of these offices will serve him well in his next endeavor as State attorney general.

He was elected to the House Budget Committee as a freshman Congressman, an unusual occurrence that signified the recognition of his fellow Democrats of his unique talents and abilities. He served with distinction on the Banking, Finance and Urban Affairs Committee as well and his experience in those areas will be missed by the entire delegation.

The Fifth District of Texas has been well served by JIM MATTOX and those of us who served with him in this body will miss his presence.●

THE DEATH OF ELMER F. RUARK

HON. ROY DYSON

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Sunday, December 19, 1982

● Mr. DYSON. Mr. Speaker, on December 19, Maryland lost one of its finest citizens. I am referring to Elmer F. Ruark, the former mayor of Salisbury, who died at the age of 77 at the Deers Head Hospice Center in Salisbury after a long bout with cancer.

Mr. Speaker, this man brought energy, dignity, and pride to Eastern Shore politics. He was both tough and gentle, humble and proud, courageous and stubborn. Above all, he was a man of great common sense. Salisbury could not have hoped for a more farsighted, dedicated advocate.

During his tenure as mayor of that Eastern Shore city, a period that began in 1974 and ended last spring, Salisbury experienced a rennaissance that changed its face forever. Under Mr. Ruark's guidance, Salisbury's central business district and its riverfront began to be revitalized. His administration also oversaw the creation of a new street, Eastern Shore Drive.

Mr. Speaker, Elmer Ruark was a man of strong conviction and great vision. He had an almost fundamentalist reverence for the Bible. God and church were the guiding forces in his life and he could see, as few others could, parallels between religion and politics. He proved to me that the two need never conflict and, in the process, made me a better Congressman.

The Salisbury Daily Times, in an editorial, recalled that, "Nobody was more devoted to his family and his city than Elmer F. Ruark. . . . Those of us who knew him can model ourselves after him."

Paul Martin, Salisbury's mayor since March, described Mr. Ruark as "a man who served his office with dignity and dedication. I can't speak to highly of him."

At the Allen Memorial Baptist Church he was a former chairman of the Board of Deacons and a former Sunday School teacher who taught a class on a local radio station. In addition, Mr. Ruark was a former moderator of the Eastern Baptist Association, which covers the Eastern Shore, and a former president of the Maryland Baptist Convention and of the State Mission Board.

Mr. Ruark's politics were simple—he loved serving people. He encouraged Salisbury's participation in grants from the Federal Department of Housing and Urban Development, which provided 37 units of housing for the elderly and rent subsidy for 62 households. Mr. Ruark and other city leaders also pushed for rehabilitation of houses owned by low-income families, using State and Federal funds.

Mr. Ruark was also an active supporter of the creation of the historic district in Salisbury, known as Newtown, where he and his wife lived.

Although his home was the Eastern Shore, his range of experience extended far beyond its boundaries. During World War II he served with Senator Harry Jackson and he also corresponded with President Harry Truman.

A native of the Salisbury area, he was a graduate of the Wicomico County public school system and the old Paynters Business College in Salisbury. After operating a family farm for a while, he became a mail carrier in Salisbury in 1930. He retired in 1960 as foreman of mails. He entered the insurance business that same year, operating a firm that bore his name until he sold it in 1973.

As Salisbury's mayor, the first public office for which he had campaigned. Mr. Ruark was well liked and well respected both for his accomplishments and his dignified bearing.

Active in Democratic policies and community affairs, he was a supporter of such economic development programs for Salisbury as the dredging of the Wicomico River and construction of the Eastern Shore's first multilevel parking garage outside Ocean City.

He was a former chairman of the Wicomico County Recreation Commission and a former president of the Salisbury Kiwanis Club, and the Wicomico County Historical Society.

He was a member of the Salisbury Chamber of Commerce, the Delmarva Advisory Council, and the Greater Salisbury Committee. Despite the energy and time required for those duties, he still found time to be active in fund drives for such groups as the American Cancer Society, the Heart Association of the Lower Eastern Shore, the United Fund, the Red Cross, and Peninsula General Hospital.

Mr. Speaker, I cannot stress enough how much of an impact this man had on the development of Salisbury and its citizens. This is also the time to express our gratitude to the mayor's wife, the former Eunice Hayes, for sharing a portion of his exciting life with us. Elmer and Eunice were an inspiring team and their contributions will never be forgotten.

I would also like to pay tribute to Mr. Ruark's children, Richard Ruark of Hebron and Davis Ruark of Salisbury. They can be proud to have been so close to a man that was so widely respected. To all of them I extend my deepest sympathy.●

DON BAILEY

HON. CECIL (CEC) HEFTEL

OF HAWAII

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 1, 1982

● Mr. HEFTEL. Mr. Speaker, I feel privileged today to participate in honoring our distinguished colleague from Pennsylvania, DON BAILEY. I approach this occasion with regret, however, as I feel that the departure of DON BAILEY is a great loss to Congress. Although his time in Congress has been brief, he has had the impact of a senior Member.

DON'S career has been a shining example of the highest ideals of public service. From his decorated heroism in Vietnam, to his determined leadership in the U.S. Congress, DON has always served the American people to the utmost of his ability.

As a colleague of DON'S on the Ways and Means Committee, I have come to recognize his dynamic influence. His advice is sought after and respected on the committee and his views never fail to be insightful. When our committee was deliberating last year's tax bill, I was especially impressed with DON'S unwavering commitment to assuring that the greatest degree of equity was present in the final product.

Whatever DON decides to pursue after his departure from Congress, I am confident that it will involve service to the American people. Our society is advanced by the dedication of men like DON BAILEY.

HON. JIM JEFFRIES

HON. CARL D. PERKINS

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 15, 1982

● Mr. PERKINS. Mr. Speaker, I join with my colleagues in commending our good friend, JIM JEFFRIES, on the occasion of his leaving us.

Although he served in the House only 4 years, anyone who observed him cannot fail to be impressed by his ability and integrity.

He was a fine spokesman for the people of the Second District of Kansas, and I know all his friends there take pride in the caliber of service which he has given them.

When he goes home to Atchison, Kans., I hope he will remember on occasion that that fine community has a Kentucky connection—being named as I understand for David Rice Atchison, a Senator of the United States from Missouri from 1843 to 1855, who was born at Frogtown, Scott County, Ky., not far from where my farm is located.

The unusual thing about David Rice Atchison is that he may be the forgotten President of the United States. He was President pro tem of the Senate when the terms of office of President James K. Polk and Vice President George M. Dallas expired on March 4, 1849. March 4 was on Sunday in that year, and President-elect Zachary Taylor and Vice-President-elect Millard Fillmore refused to take the oath of office on a holy day, so they put it off until March 5, 1849. That left the United States technically without a President for that 1 day, and to this day constitutional scholars still contend that the office devolved upon Atchison, the Senate President pro tem.

Perhaps our friend JIM JEFFRIES can research that subject when he gets home to Atchison, Kans.●

JIM MATTOX

HON. JAMES R. JONES

OF OKLAHOMA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 16, 1982

● Mr. JONES of Oklahoma. Mr. Speaker, JIM MATTOX, a senior member of the House Budget Committee, is leaving the House of Representatives to become the attorney general in the State of Texas. JIM won an impressive victory, garnering 59 percent of the vote.

I am certain that JIM MATTOX will be an outstanding attorney general and will approach the job with competence and dedication. My faith in JIM'S future success stems from his distinguished service as a loyal and effective member of the Budget Committee ever since he came to Congress 6 years ago. As chairman of the Budget Committee, I always knew I could count on JIM to support difficult and controversial measures even though they were often on the surface unpopular in his own district. JIM would stand up and be counted for those policies which addressed the national need.

Those of us who have served with JIM on the Budget Committee will miss him. I know, however, even in his new position, we can always count on JIM to provide us with wise counsel and advice.●

JIM DUNN

HON. WM. S. BROOMFIELD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Sunday, December 19, 1982

● Mr. BROOMFIELD. Mr. Speaker, with the close of the 97th Congress, this distinguished body will lose the services of one of its talented, young legislators, Congressman JIM DUNN of Michigan.

While JIM has been with us for an all too brief period, he has distinguished himself as a member of both the Science and Technology Committee and the Veterans' Affairs Committee. He has also been an active participant on the many other important issues that faced this Congress.

JIM'S accomplishments in the House of Representatives stem from the positive attitude of public service which he brought to Washington. He had a very successful construction business in Michigan, and had already made his wealth. Yet, instead of resting on his accomplishments or continuing his efforts in the private sector, JIM came forth to give his talents and energy to the people of Michigan and its Sixth Congressional District.

During his years in the House he served the people well and they could be justly proud of him for he was a public servant in the highest sense of the term.

Mr. Speaker, I am proud to have known and worked with Congressman JIM DUNN, and I am honored to have been among his friends. I wish him and his family good fortune as they go home to Michigan. We will surely miss him.●

CONGRESSIONAL INVESTIGATION OF NUCLEAR PROJECT COLLAPSE DEMANDED

HON. GEORGE HANSEN

OF IDAHO

IN THE HOUSE OF REPRESENTATIVES

Sunday, December 19, 1982

● Mr. HANSEN of Idaho. Mr. Speaker, the immense impact on this Nation of a threatened bond default involving a scandal-ridden multibillion dollar nuclear energy project demands immediate investigation by the Congress for reasons clearly outlined in the following documents:

HOUSE OF REPRESENTATIVES,
Washington, D.C., November 24, 1982.

Hon. JOHN D. DINGELL,
Chairman, Committee on Energy and Commerce, House Office Building, Washington, D.C.

DEAR MR. CHAIRMAN: I am sure that you are aware of the collapse of the huge nuclear energy project in the Pacific Northwest known as Washington Public Power Supply System (WPPSS).

I am bringing the matter to your attention because of the immense impact a threatened bond default on a multi-billion dollar energy project is having on current and future financing of public utilities, and the dire consequences posed not only for the industrial and agricultural base of the Northwest, but to the entire national energy picture. To refresh your recollection, I am enclosing copies of letters on the situation which I sent earlier this year to Mr. Fernand St Germain, Chairman of the House Banking Committee, of which I am a member.

It is my conviction that an intensive investigation of this entire disaster must be made at the earliest possible time by the appropriate Committees of Congress to shore up the

people's confidence in public power and in the institutional financial base of the nation and the energy industry. I therefore urge you to initiate an immediate investigation, independently or in cooperation with Mr. St Germain, into all phases of the doomed project and its causes and results. Such an investigation can only serve the best interests of all concerned in this massive failure of a multi-billion dollar energy project seriously affecting people throughout the nation as investors, ratepayers and consumers.

Sincerely,

GEORGE HANSEN,
Member of Congress.

HOUSE OF REPRESENTATIVES
Washington, D.C., November 24, 1982.

Hon. FERNAND J. ST GERMAIN,
Chairman, Banking Committee, House Office Building, Washington, D.C.

DEAR MR. CHAIRMAN: I have contacted you on several occasions during the past few months concerning my growing apprehension that the situation in the Pacific Northwest over the failure of the Washington Public Power Supply System (WPPSS) power project can produce a major disaster for the electric consumer, the small electric utilities, the northwest agricultural and industrial base, and the entire national financial community. The enclosed articles reaffirm this concern.

During the Congressional recess, I have asked the Committee staff to determine who holds the bonds issued to finance the ill-fated project. Due to staff changes, that information has not yet been provided. It is evident that the financial community, in particular the bond underwriting group, has had a major role in the cumulative disaster which WPPSS has become.

On that ground alone, I requested that the Committee undertake to ascertain the facts concerning the involvement of the investment banking community in the conception of the project, the inducement of unsuspecting municipalities into the matter and the ultimate financial beneficiaries of the windfall of interest and profits from the financing.

As this situation continues to move to even more serious circumstances, I urge you to act promptly before the matter reaches the state where no corrective action is possible.

Sincerely,

GEORGE HANSEN,
Member of Congress.

[From the Wall Street Journal, Nov. 22, 1982]

WASHINGTON POWER RATING ON SOME BONDS IS DOWNGRADED BY S&L

SEATTLE.—Standard & Poor's Corp. said it downgraded $2.25 billion in bonds issued to finance Washington Public Power Supply System's nuclear projects 4 and 5.

S&P cut its rating to a speculative single-B from triple-B-plus, saying the system's ability to pay debt service on the bonds after July 1 is "uncertain." In January, as reported, Moody's Investors Service Inc., suspended its Baa-1 rating on bonds issued for plants 4 and 5 just before the supply system decided to scrap the two partly built plants.

A system spokesman declined to comment.

The bonds are backed by "take or pay" contracts signed by 88 municipal utilities. Under the contracts, the 88 utilities committed themselves to pay off the debt incurred for the two power plants, regardless of whether the plants ever generated power.

But, as reported, several participants have challenged the contracts' validity, and courts in Idaho and Oregon apparently relieved participants of their obligations. "Legal challenges and concerns regarding participants' willingness to pay indicate that there may be insufficient revenues to make timely payment on Project 4 and 5 bonds at some future date," S&P said.

S&P let stand its rating on bonds issued to fund plants 1, 2 and 3. Those bonds are rated triple-A on the strength of backing from the federal Bonneville Power Administration. But Moody's rates those bonds single, A-1, and several analysts have questioned whether a default on plants 4 and 5 would impair the security of bonds issued for plants 1, 2 and 3. An S&P spokesman said the triple-A rating on bonds for plants 1, 2 and is "under review."

[From the New York Times, Nov. 23, 1982]

TREASURY BOND PRICES PLUNGE
WASHINGTON POWER RATING CUT

In the tax-exempt market, price quotations for bonds of the Washington Public Power Supply System's nuclear projects 4 and 5 fell by four points or more after the Standard & Poor's Corporation downgraded the issues to a speculative B rating from the investment grade rating of BBB+. Although the system has made all payments of interest and principal on the $2.25 billion of bonds outstanding issued to construct the two mothballed plants, S.&P. said that recent events "introduce serious questions over whether W.P.P.S.S. can meet its debt payments—particularly after July, 1983."

The recent events referred to by S.&P. are the legal challenges being mounted by various of the 88 different local utilities that earlier signed agreements that obligated them to pay for the cost of the plants, whether or not electricity was ever produced. Some of the utilities are now asserting that the agreements they signed years ago are not legal and not enforceable. Various court cases are under way in Oregon, Idaho and Washington to decide the validity of the agreements between the utilities and the power system, which were unquestioned by the utilities between 1977 and 1981.●

ON CONGRESSWOMAN CHISHOLM'S RETIREMENT

HON. STEPHEN J. SOLARZ

OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES

Thursday, December 9, 1982

● Mr. SOLARZ. Mr. Speaker, I wanted to take this opportunity to pay tribute to a remarkable woman from Brooklyn, Congresswoman SHIRLEY CHISHOLM who has decided to retire from the House after 12 years of illustrious service.

Mrs. CHISHOLM has been an active Member of this body, who has been deeply involved in a range of issues. She has been an advocate of greater Federal aid to education, and has passed legislation creating special programs to interest minority students in careers in science and medicine. During the past 2 years she has been a leader in the effort to obtain just and humane treatment for the thousands who have fled Haiti and sought refuge on our shores.

She has consistently supported efforts to make human rights an important component of our foreign policy, and to see that the needs of our citizens, particularly those most in need, are not forgotten in the effort to "balance the budget." Domestic workers are now covered under the minimum wage thanks to her efforts, and she has been a consistent supporter of legislation to protect consumers and preserve our natural resources.

Those of us who have had the opportunity to serve with her know the enormous energy and enthusiasm which she has shown in waging the good fight. We respect her decision to retire from the fray, but we are sure that we have not heard the last from her, not as the battle on Reaganomics, unemployment, and New Federalism continue, with the poor, minorities and women the principal victims.

I offer her my congratulations for all that she has accomplished in this House, and express my warmest wishes for her continued success and happiness in all her new undertakings.●

THE REAGAN ADMINISTRATION'S HUMAN RIGHTS POLICY

HON. TOM HARKIN

OF IOWA
IN THE HOUSE OF REPRESENTATIVES

Sunday, December 19, 1982

● Mr. HARKIN. Mr. Speaker, the human rights that Americans accept as part of their everyday lives are unfortunately not shared by our neighbors in all countries around the world. The record of human rights abuses in Latin America and in other countries, and the Reagan administration's stance on those abuses, has been the subject of debate on numerous occasions on the floor of the House of Representatives. The following documents, prepared by the Americas Watch, Helsinki Watch, and the Lawyers Committee for International Human Rights as part of a larger study "The Reagan Administration's Human Rights Policy, a Mid-Term Review," address the problem of human rights abuses in Chile, El Salvador, Guatemala, and Rumania. Now that the Reagan administration has been speaking of human rights improvements in Chile, Guatemala, and El Salvador and considering certifying those three countries for their human rights record, I believe that the following documents are more timely than ever, and thus submit them into the RECORD.

THE REAGAN ADMINISTRATION'S HUMAN RIGHTS POLICY: A MID-TERM REVIEW

CHILE

The Reagan Administration successfully sought the repeal of legislation prohibiting military assistance and arms sales to Chile. In response, in December, 1981, Congress substituted a requirement that military assistance and arms sales could resume but only after two conditions were met. The President was required to certify that there had been a "significant improvement" in human rights in Chile and progress in bringing to justice those indicted by a Washington, D.C. grand jury for the 1976 murders in Washington of Orlando Letelier and Ronni Moffitt. Because the government of Chile has not complied with either condition, the Reagan administration has not certified Chile. This is one of the strongest human rights stands by the Reagan administration, yet its effect has been partly nullified by other actions of the Reagan administration with respect to Chile.

In 1981 and again in 1982, the Reagan administration has opposed continuation of the work of the U.N. Human Rights Commission's Special Rapporteur on Chile.

In August, 1981, Ambassador Jeane Kirkpatrick visited Chile and publicly proclaimed the desire of the United States to "normalize" relations with Chile in a pleasant way. They had not been normal since Chile refused to permit the extradition of three officials of its secret police indicted in Washington, D.C. for the Letelier-Moffitt murders. No progress on that case had been made when Kirkpatrick made her announcement. In the course of that visit, Kirkpatrick declined to meet with President of the Chilean Commission on Human Rights, Jaime Castillo. Two days after Kirkpatrick left Chile, Castillo and three other prominent Chileans were seized by the secret police and summarily exiled. The U.S. Department of State issued a statement deploring the exiling, its first public statement criticizing human rights abuses by a right-wing government.

Also in 1981, the Reagan Administration reversed previous U.S. policy on multilateral development bank loans to chile and voted in favor of $126 million in such loans in July despite U.S. law forbidding such votes in favor of loans to gross and consistent abusers of human rights.

In 1982, State Department's Human Rights Bureau took the lead in opposing certification of Chile and prevailed over others in the administration who favored certification. The Inter-American Affairs Bureau of the State Department favored certification and, July 1982, one of its top officials, then Deputy Assistant Secretary of State (now, Ambassador to Venezuela) Everett Briggs visited Santiago and publicly praised Chile's "road to democracy." Actually, Chile has had a "political recess" since 1973 in which political parties are banned. Nothing that might be considerd a return to democracy will take place until 1997 according to a schedule fixed by the Pinochet regime.

Failure to certify Chile is a human rights stand for which the Reagan Administration deserves credit. Regrettably, those within the Reagan Administration who are eager that the United States normalize relations with Chile have tried and are still trying to undercut this strong human rights stand.

EL SALVADOR

In the last 2 years thousands and, perhaps tens of thousands of innocent civilians have been abducted, tortured, and killed by Salvadoran armed forces. No one has been criminally punished for these crimes. Yet the Reagan administration's commitment is so great to maintain the current government in power and to aid it in securing a military victory over rebel forces that human rights considerations are not permitted to stand in the way. Moreover, as Congress has required that the President must certify every 180 days that certain human rights conditions have been met if military assistance to El Salvador is to continue, the Reagan administration provides such certifications even though all the evidence makes it plain that they are wholly unwarranted. The consequence is that the Reagan administration not only provides enormous military support to an egregious human rights violator in the world; it also pretends that many human rights violations do not exist or are being brought under control. The Reagan administration's credibility suffers terribly, rendering suspect almost everything that it has to say on the subject of human rights. This does a disservice to the cause of human rights in those places where the Reagan administration speaks out firmly to condemn abuses.

A particularly offensive aspect of the Reagan administration's approach to the human rights situation in El Salvador has been its attempt to discredit those who provide the bad news about human rights: Journalists and human rights organizations.

An example involving journalists was the attempt by Assistant Secretary of State Thomas Enders to refute the reporting by The New York Times and The Washington Post about the December 1981 massacres at El Mozote. Reporters for those two papers had visited the area and reported that survivors had compiled lists of those killed in several villages. One of the lists had over 900 names. Mr. Enders told Congress that these reports couldn't be true because El Mozote only had some 300 residents, ignoring the fact that the massacre actually involved at least nine villages. Mr. Enders also told Congress that "We sent two Embassy officers to investigate . . . no evidence could be found to confirm that government forces systematically massacred civilians in the operation zone." This statement omitted the crucial information that the Embassy officers who were sent travelled by helicopter and the closest they got to El Mozote was an overflight at 2,000 feet. Though such dissembling by Enders became known later on, El Mozote was not longer in the headlines. At the time of initial attack on the reporting in The New York Times and The Washington Post it was highly effective.

If anything, the Reagan Administration's attempts to impugn independent human rights groups as guerrilla sympathizers has been even more pernicious. In the circumstances of El Salvador, human rights organizations operate at extreme risk to their staffs and their informants. There have been many raids on the offices of these groups by government security forces and a number of cases in which the security forces have kidnapped members of their staffs who have never reappeared. It is difficult to imagine anything more destructive to the cause of human rights than the barrage of attacks the Reagan Administration has launched against organizations in El Salvador that come up with different assessments of the human rights situation than that provided by the U.S. Embassy.

In November 1982, U.S. Ambassador to El Salvador Dean Hinton, previously an outspoken defender, or apologist, for the Salvadoran government, denounced the Salvadoran legal system as "rotten" and asked: "Is it any wonder that much of the world is predisposed to believe the worst of a system which almost never brings to justice either those who perpetrate these acts or those who order them?" Unfortunately, the utility of Ambassador Hinton's strong public statement was dissipated by a public disclosure from the White House that the Reagan Administration had ordered Ambassador Hinton to refrain from such statements. Regarding one case, the killing of four U.S. churchwomen in December 1980, the Administration had stated publicly that it believes no officers were involved in the killings or subsequent efforts to cover them up. In part because of this position the criminal investigation in El Salvador has been limited to five low-ranking national guardsmen, who are scheduled to be tried in the near future.

In December 1982, following a meeting with President Magana of El Salvador, President Reagan let it be known that he was inclined again to certify El Salvador in January 1983. This statement detracted from the value of the certification requirement in prodding El Salvador to better its human rights record.

GUATEMALA

Since 1977, Guatemala has not received military assistance or arms sales from the United States because of its abysmal record as a gross and consistent violator of internationally recognized human rights. In 1981, however, the Reagan administration circumvented this prohibition on aid by selling $3.2 million in trucks and jeeps to Guatemala. This was done on the pretext that trucks and jeeps did not constitute security assistance.

The Reagan Administration welcomed the March 23, 1982 coup that brought power to General Efrain Rios Montt. Since the advent of the Rios Montt government, the Reagan Administration has attempted to portray developments in Guatemala as producing a vast improvement in the human rights situation. Indeed, killings did decline in Guatemala City, though the massacres of Indians in the Guatemalan countryside continue unabated and vast numbers of Guatemalans have been forced to flee their homes. Amnesty International tabulated 2,600 killed in such massacres in a six month period in 1982 and it is generally estimated that more than one million Guatemalans have become refugees in their own country or in Mexico.

In accordance with its portrayal of human rights improvement, the Reagan Administration has let it be known that it will support an $18 million Inter-American Development Bank loan to Guatemala to construct a rural telecommunications system. In addition, the Reagan Administration has informed members of Congress that it is nearing a decision to resume arms sales to Guatemala.

An aspect of the Reagan Administration's effort to portray improvement in the human rights situation in Guatemala has been its attacks—as in the case of El Salvador—on independent human rights groups that report the bad news. The human rights situation in Guatemala is so bad that no above-ground group can even function there. Accordingly, the Department of State's attack has been focused on groups based elsewhere—such as Amnesty International—that report on Guatemala. Needless

to say, this endangers Amnesty's informants in Guatemala and makes it more difficult for Amnesty to gather information on the country.

As in the case of El Salvador, the State Department seems eager to monopolize human rights reporting so as to paint the picture as it would like it to be seen. We repeat here what we said in the section on El Salvador: it is difficult to imagine anything more destructive to the cause of human rights.

In December 1982, President Reagan met with President Rios Montt and subsequently informed the press that the Guatemalan leader was "getting a bad deal" or a "bum rap" when he was criticized on human rights grounds. President Reagan also endorsed the resumption of U.S. military aid to Guatemala. These statements identified the United States with a government that is massacring thousands of its Indian citizens.

ROMANIA

Romania enjoys most favored nation trading status with the U.S. and receives sizeable aid from the U.S. in the form of Ex-Im bank loans. Romania is also one of the most repressive countries in Eastern Europe with virtually no freedom of expression or belief, and excessive police surveillance of private citizens as well as foreigners. The Reagan Administration has attempted to use its influence with the government of Romania to try to promote human rights, particularly the right to emigrate in family reunification cases. The administration has worked quietly on behalf of a number of individuals in Romania and has publicly critized human rights abuses.

It remains to be seen, of course, how effective the U.S. will be, in persuading Romania to abandon its newly imposed extortionist education tax on emigres. The Reagan Administration has threatened to end MFN status for Romania if the tax is not ended, a strong and praiseworthy human rights stand. Generally its human rights policy towards Romania is a rare example of how quiet diplomacy and public criticism can be effectively combined to promote human rights.●

RECENT ARRESTS OF HUNGARIAN INTELLECTUALS IN ROMANIA

HON. ROBERT K. DORNAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Sunday, December 19, 1982

● Mr. DORNAN of California. Mr. Speaker, I am joining the distinguished Congresswoman from Maryland, MARJORIE HOLT, in expressing my sense of disgust and outrage about the new human rights violations of the Romanian Government against the leading intellectuals of the Hungarian minority in Transylvania where 2.5 million Hungarians have lived since the ninth century A.D.

The culture of Transylvania was for a millennium Hungarian and, now, expression of views that Hungarians should not be condemned to cultural extinction in Romania merits arrests, beatings by the secret police, and threatened charges of treason.

The main victim of the arrests is the nationally beloved Geza Szoecs, a writer and poet from Cluj-Napoca (Kolozsvar) whose whereabouts are not known and who is probably still being held by the secret police without formal charges. Prof. Karoly Toth and his wife and the renowned philosopher A. Ara Kovcas were released, but told not to leave town since charges of treason may be leveled against them.

It is hardly coincidental that, about the time of the arrest, a memorandum was smuggled out of Transylvania listing the 10 demands of the Hungarian minority which include self-administration of Hungarian-inhabited areas, opening of Hungarian kindergartens and special education classes, equal use of the Hungarian language in public and before the authorities, equal promotion in professional fields, an end to the forcible settling of Romanians into purely Hungarian regions, an end to continuous surveillance and harassment of Hungarian intellectuals "merely because they are Hungarian." Other demands included the end of confiscation of all Hungarian cultural goods imported from Hungary by visitors and free travel between the two countries.

Mr. Speaker, these moderate demands could be implemented under the Romanian Constitution; as a matter of fact, some of them are part of the language of the Constitution which is daily contravened by the Romanian authorities in order to deprive the Hungarian minority of their rights. They are certainly violations of the human and ethnic rights of the Hungarians in Romania under the Helsinki accords, the International Covenants of Political and Civic Rights. We are completely right legally if we press the Romanian Government to live up to their constitutional and international law promises and grant equal treatment of the Hungarian minority as well as end the arrest of Hungarian intellectuals who make use of the nonviolent expression of their opinion on political and cultural issues.●

H.R. 7357—A FIRST STEP FOR THE 98TH CONGRESS

HON. ROBERT GARCIA

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Sunday, December 19, 1982

● Mr. GARCIA. Mr. Speaker, I want to make it clear that I in no way consider the defeat of H.R. 7357, the Immigration Control and Reform Act of 1982, as a victory. Far from it.

I, instead, consider it to be a necessary step in the process of developing a sound immigration policy that reflects the needs and concerns of all America's communities. The debate over the bill was sincere and most arguments, no matter how diverse, were well considered. This debate was a testimony to our democratic system.

I want to express my admiration for my colleagues on the Judiciary Committee who labored so hard on this bill, and who accepted its defeat with dignity and understanding. They are a tribute to this House.

I also want to thank the following organizations for all the assistance they gave me on this issue throughout the 97th Congress, their help was invaluable. They are: The Mexican American Legal Defense and Education Fund, the League of United Latin American Citizens, the Lutheran Immigration and Refugee Services, the Church World Services, the American Civil Liberties Union, The United Farm Workers, and the National Coalition on Immigration.

One last word, I view the recent discussion of H.R. 7357 as a beginning for the 98th Congress. This is an important issue, and I hope that I am able to make a positive contribution in the next Congress to the development of a just and workable immigration policy.●

TRIBUTE TO HONORABLE TOM EVANS

HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Sunday, December 19, 1982

● Mr. BIAGGI. Mr. Speaker, the State of Delaware has been fortunate enough to have had THOMAS EVANS representing their interests in the House of Representatives these past 6 years. It is therefore my pleasure to pay tribute to our retiring colleague and friend TOM EVANS.

When I reflect on the many good things about TOM EVANS perhaps his best asset is his ability to work effectively in a bipartisan manner. TOM and I served together on the House Merchant Marine Committee and during these times together I often witnessed TOM's great ability to be a compromisor in matters of importance to our committee. The result was good legislation produced in a bipartisan atmosphere which assured easy passage ultimately by the House.

TOM EVANS leaves this House as one of its more popular and respected Members. TOM made it a point to be congenial to his colleagues in the House and when he gave you his word on something—you knew it was good.

I will remember TOM for his strong support of law enforcement officers which is especially important to me having been a police officer in New York for 23 years before coming to Congress. TOM was a cosponsor and leading advocate of many of the legis-

lative initiatives developed on behalf of law enforcement over the past 6 years.

I wish TOM the best of fortunes in whatever future endeavor he chooses. He has been an important Member of the House over the past 6 years and deserves to be commended for all he has accomplished.●

KNIGHTS OF COLUMBUS OF UNION, N.J.

HON. MATTHEW J. RINALDO

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Sunday, December 19, 1982

● Mr. RINALDO. Mr. Speaker, among the many fraternal organizations in America that have contributed to our national character and reputation for generosity and humanity few can surpass the Knights of Columbus, the well-known and respected international organization of Roman Catholic men. It was on March 29, 1882, that the General Assembly of the State of Connecticut first granted a charter to the Knights of Columbus; the organization has been an integral part of the American community ever since.

The Knights of Columbus maintains many chapters throughout our Nation. One of those is in Union, N.J., the home of Union Council 4504, which recently marked its 25th anniversary. The founding officers of Union Council were a distinguished group of Catholic men: The late Howard R. Leary, the first grand knight of the council; the late John Connell, deputy grand knight; John S. Zimmerman, chancellor; George N. Arnold, warden; Thomas Crimmins, recorder; James Valladares, financial secretary; James Mahon, treasurer; Louis Giacona, lecturer; Rev. Joseph Driscoll, chaplain; the late Weldon Arner, advocate; Dr. James Cappeto, inside guard; Alvin Dietlein, outside guard; and trustees William Darrow, Joseph Gaynor, and Charles Lynch.

The Knights of Columbus was founded to help Catholic families and widows in distress. There were no public welfare programs in those days and many new immigrants to America lacked insurance and other protection in the event the family breadwinner died or became handicapped. The Knights of Columbus filled that function with an insurance program that poor and middle-income families could afford. Gradually, the program developed into many areas of community service and religious and charitable activities, and the Knights of Columbus now boasts a membership of more than 1,350,000 members.

More important than the number of members is the benevolent work that the Knights of Columbus does. During its 25 years of existence, Union Council 4504, of Union, N.J., has raised funds for homeless families, for research and treatment of childhood diseases, and for various scholarships.

Under Grand Knight Henry Mey and his predecessors, Union Council also has been involved in a number of community service projects, including the annual Festival on the Green in Union that celebrates the contributions of the different ethnic groups to the varied culture of our town. Fellow Knights have also conducted blood drives and various other programs that benefit its members and the community-at-large. As anyone can see, these activities go far beyond the Catholic community; they encompass the concerns of all Americans and the entire township of Union.

I wish to compliment the members of Union Council who have undertaken the responsibility for many of these programs and for making Union Council a strong, stable, and vital community organization.

There is no question that our Nation has been a better place to live because of the work of the Knights of Columbus. Its membership has certainly lived up to the Knights of Columbus motto which is "Charity, Unity, Fraternity, Patriotism."

I am gratified that Union Council, No. 4504, Knights of Columbus, is so active, and, as a charter member, am proud of its accomplishments and congratulate the officers and my brother Knights on the 25th anniversary of its founding.●

REEXAMINATION OF ROMANIA'S MFN STATUS IS CALLED FOR

HON. DON RITTER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 15, 1982

● Mr. RITTER. Mr. Speaker, I rise in support of the special order to call attention to the plight of a Hungarian poet-writer who is being held by the authorities in Romania without just cause. I commend the gentle lady from Maryland for calling this special order on Geza Szocs and my other colleagues who are participating here today.

The plight of Geza Szocs is not unlike millions of others who find themselves as a minority element under a repressive regime such as the Romanian Government. On November 6, the Romanian security forces arrested numerous Transylvanian Hungarian intellectuals, including Geza Szocs. Their homes were searched, and various writings and documents pertaining to political conditions in the Hungarian ethnic regions of Romania were confiscated. There were apparently about 10 other individuals arrested as well but all have been released and only Geza Szocs is still being confined by the authorities and no one is sure of his whereabouts. Reports indicate that some of those arrested along with Geza were physically beaten during detention and the condition of his health at this stage is unknown.

The arrest of these people is believed to be connected with the publication of an unofficial Hungarian-language Samizdat journal entitled "Ellenpontac" (counterpoint) in Romania. This periodical was to have listed a number of demands for the improvement of the conditions of the Hungarian minority in Romania and discussed the possibility of Hungarians in Romania being threatened with cultural extinction. It is assumed that Geza Szocs may have been arrested for the nonviolent exercise of his right to freedom of expression.

I, along with other Members of Congress are sending a letter to Romanian President Ceausescu requesting an immediate and detailed response as to the charges against Geza Szocs and the state of his present circumstances.

The letter—which I am enclosing a copy of for the RECORD—goes on to appeal on humanitarian grounds for the immediate release of Szocs and concludes by expressing concern over the increasing incidents of persecution and violations of the Helsinki accords which the Romanian Government signed in 1974. We appeal to the Romanian Government to adopt a better human rights policy and to improve the treatment of Hungarians and other minorities in Romania.

I would encourage my colleagues to join with us and add their names to this letter to strengthen our appeal to the Romanian Government and to send them a clear message in behalf of the Hungarians that are oppressed and persecuted in that country. This letter will be sent to President Ceausescu and a copy to Ambassador Mircea Malitza on Friday and I would appreciate my colleagues calling me or my office to indicate their support. Thank you.

DEAR PRESIDENT NICOLAE CEAUSESCU: We the undersigned Members of the United States Congress are writing this letter in behalf of Geza Szocs who is being held in detention by the Romanian government. We request an immediate response as to the charges against Mr. Szocs and the state of his present circumstances. We further appeal on humanitarian grounds for the immediate release of Geza Szocs and to allow him to return home to his family and friends.

We would also like to express our concern over increasing incidents of persecution and violations of the Helsinki Accords by the Romanian government against the Hungarian minority in Romania. We strongly appeal on humanitarian grounds for a better human rights policy and treatment with regard to all Hungarians and other minorities in Romania.

Again, we respectfully urge that if Geza Szocs is still in detention for the non-violent exercise of his right to freedom of expression, he be immediately released.

Sincerely,●

HON. TOBY MOFFETT

HON. TOM HARKIN

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 14, 1982

● Mr. HARKIN. Mr. Speaker, I want to thank the gentleman from California for taking this special order to honor our colleague TOBY MOFFETT. TOBY was not only our colleague but was also our "classmate" from the class of 1974. I can still remember when our class came in, the editorialists and columnists were making their predictions on who from this class would exert forceful leadership in the House of Representatives. One name that continually came up was, of course, TONY MOFFETT. While the writers and pundits might have been wrong on some of the others, they certainly did not miss the mark on TOBY. TOBY soon became a very positive force and conscientious leader for progressive, fair, and humane legislation.

I came to know TOBY really well when he, Congressman GEORGE MILLER, and I traveled together to Chile in 1976. It was on this trip that my eyes were opened to the terrible calamity that had befallen that once proud democracy. The suffering, the tortures, the disappeared people—in short, the boot heel Fascist dictatorship that had taken over that country was brought home very vividly to the three of us. Not content to just wring his hands and bemoan what had happened. TOBY became very active in leading the fight to cuttoff military aid to the Pinochet dictatorship. Time and again TOBY took the lead in demanding for an accounting of the disappeared persons in Chile. I am proud of my association with TOBY in that effort and will always think of h m in the framework of his consiste support for human rights not on y in Chile but throughout the world.

I know, of course, there are many other things TOBY fought hard for here in the Congress, many of which were extremely successful. As chairman of House Subcommittee on the Environment, Energy and Natural Resources, TOBY led the fight for a sane and rational environmental policy. He also bought the powerful interests of "pork barrel" projects. I do not know if it can be correctly tabulated, but I would have to guess that hundreds of millions of dollars, if not billions, were saved to the taxpayers of this country by TOBY's actions.

I could continue on, but I suppose I could wrap up my thoughts and feelings about TOBY MOFFETT by simply stating that TOBY epitomizes what is best in an elected representative. He always fought for the underdog, spoke for the disenfrachised, took care to insure that our society was not only rich in monetary terms, but also was rich in fairness and justice. We will miss him from this House, but I am certain that far from this being the end of TOBY MOFFETT, it will be the beginning of a new phase of his life in fighting for the "little people." I will venture to guess that TOBY MOFFETT will be heard from again as one of our Nation's leaders.●

FAIR PRACTICES IN AUTOMOTIVE PRODUCTS ACT

HON. RICHARD L. OTTINGER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Sunday, December 19, 1982

● Mr. OTTINGER. Mr. Chairman, as you know, H.R. 5133, the Fair Practices in Automotive Products Act, was passed by the House on December 15 by a vote of 215 to 188. Prior to passage, it was amended in the Committee of the Whole by a vote of 195 to 194—the amendment being offered by Congresswoman FENWICK of New Jersey.

The gentlelady's amendment reads as follows: "Notwithstanding any other provision of this act, nothing in this act shall be deemed to supersede the terms or conditions of any treaty, international convention, or agreement on tariffs and trade which is in existence on the date of enactment of this act and to which the United States is a party." I would like to take this opportunity to put some points concerning this amendment in the RECORD.

Basically, I view this amendment as a very broad and general provision covering many treaties, agreements, and the like. It is unclear what the meaning of this amendment is, or what the need for it can be.

H.R. 5133 establishes a content level for the sale of automobiles in interstate commerce and penalties for violation. To the extent that this amendment could be construed to, in effect, undo those provisions of the bill because it might impact on some treaty, et cetera, is dependent on interpretations placed on such agreements when considered in the light of this bill. I do not believe that the provisions of H.R. 5133 are inconsistent with such agreements.

It must be noted that if a conflict, in fact, exists, there are adequate procedures under these agreements, such as the General Agreement on Tariffs and Trade (GATT), and the courts to resolve the conflicts. In this light, it should be noted that the GATT is not a law of the United States, nor is it a treaty. GATT is an "understanding" that was born in 1947, to which the United States is a party. It is unclear, then, that the gentlelady's amendment even encompasses GATT under the term of "agreement." I would hold that it does not.

If H.R. 5133 does become law, the Japanese—or any nation for that matter—are free to bring a complaint before the GATT, file a petition at its headquarters in Geneva, and follow the procedures that are outlined for disagreements. If a GATT tribunal is called, the United States would be free to introduce as evidence the trade violations of other countries around the world—including Japan—and demand reciprocity. It is clear that such a suit is unlikely—such a move would be to cast stones from the porch of one's glass house.●

GRANDPARENT VISITATION RIGHTS—A KEY ISSUE FOR 1983

HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Sunday, December 19, 1982

● Mr. BIAGGI. Mr. Speaker, I would like to take this opportunity to advise my colleagues of a hearing which I conducted last week of the Subcommittee on Human Services, House Select Committee on Aging. The topic of the hearing was "Grandparents—The Other Victims of Divorce and Visitation Disputes."

At issue were the rights that grandparents have today to visit their grandchildren after a marital dissolution. Our hearing was called to determine what if any Federal role there should be in establishing these rights. Today 42 States in the Union have adopted statutes addressing this issue, but, as witnesses who testified at our hearing stated, these laws vary considerably and lead to great confusion.

Our hearing discussed this issue from social, psychological, and legal standpoints. We received testimony from a panel of grandparents who told the subcommittee of their particular problems in gaining visitation privileges. In one case, a couple from New York City indicated they had spent more than $60,000 simply filing petitions for visitation privileges only to have the New York order granting visitation fail to be reciprocated in the State where their grandchildren now reside. Another witness presented a bag containing 15 pounds of legal petitions he was forced to file to gain visitation privileges.

Today, approximately 70 percent of older people in the United States have grandchildren. Yet, we also know that 1 million children a year are the victims of divorce. My basic feeling after the hearing is that some Federal legis-

lation may in fact be needed to insure that grandparents have reasonable visitation rights when this is in the best interests of the child. Deprivation of visitation privileges because of the diversity of State laws needs to be examined. It is an issue which I urge my colleagues to give some thought to and hopefully join me in developing a legislative initiative that recognizes and respects both the rights of the grandparents and the best interests of the children.

At this point in the RECORD I wish to insert my opening statement which outlines the issues discussed at the hearing:

STATEMENT OF HON. MARIO BIAGGI

As Chairman of the Subcommittee on Human Services, I am pleased to convene this morning's hearing entitled, "Grandparents—The Other Victims of Divorce and Marital Dissolution." I also conduct this hearing as a grandfather with 6 grandchildren.

The House Select Committee on Aging is charged with the responsibility to "conduct continuing comprehensive study of the problems of the older American, including * * * participation in family and community life." Our Subcommittee is exploring the problem and issue of providing grandparents with the visitation rights under law after marital dissolution.

During the course of today's proceedings, we hope to address four basic questions—

What legal rights do grandparents have to visit their grandchildren after divorce and custody settlements and other forms of marital dissolution? What are the obstacles to enforcement?

Should a federal law be enacted to guarantee these rights in the 8 states which have no laws?

Is a federal law needed to help bring uniformity to the 42 largely different state laws which govern grandparent visitation rights?

Are grandparents being afforded equal protection under existing state laws which govern visitation rights?

Today in America, approximately seventy percent of older people in the United States have grandchildren. Statistics reveal that women become grandmothers at approximately 50 years of age, and men become grandfathers around age 52. Based on current life expectancy, this can leave as much as a 20 to 30 year period for the development of meaningful relations between grandparents and grandchildren. That is the positive side of the coin.

On the negative side, over one million children a year experience the divorce of their parents. * * * A startling 48 percent of those who married in 1970 will eventually divorce. Most people who get divorced will remarry in many instances within three years. These contemporary shifts in divorce and remarriage are radically changing the character and structure of the family as we know it. In 1978, 10 million children lived in a household with one natural parent and one step-parent. Today we have far more than the traditional grandparenting. We now have the step-grandparent and the multiple grandparent family. What we seek to address today is what rights will these grandparents as well as biological grandparents have to visit their grandchildren after marital dissolution.

Our hearing is structured so we may examine the issue from three perspectives—social, legal and psychological. Our first panel of witnesses could be best described as active advocates.

A testimonial to the degree of interest which this issue has generated has been the establishment of at least four national grandparents rights organizations. We are proud this morning to have the founders of three of them with us today. These witnesses, who themselves are grandparents, will address the problems associated with the 42 state statutes on this subject as well as the lack of judicial decisiveness. Some of our witnesses have incurred enormous personal expense—as much as $60,000 in one instance—simply to acquire basic visitation privileges with their grandchildren. An issue we must raise today—what does a grandparent without financial resources do—are they being denied equal protection under the law. Finally, this first group of witnesses will offer their views on what if any role the Federal government should have in this area.

Our second group of witnesses are noted psychiatrists in this field who will address the importance of grandparent and grandchildren relations as well as problems which can ensue from adversarial court battles. These witnesses will also discuss this issue from the standpoint of what is in the child's "best interest" in awarding grandparent visitation privileges.

Our third and final group of witnesses are lawyers who will try and tackle the complex legal issues before us today. The most fundamental of these is—is there a federal role in this area and if so what is it? Further, does the existing lack of uniformity among the 42 state laws on grandparent visitation impact adversely on the implementation of these rights by the affected grandparents? Is there a denial of equal protection under the law by virtue of excessive costs which certain states require in order for a grandparent to gain visitation privileges? Finally, when determining the legal status of grandparent visitation privileges—how is "best interest of the child" standard applied?

One of the most remarkable developments, that has occurred since this hearing was announced several weeks ago, has been an influx of calls and letters from across the nation from grandparents and others concerned with this issue we will raise today. These letters—which total more than 100—address themselves to the major issues we will discuss today.

Many of those grandparents who wrote shared similar problems. The diversity of state laws seemed to be a major problem. A dentist, from El Cajon, California, who has been involved in litigation for two and one half years to be granted the right visit his four year old grandson writes:

"I know the situation is not too unlike hundreds of others in a changing world. Families falling apart and little children losing contact with sometimes the only stable relationship in their lives. . . . There seems to be no coordination between our states regarding this seriously overlooked problem. We worry that the court order we have here in California would be worth a thing if our grandson were taken out of the state."

The costs involved in litigation was another common complaint. A letter from grandparents in Fullerton, California, who have been denied visitation privileges to visit their only granddaughter after their daughter died in 1981 wrote:

"We tried to get an attorney but he discouraged us by telling us it could cost up to $10,000 and we could not be assured of any results. We do not have this kind of money but whatever we have it will go to our granddaughter."

The son of a Lincoln Park, Michigan couple died in March, 1977; since then the daughter in law has remarried and adopted their grandson. They wrote:

"We have been in and out of the courts—and spent thousands of dollars on lawyers and still are not seeing our grandson."

The emotional strain of both the lack of uniform laws and the cost of litigation was evident in almost all of the letters. There was a notable concern about the effect it was having on the children. A grandmother from Lansing, Michigan wrote:

"Our grandson is probably unaware of all our attempts to get him back. Gifts, letters and cards have gone unacknowledged. To me, this is child abuse."

A grandmother from Wheeler, Wisconsin, writes:

"It took us 14 hard, long, and painful months to get to see our grandson after the divorce. We couldn't even stand to go into stores and look at children's clothes. It just hurt too much. Why should the grandchildren and grandparents pay for mistakes the parents make?"

As I have stated before—our purpose today is to focus national attention—if you will—launch a national debate on the issue of grandparents and their visitation privileges to see their grandchildren in the event of a marital dissolution.

Our other purpose is to listen carefully to testimony on recommendations of experts and others concerned with this topic on the delicate issue of which level of government should assume responsibility for the enactment and enforcement of laws on behalf of grandparent visitation. It is evident that state governments have assumed some responsibility with 75 percent of them having enacted statutes. However, if there is in fact a federal question involved we would like to know about it and then proceed in the usual bi-partisan manner which characterizes our Committee's work.

The only recommendation I do offer is, in order to bring a sense of uniformity to the 42 state laws which have been adopted, to have the diversity of state law issue be referred to the National Conference of Commissioners on Uniform State Laws for their evaluation and ultimate action. This non-federal government entity was established in 1892 and is vested with the responsibility "to promote uniformity in state laws on all subjects where uniformity is deemed desirable and practical."

Let me close my statement with a poem that was written about an 82 year old grandfather who has been denied the right to see his only granddaughter, Kim.

Grandpa, can I see you?
Could you take me to the fair
Would you read me a little story,
And tell me that you care
Grandpa, would you walk with me?
Or hold me on your knee?
I wish that I could talk to you,
Grandpa, why can't it be?
Grandpa, do you love me?
Yes, I love you too.
I dream of us together,
Do dreams ever come true?
Grandpa, I keep praying
We'll be laughing very soon
And someday we'll be singing
A simple little tune.

Grandpa, can I see you?
I know this isn't fair;
But things will soon be changing,
And we can be a pair.
Grandpa, we'll be together
Just wait a little while.
Grandpa, don't stop trying,
I want to see you smile.

By SUSAN VAUGHN.●

DANGEROUS IMMIGRATION BILL

HON. GEORGE HANSEN

OF IDAHO

IN THE HOUSE OF REPRESENTATIVES

Sunday, December 19, 1982

● Mr. HANSEN of Idaho. Mr. Speaker, the failure of H.R. 7357, the so-called Immigration Reform and Control Act of 1982, to pass was a great relief to many people.

This was extremely dangerous legislation, as this following letter points out, which should never be allowed so close to Congressional approval again.

DECEMBER 20, 1982.

DEAR FRIEND: We did it—just like I said we could four months ago. We defeated that dangerous immigration bill which would have put many American farmers out of business or in jail while recklessly granting wholesale amnesty and government benefits to untold millions of illegal aliens leaving our nation's borders open to virtually uncontrolled immigration.

As you'll recall, this legislative monstrosity, known as the Immigration Reform and Control Act of 1982, was being pushed hard by the U.S. Attorney General and had already passed the U.S. Senate by a vote of 80-19, so our fight had to be won in the House of Representatives.

The very thing that scared farmers and other employers was the same provision that also desperately disturbed Hispanics and other minority groups—the employer sanctions, which were the heart of the bill itself.

We formed that unusual coalition I predicted could be done because of the shocking abuse proposed by this legislation to the human and civil rights of both employers and minority groups, and even all Americans. Some members of this coalition also added tactical strength as House leaders and Committee Chairman. In my own case, as a senior member of the House Agriculture Committee and because of my active efforts on immigration problems, I was appointed as one of the six floor leaders to manage the debate of this legislation before Congress.

We secured a wide-open rule for debate and a huge number of amendments to the bill (at least 295) were proposed. This guaranteed that consideration of the legislation would consume many days which, for all practical purposes, amounted to a filibuster, something Congress could not get sidetracked with during the last pressure-packed hours before adjournment.

So we were able to avoid a vote, which we might have lost. We ran out the clock on this unacceptable bill in both the regular and special sessions and won a big victory for the basic human and civil rights of both citizens and non-citizens, and for farmers who are so economically vulnerable to the drastic restrictions and fines and jail sentences proposed.

But this fight is far from over. The same legislation will be reintroduced in the new Congress in January with much pressure on both Houses for early hearings and voting action. We will have to move quickly to meet this challenge and assure that reform of our immigration laws is not accomplished through abuse of basic civil, human and economic rights.

No honorable person should be treated like a criminal solely because he is willing to provide work for someone else. And certainly no one in America should have to show a national ID card or internal passport just to ask for a job—our memories of Hitler, Stalin and Yarozelski can't be that short.

Thank you for your continued interest and support in this vital issue.

Sincerely,

GEORGE HANSEN,
Member of Congress.●

A SALUTE TO THE TUSKEGEE AIRMEN

HON. LOUIS STOKES

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Sunday, December 19, 1982

● Mr. STOKES. Mr. Speaker, recently, I had the pleasure of meeting Mr. Charles Hillinger, a staff writer for the Los Angeles Times. During our conversation, Mr. Hillinger informed me of a story he had written for the Los Angeles Times in 1979 about the world famous Tuskegee Airmen.

Mr. Speaker, as many of my colleagues know, the Tuskegee Airmen, were the World War II black fighter pilots for our country. These men were faced with the dual hardship of fighting segregation at home and a war overseas. Yet, Mr. Speaker, they succeeded.

The Tuskegee Airmen were not allowed to train or fight side by side with white pilots. However, they fought in the same war and for the same cause. They amassed victories and medals which are tremendously impressive by anyone's standards.

In actuality, Mr. Speaker, the Tuskegee Airmen served as a black Air Force unit for this Nation during World War II. At the end of the war, they had destroyed over 200 German planes, sank a destroyer, and demolished hundreds of German military vehicles. At the same time, these courageous men and women paved the way for other black Americans in the Armed Forces and even in the space program today.

It has taken many years for the Tuskegee Airmen to gain the recognition from the American people they so justly deserve. In many respects, they are the unsung heroes of the American effort in World War II.

At this time, I would like to insert in the RECORD, the excellent article written by Mr. Charles Hillinger on the Tuskegee Airmen.

BLACK WORLD WAR II PILOTS—THE TUSKEGEE AIRMEN: ALMOST UNKNOWN HEROES

(By Charles Hillinger)

CHICAGO.—They were called the "Lonely Eagles"—airmen destined to fly alone.

And this weekend 350 of the little-known World War II black fighter and bomber pilots and members of their ground crews held a reunion here.

They are heroes to the country's black population—heroic for their fighting spirit and ability and for doing more to eliminate segregation in the armed forces than any other group of individuals.

Yet, few white Americans have ever heard of the exploits of the black fighter pilots of World War II. Little has ever been printed about them except in black publications.

Segregation was so staunch in this country on the eve of World War II that black pilots were refused training at air bases throughout America.

An entire new airfield and a $4 million training complex was built at Tuskegee, Ala., so that whites "could be spared" being quartered or trained with blacks.

A separate "Black Air Force" was started—an air force that destroyed 260 German planes and damaged 148, sank a Nazi destroyer and blew apart hundreds of military vehicles when strafing convoys.

The black airmen came home with Distinguished Flying Crosses, Legions of Merit, Silver Stars, Purple Hearts, Bronze Stars—but they came home to an ungrateful nation.

"Ironically," said Freddie Hutchins, 58, of Atlanta, a retired lieutenant colonel, "we put our life on the line, yet when we came back home after the war we were still called 'nigger' or 'boy.' That was a hard pill to swallow."

Sixty-six of the pilots did not come back. They were killed in combat.

They were called the "Schwartze Vogelmenschen" (black birdmen) by the Germans, who both feared and respected them. White American pilots called the black fliers the Red Tailed Black Angels because the tail assemblies of their aircraft were painted red.

The men of the "Black Air Force" were awarded a presidential unit citation "for displaying outstanding courage, aggressiveness and superior combat techniques."

The fighter pilots were members of the 99th, 100th, 301st and 302nd squadrons, known collectively as the 302nd Fighter Group of the 12th and 15th Army Air Forces in Europe.

Nine hundred and ninety-two black cadets were trained as Army Air Corps pilots at the all-black Tuskegee Army air base during World War II.

Of that number, 450 flew combat missions overseas against the Germans and the rest became members of four B-25 bomber squadrons based in the United States.

For every black pilot there were 10 other black men and women on ground support duty.

Groups of Tuskegee airmen have been getting together in 15 cities as independent veterans' groups since World War II, but it was not until 1972 that the national organization, the Tuskegee Airmen, was formed.

This was the eighth convention of the group, and among those who have attended all of the conventions is Gen. Noel F. Parrish (ret.), 69, the white commanding officer of the Tuskegee Army Air Base from 1941 to 1946.

"This is the most patriotic, remarkable and loyal group of men I have ever met," Parrish said. "There are so many special things about them. They were determined to do well. The pressures they had to endure were enough to discourage the best of men, but they persevered.

"The Tuskegee Airmen taught a lesson to this country. . . ."

William (Wild Bill) Campbell, 62, today a professor at the Naval Postgraduate School in Monterey, Calif., flew the first mission ever by a black pilot. He is a veteran of 106 combat missions against the Germans. Campbell recalled:

"White Americans in 1941 had a lot of attitudes not based on fact. They thought blacks either could not or should not do this, that or the other. Blacks were not accepted in the Army Air Corps prior to 1941."

"'No Way these niggers ever gonna fly an airplane,' is what we heard all over the place," said Lowell Steward, 60, a Los Angeles real estate agent and president of the Los Angeles chapter of the Tuskegee Airmen.

"Well, we fooled them. We were the cream of the crop. Nearly all of us were college graduates, and we were determined we would prove ourselves to the world."

Yet, it was not a simple matter for young black men to get in the Army Air Corps 38 years ago.

William Melton, 58, a UCLA graduate who operates a center for mentally retarded adults in Los Angeles said:

"I went down to try to sign up for the Army Air Corps the day after Pearl Harbor. So did some of my white friends. They got in right away. They didn't take me until a year later because of the color of my skin."

Herman (Ace) Lawson, 61, a former Sacramento city councilman, told how he was the only black enrolled in a civilian pilot training program at Fresno State at the time:

"We were encouraged by the Army Air Corps to enlist as a unit, so we would all stay together as one fighting group. We were all for it.

"When the recruiters came to the school, we all lined up to sign up. When I got to the head of the line, a white major said: 'What the hell are you doing here?

"I proudly said, 'Here to join up with my buddies.' The major replied, 'Get the hell out of here. We're not taking night fighters.'"

Lawson did not enlist with his group from Fresno State, but he persisted and wound up several months later with the "Black Air Force."

Hugh White, 56, a St. Louis criminal lawyer, said he had the feeling that "if the other guys can do it, I can do it too. That's why I hung in there and did my best to become a pilot.

"At Tuskegee, many of our instructors were Southern whites. They never eased up in giving us a rough time. we heard 'nigger' more than we heard the word 'pilot' from our instructors."

"In our camps in Europe in our lighter moments we referred to one another as 'spooks,'" Alexander Jefferson, 57 a retired Detroit elementary school principal said. "But let a white call us spooks—bam, the battle was on.

"Well, we had an in-house nickname for our outfit, the Spook Waffle, and would talk about the Spook Waffle going out there and knocking the hell out of the Luftwaffle."

Jefferson was shot down by the Germans over the southern coast of France on his 26th mission when flying a P-51 Mustang. He was held prisoner for nine months, one of 32 of the black pilots to become Nazi prisoners of war.

"When I landed in my chute, I was surrounded by Germans," Jefferson said. "One of the Germans grabbed me and as he ran his hand over my face he said to his buddies: 'Ach! Schwartze (German word for black). Nigger.' I was the first black he had ever seen in person."

"All my life I wanted to be a pilot," Jefferson recalled. "Flying the P-51 Mustangs against the Nazis was the most exciting time of my life.

"There were exciting times like the day the Red Tail Black Angels shot down 13 Messerschmitts without a loss and followed that with 12 more kills the next day, also without losing any of their planes."

There were many moments of levity at the get-together at the Continental Plaza Hotel. John (Mr. Death) Whitehead, 56, of Sacramento, was the brunt of much kidding.

"They called me 'Mr. Death' then and they call me 'Mr. Death' now," Whitehead laughed, "because I have always been skin and bones. I weighed 110 then and haven't gained much since. I never did pass the physical, but they slid me in with the rest of them."

He had a skull and bones painted on this airplane. He was one of the legendary ones—one of five black pilots who flew fighter planes in World War II, the Korean conflict and Vietnam.

Giving the invocation at convention luncheons and banquets was the Rev. Robert Wing, 69, of Chicago. When Wing was told in 1939 that he would not be accepted for pilot training, he went to England, joined the Royal Air Force and flew British fighter planes for six years.

Lt. Col. Marvin Crews, 47, of Wurtsmith Air Force Base, Mich., was at the convention as an official representative of the Air Force. "The Air Force holds the Tuskegee Airmen in such high esteem they send a few of us to the convention each year to let the Lonely Eagles know we haven't forgotten their role in history," explained Crews, who added: "As a black kid growing up on the streets of San Francisco I heard all about these guys. I grew up hearing war stories about their exploits."

One of the luncheon speakers was Maj. Frederick D. Gregory, one of the three black astronauts scheduled to go into space aboard the space shuttle. Gregory told the group:

"Without the Tuskegee Airmen I wouldn't be doing what I am today. You paved the way for all black men and women in the armed services."

Another speaker, Dr. Vance H. Marchbanks, 74, of Hartford, Conn., was the first black American to be commissioned in the medical service of the U.S. Air Force.

Detroit Mayor Coleman Young, a Tuskegee Airman, was speaker at an awards banquet. He told the black veterans:

"We learned how to survive in the air, and when we hit the ground while white pilots rested we continued our struggle to preserve our dignity as human beings. All of us are better and stronger for the experience."

Recipients of the annual Tuskegee achievement awards included Cornelius R. Coffey, 76, "daddy of black aviation in Chicago," who gave 120 Tuskegee airmen flying lessons before they were accepted in the Army Air Corps.

Also honored was Willie (Suicide) Jones, 65, the first black to parachute (he jumped from his first plane at the age of 12 in 1926) and who made more than 5,000 jumps and holds the record for the highest jump ever made—28,688 feet.

Willa Brown Chappell, 70, one of the first black female pilots in this country, who gave many of the Tuskegee Airmen flying lessons before they entered military service, also received an award.

Elwood T. Driver, 58, who recently headed the investigation of the May 25 Chicago DC-10 crash as vice chairman of the National Transportation Safety Board and a World War II Tuskegee combat pilot with 123 mission, commented:

"These are the greatest bunch of guys ever to come down the pike."

Seated casually in a hotel room, a handful of the Tuskegee Airmen expressed their gut feelings about "this noble experience of their youth" and the way they felt about America:

"This is our country. We grew up here, were educated here, raised our families here. We love this country. All we wanted at that time was a piece of the action. That was our war, too, you know. If I'm needed again I will not hesitate to fight for my country," Bill Ellis, deputy Los Angeles assessor, said.

"You know we're as American as anyone else in this country," Herman said, "I was born here. My father and I go back over a hundred years in this country. I defy anyone to tell me I cannot enjoy the benefits and fruits of the United States."

"We had a saying in those days when America was so blind with segregation we were forced to have our own 'Black Air Force'," continued Lowell Steward of Los Angeles, "that went like this:

"'My country right or wrong, I will hold her hand when she's ill and fight for her to the bitter end.'"

"The Tuskegee Airmen," said Claybourne Lockett of Los Angeles with tears welling in his eyes," . . . They were men . . . damned good men."

AT BRONX GRADE SCHOOL, DÉTENTE COMES NATURALLY

HON. MORRIS K. UDALL

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Sunday, December 19, 1982

● Mr. UDALL. Mr. Speaker, for some time now I have been concerned about United States-Soviet relations. It has been my opinion that one of the greatest challenges facing the United States in the near future, is the challenges of improving our ties with the U.S.S.R. This is not easily done, and is not an accomplishment reached quickly. Good relations between countries are built on mutual trust and understanding. It is in this spirit that I introduced House Joint Resolution 489, the United States-Soviet exchange for peace bill. And it is also in this spirit that I submit the following article published in the December 10, 1982, edition of the New York Times.

AT BRONX GRADE SCHOOL, DÉTENTE COMES NATURALLY

(By Dena Kleiman)

It was all very simple really—no complicated negotiations or throngs of Secret

Service agents. It could, in fact, emerge as a new diplomatic style.

Ten American students, aged 10 through 13, went to the Soviet Government's compound in the Bronx yesterday to meet with Soviet youngsters and discuss their common hopes for peace.

While the theme was to have been nuclear disarmament, there were no formal discussions—and instead it came down to movies and mazurkas, the exchange of telephone numbers, the promise of romance.

"Nothing else makes a difference," said Marvin Sochet, an interior designer and West Side community activist who helped organize yesterday's get-together. "Perhaps kids will."

Yesterday's meeting grew out of the rally against nuclear weapons in New York City last June. At the time, Mr. Sochet—sidestepping routine diplomatic channels—contacted the Soviet Embassy in Washington to request a "dialogue" between Soviet and American children.

He said he had hoped to set up a conference telephone call between groups in Moscow and New York. Instead, he said, the Soviet Embassy directed him to the consulate in New York and the Government-run school at the Soviet compound in the Riverdale section. Groups of students met twice during the summer.

Yesterday's gathering was the first at the compound. Mr. Sochet said the American youngsters had been suggested by friends at Riverside Church.

Mr. Sochet and his wife, Mary, said they were acting on their own and not affiliated with a particular antinuclear organization. They expressed the hope such meetings could continue. The Russians seemed to approve.

"You see they are kids just like American kids," said Tatyana Voitsekhovich, a teacher at the Soviet School who issued yesterday's invitation. "It makes sense. Friendship. Acquaintances. For them to know how we live. How we study. Kids express thoughts like kids. They don't talk politics. It's good and useful and serves both our aims."

The American students, who attend public and private schools in Manhattan, arrived at the Soviet complex, which serves as the residence for Soviet diplomats and their families, at about 11 a.m.

They were ushered through the school and into a room where they met their Soviet counterparts—who were dressed in navy blue uniforms with bright orange kerchiefs around their necks. It did not take long for the few adults in the crowd to feel somewhat out of place.

TALK OF FAVORITE SUBJECT

"You're in eighth? I'm in seventh," 13-year-old Vlad Voitsekhovich said to Kenneth Richards, also 13. "Do you like school?"

"Fifty-fifty," Kenneth replied.

"Do you study physics in your school?" Vlad asked.

"No," Kenneth said. "We're not that advanced."

"Algebra here is very difficult." Vlad continued.

"What's your favorite subject?" Kenneth asked.

"Mathematics," said Vlad. "Can you get an A in mathematics?"

"I got a B in geometry," Kenneth replied.

"Our teacher doesn't want us to use a calculator, but I use one anyway," Vlad confided.

HEAR ABOUT LENIN

After receiving pins displaying side-by-side American and Soviet flags, the students were taken on a tour of the glass and stone school—which has about 240 students in first through eighth grades—and visited classes in mathematics and English and Russian literature. Several of the Americans asked their new friends who the man was whose picture hung at the front of every classroom. Some were then told for the first time about Lenin.

Other asked about the death of Leonid I. Brezhnev and were told about a special commemoration that was conducted at the school.

"How did you feel when Brezhnev died?" asked Joey Toon, who is 11 and in the sixth grade at P.S. 125.

"Sad," replied Boycho Kostadinov, a 12-year-old Bulgarian boy in the sixth grade at the Soviet school.

"He served the Russian people well, didn't he? Joey continued.

"Yes," Boycho said.

This, in fact, was how things went—big issues mixed with small. By the time the youngsters were invited to see a screening of a film about Moscow, they were walking arm in arm, giggling as they raced for the best seats.

"What do you do after school?" asked Winston Huang, who is 12 and in the seventh grade at the Calhoun School.

"I eat, I do my homework," replied Dmitri Reshetilov, who is also 12.

"Do you like Communism?" Winston continued.

"Yes," Dmitri replied. "There is no unemployment."

"So what time do you eat? Six o'clock?"

"I sometimes eat at 3," Dmitri said.

The day ended with a Russian snack of piroshki and pastries and a performance by the Soviet youngsters that included Georgian folk dancing, singing in Russian and English and a piano recital.

The high point for Winston appeared to be when Dmitri—whom Winston addressed affectionately as "Dima"—sang a solo in English of the Bob Dylan song "Blowin' in the Wind."

For Joey Toon, however, the high point clearly was a young lady. At this particular gathering, the boys seemed to have congregated on the right side of the room and the girls on the left. Joey stood amid Dmitri, Winston, Boycho and several other boys, exchanging their impressions of the girls.

"Dima, your girlfriend's over there," Joey announced, pointing to a slender girl with the name "Mary" written on the name tag attached to her blouse. Without further ado, Joey walked in her direction.

"Do you like Dima?" Joey asked.

"I can't answer such questions," Masha Vertogradova, who is 13, replied with conviction.

Speculation about Masha's feelings for Dmitri occupied much of the remainder of the afternoon for Joey and his pals. At some point, Joey apparently decided to propose marriage.

"Don't forget to tell her," Joey said as he boarded the bus to go home. Dmitri indicated thumbs up.

"I'll call you tonight," Winston shouted through the bus's closed window as it made a turn through the driveway and the cast iron gates on its journey to return the American youngsters home.●

RECENT ARRESTS OF HUNGARIAN INTELLECTUALS IN ROMANIA

HON. TOM LANTOS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 15, 1982

● Mr. LANTOS. Mr. Speaker, on November 6, 1982, the Romanian secret police arrested Geza Szoecs, a nationally renowned poet-writer in Romania who is a member of the 2.5 million Hungarian minority in Transylvania.

Mr. Szoecs was not the only one to be arrested. An estimated 17 additional noted philosophers, professors and other intellectuals have also been arrested.

Some of them have been released but warned not to leave town because they would be charged with treason. The action by the secret police was based upon Mr. Szoecs's editorship of the Samiszdat publication Ellenpontok (Counterpoints) in Cluj-Napoca (Kolozsvar) published semiclandestinely since November 1981. The periodical dealt with problems of artistic, literary, and sociological nature, and devoted some of its contents to the conditions under which the Hungarians in Transylvania are forced to live under the present regime. It was not, however, an inflammatory paper, rather a literary one.

It is generally believed that the arbitrary crackdown and the physical violence against those arrested, as reported by the Paris Le Monde, on November 20 and 21, 1982, was only partially the result of Mr. Szoecs and associates publishing the Samizdat paper.

Romanian authorities have a constant suspicion of Hungarian intellectuals in Romania because they can and do serve as the leadership for the 2.5 million Hungarians whom the present regime would like to gradually denationalize and deethnize. In addition, during the early part of November a memorandum was smuggled out from Transylvania on the demands of the Hungarians of Transylvania which was presented to Austrian Chancellor Bruno Kresisky on November 29.

This memorandum should serve as testimony that despite discrimination and persecution, the Hungarian intellectuals would like to work for peace and cooperation with the Romanian people. But it is also clear evidence of the unbearable cultural, economic, and sociographic conditions under which the Hungarians must live in Romania.

The memorandum only requests steps in accordance with the Romanian Constitution, like Hungarian kindergartens and special education classes, equal use of the language in pubic and before the authorities and equal advancement in the professions for

Hungarians. The memorandum also asks for freer travel and exchange with Hungary and a ban upon the confiscation of Hungarian cultural goods from travelers returning from Hungary. All these relate to the preservation of the 1,000-year-old ethnic heritage of Transylvanian Hungarians who for a millennium were the rulers of the province.

In addition however, the memorandum points to the forcible settlement of Romanians in purely Hungarian villages, towns, and cities. The demographic, ethnic map of Transylvania underwent changes in the last three decades which were not only the result of industrialization, but of systematic planning to Romanize the cities and now also to break up the largest Hungarian ethnic bloc, the Szeklers, by official settlement policies.

It is my hope that our reaction to these events will be the strongest possible protest and a reexamination of the MFN status of Romania. Last July, I voted for it with the warning that unless changes take place in emigration and minority policies, I will not do so in 1983. It is my sincere hope that the Romanian Government will take our protests seriously and undertake immediate remedial actions.●

A RETURN TO THE JUNGLE

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Sunday, December 19, 1982

● Mr. McDONALD. Mr. Speaker, Mr. Roy M. Cohn is not only an able attorney, but has excelled in past years, in the successful prosecution of many who both overtly and covertly were dedicated to the violent overthrow of the U.S. Government.

As most know, we now have a new Governor of New York, and I would like to share with my colleagues, Roy Cohn's assessment of what soon may be taking place in New York. New York City is already a jungle of sorts, and Mr. Cohn points out what might cause the entire State to become a jungle. This same type of story is being repeated in many corners of the Nation. Go to the wall for the perpetrators of the most heinous crimes against mankind, and forget the just punishment and removal from society of these animals.

In any event, food for thought may be found in an article on this situation by Roy M. Cohn from the December 8, 1982, edition of the New York Post. Article follows:

[From the New York Post, Dec. 8, 1982]

IS "RIGHTS" ACTIVIST CUOMO'S RIGHT CHOICE?

(By Roy M. Cohn)

Crime continues to be a dominant factor in the lives of New Yorkers. And so must it be what with daily muggings of senior citizens, assaults on law enforcement officers, and acts of violence to steal anything from ten cents on up.

The situation is exacerbated by the lack of money to hire and train sufficient police to cope with the situation, and the chaos which seems to result in habitual offenders reappearing on the streets all too soon.

This is not a happy picture for the incoming Governor. His problem is enhanced by the public unpopularity of his opposition to capital punishment, which held down his margin of victory by many points. In this setting, his moves in this area will be carefully observed.

He has just appointed Alice Daniel to the key post of Counsel to the Governor, in which her duties include a major voice in the justice system and its criminal part, such as by participation in the selection of judges and passing on applications for pardons for those who have been convicted of violent crimes. Is this good or bad? Let's see.

Mrs. Daniel—obviously—is a lady. That's good. Governor-elect Cuomo is committed to the appointment of women to high posts in the legal system—and his commitment is now honored.

But thereafter come the danger signals. Mrs. Daniel's past history is more suggestive of a do-gooder, whose concern is for the "rights" of criminals and prisoners rather than for those of the unoffending public, who are the victims of the over-zealous concern for these prisoners' "rights."

Specifically, Mrs. Daniel's credentials include service as a Regional Director of the Prisoners' Rights Project of the National Assn. for the Advancement of Colored People Legal Defense Fund; a long-time activitist in the American Civil Liberties Union; Washington Counsel for the Legal Services Corp.—the parent organization of which has embarked upon such peculiar ventures as trying to enjoin the Florida Board of Education from giving literacy tests to candidates for high school graduation—and to top things off, she was a Deputy Legal Affairs Secretary to the politically late Jerry Brown of California.

The last of her many appearances was in Washington running the Civil Division in the Civiletti Justice Dept.

In addition to her heavy tilt to the "rights" movements, Mrs. Daniel hardly seems knowledgeable in the problems confronting the people of New York, which will be her responsibility. Indeed, she seems to have spent her public career just about every place but New York. She did attend Columbia in days of yore—but so what? So did I.

I am the last one to deprecate such things as attempts to rehabilitate prisoners. I chaired a group of liberals, conservatives and apoliticos which sponsored a program to furnish art materials to prisoners, and then create a market for the sale of their finished product. But rehabilitation is far different from an obsessive concern for "rights" of those fighting our system of justice.

At this particular juncture, the system needs strengthening—not weakening. Law enforcement officers are severely handicapped by a myriad of new "civil rights" regulations which make it difficult for them to do their job in protecting the streets, the subways, and the public.

And when violent offenders are all too occasionally charged with their violent criminal acts, they can often fall back on "exclusionary" rules—which in common parlance means the voiding of their own statements and actual confessions an setting them free if they invoke any one of an unfortunately large number of technicalities and loopholes.

The problem is not academic. Victims of muggers, and families of slain and wounded police officers, can bear witness to the fact it is with us every day and every hour.

As stated, the appointment of women to high legal and other governmental positions is all to the good. Few fault the excellent performance of our first woman Supreme Court Justice, Sandra Day O'Connor. And both our United Nations Ambassador, Jeane J. Kirkpatrick, and our UNESCO Ambassador, attorney Jean Gerard, are gems.

But is one with Mrs. Daniel's record and views the right person for this all-important position at this all-important period in the lives of New Yorkers?●

A PLEA FOR THE RELEASE OF LIN YI-HSIUNG

HON. STEPHEN J. SOLARZ

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Sunday, December 19, 1982

● Mr. SOLARZ. Mr. Speaker, I would like to call to the attention of my colleagues an important statement by Dr. Trong R. Chai, the President of the Formosan Association for Public Affairs.

This organization is one of the major groups of Taiwanese Americans concerned about conditions in Taiwan, particularly the plight of political prisoners. While I do not agree with everything that this group advocates, I believe that this appeal for the release of Mr. Lin Yi-hsiung, one of the eight Taiwanese courtmartialed 3 years ago after the Kaohsiung incident, is a most meaningful one—particularly given the recent action by the Polish Government allowing Lech Walesa to leave his prison cell and rejoin his wife and children in Gdansk, and the Korean Government's decision to release Kim Dae Jung for medical treatment in Korea or in the United States.

It would be sad if the Taiwanese Government would not agree to release Lin Yi-hsiung who has suffered so much, and allow him to join his wife and surviving daughter in the United States.

Mr. Speaker, I ask that this statement be reprinted in today's RECORD.

FORMOSAN ASSOCIATION FOR PUBLIC AFFAIRS

(By Trong R. Chai)

Today marks the third anniversary of the Kaohsiung incident.

On December 10, 1979, riot police first blocked streets in an attempt to prevent the people of Kaohsiung, the second largest city in Taiwan, from attending a Human Rights Day rally. After failing to do so, the police spread tear gas in the crowd of tens of thousands—then refused to give the demonstrators a way out of their rally site. This touched off club fights in which, according to The New York Times of March 23, 1980,

"no more than five or six people on both sides were hurt."

Yet the Kuomintang (KMT) immediately arrested nearly one hundred political and religious leaders, whether or not they had attended the rally. Eight of these prisoners were arbitrarily selected for trial in a military court, and given sentences ranging from 12 years to life imprisonment.

Mr. Lin Yi-hsiung, a prominent politician, was one of the eight court-martialed. Three hours after his mother spoke over the telephone to a human rights worker in Japan telling him how her son was being tortured in prison, she and Mr. Lin's twin daughters, 7 years in age, were stabbed to death in his house, which was under surveillance.

The severe punishments these prisoners received were not for sedition, as said by the KMT, but merely for expressing their views on the future of Taiwan. They believed that the wishes of the people on Taiwan should be made the basis for any solution to the Taiwan problem and that Taiwanese wishes were for Taiwan's nationhood.

For example, in 1971 the Presbyterian Church in Taiwan, of which Rev. Kao Chunming, who was among those imprisoned for the incident, was the General Secretary, issued a statement to "oppose any powerful nation disregarding the rights and wishes of fifteen million people and making unilateral decisions to their own advantage, because God had ordained and the United Nations Charter has affirmed that every people has the right to determine its own destiny."

In 1977 the Presbyterian Church asserted Taiwanese wishes for nationhood by urging the KMT "to face reality and to take effective measures whereby Taiwan may become a new and independent country."

This year, a similar joint statement was issued by four leading politicians from their prison. They said: "For the past three hundred years, our courageous ancestors have come to settle in Taiwan, in order to gain freedom. With their new thinking and new way of life, they developed a spirit of self-reliance and laid the foundation for a democratic society. The long separation between Taiwan and mainland China has resulted in a significant difference between both sides in the nature of society." Consequently, the four leaders maintained that "in the long-term interest of Taiwan, to carry out democracy on the island is far more urgent and important than unification with China."

Is this calling for freedom seditious? Is this calling for right to self-determination seditious? The answer is no.

I, therefore, appeal to world opinion to press the Taipei authorities for an immediate release of all conscientious political prisoners of the Kaohsiung incident—especially Mr. Lin Yi-hsiung. He must be set free without any delay and allowed to be united with Mrs. Lin and their daughter here in the United States.●

ACTION NEEDED ON NATURAL GAS PRICING

HON. THOMAS A. DASCHLE

OF SOUTH DAKOTA

IN THE HOUSE OF REPRESENTATIVES

Sunday, December 19, 1982

● Mr. DASCHLE. Mr. Speaker, I recently received a report from Mr. Dan Dienstbier, president of the Northern Natural Gas Co., on five regional meetings conducted by Northern Natural Gas on the issue of natural gas pricing. One participant in these meetings was Mr. E. C. Nessly, president, Gas Operations Division, Minnegasco, Inc. According to Mr. Nessly, the typical natural gas heating bill has increased from $234 in 1972 to $688 this heating season. The typical heating bill, which has increased nearly 200 percent, according to Mr. Nessly, represents the residential consumer who either invested in energy conservation measures or who has purchased a new home constructed to conserve energy. Many Americans have made energy-conserving investments in existing homes and many newly constructed homes have emphasized improved energy conservation, but for too many commercial and residential consumers of natural gas, the elderly and low-income in particular, the increased cost of home heating greatly exceeds 200 percent. "Unfortunately," Mr. Nessly commented, "there are many senior citizens and other low-income consumers who are living in homes that have not been reinsulated and still have high energy-consumption rates. A consumer who used 193 Mcf in 1972 with a gas bill of $234 would have a gas bill of $1,088 this winter." For the elderly and low-income, those who have been least able to invest in energy conservation and reduce energy consumption, the cost of home heating with natural gas has increased by 365 percent during the last decade.

In South Dakota, more than 101,000 households, or 42 percent of the households in South Dakota, use natural gas for home heating. In South Dakota, as in many other Midwestern States, home heating is not a luxury. It is a matter of necessity. It is a matter of survival.

Because of the dramatic increase in the price of natural gas, many South Dakota residents have abandoned the hope of a warm home this winter or even a comfortable home. Instead, a home which provides the barest protection against the harshest elements of winter is sought. Any society in which the elderly and low income are forced to seek mere survival must be judged in the harshest terms by future generations. Our society, I fear, is fast approaching that judgment.

Commercial and residential natural gas consumers are being held hostage by natural gas producers who are not motivated by a reasonable profit, but by wanton greed. Aided and abetted by the Federal Energy Regulatory Commission which has too often successfully sought to increase natural gas prices, natural gas producers are terrorizing commercial and residential natural gas consumers and particularly the elderly and low income.

For the administration and the newly confirmed Secretary of Energy, the response has been callous disregard and indifference at best. According to President Reagan, "My administration is strongly committed to the deregulation of the natural gas industry." This prescription is for a larger dose of the bitter medicine of dramatically increased prices which millions of Americans have already been forced to swallow. The American people simply cannot afford the greed demonstrated by the natural gas industry, greed which knows no bounds.

There is a natural gas pricing crisis in our Nation, Mr. Speaker. If the natural gas industry is unwilling or unable to act, Congress must act in the public interest. Between now and early January when the new Congress convenes, the natural gas industry can take action. I hope the industry makes wise and good use of this opportunity. If it fails to do so, there can be no higher priority for the new Congress than reestablishing affordable and reasonable natural gas prices for the American people. Any more suffering caused by unaffordable natural gas prices is too much more.●

ON MAKING SENSE OF SALT AND YOUR BLOOD PRESSURE

HON. ALBERT GORE, JR.

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Sunday, December 19, 1982

● Mr. GORE. Mr. Speaker, the article that follows, taken from the Executive Health newsletter, demonstrates the clear link between excessive sodium consumption and hypertension. More than 60 million Americans suffer from this silent but deadly affliction. The evidence in this article should compel the Congress to enact H.R. 4031, the sodium labeling bill, at the earliest possible date in the next Congress.

ON MAKING SENSE OF SALT AND YOUR BLOOD PRESSURE

(By Lot B. Page, M.D.)

(PUBLISHER'S NOTE.—Chief of Medicine at the Newton-Wellesley Hospital and Professor of Medicine at Tufts University School of Medicine, Boston, Dr. Lot B. Page has been called "the preeminent scholar in this field (hypertension) in the United States; in fact, in the world." His studies of high blood pressure and what influences it have taken him on medical expeditions to many places abroad, including the Solomon Islands, to investigate pre-industrial populations. He has also studied nomads in the deserts of Iran. We have asked him to assess hypertension and its importance, the factors that influence it, the role of salt in elevating blood pressure, and how much you may gain by examining the salty side of your life.)

Unless you've been off somewhere remote for much of the last decade or so you couldn't have escaped becoming aware of a whole series of facts about hypertension or high blood pressure—and about salt as well.

About hypertension, it comes to this: The disease, silent though it is, is a killer—an almost incredibly powerful one. It's amaz-

ingly common. It's controllable and it's now clearly established that it pays—handsomely—to control it.

But isn't there any effective means of control other than drugs? Valuable as they are, drugs, for many, can be unpleasant.

More and more, attention is now focusing on salt in the diet—salt in excessive amounts—salt in obvious and not so obvious forms—as a factor in blood pressure elevation.

But just how involved is it? How much do we really know about the involvement? What's sensible for you to do about your salt intake if your blood pressure is elevated, perhaps even only mildly elevated, and perhaps, as well, if it isn't elevated—yet?

THE DISEASE AND ITS RISKS

According to some estimates, as many as 35 million Americans have moderate to severe high blood pressure and another 25 million have mild hypertension.

It doesn't make them feel sick. It doesn't hurt. Most of those with elevated pressures don't even know it. But they should. It can be extremely dangerous to health.

Blood pressure is simply the force exerted against the walls of arteries as blood flows through. Primarily produced by the heart's pumping action, the pressure is needed in order to push the body's five quarts of blood through more than 60,000 miles of blood vessels.

Measured with a relatively simple instrument—the sphygmomanometer, also known as a pressure cuff—a pressure reading consists of two figures. One, the higher, is the systolic pressure, the level when the heart beats and pumps out blood; the other, the lower number, indicates diastolic pressure, the level when the heart rests between beats.

Any reading up to 140 systolic and 90 diastolic—written as 140/90—is generally regarded as in the normal range.

Elevated pressure can harm vital organs. In response to pressure excess, the heart must work harder. It increases in size and, for a time, it does well. But eventually it may become unable to meet the demands placed on it. Congestive heart failure then results: the heart no longer pumps with full effectiveness, less blood circulates, and lungs, liver, and legs may become congested.

Hypertension also contributes to atherosclerosis, with its build-up of fatty deposits in the arterial walls. When this occurs in the coronary arteries, blood supply to the heart muscle diminishes, and there may be chest pain on effort (angina pectoris) or heart attack. When a brain artery is affected, stroke may follow.

Severely elevated pressure reduces kidney function by damaging vessels supplying blood to the kidneys. Eventually, kidney failure may result. Blood vessels in the eyes may be similarly affected, leading to vision loss.

THE PAYOFFS OF CONTROL

In a minority of patients, definite organic causes for hypertension can be found. They include such conditions, usually surgically correctable, as narrowing of the aorta, the body's main artery coming off the heart, and pheochromocytoma, a tumor, usually benign, of an adrenal gland atop a kidney.

But the vast majority of patients—90% or more—have what is called primary or essential hypertension, with no definitively established organic cause.

For primary hypertension, large-scale drug treatment trials began in the 1960s. A cooperative study in Veterans Administration hospitals was the first to show, conclusively, that lowering pressure reduces illness and death rates in middle-aged men with either severe hypertension (diastolic pressures of 115 to 129) or moderate hypertension (105-114). For mild elevations (90 to 104), no statistically significant benefit was shown. The VA study also failed to demonstrate any marked reduction in illness from coronary heart disease and, of course, did not answer the question of whether women as well as men could benefit.

After the VA study came others here and in Western Europe and Australia. The most important to date has been the Hypertension Detection and Follow-Up Program (HDFP), a 5-year trial involving 14 clinical centers across the country and sponsored by the National Heart, Lung and Blood Institute. It was designed to focus major attention on mild hypertension in both sexes.

Nearly 11,000 patients with diastolic pressures of 90 and above were randomized into two groups—referred care (RC) and stepped care (SC). The RC patients were referred for treatment to their own physicians and were seen by HDFP yearly. The others were treated at HDFP centers.

Definite goals were set for all patients. For those with 100 or greater diastolic pressures, the objective was to bring the pressure down below 90; for those will pressures of 90 to 99, to lower the pressure by 10 points.

For SC patients, a systematic, standardized drug program was used, with medications added or dosages adjusted as necessary in stepwise fashion to bring each patient to or below the blood pressure goal.

It was assumed that physicians caring for RC patients would treat those with mild elevations less vigorously than called for by the HDFP protocol in view of common medical practice and the results of the earlier VA study seeming to indicate no marked advantage of treatment for mild hypertension. The assumption was correct.

At the end of five years, there were marked differences in the blood pressure levels of the two groups. Nearly 65 percent of the SC patients were at or below their goal levels compared with only 44 percent of the RC patients.

And the more effective pressure control in the SC group was reflected in their 5-year death rates—nearly 17 percent lower than RC patients for all causes of death and 18 percent lower for death from heart and blood vessel disease.

Particularly noteworthy were the death rate reductions among SC patients with diastolic pressures of 90 to 104, the range for which the value of treatment had been considered controversial. Compared with RC patients with the same original pressures, the SC patients experienced a 20 percent lower death rate from all causes and 26 percent lower from cardiovascular disease.

DRUG PROBLEMS

If antihypertensive medications are clearly valuable, their use is not without problems.

In a 10-year U.S. Public Health Service Cooperative Study Group trial, a high ratio of such side effects of antihypertensive drugs as sexual difficulties, lethargy, and somnolence was noted. In 1981, the British Medical Research Council Working Party on Mild to Moderate Hypertension reported the occurrence of sexual problems in nearly 20 percent of men taking an often-used antihypertensive, a thiazide diuretic.

There have been other reports of some patients on thiazide diuretics developing higher blood cholesterol levels, diminished glucose tolerance (indicative of a tendency toward diabetes), lower potassium levels, and elevated uric acid levels (indicative of a tendency toward gout).

Cost and inconvenience are difficult to measure but Dr. Robert I. Levy, former director of the National Heart, Lung and Blood Institute and now vice-president for health and dean of the Tufts University School of Medicine, has reported recently that more than half of hypertensive patients discontinue their therapy within a year.

For all these reasons, attention is being directed today to the possibility of using nondrug means, especially, but not exclusively, in people with mild hypertension and in those at risk before blood pressure becomes elevated.

THE SALT CONNECTION

There has long been suspicion of a relationship between salt and hypertension. It's easy to demonstrate in animals. Although elevated pressure is strictly a human phenomenon and can't be found in animals in nature, if you feed animals excessive amounts of salt, their blood pressure will go up and they will develop all of the complications of hypertension.

We've gone beyond evidence from animal studies alone. In the last few years, we've obtained evidence from human population studies as well—many lines of evidence pointing to salt as an extremely important blood pressure determinant.

There's much to be learned from the animal studies—striking points of information—so let's look briefly at them first.

Years ago, at Brookhaven National Laboratory on Long Island, New York, the late Dr. Lewis K. Dahl and his colleagues showed that if you take a colony of rats and add large amounts of salt to their food ration, they develop hypertension.

And, they demonstrated, it is not the same kind of reaction you get when you give a drug and get an effect, and then the drug wears off and the effect is gone. Rather, with salt feeding, you get a slow development of hypertension, an insidious progression.

Moreover, Dahl demonstrated that individual animals vary greatly in susceptibility to the effect of salt. Some are highly sensitive, others completely resistant.

By inbreeding rats at the extremes, Dahl developed two strains, one genetically very sensitive and the other genetically very resistant to the effects of salt.

In his experiments, Dahl established clearly that there is an interaction between genetic susceptibility and an environmental agent, salt.

But even in the most salt-sensitive animals, the genetic factor is permissive rather than determinative. If never given excessive amounts of salt, their blood pressure stays normal throughout life. Given salt, hypertension developes slowly in the animals and continues to rise with age.

HUMAN HYPERTENSION

That there is a genetic factor in human hypertension—and that it is important—is clear. Many studies, including those of twins, have shown that.

Until recently, it was believed that high blood pressure came on suddenly in adult life, virtually out of the blue. Now, however, research has shown that an upward trend in blood pressure is detectable early in life, in children as young as two years of age. The children of hypertensive parents, even at

very early ages, show a greater increment and steeper rise in blood pressure than those of normotensive parents.

And in the adult with hypertension, pressure actually has been rising more steeply ever since early childhood than in the adult who does not become hypertensive. The hypertension may be recognized suddenly when the pressure exceeds a certain limit but the pressure-elevating process has been going on for many years.

The rise of blood pressure with age in adults has been shown repeatedly in many populations—in the U.S., England, Wales, Jamaica, and parts of Africa, Asia, and South America. In fact, because of the constant increase with the years, it used to be said that normal blood pressure is 100 plus your age.

But beyond genetic influences, which may be permissive, there are many determinants for hypertension, most of which are not well understood.

One determinant is obesity. Weight gain in the third and fourth decades of life seems to be more important than after that time. Once high blood pressure is established, subsequent weight loss tends to lower blood pressure. But holding weight down is even more effective in preventing hypertension, than is reducing weight after blood pressure has already gone up.

It's generally believed that stress factors are important in hypertension. While this is probably true, it has been hard to prove. Stress is notoriously difficult to measure.

High alcohol intake has been related to rising blood pressure. Socio-economic class appears to be a determinant, too, with blood pressure levels tending to be higher among lower socio-economic classes.

Even rural-urban influences have been noted. The more rural, the higher the blood pressure; the more urban, the lower. This has been studied particularly in Mississippi but also has been shown in other populations of the world.

These are all matters to be considered. However, let's focus on salt.

THE EXEMPT

It's remarkable—and phenomenon has been a major interest: There are entire populations of people in widely separated environments who have no high blood pressure. There is no rise in blood pressure with age and no hypertension. There are at least 20 such populations and the thing they all have in common is that they lie outside the major modern culture; that is, they are preindustrial populations. They have not yet been homogenized into western civilization. They represent many races, many diets, and many climates. They include Chinese, Eskimos, Melanesians, Polynesians, Australian Aborigines, Africans, Malaysians, and Amerindians of Brazil, Guatemala, and Mexico. Their habitat varies from jungle to desert to arctic. Their diets vary widely. Melanesians live manily on root crops, Polynesians on fish and cocomut, Hunter-gatherers such as the Kalahari bushmen live on berries, game, and insects, and Eskimos are (or were) almost wholly carnivorous.

When their freedom from hypertension was first discovered, it was thought that these people simply lacked genetic susceptibility—that, somehow, because of their isolation, the predilection for pressure elevation had been bred out. it is clear now that this is not the case. If these peoples become acculturated, if they adopt the ways of western civilization, if they migrate or move into towns, their blood pressure rapidly begins to rise and hypertension appears. So they have roughly the same genetic susceptibility characteristics as do people in cultures such as ours.

It's acculturation, or the adoption of western ways, which is in some way related to the development of hypertension. Using computer techniques and statistical analysis, the factors within the acculturation process can be checked out.

When such an analysis is done, diet emerges as very important. And when diet is broken down, *salt proves to be the critical factor.* The correlation of blood pressure trends with salt intake is substantially better than any of the other correlations.

We have found that in one unacculturated population after another when no salt is eaten, except what occurs naturally in food, blood pressure remains low throughout life.

LITTLE VERSUS MUCH

Salt is sodium chloride and it's the sodium with which we are presently most concerned. Sodium makes up about 40 percent of salt.

Actually, sodium is an essential for health. It helps regulate blood and other body fluids, and it has a role in nerve impulse transmission, heart action, and even the body's handling (metabolism) of protein and carbohydrates.

Nevertheless, the basic human requirement for sodium is very small—in the vicinity of 200 milligrams a day. In familiar terms, that amounts to about *one-tenth of a teaspoonful* of salt.

That's all the body needs under ordinary circumstances. And even the largest amount that may be needed under any conditions—and this is being generous—is about ten times that, some 2000 milligrams, or 2 grams. That would still be only a teaspoonful of salt from all sources and might be needed in some people sweating a lot. Years ago, fatigue laboratory studies showed that after a few days to let the body readjust, a healthy person can remain indefinitely in sodium balance on less than 2 grams of intake a day even while sweating as much as 9 quarts a day.

Yet Americans on average—and Europeans as well—get far more sodium than what is suitable for basic needs or even for needs under extreme conditions: somewhere between *6000 and 15000 milligrams in the standard diet, not taking into account snacks.*

In studies which my colleagues and I have undertaken—and in others as well—*all populations around the world without hypertension have been found to consume less than 2300 milligrams of sodium a day, with some consuming far less.*

Between 1966 and 1972, I was a member of a Harvard team of physicians and anthropologists that studied eight tribes in the Solomon Islands of the South Pacific. The three more acculturated tribes showed blood pressure rising with age. On the other hand, the five less acculturated groups showed blood pressure actually falling with age.

Sodium intake was substantially higher in the three tribes with rising blood pressure. Two of these, the Nasioi and Nagovisi, had sodium intakes of 1150 to 2990 milligrams a day, with modest frequencies of hypertension. The third group, the Lau, had the largest blood pressures and sodium intakes of from 3450 to 5290 milligrams a day.

In one study conducted by British scientists unacculturated men drafted into the army in Kenya were checked. Their diet changed from one predominantly composed of milk and meat with about 1150 milligrams of sodium to the army ration of posho, a maize meal containing 5½ times as much sodium. Blood pressures began to go up in the second year in the army and continued to rise through the sixth year of army service.

At the other extremes of very high sodium intake, several studies in Oriental populations have shown high prevalence of elevated blood pressure. For example, in Japan, surveys in rural Akita prefecture found sodium intake averaging as high as 9200 milligrams a day, with hypertension affecting more than 40 percent of the population. A lower prevalence of hypertension was found in Osaka where sodium intake averaged 5520 milligrams.

Colleagues and I have had occasion to study the Qash'qai of Iran, unacculturated nomads of Turkish origin who live on traditional foodstuffs that include 3450 to 4600 milligrams of sodium a day. Strikingly, the Qash'qai are lean, active, and show no tendency to gain weight with age—but they show a strongly rising blood pressure with age and a high frequency of hypertension. Even in the absence of both acculturation and weight gain, their relatively high sodium intake appears to be a very strong blood pressure determinant.

PREVENTION AND HYPERTENSION REDUCTION, TOO

Thus, the accumulating data from many studies—in human populations as well as animals—strongly suggest that excess sodium in the diet is a significant factor in raising blood pressure and producing hypertension.

It would appear, too, that if sodium intake is kept moderate—at some level below 2300 milligrams a day—people who are sensitive to sodium may escape developing hypertension. And since it is impossible, at present, to predict accurately who is and who is not sensitive, moderation for all makes good sense.

There have been studies, too, indicating that mild to moderate hypertension responds to moderate sodium restriction. In several investigations, here and in Europe and Australia, cutting sodium intake back to a level near 2300 milligrams a day has resulted in blood pressure reductions of approximately 10 points systolic and 5 points diastolic.

In one study over a three-year period of 1,500 men and women in three California communities, Dr. John Farquhar of Stanford University found that when subjects in two of the communities reduced their salt intake 30 percent, average blood pressure was 6.4 percent lower than among subjects in the third community where no dietary change was made.

In another study, 31 mild to moderate hypertensive patients were placed for a 2-year period on just moderate sodium restriction, cutting back their sodium intake on average from 4393 milligrams a day to 3611. They achieved a progressive drop in diastolic pressure averaging 7 points.

Such studies are interesting not because they resulted in any dramatic reduction in blood pressure but because of their demonstration that any significant reduction is achievable by so modest a degree of sodium restriction.

It's worth noting, too, that several other studies have demonstrated that better blood pressure control can be achieved with less medication when drug therapy is combined with moderate sodium restriction. That, at the very least, could mean better control of

hypertension with fewer side effects as drug dosage is reduced.

To sum up: Fully two millenia ago, the great Latin poet, Horace, wrote:

He that holds fast the golden mean,
And lives contentedly between
The little and the great,
Feels not the wants that pinch the poor,
Nor plagues that haunt the rich man's door.

Certainly, we are much too rich in overly salted provender and growing increasingly aware of the plagues to which it may contribute. And here, as in so much else, the golden mean—simple moderation—can do only good, never harm.

HOW TO AVOID TOO MUCH SODIUM

It's not entirely a simple matter since a lot of sodium in the American diet is not obvious. Yet there is much you can do to moderate your intake.

You can begin by not salting heavily—even, as so many do, automatically before tasting—at the table. Try halving your salt shaking and going on from there—and see if you don't come before long to enjoy the unsalted flavor of foods. And ask the meal preparer at home to go easy on salt in cooking, making more use of herbs and spices.

Minimize use of obviously salty snacks, such as salted nuts, pretzels, potato chips. Snack instead on raw vegetables or peanuts in the shell.

Become aware of the sodium content of many common foods such as the following. In each case, the sodium content in milligrams is shown for a 100-gram (approximately 3½ ounce) serving.

Fruits and vegetables

Beet greens	130
Celery	126
Dandelion greens	76
Kale	75
Spinach	71
Beets	60
Watercress	52
Turnips	49
Carrots	47
Artichokes	43
Collards	43
Mustard greens	32
Chinese cabbage	23
Cabbage	20
Radishes	18
Broccoli	15
Brussels sprouts	14
Cauliflower	13
Green pepper	13
Cantaloupe	12
Honeydew melon	12
Parsnips	12
Onions (dry)	10
Sweet potatoes	10

Note.—Most other fruits and vegetables not listed contain less than 10 milligrams per serving.

OTHER FOODS

Beef, ground	48
Beef liver	136
Pork chops	60
Ham, cured	860
Bacon	1,077
Bacon, Canadian	2,555
Sausage, link	958
Codfish	70
Cheese, blue	1,396
Cheese, brick	557
Cheese, cream	294
Cheese, Parmesan	1,848
Cheese, process	1,421
Milk, whole	50
Butter	224
Eggs	122
Olives, green	2,400
Peanuts	5
Peanuts, salted	418
Soda crackers	1,100
Ice cream	83
Sherbet	45
Pickle, dill	4–5,000
Pretzels	7,800
Soy sauce (mild)	3,569
Soy sauce (regular)	6,082

Urge the food shopper in the family to check labels not alone for salt (sodium chloride) but also for sodium-containing additives. The latter include monosodium glutamate (MSG); baking soda (sodium bicarbonate); brine (table salt and water); disodium phosphate; sodium hydroxide; sodium propionate; and sodium sulfite. It's a good idea to avoid products that list salt or a sodium-containing additive near the top of the ingredients' list.

Be aware that many canned soups and soup powders have large amounts of sodium as, commonly, do canned, smoked, pickled or cured meat and fish products, and preserved or pickled vegetables. For example, a typical serving of canned soup may contain in excess of 1,000 milligrams of sodium.

Be aware of the often-striking differences of sodium content in canned versus fresh varieties of foods. Eat 4 spears of fresh asparagus and you get 4 milligrams of sodium; the same amount canned gives you 296 milligrams. Where a cup of fresh lima beans contains 2 milligrams of sodium, the same amount canned has 456. An ear of fresh corn has just 1 milligram; 1 cup of canned corn, 384. Eat 3 ounces of fresh shrimp and you get 137 milligrams; in the same amount of canned shrimp, you get 1,955 milligrams.

Know, too, that there sometimes can be remarkable differences in sodium content from one brand to another of the same kind of product. For example, while a 6-ounce can of Del Monte tomato paste contains 112 milligrams, Hunt's contains 610.

And be aware that, with increasing awareness of the excessive sodium intake problem, low-salt cookbooks are being published in increasing numbers, low-salt recipes are appearing in newspapers and magazines, and food processors are beginning to offer low- or no-salt items, including canned corn, soups, cornflakes, sardines, tomato juice, and green beans.

DR. BARNEY CLARK

HON. FRANK J. GUARINI

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Sunday, December 19, 1982

● Mr. GUARINI. Mr. Speaker, I have introduced a resolution today which calls for the House to support the nomination of Dr. Barney Clark, who has made medical history by becoming the first human recipient of a permanent artificial heart, for the Presidential Medal of Freedom.

Dr. Clark has demonstrated tremendous bravery and tenacity in his fight for survival in one of the most outstanding medical achievements of our time. He wages a daily battle against such tangible threats as infection, pneumonia, and seizures, while staving off depression and the frustration that comes with the inevitable setbacks inherent in any new technology. We can only imagine what it must feel like to be Barney Clark, watching the machine his life depends on, hearing and feeling the clicking of the device within his chest, which has beat more than 2 million times since it began its work nearly 3 weeks ago.

Dr. Clark's courage in volunteering to assume the role which allows this phenomenal technology to be analyzed and perfected establishes him as a pioneer in the development of modern medical techniques. He symbolizes the culmination of the efforts of many, much as Neil Armstrong symbolized the efforts of thousands when he became the first human to walk on the Moon.

Our fervent prayers go out to Barney Clark and his family for the success of this medical adventure into the far reaches of science and technology. We salute this man's courage and tenacity. Barney Clark fully deserves the acclaim of the American people and the honor of the Presidential Medal of Freedom. This gesture of recognition would be most valuable in boosting Dr. Clark's morale with the message: "All America is rooting for you, Barney!"●

A TRIBUTE TO FLOYD FITHIAN

HON. PHILLIP BURTON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Sunday, December 19, 1982

● Mr. PHILLIP BURTON. Mr. Speaker, I rise today to express my great admiration for my colleague from Indiana, FLOYD FITHIAN, who will be leaving us at the end of this session.

FLOYD's service to this body and his constituents in his 8 years here has been truly outstanding. From his position on the Agriculture and Government Operations Committees, he has fought diligently for the interests of his constituents and for those of our entire Nation. A legislator of his skill and integrity will be greatly missed.

I would like to extend my most sincere wishes for the future.●

MARGARET HECKLER

HON. JAMES M. JEFFORDS

OF VERMONT

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 16, 1982

● Mr. JEFFORDS. Mr. Speaker, the Congress is certainly going to miss the redhead from the 10th District of Massachusetts. For 16 years, she has represented an area stretching from suburban Boston to the textile and industrial region of Fall River capably and tirelessly.

I will long remember her fondly, and with great respect for her fine work on

behalf of veterans, and on the Science and Technology Committee and the Congressional Arts Caucus. For 7 years, she fought for and finally won passage of legislation providing psychiatric counseling for Vietnam veterans. As the senior—in terms of service only—female Member of Congress, she championed women's causes and led the charge for ratification of the Equal Rights Amendment, and I am sure that is one torch she will not put down. She has also been active on a host of consumer protection issues, including a drive to lower sugar retail prices.

PEG was born in Flushing, N.Y., and attended Albertus Magnus College, then Boston College Law School. She was admitted to the Massachusetts bar in 1956. During her distinguished career, she has amassed the following honorary degrees: Northeastern University, doctor of humane letters; Stonehill College, doctor of laws and letters; Emmanuel College, doctor of humane letters; Regis College, doctor of laws, honoris causa; Albertus Magnus College, doctor of laws; St. Bonaventure's University, doctor of literature.

And now, Mr. Speaker, I will turn to several lesser-known aspects of PEG's life in Washington.

Like all of us engaged in public service, PEG has kept a frenetic schedule, and during her stay in the Capital has often found herself running late for appointments and to catch flights back to her district out of National Airport. On one particular day, I am told by reliable sources, she set a record which still stands, and which you will (or should) find faithfully recorded in "The Guiness Book of World Records," for the greatest number of staff people involved in trying to get a tardy Member to a plane: Eight. One might imagine that she would have had to commission a makeshift litter to have required the services of so many people, but this was not the case. Nor did she requisition an eight harness rickshaw to make her dash down 395.

No. First, she needed someone to drive her to the airport at lightning speeds. Second, she needed someone else to drive out to National to help her carry her big, heavy bag which she determined she could not carry herself once she got there and the first staffer had already left, and someone to wait in this second car in front of the terminal when it turned out that PEG got on her plane before her bag could be loaded and the bag had to be checked onto another plane. Then she needed one person up in the district to pick her up, and another to pick up the bag when it arrived sometime later. Then she needed yet another staffer to drive her dog to the airport, sedate it and put it on a third plane to Massachusetts, and a seventh individual to gather up the pooch when it touched down. Finally, she had her administrative assistant supervise this entire operation to see that it ran smoothly in the fine tradition of all important congressional business.

Which brings me to the second subject of my dissertation: PEG's canine Limerick. This dog was one of the best kept secrets in Washington, ranking ahead of the true identity of Deep Throat.

Yes, PEG kept a dog named Limerick here in the District of Columbia and brought it to work with her every day. Because of the usual difficulties associated with dogs and some rather novel ones, PEG's staff was not overly enamored with Limerick. They had to feed it and take it for walks. And they had to retrieve it when it wandered across the hall into DEL LATTA's office, invariably when DEL was meeting with important associates or constituents.

And they had to keep this dog a secret. For reasons that only she knows, PEG did not want to be seen with Limerick at work, or going to or from the office. As a result, when she drove in to the Rayburn Building each morning with Limerick sitting in the shotgun seat, she would call up from the garage and have her receptionist come down from the office and pick up the dog. PEG would go up in the elevator alone, and the receptionist and the dog would follow later.

One day, PEG came up to her office, sent the receptionist down to the garage and then met with some constituents. She took them down several floors to the cafeteria for some coffee, then got back on the elevator to go back up to the office with them. Unfortunately, the receptionist, who had been unaccountably delayed in her mission, and the dog were on the lift. One of PEG's constituents took a long look at Limerick, who it must be said is not the best looking beagle in the world, and said to PEG, "You see some of the damndest things on Capitol Hill." With a quick, severe glance at her receptionist which indicated that great restraint was called for, and without another sign of recognition to her or to the dog which was furiously wagging its tail and straining on its leash toward her, PEG replied, "You sure do."

I am told that PEG's staff finally gave the dog away without PEG's knowing about it. (Not really.)

In all seriousness Mr. Speaker, I want to say how much I have enjoyed working with the gentlelady from the Bay State. I wish her the best of luck in her future endeavors. She truly is one of the most dedicated, most able, and most effective persons to have graced the Halls of Congress. I am going to miss her.●

TO FREE CHINA

HON. WILLIAM E. DANNEMEYER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Sunday, December 19, 1982

● Mr. DANNEMEYER. Mr. Speaker, the issue of U.S. relations with the Republic of China on Taiwan will continue to be an important one in our overall foreign policy strategy. This matter is currently being influenced by possible relaxation of tensions between the People's Republic of China and the Soviet Union. While we must monitor these developments relating to the two Communist giants, we must not let them overly impact upon our ties with the freedom-loving people on Taiwan.

In this connection, I would like to share with my colleagues two excerpts from a speech by that great patriot, Alexandr Solzhenitsyn, delivered at the Taipei City Auditorium, Taipei, Republic of China, on October 23, 1982. I am inserting them at this point in the RECORD as reprinted in the Christian Beacon of November 11, 1982:

DO NOT TRUST PEKING

What, then, does Communist China want from you? Certainly, it is eager to grab your blossoming economy, to plunder and devour it. After all that has happened in the 20th century, only shortsighted simpletons can trust Peking's promises that it will totally preserve your economic and social system, and even your armed forces along with some elements of freedom. But the main issue is not to take away your wealth, to steal the fruits of your hard work. The main thing is that the Communist system does not tolerate any deviation in anything or anywhere. Not even the wealth of your island is important. What matters is the deviation from their system. Communist China hates you for your economic and social superiority. For them it is not permissible that other Chinese should know that there can be a better life without Communism. The Communist ideology does not tolerate any islets of freedom. And so, with all their might, the Communists want to cut off the sale to you even of defensive arms, to try to weaken your defense capability, to disturb your balance of power in the Straits—and thus to bring closer the day of intrusion into your island.

ATTRACTIVE MYTH

For centuries the Western World has known very well the price of freedom. But with years passing and well-being achieved, it is less and less prepared to pay for it. The Western people value their state systems but are less and less inclined to defend them with their own bodies. From decade to decade, the West has become increasingly senile and unable to defend itself. The betrayal of one country after another had already begun before the Second World War. Afterward, no scruples were felt in abrogating the whole of Eastern Europe just for the sake of the West's own well-being. How easy it was to betray the government of Mikolaychik; how easy it was to withdraw support from one's ally Chiang Kai-shek. And soon we shall witness how one country will betray another for the price of surviving

just a little longer. Should it be surprising that the majority of the frightened Western countries are even afraid to sell you weapons for fear of angering Peking. That's how much their drive and concern for freedom is worth. Meanwhile, threatened Europe should understand your position better but is so cowardly that it fails to recognize that the Republic of China and other countries of Asia are themselves endangered. Just recently, the former premier of Japan declared that the arming of Free China would destablize the Far East! What more can be said?

They are all obsessed with the search for self-protection and the quest for a stand-in. So there emerged an attractive myth—that there are "bad" and "good" Communisms. And out of such a myth grew the image of Communist China as a good-natured peacemaker! But should that be surprising—when in South Korea, which herself survived a Communist assault, there exists a myth that actually the Soviet Union is not directly hostile to them, not so much an enemy, not like North Korea. The South Koreans have also been doing their utmost to curry favor with Peking. Now they are hesitating about whether to give a defecting Red China aircraft to Free China.

No, it is not out of shortsightedness, not out of stupidity, that such myths are believed, but out of despair, out of the loss of spirit.

In a particular relationship to you is the United States of America. Up to this day, the United States provides the only outside guaranty restraining the Communists from attacking your island. But how difficult it becomes for the United States to remain faithful to Taiwan, how much has already been lost on the way! The Americans have also succumbed to the general world trend to leave the Republic of China to its perils, to abandon it to its fate. America moved to abrogate its diplomatic relations with the R.O.C. For what? For what fault of hers? Only to follow the futile Western dream of gaining an ally in Communist China. America has restricted its connections with you, curtailed its military support and is denying you much of what you need.●

MRS. JOYCE CASEY—A PARENTS' TEACHER

HON. LOUIS STOKES

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Sunday, December 19, 1982

● Mr. STOKES. Mr. Speaker, it is a signal honor and a privilege for me to bring to the attention of my colleagues the innovative work of Mrs. Joyce Casey, a dedicated mathematics teacher at the Kirk Middle School in East Cleveland, Ohio.

Mr. Speaker, Mrs. Casey is an extremely hard working and talented teacher. However, what sets her apart from many teachers is her unceasing dedication to teaching her students and the depth of her commitment to promoting their understanding of mathematics.

Mr. Speaker, Mrs. Casey's dedication to increasing the proficiency of her students has inspired her to develop an innovative technique. This technique is the instruction of the parents of her students. In attempting to aid her students, Mr. Speaker, Mrs. Casey has set up mathematics classes for her students' parents so they may better assist the pupils at home. I am pleased to report that this unique approach has been met with enthusiasm and success. Mrs. Casey should be applauded for her efforts and success.

At a time when there is increasing concern about the motivation of our young people, it is encouraging to note that there is a teacher like Mrs. Casey who is determined to motivate her students and give them the best education possible. She subscribes to the philosophy that when parents and teachers work together, the student has an improved chance of learning. Moreover, Mr. Speaker, Joyce Casey has decided that she will work to make that philosophy a reality.

I take great pride in bringing the resourceful ideas and success of Mrs. Joyce Casey to the attention of my colleagues. At this time, I would like to insert in the RECORD an article which appeared in the Cleveland Plain Dealer on Mrs. Casey and her new project:

[From the Cleveland (Ohio) Plain Dealer, Nov. 21, 1982]

SCHOOL'S IN SO PARENTS CAN STAY UP WITH PUPILS

(By Karen Farkas)

Parents of some East Cleveland eighth graders are returning to school to keep up with their youngsters.

Monthly courses for parents were organized this fall by mathematics teacher Joyce Casey, who decided to look to parents for help after more than a third of her pupils failed in June.

"I love teaching and the number of failures was more than I could be pleased with," she said.

She decided lack of motivation could be part of the problem and turned to parents for help.

Casey, who has taught school 15 years, planned to hold a meeting with parents to tell them what she planned to teach during the year. She felt the response was outstanding when at least one parent attended for more than half her 127 pupils.

"I told them I was available any time and my goals were to reduce failure and get students motivated," she said. "Many parents told me later that they would like to help, but were unfamiliar with math."

So she decided on the monthly classes where she goes over what she will cover in the upcoming month.

Early this month, about 20 parents nervously walked into the library at Kirk Middle School one evening to begin their back-to-school experience. They sat down and stared uneasily at the new sharpened pencil, sheets of paper and ruler on the table in front of them.

Casey said pupils were studying the metric system and after explaining the basics of conversion, put five problems on the board and called on eight pupil volunteers to help the parents.

"It's no shame if you don't know how to convert," she told the parents. "There's scratch paper and let us know if you have problems."

Many parents struggled with the problems and some were helped by their children. Stephen Adams' paper was covered with neat rows of multiplication as he computed the conversions. His daughter, Lerona, peered over his shoulder.

"I came to see what's she's doing in school and this is a good idea because she would bring homework home and I would end up scratching my head," he said.

"This is very helpful and it's the first time one of my children's teachers ever did this," said Thelma Smith. "It should continue because it helps the rapport between parent and teacher."

By the end of the session, parents were discussing their problems in converting while enjoying cookies and coffee which Casey provided.

Casey said she was not disturbed that only 20 parents came.

"Whether a child gets an 'A' or 'F,' he still needs the support of parents," she said. "And there were some there whose children weren't doing that well."

She said some parents who worked asked her to notify them earlier of future meetings so they could rearrange their schedules. And she said she would call parents whose children failed math to encourage them to come to the next session.

Parents and pupils will be encouraged to complete activity sheets she will send home.

"I want to be able to get a cohesion between parent and teacher and work together during the year to give the student motivation and drive," she said.

Already results have been seen. "I have seen a tremendous improvement with some students and the enthusiasm of the parents," she said. "I really feel that if students are motivated, it keeps me motivated."

Stephen Lloyd, principal of Kirk, said Casey's efforts might increase parents' interest in other subjects their children study.●

PERSONAL EXPLANATION

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Sunday, December 19, 1982

● Mr. McDONALD. Mr. Speaker, some time ago, in my official capacity as a member of the House Committee on Armed Services, I was asked by the Honorable John Lehman, Secretary of the Navy, to preside over the launching of the U.S.S. *DeWert* at the Bath Iron Works in Bath, Maine on Saturday, December 18, 1982. Consequently, I was necessarily absent from the House floor Saturday afternoon during the consideration of the Education and Labor Committee amendment to H.R. 7357, the Immigration Reform Act. Had I been present during rollcall No. 483, I would have voted "no."●

PROSPECTS FOR PEACE IN THE MIDDLE EAST

HON. JOHN J. LaFALCE
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES

Sunday, December 19, 1982

● Mr. LaFALCE. Mr. Speaker, Henry Kissinger was recently interviewed by the Economist of London. This interview is must reading for anyone concerned about the Middle East. I urge my colleagues to read "After Lebanon—A Conversation:" as reported in the Economist.

Selections from the article follow:

[From The Economist, Nov. 13, 1982]

MIDDLE EAST—AFTER LEBANON: A CONVERSATION

(We recorded this conversation with Henry Kissinger, a private citizen, in New York.)

Do you see still, after recent events, an opportunity for progress in the Middle East?

The circumstances for progress in the Middle East are the best I can remember.

Is the Reagan plan one component in that?

Let me define what I consider to be the essential elements of the Reagan plan: (1) That the negotiating partners on the West Bank should be Jordan and Israel; (2) that the West Bank authority elected by Palestinians should be associated with Jordan; (3) that annexation of the West Bank and Gaza by Israel will not be accepted by the United States or by any other country; (4) that there be a moratorium on new Israeli settlements on the West Bank during a peace process; (5) that the negotiation must deal with Israel's security as well as recognition.

There are other aspects in the plan that I think are not as essential.

Now, suddenly, one is able to talk in these terms whereas, say, a year ago it was difficult to see one's way ahead. Were the military events in Lebanon a useful beginning of this process?

Like it or not, they changed things—so that out of the rubble there came the chance of a fresh beginning. I do not believe it would have been possible to achieve the kind of Arab reaction evoked by the Reagan plan had these military operations not taken place. First of all Lebanon strengthened the moderates in the Arab world by weakening the radicals. Second, it revealed the hollowness, or the limits, of Soviet support for its clients in the Middle East; the Soviets can supply arms but give no impetus to diplomacy. Third, it expected the fact that the new generation of American weapons seems to be much superior to the new generation of Soviet weapons. . . .

American weapons with some Israeli frills. . . .

With some Israeli frills, yes, but at any rate making the military option for those using Soviet weapons in the region less and less promising—and in the process devaluing Russia's principal export.

Finally, the lack of effective support for the PLO [Palestine Liberation Organization] by the radical Arab states made it clear that the rejectionist front had rhetoric but no programme. All this eliminated to a large extent the military potential of the PLO. Therefore if the Palestinians are to participate in the peace process, it will have to be as a political and not as a military factor. These are the new objective conditions on the Arab side making for progress.

On the Israeli side the Lebanese action has removed, substantially, the argument that there was an imminent military threat to the existence of the Jewish state. It would have been unthinkable a few months ago that an Israeli prime minister would tell his parliament that for the first time in Israel's history all its frontiers were secure.

For all of these reasons conditions have never been better for negotiations—provided the Reagan plan is seen as a framework and not a blueprint, every last provision of which needs to be implemented as part of an agreement.

Which elements of it do you see, then, as being particularly encouraging as a framework?

Jordan as a negotiating partner; a decisive role, a political role, for the inhabitants of the West Bank and Gaza in determining their political future, within the framework of association with Jordan; the recognition of Israeli security concerns on the West Bank; and the clear statement by the United States, which will remove any illusions that may have existed in Israel, that annexation (overt or disguised) is not an option we will support.

Those are the potential strengths in the Reagan plan. What are the potential weaknesses and dangers in it?

Some of the language is perhaps necessarily ambiguous; some of it will be interpreted differently by the various parties and—I suspect—by different elements of our bureaucracy. This involves the risk of stalemate in the negotiations, tensions with friends on both sides and disagreement within our government.

The phraseology on Jerusalem in my view may well be only compatible with turning Jerusalem into a UN [United Nations] city, which is a non-starter. The phraseology that the location of the borders will depend on the degree of normalization that the countries are prepared to undertake meets only part of the problem. It obscures the peculiar difficulty of Arab-Israeli negotiation in which one side has attempted to achieve annexation by subterfuge and the other side tries to evade all its problems by trading its maximum demands in return for recognition. In other words the location of the West Bank borders must be related to security as well as to recognition. Israel—as President Reagan has also implied should not be asked to find security solely in recognition.

You talk of the "peculiar difficulty" of Arab-Israeli negotiations.

Two nostalgic illusions inhibit these negotiations. The Israeli nostalgia is that somehow or other they can manoeuvre events to a de facto annexation of the West Bank. The Arab nostalgia is that somehow or other, having lost the military option, they can manoeuvre us into accomplishing their maximum programme in return for verbal formulae, in the process demoralising Israel and with luck bringing about its collapse.

Another danger is that the Reagan plan will turn into a subterfuge for rehabilitating the PLO, establishing it with essentially unchanged composition and programme on the West Bank, threatening simultaneously Israel and Jordan.

The final danger is psychological. Having taken the unprecedented step of introducing a plan without consultation with Israel, we have to be careful not to turn an emergency measure into a regular procedure. Opposition to Israel must not become a congenital feature of our foreign policy lest we break Israel's back psychologically. This is not the case now; I am simply warning against turning what was a probably unavoidable first step into a permanent feature of our diplomacy

Is this argument between America and Israel different in nature from previous arguments?

I think the crisis in American-Israeli relations that resulted from the Reagan speech is unusual in the sense that, for the first time, a presidential plan was put forward without consultation with the Israelis, and for the first time a presidential proposal was totally rejected. We've had tactical disagreements within an agreed strategy before, but this time the dispute involved a fundamental issue of principle. There probably was no other choice: there was a boil that needed lancing in that the Israeli definition of Palestinian autonomy and the definition that the Americans or the Arabs could give to the term had been at fundamental variance from the beginning.

The Israeli proposal for autonomy foresaw a self-government authority arising out of some process of election. Because the arrière pensée of at least the key members of the Israeli government was, as is now apparent, that they would not give up sovereignty over any part of the West Bank, they were careful not to draw any terrritorial distinction. By implication the autonomy plan applied to the entire West Bank within the 1967 borders. Paradoxically the Begin government, against its preferences and ideology, was really proposing what all other nations were certain to treat as an embryo Palestinian state and, to compound the irony, within the 1967 border since none other was under discussion. Once there was an elected self-governing authority on the West Bank, an irreversible political fact would be created on the territory over which its authority was supposed to run. However limited this authority, it would soon turn into the nucleus of something like a Palestinian state, probably under PLO control. It would be so treated by almost all of the countries of the world except Israel.

Are you saying that since Camp David we have got stuck on an escalator, so to speak, on the use of the word autonomy which we now cannot get off?

No, I'm saying that so long as some form of Israeli sovereignty over the entire West Bank was the objective the autonomy negotiations could not be brought to a conclusion acceptable to all parties: even without Lebanon a point would have been reached at which either the United States would have had to put forward its own definitions of autonomy, or there would have been a blow-up of the negotiations.

Lebanon has now made it possible to involve other Arab states in the process and therefore to come up with a more comprehensive approach than would have been possible otherwise. That is the boil the Reagan plan has helped lance.

Because it got back to the idea of Perez and others that Jordan ought to be the negotiating partner?

That idea preceded Perez and should not be identified primarily with internal Israeli politics. It has been American policy since 1967 that Jordan should be the interlocutor for the West Bank.

Now, Jordan is talking with Arafat and the PLO. Does that not pose the danger that, by introducing Jordan into it, all we're doing is introducing the PLO on to the West Bank where it can be a threat either to Israel or to Jordan or both?

That is the key strategic question we must all be clear about. The Reagan plan must not turn into a device for introducing the PLO in its present form and with its present concepts on the West Bank. Jordan would thereby become not so much the principal negotiating partner as a cover for the PLO domination of the West Bank. By making the PLO part of Jordan it will also lay the basis for an eventual PLO takeover of all of Jordan, reversing the events of 1970. The creation of another radical state with irredentist aims towards both Jordan and Israel is irreconcilable with the stability of the Middle East.

Do you feel that point of view is solidly enough embedded in the Reagan plan and in the thinking behind it?

I suspect it is solidly in the mind of the secretary of state [George Shultz] and of the president. I am not sure it is equally solidly embedded in the minds of all of those who have to execute it. It is clearly contrary to the convictions of our European allies. A strategic decision has to be made whether the proposed negotiations seek to make Jordan the principal negotiating partner or whether they are used as a subterfuge for resurrecting the PLO after its defeat. If we are not clear about this, we will not be clear about whatever else to do. Our European allies, especially, must understand that for them to build up the PLO while we emphasize the role of Hussein is certain to lead to paralysis or worse.

But is the PLO—its military option apparently destroyed, and deserted as it was by its Arab friends when it needed to exercise it—really such a threat now?

That remains to be seen; the future evolution of the PLO is one of the key questions before us. I believe its military option has been substantially destroyed except perhaps for terrorism. I would also think that reasonable Palestinians, reflecting about their experience of the past 10 or 15 years. Should come to a Sadat-like insight that they must co-exist with Israel in some form: they more than any other people, despite—and perhaps because of—the common suffering Israel and the Palestinians have inflicted on each other, If that happens, a new Palestinian leadership may well emerge, perhaps even under the label of PLO. That would not represent such a threat; it could even turn into a major opportunity. The PLO in its present composition and with its present programme cannot make such a claim. If the PLO is now resurrected without fundamental structural and philosophical changes, it is likely to remain radical, seeking to upset the equilibrium on the West Bank and to destabilize moderate governments in the area—starting with Jordan. I think it should be given an opportunity to demonstrate a change of approach. But this requires more than ambiguous phrases hinting at recognition of Israel. It presupposes a true turn towards the political option reflected in the PLO's structure, programme and personalities.

Can Arafat, now that the PLO is dispersed and has its military teeth drawn, carry a suitably reformed organization in association with Jordan?

I do know and perhaps he does not either.

What specific measures should be negotiated on the West Bank for Israel's security?

There is no such thing as absolute security, but there is such a thing as absolute insecurity. As President Reagan pointed out, the narrow neck of Israel between Haifa and Tel Aviv, with a width of only nine miles in some places, cannot be considered a secure frontier whatever the degree of Arab recognition of Israel. The areas essential for an improvement in Israel's security on the West Bank are not heavily populated by Arabs. Thus it should be possible to return to the overwhelming majority of Arabs living on the West Bank and Gaza a controlling voice in facing their future. The precise location of these security frontiers will have to be settled by negotiation.

Is recognition of Israel a starting point for negotiation or the end-result?

In negotiations between Israel and Arabs the question of recognition plays a disproportionate and unprecedented role.

In all other negotiations mutual recognition is assumed at the outset. I know no other negotiation in which a country is asked to accept recognition of its existence as the principal quid pro quo. The Israelis sometimes give the impression that their sole objective is recognition and some Arabs, perhaps sensing the opportunity, seem to imagine that they can achieve their maximum programme in return for nothing more than simple recognition. So I would be much more interested in how the PLO in fact conducts itself towards the peace progress than in arcane formulae of recognition. However, the issue of recognition has become so symbolic that it cannot be avoided. Recognition of Israel is the beginning of a process, not the end; it does not meet—by itself—the needs of the situation. It is not, when all is said, much of a concession for the PLO to make. Many recognized states nevertheless wound up being destroyed even in our own time.

You talk of the conditions for Arabs getting "our support". Yet American support for Israel during the past 18 months has often been flouted, to the point that the Arabs must wonder what it is worth. Can America afford to see its wishes ignored so openly by a small, determined ally? And what, if it cannot, should it do about it?

The Israeli outrage at the unilateral procedures preceding the Reagan plan would have had more moral force had not Israel proceeded unilaterally on a whole series of issues and had it not made challenging our views, sometimes provocatively, almost a principle of policy. America must, as I have said, treat Israel compassionately and seriously. It must do its serious best to achieve prior agreement before taking initiatives affecting Israel's future. In the end we cannot abdicate the definition of our national interests to a small friendly country, however close. Responsible Israeli leaders will know that continual open challenges to our government, especially to the president, risk the public support for the sustained assistance on which their policy ultimately depends.

No sanctions?

I would hope such a point will never be reached.

It has been an American position and, indeed, almost a universal position since 1967 that the West Bank cannot and should not be annexed by Israel—yet, expressed in terms of concrete, it is being annexed or already has been. Is it now any longer conceivable to talk in terms of negotiation over the West Bank?

It is not only conceivable; it is imperative. Annexation of the West Bank—overt or disguised—will sow the seeds of endless crises, one of which will inevitably erupt into conflagration. It is not even in the interest of Israel however narrowly conceived. The incorporation of Gaza and the West Bank into Israel will sooner or later produce an Arab majority that will destroy the essence of the Jewish state. And if Israel seeks to escape this dilemma by expelling all the Arabs it will lose the moral support of even its best friends. Over an historical period Israel would not be able to withstand the crisis that would result.

Begin has called the idea of an association between Jordan and the West Bank "grotesque". Should he be required, or asked, in a negotiation to change his mind—and what form of pressure can be brought by the United States to help persuade him to change his mind?

This is the fundamental issue between the United States government and Begin, so it is unfair to make him the symbol of negotiating difficulties. With respect to Egypt, after all, he made more concessions than I would have expected on the basis of my experience with previous Israeli governments. Granted all this, the present positions of the American and Israeli governments are nearly irreconcilable. As for pressures in the immediate future, the most effective one is for King Hussein to step forward with whatever Arab acquiesence he needs as the Arab negotiator for the West Bank. This would pose for all Israelis the concrete necessity for decisions. So long as the Arab participation in the process remains only hypothetical, the debate will be sterile and bitter. In the meantime the best that America can do is to state a reasonable definition of what it has in mind with respect to both security and to political evolution. If Hussein steps forward and we stick to our course, many Israeli fears will be reduced and responsible opinion in Israel will shift towards such a programme. We need a serious discussion with the Israelis on what we understand to be the security frontiers on the West Bank and what territories we expect would have to be returned.

We need as well a serious dialogue with especially the moderate Arabs. Moderate Arabs must know that their views will be respectfully heard in America; they must not be encouraged to believe that their sole contribution to the negotiations is the willingness to accept Israel. They must avoid the temptation of building an Arab consensus on the prospect of a gradual demoralization of Israel by American pressure. They as well as Israel should work with us on the definitions of peace and security that are central to the peace process.

Why should Arafat agree that Hussein step forward?

Because this is the only way the Palestinians can achieve control over their future. The alternative to the course outlined here is not a PLO state but Israeli annexation of the West Bank and the loss of a historic opportunity.

Is there a similar danger—I think of Sadat's last years—of destabilizing Arab regimes that we would prefer not to destabilise, by having them associate themselves closely with compromises which are difficult for them to make and which associate them with the current state of affairs in Israel? I think, of course, obviously of Jordan, but also of Saudi Arabia.

Perhaps. In my view the Camp David process played a relatively small role in the destabilization of Sadat. The major cause was the growth of fundamentalism in the Arab world. And also the start of a feeling that perhaps we were shifting from Egypt to other Arab states that had dissociated from the peace process. The question arose in some Egyptian minds whether it had all been worth it since it seemed possible to

gain all the benefits of American friendship without having run the risks of Camp David.

That was true for Saui Arabia, was it true for Jordan?

No, it was true for Saudi Arabia and it was not true of Jordan only because Jordan was not convinced enough that we could deliver.

It is said that American officials are disappointed in the Saudi support of the Reagan plan. Should they be?

It has been a consistent error of some of our policymakers to expect Saudi Arabia to deliver and Arab consensus. Saudi Arabia is in no position to do so; it is wise not to let itself be tempted into the complex details of the West Bank negotiations. Were we to prevail we would weaken the kingdom without furthering the negotiation process.

It was interesting to see Syria's foreign minister in Washington last month visiting President Reagan along with more moderate Arabs. Do you think that Syria is going to play the same blocking role that it has appeared to play before?

I am struck by the presence of the Syrian foreign minister in Washington and also by the interview given by the information minister, Iskander, last month. Both of these events indicate a desire by Syria not to be left out of the negotiating process. If Syria plays a blocking role it may be more to achieve pre-eminence over the Palestinians than because of its objection to the concept of the settlement.

Syria usually wants a price, doesn't it, for participation, both from the Saudis in financial terms but also from others in political terms. Do you see the same pattern repeating itself?

Yes, but also Syria is now in a very difficult position because its military vulnerability has been clearly demonstrated and it cannot believe that it has a serious military option against Israel.

Is it conceivable to see Syria in any negotiation which still leaves the Golan Heights not its own? Strategically, if I were the Israelis, I would want the Golan Heights long before I would want Nablus.

It is not necessary for Syria to participate in West Bank negotiations. It is enough for it to acquiesce in them. In any event, the West Bank negotiations as I envisage them are unlikely to result in a peace treaty. They can at best lead to an interim agreement of a long duration—say 10 to 15 years. As for the Golan, I have always believed that in time it is possible to make another step there in return for something like nonbelligerency that would enable Syria to maintain its principles and still participate in the process.

And Israel its security?

And Israel maintain its security by keeping a foothold on the Heights.

Jerusalem: you said earlier that it was a non-starter that it should become a UN city. That could by implication suggest that you feel that it's a non-starter that Jerusalem become internationalized in some way that allows all sides their access and pride in it.

Israel will rather go to war than abandon a united Jerusalem as its capital. I think that as part of an interim agreement something like the Vaticanization of the holy places is conceivable and would be a wise Israeli move. Again, I have no illusions about the difficulty of achieving even this much; more than that is anyhow unattainable in the initial phase of negotiations. Any attempt to go beyond that would be to invite the collapse of negotiations and the building of an Israeli consensus that would make Israelis prefer isolation, even war, to any peace process.

Since neither Camp David nor the Reagan plan envisages a comprehensive peace at this stage the negotiations which are now in prospect cannot achieve a final settlement. The best that is attainable is a long interim agreement, say 10 to 15 years. Israel would agree to new lines on the West Bank in return for non-belligerency and precisely defined steps of normalization with at least the moderate Arab states.

Is it a footnote to ask you, or do you think it should be an essential part of American strategy, to conceive that, were there a favourable outcome to the kind of problems we've been discussing, greater avenues of cooperation would open up with Arab states in dealing with the threats in the Gulf?

The moderate Arab states of the Gulf must be looking now for opportunities for greater co-operation with the United States. Their self-interest is so intimately tied with American protection of both their internal structure and their borders against the danger developing from radicalism: either in the fundamentalist Iranian indigenous form or (which is not at all inconceivable to me) in the form of some domination of Iran by the Soviet Union is the Tudeh or some similar group were to succeed Khomeini. And they face a threat too from secular radical Arabia like South Yemen or even Iraq. I would look at the West Bank/Gaza negotiations not as producing a change of mind—I think the change of mind about the desirability of American co-operation has already occurred—but as making it domestically feasible for the Arabs of the Gulf to implement what they know to be necessary.

How do you publicize a military base, for example?

By not establishing it. I think what we need is installations into which we could move rapidly; a physical presence near the Gulf that is plausible; and a demonstration of how we could reinforce this presence. And we must generate a credible capability for rapid support against internal upheaval. The embrace must be real and serious, but as subtle and nonpublic as possible.

I much agree with you. You don't see the negotiation on the West Bank as a precondition for that?

No, but it would ease it greatly. I can conceive that Gulf governments, despite their very best judgment, might find themselves in a position where they have to court internal collapse because they simply cannot be associated with a total failure of the West Bank negotiations.●

SIX BUILDERS OF GOVERNMENT

HON. MORRIS K. UDALL

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Sunday, December 19, 1982

● Mr. UDALL. Mr. Speaker, as the 97th Congress draws to a conclusion, I would like to make a few brief remarks about some of our distinguished colleagues who are retiring from this body. I know of few people who have served this body as well as people like JOHN RHODES, DICK BOLLING, HENRY REUSS, SHIRLEY CHISHOLM, and BILL BRODHEAD. And there are, of course, other retiring Members who have made their special contribution. Many of them are friends. All of them will be missed.

I am proud that these Members have chosen to serve this body rather than seeking election to the other body. I believe that the House is the people's house. No one has ever served here by appointment. The only ticket that will gain admission to this body is election by the people.

A similar sentiment was recently expressed in an article by David Broder in the December 15, Washington Post. At this point, I would like to insert the article in the record:

[From the Washington Post, Dec. 15, 1982]

SIX BUILDERS OF GOVERNMENT

(By David S. Broder)

It is retirement time for many of those holding public office. The end of the year will mark the end of careers in politics stretching back, in some cases, to the 1940s.

Of the many who are stepping down this year, six seem particularly significant for the contributions they have made. Three are members of the House: Rep. John J. Rhodes (R-Ariz.), a member since 1952 and, from 1973 through 1980, minority leader, Rep. Richard Bolling (D-Mo.), a member since 1948 and the chairman of the Rules Committee; and Rep. Henry S. Reuss (D-Wis.), a member since 1954 and chairman of the Joint Economic Committee. Three are governors, all past chairmen of the National Governors Association: Robert D. Ray (R) of Iowa, who has been governor since 1968; William G. Milliken (R) of Michigan, in office just a few months less than Ray; and George D. Busbee (D) of Georgia, completing eight years as that state's first two-term governor.

It is not just their longevity that makes them leaders, but that is part of it. In a time of overweening ambition, when so many of their colleagues viewed the possession of one public office simply as a springboard to another, these stayed at their work. All six of them passed up chances to run for the Senate, that showcase of egos.

They are, of course, distinctive personalities. Milliken and Rhodes, despite their Yale and Harvard educations, are models of humility who have led by self-effacement. On the other hand, Bolling, who once served on Gen. Douglas MacArthur's staff, suffers fools about as gladly as did his one-time boss.

Ray and Reuss are regarded in their communities and among their colleagues as examples of personal integrity, as much esteemed by opponents as by their fellow-partisans. Busbee, who moved from the legislative leadership into the governorship, has a genius for negotiation and consensus-building that is all the more striking when contrasted with the lack of those skills in his more famous predecessor, Jimmy Carter.

All of these men are first and foremost successful politicians. The understated line in their biographies, "Reelected in this and this and this year," speaks volumes. But they are much more than that.

They are what Bolling calls "institutional men," as much concerned with building the capacity of the governmental instruments of which they are a part as they are in advancing their careers.

Milliken, Ray and Busbee all have enlarged and redefined the role of governors in their states, and of the governors association in national policy-making. Bolling and

Rhodes, among other achievements, were major contributors to the design of the congressional budget process.

All six brought formidable intellectual abilities to their work, often in areas where there was little political reward for expertise. Not for them the one-page, boiled down summary of a staff member's research, what they thought it important to learn, they really learned. Reuss made himself an authority on the monetary system and the Federal Reserve Board long before most of his colleagues in Congress knew either had any importance.

But more than intelligence, they brought to their daily work an enlarging vision of their own responsibilities. They overcame the parochialism of politics and showed by example to both colleagues and constituents how they might take a larger view of the world. They have been teachers as well as leaders.

Bolling, a product of the University of the South, stood with Speaker Sam Rayburn of Bonham, Texas, in maneuvering the first civil rights bills in a century past the roadblocks erected by die-hard southern opponents in the House.

Rhodes, whose Republican partisanship is as deep as his family roots in Kansas, stood tall during the trauma of Watergate, and helped his fellow Republicans understand that their obligation to the Constitution overrode any claim of party loyalty.

Milliken, who grew up in a wealthy, privileged family in lovely and isolated northern Michigan's Traverse City, battled endlessly to put the resources of his state—and the concern of his party—behind the struggle for survival of the people of Detroit.

And Bob Ray, in Des Moines, somehow translated his concern for the refugees of America's war in Southeast Asia into what was probably the most successful emergency feeding and permanent resettlement program in the United States.

In a time when many view politicians with deep suspicion, the integrity, ability and durability of these men are a powerful rebuttal to cynicism.●

ADMINISTRATION DEFIES HUMAN RIGHTS LAWS

HON. JERRY M. PATTERSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Sunday, December 19, 1982

● Mr. PATTERSON. Mr. Speaker, today the Reagan administration voted in favor of an Inter-American Development Bank loan to Guatemala for the construction of a rural telecommunications system.

This vote was made despite congressional direction in section 701 of the International Financial Institutions Act which provides that U.S. Executive Directors at the multilateral development banks may not vote for loans to countries which are gross and consistent violators of internationally recognized human rights. According to a letter I received today from the Department of Treasury, Guatemala's human rights record is such that this section does not apply.

Mr. Speaker, I have read the cables. My subcommittee staff has visited Guatemala with a delegation from the Inter-American Development Bank. I have met with Guatemalan exiles, Guatemalan Government officials and former government officials, church people with long experience in Guatemala, and representatives of well-respected human rights monitoring organizations. My subcommittee has held repeated hearings on human rights in Guatemala as they relate to the administration's observance of the law on international financial institutions. My conclusion, Mr. Speaker, is that the administration today violated the law.

My subcommittee will again hold hearings when Congress reconvenes and will try to fashion a legislative means of avoiding this situation in the future. The administration's decision today, especially when seen in the context of the State Department's clumsy efforts to discredit Amnesty International for its reporting on Guatemala, cause me the greatest concern. I am afraid that the United States is being drawn into support for another military dictatorship with another martial law system by biased and incomplete State Department reporting. Now that the human rights barrier has been broken on multilateral aid, I would urge my colleagues to begin learning more about the situation in Guatemala because administration requests for funds cannot be far behind.

I urge interested Members to contact the Banking Committee's Subcommittee on International Development Institutions and Finance, which I chair, for copies of hearings held on human rights in Guatemala.●

CLEVELAND'S BEST DRESSED MAN—BREAUX VANDERWOOD PALMER

HON. LOUIS STOKES

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Sunday, December 19, 1982

● Mr. STOKES. Mr. Speaker, it is a pleasure for me to formally introduce to my colleagues a gentleman, who by every indication that I have, is one of the best dressed and dapper men in Cleveland—Mr. Breaux Vanderwood Palmer. My good friend, Breaux, certainly is one of the more colorful attractions in the city of Cleveland.

Mr. Speaker, Breaux Palmer, armed with his infectious personality and snappy dress, has become a legend in his own time in the city of Cleveland.

Accordingly, he enjoys instant name recognition and is somewhat of a celebrity. This is partly due to his many years of service in the Cleveland Public School System highlighted by his service as the bodyguard for one of the school system's former superintendents. It is partially due to his reputation as a man around town in Cleveland. However, Mr. Speaker, his colorful and trendy dress have been the major reasons for his instant name recognition by people from the Cleveland metropolitan area. This has been a great source of pride and enjoyment for Breaux through the years.

Mr. Speaker, depending on who he is talking to, Breaux may cite his age as being anywhere from 64 to 81. However, regardless of the confusion about his age, there is no confusion that as far back as 1959 when Sepia magazine named him the "Best Dressed Negro Man in the World", until today, Breaux Palmer is a fashion trendsetter.

In addition to his beautiful wardrobe, Breaux has the kind of pleasing personality that makes him a lovely human being both inside and out.

At this time, Mr. Speaker, I would like to insert in the RECORD, an article which appeared in the Cleveland Plain Dealer on my good friend, Breaux Vanderwood Palmer.

BRIGGS' BODYGUARD

(By James Neff)

One of Cleveland's greatest untold stories is how the former superintendent, Paul Briggs, messed up our public schools.

One person who could write a chapter or two of this expose is Breaux Vanderwood Palmer, Briggs' flashy dressing, controversial bodyguard of 14 years.

Palmer's one-time boss, George J. Mazzaro, who resigned as schools business manager, said, "I'm sure Breaux knows a lot."

But Palmer still works for the school system, and he will not uncover the skeletons.

"He (Briggs) would talk to me, especially if he had something on his mind," Palmer said, "They're hard things to talk about. You could incriminate people. So you leave it alone. This is a whole new deal in here now.

Palmer, whose age is somewhere from 64 to 81, wants to end his colorful career on a quiet, dignified note.

However, he still carries a .38-caliber revolver, and he still wears the loud suits with the ascots and stickpins and flowing breast-pocket handkerchiefs that won him the 1959 title from Sepia magazine as "the best-dressed Negro man in the world."

Palmer has changed a little. He no longer sports wild-looking black wigs of Chinese hair. His 29-year-old daughter, model Marty LaBonta, threw them away, all 110 of them, when Palmer's wife died a year ago.

Palmer is a quiet-spoken, formal-mannered gentleman with perfect white teeth and the unlined face of a man 30 years his junior. With his foppish dress, sometimes absent-minded manner and ever-flowing tales of accomplishment, Palmer is an easy target for jibes and even ridicule.

But he's a self-made man who rose from humble beginnings and has lived his life fully and contentedly, which is more than many of us may be able to boast when we reach Palmer's age.

"I was an orphan," Palmer recalled. "I was found on a doorstep. I was partially raised by a white family."

He claims he doesn't know his age. The Oakwood Country Club, where he started

work as a maitre d' in 1945, lists his birthdate as Dec. 12, 1901. During an interview in 1957, he told a reporter he was 55.

But as Palmer gets older, his official age has become younger. When he reapplied as a Cuyahoga County special sheriff's deputy in 1977, he listed 1918 as his year of birth. The confusion is useful to Palmer because the school system, if it chose to, could enforce its mandatory retirement age of 70.

At 16, Palmer left home, Springfield, O., for Chicago, where he worked as a bootblack at a South Side late-night barbershop.

At a party one night, Palmer was ridiculed by his date for his shabby dress. He vowed he would never be shamed like that again.

"I stayed in for two years after that," he said. "When I came out, I was the sharpest dresser around.

Palmer likes to list his clothes collection: more than 100 suits, six fur coats, 10 coats with fur collars, so many dozens of shoes, and the list goes on.

But his flashy ways sometimes have landed him in trouble. In 1957, the Oakwood Country Club fired him. "I got a little too flashy," he said. "Every six months I got a new Cadillac. A lot of people resented that."

In the 1950s and early 1960s, he ran a drugstore at 3602 Central Ave. called Fair Trade. He knew nothing about minding such a store, lost money and sold half to Joseph Allen, the numbers figure. "It didn't bother me any," Palmer said.

When Allen's legal difficulties got the better of him, the store folded.

Palmer somehow landed a job as an investigator for the state attorney general's office in 1961, and he worked there until 1964 when he began guarding Paul Briggs. The school system was troubled by racial tension, and it was thought Palmer would be the best bodyguard for Paul Briggs.

Palmer loved the job, and he eventually oversaw a 155-person security force for the schools. The pay was lovely, too. In 1974, he earned $30,000, averaging 38 hours of overtime a week, for the fifth highest salary in the system.

Today, Palmer is stripped of his former duties. He inspects buildings that have been damaged by fire and vandals. He shows vacant buildings to potential buyers.

"There's a lot of jealousy at the school board," he says. "You get a guy as smart as I am in this business, you try to get him out of the way. He knows too much."●

GUERRILLA VIOLENCE IN GUATEMALA

HON. EDWARD J. DERWINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Sunday, December 19, 1982

● Mr. DERWINSKI. Mr. Speaker, as Guatemala faces increasing violence, an understanding of the situation in that unfortunate country is improved by information placing in perspective the forces contributing to the violence. The following unclassified telegram from the American Embassy in Guatemala City to the Department of State contributes significantly to that end. The relevant text of Guatemala City telegram number 09219, dated December 8, 1982, is printed below:

SUBJECT: SELF-PROCLAIMED GUERRILLA VIOLENCE IN GUATEMALA, MARCH 23-NOVEMBER 30, 1982

1. INTRODUCTION

Guatemala is in the midst of civil war initiated by the leftist insurgents now united as the URNG (Guatemalan National Revolutionary Union). The groups making up the URNG are the following: EGP, Guerrilla Army of the Poor; PGT, Guatemalan Communist Party; FAR, Rebel Armed Forces; and ORPA, Armed People's Revolutionary Organization.

As in any war, there are numerous combatant deaths from military clashes between the Guatemalan army and insurgent forces; as in any war, there are also, unfortunately, many noncombatant deaths as a result of these clashes. Such deaths are inevitable where almost every military action taken is proximate to the civilian population.

2. On November 24 of this year, Havana praised the URNG forces as the true Guatemalan army and as the heir to the guerrilla army first formed on November 13, 1960, which itself was an "outstanding example of active solidarity with the newly established Cuban revolution." The URNG proclaimed its formation in February 1982 as an "historic landmark in the mass revolutionary movement in Guatemala." After the March 23 accession of the present government, the URNG announced on March 24 that despite the coup, "the Guatemalan people will increase the revolutionary people's war to achieve the seizure of power and the installation of a revolutionary, patriotic, popular, and democratic government."

3. On June 15, 1982, President Rios Montt announced that the Guatemalan Government would seek to hold talks with guerrilla leaders who were in Mexico. Three days later (June 18) the FDCR (democratic front against repression) rejected President Rios's offer of dialogue with rebel forces. The leftist FDRC, which is the political front for the URNG, claimed that talks could not begin at the moment due to "lack of conditions that would allow broad and democratic discussions." The government offer of talks to end the war being rejected by the URNG leaders. The war has continued to this day. End introduction.

4. What follows is a compendium of human rights violations by the URNG. This list includes only acts acknowledged by the URNG groups, and naturally, therefore, does not include any mention of massacres of noncombatants they are known to have committed (but have not admitted), such as, for example, in Salacuin. Their four members groups have taken credit for these acts in their own bulletins and in one of their own magazines, Noticias de Guatemala, and have publicized them through Radio Havana and Managua Radio Broadcast. The URNG claims that, apart from informers, the casualties it has inflicted are on GOG personnel; undoubtedly, however, the figures which follow also include civilians, some of them probably members of the civil patrols. In March, the EGP published a bulletin in which they threatened those (Indians) who joined the civil patrols with swift revolutionary justice. The embassy can not vouch for the accuracy of the figures these groups provide: some are probably accurate; some, inaccurate. For instance, on October 26 ORPA downed an army helicopter and claimed it killed five soldiers; in fact, the casualty figure was two. The almost daily terror recounted here is a direct cause of economic dislocation in the highlands and is one of the reasons why thousands of Indians have fled from their homes and lands, and now are seeking army aid as internal refugees in such places as Choatalum and Chisec. We include attacks on property among these violations, since property is an extension of the person. Others of their human rights violations are, of course, physical violence against persons.

First, an ORPA list published by the slogan, six months since the coup, bathe the country in blood, deceive (sic), sing victory, to achieve again the overthrow":

Ranches and villages occupied	96
Departmental capital cities occupied.	26
Stretches of road occupied	4
Propaganda operations	59
Radio messages transmitted	29
Harrassment activities	11
Ambushes	23
Combat actions	21
Military transports destroyed	9
Military transports damaged	1
Airplanes destroyed	1
Airplanes damaged	1
Enemy installations destroyed	19
Enemy army dead and wounded	514
ORPA dead (4) and wounded (2)	6

Ranches and villages occupied	292
Departmental capital cities occupied.	76
Roads and customs points occupied	27
Propaganda operations	449
Radio messages transmitted	61
Harassment activities	25
Ambushes	66
Combat actions	75
Military transports destroyed	52
Military transports damaged	2
Airplanes destroyed	4
Airplanes damaged	3
Reservoirs destroyed	2
Enemy installations destroyed	60
Enemy army dead and wounded	2,306
ORPA dead and wounded	69

5. It is fitting to conclude with the URNG assessment of the future of their self-proclaimed revolutionary aims, broadcast from Havana on October 23.

(Text of radio broadcast) Andrea Ramirez, a Guatemalan National Revolutionary Unity (URNG) representative in Havana, has declared the Guatemalan Revolutionaries' decision to continue their struggle until they obtain final victory. As the primary event of a campaign promoting solidarity with Guatemala, she said that her people are waging the greatest and most necessary war in their history, a war that has lasted almost 30 years. She said that in that time the U.S. Central Intelligence Agency has provided the various regimes with the most sophisticated methods of torture.

She also stressed that the people's revolutionary struggle has been extended to almost all of the nation's territory, with participation by the most diverse sectors, who will continue their struggle until they reach victories similar to those of the Nicaraguans.

Alfonso Guillen Zelaya, vice president of the Cuban Institute for Friendship With Peoples, said that Guatemala is suffering from one of the continent's most repressive regimes, which is kept in power by the support of U.S. imperialism. (End Radio Havana text). Chapin ●

CONGRESSMAN BINGHAM COMMENTS ON ISRAEL

HON. STEPHEN J. SOLARZ

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Sunday, December 19, 1982

● Mr. SOLARZ. Mr. Speaker, on October 1, B'nai B'rith International honored Congressman JONATHAN BINGHAM, one of the great statesman of this or any Congress, for his 18 years of service in this House and his outstanding record as an advocate and spokesman for important humanitarian causes, particularly the survival of the state of Israel.

Scores of JACK's friends from Washington attended the luncheon including Cy Kenner, Al Moses, Phil Kershner, Jess Fisher, Daniel Thurz, Warren Isenberg, Congressman Bob Drinan, and myself. Congressman BINGHAM delivered a moving address about his work on behalf of Soviet Jews, his longtime involvement in efforts to insure the survival of the state of Israel and his strong desire to see Israel develop a new long-range peace proposal.

Because of the unique role that JACK BINGHAM has played in the Congress, and even before at the United Nations and in the point four program, I wanted other Members to have the opportunity to read these remarks. If one were to draw up a list of the Members of Congress who over the course of the last 34 years have most aided Israel, JACK BINGHAM would be there. He is one of the most thoughtful, responsible, able and respected Members of this House, whose work has made an enormous difference. He will be greatly missed, particularly by myself and other members of the Foreign Affairs Committee.

Mr. Speaker, I ask that Congressman BINGHAM's remarks be reprinted in the RECORD.

CONGRESSMAN BINGHAM'S ADDRESS TO B'NAI B'RITH

Representative BINGHAM. I particularly appreciate this humanitarian award because I feel very close kinship to B'nai B'rith. One of the items I am proud of is that I am an honorary member of Redemption Lodge in Coop City. My first contact with B'nai B'rith International, occurred when I was at the United Nations. Bill Cory gave me a lot of information about the situation of Jews in the Soviet Union. This aroused my interest and intense sympathy, and I've been much involved in that problem ever since. Bill Cory couldn't be here today, but I do want to pay tribute to him and all that he has done over the years in that regard. As a result of his initiative and others, soon after I came to Congress in 1965, I initiated what

I think was the first round robin letter in the House of Representatives protesting the treatment of the Jewish Community in the Soviet Union. We obtained over 300 signatures in the House for that letter. It was the beginning of a great deal of activity on the part of members of the House.

Incidentally, while I'm referring to members of the House, I'd like to thank Bob Drinan and Steve Solarz for taking the trouble to be here today. We have worked together on so many matters and its a great pleasure to have them here; on this and other areas they have done so much.

In 1972 I had occasion to travel to Vienna and witnessed Soviet Jewish refugees arriving on the train. In Israel we saw them arriving at Lod Airport at night. The night we were there, the then very elderly Ben Gurion was out on the airport tarmac to meet them, which was in itself a thrill. And it was a thrilling experience to watch that process at its height and to see the enormous efforts that were being made by Israel to absorb these people coming from the Soviet Union; and the wonderful job being done in language training, providing housing, sometimes giving them preference over some Israeli young people. Out of that came the stimulus for me to introduce the legislation which became known as the Soviet Jewish Refugee Assistance Act which was enacted into law that year with the help of Senator Muskie in the Senate. It has been renewed each year ever since, and has provided over 200 million dollars to Israel over those ten years for refugee aid. It is something that I take a great deal of satisfaction in.

I'm very worried about the present situation of the Jews in the Soviet Union. I think we are at perhaps the lowest ebb in many, many years in terms of emigration. It is virtually down to a trickle. The crackdown has been so severe that the Helsinki monitoring group had to disband. There are very few left who are able to act effectively as dissidents. And one wonders what the prospects for improvements are. It's clear that the sanctions that were imposed on the Soviet Union following Afghanistan and following martial law in Poland have not had a good effect on the treatment of the Jews or on emigration. That's not to say that they were wrong. I supported those sanctions, particularly following Afghanistan, and I supported what was done following the events in Poland. The United States simply had to react.

I think we should distinguish when we think about sanctions, between those which are in the nature of some form of punishment, some form of reaction to show your total displeasure, and sanctions which perhaps can operate as leverage to accomplish something. In this case, I think it is quite clear that the sanctions that were imposed following Afganistan and following Poland are not accomplishing anything. They have perhaps served their purpose as an expression of the opinion in the United States, of our unwillingness to let these acts go unchallenged; if so, I think it is time that we should begin to re-examine them.

I am particularly opposed to the latest effort by this administration to impose our will on our friends in Western Europe on the question of exports for the Kamal Pipeline. This was a matter that we discussed and debated in the House just yesterday. We came very close to passing a bill that would reverse the actions the President took in imposing those sanctions. The bill wouldn't have become law because it obviously wasn't going to pass in the Senate, but at least we did get enough votes to show the tremendous sentiment in the House on the issue both because of the severe impact on employment on the United States, and because of the damage to our relationship with our Western European allies. Nothing we have done since World War II, in my opinion, has done greater harm to our relationship with our European allies than this effort to force them to comply with a decision which we made two years after they entered into contracts for the supply of this equipment (none of which is high technology and which can be bought elsewhere), to try to force them, as is they were children, to obey our will. I think that the Jewish Community, in particular, with its enormous interest in the treatment of the Jews in the Soviet Union, should look carefully at this question of sanctions and the total question of our relations with the Soviet Union. My own feeling is that the treatment of the Jews in the Soviet Union, both internally and with respect to emigration, is not going to improve until we improve our basic relations with the Soviet Union. I leave that thought with you.

Now turning to the Middle East, let me indulge in a little personal reminiscence if I may since I feel rather sentimental in view of my appreciation for this award and for the form in which it comes. The question was asked of me yesterday in an interview: Why did I get so interested in Israel? Well, I have to give you a little background.

I was brought up in a New England family, a WASP family, and, typically for such a family, anti-Semitism was rather pervasive, if not in a very virulent form. The fact of the matter is, my family knew no Jewish people. To me as I grew up, Zionism was just a word, it didn't really mean anything. Then through a stroke of the greatest good fortune, I fell in love with a Jewish girl, a member of the Lehman family in New York, and I married her. But the Lehmans, and they were part of "Our Crowd" (for those of you who read that book), were themselves not Zionists. I think very few of "Our Crowd" had any interest in Zionism and some were actively anti-Zionist.

It really wasn't until the advent of Hitler that some of these folks began to get interested in a place of refuge for the Jewish people. My father-in-law during the Hitler years was very active in getting Jews out of Europe, but I never heard of him trying to facilitate or be in any way interested in having some of these Jewish people go to Israel. It was not until the horrible, horrible revelations, coming at the end of the war in Europe, that my father-in-law and others in that group became interested in Zionism and in Israel. And curiously enough, my father-in-law, who was a very gentle soul, swung all the way in the opposite direction and became a contributor to the Irgun!

We all were exposed to the pitiful tales of emigrants being turned back at the shores of Israel. I was strongly reminded of the horror of this, watching the replay of the beautiful portrayal of Golda Meir by Ingrid Bergman, especially the heartrending scenes on Cyprus. All of these events brought to me and to my wife an enormous interest in, first, the idea of a homeland in Israel, and then of the state of Israel. We gave blood to the Haganah in those days.

Then over the years we had the opportunity to visit Israel many times, I think seven times. In 1952, the first trip I went on in an official capacity, was to help arrange one of the first assistance programs in the form of "Point Four" Technical Assistance. Teddy Kollek, then assistant to the Prime Minister (whom we had come to know in Washington, along with Abba Eban) undertook to show us around Israel. That in itself was a great experience. He drove the car himself, which was rather hair-raising, I can assure you. Of course, that is not uncharacteristic of Israelis. Teddy also took us out in a boat on Tiberias.

That was the beginning of a real love affair with the state of Israel. 1952 was a precarious time. It was a time when the Israelis didn't know how they were going to pay for the next shipload of wheat coming into Haifa Harbor. I don't know how they slept at night. And yet it was a time of marvelous spirit. A spirit which perhaps today is somewhat lacking, and that's one of the sad things about the present time.

During the intervening years I saw miracles of growth, creation of a new port in Ashdod out of nothing, the water carrier, the development of the desert, so many things. And each experience was unique and each was exhilarating.

But my impressions last Thanksgiving were somewhat different and somewhat depressing. I did have the tremendous thrill of attending the dedication of a home for older people called Beit Bingham, down on the shore of the Mediterranean in Ashkelon, which the United Israel Appeal had named in my honor. But in other respects, the trip was rather worrisome.

We arranged to talk to a group of young people representing various points of view, many of them seemed to be somewhat lost, somewhat at sea, not knowing where Israel was going; not knowing where they were going. And this is spite of the fact that Israel has grown strong economically and militarily; some people say Israel today is the forth military power in the world. Yet something is lacking and I think perhaps it is a lack of long-range hope, of long-range optimism. There is a feeling of, I won't say quite despair, but a feeling of gloom about the future. "What do we have to look forward to except endless hostility, endless wars, or near wars?"

Naturally, like all of you, I have been deeply disturbed by recent events in Lebanon. It has been a traumatic time for the Israelis and for those of us who love Israel. I did feel that the invasion of West Beirut was a mistake. I felt the Israelis were taking on a responsibility there that they couldn't possible carry out effectively, the complications of Lebanon begin what they are. And I think there were signs too, that the government of Lebanon was beginning to reassert itself. The great opportunity that had been opened up by the Israeli invasion of Lebanon to be able to recreate Lebanon as a nation, as a true state, standing on its own feet with no foreign forces there. This great opportunity seemed to me to be jeopardized by the notion that as soon as there was trouble in West Beirut the Israelis moved in. And then of course, came the massacre in the camps and we all felt horribly about that. I was even more dismayed by the initial reaction of the Israeli government. I didn't feel we were being told the truth. I didn't feel the Israeli people were being told the truth. There was a total rejection of any responsibility, when they had assumed the responsibility in West Beirut.

But now I think all that has changed, and it has changed because Israel and the Israelis have demonstrated once again, and this is the most heartening thing out of all this that has happened—they demonstrated

once again what a vibrant and wonderful democracy they have. What other country anywhere, let alone in the Middle East, would have had the internal integrity, through the action of the people, to demand of the government that they establish an independent investigation of the events in the two camps? It is an exciting demonstration of the fact that Israel is, after all, Israel as we have known it.

Let me comment briefly on the attitude of Congress on all of this. Obviously there has been dismay in the Congress. We have had reports from our colleagues coming back from their districts, that they've heard more anti-Israel comments from their constituents than ever before. And I've no doubt that's true. I didn't particularly encounter it in my district, but I am sure it was true of districts around the country and enough members have mentioned it, so that it is a matter of real concern. Believe me, members of Congress do tend to know their constituents feelings pretty well.

At the same time, there hasn't been any Congressional reaction that would call for sanctions against Israel or any kind of specific pressures from Israel. Indeed. Indeed in the midst of all this, both Houses approved a provision for continued aid to Israel—military and economic—at a somewhat higher level than would have been called for by the criteria applied to other programs in the continuing resolution being passed today to provide for the continued operations of the government. The standard for most programs is nothing higher than last year's figure or the President's budget request, whichever is lower. In the case of Israel, both Houses approved a somewhat more lenient standard than that, so that there is an increase over last year's assistance level.

I hope that, with the demonstration of Israel's wonderful, vibrant democracy and with the independent investigation that has now been set up, you will see a swing back toward a more normal feeling of warm support for Israel itself.

Now a number of American writers have called for the ouster or the resignation of Begin, or Sharon or both of them. It is remarkable that Bill Safire, who is noted for his solid support of Israel, the other day called for the resignation of General Sharon. As a member of Congress I do not feel that I should express an opinion on whether there should be a change in the top leadership in Israel. (I must say I am not so hesitant when it comes to calling for a change in the top leadership in this country!)

Yesterday, I was asked whether I have a plan for the Middle East and whether I was going to announce it today. My friends, I don't. And I don't know anybody that does. As for the Reagan plan, it was perhaps rejected too much out of hand by Begin, since there are some good things in it. But there are some flaws in it, and its probably academic anyway, as long as King Hussein isn't willing to play the role that is envisioned for him in that plan.

What is lacking, it seems to me, is a plan from the Israelis themselves. How long is it since any Israeli government has proposed a plan for long-range peace in the Middle East? The last I can remember was the Allon plan. And that didn't really have the support of the then government.

Surely the Israelis have the courage and the imagination, if they will set their minds to it, to decide how long-range peace in the Middle East is going to be achieved and then to pursue that objective. My own view is (and I'm very worried about it) that the present course, the present policy in Israel, isn't directed in that sense. They seem to be moving away from 242 and toward a position that they have to hold on permanently to the West Bank (Judea and Samiria). Surely that will not achieve true long-range peace. I don't see how anybody can argue that, as long as they pursue that course, they are going to have anything but the kind of continued tension, the kind of threats of war or actual war, that have characterized the last 25 or 30 years.

And so it seems to me we should be saying to the Israelis that they have a responsibility to themselves to think through how they are going to arrive at the goal of long-range peace, and then to come forward with such a plan and let us in the United States give our whole-hearted support for that dream. Thank you very much.●

NUCLEAR DETERRENCE

HON. ROBERT K. DORNAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Sunday, December 19, 1982

● Mr. DORNAN of California. Mr. Speaker, the issue of nuclear deterrence is occupying some of the finest minds in our Nation.

The Catholic bishops are drafting a pastoral letter which will have great impact on Christians and members of other religious faiths as well.

In response to the bishop's request for comment on their second draft of their proposed pastoral letter, 25 Catholic Members of Congress, including myself, have expressed their views in a thoughtful letter to the National Conference of Catholic Bishops.

Those of us who joined in responding to the bishop's request for increased churchmen-laymen dialog in this supremely important issue, feel our letter adds significantly to the discussion.

Mr. Speaker, I commend our letter to all of my colleagues for their thoughtful consideration. This is my last official act as a U.S. Congressman, at least in my current 6-year run of service, and I cannot imagine a more important effort upon which to take my leave. Good fortune, my colleagues, and may God bless you in all your endeavors to make our fragile world a safer place for liberty and human dignity.

CONGRESS OF THE UNITED STATES,
HOUSE OF REPRESENTATIVES,
Washington, D.C. December 15, 1982.

Most Reverend JOSEPH LOUIS BERNARDIN,
Archbishop of Chicago,
Chicago, Ill.

DEAR ARCHBISHOP BERNARDIN: As Catholic members of the United States Congress, we feel a profound responsibility for the direction of our nation's defense policy. As laymen, we are responsible for the concrete application of moral principles, and we are grateful for the spiritual guidance provided by our common faith. Naturally, then, we have a unique stake in the success of the National Conference of Catholic Bishops in its preparation of the Pastoral Letter on War and Peace.

However, from our perspective as legislators, we see a number of difficulties with the draft version of that Pastoral Letter which has been made public by the U.S. Catholic Conference. Precisely because we are so interested in the success of that endeavor, we hope that you will take into account our thoughts on this difficult issue.

We are ever mindful that lawmakers, sworn to uphold the public trust, have a sacred duty to protect the people they represent. Pope John XXIII emphasized this obligation in his great encyclical Pacem in Terris, echoing the words of Pope Leo XIII, "that the safety of the commonwealth is not only the first law, but is a government's whole reason for existence." The preamble to the Constitution we are sworn to uphold asserts as among its primary purposes to "provide for the common defense" and additionally, to "secure the blessings of liberty to ourselves and our posterity."

That special calling gives us a special perspective on the question of national defense, and prompts our reflections on the draft Pastoral Letter. We can divide our concerns into five categories, as follows:

1. The Nature of the Soviet Threat

Our national defense posture—especially insofar as it involves nuclear weapons—is poised to counter the very real threat of Soviet communism. The tensions generated by Soviet expansionism cause the greatest fears of war. Without a threat from the Soviet Union, there would be no arms race. But the policies of our adversary have made the arms race inevitable. In recent years, the Soviet government has undertaken the greatest arms build-up in history. And the historical record compiled by the Soviet leadership gives us every reason to suspect that, if we let our defenses lag, we will pay an enormous price in lost human liberties—not only for ourselves but for free people everywhere.

Pope Pius XII instructed us that "there are human goods of so high an order that immense sacrifices may have to be borne in their defense." Among those human goods are the rights to liberty and to freedom of conscience—rights that are crushed under communist regimes. The Connecticut Conference of Bishops has made the point succinctly: "In view of its proven record, Communism now actively threatens the existence of all religions and of all places of worship in the world." We cannot, in good conscience, allow the degradation of God-given human rights—in our own country or in the countries that depend upon our support for their liberty. We think it worth noting that after the communist coup in Afghanistan, the loyalty of Afghan officers was tested by the demand—under pain of death—that they walk on the Koran.

History also teaches us, quite clearly, that the Soviet government will take advantage of any lapses in the defense of the free world. In Hungary, in Czechoslovakia, and now in Afghanistan, the Soviets have demonstrated their aggressive intentions.

In short, our real threat is not embodied in weapons—however gruesome modern weaponry might become. Our real threat comes from an ideology that challenges our fundamental faith in human dignity. As Father John Courtney Murray pointed out:

"Only Soviet doctrine makes Soviet power a threat to the United States. Only Soviet doctrine explains the peculiar nature of Soviet imperialism and shows it to be unap-

peasable in its new dynamism. Only Soviet doctrine illuminates the intentions of the new messianism that has come out of the East, fitted with the armature of power, and organized implacably against the West."

2. The Nature of Contemporary Warfare

The threat of a full-scale nuclear war arouses the greatest possible fears in modern society, and secular commentators invoke an apocalyptic vision of modern warfare. But for most of the people in the world today, the greatest danger of war still involves conventional weapons. Since World War II there have been hundreds of conventional wars, local insurrections, border conflicts, and guerrilla attacks; the death toll from this warfare runs into the tens of millions.

To date, despite years of international tensions, none of those smaller battles has escalated into a world conflagration. Although we have never truly seen peace, we have at least seen limitations on wars. Those limitations are imposed largely by the strength of the U.S. defense posture, which denies aggressors the prospect of an easy victory. Our defenses deter conventional attacks, sparing untold human tragedy, by imposing risks on potential aggressors. Given the nature of our adversary, there is no other way to stave off violence. "But if there is no risk," Father Murray concluded, "or only a minimal risk, aggressive policies will be carried through, as they were in Hungary, where nothing was done to create a risk."

Particularly in Western Europe, where recent generations have seen so much bloodshed, the Soviet Union has an awesome preponderance of conventional weaponry. Only our nuclear deterrent force inhibits the Soviets from using that advantage to intimidate our allies on that continent.

In view of these strategic realities, our nuclear deterrent force should be seen not as a threat to peace, but as a guarantor of peace. A capable, flexible defense posture allows us to deter war and spare human lives in two different but related ways. First, we prevent the occurrence of some wars of aggression. Second, and equally important, when war does break out we limit it as much as possible to local, conventional conflict.

Since we cannot entirely eliminate the possibility of war, our goal as legislators is to create a national defense that could hold warfare in check. If war does break out we must bring the fighting quickly to a halt. To accomplish this objective, we must have weapons that can be used quickly, efficiently, and discrimately to halt aggression.

We do not wish to enter into a discussion of whether or not a limited nuclear war is possible, because the answer to this controversy is not essential to our general position. We do encourage, nevertheless, research and development of new and more discriminate weapons—whether nuclear or conventional—that can more precisely target military as opposed to civilian targets.

As the bishops judge the morality of nuclear weapons, we ask that they consider that conventional weapons can indeed impose levels of destruction that may be indistinguishable from nuclear weapons, as Dresden, Tokyo and Coventry bear witness. From the perspective of the survivors of Hiroshima or Dresden, the bombing strategy was at least as crucial as the type and number of weapons used.

Our nuclear deterrent is designed to preserve the peace by offsetting Soviet nuclear and massive conventional military forces. Thus should we dismantle our nuclear deterrent we actually increase the danger of war, whether conventional or nuclear.

True, as in the past, a European conventional war might spare the United States. But we recall the words of Stephen Spender, in his horror at the violence of the Spanish Civil War: "It came to me that unless I cared about every murdered child indiscriminately, I didn't really care about children being murdered at all." We cannot foresake our allies simply to allay our own fears.

3. Nuclear Strategy

The draft letter condemns any strategy that envisages the massive bombing of civilian population centers. This condemnation is clearly in line with Catholic teachings since the advent of nuclear weapons. We would only add that the documents of Vatican II are somewhat more precise when they condemn "modern scientific weapons" rather than nuclear weapons as such. Again, conventional weapons can carry out the same grisly mission.

The doctrine of Mutually Assured Destruction does indeed contemplate massive retaliatory bombing of Soviet cities, and we welcome the bishops' injunction against that policy. However, the N.C.C.B. should be aware that American defense policy in recent years has shifted dramatically away from the MAD doctine. Our strategic planners (under President Carter as well as President Reagan) have been moving toward a more rational nuclear posture, in which our own weapons are aimed not at Soviet cities, but at our adversary's own strategic forces. In our view, this new direction makes American policy both more effective and more moral.

However, the draft Pastoral Letter does not recognize the shift in American policy—a misunderstanding that Judge Clark has emphasized in his letter to the Bishops. Moreover, the draft Pastoral does not allow for a nuclear strategy that emphasizes "counter-force" rather than "counter-value" targeting. In fact, the draft condemns "the willingness to foster strategic planning which seeks a nuclear war fighting capability."

If the United States did not have a nuclear war-fighting capability, how could we preserve our deterrent? Deterrence depends entirely on the Soviets' perception of our ability to withstand attack. If our adversary knows that we cannot fight a nuclear war effectively, he has no reason to inhibit his own aggressive instincts. If we retain our nuclear weapons, but eliminate our strategic options for waging war, the only remaining possibility is a return to the MAD strategy—the strategy we have condemned as immoral.

Ambassador Rowny, our top negotiator in the present arms-control talks, has summarized this point quite well. Without a war-fighting capability, we would limit ourselves to only one response in case of Soviet aggression. And, Ambassador Rowny observes, "there would be only one feasible target for that response—Soviet cities and their civilian population. The moral condemnation of such targeting of cities is crystal clear in the documents of Vatican II and in post-conciliar papal statements."

We have seen, in recent weeks, a great deal of debate about the nature of the Vatican statements on nuclear weapons. We have heard many different interpretations of Pope John Paul's message to the United Nations, although the wording of that message seems clear enough to us: "In current conditions, deterrence based on balance, certainly not as an end in itself, but as a step toward progressive disarmament, may still be judged morally acceptable." We can concur, for that matter, with Cardinal Krol's amendment, substituting "tolerable" for "acceptable."

Whatever connotations different interpreters might place upon that statement, and similar statements by previous popes, we find Professor William O'Brien convincing in his explanation: "It should be clear, however, that given ample opportunity, neither the popes, including John Paul II, nor Vatican II have condemned the present deterrent and defense posture of the Free World, much less ordered the faithful to subvert or oppose them." We wholeheartedly concur without reservation in the message of our Holy Father to the United Nations, and we earnestly pray that our bishops do not reach an opposite conclusion.

4. Arms Control and the Arms Race

The history of arms-control negotiations is not a happy one. Successive talks and agreements have taken very little momentum out of the arms race, and it would be difficult to find anyone who feels safer today as a result of the agreements we have concluded with the Soviet Union in past years. Nevertheless, the draft letter gives very little credit to the United States for its efforts to introduce real restraints on nuclear weaponry.

Since the first atomic bomb was invented, there has been only one serious proposal for world disarmament: the Baruch Plan, which was introduced by the U.S. during a time when our nation enjoyed a nuclear monopoly. That plan, and every subsequent suggestion that included the vital element of effective verification, was rejected by the Soviet leadership. Still, the United States government has persisted in good-faith bargaining, and today President Reagan has offered a dramatic decrease in the nuclear armament of the unstable European theatre.

Even without a comprehensive agreement to curtail the arms race, in recent years the United States has reduced substantially the number of nuclear weapons in its arsenal. As part of the 1979 NATO decision on intermediate nuclear forces, we even withdrew, unilaterally, 1,000 nuclear warheads from Europe. But these and other similar self-imposed restraints by the United States have not been matched by the USSR, which has consistently expanded its nuclear arsenal and its capability for nuclear and conventional aggression. The final Pastoral Letter should, we respectfuly assert, give credit where it is due. Perhaps even move important, however, is the fact that in its present form, the draft letter does not seem to differentiate between the intent of the nuclear weapons systems deployed by the United States and the Soviet Union. As it now stands, in fact, we are condemned equally—if not more—than the Soviets for possessing huge weapons. Surely there is room for a more objective assessment of this point. The essence of our policy is, and always has been, to deter war, especially nuclear war. Our principal alliance relationship, NATO, is dedicated to preserving the values, tradition, and heritage of Western civilization—including the freedom of religious choice. It would be preposterous to characterize NATO as anything but a defensive organization which seeks to pervent an aggressor from starting a war.

Unfortunately, the Soviet Union does not share our world view. Its record on human rights and religious toleration is engraved

on the bloodstained streets of Eastern Europe and Afghanistan. Its military forces—including its burgeoning nuclear strike systems—are built around the concept of the offensive. The unprecedented size and scope of their aggressive capabilities should warn us against repeating the tragic mistakes of the 1930's, when the West, in attempting to project a policy of peace at all costs, actually emboldened the fascist dictators to embark upon the aggressive steps which resulted in the Second World War. We recall that following Pearl Harbor draftees were drilling in Grant Park, Chicago, with broom handles instead of rifles. The margin for error we once had no longer exists.

We are far from unanimous concerning the funding for production of the MX missile. Even so, we recognize that it is designed to correct an imbalance between our present defense posture and the Soviet's first-strike ICBM capability. All of us hope that should production of this weapon go forward, it will provide an incentive to the Soviets to negotiate significant strategic reductions.

How can we create that possibility, without increasing the risk of general warfare? New advances in technology have raised exciting possibilities for defensive systems that might take away the advantage of a nuclear first strike. Anti-missile defenses of varying description have been proposed, including some that promise a comprehensive cover against a first strike. If they are successfully developed, such defenses could help to eliminate the moral quandary of nuclear deterrence. We cannot yet be certain that such defensive systems will succeed, but we can at least be open to that possibility. In particular, in considering the Pastoral Letter on War and Peace, the bishops should contemplate the possibility that nuclear devices might be constructed for solely defensive purposes. Surely such devices could not fall under the condemnation of nuclear weapons in the draft letter.

5. The Road Toward Peace

As legislators operating in an imperfect world, we cannot hope to eliminate all conflicts among nations. As Christians, we look forward to the reconciliation of all men in Jesus, but we recognize that such reconciliation will not come about as a result of our inadequate efforts. Therefore, we join our spiritual leaders in calling for prayer for peace. We cannot, and should not, attempt to solve all our problems without invoking the Lord's help.

However, we can and should address the root causes of the tension that currently plagues the world. We can fight against violence without resorting to violence, by refusing to allow the degradation of human rights around the world. As representatives of the free world, we must emphasize the truth about human nature and human freedom—the "unalienable rights" on which our republic is founded. Aleksandr Solzhenitsyn has come to us as a spiritual witness to the corrupt ideology against which we must do battle. Lies cause violence, Solzhenitsyn tells us, and to avoid violence we must do homage to the truth. We are fighting a battle of ideas daily—a battle as important as any other that we might face.

As the N.C.C.B. continues its discussion on the Pastoral Letter, we urge all the bishops to keep this spiritual battle in mind. No true peace is possible unless human dignity is upheld. The crisis we face today does not involve two morally equal forces, but the contention of human freedom against totalitarianism. As Pope John Paul II wrote in *Redemptor Hominis*, "After all, peace comes down to respect for man's inviolable rights."

Forgive us if we speak too bluntly, but we do so because we take your Excellencies' efforts with the utmost gravity and respect. But we would expect the view that no values are worth defending if a nuclear war might ensue to be espoused by materialists—those who are at best agnostic about the existence of the immortal soul and the nature of good and evil. When we read such pessimism from some of our bishops who are dedicated to the propagation of the faith, we cannot but wonder, "What faith?"

In all the burgeoning literature of apocalypse surrounding this issue we have never encountered such a startling statement as the second draft contains, when it says: "Today the destructive potential of the nuclear powers threatens the sovereignty of God over the world He has brought into being. We could destroy His work." The notion that mere creatures could do anything to "threaten the sovereignty of God over the world" strikes us as one definition of Original Sin.

We would hope that those who would disarm us in the name of peace might dwell more deeply on their responsibility for the moral character of the peace that would follow our surrender. Peace without justice is moral violence. The boat people of Vietnam aren't fleeing a war, they are fleeing a peace without justice. We do not see capitulation to evil as an act of morality, nor do we believe that survival is the only value worth preserving. Of course we do not attribute a contrary view to you nor the Conference, but simply want to share with you the depth of our convictions.

We cannot accept the notion implicit in some interpretations of the morality of nuclear deterrence that our only Catholic President, John F. Kennedy, was less than moral in defending our freedom during the Cuban missile crisis of 1962. We recall his report to the American people on radio and television October 22nd, 1962, when he said:

"Our policy has been one of patience and restraint, as befits a peaceful and powerful nation, which leads a worldwide alliance . . . But now further action is required—and it is under way; and these actions may only be the beginning. We will not prematurely or unnecessarily risk the costs of worldwide nuclear war in which even the fruits of victory would be ashes in our mouth—but neither will we shrink from that risk at any time it must be faced."

We take a special pride in President Kennedy's ringing conclusion:

"The path we have chosen for the present is full of hazards, as all paths are—but it is the one most consistent with our character and courage as a nation and our commitments around the world. The cost of feedom is always high—but Americans have always paid it. and one path we shall never choose, and that is the path of surrender or submission.

"Our goal is not the victory of might, but the vindication of right—not peace at the expense of freedom, but both peace and freedom, here in this hemisphere, and, we hope, around the world. God willing, that goal will be achieved."

Once again, we hope that the bishops will consider these thoughts from laymen who, like themselves, are caught up in the horrible dilemmas posed by nuclear weaponry. Our hopes and prayers are with you as you enter the final phase of your debate.

Sincerely,

Robert K. Dornan, Charles F. Dougherty, James L. Nelligan, William Carney, Eldon Rudd, Henry J. Hyde, Daniel A. Lungren, E. Clay Shaw, Vin Weber, Ray McGrath, Joe Skeen, and G. C. Wortley.

Guy Molinari, Edward R. Madigan, Manuel Lujan, Jr., Bill Lowery, Billy Tauzin, John J. Erlenborn, Thomas F. Hartnett, Edward J. Derwinski, Tom Corcoran, John Hiler, Gene Chappie, and John Breaux.●

ARE WE GOING THE WAY OF ROME?—PERHAPS SOONER THAN WE THINK

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 21, 1982

● Mr. McDONALD. Mr. Speaker, It is certainly revealing to see that there are some in our hallowed halls of learning, that have truly done their homework in history. This is particularly true today when we see so-called doctors of history, whose study of ancient history goes back no further than Woodrow Wilson; and yes, some even no further back than Franklin D. Roosevelt.

Now comes one Lawrence W. Reed, chairman of the Department of Economics at Northwood Institute in Midland, Mich. Just out with a new book and coauthored with Dr. Hale Haywood titled "When We Are Free," Mr. Reed has been prominent in other areas. He developed a unique 4-year dual major in economics and business management. As well he has taught in all areas of economics and business, but applied the lessons of history to economics and business, so that students receive a well-rounded education. For all his endeavors he has received numerous Faculty Excellence Awards from Northwood Institute.

As we move from the 97th to 98th Congress, it would be well for my colleagues to see where the trend of America is going. Do we realize the same trend that destroyed the Roman Republic is now taking place in our Republic? The next time the challenge to conscience gives us the choice to vote for more government and eventual totalitarian government or slavery, it would be well to remember the content of the following article by Lawence W. Reed.

The article follows:

ARE WE GOING THE WAY OF ROME?

(By Lawrence W. Reed)

There's an old story worth retelling about a band of wild hogs which lived along a river in a secluded area of Georgia. These hogs were a stubborn, ornery, independent bunch. They had survived floods, fires, freezes, droughts, hunters, dogs, and everything else. No one thought they could ever be captured.

One day a stranger came into town not far from where the hogs lived and went into the general store. He asked the storekeeper, "Where can I find the hogs? I want to cap-

ture them." The storekeeper laughed at such a claim but pointed in the general direction. The stranger left with his one-horse wagon, and axe, and a few sacks of corn.

Two months later he returned, went back to the store and asked for help to bring the hogs out. He said he had them all penned up in the woods. People were amazed and came from miles around to hear him tell the story of how he did it.

"The first thing I did," the stranger said, "was to clear a small area of the woods with my axe. Then I put some corn in the center of the clearing. At first, none of the hogs would take the corn. Then after a few days, some of the young ones would come out, snatch some corn, and then scamper back into the underbrush. Then the older ones began taking the corn, probably figuring that if they didn't get it, some of the other ones would. Soon they were all eating the corn. They stopped grubbing for acorns and roots on their own.

"About that time, I started building a fence around the clearing, a little higher each day. At the right moment, I built a trap door and sprung it. Naturally, they squealed and hollered when they knew I had them, but I can pen any animal on the face of the earth if I can first get him to depend on me for a free handout."

The moral to that story happens to be the connecting link between the course of ancient Rome and the path which America has been taking for much of this century.

Roman civilization began many centuries ago. In those early days, Roman society was basically agricultural, made up of small farmers and shepherds. By the second century B.C., large-scale businesses made their appearance. Italy became urbanized. Immigration accelerated as people from many lands were attracted by the vibrant growth and great opportunities the Roman economy offered. The growing prosperity was made possible by a general climate of free enterprise, limited government, and respect for private property. Merchants and entrepreneurs were admired and emulated. Commerce and trade flourished and large investments were commonplace.

It is certainly true that some slavery existed in Rome. That's deplorable from a libertarian standpoint, of course. But to be fair to the Romans, it must be said that slavery was far more common and far more brutal in the rest of the world in those days.

REMARKABLE ACHIEVEMENTS

Historians still talk today about the remarkable achievements Rome made in sanitation, public parks, banking, architecture, education, and administration. The city even had mass production of some consumer items and a stock market. With low taxes and low tariffs, free trade and private property, Rome became the center of the world's wealth.

At one time, the political and military power of Rome dominated Europe and the Mediterranean. Roman roads facilitated speed of travel and communication to a degree which would not be surpassed until the development of the railroad, the steamship, and the telegraph in the nineteenth century.

Roman law and justice enabled the traveler to journey throughout the empire with a considerable degree of safety.

All of this disappeared, however, by the fifth century A.D., and when it was gone, the world was plunged into darkness and despair, slavery and poverty. There are lessons to be learned from this course of Roman history.

Why did Rome decline and fall? The record is abundantly clear on this point. Rome fell because of a fundamental change in ideas on the part of the Roman people—ideas which relate primarily to personal responsibility and the source of personal income. In the early days of greatness, Romans regarded themselves as their chief source of income. Each individual looked to himself—what he could acquire voluntarily in the marketplace—as the source of his livelihood. Rome's decline began when the people discovered another source of income: the political process—the State.

When Romans abandoned self-responsibility and self-reliance and began to vote themselves benefits, to use government to rob Peter to pay Paul, to put their hands into other people's pockets, and to envy and covet the productive and their wealth, they set into motion Kershner's First Law: "When a self-governing people confer upon their government the power to take from some and give to others, the process will not stop until the last bone of the last taxpayer is picked bare."

The legalized plunder of the Roman Welfare State was undoubtedly sanctioned by people who wished to do good. But as Henry David Thoreau wrote, "If I knew for certain that a man was coming to my house to do me good, I would run for my life." Another person coined the phrase, "The road to hell is paved with good intentions." Nothing but evil can come from a society bent upon coercion, the confiscation of property, and the degradation of the productive.

Early in this process, a politician named Clodius ran for the office of tribune on a "free wheat for the masses" platform and won. Candidates for office began spending huge sums to win election and plundering the population afterwards to pay their campaign debts.

When Julius Caesar came to power in 48 B.C., he found 320,000 persons on government grain relief. Temporarily putting a dent in the Welfare State bandwagon, he ordered the rolls cut to 200,000. But forty-five years later, the rolls were back up to well over 300,000.

GOVERNMENT BREAD

A real landmark in the course of events came in the year 274 A.D. Emperor Aurelian wishing to provide cradle-to-grave care for the citizenry, declared the right to relief to be hereditary. Those whose parents received government benefits were entitled as a matter of right, to benefits as well. And Aurelian gave welfare recipients government-baked bread (instead of the old practice of giving them wheat and letting them bake their own bread) and added free salt, pork, and olive oil. Not surprisingly, the ranks of the unproductive grew fatter, and the ranks of the productive grew thinner.

Surely, many Romans opposed the Welfare State and held fast to the old virtues of work, thrift, and self-reliance. But just as surely some of these sturdy people gave in and began to feed at the public trough in the belief that if they didn't get it, somebody else would. That attitude only hastened the slide into bankruptcy.

The central government also assumed the responsibility of providing the people with entertainment. Elaborate circuses and gladiator duels were staged to keep the people happy. The equivalent of a hundred million dollars a year in the city of Rome alone is a moderate estimate of what was poured out on the games. It was, so to speak, a rough, ancient counterpart to the National Endowment for the Arts, administered and financed by the American government today.

Someone once remarked that the Welfare State is so named because in it, the politicians get well and you pay the fare! There is much truth in that statement. In Rome, the emperors were buying support with the people's money. After all, government can give only what it first takes. The emperors, in dishing out all these goodies, were in a position to manipulate public opinion. Alexander Hamilton observed, "Control of a man's subsistence is control of a man's will." Few people will bite the hand that feeds them!

By the second century A.D. many cities had spent themselves deeply into debt. Beginning with the emperor Hadrian, municipalities which got themselves into financial difficulties lost their independence as the central government placed them under the authority of imperial curators. The financial troubles of New York City and Cleveland of late are modern day echoes. More than half the budget of the city of Detroit is now provided (with strings attached) by the federal government.

HIGH TAXES

Civil wars and conflict of all sorts increased as faction fought against faction to get control of the huge State apparatus and all its public loot. Of twenty-seven emperors or would-be emperors between 180 and 285 A.D., all but two met violent deaths. High taxes and burdensome regulations were the order of the day. Business enterprise was called upon to support the growing body of public parasites.

By the time of Emperor Antoninus Pius, who ruled from 138 to 161 A.D., the Roman bureaucracy was as all-embracing as that of modern times. The historian Trever wrote that by the third century, "the relentless system of taxation, requisition, and compulsory labour was administered by an army of military bureaucrats. . . . Everywhere were the ubiquitous personal agents of the emperors to spy out any remotest case of attempted strikes or evasion of taxes."

Another writer W.G. Hardy, said several years ago that in later Rome, "what the soldiers or the barbarians spared, the emperors took in taxes." The crushing cost of the military, the top-heavy bureaucracy, and the public programs taxed the middle class out of existence.

Clearly, the State gradually became the prime source of income for an increasing number of Romans. The high taxes needed to finance this drove business into bankruptcy and then nationalization. Whole sectors of the economy came under government domination in this manner. The first industry in Rome to be taken over was transportation—shipping in particular. Interestingly, the first industry in America to suffer comprehensive control was also transportation—specifically, railroads.

Emperor Nero may have been the original architect of urban renewal legislation. In the tenth year of his reign (64 A.D.), a great fire left more than half of Rome in ashes. It was rumored then, and many historians now believe, that Nero had ordered the conflagration to be lighted in order to clear the ground for a rebuilding of the city.

Nero is said by Gaius Suetonius in De Vitae Caesarum to have once rubbed his hands together and declared, "Let us tax and tax again! Let us see to it that no one owns anything!" That reminds this author of Harry Hopkins' famous allusion to the Welfare State during the Roosevelt years,

"tax and tax, spend and spend, elect and elect."

In 91 A.D., the government became deeply involved in the business of agriculture. Emperor Domitian, to reduce the production and raise the price of wine, ordered the destruction of half the provincial vineyards.

As the old virtue of self-reliance gave way to political redistribution of income, priests, teachers, and intellectuals extolled the virtues of the almighty emperor, the Provider of all things. The interests of the individual were considered a distant second to the interests of the emperor and his legions. A spiritual vacuum ensued, which was filled partly by the rise of cults and oriental religions and partly by worship of the emperor. The latter reached its zenith under Emperor Diocletian in 285 A.D. No one could approach him without prostrating himself on the ground and kissing the hem of his garment. Formerly, the proud, free citizens of Rome had refused to render such servile adoration to any of their magistrates and rulers.

NATURAL DISASTERS

The Roman empire, amid this sickening spectacle of moral decay, fell victim to an unfortunate series of natural disasters and plagues. Earthquakes, volcanoes, and harsh storms caused great damage. By 200 A.D. at least one-fourth of the population of the whole empire, both civilian and military, had perished by a plague brought from the East. A later one, from 252 to 267 A.D., was nearly as bad. A morally righteous and strong people might have recovered and rebuilt, but these disasters only reinforced the growing despair of a desperate people. The fabric of Roman society was rotting away under the influence of government paternalism, bureaucracy, and spiritual malaise.

Rome also suffered from the bane of all Welfare States—inflation. The massive demands on the government to spend for this and that created pressures for the multiplication of money. The Roman coin, the denarius, was cheapened and debased by one emperor after another to help pay for the expensive programs. Once 94% silver, the denarius by 268 A.D. was little more than a piece of junk containing only .02% silver. (Sound familiar?)

Flooding the economy with all this new and cheapened money had predictable results: prices skyrocketed, savings were eroded, and the people became angry and frustrated. Businessmen were often blamed for the rising prices even as government continued its spendthrift ways.

The easy money policies produced periodic crises in the economy. The panic of 86 A.D. and a severe economic contraction of a few years later are examples. The government responded by imposing penalties for trading in gold, especially for exporting it, much as Franklin Roosevelt did in 1933.

Demanding relief from economic disorder, the people of Rome cried out for a strongman. They got him in the person of Diocletian who, in the year 301, imposed his famous "Edict of 301." This law established a system of comprehensive wage and price controls, to be enforced by a penalty of death. The chaos that followed inspired the contemporary historian Lactantius to write in 314: "After the many oppressions which he put into practice had brought a general dearth upon the empire, he then set himself to regulate the prices of all vendible things. There was much bloodshed upon very slight and trifing accounts: and the people brought provisions no more to market, since they could not get a reasonable price for them; and this increased the dearth so much that at last after many had died by it, the law itself was laid aside."

FROM WELFARISM TO DESPOTISM

Diocletian also ordered that all offices, trades, and professions, in so far as possible, were to be made hereditary. Young men were forced to carry on in the trade of their fathers. There was no escape from this regimentation. The Welfare State had become a despotism.

This tyrant left his mark on history in other ways too. It was during his reign that fully half the men of the Empire were on the government payroll. And not only did he impose across-the-board wage and price controls in relative peacetime, he also resigned from office, in the year 305. (Shades of Richard Nixon?)

All this robbery and tyranny by the State was a reflection of the breakdown of moral law in Roman society. The people had lost all respect for the sanctity of private property. This author is reminded of the New York City blackout of 1977, when all it took was the lights to go out for hundreds to go on a "shopping spree."

The Christians were the last to resist the tyranny of the Roman Welfare State. Until 313 A.D., they had been persecuted because of their faith and their unwillingness to worship the emperor. Under Diocletian, Christians were cast into dungeons, thrown to the wild beasts in the amphitheater, and put to death by every other mode of torture that ingenious cruelty could devise. In this year, Emperor Constantine granted them toleration in exchange for their acquiescence to his authority.

Constantine himself professed Christianity but his personal morality defied his word. Within three years of his announced conversion, he put a nephew to death, drowned his wife in a bath, and murdered his son.

Meanwhile, Constantine showered the Church with land, gifts, and patronage at taxpayers expense. Thus corrupted, the Church lost its old simplicity and high moral standards. It too had jumped aboard the gravy train.

In the year 380, a sadly-perverted Christianity became the official state religion under Emperor Theodosius. Rome's decline was like a falling rock from this point on.

FOREIGN POLICY

In another arena, the foreign policy of Rome in the third, fourth and fifth centuries had become one of weakness and appeasement. Politicians, too busy buying votes at home with pie-in-the-sky programs, ignored the empire's defense. Barbarian "converts," whose loyaltv was still suspect, were even permitted to hold important posts in the Roman military establishment.

In 410, Alaric the Goth and his primitive Germanic tribes-men assaulted the city and sacked its treasures. The once-proud Roman army, which had always repelled the barbarians before, now wilted in the face of opposition. Why risk life and limb to defend a corrupt and decaying society?

The end came, rather anti-climactically in 476, when the German chieftain, Odoacer, pushed aside the last Roman emperor and made himself the new authority.

Some might say that Rome fell because of the attack by these foreigners. Such a claim overlooks what the Romans had done to themselves. When the Vandals, Goths, Huns, and others reached Rome, many citizens actually welcomed them in the belief that anything was better than their own tax collectors and regulators. It is more accurate to say that Rome committed suicide. Like the wild hogs, Romans first lost their freedom, and only then did they lose their lives.

History does seem to have an uncanny knack of repeating itself now and then. America is surely making some of the same mistakes today that Rome made centuries ago. In a famous statement, paraphrased here. George Santayana warned, those who ignore history are condemned to repeat it.

No one reading this, however, should feel despair for the future. The decline of American influence and strength is not inevitable; it is not something beyond the control of the American people. It is, rather, the consequence of faulty ideas, which can change if only this message is carried forth by those who cherish liberty.

Most conservatives and libertarians oppose the Welfare State for moral, philosophical, and economic reasons. Now we must add another reason for our opposition: we understand the lessons of history! With such armaments, all we need now is a commitment to victory, and the will to win.

EPILOGUE

Is the "Reagan Revolution," which began in early 1981, a genuine reversal of the dangerous trends described here? Outwardly, it may appear so: the rhetoric from Washington often sounds anti-Welfare State and some federal programs and regulations and taxes have been cut back. But upon closer examination, the observer finds less and less to cheer about. The federal budget is still getting bigger every year—only the rate of its yearly increase has been pruned. President Reagan's popularity takes a nosedive each time he proposes to cut further. The opposition in Congress, still addicted to the "spend-like-a-drunken-sailor" mentality, is gaining ground. The voices heard most often in protest in the streets of America are those crying for more federal loot, not less.

Americans who are awake enough to know what is going on and dedicated enough to do something about it had better start speaking up—now! Time is running out. As we fight to restore and preserve those ideas and institutions which made our nation great, let's keep these words in mind:

"The penalty men pay for indifference to public affairs is to be ruled by evil men."—Plato.

"All that is necessary for evil to triumph is for good people to do nothing."—Edmund Burke.

"The hottest places in Hell are reserved for those who—in a period of moral crisis—maintain neutrality."—Dante.●

HON. PETER PEYSER

HON. JOSEPH P. ADDABBO

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, December 20, 1982

● Mr. ADDABBO. Mr. Speaker, I rise to join my colleagues in paying tribute to our departing colleague from New York, the Honorable PETER PEYSER.

PETER has been an excellent Congressman and is a delightful and outstanding personality in his own right. I have commended him now as a Representative of both parties in this House, and I do not necessarily rule

out the possibility of doing it again somewhere down the line. People in New York have learned the hard way not to underestimate the personal appeal of PETER PEYSER.

PETER is leaving this House because in New York State we tend to cannibalize our congressional delegation regularly by use of inept redistricting plans. In 1982, our New York State legislators put together two outstanding Members of this House and forced them to run together. PETER was the loser in that particular contest, but he has been a consistent winner in whatever challenges he has attempted throughout his life, and I am sure he will do well whichever way he turns his talents in the months to come.

The issues that have interested this intense and intellectual Member of this body are too numerous to count. Let it be sufficient to say that PETER has always fought hard for Government accountability to the American people, that he has been a strong advocate of the elderly and the needy. He has pushed administrations of both parties to do their work better and with more feeling toward the people they served. He has been an irritant, as we all ought to be, to those who would use the Government as a means of imposing regulations upon an unsuspecting public.

In short, the Nation's public has been well served by PETER PEYSER during the time he has served in this body. He has much to be proud of as he leaves this body. And we are justly proud of him, as well.●

JACK LAUTENSLAGER ENDS 33 YEARS OF SERVICE TO MARION CHAMBER OF COMMERCE

HON. CLARENCE J. BROWN

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 21, 1982

● Mr. BROWN of Ohio. Mr. Speaker, on December 30, Jack E. Lautenslager, who has served the Marion, Ohio, area chamber of commerce for the past 33 years, first as assistant manager, and as manager since 1960, will retire from his post.

I have known Jack for many years and know few other persons who have devoted their time, energies, and love to more enthusiastic service to their communities than Jack Lautenslager. Jack is a lifelong native of Marion, and working for the chamber of commerce was never a job in his view. Instead, it was a constant opportunity to be of service to the entire community in enhancing the quality of life through better business and job opportunities, the schools, health care, housing, transportation, recreation, and all of the rest of the items that make a community whole and progressive.

Jack Lautenslager, undoubtedly, could have moved on from Marion to other chamber of commerce positions for more pay, personal prestige, and wider recognition in larger communities. But he preferred to stay in Marion, the community he loved, and to work to foster the long-term progress of the area and its citizens. This is a devotion to community and unselfishness that is too often missing in today's fast track world. I know that Jack Lautenslager has earned widespread community respect and appreciation for his service.

In addition, Jack and his wife, Thelma, have been selfless in their personal lives, to their family and friends, through their church and civic organizations, and their person-to-person relationships. I have personally enjoyed their company on numerous occasions in Marion and here in Washington, including their attendance 2 years ago as my guests at the National Prayer Breakfast. I look forward, as I know many others do, to their continuing friendship as they enjoy retirement but remain active in community affairs.

The Marion Star recently published an article featuring Jack Lautenslager's career. It is a pleasure for me to insert the article in the RECORD, Mr. Speaker, as a tribute to the years he has served the Marion area community:

The article follows:

[From the Marion Star, Dec. 10, 1982]

LAUTENSLAGER RETIRING: MARION'S CHAMBER HONORS "CATALYST"

(By Bob Gibson)

Every good idea needs a catalyst, a spark that brings everything together. Since 1949, Jack E. Lautenslager strove to be the spark that brought new business to Marion, and tried to keep industry already here happy.

First as an assistant manager of the Marion Area Chamber of Commerce, and for 22 years the manager, Lautenslager sold Marion to corporations and businessmen around the country.

There were successes, and failures along the way Whirlpool Corporation moved to Marion in 1955 and expanded during Lautenslager's tenure. Tecumseh Products expanded, and Boise Cascade built a plant here. Some got away, such as a General Motors plant.

But Lautenslager, in the manner of a true salesman, skims over the failures and concentrates on the positive.

Lautenslager served the chamber longer than any other person, and Thursday night, in recognition of his service, the chamber held a retirement dinner for him at the Marion Country Club. He received the title to a 1981 Ford LTD the chamber had been leasing for his use.

Participants also honored Lautenslager's wife, Thelma.

Lautenslager started work with the chamber as an assistant manager, and assumed the manager's post in 1960.

He officially will retire from the position Dec. 30. His replacement has not yet been named although a chamber search committee has narrowed its list of candidates down to two. Both men recently were in Marion to meet with chamber members.

During the past 33 years, Lautenslager has witnessed some tremendous changes in Marion. Shopping centers and a shopping mall sprang up and business left the downtown area. The streets became one-way and government crept into everyday business life.

Although the details of his job changed, Lautenslager said he kept one concept constant. Always, he said, he tried to bring people together, to help bring business to Marion and to help the business already here earn a profit.

An example of his efforts to bring people together was his work convincing Boise Cascade to locate a box plant here. When he first started talking with company officials, Lautenslager said, the firm indicated there were three possible sites: Houston, Atlanta and Ohio.

Lautenslager said he constantly kept in touch with Boise officials, and arranged meetings between local purchasing agents and company representatives. The two-year effort eventually paid off.

Another plant, Purex Corporation, almost fell into his lap. Lautenslager said he was leaving the office one night when the telephone rang. A Purex official, whom he had never met, wanted to know if building space was available in Marion. That started the process, with Lautenslager serving as a go-between, for the eventual location of Purex in the old Great Lakes Charcoal Company building on Marion-Agosta Road.

But new industry was not Lautenslager's only concern. He said he worked to keep businesses informed about legislation at the local, state and federal levels that might affect them. This service to existing industry, he said, was one of his primary concerns.

Keeping existing industry happy, he said, encouraged growth and expansion, which meant more jobs for the Marion area.

He counts his work with existing industry among the highlights of his career. That work was started by his predecessor, Lautenslager Hugh Webster, and said his successor, who has not been identified, probably will continue the tradition.

Two other accomplishments, which at first glance might appear outside the realm of a chamber of commerce, also stand out in Lautenslager's memory.

One was his work with a local committee to build a branch campus of The Ohio State University here. The other, in which he had a more prominent role, was passage of a levy to build Tri-Rivers Joint Vocational School.

Lautenslager directed a committee to support the levy. Previously, he said, four levies had been defeated.

The chamber members, however, believed Marion needed a vocational school to help train qualified people for industry, Lautenslager said.

The campaign succeeded, by a narrow margin, and today about 900 students per year attend the school. Lautenslager also directed a drive to pass an operating levy for the vocational school in the late 1970s.

Having trained people from the vocational school, Lautenslager said, helps Marion attract industry and helps the youths find jobs.

Although the recession has driven unemployment to high levels here, Lautenslager said overall he believes Marion has had more "ups than downs."

The poor state of the economy in Marion "hurts," he said, but he attributes the downturn to the national economy.

Although he is retiring from the chamber, Lautenslager said he intends to keep busy. He is considering consulting work and will stay active in the Ohio Development Association. He also is looking at a part-time job as a salesman. He informed the chamber of his decision to retire two years ago, he said.

A life-long resident of Marion, Lautenslager said he is not sure he could have accomplished his job as well in another city. Other chambers offered jobs he said, but he chose to remain at home.

"I have a deep appreciation for all the organizations and individuals that I've had the pleasure of working with over the years," he said, adding his work has left him "with a lot of fond memories."●

MARITIME AUTHORIZATION BILL

HON. JAMES J. FLORIO

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Saturday, December 18, 1982

● Mr. FLORIO. Mr. Speaker, I would like to state my opposition to the conference report on the maritime authorization bill. The conferees have unwisely agreed to a provision which would permit U.S.-flag ocean carriers to build foreign for another year.

America needs jobs. At a time when our country is faced with record levels of unemployment and bankruptcies, there is absolutely no justification for us to adopt this measure, which will inevitably lead to the transfer of jobs and tax dollars abroad.

It is not true, as the proponents of this measure would have us believe, that we need to permit the build-abroad program to continue for another year, in order to maintain our shipbuilding capability and to expand foreign trade. In fact, precisely the opposite will occur. According to industry sources, the dollar value of the work that will be exported, if this leigslation passes, will exceed $1.2 billion. During the trial year of the build-abroad program, the construction of 36 ships in foreign yards was approved.

The report that we have before us will close down U.S. shipyards and add to the unemployment in the shipbuilding industry. Merchant ship construction has declined over 80 percent since 1972 and shipyard order books are drying up. The employment of skilled workers in U.S. shipyards has already declined by 50,000 over the last 10 years. Employment on merchant ship construction will probably fall below 10,000 workers by the end of this year.

It is ironic that at a time when the administration and many of my colleagues in the House are pushing for a gasoline tax and a so-called jobs creation program, that there would be any support for a provision which will close down our shipyards and shift the construction and repair of U.S. vessels abroad. At a time when this Nation is building up its national defense to close windows of vulnerability, we must not open up huge new windows by increasing American reliance on foreign shipbuilders to supply our critical ocean vessel needs. I urge my colleagues to vote "no."●

HIGH LEVEL WASTE BILL

HON. JOE SKEEN

OF NEW MEXICO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 21, 1982

● Mr. SKEEN. Mr. Speaker, I strongly support adoption of the nuclear waste bill. One cannot emphasize enough the importance of getting on with the job of constructing and operating a nuclear waste repository. The public is tired of waiting for resolution of the political hangups preventing fruition of a waste disposal program. This legislation will provide a complete regulatory structure and time schedule for this end. I believe that it is important that we adhere to this regime. Given the provision for comprehensive Federal regulation of the repository under the Atomic Energy Act and this legislation, and given the ample provision for State participation in the siting of the repository provided in this legislation, there is no question but that the public health and safety and the environment will be fully protected and that all legitimate State interest will responsibly taken into account in the process provided in this bill. There is no need for additional, duplicative, or conflicting regulations by yet more agencies or at some other level or under yet other statutes. There is no need for further equivocation and hand wringing. In short, the provision for Federal regulation in this bill fully and adequately occupy the field. Thankfully, the public can honestly be assured of no further unnecessary and frustrating delays. We will have safe and efficient nuclear waste facilities when they are needed.

I am including an attachment in the interest of time.

NUCLEAR WASTE BILL

Mr. Chairman, there is a widespread fear of any exposure to radiation associated with nuclear power activities. This fear has spawned widespread litigation against the Department of Energy and private companies. In these lawsuits, people assert that they have incurred an increased risk of cancer as a result of low levels of exposure. They ask for millions of dollars in damages from taxpayers and private industry. The fear of radiation has also resulted in the imposition of a myriad of legal obstacles to continued development of nuclear power in this country. Indeed, we have had no new reactor orders since 1978. Instead, there have been dozens of reactor cancellations. NRC has imposed more and more retrofit requirements, driving up the cost of, and delaying, other reactors. We have been unable to site or operate a nuclear waste repository. The fear, the litigation, and the legal obstacles are impeding our ability to carry out the basic purpose of the Atomic Energy Act to develop atomic energy technology in this country.

Mr. Chairman, the fear that has precipitated all this does not appear to be supported by the facts. Although high levels of radiation are unquestionably hazardous, the situation is far less clear with respect to exposures to low levels of radiation—exposures at the rate of one or two rem per year or lower. There is no evidence that demonstrates that exposures to radiation at these levels is hazardous at all. The hazard is purely hypothetical. Regulatory agencies assume that low levels of radiation are hazardous in proportion to the hazard at high levels. The assumption is solely based on policy; it is certainly not scientifically or logically compelled. The policy reason for the assumption is to be conservative for regulatory purposes. The fact that the assumption is made in no way means that low-level radiation is in fact hazardous.

This linear, non-threshold assumption is not intuitively obvious. Too much oxygen can blind or kill, but at least some oxygen is essential to life. Similarly, too much selenium, or too much of many other trace elements, will result in toxicity, but in smaller amounts these elements are essential to human health.[1] It is relatively common to find that small amounts of otherwise toxic material are biologically stimulatory, a phenomenon known as "hormesis."

Mr. Chairman, there is a considerable body of evidence that, contrary to the conventional wisdom, low levels of radiation may not be harmful and may in fact be beneficial. This is known as radiation hormesis.[2]

Epidemiological studies of populations exposed to elevated levels of natural background radiation fail to detect any adverse health effects and in fact correlate increased exposure to radiation with better health and lower cancer rates.[3] In a recent letter to the editor of the New England Journal of Medicine, two statisticians from The Wharton School explained that "there have been literally hundreds of reports over the past century demonstrating that ecologically realistic low levels of ionizing radiation are usually stimulatory and beneficial

[1] See, for example, *Selenium in the Heart of China*, The Lancet 889-90 (Oct. 27, 1979); Keshan Disease Research Group, *Observations on Effect of Sodium Selenite in Preventing Keshan Disease*, Chinese Med.J. 92(7):471 (1979); Keshan Disease Research Group, *Epidemiologic Studies on the Relationship of Selenium and Keshan Disease*, Chinese Med.J. 92(7):477 (1979); Collipp, et al., *Cardiomyopathy and Selenium Deficiency in a Two-Year-Old Girl*, N.Eng.J.Med. 304:1304 (1981). Ironically, EPA has adopted stringent regulations limiting selenium in water to very low levels on the theory that it might be carcinogenic. Instead, selenium appears to be anti-carcinogenic. Shamberger, *Relationship of Selenium to Cancer. I. Inhibitory Effect of Selenium in Carcinogenesis*, J.Nat'l Cancer Inst. 44:931 (1970). Given the unfortunate permanence of many regulatory standards, EPA may never catch up with science on this issue.

[2] See, for example, Luckey, Hormesis with Ionizing Radiation (CRC Press 1980); Luckey, *Hormesis*, Nuclear News 48 (Dec. 1981).

[3] See, for example, Hickey, et al., *Low Level Ionizing Radiation and Human Mortality: Multiregional Epidemiological Studies*, Health Physics 40:625-41 (1981); Frigerio, et al., The Argonne Radiological Impact Program (ARIP).I. Carcinogenic Hazard from Low-Level, Low-Rate Radiation (1973).

to a wide variety of life forms, including human life . . . . Studies on the population of U.S. states showed that mean background-radiation levels and mortality rates for several cancer categories were generally negatively correlated. . . . [T]he prevalence of mortality from cancer was lower, on average, in urban areas with higher background radiation than in areas with low background radiation." [4]

Evidence such as this not only totally undercuts the litigation against the nuclear power industry and refutes the misdirected fear of low-level radiation but also throws into serious doubt the basic assumptions on which regulatory agencies are basing their standards and requirements relating to the nuclear fuel cycle. In the words of The Wharton School statisticians,

"The extensive evidence in support of hormesis casts doubt on dose-response models that represent the health effects of low levels of ionizing radiation in terms of monotonically decreasing functions extrapolated from the observed effects of high levels." [5]

Clearly we would all do well to heed the warning by the National Council on Radiation Protection against overreaction to the purported hazards of low level radiation.[6] It may well be that there is absolutely no hazard at all, or that the beneficial affects outweigh the adverse ones. This point is especially important because essentially all the hypothesized adverse health effects from the nuclear fuel cycle, including those from nuclear reactors and high level waste, are based on assumed adverse effects from low levels of exposure.

Under the circumstances, it seems particularly ridiculous to shun nuclear power as a major source of our electrical energy. Indeed, the basis for any such action amounts of nothing more than a kind of Lysenkoism,[7] the net effect of which will be to erode our country's scientific and technological leadership and the welfare of our citizens. Nuclear power is a clean, cheap, and, for all practical purposes, risk-free source for our electrical energy needs.

The attack on nuclear power should be recognized for what it is: anti-environmental and fundamentally irrational and anti-scientific. To the extent that the nuclear waste legislation removes one of the obstacles to further use of nuclear energy, I strongly support it. We all should.●

A TRIBUTE TO ARLEN ERDAHL

HON. JAMES A. COURTER

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 21, 1982

● Mr. COURTER. Mr. Speaker, I would like to offer a few words of praise for the accomplishments of a notable colleague and friend of mine, ARLEN ERDAHL from Minnesota's First District.

ARLEN entered Congress the same year I did, 1978, and brought with him a wealth of experience in Minnesota State government as a member of the legislature for 8 years and secretary of state for 4 years.

As a farmer, ARLEN had a close association with the needs and priorities of the heavily dominating agricultural counties which comprise the first district. Still, as a resident of the Twin Cities suburbs, he recognized the need to balance the representation for these more urban folks as well.

This apparent dichotomy in the makeup of his congressional district required ARLEN to make some difficult decisions on important legislation. But the needs of his constituents remained ARLEN's first priority. It is no wonder then that ARLEN was recognized early as being open minded and independent of judgment. He has always been his own man.

In his committee assignment on Education and Labor, ARLEN played a decisive role in the passage of legislation to create the Department of Education. He also successfully directed the course of his amendment for voluntary prayer in school.

This body is saddened at the loss of trustworthy and steadfast public servants as ARLEN ERDAHL. It has been a great privilege to have worked with him, and to have known him. I wish him well in his future endeavor, and can only hope that what personal satisfaction ARLEN has gained from his tenure in this body is equalled to what he has contributed.●

COLSON ON RELIGIOUS AND HUMAN LIBERTY

HON. DON BONKER

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 21, 1982

● Mr. BONKER. Mr. Speaker, the House last evening passed H.R. 434, a resolution identifying religious persecution as a human rights violation and calling on the President of the United States to seek efforts to end religious persecution in the world. As sponsor of the measure, I was pleased to see the House take expeditious action on a very serious human rights problem.

I would like to call the attention of my colleagues to an article by Chuck Colson on the subject of religious beliefs and human needs in today's world, contrasting the situation in the Soviet Union with the church's responsibility to human needs here. As Mr. Colson aptly notes, "Individual involvement and voluntary ministries are not only an expression of human freedom, they are a vital part of keeping it.".

The article follows:

CHARITY AND FREEDOM

(By Chuck Colson)

While rereading an essay by Georgi Vins, the Russian pastor imprisoned eight years in Siberia, I was struck by a chilling thought: what Soviet tyranny has failed to do through persecution, we American Christians may unwittingly do to ourselves through indifference. Let me explain.

Lenin and his disciples knew if their Marxist dream was to succeed, they would have to rout out all religious beliefs from their society. Communism is a jealous mistress which tolerates no competing affections. So, after disposing of their immediate enemies, the Soviets turned to their greatest foe: the Church.

Most in the West are aware of the consequent persecution of Christians and restrictions on worship. But few realize how deadly has been the assault against the Church's social activities. The 1928 legislation controlling "religious cults" expressly forbids the Church to collect funds for the poor, to feed the hungry or aid the old and infirm. Church sponsored education is also outlawed.

It's not hard to see why the communists viewed the demonstration of Christian compassion as a formidable threat. After all, individual involvement—people helping people—undermines the all-powerful pretenses of a central government. So totalitarian leaders have always repressed individuality, as was made painfully clear just last month when the Polish government ruthlessly abolished the Solidarity movement.

It is in the sinful nature of man—all men, by the way, not just the Stalins and Hitlers—to hunger for power. Since that appetite is insatiable, it is axiomatic that government without restraint inevitably leads to totalitarianism.

Our country's founding fathers understood that truth and wisely constructed a system of checks and balances to prevent excessive concentration of power. They also saw the corollary need for volunteer involvement to meet public need. De Tocqueville wrote that the American experiment in democracy depended on volunteer efforts to protect the individual against the natural tendency of government to grow ever more powerful.

The American Church must be reawakened to this truth. In the last half-century, government has mushroomed, its growth accelerated by the incredible computer and communications technology of these times. Coupled with this, polls and social analysts tell us Americans are becoming increasingly insensitive and isolated, absorbed only with self.

Against that backdrop, it is ironic that one of the strongest calls for volunteerism comes from the chief executive of the power-hungry central government. But President Reagan well understands, as did our nation's founders, how crucial individual involvement is to personal liberty.

To add to the irony, the Church, which should be the first to respond, seems to be resisting. At a White House meeting for religious leaders last spring (see June Jubilee), Mr. Reagan made an impassioned plea for the religious community to take a greater role in meeting human needs. Though many of us applauded him, some Church leaders argued that the government has no right to shrug its responsibilities off onto the Church.

We can only imagine how Russian Christians, for 50 years denied the freedom to

---

[5] *Id.*

[6] NCRP, Report No. 43, at p. 4 (1975).

[7] Lysenkoism (after a Soviet agronomist who, on behalf of Stalin, propagated a now-repudiated theory of genetics which set Soviet genetics back a decade or more) stands broadly for any scientifically unsupported doctrine imposed on science and technology for political or moralistic reasons.

carry out biblical mandates, might have reacted to that scene: the head of state urging the Church to meet human needs, the Church leaders pushing those needs back towards the state. How our persecuted brothers and sisters would cherish our freedom to serve!

If we lose our freedom in this country it won't be because of heavy-handed laws like the Soviet statute of 1928. It will be because an apathetic Church has grown sluggish and uncaring, its very indifference fueling the steady growth of government—to the eventual loss of liberty.

This is why organizations like Prison Fellowship, working within the Church, are so crucial. Sometimes I'm asked why we bother to organize volunteers, help inmate families, work for criminal justice reform. Why we are not content to simply preach the Good News?

What has happened in the Soviet Union should serve as a good answer: for living out the Gospel, as well as preaching it, is what makes the Invisible Kingdom visible, against which no tyrant can stand. Perhaps the Soviet rulers understand better than we the power of what the Apostle James called "pure and underfiled religion—to visit orphans and widows in their distress . . ."

Most of you who support and work with Prison Fellowship probably do so because as Christians we are not only commanded to tithe and serve, we are constrained to do so by the love of Christ. We are to care for those "in distress" out of gratitude for what God has done for us.

But Georgi Vins and thousands like him who live today under vicious Soviet persecution remind us of yet another reason for caring. Individual involvement and voluntary ministries are not only an expression of human freedom, they are a vital part of keeping it.

WALGREN INTERN AWARDED RHODES SCHOLARSHIP

HON. DOUG WALGREN

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 21, 1982

● Mr. WALGREN. Mr. Speaker, I was very pleased to learn yesterday that David C. Frederick, a student at the University of Pittsburgh, was 1 of 32 students selected to be a Rhodes Scholar at Oxford University in England.

David interned in my Washington office this past summer and made a tremendous contribution. I want to congratulate him and his family on this great honor. We are very proud of him.

The following article in the Pittsburgh Press details the award:

[From the Pittsburgh Press, Dec. 20, 1982]

PITT UNDERGRAD SCHOOL'S FIRST RHODES SCHOLAR

(By Martin Smith)

David C. Frederick, a University of Pittsburgh senior majoring in political science and history, is one of 32 American students selected for the prestigious 1983 Rhodes Scholarship for study at Oxford University in England.

Frederick, son of Dr. John Howard and Marian Frederick of San Antonio, Texas, apparently is the first Pitt undergraduate so honored. A number of Rhodes Scholars have developed ties with Pitt since they returned from Oxford.

"I'm pretty happy about it, all," Frederick said today from his Texas home, where he is spending his Christmas break. "That's my first gut reaction. I'm very excited about the opportunity to go and very much looking forward to it."

The group of 32 scholars was announced Saturday by David Alexander, American Rhodes secretary and president of Pomona College in Claremont, Calif.

The scholarships were established in the will of British colonial statesman Cecil J. Rhodes, who died in 1902. About 75 scholarships are awarded worldwide annually to outstanding students who also are involved in athletics.

Frederick said he plays intramural football, basketball and volleyball at Pitt.

The nominees were chosen from 183 applicants. They still must be ratified by the Rhodes Trustees and accepted by one of the colleges at Oxford University.

According to Pitt spokeswoman Mary Ann Ang, Frederick attended Pitt on a debate scholarship and was a member of the backup squard to the team that won the 1981 National Debating Championships.

Frederick is in the Pitt honors program and is on the staffs of the Pittsburgh Undergraduate Review. The only professionally supervised journal in the country and the Journal of Public and International Affairs, which is published by Pitt's Graduate School of Public and International Affairs.

Barry Appleman coordinator of honors advising at Pitt, said Frederick has a 3.9 QPA and is scheduled to graduate in April.

He's won more than 26 awards in intercollegiate debate, including several top speaker awards and tournament championships.

In 1981, he won the Harry S Truman Scholarship Award, which is given by Congress to one student in each state and provides money for undergraduate and graduate study.

This year Frederick was awarded the Rotary International Graduate Scholarship for Study Abroad, which he said he will have to forgo in order to attend Oxford.

He worked for U.S. Rep. Doug Walgren in Washington this past summer as a staff aide.

On campus, he is a member of the Academic Affairs Committee of the Student Governement Board at Pitt, and is a member of the William Pitt Debating Union.

Frederick said he will leave for Oxford in early October.●

NUCLEAR REALITY

HON. WILLIAM H. GRAY III

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 21, 1982

● Mr. GRAY. Mr. Speaker, old-fashioned realpolitik does not apply in the nuclear age:

Major powers can no longer accept conflict as an inevitable means to pursue national interests. Rather, nations must recognize their fundamental mutual interest in avoiding the destruction of mankind.

The superpowers cannot today engage each other in limited conflict, proportionate to the stakes involved. Any such confrontation could escalate dangerously.

Calculations on when and how to go to war, and on diplomatic strategies for avoiding conflict, can no longer be left to the experts. In the United States and Western Europe, and, indeed, throughout the world, the civilian masses who are the potential victims of nuclear war have asserted their right to share in decisions on war and peace.

Policymakers can no longer dismiss ethical considerations by asserting the basic righteousness of "just wars." No cause could justify the annihilation of life on Earth. The church today is seized with this overriding moral question. Religious leaders and concerned laymen of all faiths, all denominations, are in the forefront of the effort to end the senseless nuclear arms race.

Maj. Gen. Kermit D. Johnson, retired chief of chaplains of the U.S. Army, has explored these consequences of today's nuclear reality in a thought-provoking article in the Cristian Century. I ask that the article be reprinted in full.

The article follows:

[From the Christian Century, Oct. 13, 1982]

THE NUCLEAR REALITY: BEYOND NIEBUHR AND THE JUST WAR

(By Kermit D. Johnson)

As a Commissioner to the 1980 General Assembly of the United Presbyterian Church, I was convinced that the church's new peacemaking efforts needed "a good dose of Niebuhr." I saw "The Call to Peacemaking" document as pacifistic and deficient in its failure to affirm the "just war." In a brief speech to the Peacemaking Committee, I closed this way:

"I dare say that if 'The Call to Peacemaking' were being written just after World War II, it would read differently. With the memory of Munich, it probably would include a statement something like this: 'There can be no security in a world whose obsession with peace leads to appeasement.'"

Then I quoted from Reinhold Niebuhr's letter to a pacifist who was reluctant to favor the Allied war effort against Hitler:

"Your difficulty is that you want to try to live in history without sinning . . . our effort to set up the Kingdom of God on earth ends in a perverse preference for tyranny, simply because the peace of tyranny means, at least, the absence of war" (*Love and Justice* [Westminster, 1957]).

This was the dose of realism I felt my Presbyterian brothers and sisters needed.

Now, two years later, I am in a different place. Although my background includes graduation from West Point, Command and General Staff College, the U.S. Army War College, overseas service in Okinawa, Germany and Vietnam, combat duty as a company commander in Korea and chaplain assignments at every level of the army, including the Pentagon, none of this experience has prevented a gradual but inexorable change in my viewpoint during the past two years. No, I did not become a pacifist. In fact, I will probably continue to bristle when the facile warmongering stereotype is unfairly and uncharitably applied to the

many fine leaders of our armed forces. Likewise, I will continue to defend those military chaplains whose self-identity and role definition is so clear that they lend no credence to Niebuhr's remark, "Kings use courtiers and chaplains to add grace to their enterprise."

What has changed is my view of nuclear warfare and nuclear weapons. The change is by no means unusual or unique. In the May 1982 chief of chaplain's newsletter, I referred to the people of Europe who feel they are "living on the battlefield." Then I shared my own feelings:

"I believe that statement can go further: We are all living on the battlefield. We are all vulnerable. For years I have put this out of my mind, knowing perhaps in some distant or subliminal way that it was true. But it never "grabbed" me. I just really did very little thinking about it. That is not true recently, however. This new awareness is happening to many people the world over. I believe this is of God, and I believe this is something God is doing in human history today. Doubtless it is striking fear into the hearts of many, leaders and policy-makers especially. This awareness of itself may not automatically determine immediate specific policy, but it is right that human beings be aware that it is wrong to be nonchalant, unthinking and indifferent about the real danger of the possible destruction of humankind. I welcome this widening awareness as a divine intervention, a warning and a signal, possibly a life-and-death "last chance" for human civilization. Life is a precious gift of God, willed by our Creator, but it cannot continue unless we also will that it does."

If I were to revisit the Peacemaking Committee now, I would say to them that the question is not whether we are to "live in history without sinning," but whether we are to live in history at all. If we were to apply Niebuhr's real politics, with its ready acceptance of the inevitability of conflict, to the present nuclear situation, it could well mean "a perverse preference for the war of mutual annihilation, simply because the war of mutual annihilation means, at least, that the other side doesn't win either." In speaking of plans for a protracted nuclear war, Secretary of Defense Caspar Weinberger said recently that nuclear war was not winnable but that "we certainly are planning not to be defeated" (New York times, August 9, 1982).

In view of continued presidential certification and support of the government of El Salvador, I would conclude, "There can be no peace in a world whose obsession with security leads to denying the claims of human rights and justice." Finally, I would still admit that under certain circumstances, weakness invites aggression. Peacekeeping has a place. The United States Army War College motto, "Not to promote war, but to preserve peace," is the idea behind the Armed Forces motto, "Peace through strength." But now I would have to ask, "When does 'peace through preparation for war' make war a more likely possibility?" Certainly I would say, "There can be no peace in a world whose obsession with security leads to a never-ending arms race."

Reinhold Niebuhr saw history as a "long tale of abortive efforts to establish peace," with failures due "either to the effort to eliminate the factor of force entirely or to an undue reliance upon it" (*Moral Man and Immoral Society* [Scribner's, 1932]). During the rise of Hitler and World War II, Niebuhr moved from his early pacifism to focus on the pacifist's unrealistic effort to eliminate the factor of force. But now it appears that Niebuhr's comment on "an undue reliance upon the factor of force" was more prophetic. The undue reliance on force by both the United States and the Soviet Union is characterized by nuclear overkill, indiscriminate arms peddling, and the wasting of precious human and national resources in an unending arms race.

Given these conditions and Niebuhr's ability to shift his thinking, I wonder if he were living today whether he would not sharply limit his application of real politics. He reminded us that realism, not moralism, guides the conduct of nations. Nations relate to one another simply on the basis of self-interest. It is unreasonable and moralistic to expect nations to reflect the virtues of individuals—hence his book title, *Moral Man and Immoral Society.* Niebuhr chided moralists for failing to understand "the brutal character of the behavior of all human collectives." The stark realities of power and conflict must be accepted as inevitable. Indeed, "to the end of history the peace of the world . . . must be gained by strife."

Such ideas from Niebuhr's real politics blunted moral attacks on war and helped provide an easy conscience to a generation of American policymakers. But now the case for realism appears to be moving beyond Niebuhr. Real politics, with its acceptance of the inevitability of conflict, is no longer realistic—not when two nations with a total of more than 50,000 nuclear weapons can essentially obliterate one another. We must go beyond real politics, from self-interest to shared interest. Despite their competing systems, the U.S. and the U.S.S.R. have a shared interest in survival Niebuhr states it clearly:

"The peril of nuclear war is so great that it may bridge the great ideological chasm between the two blocs and make them conscious of having one thing in common: preference for life over death" *(The Structure of Nations and Empires* [Scribner's, 1959]).

In order to realize this preference, we must go beyond Niebuhr's realistic observation that groups and nations relate predominately on a "political rather than ethical" basis. If we cannot, then we must face the likely doom of the human race. Ironically, a recently revealed memo which former president Harry Truman wrote in 1958 indicates that he feared precisely this failure.

The nuclear reality not only takes us beyond Niebuhr and real politics; it also takes us beyond the "just war" as a justification or rationalization for the use of nuclear weapons. Nuclear warfare is indicted, not vindicated, by the limiting categories of just-war criteria such as due proportion, just means, just intentions and reasonable possibility of success. The burden of proof is on those who would say otherwise. A limited nuclear "just" war can be theoretically conceived of in a textbook scenario, but is it possible in the real world? War is confusion, chaos and hell, not predictable sequences. Even if nuclear weapons were to be used as counterforce, and even assuming that noncombatants could be protected, the question of escalation would remain unanswered—not to mention long-term environmental or genetic damage. How can we know that any use of nuclear weapons will not result in catastrophic escalation?

In 1978, General Creighton Abrams was said to have interrupted a discussion about limited nuclear war "with an expletive, followed . . . by the statement, 'One mushroom cloud will be reported as one hundred, and that will probably be the end of the world.'" The technical discussions as to when or whether nuclear weapons can be used without violating just war criteria are irrelevant unless the question of escalation can be answered with certainty.

I suspect that a number of these conclusions are shared by many middle-of-the-roaders who have thought of themselves as just-war adherents. Our realization that the just war theory provides no justification for nuclear weapons or nuclear warfare has involved painful reappraisal, a "shaking of the foundations." However, some of us were prodded and assisted by the cavalier comments of leaders in the current administration. European nuclear protest has been accounted for as "Protestant angst" (Assistant Secretary of Defense for International Security Policy Richard N. Perle) which was "bought and paid for by the Soviet Union" (President Ronald Reagan). On this side of the ocean, Secretary of the Navy John Lehman blamed "a few uninformed and overly idealistic religious leaders."

This trivialization of nuclear concerns was a misreading of the across-the-board struggle taking place with issues of life and death, of the widespread sense that this may be the "last chance" for human civilization. Since our leaders did not have the sensitivity to feel the moral earnestness of literally millions of European and American people, it is legitimate to ask how sensitive they are to the moral issues themselves.

In good will we might patiently wait for signs of moral leadership, but the facts of history do not offer us this choice. We were the first and only nation to use atomic bombs in war. It was a presidential decision; the American people were not consulted. Furthermore, in our armed forces schools, military officers in tactical war gaming make the assumption that nuclear "release" will be forthcoming in any major war. Where did such an assumption come from?

All these factors heighten the importance of the present nuclear debate. If there is any hint from our political leaders that the use of nuclear weapons is regarded once again as one of the prerogatives of power in a "close hold," then at they very least the nuclear debate ought to serve the purpose of forcing openness, or what Jacques Ellul called "unmasking." Using nuclear weapons does not fit into the "If I felt the American people needed to know . . ." category. History, if there is to be a history at all, must not repeat itself.

But the only guarantors of this history are the American people themselves. As reported in the Washington Post, former secretary of defense Robert S. McNamara implicitly assigned this responsibility recently when he attempted to account for the tremendous nuclear buildup by the U.S. and the U.S.S.R. in the last 15 years. Robert Scheer asked, "But how did this happen?" McNamara's response: "Because the potential victims have not been brought into the debate yet, and it's about time we brought them in. I mean the average person."

In order for this participation to take place, "the average person" must overcome a passive feeling of inferiority which blindly blesses government policy, and is content to "leave it to the experts." The question is not whether we trust our leaders, but whether our leaders can be made to trust the American people and bring them into their confidence. Gatekeeping is a permanent feature of any bureaucracy.

At lunch with me one day in the Pentagon, a senior Defense Department official complained about Roman Catholic bishops who, in involving themselves in nuclear issues, were "tampering in geopolitical areas." I responded by defending the bishops' right to transgress the sacred soil of geopolitics; the possible killing of human beings is certainly a moral question. "Potential victims" have a right to be brought into the debate and the decision-making process concerning their fate.

"Potential victims" must also break through their sense of foreboding and inevitability—the prime ingredient which could bring us to a nuclear holocaust. In reflecting on the Truman-Churchill decision to use the atomic bomb, Niebuhr said, "The question is whether they were not driven by historic forces more powerful than any human decision." Will competitive forces "more powerful than any human decision" once again drive us toward use of nuclear weapons and ultimate disaster? Or will we decide that human decisions can and will control our destiny?

It now appears that the U.S.-U.S.S.R. arms race has taken on "a life of its own." Completely apart from the "Soviet threat," the reason this is so is that we have ascribed an idolatrous power and ultimacy to weapons, which has deepened our dependence on them and increased our feelings of inevitable disaster. Therefore our president "orders" another 17,000 nuclear weapons. And he proposes to sell $25 billion worth of arms in a single year to a waiting world. The familiar statement "If we don't, someone else will" is a sign of the paralysis of "inevitability" and lack of moral leadership—not a valid reason for arms peddling.

Last year Frank C. Carlucci, deputy secretary of defense, described what he believed to be an election mandate: "We are obliged to rearm our country." Then, in anti-gun-control language, he said, "A casual appreciation of history reveals that neither weapons nor armies start wars. People start wars." This, of course, is nonsense, even though it is true that people start wars. What is so tragic is this nonchalant approach to weapons, as if they were just another commodity such as wheat or silver. Admiral Hyman G. Rickover's sense of history in his "final blast" before retirement was more accurate:

"The lesson of history is: When a war starts, every nation will ultimately use whatever weapon has been available. That is the lesson learned time and again. Therefore, we must expect, if another war—a serious war—breaks out, we will use nuclear energy in some form. That's due to the imperfection of human beings" (*New York Times*, January 30, 1982).

Even though Rickover seems given over to the probability of nuclear extinction, he nevertheless seems to appreciate that weapons are not "neutral," that their presence introduces a compelling temptation for human beings to use them.

"People think that they have no right to judge a fact—all they have to do is to accept it. . . . A striking example of this religious authority of the fact is provided for us by the atomic bomb. Confronted by this discovery, by this instrument of death, it was quite possible for man to refuse to use it, to refuse to accept this fact. But this question was never even raised. Mankind was confronted by a fact, and it felt obliged to accept it. All the questions which were raised after that were secondary: 'Who will use this weapon? How shall we organize our economy with it in view?' But no one ever raised the question 'Is this line of action itself good or bad?' The reason is that 'the fact' itself as the present time seems to be something which is beyond good and evil" (The Presence of the Kingdom [Seabury, 1967]).

Actually, Ellul is not quite correct in stating that the question of refusing to use the atomic bomb "was never even raised." The matter was never considered in any public forum. However, the Committee on Social and Political Implications in its report to then-Secretary of War Henry Lewis Stimson stated prophetically:

"The use of nuclear bombs for an early unannounced attack against Japan is inadvisable. If the U.S were to be the first to release this new means of indiscriminate destruction upon mankind, she would sacrifice public support throughout the world, precipitate the race for armaments, and prejudice the possibility of reaching an international agreement on the future control of such weapons" (quoted in Alan Geyer, The Idea of Disarmanment [Brethren Press, 1982]).

This committee foretold the consequences of the nuclear "Fall." They underscored Ellul's contention that nuclear weapons command a religious authority over our lives.

We cannot reverse the fall, but what we can reverse is our continued complicity in nuclear idolatry. The time has come for the American people to overcome the religious authority of nuclear weapons by questioning their basis in "fact." Neither real politics nor the just war theory can provide a legitimate basis for their existence or use. The "fact" of nuclear weapons has been superseded by a more compelling fact: that human beings have a right to live free of the risk of mutual nuclear annihilation. This is the essence of European and American nuclear protest.

Paul Warnke's comment that the START talks were "conceived in sin" (as a result of grass-roots pressure) indicates the reluctance of the leaders of this administration to face the primary moral question of nuclear arms control and elimination. Having accepted nuclear weapons as "fact," these leaders have concentrated on secondary questions concerning nuclear capability and use. Now it is time for our leaders to exercise their considerable talents in the "politics of self-interest" by stopping the nuclear arms race instead of continuing to justify and stockpile the means of mutual suicide.

Albert Einstein once said, "We live in an age of perfect means and confused ends." Our politicians and the technicians of violence have shown great dedication to perfecting the means for human extinction. Now it is time for them to back off and ask, "to what end?" If they cannot exercise a commensurate moral leadership in addressing this question, then it is time for the leaders to be led.●

MR. RANGEL'S VOTE WAS MISRECORDED

HON. CHARLES B. RANGEL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 21, 1982

● Mr. RANGEL. Mr. Speaker, yesterday we in the House had an opportunity to vote on H.R. 3963, regarding drug-dependent Federal offenders.

It was my intention to cast my vote in the affirmative, and it was only through an error that it was not recorded as such. I would like the RECORD to show that this piece of legislation has my firm support.●

CONSTITUTIONAL BANKRUPTCY COURT: H.R. 6978 BANKRUPTCY COURT ACT OF 1982

HON. PETER W. RODINO, JR.

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 21, 1982

● Mr. RODINO. Mr. Speaker, I have been speaking on the floor and inserting material in the RECORD for some time now about the pressing need to address the impending constitutional crisis in the Nation's bankruptcy court system. The judicial branch of Government has afforded this institution two opportunities to solve the constitutional infirmity in the bankruptcy court system. The second deadline imposed by the Supreme Court is rapidly approaching, and the Congress has still not acted.

I want to bring to the attention of my colleagues two articles appearing today in the New York Times emphasizing the importance of congressional action on this matter prior to December 24. I am inserting these articles in the RECORD in an extension of my remarks.

[From the New York Times, Monday, Dec. 20, 1982]

THE BANKRUPT CONGRESS

Six months ago the Supreme Court gave notice that the nation needed a new law to reconstitute the Federal bankruptcy courts. Yet the dying Congress has been unable to fashion one. Blame for the default, which will inevitably increase the suffering of failing individuals and businesses, must be shared by a prideful Federal judiciary, a Reagan Administration hungry for new judgeships and a greedy credit industry.

The Supreme Court ruled in June that any judge with all the powers of a bankruptcy court judge must have the life tenure and protection against pay cuts that the Constitution confers on all Federal judges. It is an essential guarantee of independence. But recognizing that bankruptcy court reform was no overnight matter, the justices stayed their mandate and gave Congress first until Oct. 4 and then until Dec. 24 to work out an acceptable plan.

In the absence of a plan, the judiciary must now revert to a clumsy system in which Federal district judges and bankruptcy referees shuttle cases from one court to another. It will be costly and painful; it is also likely to let avoidable financial disasters happen. A much better solution has been easily available: create a unified bankruptcy bench with the rank, but not the pay, of the Federal trial bench.

That did not sit well with the Federal judiciary and its lobby, the Judicial Conference of the United States, which is chaired

by Chief Justice Burger, a dissenter from the High Court's decision. The jurists are afraid that the prestige of 515 trial judges would be diminished by the addition of 227 new bankruptcy judges—even if they earn less.

The Administration saw the need to upgrade the bankruptcy bench but wanted the new judges to be interchangeable with trial judges so that they could handle other kinds of cases, even civil rights suits. But that would require screening every bankruptcy nominee for all the attributes of a regular judge, including philosophy and social attitude. It would be unwieldy if not unworkable.

Then came the crushing blow from the credit industry, which wanted to undo the legal benefits given to debtors by the 1978 Bankruptcy Reform Act. Senator Dole turned the bill to upgrade judgeships into a creditors' Christmas tree. Where the 1978 law gives debt-ridden wage earners a fresh start, he would have leveled them to the poverty line before excusing their debts. This counter-reform, which was going nowhere on its own, blocked a feasible remedy for the real problem.

Some now predict chaos. Perhaps even Congress will then see that judicial effectiveness is more important than judicial pride, that economic justice has priority over patronage and creditor power. A Congress that can't even give the country an efficient way to go broke is bankrupt.

[From the New York Times, Dec. 20, 1982]

FATE OF BANKRUPTCY SYSTEM IN DOUBT

(By Stuart Taylor Jr.)

WASHINGTON.—The nation's bankruptcy system will apparently slip into legal paralysis before year's end unless the Supreme Court gives Congress another extension of its Dec. 24 deadline for restructuring the bankruptcy courts.

Legislation to cure the constitutional defects that the court found in a June 28 ruling striking down the powers of bankruptcy judges appears all but dead as Congress staggers toward adjournment. And the Justice Department says that if the matter goes over to the new Congress meeting in January, legislation may be months away.

There was still talk today of bringing various proposals to the floor of Congress, but neither the House nor the Senate appears likely to pass a bill before going home, and any bill passed by one house would run into heavy opposition in the other.

House Speaker Thomas P. O'Neill Jr. has already pronounced all bankruptcy legislation dead for this session.

The paralysis would occur because the authority of the bankruptcy courts to take any action at all, such as approving the sale of assets, would be in doubt. How judges would interpret their shrunken mandate is unclear, but any actions that they might take could become subject to legal challenges later, yielding a second layer of jurisdictional litigation on top of the bankruptcy proceedings.

Experts said bankrupt companies in reorganization and their creditors would be plunged into disruption verging on chaos.

The Supreme Court could avert this by extending for a third time the effective date of the June 28 decision, but such an extension would be highly unusual. It would come, if at all, only at the last moment, according to those familiar with the problem.

Paralysis in the bankruptcy system could exert a substantial drag on the economy. Billions of dollars in assets and hundreds of thousands of jobs are riding on the fate of bankrupt companies. More than 700,000 bankruptcy estates are pending, with new petitions being filed at a rate of more than 10,000 a week.

"It's almost incalculable the damage the confusion will cause if the deadline isn't met," said Sanford C. Sigoloff, chairman and chief executive of the Wickes Companies, the nation's second-largest company in bankruptcy proceedings after the Manville Corporation.

MODEL RULE ON JURISDICTION

The Judicial Conference of the United States has proposed a model rule for the nation's 91 Federal district courts, which it hopes will enable bankruptcy proceedings to muddle through without collapsing.

The rule, which does not have force of law, provides vague guidelines for dividing jurisdiction over bankruptcy cases between the district courts and the bankruptcy courts.

But the Justice Department, a Harvard law professor, Vern Countryman, and most other leading bankruptcy law experts say this rule is unworkable and of doubtful constitutionality. Mr. Sigoloff wrote President Reagan that it "would result in the very delay and uncertainty that is anathema to a successful business reorganization."

Mr. Countryman predicted that efforts to keep bankrupt companies like Wickes in operation by selling assets and borrowing money would "come to a screeching halt," because no buyer or lender could safely assume that the required court approvals would prove to be valid.

"It's going to be a big problem for both debtors and creditors because things won't get done, particularly in cases where they're trying to reorganize companies; the assets will just be depreciating and some of these companies will be dead," he said. Some of their creditors, which would be stuck with bad debts, could also "start to topple," he added.

PARTS OF 1978 LAW DISCARDED

The Supreme Court's June 28 ruling struck down portions of a 1978 law that authorized bankruptcy judges to decide all disputes involving individuals and companies that file for bankruptcy, including such things as state law contract and tort suits.

The court said that only judges who enjoy the life tenure and other protections of Article III of the Constitution could constitutionally exercise such broad powers. Under the 1978 law, bankruptcy judges would be appointed for terms of 14 years and subject to removal, after a transitional period that was interrupted by the court's decision.

It is unclear what, if any, bankruptcy jurisdiction either the bankruptcy courts or the Federal district courts have left. The confusion results from differing rationales used by the two groups of Justices who made up the majority in the case.

These two groups of justices did agree that the 220 bankruptcy judges will have no jurisdiction at all when the decision becomes effective, because the unconstitutional portions of the statute defining their power were not "severable" from the constitutional portions.

Mr. Countryman and some other experts also interpret the decision as leaving even the Federal district courts with no bankruptcy jurisdiction until Congress acts.

But the Judicial Conference, chief policy-making body of the Federal courts, says that the district courts still have jurisdiction over all bankruptcy matters and can refer some issues to the bankruptcy judges under its model rule.

Experts predict a rash of new litigation as bankrupt companies and creditors challenge the Judicial Conference rule, leading ultimately to another Supreme Court decision.

There is widespread agreement among experts that even if upheld, the Judicial Conference approach would result in long and damaging delays and confusion.

The Supreme Court originally stayed its decision until Oct. 4 to avert disruption and give Congress time to pass new legislation. The court extended the deadline to Dec. 24 at the request of the Justice Department after Congress became stalemated. Late tonight, Congress was still deadlocked.●

A TRIBUTE TO JIM JEFFRIES

HON. JAMES A. COURTER

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 15, 1982

● Mr. COURTER. Mr. Speaker, there are few Members of this governmental body who have served their home district with as much dedication and conviction of principle as JIM JEFFRIES, of Kansas.

In his two terms in Congress, JIM has voiced his strong personal beliefs about many controversial issues, which the less committed of us skirted for fear of a head-on collision with adamant parties of the opposing position. JIM has always been clear on his opinions on the day's issues. Though many of us can disagree with this man's viewpoint and priorities, JIM must be admired for his straightforwardness and honesty—virtues, I might add, which are becoming increasingly scarce in today's society.

Although a consistent conservative on matters of both economic and social importance, he was also a man of compassion, a Representative who listened to his constitutents and their opinions.

JIM JEFFRIES has been diligent in his duty and responsive to the people who elected him as a Member of Congress. I will miss him and wish him all the best for a fulfilling future.●

ASSISTANCE NEEDED NOW TO HELP AMERICA'S INDUSTRIES

HON. DOUGLAS APPLEGATE

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 21, 1982

● Mr. APPLEGATE. Mr. Speaker, as I have done previously, I want to share with my colleagues a very recent letter that pinpoints the true feeling of the people I represent and many of those that other Members represent, too. This should send a definite message to the White House and this Congress that assistance is needed now to help America's industries, and its workers.

The text of the letter follows:

STEUBENVILLE, OHIO,
December 15, 1982.

DEAR CONGRESSMAN APPLEGATE: First of all, I want to applaud you for the letter you wrote to President Reagan on imports. I feel as if more Congressmen-Senators-Representatives would have the intestinal fortitude to stand up to and demand something to be done—there must be something that can be done—to straighten this situation out.

I am unemployed, I've worked hard all my life, always provided for my family; now I've been unemployed for 14 months and it is getting hard or should I say desperate—no job, no unemployment, and no welfare benefits—Welcome to the Working Class Poor. The people of this country need help desperately!

Frankly, Doug, I'm scared. What is the near future holding for us? The only people that can help us is our elected officials, they are the only ones that can get the message of desperation through.

At this time, Wheeling-Pittsburgh Steel is holding negotiations with the USWA. It is rumored that W-Pgh wants a concessionary package worth more than $100 million! There is no doubt in my mind that Mr. Dennis Carney and W-Pgh Steel will get the concessions that they want. Myself, I would gladly give away as much as is needed, but I also need my job back. There is no guarantee with the agreement of this concession package that I will return to work.

I am a good worker, a hard worker, always have been. I have devoted 10 years of my life to the Corporation. I don't want welfare or aid, in spite of my weekly $72.00 unemployment benefit which I am totally grateful for, and which will soon be gone.

I want you to know that I back you, I voted for you and have faith in you and hope that your efforts help to find means to help my fellow brothers and sisters. We are the new poor, the Working Class Poor!

Thank you for your time, and once again, I applaud you!

Sincerely,

DAVID F. EDWARDS,
Member Local Union 1190.●

THE LAUNCH-ON-WARNING PROBLEM

HON. MORRIS K. UDALL

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 21, 1982

● Mr. UDALL. Mr. Speaker, much of the current debate on the nuclear arms race has focused on the aggregate level and sophistication of United States-Soviet arms. As an advocate of the bilateral nuclear freeze, I am concerned that another round of quantitative and qualitative improvements in United States and Soviet nuclear arsenals could undermine diplomatic efforts aimed at a negotiated reduction in forces and destabilize the existing strategic balance. But at the same time I think we should look at other steps that could reduce the risks of nuclear war, particularly steps that could move defense planners away from any possible reliance upon a "launch-on-warning" posture.

At this point I would like to insert into the RECORD a recent article on this subject by Alton Frye, the Washington director of the Council on Foreign Relations. His conclusions are worth close study:

[From the Los Angeles Times, July 16, 1982]

SURPRISE-ATTACK PROBLEM RETURNS—CURBING THE DANGEROUS COMPULSION TO "LAUNCH ON WARNING"

(By Alton Frye)

The static level in Soviet-American communications remains high. It is not always easy for one side to make out what the other really means. An important example arose this week: Soviet Defense Minister Dmitri F. Ustinov seems to be saying that Moscow is moving to a "launch-on-warning policy"—a policy of triggering a nuclear attack on the basis of radar or satellite detection of an unfolding U.S. missile assault.

The message is hardly novel, but is important. Some observers are dismayed that the Soviets would adopt such a dangerous policy. Some doubt that they could. Some believe that they already have.

Soviet military planners have never placed as much emphasis as Americans do on having forces capable of riding out a possible nuclear strike. While they have sought to make their weapons survivable, Soviet military authorities have usually stressed the promptness and massiveness of the "rebuff" that they would deliver to any aggressor. Preparations for such a prompt response are, however, virtually indistinguishable from those for a possible preemptive strike, a fact that could become the crucial instability in a superpower crisis.

It is widely thought in Western intelligence circles that Soviet strategic forces have not maintained the high readiness and alert posture that have prevailed in U.S. nuclear forces. Ustinov's statements suggest that this may no longer be the case. It may even be that the Soviet leadership has had to quell internal opposition to its recent pledge not to use nuclear weapons first by moving its forces to a higher state of readiness and by making clear that the United States would have no chance to destroy Soviet forces by a surprise strike. These developments accelerate the erosion of mutual stability between the two countries.

Both the United States and the Soviet Union now find themselves subject to similar compulsions growing out of technological and doctrinal change. Westerners have long seen worrisome tendencies in Soviet military writings, which have repeatedly emphasized the advantages of pre-emptive strikes to disrupt an ememy's capacity to respond. As Soviet strategic forces grew more numerous and more capable during the 1970s, concern mounted that the Soviets might actually entertain the notion of fighting and winning a nuclear war. Most strategic analysts are skeptical, but that concern came to dominate American policy in the Reagan Administration.

One key technical change was the Soviets' deployment of missiles with storable liquid (unlike their earlier rockets, which had to be fueled immediately before launch). Whether for purposes of a preemptive strike or launch on warning, many Soviet missiles can now fire on short notice as American solid-fuel missiles have been able to do for two decades.

These trends obscured the altered tone of top-level Soviet pronouncements that have increasingly stressed the utter futility of nuclear war. In President Leonid I. Brezhnev's phrase, "Only he who has decided to commit suicide can start a nuclear war in the hope of emerging a victor from it." And the chief of the Soviet general staff, Marshal Nikolai V. Ogarkov, has been as wary of nuclear conflict as have Western officers, saying that "the very nature of modern weapons is such that, if they are put into play, the future of all mankind would be at stake."

In view of the Soviet Union's military buildup, it is tempting to scoff at professed Soviet worries about a U.S. first strike. Neither Ronald Reagan nor any other U.S. President has seen himself in the role of aggressor. Yet the new allusions to an incipient Soviet move to launch on warning should cause us to examine aspects of our behavior that may have contributed to such inclinations. Least important is the American refusal, rooted in alliance considerations, to join in a no-first-use pledge regarding nuclear weapons.

The Soviet defense minister's hints differ little in substance from those that U.S. officials have already dropped. Despite obvious reluctance to embrace the launch-on-warning concept, former Secretary of Defense Harold Brown pointed out that the Soviets could never be confident that the United States would not respond to an attack on our missile fields by emptying some or all of the silos at first warning. Similarly, while U.S. experts are becoming preoccupied with the threat of "nuclear decapitation" (destruction of command and control facilities essential to effective retaliation), Soviet planners have to contemplate the implications of Presidential Directive No. 59, which specifies the option of wiping out Moscow's political and military control centers. Presidential talk of limited nuclear war and the appointment of leading advocates of nuclear war-fighting doctrines to senior positions in the Reagan Administration must have fed the Soviets' apprehension. They could take no comfort from American claims that Washington was only reacting to a percieved Soviet belief that nuclear wars would be fought and won: it is a familiar Soviet gambit to justify their own actions by citing Western sources.

The mutual suspicion generated by this jostling is compounded by both governments' awareness that they are acquiring weapons that makes strikes against land-based targets more plausible. Soviet SS-20 and American Pershing 2 missiles could virtually eliminate warning times for targets in Europe. And new generations of ICBMs—Soviet SS-18s and -19s and U.S. Minuteman 3s today, MXs and Trident 2s tomorrow—jeopardize all fixed strategic targets in both nations.

Here is a point that deserves special emphasis. This theoretical Soviet ability to destroy U.S. land-based missiles—about 25% of our total strategic force—should give us some understanding of likely Soviet fears about the vulnerability of their land-based missiles—about 70% of their total force. It is true that the Soviets might eliminate all U.S. ICBMs and that the United States could not eliminated all Soviet ICBMs. But there is a more critical fact. Because of the concentration of Soviet warheads on a relatively small number of big missiles, the United States could probably destroy more than half the Soviet warheads by using its Munuteman 3 missiles alone. While the Soviets hold hostage all American ICBMs. they threaten only a fraction of American warheads: the United States holds hostage only a fraction of Soviet ICBMs, but it

threatens most of the Soviets' strategic warheads.

All the talk of hard-target-kill capabilities and time-urgent targets was sure to breed interest in the possible necessity of launch on warning. Beneath the jargon is the disturbing knowledge that both the Soviet Union and the United States must now take the danger of surprise attack more seriously than at any time since missiles succeeded bombers as the main instruments of strategic warfare. A quarter-century ago, that danger was the focus of extended discussions between experts dispatched from Moscow and Washington. The time has now come to restore it to a central place on the agenda of nuclear-arms negotiations.

In addition to his proposals for arms reductions, President Reagan has spoken of other measures to reduce the risk of nuclear war. Sen. Gary Hart (D-Colo.) has repeatedly pointed to the need for negotiated arrangements on nuclear war prevention (as distinct from arms reductions), since both sides will long retain vast inventories that must be strictly governed if stability is to endure.

Out of these concerns, one can devise a number of useful initiatives. Both sides have sometimes been imprudent in the way in which they have exercised their strategic forces. Last month's multiple-missile-launch demonstration by the Soviets was a needless provocation, just as the multiple launches and certain other operations conducted by the Strategic Air Command in the so-called Golbal Shield programs may have been unwise.

In order to diminish confidence in the feasibility of counterforce strikes, several provisions would be useful:

Prior notification of all missile and space launches.

A flat ban on multiple rocket firings.

A prohibition of tests of new, more accurate re-entry vehicles.

A strict annual ceiling on ballistic missile tests of any kind.

These and other ideas would not preclude further refinements in the two sides' forces, but they would degrade prompt-attack capabilities—the real source of pressure for launch on warning.

A more far-reaching notion also warrants discussion. Two decades ago, Nikita S. Khruschev said he thought that it was "appropriate" to establish ground observation posts on both sides of the Iron Curtain in order to reduce the danger of surprise attack. Perhaps that is an idea whose time has come. Reagan wants to beef up the "hot line" linking political leaders in the two capitals. It would be even more useful to establish launch monitors in the missile fields on both sides, suitably equipped and tied to their home countries by secure communications. While they would have no capacity to impede missile operations, such monitors could provide immediate warning of missile launches; any interference with their communications would be a valuable strategic indicator, alerting other surveillance and warning systems to observe the situation closely. These schemes illustrate a cluster of plans meriting urgent discussion, even if the goal of reductions remains elusive.

Ustinov himself has framed the matter well: "It is necessary that the factor of surprise be reduced to a minumum so that the aggressor should not be tempted to use with impunity its nuclear weapons first." That principle both nations should embrace.●

FCC RULEMAKING: CONCERNS OF LOW-INCOME AMERICA

HON. ROBERT GARCIA

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 21, 1982

● Mr. GARCIA. Mr. Speaker, the Federal Communications Commission is currently considering the elimination of its financial and syndication rules governing the television industry. These changes are supported by many of us who represent low- and moderate-income areas which can contain many black and Hispanic Americans. The syndication and financial regulations currently pose the threat of increasing the isolation of poor America from information vital to our free society.

These regulations place the networks at a disadvantage in competing with pay television for quality programs. Increasingly, television's more important and popular programs are going to pay television, where only a fraction of the public can watch. Many low- and moderate-income areas have little hope of receiving pay or cable television in the immediate future. Pay television companies have, in some instances, been reluctant to provide delivery of their services to lower income areas. New York City has been engaged in a running battle with cable television companies over services to areas like the South Bronx. Thus, even low-income families who are willing to meet the additional costs of pay television may not be able to do so.

I am including a letter by Mr. Rene Enriquez, for the interest of my colleagues, which succinctly summarizes many of the concerns of the minority community. Mr. Enriquez, perhaps better known as Lt. Ray Calletano of "Hill Street Blues," is one of too few prominent Hispanic actors and is also the president of a small production company where he has experienced the other side of the production system. His letter is a rebuttal to a recent Washington Post article, presenting the case for retaining the financial interest and syndication rules now being reviewed. Mr. Enriquez' letter appeared in the December 18 issue of the Washington Post. The letter follows:

NATIONAL HISPANIC ARTS ENDOWMENT,
December 14, 1982.

EDITORIAL DEPARTMENT,
The Washington Post,
Washington, D.C.

To the EDITOR:

Policy makers in Washington are supposed to serve the public, not protect the bankrolls and privileged status of a handful of giant Hollywood production conglomerates.

In a recent Post column, Benjamin J. Stein, a comedy writer for these large production companies, presented their case for retaining the financial interest and syndication rules now being reviewed by the Federal Communications Commission.

From my personal experience as an Hispanic television actor and owner of a small production company, I want to strongly take issue with Mr. Stein's claims. Mr. Stein ignores the growing production oligopoly in Hollywood, the unfair threat these rules pose for free television, and the frustrations many minorities have experienced in trying to secure from Hollywood more prominent roles and greater opportunity for minority-owned production companies. These efforts have been strangled because of the increasing concentration of economic power in the hands of a few large Hollywood corporations since the rules were imposed in 1970.

I would like to respond directly to some of Mr. Stein's inaccuracies:

Mr. Stein speaks ominously of network "monopoly power", and that challenge to this power from pay TV is "far in the future." This is incorrect. The networks today are engaged in fierce competition with pay television. Pay television is expected to have some $3 billion more in revenue than all three networks combined by the end of this decade.

Many Hollywood production companies own major pay television companies. For years these companies argued in the interest of the public for an end to government regulations which stifled pay television. They got their way. Now, when these companies are faced with competition from a proposal to end unfair government regulations against free television, they insist it is against the public interest. They can't have it both ways.

The rules were imposed to create program diversity. But today, a handful of these Hollywood conglomerates produce the vast majority of America's television programming. CBS purchases over 97 percent of its prime time programs from just eight Hollywood production corporations, up from 54 percent when the rules were imposed in 1970. The price of syndicated programs has skyrocketed. In some cases, prices for the same program have increased over 300 percent in less than three years. These grim statistics hardly correspond with Mr. Stein's image of a "robust" industry.

Mr. Stein fears a network monopoly. But he ignores the fact that, even when the networks were unchallenged by pay television prior to the rules in 1970, all three networks combined were involved in less than 10 percent of the syndication industry.

Mr. Stein also ignores the frustrations of minorities. I feel that the major studios and production companies have simply not developed properties to feature Hispanics. I only know at present of four Hispanic actors in prominent roles, Ricardo Montalban, Eric Estrada, Rita Moreno, and myself. With 20 million Hispanic Americans looking for familiar faces on television, I consider this situation deplorable.

Precisely because the networks and their community stations are licensed by the government, they have been far more responsive to the aspirations of minority communities in the United States. I am convinced that, by again allowing the networks to participate in the syndication field, there will be greater diversity of programming and much greater opportunity for minority actors and minority production companies.

I am not alone in this concern for diversity in Hollywood and fairness for free television. In recent weeks groups representing millions of American senior citizens, minorities, working men and women and others,

have written to Congress and the FCC urging them to repeal the rules and erase the dangerous government bias against free television.

The financial interest and syndication rules do not serve the public interest. They protect the growing power of big Hollywood corporations; they unfairly damage free television; they limit minority opportunities in acting roles and the production industry; and they hurt poor and fixed-income Americans who can only depend on free television for news and entertainment.

In the public interest, these rules must be repealed.

Sincerely,

RENE ENRIQUEZ.●

HON. LEO ZEFERETTI

HON. JOSEPH P. ADDABBO

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, December 20, 1982

● Mr. ADDABBO. Mr. Speaker, I rise to wish my retiring colleague from New York, the Honorable LEO ZEFERETTI, the best of wishes for a successful career in the private sector. It is my own belief that he will do very well in private enterprise because, as we have seen here in this body over the last 8 years, he is not afraid of hard work and he is a sensitive and sensible man who is willing to go beyond the obvious in seeking the right answers to difficult problems.

I am distinctly sad about losing LEO in this body. His has been a moderate voice of reason, concerned with the working men and women of our country, with helping the handicapped and impoverished, with promoting health care and education and with insuring that our streets are safe. He has worked tirelessly to fight drug abuse and his performance as chairman of the Select Committee on Narcotics has been commendable by any standard. His work as a member of the House Rules Committee has been true to his beliefs and has been characterized by his determination to preserve the democratic process in this House while providing opportunities to the monority so that their right to make their case has never been denied.

While LEO's professional reputation has flourished during 8 years of service in this body, his personal reputation has grown as well. LEO is perceived to be a warm and easy-going man, distinctly approachable by those who seek his attention. His staff found him a joy to work for, his colleagues knew him to be a sympathetic and understanding friend, and those whose work brings them into the Nation's Capitol grew to learn they would get nothing but straight talk from this particular House Member. Those qualities might seem excessive for most Members of this body but I must point out that LEO is, after all, of Italian extraction.

So, as a political career closes, at least for the moment, I am pleased to say to my friend from Brooklyn that it has been delightful having him as a colleague, gratifying to have him as a special friend and inspiring to have his counsel and guidance in so many ways throughtout the years. I am pleased that LEO expects to remain in Washington and I know that he will do well in the private sector as he did in public life.●

BOB SHORT EULOGY

HON. JAMES L. OBERSTAR

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 21, 1982

● Mr. OBERSTAR. Mr. Speaker, in November, Bob Short's courageous battle against cancer ended.

Bob Short had been a dynamic, successful business person who literally made his own fortune. He was a tireless Democratic Party official, deeply committed to the fundamental principles of the Democratic Party.

No professional, business, or political activity, however, took precedence over his deep devotion to his wife, Marion, and their seven children.

On November 24, the Reverend Monsignor Terrence J. Murphy, president of Bob's alma mater, the College of St. Thomas, delivered a most eloquent eulogy to Bob Short. I ask that Monsignor Murphy's eulogy be included in the RECORD in tribute to a man whom I considered a dear and treasured friend—he will be greatly missed.

HOMILY DELIVERED BY THE REVEREND MONSIGNOR TERRENCE J. MURPHY AT THE FUNERAL OF ROBERT E. SHORT ON NOVEMBER 24, 1982, AT THE CHURCH OF ST. OLAF, MINNEAPOLIS, MINN.

Robert Earl Short has left an indelible and proud mark on his family, friends, community, State, and Nation. His career was characterized by great ability, a sense of moral responsibility, and a sense of service to the public welfare, as well as by an energetic and intelligent approach to the challenges of contemporary life.

As an undergraduate at the college of st. Thomas, he excelled in debate, won championships, and honed the oratorical skills which led ultimately to his career in the law and his appointment as Assistant United States District Attorney, first in Washington, D.C. and later in Minneapolis.

His entrepreneurial spirit surfaced in 1950 when he resigned his position as United States district attorney to enter private business. His election as president of the Mueller Transportation Company signaled the beginning of ventures in the trucking industry which over the years brought him to national prominence in the motor carrier industry.

While most men would be fully occupied with the managing of such a major enterprise, he reached out vigorously to try his hand in various pursuits. He acquired several hotels and other real estate in both Minneapolis and St. Paul. He engaged actively in the political life of Minnesota. Most of our State's recent political leaders, particularly those of liberal persuasion, have benefited from his work on their behalf and from his generous support of their campaigns. Recognition of his leadership position in his party took many forms, among them election as delegate to State and national democratic conventions and as treasurer of the National Democratic Committee. He served the President of the United States as an adviser in the areas of manpower development and training and also in small business management.

While public service always had a high priority, he also devoted much of his time and talent to the governance and well-being of private institutions as well. He served on the board of trustees of the college of St. Thomas for the past eighteen years. He served also as a trustee of St. Mary's Hospital in this city and was a member of the law school advisory committee at the University of Notre Dame. He was a life member of the National Association for the Advancement of Colored People.

Surely, one of the most colorful aspects of his busy and varied life and career was his long association with professional sports. As owner of the Los Angeles professional basketball team and as president of the Texas Rangers baseball club of the American League, he brought sparkle, enthusiasm, and integrity to these sports.

This is the briefest recital of some of the areas of his public life. However, to know only these aspects of his life is to see only the tip of the iceberg. He was much more. There was depth of emotions which he often tried to hide. There was deep commitment to certain basic principles. There was abounding love and faith. Let me speak about two of these which, perhaps because his feelings ran so deep, he shielded somewhat from public view, namely, his love for his wife and family and his personal religious belief.

There was first of all his family—his wife, Marion, and their seven children. How he loved them and what a comfort they were to him! He wanted to be with them and made great sacrifices to do so. Night after night when a night baseball game was finished in Washington, D.C., whether it was 11:00 or 12:00, he would fly home to be with them, sometimes arriving in the early hours of the morning. But he wanted to be with them as they started their day.

He was enormously proud of them, so proud that it was evident even when he tried, as he so often did, to conceal his pride. Marion was truly the center of his life. Her support and steadying influence were a source of so much of his success. He was proud of his children and the fine men and women they have become. His influence on them was as enormous as his pride in them. Yet he would often deny that he was so influential in their lives. For example, he loved to speak of their educational achievements and of the fact that five of them have chosen law as careers. But then he would immediately deny that he had any influence by adding: "Of course I told them all to be doctors because that's a better career."

His home was truly his citadel. There he would retire at the end of the day, tired from an endless round of activities, competition, tensions, and pressures of every kind. His greatest comfort was his wife whose strength, love, and commitment provided him with healing, rest, courage, and strength. His pride in her, in his open and yet guarded way, was always evident. It was

as though he wanted all others to know of her marvelous qualities and yet to shield her and protect her privacy. He spoke of her strength and her insistence upon close adherence to the Christian life and her influence on him and their children.

The Scripture texts that we heard read at today's mass were selected by his family. They selected well because the texts struck the notes by which Bob Short lived and died. He was a man of deep religious faith, of a faith that quickly got to the core of Christian belief. We heard today Paul proclaim to the Thessalonians: "For if we believe, that Jesus died and rose, God will bring forth with Him from the dead those also who have fallen asleep believing in Him." This epistle and that to the Corinthians (chapter 15) are among the most important because they are among the earliest written statements on the resurrection of our Lord and Savior, Jesus Christ. St. Paul in his testimony to the resurrection states: "I delivered to you what I also received." What was delivered or handed on? Christ died for our sins. He was buried. He was raised up. The key words are "died" and "was raised." The burial is cited as evidence of his death. The appearances to Peter, the twelve apostles, the five hundred brethren, and to Paul himself establish the fact of the resurrection."

Quite clearly St. Paul employed a commonly used statement of belief, sort of an early form of the prayer we call the Apostles' Creed. He did so because he knew his readers would readily recognize the authoritative statement of their fundamental belief. For he concludes his statement by asserting: "This is what we preach and this you believed." Moreover, this credal statement can be checked by talking to the witnesses of the risen Christ, many of whom are still alive and giving witness to the truth of the resurrection. These witnesses are no less than Peter, the head of the whole Christian community, James, the leader of the Christian community in Jerusalem, all of the apostles and many disciples.,

All four of the Gospel as well as the Acts of the Apostles recount the fact of the resurrection, of the many appearances of Christ after the resurrection. I cite St. Paul's teaching because it is the earliest statement. It is so clearly the faith and teaching of the original followers of Christ and the first generation of believers.

The resurrection of Christ is our assurance of a future life and of our bodily resurrection. For Paul further reminds the Corinthians: "If our hopes in Christ are limited to this life only, we are the most pitiable of men. But as it is, Christ is now raised from the dead, the first fruits of those who have fallen asleep . . . just as in Adam all died, so in Christ all will come to life again . . . Christ, the first fruits and then, at his coming, all those who belong to Him."

Pious Jews offered to God the first and best of their harvest and flock. The gifts symbolized all of their possessions and even life itself, which was the dearest of possessions. By sacrificing the first of the harvest, they indicated that all the harvest that was to follow belonged to God. So, likewise, the risen Christ is the first to rise and all others who have been redeemed by Him, who are his harvest, his flocks, will rise to be presented by Him to the Heavenly Father.

To the Romans Paul wrote: "If we have been united with Him and in death like his, we shall certainly be united with Him in a resurrection like his" (Rom.6:5). "We believe that we shall live with Him" (Rom.6:8).

The Apostle is merely restating what was read in today's gospel. Our Lord said to Martha on the occasion of the death of her brother, Lazarus: "I am the resurrection and the life. He who believes in me, even if he die, shall live; and whoever lives and believes in me shall never die" (Jn.11:25).

This, then, is the rock bottom of our faith. On it is built a superstructure of religious life, faith, and devotion, but nothing is more fundamental, nothing earlier in christian writing than the doctrine that Jesus Christ, the eternal son of God made man, lived, died for our sins, and rose from the dead that we might live eternally with Him.

It is the faith of our fathers, the faith of the first believers, the faith of the Apostles. No religious truth is more certain nor more fundamental. None gives greater assurance of eternal salvation. It was this faith that our dear brother, Robert, perceived so clearly, believed so profoundly, and loved so dearly. His faith, because it was so genuine, was also realistic. It told him that the risen Christ lives on in the Holy Eucharist and that there is a special bond between belief in the resurrection and belief in, and love of, the Holy Eucharist. It was "in the breaking of the bread" that the two disciples at Emmaus had their eyes opened, their faith quickened, and recognized the risen Lord (Lk.24). Certainly the Eucharist in Mass and holy Communion was the central sustaining love of Bob Short.

On the Sunday before he died I brought Bob holy Communion. It was a beautiful day, fresh snow covered the ground and filled the trees and bushes in his yard. The sun was bright. He, Marion, and I sat in his living room and visited for a while. He spoke of his death and burial. He had faced his death calmly in the light of his Christian faith. He grasped clearly the centrality of belief in the resurrection of Christ and the special connection between that truth and the Holy Eucharist for he said: "I want to so fill my body with the body of Christ that the devil will have no claim on it." In his own way and in his own words he applied to himself the profound truth and promise of our Lord made in the sixth chapter of St. John's Gospel when he foretold he would give his body and blood as a pledge of future life: "he who eats my flesh and drinks my blood has everlasting life and I will raise him up on the last day" (Jn.6:55).

In every human relationship of love, the two lovers must leave their individuality to some extent, in order to enter into each other and live as one. So, too, when faced with God's invitation of love, man is forced to leave his self-centered world, his illusion of self-sufficiency, and come to God. He must embrace God in his life. This is precisely what faith does for a person. St. John beautifully describes faith as a coming of God. This is the experience that Bob had. Throughout his life, but especially in recent months, he experienced in faith a leaving behind the possessions of this world and a coming to Christ. And now he has gone to him.

If we believe that Jesus died and rose that we might live with him eternally, then we must believe that Bob, who believed in and loved the risen Lord and whose faith readily translated into worship and service, is now joined to Him in a beatific vision, in a union of person that flows with escstatic joy forever. In the passage from sacred scripture read today by Mr. Brian Short, we heard: "He shall wipe away every tear from their eyes, and there shall be no more death or mourning, crying out in pain, for the former world has passed away" (Rev. 21).

And now it is ended. But it is also beginning. The marvelous thing about human life is that it has no end. It goes on forever. And the truly astounding good news is that life with the risen Christ is offered, and even promised, to each of us, a life of happiness so great that "eye hath not seen, nor ear heard, nor has it even entered into the heart of man," how great this happiness is which God calls to us. We pray that Robert Short has gone to God in his infinite happiness. May he live with Him forevermore.●

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 16, 1982

● Mr. SHANNON. Mr. Speaker, I would like to thank Representative CONTE for providing this opportunity to commend our colleague from Massachusetts, Representative MARGARET HECKLER.

During her 16 years in the U.S. Congress, MARGARET HECKLER has been an indefatigable spokesperson for her constituents. In addition, however, to her work for the people of the 10th Congressional District of Massachusetts, she has championed a wide variety of causes ranging from women's rights to veterans' services.

As one of the leaders in the efforts to pass the equal rights amendment in 1972, Representative HECKLER has continued to press for ratification. In 1977, with many of the other women in Congress, she founded the Congresswomen's Caucus and has served as cochair. The caucus and the Congress will miss her strong voice and active participation in women's issues.

During her years as a member of the Veterans' Affairs Committee, MARGARET HECKLER has championed the causes and pointed out the needs of our veterans. Her experience will, I am sure, be missed by the other members of the committee.

Mr. Speaker, I am confident that MARGARET HECKLER will continue to serve the people of our country and to speak out on the many issues that will be facing us in the years ahead. I join my colleagues in wishing her the best of luck in her future endeavors.●

THE RESCUE OPERATION

HON. DOUGLAS K. BEREUTER

OF NEBRASKA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 21, 1982

● Mr. BEREUTER. Mr. Speaker, during the waning hours of the 97th Congress the Washington Post on December 20, 1982, printed the following editorial. While the Post's prescriptions of actions and cooperation among the developed nations of the free world necessary to halt and reverse a worldwide economic decline are too general to accept without further elaboration and scrutiny, this Member sincerely hopes that the individual

Members of the Congress will, before the 98th Congress convenes, give careful consideration to the list of signals and warnings provided in the editorial and to the further implications of recent occurrences in international trade and finance. Surely there are few, if any, matters that are more deserving of serious study and action in its beginning of 1983 by both the executive and legislative branches of the Government of the United States of America.

THE RESCUE OPERATION

The scale of worldwide economic decline now requires the governments of the rich industrial countries to pull together as never before. In economic policy, governments are accustomed to thinking mainly in terms of their own domestic necessities. Until a few years ago, the strong countries' separate recoveries were always enough to draw the others along. But it won't happen this time. The signals and warnings of recent days deserve careful reflection.

First item: The United States has just reported a record trade deficit in the third quarter of the year. That's the effect of an overvalued dollar, making U.S. products uncompetitive abroad. The overvalued dollar is, in turn, the result of the very high American interest rates, which are related to the prospect of huge deficits in the U.S. budget. The widening trade deficit over the coming year will exert a dangerous drag on recovery here.

Second item: The decline in foreign trade is not limited to the American economy. The International Monetary Fund reports that exports of all the industrial countries dropped in the third quarter, and the total decline was severe. That hasn't happened since World War II. Imports also fell in all of the industrial countries except the United States, and that downward spiral is having a devastating effect on the poor countries that live by selling to industrial markets.

Third item: The World Bank's job is to help poor countries raise their standards of living. A. W. Clausen, the president of the bank, observed in a speech that, as a group, the developing countries have suffered actual reductions in income per capita over the past two years. But, he added, the effects are not limited to the poor countries. When they cannot sell, they cannot buy—and the developing countries are an important customer of U.S. industry. "The slump in Third World development is also aggravating unemployment in the United States," Mr. Clausen accurately pointed out.

Fourth item: The IMF reported that the Third World's accumulation of debt accelerated this year. Most of the bank loans are concentrated in four countries—Mexico, Brazil, South Korea and Argentina—and most of those loans return interest that floats with current rates. This year, the rates averaged 17.5 percent, which helps explain the crisis in meeting payments. Each percentage point on the interest rate means well over half a billion dollars a year to Mexico and nearly as much to Brazil—money that might otherwise be spent on industrial imports.

Fifth item: The German government, struggling to reduce its deficit, enacted a budget with severe cuts in social spending. The Japanese seem about to do the same. That's wrong, and perverse. Both are countries with high savings rates and low inflation. They can afford classic stimulation to raise demand. Instead, they are sitting back cautiously and waiting for others—i.e., the Americans—to take the initiative. But it may be a long wait because . . .

Sixth item: In Washington, the House of Representatives responded to the unemployment rate by passing a bill to keep most foreign cars out of this country. If it were actually enacted, it would be the most savagely protectionist legislation since the Smoot-Hawley Tariff of 1930, which contributed greatly to the depth and duration of the Depression of the following years.

The reality is that the prosperity of all the rich countries, and most of the poor ones, now depends crucially on the international flows of trade and money. That's why not even the most powerful of them, the United States, can rescue itself without the active cooperation of the others.

The rescue has to begin with lower interest rates in the United States. To keep the rates moving down, the Reagan administration has to start bringing down, forcefully, the budget deficits for 1984 and beyond. President Reagan said in an interview published in this newspaper yesterday that he is counting on an economic recovery to reduce the deficit. He had it exactly backward. Without lower deficits, there won't be much of a recovery. Fears of inflation would keep interest too high.

In fact, a thoroughly sensible outline for the rescue operation has been published by the Institute for International Economics, outlining a natural division of labor in this rescue. While the operation has to begin in the United States with lower interest rates and budget deficits, it also requires important contributions elsewhere—especially in Tokyo, Bonn and London. The banks and the IMF have to keep lending. Currencies have to be realigned, with the dollar coming down a bit and the Japanese yen coming up quite a lot.

Countries foolish enough not to work together do not deserve to be rich. If the great industrial powers do not work together now, fast and hard, they are likely soon to find themselves much less rich than they are today.●

PERSONAL FAREWELL

HON. THOMAS B. EVANS, JR.

OF DELAWARE

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 21, 1982

● Mr. EVANS of Delaware. Mr. Speaker, I would like to take this opportunity to commend all of the outstanding men and women who I have had the privilege of working with on my congressional staff. I would like to especially acknowledge Evelyn Kneisely, Bobbie Prein, Bonnie Bednarski, Darry Carmine, and Mark Bailey for their long years of particularly valuable support.

Without their strong, loyal, and professional support it would have been impossible to accomplish all that we did over these past 6 years. I am particularly proud of our accomplishments in bringing important Federal projects to Delaware, and passage of our legislative initiatives such as the Coastal Barrier Resources Act, anti-ocean dumping measures, the Evans amendment to the Export-Import Bank, increased Voice of America broadcasts to Afghanistan and maintaining important foreign assistance programs to name just a few. I am, however, most proud of all that we did to help people in Delaware—whether it was assisting senior Delawareans with social security questions or helping countless more Delawareans when they needed assistance. I am proud of the warm and caring response to their needs by my congressional staff.

I would also like to take this opportunity to acknowledge the many friends I have made on both sides of the aisle here in the House of Representatives. It has indeed been a privilege to serve in this great body, and I shall always fondly remember my close friends here in the Congress.●

A TRIBUTE TO DR. DON BENNING

HON. HAL DAUB

OF NEBRASKA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 21, 1982

● Mr. DAUB. Mr. Speaker, I rise to pay tribute to Dr. Don Benning, who was recently inducted into the University of Nebraska at Omaha Athletic Hall of Fame.

Dr. Benning was instrumental in establishing the UNO wrestling program as a national power in the National Association of Intercollegiate Athletics, coaching the UNO wrestling team to the national NAIA championships in 1970. In the eight seasons he served as head coach, the UNO team record soared from 97-24-4.

A graduate of the Omaha University, Dr. Benning played both football and wrestled in college. His professonal career with UNO began with his appointment as assistant coach in the athletic department after earning his masters from OU in 1961, Under his leadership, the team produced 20 NAIA All-Americans, including 7 national individual championships. Two of his wrestlers, Mel and Roy Washington, won four of those titles and earned induction into the NAIA Wrestling Hall of Fame.

In addition, Dr. Benning was named national NAIA coach of the year in 1969, served as a member of the U.S. Olympic Committee for wrestling and was a president of the NAIA wrestling coaches association.

Dr. Benning left UNO in 1971 to become assistant principal at Omaha Central High School and in 1976 became director of the human-community relations department for the Omaha public schools. In 1979, he was named assistant superintendent for human-community relations.

Membership in the UNO Athletic Hall of Fame is a prestigious recognition for outstanding achievement in athletics, and I ask my colleagues to join me in saluting Dr. Don Benning for his important contribution in fostering excellence on the sport of wrestling.●

DRASTIC CUTBACKS IN LIBRARY SERVICES

HON. JAMES J. FLORIO

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 21, 1982

● Mr. FLORIO. Mr. Speaker, New Jersey's public and research libraries are in a desperate situation. Declining State aid, inflation, and the State cap law that limits municipal spending increases to 5 percent a year, are responsible for drastic cutbacks in library services.

As I am sure my colleagues are aware, a vibrant library system is the cornerstone of a free democratic society. I pledge to work during the next session of Congress to insure that there is adequate funding for New Jersey's libraries.

I would like to share the following article with my colleagues:

[From the Sunday Star-Ledger, Dec. 19, 1982]

STATE'S LIBRARIES FACE CONTINUING FINANCIAL DIFFICULTY—CUTS AND CAPS FORCING SERVICE CURTAILMENTS

(By Al Frank)

The doors will be locked, the lights turned off and only a maintenance man will be wandering through the reading rooms and stacks of the eight branches of the Paterson Public Library tomorrow. Except for the lone custodian, all 20 people who run the system will be laid off until Jan. 3.

And librarians across the state view the situation in the Silk City grimly because many of the elements which led to Paterson's problem have been stalking them for years.

Despite community drives and a foiled attempt to sell some of its art collection, the Paterson system just could not raise the money to go on. Four branches closed two weeks ago. The main branch at 250 Broadway closed last Wednesday. The South Paterson branch closed yesterday.

Paterson's temporary closing for lack of money is not the first in the state.

Earlier this year, in Morris County, the Mount Olive Township Library had to close for three weeks because voters did not approve a referendum that would have allowed the municipal government to exceed the state spending limit. When it reopened it was on a shorter schedule and with fewer employes.

Meanwhile, Princeton University's library—one of the state's four official research libraries—has been charging a fee to outsiders who use its stacks to combat spiraling costs.

The Newark Public Library—another official research library—closed one branch and had to lay off 89 of its staff members when projected state aid fell short.

Other public libraries, squeezed by declining state aid, inflation and the state cap law that limits municipal spending increases to 5 per cent a year, have been coping in less dramatic fashion. Fewer books are being purchased and operating hours have been trimmed.

For example, John Livingstone, director of the Monmouth County Library, said book purchases there have been reduced from the $50,000 spent annually several years ago to $45,000. "The average person may not perceive this but we know," Livingstone said. Other libraries are no longer open on Sundays or they close early on Fridays to save money.

The crisis was forecast in a 1980 report by the County and Municipal Government Study Commission. It identified the cap law, higher operating costs and reduced state aid as the culprits that would put the squeeze on the state's public libraries.

As a result of the report, bills boosting public libraries were proposed in the state Legislature. The package includes revised aid formulas and a law allowing the establishment of a library network. It passed the Senate last year, but Assembly action could not be completed before adjournment.

The bills have been reintroduced and are in the Senate Education Committee. But, like other funding bills, they are stalled by the overall state budget crisis.

The situation in Paterson and Newark and the erosion of services in other communities have prompted an eight-member, ad hoc group of librarians and historian John Cunningham of Florham Park to organize. Their aim is to call attention to the plight of the state's public libraries.

Tentative plans call for the group, which Cunningham said is drawing support from established library, education and public interest organizations, to be a "gentle voice" in attracting the Legislature's attention. It will also attempt to rally public support and money for libraries by publicizing their services.

"It's getting to the point where we've tried to make do for a long time and now has come to the point where we can't do and need help from the people who use libraries," said State Librarian Barbara Weaver, another member of the group.

"In no way are we belligerent, we want to be totally cooperative," said Cunningham, a member of the New Jersey Historical Commission.

He said the group recognizes that the Legislature must also decide how to fund more than just libraries. But with the state's per capital income among the nation's highest, "We just think there's enough money in New Jersey to do both," he said,

As the group prepares for an organizational meeting Jan. 13 in Trenton, the state library staff is preparing a survey for the 315 public and nearly 2,700 private libraries around the state.

The survey will ask the libraries what their financial situations are and whether they've had to deal with budget cuts in the last two years. If any cuts are to be made next year, the survey will ask whether they will be made in staff, books or hours.

The survey also will ask for suggestions on private funding sources that might be tapped in a campaign for libraries and whether representatives would participate in such a drive. Weaver said she hoped the results would be known by mid-February.

Among the things the group plans to discuss is how any private money it attracts would be used. Most librarians agree it is essential that state aid to local libraries continue.

But Newark Library Director Thomas Alrutz, another member of the group, said it could be used to help particularly strapped libraries or fund special projects while leaving the larger pool of state money to be channeled directly to qualifying local branches.

Removing the state from the funding process is something Roger McDonough, former state librarian, and other librarians said would be counterproductive.

Henry Michniewski, who heads the state library's development bureau, said 1975 was the last year that the amount allocated by the Legislature was actually distributed. The sum was $10.2 million. For 1982 the Legislature called for $10.9 million in aid but actually provided only $7 million.

Among other factors, aid is allocated on how well local libraries meet state standards covering book buying, staffing and hours of operation.

Monmouth's Livingstone said, "It's getting to the point where it won't make much difference." At Monmouth County's library, state aid accounts for 8 percent of the budget, down from 12 percent last year.

"State aid, no doubt, has raised standards measurably, there's no doubt about that," said McDonough, who is a lobbyist for the New Jersey Library Association.

But what of its future? McDonough said the Legislature is "caught between the pinch-pennies and those who want to see services maintained" but that the projected recovery is cause for optimism.

Weaver too is optimistic. She said libraries were "accidentally caught up" in the movement to cut the cost of government several years ago. "People really didn't mean libraries but libraries got stuck in it too," she said.

There is cause for optimism in collecting money from the private sector. For example, a private endowment and gifts totaling more than $2 million have cushioned the Joint Free Public Library of Morristown-Morris Township from most service cuts, director Marian Gerhart said.

The library has such broad support that voters in both communities overwhelmingly approved a $2.7 million expansion plan last November. The referendum was nonbinding but officials on the governing bodies of both municipalities have said they interpret the vote as a mandate for bonding the project.

But librarians are adamant that a steady source of tax money—and not private funds—play the main role in keeping libraries both public and free. They are especially adamant against user fees.

Leo Fichtelberg, director of the Paterson library, said that 19th century state legislation allowing property taxes to be used to support libraries came about because private associations did not work. The basis of the law was that a larger public interest was at stake, he said.

"If we get into a user fee situation, then the public library is going to fight a much tougher battle because the responsibility of government to maintain the library is lessened," Fichtelberg said. "I think it's a very narrow and unproductive view."

The concept of the free public library was "to raise people up culturally, raise their level of understanding," he continued. But even those who can afford to buy their own books "cannot find the depths or scope found in the collection of the Paterson library unless they're billionaires."

"I would like to think that there would be nothing standing in the way of a little kid

and books," Historical Commission member Cunningham said.

"It may sound platitudinous, but I feel very strongly that the freedom of the library is such a tradition that it would act as a form of censorship by acting as a bar for those who couldn't pay."

Weaver also is against user fees, calling libraries "the last institution in the country where people can call for the information they want without having to show they can afford to get it."

And continuing that institution is what weighs heavily on librarians like Fichtelberg.

Closing a library is like closing the mind of a free society, he said.

I think it says a great deal about society and civilization and what it's willing to do to provide the wherewithal for people to think and grow and get the information they need in a democratic society. I think society is on its way out if it sells its libraries short."●

PERSONAL EXPLANATION

HON. TOM CORCORAN

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 21, 1982

● Mr. CORCORAN. Mr. Speaker, due to official business in my district, I was unable to be present and voting during the proceedings of the House on Friday, December 10. Had I been present, I would have voted in the following way on the various matters before the House.

On rollcall, No. 433, on agreeing to the House Journal of Thursday, December 9, "yea."

On rollcall No. 434, on adopting an amendment to H.R. 5133 that sought to require the Secretary to examine after 6 months the extent to which the content ratios and schedules have affected foreign automobile manufacturers' investment in plants in the United States and to permit the Secretary to make changes in the ratios and schedules if necessary, "nay."

Furthermore, Mr. Speaker, I was absent today when the House voted on the conference report accompanying H.R. 7093, Taxes Paid to the Virgin Islands. I would have voted for this important bill, which contained an amendment dealing with disability payments and procedures.●

GOLFER WALTER W. SEZNA DIED

HON. THOMAS B. EVANS, JR.

OF DELAWARE

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 21, 1982

● Mr. EVANS of Delaware. Mr. Speaker, several months ago one of my closest friends, Walter W. Sezna, died.

Wally Sezna as he was known by thousands throughout Delaware and the Nation contributed substantially to his fellow man. All of us are richer for having known him.

He was successful in business and one of the finest senior golfers in the world. However, his success in life should not be measured by his business or sporting accomplishments alone. Of infinitely greater and more lasting importance was his strength of character, and that is his wonderful legacy to his family, his friends, and all those whose lives were touched in such a positive manner by this remarkable gentleman.

A man of great wit, loyalty, courage, and ability. A man who always preferred helping others without fanfare. A man whom I was privileged to call my friend for many years. A man who will be remembered as long as there is anyone left to record history. I ask unanimous consent to include in the RECORD an article which appeared in the Wilmington News Journal on August 2, 1982.

[From the Wilmington News Journal, Aug. 2, 1982]

FRIENDS RIVALS REMEMBER SEZNA

(By Matt Zabitka)

The Delaware golfing fraternity was shocked and saddened Monday on learning of the death of Wally Sezna.

A veteran of national and international seniors golf tournaments for more than a decade, Sezna, 87, died of a massive heart attack while in Glens Falls, NY, for the christening of his sixth grandchild.

"He died instantaneously," said Ron Sezna, one of two surviving sons. Ron and his brother Davis, winner of the 1971 Delaware Junior Championship and 1973 Delaware open, had both participated with their father in numerous father-son tournaments over the years.

Friends and golfing foes remembered Wally in different ways, but all concurred that Wally Sezna was a scrapper on the golf course.

"He was probably the most competitive guy I ever knew," said Ed Richitelli, a friend of the deceased since 1956. "He'd play you a $2.00 Nassau and fight you tooth and nail and claw you all the way. That's how much he loved to win. But after the match he'd spring $200 for a dinner and think nothing of it.

"One year in Palm Beach, Florida, he beat me for six bucks and picked up a dinner tab for $200.00."

"He was one helluva scrapper. I really loved the guy, even though there were times I didn't know where he was coming from.

"He was a friend of some of the biggest names in golfing, I don't know of anybody in golfing who didn't know Wally. He was known all over the world," added Richitelli, president of the Brantwood Golf Club in Elkton, MD, and a member of the board and executive committee, as well as grounds chairman at Wilmington Country Club.

"He was one of my dear friends, I played golf with him in tournaments all over the U.S. His passing is a great loss to golf, not only on the state and national level, but internationally."

Saul Savitch, a veteran of more than 30 years on the state golfing scene, recalled playing against Wally in the 1952 Champion of Champions Tournament at Du Pont Country Club.

"I was wearing a khaki cap that he liked," said Savitch, "He kept admiring the cap, then said, I'll tell you what I'll do, If you beat me, dinner is on me. But if I beat you, you pay double for your dinner and give me the cap."

"I won the match—it was the first and last time I ever beat him in golf."

"As his contemporaries grew older and their game suffered, Wally kept getting better as he aged, getting to a point where nobody could touch him."

U.S. Representative Thomas B. Evans, Jr., Delaware's Republican congressman, said he had played golf with Wally "since I was 19 or 20."

"I may have won some of our early matches, but he won most of the time. He was a far more superior golfer than I was," recalled Evans, who captained the 1953 golf team at the University of Virginia, where he studied law.

"What I liked best about Wally," said Evans, "was that he always took an interest in all people, not only golfers. He especially catered to the young golfers. He did it without a whole lot of fanfare."

"He had a great flair about him. He did a lot for people very quietly. I travel quite a bit and there hasn't been any place I have visited that somebody didn't know Wally."

"He was one of a kind. Not only an excellent golfer, but a great story teller and a real man."

"I just can't believe he's gone," said Evans, his voice trailing off.

There aren't too many major golf courses in the U.S. that Wally Sezna hadn't tattooed with his drivers, irons, and putters. In addition to playing in tournaments at such places as Wheaton, Ill., Pinehurst, N.C., Palm Beach, Fla., Englewood, Colo., Bronxville, N.Y., Hot Springs, Va., Hilton Head Island, S.C., Norwalk, Conn., and Sea Isle, Ga., his thirst for golfing competition took him to Gleneagles, Scotland, in 1971 and to Mexico in 1974 and 1975 for International Seniors tournaments.

He was a quarter-finalist in National seniors seven times, was ranked among the top 10 senior golfers in the nation five times by Golf Digest and was the only Delawarean to represent the First State in International Seniors play.

One of his product achievements was in being one of four golfers selected for the U.S. team for the Francis H. I. Brown International Team that competed at the Broadmoor Golf Club in Colorado Springs, Colorado, in August 1973.

In the four-day tournament, it was neck and neck with the Australian team. The U.S. team won by a stroke when Wally birdied the last hole.

Probably the biggest thrill of his life occurred in 1975, playing with his sons, Davis (then 21) and Ron (then 18) in the National Father & Son Tournament at Atlantic C.C., Palm Beach, Fla.

Wally and son Ron, then a senior at Alexis I. du Pont High, carded 77-70—147, and Wally and son Davis came in with 76-71—147, in the two-day scratch event at the tough, par-72, 6,800-yard course. The father played separately with each son in the alternate shot, stroke play.

It was the first time in the history of the annual event that there had been such an occurrence—a father and two sons trying for the title.

Although known best for his golfing feats over a period of more than 30 years, Wally was a football scholarship quarterback at Syracuse University. He left school for a shot in pro football, but his lack of size worked against him.

Monday night, at the Sezna residence in Greenville, Congressman Evans and members of the Sezna family cried and laughed for two hours as they recalled events and stories about the man who gave so much of himself to the sport of golf.

"Wally drank from a full cup of life," said Evans.

No truer words were ever spoken.

COMMERCIALIZATION OF SPACE LAUNCHING

HON. DANIEL K. AKAKA

OF HAWAII

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 21, 1982

● Mr. AKAKA. Mr. Speaker, according to a recent article in Business Week magazine, the Soviets have decided to provide commercial launch services to the nations of the world. Furthermore, two Frenchmen are in the process of trying to line up U.S. aerospace and communications companies to act as agents in finding commercial payloads which the Soviets would then launch into space. Although pricing has not yet been discussed in detail, it is clear that prices would be lower than those any competitor—including the United States—could now offer.

While this new development does not pose a significant threat to our Nation right now, I think it is certainly time that we, in this country, begin to take the issue of commericalization of space seriously. I call on my colleagues to raise this issue in the course of the next Congress. I also call on my colleagues to enact legislation in the 98th Congress which would encourage the commercialization of space launching and marketing services before we are left behind forever in the world of international space activities.

I ask that a copy of the article "Cargo Space on a Soviet Rocket, Anyone?" be inserted in the RECORD immediately following my statement.

The article follows:

[From Business Week, Dec. 20, 1982]

CARGO SPACE ON A SOVIET ROCKET, ANYONE?

It seems like a crazy idea. Two Frenchmen are trying to line up U.S. aerospace and communications companies to act as agents in finding commercial payloads that would be launched into space by, of all people, the Russians.

Sperry Corp., Rockwell International, AT&T, and others have been approached by J. Roda and P. Pamart of Paris "seeking to interest us in representing them in the American market for payloads that would be launched by Soviet rockets," says Richard R. Mau, Sperry vice-president for corporate and government relations. As evidence that the request was authentic, the French proposal included a copy of a letter dated Aug. 12, 1982, and signed by Boris E. Kurakin, director general of the Soviet foreign trade organization, Licensintorg. The Soviet launch service, the letter stated, would be provided by Licenstransmash, a division of Licensintorg. The letter, according to Sperry's Mau, did not discuss prices in detail but indicated they would be less than those of any competitor—including the U.S. National Aeronautics & Space Administration and the European Space Agency.

No thanks. Sperry has declined to act as a salesman for the French entrepreneurs. In fact, even the Soviets are surprised at the boldness of the Frenchmen's sales tactics. In Moscow, Igor D. Alexeyev, acting director of Licenstransmash, acknowledges that the Soviet Union has made "unofficial" contacts with Roda and Pamart regarding the sale of space on Soviet space rockets. But he says those communications have been through the State Committee for Science & Technology, which is not bureaucratically linked to his agency.

Although Alexeyev doubts that the Soviets will put much pressure on the marketing of launch services in the U.S., he makes clear that the Soviets do plan to drive hard to sell them in other parts of the world. A commerical agreement was signed last May between the Soviets and India to launch an Indian satellite in 1986. And the Soviets have offered to provide "backup" launch services for a European Space Agency satellite if Ariane proves unable to do the job.

In Paris, Roda, a real estate manager by profession and an economist by training, sees prospects somewhat differently. He has invited "about 20" U.S. companies to become agents for selling space on Soviet rockets and says he has has one reply so far, "from a company that told me they had sold their aerospace division." His agreement with Licenstransmash to find agents in the U.S. and elsewhere resulted from correspondence with Soviet officials in Moscow and from meetings with the Soviet commercial staff in Paris, he says. "I realized there was a telecommunications market," he explains. "I know the Soviets have roughly equivalent technology to the Americans in rockets. So I said, 'Why not?' "

Roda admits that his agent arrangements are still in the embryonic stage. But the Frenchmen should have something to sell. The Soviet launch price will be less than anyone else's; the Soviets are promising they will make the necessary financing arrangements; and customers will be invited to accompany their payloads until the moment of launch. Up until now, the Russians have rarely invited Western observers to their launch sites.

U.S. companies are treating the proffered French connection very delicately. Nor is anyone expected to pursue it. Quips one company official: "At least you must give the Frenchmen high marks on *chutzpah*. They want to open a store in our own front yard."●

TRIBUTE TO JUDGE ALEX C. ALAMPI SR.

HON. JAMES J. FLORIO

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 21, 1982

● Mr. FLORIO. Mr. Speaker, for the past 41 years, the citizens of the borough of Clayton have been fortunate to have the services of Municipal Judge Alex C. Alampi Sr. Since his election as justice of the peace in 1941, Judge Alampi has exercised great ability and fairness in the administration of justice for his home community of Clayton.

Judge Alampi and his fellow municipal jurists serve at a level of government that is sometimes referred to as "the point of delivery" where one man's contribution can determine the quality of government for an entire community. Judge Alampi accepted this challenge and devoted his career to the improvement and impartial administration of justice for his community. After five decades of service, Judge Alampi plans to hold his last court session on December 27th. I would like to take this opportunity to commend Judge Alampi's outstanding service to the residents of Clayton. His experience and devotion to the law will be missed.

Mr. Speaker, for the benefit of our colleagues, I submit the following article:

[From the Sentinel, Dec. 2, 1982]

JUDGE ALAMPI TO RETIRE AFTER 41 YEARS ON BENCH

After serving 41 continuous years in a judicial capacity in the Borough of Clayton, Alex C. Alampi Sr., has announced his retirement from the bench effective January 1, 1983. He said his retirement came because of recent ill health.

"It was a very difficult decision, because I enjoyed every aspect of the job and the many years I served in the judiciary," said Judge Alampi, 67. "But after an eight day stay in Underwood Memorial Hospital, Woodbury, recently, I took the advice of my doctors and my family who advised against the continuing stress of my judgeship," he said. Alampi recovered most successfully from triple bypass surgery in May of 1979.

His retirement letter presented on November 23rd to a surprised Borough Council, spoke briefly of the borough officials and residents.

The letter, in part read: "In reaching this most difficult decision, I have reflected with pride on my 41 years of service to the community of Clayton and to the fine residents of our Borough."

"I have particularly fond memories of my association with the sincere and dedicated past and present elected and appointed Borough officials with whom I have had the privilege to work and who always have been most respectful and supportive of our local court."

"In discharging my duties, I have steadfastly attempted to maintain the integrity and dignity of our Municipal Court, mindful at all times that compassion and understanding are of great importance in the administration of Justice."

The letter concluded, "To you, Mayor Sharp and members of Council, I should like to extend my sincere thanks and appreciation for your understanding and support of our need to maintain a quality Court system."

Judge Alampi was highly complimentary of the various community groups and organizations who were "always supportive of the job I was trying to do in the interest of Justice for our community." The Judge added, "Clayton has been good to me and it was this kind of support that instilled a greater determination to do a better job."

The Judge continued, "It is not easy being a judge in the community where you reside,

particularly knowing so many people with whom you have daily contacts.

"On the other hand, my superiors felt that being a Judge in your own community held many advantages since a local Judge knows the "pulse" of the town, the people, their problems, and was better prepared to handle the local problems when they appeared in Court."

Judge Alampi also praised members of the Clayton Police department whom he characterized as "performing a most difficult job in a most difficult era of disrespect for the law, the courts and the public in general."

Judge Alampi, who plans to conduct his last court session of his long career on December 27th, held high praise for his Court Clerk, Sallie L. Geist, for performing her duties in a skillful and highly professional manner. "She is an excellent Court Clerk," said the Judge. "Her loyalty, dedication and knowledge of the job commands the respect not only from me but from the many other judges and attorneys with whom she comes in contract."

Following his marriage in 1941 to Jenny Ladd, a Clayton girl, Judge Alampi was elected Justice of the Peace in Clayton and in 1944, while holding that position, he was also appointed Police Recorder for the Borough by the late Mayor Frank C. Myers.

In 1947, the voters of New Jersey approved a constitutional amendment which effected the minor judiciary, and which in effect would abolish the offices of the Justices of the Peace and Police Recorders and create the office of Municipal Judge effective January 1, 1949.●

NORTHERN PIPELINE: UNCONSTITUTIONAL BANKRUPTCY COURT

HON. PETER W. RODINO, JR.

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 21, 1982

● Mr. RODINO. Mr. Speaker, I am disappointed that the Congress could not enact legislation to meet the December 24 deadline mandated by the Supreme Court to insure the continued efficient functioning of the Nation's bankruptcy system. A major disruption of this system in the present difficult economic period will be most unfortunate.

Some have pointed to the Judicial Conference's proposed interim rule for the handling of bankruptcy cases as an acceptable temporary fix until the Congress can enact a constitutional court system, but the legal validity of the suggested rule, as well as the practicality of the rule in operation, are subject to grave doubt.

It is, of course, contrary to the basics of jurisprudence for a court to create its own jurisdiction. That is a matter for the Congress. The authority to promulgate rules of practice and procedure is not the authority to establish jurisdiction. The proposed rule is also in conflict with bankruptcy statutes and other rules of practice and procedure. What a majority of the Supreme Court left to Congress to do cannot be done by a dissenting opinion, the Administrative Office of the U.S. Courts, the Judicial Conference, or a district court rule.

The proposed temporary rule will also result in massive duplication of effort by bankruptcy and district judges and magistrates. It will generate wasteful litigation over jurisdiction, productive only of needless expense and delay in bankruptcy cases. The proposal is even more inefficient than the pre-1978 bifurcated, summary plenary jurisdiction that the 1978 law was designed to eliminate.

Aside from its judicial inefficiency, the Judicial Conference's proposal would completely undermine the goals of successful rehabilitation of debtors in reorganization cases and prompt liquidation and distribution to creditors in asset liquidation cases. The proposal is unsound from both a judicial and bankruptcy policy standpoint and raises the same constitutional questions as the court system invalidated in Northern Pipeline. The Justice Department, as well as every scholar and practitioner who has analyzed the interim rule, concluded that it would be both unworkable and subject to serious legal challenge. As the Justice Department has observed, a legislative proposal that simply offers an opportunity for more litigation to test its validity is no solution at all.

Resolution of the constitutional problem in the bankruptcy court system will be the first legislative item on the agenda of the Judiciary Committee in the 98th Congress, and no other bankruptcy legislation will be considered until the constitutional issue created by the Northern Pipeline ruling is solved.●

THE COPYRIGHT CONTROVERSY

HON. TOM RAILSBACK

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 21, 1982

● Mr. RAILSBACK. Mr. Speaker, people generally view the end of the year as a time for reflection and examination—a time for resolutions. With that thought in mind book critic Jonathan Yardley in the Washington Post of Monday, December 20, 1982, reviewed the recent suit filed against NYU, nine professors, and a copyshop and focused not on the legal merits but on the professional ethics and moral responsibility of an institution and its employees. Yardley raised several questions of far-reaching consequences that I would like to share with my colleagues.

The article follows:

[From the Washington Post, Dec. 20, 1982]

THE COPYRIGHT CONTROVERSY

(By Jonathan Yardley)

The specific charges and legel merits of the test case brought by nine major publishers against New York University on grounds of copyright infringement are the business of the courts, not columnists, and there will be no discussion of them here. But the suit also raises, or highlights, larger issues of professional ethics and what must be described as, for what of a less portentous term, moral responsibility.

Those issues were succinctly addressed by Carol Risher, director of the copyright division of the Association of American Publishers, who remarked when the suit was filed last week that "universities must recognize that they have a responsibility for what their employees and faculty members do, and faculty members must recognize their own individual responsibility." This, of course, is true of any institution and those who work for it; an insurance company must bear corporate responsibility for the professional actions of its agents, and those agents similarly must live up to their professional obligations as individuals.

But when the question is applied to higher education (or, for that matter, education at any level), it assumes different dimensions. Colleges and universities are not businesses or industries. They are charged with the preservation and promulgation of ideas and knowledge, a responsibility that cannot be satisfactorily discharged without the use of published material—which makes them automatically a primary "market" for the authors and distributors of such material. What is especially galling to many observers—many of them, it should be emphasized, themselves academicians—is that the copyright controversy reveals that some institutions of higher education are openly countenancing efforts by their faculty and students to evade the responsibility of paying for the privilege of using these published materials.

This widespread practice undermines the integrity of the academic community. Often out of the very best of motives—chiefly, no doubt, that of making information available to students speedily and at the lowest possible cost—teachers and the institutions that employ them engage in large-scale, unauthorized photocopying of material that is not in the public domain. Almost certainly, more often that not this is done in innocence; few people, when they go to a photocopying machine, trouble to reflect on the legal or ethical questions raised when material owned by others is copied—it would occur to few people, in fact, even to think of the process in those terms. But each time this happens, a potential customer for a book, periodical or scholarly journal is eliminated. The author is paid no royalties and the publisher receives no copyright fees.

Still, some who abuse the copying privilege are more innocent than others; there's sometimes a most unpleasant element of hypocrisy. Within the academic community it has long been standard practice for teachers who are authors and/or editors of textbooks to require the use of those books in their courses; if they are especially eminent professors, they may have sufficient standing to require the use of their texts not merely in their own courses but throughout entire departments. Textbook publishing is big business—much bigger than trade publishing—and the rewards to the authors can be generous indeed. Yet the interest these individuals take in the protection of their own work is not always extended to the work of others; a publishing executive makes note of those professors "who will defend their right to royalties from their own ideas, but

when they are stealing from someone else, they have no respect."

The operative word of course is "stealing," just as it is in the similar controversies over audio and video taping. And just as in those controversies, there seems no practical way to reconcile all the conflicting "rights," whether real or imagined, that are clashing so noisily against each other. Copying machines won't be wished or adjudicated away any more than will be tape recorders. So the fundamental question in all of these debates is how to live with the reality of technological advances without infringing on the clear right of writers and artists to a return on the use by others of the fruits of their labors.

A reasonable gesture in this direction on the part of the academic community seems to be the fundamental goal of the suit against NYU, a copying outfit and several teachers. The publishing industry has been trying for some time, as have various authors' organizations, to persuade higher education to comply voluntarily with the photocopying provisions of the Copyright Act of 1976; its hope has been to eliminate what is described by Townsend Hoopes president of the AAP, as "the indiscriminate and widespread copying of a range of copyrighted materials by the academic community, under circumstances going far beyond any uses permitted by the copyright law." That hope has not, to put it charitably, been realized; too many universities and professors seem unwilling to give up the freebies that the photocopiers make available to them. Again to quote Hoopes: ". . . publishers have sought to make colleges and universities aware of the unacceptability and illegality of these practices, but, in the absence of general observance, had been forced to court action."

What's truly frustrating about the obduracy of these elements of the academic community is that it is not necessary. The publishers are not utter fools. They realize that absolute enforcement of a law that is widely thought to be vague is beyond any reasonable hope. They are willing to compromise. They "recognize academic copying within reasonable, lawful limits." What they really want from the universities is good faith—an acknowledgment, if you will, that the guardians of knowledge are as bound to live by the law as any others who enjoy the freedoms and protections it affords.

There's good reason to believe that most publishers would be quite satisfied should colleges and universities generally adopt practices comparable to those of Johns Hopkins University, the legal office of which regularly sends out explicit reminders to faculty and staff of the photocopying provisions of the Copyright Act and urges that they and their students comply with them—a practice that, in the words of a ranking administrator at another institution, "probably is the high-water mark of compliance among universities around the country." More specific procedures that attempt to reconcile the conflicting interests of the copiers and the copied are available through the Copyright Clearance Center, including one-time payment of photocopying royalty fees; recent settlements of copying disputes between the AAP on one side and E.R. Squibb and American Cyanamid on the other could point the administrators of higher education toward an amicable settlement with the publishers.

In the end, though, this is the point: How can the community of higher education maintain the respect of the public—not to mention its self-respect—when it condones theft by its own faculty and students? For theft is what happens every time a copyrighted piece of writing is reproduced and distributed without payment to its author and publisher. That a small number of universities are attempting to address this problem—and it is, like it or not, a moral problem—is insufficient compensation for the greater number that are circumventing, or ignoring it, or deliberately violating the law. And then there is this: If the universities can't be trusted to safeguard the writers' rights, who on earth can?●

POLICE CHIEF HAROLD A. JOHNSON

HON. NORMAN Y. MINETA

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 21, 1982

● Mr. MINETA. Mr. Speaker, with sincere pleasure, I rise today to honor Police Chief Harold A. Johnson.

As a highly regarded leader and as a dedicated public servant, Chief Johnson has helped keep the peace and build a community. For more than a quarter century, Harold Johnson labored at the risky, grueling, and often thankless tasks of police work, and he rose through the ranks to become one of the finest police chiefs in the State of California.

Yet Harold Johnson did even more than that. Both before and after Los Gatos welcomed him as the new chief of police in 1970, Johnson was vigorously active in the communities which surrounded him. Chief Johnson gave his time to the Boy Scouts, the Salvation Army, the United Way, and other charities, even though he was spending all of his business hours serving and protecting the people.

Harold Johnson was more than a super cop. He was a super citizen.

I had the pleasure of working with Chief Johnson on the regional criminal justice planning board, and like thousands of others, I enjoyed working with this witty, energetic, compassionate man.

Today, on the eve of Chief Johnson's retirement, I am proud to join all of those who thank Chief Johnson for his energy, his work, his kindness, and his courage.●

PHILADELPHIA NAVAL SHIPYARD EARNS HIGH MARKS ON "SARATOGA" OVERHAUL

HON. JAMES J. FLORIO

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 21, 1982

● Mr. FLORIO. Mr. Speaker, several years ago it was recognized that overhauling our aging World War II aircraft carrier fleet was a cost-efficient way to increase our Nation's defenses. Thus the service life extension program (SLEP) was created for this purpose and the U.S.S. *Saratoga* selected for the program's first overhaul effort. The Navy in 1979 picked the Philadelphia Naval Shipyard to do the *Saratoga* renovation. When the Navy's selection of Philadelphia was challenged, many of my colleagues joined me to help pass legislation upholding the Navy's selection.

I am pleased to appear before this House 3 years later and report that the Congress and the Navy made the right decision. As the following articles indicate, the workers at the Philadelphia Naval Shipyard have done an outstanding job on the *Saratoga* renovation. Not only have the shipyard workers received excellent marks for their shipbuilding work, but the *Saratoga* will be returned to the fleet on or before schedule and within its budget contract.

I am proud of the work of the Philadelphia Naval Shipyard in restoring to service our older aircraft carrier fleet. The yard's outstanding completion of the *Saratoga* project has prompted the Navy to select Philadelphia as the worksite for the renovation of two additional carriers, the *Forrestal* and the *Independence.* Renovation of these carriers will keep shipyard employment at near capacity through this decade, and help promote additional job growth in south Jersey and throughout the Philadelphia area.

The articles follow:

[From the Philadelphia Inquirer]

A WELL DONE FOR "SARATOGA"

The aircraft carrier Saratoga has passed a crucial testing period with flying colors. "A very high degree of success" was how the Navy Board of Inspection and Survey put it in a report following sea trials. That is an important achievement not only for the Philadelphia Naval Shipyard, where the $500 million overhaul of the carrier was done, but for the economy of the entire region.

It means shipyard employment is likely to remain at approximately the 11,000 level, or higher, for many years—probably through the remainder of the 1980s and perhaps well into the 1990s. The next carrier to be overhauled—the Forrestal—is scheduled to arrive in Philadelphia on Jan. 21. That is 12 days before the scheduled departure of the Saratoga.

Beyond that, the shipyard has begun preparations, including purchase orders for steel, for a third carrier, the Independence, to be overhauled here beginning early in 1985. A fourth carrier, the Ranger, also is to be overhauled and, although it hasn't been assigned formally to the Philadelphia yard yet, it almost certainly will be.

If work on the Saratoga had failed to pass muster, the shipyard's future could have been bleak. Remaining carriers in the overhaul program might have been sent to other yards. Coming through on the Saratoga assignment preserves a strong prospect of success at the shipyard and numerous area companies providing equipment and supplies.

Moreover, the Service Life Extension Progam (SLEP), of which the overhauls of the four carriers is part, is expected to be extended to additional vessels after the four are finished. The Philadelphia yard, with its experience and if it continues to perform excellent work, should be in line for further SLEP assignments.

In retrospect, the regional coalition of members of the Congress and other public officials and business leaders who won the fight to bring the Saratoga here won a victory for the Philadelphia area that has turned out to be even more important than may have been first realized. The officers, crews and workers at the shipyard met the challenge of the Saratoga well. They have reason to be proud.

[From the Washington Post]

CARRIER PASSES SEA INSPECTION

PHILADELPHIA.—The USS Saratoga cruised into Philadelphia yesterday after a team of Navy inspectors declared the aging supercarrier in excellent condition following a 28-month, $525 million overhaul.

The 78,000-ton vessel sailed from the Philadelphia Naval Shipyard a week earlier in preparation for its seagoing inspection by the Navy's Board of Inspection and Survey.

Rear Adm. John D. Bulkeley, president of the board, and some 80 inspectors arrived by helicopter early Monday while the ship was cruising off the Virginia coast.

The Philadelphia Naval Base said the inspectors conducted a thorough review of all the work performed during a service life extension program by the shipyard and the ship's crew.

The inspections included tests of the carrier's full-power operation, aircraft support systems, radio communications, radar systems, weapons handling systems, self-defense equipment and fire protection gear.

All of the systems performed "extremely well," according to a statement from the naval base.

Yesterday, the Saratoga deck-launched and landed two C1 aircraft—the first time in more than two years that fixed-wing aircraft operated from the carrier's deck.

The Saratoga will remain in Philadelphia for about six weeks until the renovation is completed, the Navy said.●

FAREWELL

HON. JOHN L. BURTON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 21, 1982

● Mr. JOHN L. BURTON. Mr. Speaker, as I leave the people's House I want to say goodby to you and my friends of both parties.

I want to say a special goodby and thank you to all of the staff from both cloakrooms, the House floor, the pages, the desk, the restaurant, the officers of the House, the elevator operators, Capitol Police, the House reporters, and the committees of the House, specifically House Administration and Government Operations, for making me feel like I was a friend and an equal.

To my fellow Members let me say you do not have to take yourselves seriously in order to take the job seriously and always remember you can get more with a smile and a grin than you can get with a smile alone.

To the press corps I say beware for there will always be those amongst you who truly believe they have seen chickens with lips.

Peace and friendship.●

MR. JUNIUS GRIFFIN

HON. WILLIAM (BILL) CLAY

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 21, 1982

● Mr. CLAY. Mr. Speaker, I would like to share with my colleagues the story of Mr. Junius Griffin, a modern Horatio Alger and a leading power broker in today's record industry. Mr. Griffin's life is about inspiration, fulfillment and success and I believe he provides an outstanding role model for today's youth.

The articles follow:

[From the Kingsport Times-News, Dec. 10, 1982]

STONEGA NATIVE COVERED, CREATED CIVIL RIGHTS NEWS

(By Bill Lammers)

War correspondent Ernie Pyle's prose gave Wise County native Junius Griffin his first real thirst for journalism.

Finding his own byline in the military newspaper Stars & Stripes, atop Associated Press dispatches and even resting above his stories in The New York Times gave the reporter more thrills than most modern-day Woodward-and-Bernstein clones could ever imagine.

But seeing his name in the Knoxville News-Sentinel on an AP civil rights story inset with his own photo gave Griffin and his family their biggest thrill. It was, after all, where the young "Toby" Griffin had found Ernie Pyle years before.

"Boy, he could write," recalls the 53-year-old Griffin, now a vice president of Motown Industries, of his boyhood hero. "I could see the GIs. He had a power with words. As Art Everett said, he could make words sing. I thought that was just beautiful."

After serving in the U.S. Marine Corps and the Air Force and working for Pacific Stars & Stripes from 1958 to 1961, Griffin found himself in the midst of the "other" war of the '60s—the civil rights struggle being fought by blacks in the United States.

As a reporter for the New York bureau desk of the Associated Press from 1962 to 1964 and as a general assignment reporter for The New York Times from 1964 to 1964, the Appalachia Central High School graduate returned to the South to cover the efforts of Dr. Martin Luther King and his Southern Christian Leadership Conference.

Eventually, King convinced Griffin to become SCLC's public relations director, a post he held for two years before King was killed in 1967.

Mixing yarns about dictating stories during a racial riot ("The rewrite man kept saying, 'Be patient.' Be patient? Damn. They were about to burn the telephone booth down!") with his impressions of the civic leaders he has met during 25 years covering and helping make the news, Griffin recalls those days with all the nostalgia of, well, an old newspaperman.

He was hired at the Associated Press because of his work as Taiwan bureau chief for Stars & Stripes.

"I was one of only two reporters who had integrated journalism experience. The other was Alex Haley," Griffin said, referring to celebrated author of *Roots*, a former Coast Guardsman.

His work at the New York bureau of AP led to his writing of two of the 13 stories in AP's "The Deepening Crisis" series, which finished in second place for the Pulitzer in 1963. After joining the *Times* and being amazed at sometimes having a whole week to work on one story, he often received civil rights assignments.

"There were so many black reporters at that time who did not want to write about blacks because they said they weren't black reporters." Feeling successful just at getting out of the coalfields, Griffin didn't harbor that prejudice.

"I don't think I could have come from any other part of the country and been able to withstand the pressures of people wanting to push me one way or another.

"Until this day, I didn't realize the value I was then. I went because they doubled my salary. I certainly wasn't a hero in my hometown. They didn't read the paper (*The New York Times*). I was a success when I didn't have to go into the coal mines, like my father labored not to.

"Blacks didn't like me because they thought I should write everything sympathetic to the black cause. The whites didn't like me because I didn't rely on just the Urban League and Martin Luther King for comments. I went to the bars, the whorehouses, and talked to the people. I was touched by a woman who told me, 'I never thought I'd see my name in *The New York Times.*' I cried over that.

After joining King's staff, Griffin said it took about three months before he really understood King's goals.

"I'd spend all night listening to his speeches, trying to get the speech patterns down right. He needed the same number of words per sentence as they teach you in journalism school—22 words—to give him time to catch his breath," Griffin said.

"He could be poetically ungrammatical in Peach Tree, Ala., and then go to theological school in Chicago and dazzle them. Of all the other things he was, he was a southern preacher—he came out of that tradition.

"Martin Luther King was an institution by himself—not just the SCLC. The only thing that will be as near to an institution as Dr. King is the King Center (for Social Change)—that could draw us together."

After King's death, changes in the civil rights movement brought changes to the manner in which blacks viewed themselves.

"People have been mouthing Martin Luther King's goals. Martin had a dream and everybody else thought they had to go to sleep and have the same dream. The only one who has gone beyond his dream is his widow.

"The only other non-violent movement since then has been Solidarity, and that's a shame.

"I sometimes worry about my daughters because they have no idea what it is to be black," Griffin said. "They have never had to live like that.

"Conditions are better in the South today than they are pictured. The South has the poorest propaganda system. Atlanta is one of the most progressive cities in the world, not only in the nation."

In searching for a leader to replace King, some blacks have forgotten what King had been seeking.

"Some people misunderstand integration. They think it has to be black and white together, side by side, all the time. Integration to me is the shared control over the institutions that run this country.

"You know what a coal glump is? That's when the roof of a mine and the floor come together. You want to see true integration, you should see the women mourning their dead husbands outside the mine together and then when the bodies are brought out wetting their thumbs with spit and wiping it against the coal dust on their faces to see if its their husbands."

With the rise of the Moral Majority and other political groups in the '70s and '80s, attention is being focused less on the black American.

"We're losing it (influence) politically. We've abandoned the inner cities for the suburbs, and now the whites are coming back to the suburbs," he said.

"Economics will never destroy your convictions. It can dictate how well you'll survive, but not whether or not you'll survive."

As vice president for community relations at Motown Industries, Griffin is responsible for promoting the corporate image of the company synonymous with '60s black music that has diversified into films and publishing and grown to become the largest black-owned corporation in the country. That includes speaking, lobbying and other behind-the-scenes activities.

"Motown is a little United Nations. You have people of all colors, all hues, all nationalities. You won't get a job at Motown because you're black, and you won't get a job there because you're white. All that is required is excellence."

The commitment to excellence can be attributed to Motown founder Berry Gordy Jr., who started the record company in Detroit in 1959 on a tiny investment and built it into one of the biggest success stories of the modern business world.

"Berry built an institution—Motown is an institution. Sometimes I have to remind him it's not just a successful business, it's an institution. Motown has been wherever I've been—Algiers, behind the Iron Curtain," Griffin said. "Motown is more the voice of America than the Voice of America (radio network). But Berry is a private man, where Martin was a public man.

"As much as Berry Gordy is, he puts principle with an 'le' before principal with an 'al.'

Griffin has taken a leave of absence from Motown to write a book and two movie treatments. He recently has been visiting the home of his mother and stepfather, Emma Lou and Morris Humphrey, in Stonega and has been looking for a place in the hills to write.

"I've done everything except write a book. I guess every journalist wants to do it. It must be respected in the literary world. I'd rather be a reporter for the *Kingsport Times-News* or write editorials or review books than cash in on that experience (with King).

"There are times I've regretted not staying with newspapering, but if I'd have done that I would have missed working for Dr. King. Sometimes I felt so inadequate. I had no political sophistication. I just had a passion to report.

"You have to be good at gathering facts and then mold them into a believable truth. Some people were as good at gathering facts but molded them into a believable lie. I never had that constraint put on me."

A STROLL THROUGH STONEGA

(By Tom Matthews)

STONEGA.—Some things never change, but Central High School and the old baseball park are gone, replaced years ago by railroad tracks and a coal tipple.

For Junius Griffin—who left the communal hollows of Stonega to take his place in the military, the media, "the movement" and ultimately, the high-powered world of the music business—it's still home.

It's still his parents' home as well, he points out. Emma and Morris Humphrey, his mother and stepfather, tried retiring in Connecticut, but soon returned to their home in Stonega, about six miles from downtown Appalachia.

"We used to bring our ax down here and chop ice to make homemade ice cream," Griffin says with a touch of nostalgia, pointing to a jagged limestone wall on the roadside.

"If you told most of the people in these hills they had to go on welfare," he said proudly, "they'd die. There is a strong work ethic here."

Griffin likes to tell of his early urge to follow his father into a career of coal mining, and of the time when he applied for a job with Stonega Coke and Coal (Westmoreland now), only to learn much later that his father had told company officials not to hire him.

He overcame the apparently inherent limitations (in the early 1950s) of being black and from the coalfields, and it was fitting that Griffin would take his place for many years in a profession—newspaper writing—which fascinated him as a youth, and formed the background for his future plans.

"My inspiration was not from genius," he said. "It came from a lot of hard work."

One of a number of ironies surrounding areas such as this—where things frequently change only in appearance or not at all—is diet, he observes, more aware in his middle years of the importance of balance and moderation, and often reminded by the vista offered around his home near Muscle Beach, Calif.

"My mother still cooks for my father like he's working in the mines," he said. "The real tragedy for some of those who have survived a lifetime of working in the mines, is that they are slowly committing suicide with their diet."●

ON SOVIET JEWRY

HON. DAN LUNGREN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 21, 1982

● Mr. LUNGREN. Mr. Speaker, I rise today to draw attention to the plight of the Jewish Refusenik movement in the Soviet Union. In bold disregard of past human rights treaties it has signed, the Soviet Union in recent years has increased its oppression of its citizens by denying their rights to practice religion and to emigrate. It saddens me that we in the U.S. Congress must again protest the Soviet Government's outrages against freedom and dignity. The Soviet Jews, or Refuseniks, as they have come to be called, are asking for the right to practice some basic freedoms. Being refused opportunity to freely practice their faith, they would like to be permitted to move to a country where they can live with dignity. They are not trying to subvert the Soviet political system; they are only asking to be let out.

The Soviet authorities are virtually closing the door on Jewish emigration, despite the fact that an estimated 500,000 Jews are actively seeking to leave Russia. Beginning in 1980, the number of Jews allowed to leave the Soviet Union began decreasing drastically. Whereas in 1979, 4,000 Jews were granted exit visas every month—for a total of 51,331 for that year, in 1980 only 21,472 visas were granted and in 1981, 9,448. This year, 1982 appears to be shaping up as by far the worst year for Soviet Jewish emigration since the beginning of the Refuseniks movement in the early 1970's. If the present trend continues, the Union of Councils for Soviet Jews estimate less than 3,000 Jews will leave the U.S.S.R. this year.

Harassment of those seeking emigration has also been mounting in the last few months. As an example, the Soviet Government is now stripping Jewish scientists of their doctorates and MA degrees. As quoted from testimony before the Subcommittee on Human Rights and International Organizations, "Jewish scientists who have requested visas are summoned to the administration of the institutions where they are employed and are advised to withdraw their requests for exit visas. Each person refusing to do so is discussed at a meeting of the scientific council at his or her respective place of employment and usually fired."

Mr. Speaker, I believe it is important to stress that repeated incidents of Soviet disregard of the rights of individuals to practice their religion and emigrate, as cited above, are in direct violation of the commitment to freedom of thought, conscience, expression, religion, and emigration made by the U.S.S.R. through its adoption and participation as a signatory to the U.N. International Covenant of Civil and Political Rights, the Final Act of Conference of Security and Cooperation in Europe at Helsinki, the U.N. Charter, and the Universal Declaration of Human Rights. Mr. Speaker, this is a matter of international concern and to remain silent invalidates these human rights pacts.

So as to bring the facts of this matter to the attention of my colleagues, I insert into the RECORD at this point the statistics compiled by the National Conference on Soviet Jewery showing the decline in Jewish emigration from the U.S.S.R.

The statistical table follows:

Soviet Jewry Research Bureau—Jewish Emigration from the U.S.S.R.: Statistics

1965 to June 1967	4,498	1971	13,022	1975	13,221
October 1968 to 1970	4,235	1972	31,681	1976	14,261
		1973	34,733	1977	16,736
		1974	20,628	1978	28,864

SOVIET JEWRY RESEARCH BUREAU—JEWISH EMIGRATION FROM THE USSR: STATISTICS

	1979		1980		1981		1982	
	Number	Percent [1]	Number	Percent [1]	Number	Percent [1]	Number	Percent [1]
January	3,722	39.4	2,803	39.6	850	24.9	290	26.9
February	3,837	35.9	3,023	42.1	1,407	15.8	283	21.9
March	4,418	34.7	3,049	40.9	1,249	14.3	289	27.3
April	4,296	29.9	2,469	37.3	1,155	15.5	288	29.5
May	4,163	35.4	1,976	37.3	1,141	15.8	205	27.8
June	4,358	35.7	1,767	31.8	866	14.5	182	27.5
July	4,068	30.0	1,205	23.8	779	22.2	186	23.1
August	4,711	32.3	770	28.1	430	22.3	238	20.2
September	4,663	29.1	1,307	24.3	405	28.6	246	20.7
October	4,746	33.8	1,424	22.0	368	24.2	168	34.5
November	4,193	34.7	789	26.4	363	25.0	137	38.0
December	4,145	34.3	889	23.1	434	22.8		
Total	51,320	33.7	21,471	34.4	9,447	18.6		

[1] Figures represent the percentage of those who proceeded to Israel.

Note.—From October 1968 to October 1982, 261,994 persons left the Soviet Union with Israeli visas. Approximately 162,361 of them went to Israel.●

HONORING RAYMOND MULLER

HON. CHARLES PASHAYAN, JR.

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 21, 1982

● Mr. PASHAYAN. Mr. Speaker, next month will mark the retirement from public service of Mr. Raymond Muller, who for the past 30 years has been a valued Tulare County supervisor and part-time appraiser. Those last 16 years have been as an active member of the Board of Supervisors.

Ray was chairman of the Central California Criminal Justice Planning Board, drug abuse officer for the county, served on the board of directors of the Community Action Agency, president of the San Joaquin Valley Supervisor's Association, a member of the board of directors of the State association, on the State executive committee and chairman of the Tulare County Board of Supervisors for the years 1971-72 and 1981-82.

At the present time he is chairman of the area agency on aging for Tulare and Kings Counties, revenue and tax task force for the State association and a member of the commission to study the new federalism for the State association.

Ray has been a Democrat all his life. He was president of the Southeastern Democratic Club for 2 years, is a member of the Porterville Democratic Club, and served several years on the Tulare County Democratic Committee.

Ray served two terms as president of the Terra Bella Chamber of Commerce. He is a member of the Porterville Elks and the Knights of Columbus and has served the council as grand knight and district deputy. He is also a member of the Tulare County Century Club.

He was born in Ducor, Calif., July 9, 1917, and attended local schools. He was sophomore class president and student body president while attending Porterville High School.

Ray and his wife, Fanchon, have three children, two sons, one daughter, and six grandchildren. They live in Terra Bella.

Even in retirement from public life, Ray will remain a man of public consciousness.●

CONGRESSIONAL SALUTE

HON. ROBERT A. ROE

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 21, 1982

● Mr. ROE. Mr. Speaker, last month the residents of the city of Paterson, my congressional district and State of New Jersey joined together at a testimonial in commemoration of the 50th anniversary of the founding of the Society of Manufacturing Engineers and the presentation of its Gold Medallion Award to distinguished members of the manufacturing engineering industry whose dedication and devotion to improved productivity through manufacturing engineering techniques has truly enriched our community, State, and Nation.

Mr. Speaker, I am proud to boast that three of the recipients of this most highly coveted honor—the Gold Medalion 50th Anniversary Award of SME National Headquarters, Dearborn, Mich.—are from Paterson Chapter No. 102 which is located in my congressional district. I know that you and our colleagues here in the Congress will want to join with me in heartiest congratulations and best wishes to the honorees—distinguished citizens, community leaders, and good friends—as follows:

The honorable: Charles M. Bazaz of Paterson, N.J., Charles T. Dobbie of Pompton Lakes, N.J., and Paul Kaske of New Milford, N.J.

Mr. Speaker, the Society of Manufacturing Engineers since 1932, has been manufacturing's link to improved productivity through education. Their members stand at the forefront of rapidly advancing technologies in the most prestigious field of manufacturing engineering. SME affiliated organizations include:

Association of Finishing Processes, Computer & Automated Systems Association, North American Manufacturing Research Institution, Robot Institute of America, and Robotics International.

Charles M. Bazaz is a lifelong resident of Paterson and owner of the Charles M. Bazaz Machine & Tool Consultants Firm of Paterson, N.J. He organized SME's Northern New Jersey Chapter No. 14 in 1937 and is the only remaining charter member of the chapter. He volunteered and organized SME's New York City Chapter No. 34 with an initial membership of 25 enrollments which has since expanded into one of the largest chapters on the east coast.

Thirty years ago Charles Bazaz organized SME's Paterson Chapter No. 102 breaking a national, and still unbeaten, record in membership enrollment with 265 manufacturing engineers comprising the chapter.

Charles T. Dobbie, recently elected chairman of SME Paterson Chapter No. 102 is president and director of Karlo Manufacturing Co., Inc., of Wayne, N.J. His company designs/develops special manufacturing machinery, dies, jigs, fixtures, welded assemblies, component parts, stampings, precision sheet metal items, tube bending and general contract work. Products manufactured include photopolymer

processing machinery, add-on conventor fins and liquid level controls.

Paul Kaske is a leading and active participant in the business community of my district and his professional expertise as a cost estimator with the Kearfott Division of Singer Co. is applauded by all of us. As we all know, the Singer Co. is a prominent and highly respected manufacturing firm of national and international renown in the aerospace and marine systems industry.

Mr. Speaker, there is much that can be said about these gentlemen—the 50th anniversary honorees of SME, Paterson Chapter No. 102, but suffice it to say, as evidenced by the national recognition afforded them by our Nation's manufacturing engineers, they are in the vanguard in helping to improve our Nation's productivity during an era of rapidly advancing technologies. In this respect may I commend the following brief profile furnished me on the history of SME to you, as follows:

* * * Founded in 1932 by 33 Detroit tool engineers, SME's purpose has been "to advance scientific knowledge in the field of manufacturing engineering and to apply its resources to * * * disseminating information."

Originally the American Society of Tool Engineers, it was renamed the American Society of Tool and Manufacturing Engineers in 1960, and a decade later, to the Society of Manufacturing Engineers, reflecting manufacturing engineering's evolution.

These changes depict the growing sophistication of a technical society, now an international influence in the field, with over 60,000 members in 60 countries, most affiliated with SME's 220-plus senior chapters. The Society sponsors more than 90 university and college student chapters, as well.

In 1962 SME sponsored 32 Conferences and Expositons, plus Industrial Productivity Events, around the U.S. and abroad, in addition to some 100 clinics, workshops, and symposia. Numerous education courses were also offered.

SME's many publications include the monthly "Manufacturing Engineering," the bimonthly "Robotics Today," and the "Tool and Manufacturing Engineers Handbook."

Through mid-1982, SME's Manufacturing Engineering Education Foundation has distributed more than a half-million dollars in grants to over 70 universities and technical institutions. Since 1972, SME's Certification Institute has certified some 11,000 manufacturing engineers and technologists for their on-the-job expertise. * * *

Mr. Speaker, in reflecting upon the history of our great country and the good deeds of our people who have made our representative democracy second to none among all nations throughout the world, I appreciate the opportunity to call your attention to the golden anniversary celebration of the Society of Manufacturing Engineers and the outstanding achievements of the recipients of the SME 50th Anniversary Gold Medallion Award for distinguished service in the manufacturing engineering disciplines. We do indeed salute the Society of Manufacturing Engineers and their honorees: The Honorable Charles M. Bazaz, the Honorable Charles T. Dobbie, and the Honorable Paul Kaske of New Jersey.●

PLIGHT OF BLACK INSTITUTIONS IN THE 1980'S

HON. WILLIAM (BILL) CLAY

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 21, 1982

● Mr. CLAY. Mr. Speaker, just as our society has come to recognize the critical role black colleges have played in the development of our Nation, we see the future of these institutions in serious jeopardy. I would like to take this opportunity to commend to my colleagues an excellent report on this subject, "Plight of Black Institutions in the 80's," written by Dr. Willie J. Kimmons of Wayne County Community College in Detroit, Mich.

PLIGHT OF BLACK INSTITUTIONS IN THE 80'S

(By Dr. Willie J. Kimmons)

The historic role of Black colleges has been one of healing—healing through education one of the great injustices of history, and because such injustices persist, Black colleges still play a very significant role. Conditions show that Black colleges and universities are critical to higher education for Black and minority students, but at the same time, diverse forces are threatening to end their struggling but proud existence.

The Black college story is one of richness and depth, of poverty and service. The majority of these institutions were founded in the south before or shortly after 1900 for the newly freed Black Americans who had been forbidden education. For decades, these colleges were often the only source of higher education available to Blacks. Relationships with home communities ranged from good to downright hostile, even though the colleges worked hard to serve the community when they could. Budgets were lean, and their executives became expert managers of shortages. Their students often came to them underprepared by their high schools, and the faculty responded with dedication, accessibility and expertise.

Today, there are roughly 105 two- and four-year historically Black colleges and universities; about 40% are public and 60% are private. Of these, almost 20 are two-year colleges. About 85 are four-year institutions that offer a baccalaureate degree; some offer masters' and doctoral degrees as well. These figures are an estimate, since a college is considered historically Black if it was founded primarily for Black Americans and has been identified with serving Blacks for about two decades.

In spite of overwhelming odds, Black institutions of higher learning have exhibited a tenacious will to survive. Nevertheless, if these institutions are to survive meaningfully, they must make a realistic appraisal of their overall role and scope in light of the available resources to do the job. Only after such appraisal can these institutions get to the job at hand—the development of strategies for preparing Black people with the essential skills to govern and compete in the Black community and the American society at large. The Black college is involved in such appraisal now.

Historically, the Black educational institution has played a very vital role in the lives of Black and poor people in this country. Our institutions have developed some of the greatest minds this country has ever produced.

One of the reasons why we are able to do this is because a Black college provides a more comfortable, more agreeable setting for learning. One must bear in mind that what is learned is curriculum, and that curriculum, broadly defined, includes the whole set of collegiate activities, what has been termed "the total college experience." Many Blacks, particularly that type which prefers to attend Black colleges over white colleges, need these activities and that experience to reinforce their Black identity in a familiar environment.

Second, a Black college provides "special group-oriented transitional educational enclaves" which allow and foster personal and intellectual growth free of irritating or demeaning contact with whites. Some Black students need such an enclave more than others, of course, but the need in any event is genuine. As has been noted so perceptively, one of the uses of the university is to bring about a reconciliation of the past with the future. Then, for this type of student particularly, a Black institution of higher learning is best suited to build bridges from poverty and bitterness and failure to understanding and achievement.

Third, a Black college serves as insurance against a creeping recession of Black rights, as occurred in the post-Reconstruction period. Historically Black colleges help raise and/or maintain a high Black consciousness level.

Lastly, and perhaps most importantly, it has been asserted that a Black college provides creditable models for aspiring Black youth. Developing good, solid, honest, and positive role models has been one of the main reasons for our success and survival.

It is important that Blacks, particularly those from disadvantaged and oppressed backgrounds, see other Blacks managing important affairs, administering important enterprises.

The nation's historically black institutions of higher education have been producing leaders for their people and their nation for about a century, dating before the days of Booker T. Washington and W. E. B. DuBois, also graduates of Black institutions. Washington was educated at Hampton Institute; DuBois at Fisk University. These and other Black Americans who attended the Black colleges have become professionals and/or leaders in their communities.

Think of some of today's best known Black leaders. The honorable Thurgood Marshall, Julian Bond, Patricia Harris, Vernon Jordan, Jr., Reverend Jesse Jackson, Barbara Jordan, Andrew Young, Vice Admiral S. L. Gravely, Jr., Commander of the Third Fleet, U.S. Navy; William D. Bryant, Chief Judge, U.S. District Courts; Marion Barry, Mayor of Washington, D.C.; Dr. Jesse B. Barber, Jr., president of the National Medical Association; Ernest Morial, Mayor of New Orleans, Maynard Jackson, former mayor of Atlanta, Wade McCree, former solicitor general of the United States, and Dr. Lionel Newsome, Lincoln University, graduate, former national president of the Alpha PI Alpha Fraternity and he has been president of three (3) historically Black institutions.

Despite obstacles, the Black colleges have graduated men and women who have gone on to become leaders in America, to become doctors, judges, engineers, legislators and mayors. They have graduated people who have returned to their communities and enriched the lives of others.

Additionally, the attrition rate of Blacks in white institutions is higher than it is in the Black colleges. The historically Black colleges and universities still award a disproportionate percentage of the degrees earned by Blacks. Most physicians, dentists, lawyers and veterinarians who are Black received their degrees from historically Black institutions, although such Black professionals are severely underrepresented in the population. The Black colleges, then, remain a major national resource. They have been underfunded historically. They serve students who tend to come from poor families. They have learned how to care and how to help their students to care. They are a primary source of today's young professionals and tomorrow's leaders.

As the process of desegregation comes to some of the Black colleges, they ought to be able to proceed from a position of strength. Because of a variety of reasons, the number of white students is increasing every day. In order for Black institutions to survive the 80's, they will have to actively recruit more Black and minority students. Students that have not had relatives attending these institutions must be recruited as well as those who want to continue a family tradition. Despite the changing student population, the Black leadership must be maintained. We must maintain and increase the number of Black faculty administrative staff and members of the Board of Curators.

The challenge of the 80's is to preserve the institutions as one of the several avenues through which Black Americans can become educated. Other religious and racial groups have institutions of higher learning that reflect their culture, tradition, beliefs. Similarly Black colleges must be available for those who prefer it.●

IRA BELL

HON. HAROLD ROGERS

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 21, 1982

● Mr. ROGERS. Mr. Speaker, there is a void on the horizon today where once stood a tall and mighty pine—Ira Bell, of Monticello in my native Wayne County, Ky., died on Sunday, December 19, 1982. Today, I rise to pay tribute to this man I revere, a true prioneer in education for rural Americans. Ira Bell was born and reared in my home county in Kentucky where he served as superintendent of schools for 38 years. As superintendent in the early days of universal education, he rode horseback for weeks, visiting the hundreds of one-room schools which formed the basis of rural education in remote sections of the county. He experienced firsthand the difficulties rural Americans must overcome in order to obtain a quality education. This experience led Mr. Bell to lead the Nation in school consolidations. He was lauded as one of Kentucky's outstanding public school administrators.

Although Mr. Bell's presence in the community will be missed, his contributions will endure. Along with his wife, Julia, and his son, Harold Morton, I join friends and neighbors in mourning the passing of this great man.●

MX MISTLETOE CHEER

HON. JOHN L. BURTON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 21, 1982

● Mr. JOHN L. BURTON. Mr. Speaker, the enclosed article embodies the best tradition of Reaganism, that is, let every individual take up the slack caused by cuts in Federal spending especially during the holidays.

President Ron Wilson Reagan suggested that the more fortunate of our people, that is the 87½ percent working, should help out the 12½ percent who are not.

Instead of Government help, we should provide food for the hungry and presents for needy children as well as homes for the MX.

If, we as citizens, can provide homes for the MX maybe President R. W. Reagan will do something to provide homes for the 2,500,000 Americans who find themselves homeless during this second Christmas during the reign of Ron Reagan.

MX MISTLETOE CHEER

(By Art Buchwald)

Under the title "100 Neediest Families,"we are asking everyone who can possibly do it to take in one MX missile this Christmas. A cruel and unyielding House of Representatives has made MX missiles homeless during the holiday season. Originally they were supposed to be sheltered in a dense pack 20 miles long and a mile wide near Cheyenne, Wyo., in concrete silos. But the plan was vetoed and now the MX missile has no place to go.

The MX missile will not give you any trouble if you take it in your home. You can put it in your attic and just visit it once a day to see if it needs any fuel or water. It has 10 nuclear warheads on it, but you don't have to touch them, because they've already been targeted for someplace in the Soviet Union.

You might ask, "Why should I take an MX missile into my home?"

The reason is that the MX is a deterrent against first-strike aggression, and President Reagan says we need it as a chip in the nuclear arms talks in Geneva. Those of us who are blessed with so much should show the MX missile family that they are not alone during the happiest season of the year. How can anyone in this country enjoy the Christmas holidays when they are aware that there are hundreds of missiles who have no place to celebrate and no one to turn to on what should be a festive occasion?

We took an MX into our home last week. At first there was apprehension in the family. My wife asked nervously, "Suppose it goes off while we're having Christmas dinner?"

I assured her the missile would not go off unless someone in the White House pushed a button.

"I'll feel uncomfortable having a stranger in the attic," she protested.

"It may be a stranger when it first arrives, but before long it will be part of the family. You'll learn to love it. Besides, how can you enjoy your Christmas when you know there is an MX missile with tiny nuclear warheads to feed somewhere out there in the cold?"

The kids were very excited when I told them we were taking in an MX for Christmas.

"Can we play with it?" my son wanted to know.

"No, it's not a toy. It's the real thing."

"Does it have a joy stick on it?" my daughter asked.

"I'm not sure," I told her. "But even if it does, I don't think you should fool with it until I read the instructions."

"How do we get one?"

"I'm going to call the U.S. Air Force now," I said.

I placed a call to the Pentagon and told a colonel, "We'd like to take in an MX missile for Christmas, as we understand you have many who have no homes."

"Bless you," the colonel said. "We've had a hard time placing them during the holidays. We were afraid we'd have to keep them on the base. We'll have one delivered to your house tomorrow morning."

The next morning a two-ton Air Force truck arrived and the service personnel gingerly carried our MX guest up to the attic and positioned it so it would be aimed toward Europe.

"We'll come back for it after the holidays," the colonel said, "as we still haven't tested it. If you know anyone else who wants one for Christmas just give us a call."

I assured him I would.

After they were gone we all went up into the attic.

My daughter put a quilt on it because she was afraid it would get cold. My other daughter petted its nose. My son put warm milk next to it "in case the 10 nuclear warheads got hungry." My wife got into the spirit of things and decorated its fins with holly leaves.

The MX didn't respond in any way and seemed to be contentedly sleeping.

My daughter asked me, "Do MX missiles dream?"

"I'm sure they do," I told her. "I wouldn't be surprised at this very moment that it was dreaming of blowing up Leningrad."

We all tiptoed quietly downstairs filled with the spirit of peace and good cheer. By taking in a homeless MX missile during this holiday season we all had learned the true lesson of what Christmas is really all about.●

NOVEMBER 7—A DAY OF SORROW AND IRRECONCILABILITY

HON. DAN LUNGREN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 21, 1982

● Mr. LUNGREN. Mr. Speaker, it is important that we in the House of Representatives and this country take note that November 7, 1982, commemorated the 65th anniversary of the "October Revolution" when the

Bolshevik Communist Party deprived the people of Russia their liberty. Today, Soviet domination and influence has clearly grown to its largest proportions ever. As the oldest surviving democracy in the world, we can never forget those who have perished at the hands of communism nor can we forget those presently living under the yoke of communism. I share the concern of the Congress of Russian Americans and wish to insert into the CONGRESSIONAL RECORD the following statement written by the CRA Board of Directors.

A DAY OF SORROW

Since November 7, 1917 the Soviet government under the leadership of its Communist Party has continually perpetrated crimes that are an affront to humanity. Among them:

The creation of an Orwellian state founded on a basis of human fear and ignorance and maintained by a ruthless military police;

The "reedification" of the Russian peoples, a policy inaugurated by the heinous murder of the royal family and pursued in the hopes of stripping the Russian peoples of their heritage and thereby creating the ideal human cipher, Homo Sovieticus;

The desecration and destruction of over 50,000 churches and monasteries;

The forcible collectivization of peasants, an act which resulted in the death by starvation of seven million people;

The exploitation of workers and the reduction of peasants to the status of government serfs;

The abandonment of Soviet P.O.W.'s (branded "traitors" by the Soviet regime) in Nazi war camps, resulting in the death of 4,650,000 native sons by starvation and disease;

The forcible repatriation of Soviet citizens remaining in Western European countries after the war and the subsequent imprisonment of these citizens in concentration camps;

The extermination of tens of millions of people in concentration camps and prisons;

The mental and physical torture of countless millions without regard to human rights or dignities;

The military suppression of any popular uprisings within the Soviet Union or any of its satellite nations, particularly Hungary, Czechoslovakia, and Poland;

The creation, through the wanton exploitation of natural resources and environment, of an aggressive military machine which continues to grow at the expense of the people's needs and aspirations;

The suppression of the freedoms of religion, thought, speech and the press and the persecution of individuals for their religious convictions and their beliefs in basic human rights.

No document can enumerate the countless crimes perpetrated by the Soviet government against its peoples. Only the tears of an anguished and suffering people can serve to measure these atrocities. To these tears we direct our hopes, our prayers, and our actions.

The 7th of November, the day of pompous Soviet celebrations, parades and deceitful proclamations about the "struggle for peace" and about the "joyous life" of Soviet citizens, we designate as a Day of Sorrow and Irreconcilability.

This Day of Sorrow and Irreconcilability has been faithfully observed by Russian-Americans and by all Free Russians for the past six decades. Throughout all these years Russians free in mind and spirit have continually attempted to warn the Free World of the threatening Communist danger, but to no avail.●

COMPLETION OF THE VIETNAM VETERANS MEMORIAL

HON. DON BAILEY

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 21, 1982

● Mr. BAILEY of Pennsylvania. Mr. Speaker, I would like to include the text of the two resolutions which I introduced and which were passed by the House yesterday. They are, specifically, House Joint Resolution 636 and House Concurrent Resolution 437, and their contents, which deal with completion of the Vietnam Veterans Memorial, are as follows:

H.J. RES. 636

Joint resolution directing the completion of the Vietnam Veterans Memorial in West Potomac Park in the District of Columbia

Whereas many Vietnam veterans and veterans' organizations have expressed great concern that the design of the Vietnam Veterans Memorial in West Potomac Park in the District of Columbia as dedicated on November 13, 1982, honor and recognize appropriately the service and sacrifice of the men and women of the Armed Forces of the United States who served in Southeast Asia during the Vietnam war;

Whereas many individual veterans and veterans' organizations expressing such concern met with the Vietnam Veterans Memorial Fund, Inc. (the organization authorized by Public Law 96-297 to carry out the design and construction of the memorial), and reached an agreement in October 1982, concerning the memorial's final design;

Whereas the final design agreed upon and recommended by the Vietnam Veterans Memorial Fund, Inc. and the various veterans' organizations and other interested parties would provide for the placement of an American flag with an inscription at the point that is pointed at by the V-shape of the two intersecting walls of the memorial and is 40 feet from the apex of the walls on a line bisecting the apex and equidistant from the end of each wall and for the placement of a statue by Frederick Hart of three American servicemen of the Vietnam war on the same line at a point 170 feet from the apex of the walls of the memorial and facing into the V-shape formed by the walls; and

Whereas these two elements of the design complete the memorial as a fitting commemoration to the men and women of the Armed Forces of the United States who served in Southeast Asia during the Vietnam war: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of the Interior, the Commission of Fine Arts, the National Capital Planning Commission, and other pertinent parties shall follow the clear wishes of Vietnam-era veterans of the United States, veterans' service organizations, the Vietnam Veterans Memorial Fund, Inc., and other interested persons and parties and approve the Vietnam Veterans Memorial in West Potomac Park in the District of Columbia to include the flag and inscription and the statue as agreed upon, submitted, and recommended in October 1982 by these organizations and interested persons and parties.

H. CON. RES. 437

Concurrent resolution expressing the sense of Congress concerning the completion of the Vietnam Veterans Memorial in West Potomac Park in the District of Columbia

Whereas many Vietnam veterans and veterans' organizations have expressed great concern that the design of the Vietnam Veterans Memorial in West Potomac Park in the District of Columbia as dedicated on November 13, 1982, honor and recognize appropriately the service and sacrifice of the men and women of the Armed Forces of the United States who served in Southeast Asia during the Vietnam war;

Whereas many individual veterans and veterans' organizations expressing such concern met with the Vietnam Veterans Memorial Fund, Inc. (the organization authorized by Public Law 96-297 to carry out the design and construction of the memorial), and reached an agreement in October 1982, concerning the memorial's final design;

Whereas the final design agreed upon and recommended by the Vietnam Veterans Memorial Fund, Inc. and the various veterans' organizations and other interested parties would provide for the placement of an American flag with an inscription at the point that is pointed at by the V-shape of the two intersecting walls of the memorial and is 40 feet from the apex of the walls on a line bisecting the apex and equidistant from the end of each wall and for the placement of a statue by Frederick Hart of three American servicemen of the Vietnam war on the same line at a point 170 feet from the apex of the walls of the memorial and facing into the V-shape formed by the walls; and

Whereas these two elements of the design complete the memorial as a fitting commemoration to the men and women of the Armed Forces of the United States who served in Southeast Asia during the Vietnam war: Now, therefore, be it

Resolved by the House of Representatives (the Senate concurrring), That it is the sense of Congress that the Secretary of the Interior, the Commission of Fine Arts, the National Capital Planning Commission, and other pertinent parties should follow the clear wishes of Vietnam veterans of the United States, veterans' service organizations, the Vietnam Veterans Memorial Fund, Inc., and other interested persons and parties and approve the Vietnam Veterans Memorial in West Potomac Park in the District of Columbia to include the flag and inscription and the statue as agreed upon, submitted, and recommended in October 1982 by these organizations and interested persons and parties.●

VETERANS' REFLECTIONS ON THE DEDICATION

HON. GEORGE MILLER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 21, 1982

● Mr. MILLER of California. Mr. Speaker, several weeks ago, millions of

citizens throughout this Nation shared a special experience—the dedication of the Vietnam Veterans Memorial in Washington. For many Americans, and especially for many of those who served their country in that war but who received no gratitude for their sacrifices, this ceremony marked the end of a tragic and controversial national experience.

Art McGowan is a good friend of mine who has worked with my Veterans' Advisory Committee and with whom I have consulted on veterans' matters over the last 8 years. Art is also a former captain in the Army, a Vietnam veteran, who has won many service decorations, including the Distinguished Service Cross. Art currently serves as senior vice president and director of egion 6 of the United Vietnam Vet..ans' Organization, which he helped to organize.

Art attended the recent dedication ceremonies for the Vietnam Memorial and has written a very personal and moving account of his feelings that day. I would like to share his article with Members of the U.S. Congress.

VETERANS' REFLECTIONS ON THE DEDICATION

(By Art McGovern)

The emotional highlights of the Vietnam Veterans Memorial Dedication replaced years of painful memories about the war.

Military heroism, valor and sacrifice in Vietnam are being honored today in America for the first time.

These ceremonies also marked the start of a new life for each of us, one dedicated to those who fell before this tribute. In the past our lives had not always matched the standard that they died for. Now we all have something to honor once again.

Each milestone of our dramatic week in the capital filled our hearts with bright, shining moments of joy, and the special kind of inner peace that most believed to be lost forever.

The warmth of our sentiments toward this historic experience reflects the intensity of our commitment to change our lives.

Veterans of that war may no longer use "Vietnam" to excuse personal failure; henceforth it must stand instead for a special source of strength, testing, and personal growth.

At the stirring grand opening of the DAR's annual patriotic concert in Constitution Hall, we surprised ourselves when the strong clear voices of our combat veterans chorus rang out over those of the Service academies, the audience and the great military bands of Washington.

Saturday's parade brought us the moving sight of thousands of tear-streaked faces, tightly clutched flags, and heartfelt greetings, showing the emotional costs of every war, and the residue of bitterness from the long tragedy in Vietnam. Still, the sheer joy shown toward our singing made us feel we expressed everyone's emotions.

Each of us began believing we had reached that moment not by luck, but by destiny. We all felt it, passing beneath the huge flag at the White House, singing "America, America . . ."

That enormous, glorious banner over Constitution Avenue seemed even larger as we approached.

Our final march together, the few hundred yards after we left the float, brought forth all our feelings, our prayers, and a vivid sense that we had finally made it home.

After the dramatic week of events leading up to the stirring parade down Constitution Avenue, the simple new Memorial might well have been overshadowed. It wasn't.

The "Wall" comes as a shock no matter how well you prepare for it. The 65 shining black panels, each displaying up to 1,200 names, roughly matches the months of big-unit U.S. combat during the war. The painfully long lists of names intensifies the sense of American sacrifice and loss in Vietnam. Americans seeing this may pause before blaming fighting men for the consequences of political expediency and a domestic failure of moral conviction.

I couldn't believe all the names. In some places whole units and battles appeared, showing the cost of the war in endless columns of faceless names of 19.4-year-old soldiers.

Looking warily at each of the ruler-sized names carved on the wall, as an infantryman who survived thanks to no special skill, I kept expecting to find my own name up there, 58,000 times.

But something good happened for these fallen comrades last week. Although they have been gone for a decade or more, all Americans now can see the impressive scale of their sacrifice for us.

Our moments at the Memorial constituted the most intense mourning of our lives. Despite the mud, the rain, the public and the media, that time stands out in all our memories.

Looking back at our strength and emotion, poured out at the monument, creates a deep sense of pride. We found the humility to mourn together and express our feelings under the most critical emotional circumstances.

This healing ritual in Washington made me proud to be an American, and helped me feel like one.

The men who spoke during our appearances deserve recognition for real moral courage. They delivered messages of love, pride, and humility when other words and feelings might have pleased some of the crowds even more.

Fred Gusman our VA program director, inspired us with his professionalism and sense of caring as he and his staff gently guided each of us through these emotional events.

We came to believe our role in these events had nothing to do with luck. I don't believe in it anymore; our lives mean more than that. No one of us ever thought he would represent his outfit and his buddies in such a heartwarming tribute to the living and the dead. Our experience came to feel like a matter of Providence that began the day that we survived when others were lost. Now, however, we can finally put these feelings to rest.

Each of us left pain and resentment behind in Washington. We did this not only to honor the fallen, but also as an offer of good faith, to help reunite all Americans. We hope our small act helps other Vietnam veterans put aside their painful memories and their isolation, to begin the healing process of coming home. Last week they became part of our national history. Now is the time to live for today and look toward tomorrow.●

A REMINDER OF GEORGE WASHINGTON'S FAREWELL ADDRESS AND HIS WARNING AGAINST "PASSIONATE ATTACHMENTS" TO PARTICULAR FOREIGN COUNTRIES

HON. PAUL N. McCLOSKEY, JR.

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 21, 1982

● Mr. McCLOSKEY. Mr. Speaker, in leaving this treasured institution after 15 years, I thought my colleagues might permit me a farewell argument to urge, as George Washington did nearly two centuries ago, that the United States avoid "passionate attachments" to particular foreign governments.

Washington in his famous Farewell Address, at the end of a third of a century of public service, having served 8 years as commander of our Revolutionary Army and 8 years as our first President advised us against undue foreign entanglements.

The Father of our Country put it this way:

A passionate attachment of one nation for another produces a variety of evils. Sympathy for the favorite nation, facilitating the illusion of an imaginary common interest, in cases where no real common interest exists, and infusing into one the enmities of the other, betrays the former into a participation in the quarrels and wars of the latter, without adequate inducements or justifications. It leads also to concessions, to the favorite nation, of privileges denied to others, which is apt doubly to injure the nation making the concessions, by unnecessarily parting with what ought to have been retained, and by exciting jealousy, ill will, and a disposition to retaliate in the parties from whom equal privileges are withheld; and it gives to ambitious, corrupted or deluded citizens who devote themselves to the favorite nation, facility to betray or sacrifice the interest of their own country, without odium, sometimes even with popularity; gilding with the appearances of a virtuous sense of obligation, a commendable deference for public opinion, or a laudable zeal for public good, the base or foolish compliances of ambition, corruption, or infatuation . . .

Against the insidious wiles of foreign influence. (I conjure you to believe me fellow citizens,) the jealousy of a free people ought to be constantly awake; since history and experience prove, that foreign influence is one of the most baneful foes of republican government. But that jealousy, to be useful, must be impartial, else it becomes the instrument of the very influence to be avoided, instead of a defense against it. Excessive partiality for one foreign nation and excessive dislike for another, cause those whom they actuate to see danger only on one side, and serve to veil and even second the arts of influence on the other. Real patriots, who may resist the intrigues of the favorite, are liable to become suspected and odious; while its tools and dupes usurp the applause and confidence of the people, to surrender their interests.

The great rule of conduct for us, in regard to foreign nations, is, in extending our com-

mercial relations, to have with them as little political connection as possible. So far as we have already formed engagements, let them be fulfilled with perfect good faith:—Here let us stop.

This advice of 1796 seems eminently sound today. Within our lifetimes we have seen countries who were our enemies become our friends, and vice versa. Witness Japan, China, the Soviet Union, for example.

As of yesterday, however, we in Congress seem to have forgotten Washington's admonition. Yesterday, overriding a foreign policy pursued by five Presidents, Congress has reflected a passionate attachment to a single foreign nation, the State of Israel.

Yesterday, in our omnibus continuing resolution, overriding President Reagan's objections, we voted more money in grants and loans to this small and powerful nation of 3½ million people than we have for any of the impoverished or underdeveloped nations of the rest of the world, a world where more than 3 billion people are estimated to live in poverty.

At a time of economic hardship and high domestic unemployment, we voted more money per capita to each Israeli than we allow to many of the poor and unemployed in our own country.

In our continuing resolution, nearly $2.5 billion is allocated to Israel, $785 million in economic aid and $1.7 in military assistance loans. Of these loans, we immediately forgive $750 million, a figure $250 million more than President Reagan requested.

We do this despite the fact that within the last 6 months, Israel has deliberately violated solemn agreements with the United States which prohibited Israel's use of U.S.-supplied weapons for offensive purposes and which prohibited Israel's use of cluster bombs in civilian areas such as West Beirut.

We voted these incredible sums of money despite the fact that the lives of U.S. marines are placed at risk in Lebanon today because Israel, in September, violated solemn assurances to the United States that it would assist in protecting the safety of Palestinian women, children, and noncombatants whose safety had been guaranteed by the United States as a condition of obtaining PLO withdrawal from West Beirut.

In voting this money, we demonstrated that Congress has a passionate attachment to Israel so great that we are willing to seriously weaken, if not destroy, the efforts of both President Carter and President Reagan to obtain autonomy for the Arabs residing in the Palestinian mandate territory called the West Bank, occupied by Israel since 1967. We turn our back on U.N. Resolution 242 requiring Israeli withdrawal from all or most of the West Bank, and upon the Camp David agreements which, in three separate places specifically require Israel to accept the withdrawal from occupied territories which was the very basis of Camp David.

It is less than 5 years ago, September 1978, that Israel signed the Camp David agreement.

That same year, the U.S. State Department formally advised Congress that the new Israeli settlements on the West Bank were illegal in that they violated the Geneva Convention prohibiting an occupying country from settling its citizens permanently in occupied territories.

Israel had signed the Geneva Convention just as she had signed Camp David. Yet in creating new settlements and in asserting a claim of sovereignty to the West Bank, Israel is violating both agreements. There is no legitimate way to argue that the Camp David agreement, specifying, as it does, that it is based upon "Resolution 242 in all of its parts," does not require ultimate Israeli withdrawal from most, if not all, of the West Bank.

Yet Israel now moves to both rapidly create new settlements and to claim absolute sovereignty over what earlier it conceded was "occupied territory."

In voting forgiveness of Israel's indebtedness in an amount $250 million more than President Reagan asked, we only strengthen Israel's resolve to defy the United States position on the West Bank.

We likewise violate George Washington's famous admonition.

One might well ask, under these circumstances, why Congress acts to overrule the President and actually increases aid to Israel.

The answer, of course, is quite simple.

Congress continues to respond to a special interest in this country which is so strong that, as Prime Minister Begin has said, "Washington quails before it."

That special interest is perhaps best recognized as the Conference of Presidents of Major Jewish Organizations, headquartered at 515 Park Avenue, New York, N.Y. The American Israel Public Affairs Committee, (AIPAC), is the conference's lobbying arm. AIPAC claims in its literature that the presidents of the major U.S. Jewish organizations are all on its governing board.

The conference's most recent position was stated in a letter from its chairman, Julius Berman, to the editor of the New York Times magazine published Sunday, December 12.

Mr. Berman stated that the consensus of the conference—which he believed was also the view of "most American Jews who are not affiliated with any Jewish organization" included:

The idea that Jews should be barred from living in Judea and Samaria (the "West Bank") is anathema;

Israel's settlements in these territories are neither illegal nor in violation of the Camp David peace process;

Israel's security depends in large part on a ring of civilian and military outposts in the West Bank to protect the country's narrow waist.

Mr. Berman closes:

I believe these are the views of the overwhelming number of Israelis as well as American Jews.

In taking this position, Mr. Berman and the 36 major national Jewish organizations in America make it clear that they are opposing the key element of President Reagan's Mideast peace initiative, the freeze on settlements, and are instead supporting the position of Begin. This is their right under our system of government. It is understandable that American Jews have the same passionate attachment to Israel that Washington warned that the United States, as a country, should not have. It is also understandable that AIPAC would lobby us, as it did earlier this year, to forgive Israel its indebtedness to the United States.

It is not so understandable, however, that Congress should accept the views of the organized American Jewish community and forgive Israel's indebtedness to the United States at this particular time in history.

Israel is no longer behaving like a friend of the United States.

Israel is a foreign country we have supported through thick and thin and through five wars since its founding in 1948. I do not suggest that we should withdraw that support, but I do suggest that it is time we draw some reasonable lines. We should not support any country which deliberately violates agreements. If Congress bows to a single pressure group on a serious matter of foreign policy of this kind, we ourselves open up what James MacGregor Burns called Democracy's Exposed Flank, the inability of Congress to resist special interest lobbying on crucial foreign policy issues.

This is no ordinary special interest lobby issue.

Israel has not signed the Nuclear Non-Proliferation Treaty. Israel possesses nuclear weapons, but claims and has exercised the right to destroy civilian nuclear powerplants of other countries merely because of the alleged danger that those plants might be used to create nuclear materials at some distant time. Israel is no longer a friend and ally upon whose word or agreement we can rely.

If our passionate attachment to Israel continues, we might well consider the possibility that Israel's current antagonism toward President Reagan's peace initiative could lead to a nuclear war in the Mideast, a nuclear war into which the United States and the Soviet Union could be drawn, a war which could end civilization as we know it.

For these reasons, it seems worthwhile, on this, hopefully the last day of the 97th Congress, to urge that the words of the Father of our Country, George Washington, be accepted as far wiser and sounder than the words of American Jewish leaders to the contrary.

Only a few months ago, the New York Times reported Israeli's Defense Minister, Ariel Sharon, as having gathered U.S. Jewish leaders together at a new West Bank settlement and exhorted them to back up Israel's position when they returned home. "We are counting on you," Sharon reportedly said.

Is not this "the insidious wiles of foreign influence" against which Washington warned?

Last week the members of one "major" Jewish organization voted to oppose the Begin administration's West Bank settlement policy. They were "overruled" by their chairman on the ground that the organization was "not entitled to oppose any policy of the State of Israel."

Should such organizations have weight in congressional decisionmaking?

Or should we not return to George Washington's principle?

A passionate attachment of one nation for another produces a variety of evils . . .

So far as we have already formed engagements, let them be fulfilled with perfect good faith:—Here let us stop.●

JOHN ROUSSELOT

HON. CHALMERS P. WYLIE

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 8, 1982

● Mr. WYLIE. Mr. Speaker, it is with regret that I contemplate the beginning of the 98th Congress without the presence of JOHN ROUSSELOT. I had the privilege of serving on the Banking Committee and the Joint Economic Committee with JOHN.

He is, without a doubt, one of the most tireless workers among all the Members of Congress. He is resourceful in the many ways he goes about getting his viewpoint across and is articulate and informed in debate. JOHN has, indeed, performed a valuable service for his party, his district, and his nation.

In addition to all these remarkable attributes, it can never be said that JOHN was one to hide his light under a bushel, which rendered him the more effective in seeing that the laws which were enacted were carefully considered.

Beginning in the 91st Congress, JOHN and I collaborated on trying to get a balanced budget law passed. He offered amendments which I supported, and I offered amendments which he supported. His dedication to less Government spending, less regulation, and a sound fiscal policy did contribute to the development of the process of bringing Government spending under control.

His presence will be missed by all of us. Marjorie joins me in wishing for JOHN and Vyonne much happiness, knowing that they will continue to contribute to the democratic process in a Republican way.●

CONTINUING APPROPRIATION

HON. JAMES M. JEFFORDS

OF VERMONT

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 21, 1982

● Mr. JEFFORDS. Mr. Speaker, I would like to bring to the attention of the Members a provision of the continuing appropriations resolution conference report that may have escaped their attention. In an extremely important action for States which consume a large amount of oil, the Congress agreed to a provision which states that the Department of Energy must make available up to $200 million to States from funds collected in oil overcharge cases for energy conservation activities and low income fuel assistance.

For the last several weeks, I have been adding cosponsors to a resolution I introduced urging this course of action. To date, 30 of my colleagues have cosponsored House Resolution 634. In my view, these funds should first be used for restitution, so that those who can be precisely identified as having been injured by overcharges can be compensated. However, this precise restitution is not possible in many cases, so a formula that approximates restitution is desirable for the rest of the funds.

The language of the continuing resolution states that the funds made available to the States shall be used for low-income fuel assistance, weatherization, the schools and hospitals program, the Energy Extension Service and State energy planning. None of the funds can be used for administrative costs or for providing State matches for Federal funds, These funds should be considered as a supplement to, not a replacement for, existing appropriations.

Distribution of the funds is to be made according to the amount of oil and gasoline consumed within a State between 1973 and 1980. From my preliminary discussions with the Department of Energy, it appears that the States should receive this money in the next few months.

I am very pleased that we have agreed to this approach. Energy prices continue to rise despite the recession, and it is important that we help those who cannot afford to pay their heating bills or make conservation improvements in their homes.●

TED HENSHAW

HON. ROMANO L. MAZZOLI

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Monday, December 20, 1982

● Mr. MAZZOLI. Mr. Speaker, I would like to extend my appreciation and thanks to Ted Henshaw for the invaluable service he has given as Clerk of the House. Over the years Ted has served diligently and conscientiously in this position and has kept things running on course.

I wish him much success for the future and extend my thanks for a job well done.●

TRIBUTE TO THE HONORABLE MARGARET M. HECKLER

HON. GLENN M. ANDERSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 16, 1982

● Mr. ANDERSON. Mr. Speaker, I am both pleased and sad to rise today in tribute to my good friend and colleague from Massachusetts, MARGARET HECKLER. I am sad because, I, and I am sure, all of us in the House will miss her presence here. I am pleased, however, to be able to take this opportunity to congratulate her on her 16 years of public service in the House; 16 years in which PEG brought to the House and everywhere she went beauty, grace, and dignity.

I have admired PEG HECKLER as a friend and as a professional for many years. PEG has been a very effective legislator throughout her years in the Congress. She has secured substantial benefits for this Nation's veterans. She has very effectively promoted women's rights. And, she has successfully represented her constituents in Massachusetts' 10th Congressional District with great energy and skill, as her eight terms in Congress attests. I am sure that I am not alone when I say that the gentlelady from Massachusetts has garnered great respect from her colleagues of both parties during her congressional career.

Mr. Speaker, I consider it a pleasure and a privilege to have been able to work with PEG. I would like to say that I believe the new Members who will be coming to the House in January when the 98th Congress convenes could do no better than to use PEG HECKLER'S work and distinguished record in Congress as a model for their efforts as Members of the House of Representatives in the 98th Congress.

Mr. Speaker, though I am saddened by the imminent departure of our dear

colleague, PEG HECKLER, I am quite confident, and I take a measure of comfort from knowing, that whatever she decides to pursue in the coming years, PEG will most certainly achieve the successes that she has in Congress. So, my wife Lee joins me in wishing PEG, her husband John, and her lovely children, John Jr., Belinda, and Alison good health and good fortune in the years ahead.●

THE COLTRANES IN AMERICAN AND WORLD MUSIC

HON. JOHN CONYERS, JR.

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 21, 1982

● Mr. CONYERS. Mr. Speaker, the Coltrane name is a very special one in the world of music. In the late 1940's, it first came into prominence with the emergence of John Coltrane, the extraordinary and unique jazz musician, composer, and saxophonist. After a tour with the Navy Band, Coltrane pursued a series of remarkable collaborations with Dizzy Gillespie, Earl Bostic, Johnny Hodges, Miles Davis, Thelonius Monk, Red Garland, and Donald Byrd.

In the biography, "Chasin' the Trane: The Music and Mystique of John Coltrane," J. C. Thomas writes:

> Just as Charlie Parker stood astride the jazz world of the late 40's and 50's, so did John Coltrane in the late 50's and the 60's. Trane was a giant of the saxophone * * *. There was a mystical quality, a profound melancholy that emanated from this quiet, self-contained man that moved listeners, some of whom knew little of music but heard something beyond music's boundaries from the sounds his saxophone created. Many even had their lives changed as a result.

John Coltrane was an architect of progressive jazz, whose musical genius exerted enormous influence on classical, spiritual, and rock music as well. He transformed the saxophone into a premier instrument of jazz and spellbound his audiences. A student of Eastern cultures and music, he welded together the harmonies of East and West. Among his great compositions are: Africa, After the Rain, Alabama, Bessie's Blues, My Favorite Things, Naima, Softly as in a Morning Sunrise, and Soul Eyes. Coltrane was the quintessential musician, always inventing new harmonies, probing sounds, exploring new motifs, and sharing his vision with enraptured audiences. Trane died in 1967, and left a precious legacy in his recordings.

John Coltrane's wife and musical collaborator, Alice McLeod, shared the remarkable gifts of composing and performing. As a young girl growing up in Detroit, Alice studied the piano and organ, and immersed herself in music theory. Later, she performed actively in churches and schools throughout the city, and became organist at the Mount Olive Baptist Church. The Coltranes together shared a deep involvement in Eastern religions and philosophies. They introduced many Eastern motifs in American music, performed together in concert halls throughout the world, and sponsored musical education.

Alice Coltrane's compositions reflect a deep involvement in religious and spiritual concerns, reflected in her inspirational music, recorded for ABC Records, and the devotional chanting and orchestral pieces recorded for Warner Brothers Records. Her music has evolved into a spiritual language of great influence.

The Coltranes raised three sons and a daughter: John, Jr., Ravi, Oranyon, and Michelle. All have engaged in musical life. Tragically, John, Jr., who was pursuing a remarkable musical career of his own on the bass, was killed this summer in an automobile accident near his home in Los Angeles. He and his mother had just performed a concert together at U.C.L.A.

John and Alice Coltrane have contributed enormously to the musical spirit in America and the world, setting a standard of artistry that few have excelled. Their music, indeed, changed and expanded our lives, and we are profoundly grateful.●

RICHARD WHITE

HON. EDWARD J. DERWINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Friday, December 17, 1982

● Mr. DERWINSKI. Mr. Speaker, I could not let this session close without saying a few words about the distinguished gentleman from Texas, RICHARD WHITE. DICK has represented the 16th Congressional District of Texas since 1965 and has been a great asset to this body.

Although we have been on opposite sides on the aisle, I have always considered DICK a friend, and a man who would leave partisan motives aside when considering the best interests of the country.

A man of integrity, dedication, and personal warmth, DICK has brought honor to this institution. I was privileged to have served with DICK on the House Post Office and Civil Service Committee, and his solid record of accomplishment in the areas of postal and civil service legislation were highly regarded by all of us on the committee.

DICK has always been one of those wonderful people who is easy to get to know and to work with, and his judgment and expertise have always been adhered to and valued by his colleagues.

I wish DICK the very best in the years ahead, and want him to know that his achievements will long be remembered. It was a privilege to have served with him.●

TOBY MOFFETT

HON. NORMAN Y. MINETA

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 14, 1982

● Mr. MINETA. Mr. Speaker, I am proud to honor my colleague, Representative TOBY MOFFETT. We entered Congress together 8 years ago, and since then, I have watched TOBY work as an outstanding legislator and public servant.

Consistently, TOBY has worked to improve our Government. When we entered Congress in 1972, TOBY played a crucial role in organizing our freshmen class of Representatives and in establishing orientation seminars. He then proceeded to operate effectively as an advocate of consumer interests, environmentalism, and peace.

TOBY's dedication and talent quickly earned him a leading role as chairman of the Energy, Environment and Natural Resources Subcommittee, and TOBY used the position to spur conservation and to check the abuses of power. TOBY instituted conservation policies and fought the administration when it sought to scar our environment for short-term gains.

At the same time, TOBY protected American citizens from several hazards. In international affairs, TOBY was an early supporter of legislation mandating a nuclear freeze, and in the domestic arena, TOBY was a champion of strict safety standards. Whether he was working to reduce the risk of nuclear holocaust or checking to see that our water remained uncontaminated, TOBY was a guardian of the public interest.

In a system where people are too often comforted by the tonics of mutual approval, consensus, and tradition, TOBY had nerve enough to criticize, dissent, and reform. Facing overwhelming odds, he often managed to effect change, and even where TOBY fell short of full success, ethical hindsight has reflected far better on him than on his opponents.

Today, I thank TOBY for his statesmanship, his courage, and his friendship, and I wish him the best of luck.●

BEST WISHES TO TED HENSHAW

HON. JACK BROOKS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Monday, December 20, 1982

● Mr. BROOKS. Mr. Speaker, Ted Henshaw has served the House long and well in a variety of positions. First with the Democratic Congressional Campaign Committee and then with the Clerk's office, he has performed his duties with skill and dedication. We in the House are fortunate to have such loyal, able officers as Ted Henshaw to help us carry out our responsibilities and he will be sorely missed in the next Congress.

We have all been sorry to see Ted slowed by illness recently and I hope he will recover his health in retirement and enjoy a full and active life for many years to come. My best wishes go with him.●

CAP HOLLENBECK

HON. WILLIAM J. HUGHES

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 14, 1982

● Mr. HUGHES. Mr. Speaker, I would like to take a few moments to pay tribute to my good friend, CAP HOLLENBECK, who unfortunately, will not be with us when we reconvene in January.

Since his election to Congress in 1976, CAP has represented New Jersey's Ninth District with the highest level of competence and legislative ability, distinguishing himself as one of the House's outstanding spokesmen for the advancement of the Northeastern States. Throughout his 6 years of dedicated service here, CAP has maintained the courage of his convictions, never hesitating to do what he truly believed to be best for his constituents and his country, regardless of partisan pressure or current public opinion.

I am honored to call CAP HOLLENBECK my friend, and deeply saddened by his departure. His genuine warmth and outgoing personality will be greatly missed by all who worked with him here and will, I feel certain, insure his success and happiness in future endeavors.●

HIGH LEVEL WASTE BILL

HON. MANUEL LUJAN, JR.

OF NEW MEXICO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 21, 1982

● Mr. LUJAN. Mr. Speaker, I am pleased to support adoption of the pending legislation. I wish to comment briefly on section 121 of the bill, the section providing for EPA standards and NRC regulations pertaining to nuclear waste repositories. We clearly intend thorough and adequate Federal regulation of repositories to protect the public health and safety and the environment under this section. However, some further comment on how this should be accomplished is in order.

Mr. Speaker, there is no such thing as a zero-risk technology. This is especially true in the case of atomic energy technology, because radiation, which is toxic at high dosages, is usually assumed for regulatory purposes to be proportionately toxic even at minute dosages, despite a lack of affirmative evidence to establish that fact. Given the usual employment of this conservative "linear nonthreshold" assumption, the only means to guarantee zero-risk is to eliminate all radiation exposures, no matter how small. This exercise would be incredibly expensive not only in terms of the direct cost of accomplishment but also in terms of foregone benefits from allowing wider use of atomic energy technology on less restrictive terms.

Since zero-risk is simply not feasible, standards and regulations must be set through some kind of comparative analysis and balancing. Unless this is done, the regulatory requirements will be totally arbitrary. The three most useful tools for achieving supportable and nonarbitrary requirements are comparative risk analysis, balancing of costs and benefits, and cost-effectiveness analysis.

Comparative risk analysis basically entails placing risks in perspective. This has three dimensions. First, the risks should be compared to the risks which we commonly and ordinarily incur. For example, it makes no sense to concern ourselves with risks so remote that they will occur, if at all, only as frequently as the risk of being struck by lightning or of encountering other natural catastrophes. Many experts believe that risks in the neighborhood of 1 in 100,000 or even greater are essentially de minimis. Second, the risks should be compared to the risks which we incur from alternative technologies. Obviously it makes no sense to regulate one technology so stringently that people are forced to rely on an alternative but more risky technology. Any such action would be counterproductive and would increase rather than decrease overall societal risk. Third, in the case of radiation, which is always present in our environment, the risk should be evaluated against the risks atttributable to other sources of exposure, including natural background. It serves no purpose to further minimize a source of exposure if that source is a relatively minor increment against background or other sources. In short, regulatory agencies must employ comparative risk analysis in setting their standards and requirements in order to fashion supportable, nonarbitrary and meaningful regulations.

Balancing of costs and benefits has varying degrees of refinement, ranging from full-scale cost-benefit analysis and optimization to efforts to assure that the costs imposed by regulations bear a reasonable relationship to the benefits derived. Some form of balancing is clearly in order to prevent the imposition of requirements whose costs are so great in comparison to their expected benefits that they are totally arbitrary. For example, it makes no sense to require an expenditure of $10,000,000 to address a remote risk of, say, 1 in 100,000 per person. If we spent this amount on such remote risks, we would quickly run out of money and have nothing to show for it. Indeed, we would be worse off because of the lower standard of living caused by the unsupported diversion of funds. In sum, regulatory agencies must engage in some balancing in setting their requirements lest society wind up the loser. Ideally, the balancing in question should take the form of a rigorous cost-benefit approach. However, in some instances this may not be possible and, in such cases, a less stringent analysis designed to assure a reasonable relationship is appropriate.

Cost-effectiveness analysis is generally employed once basic regulatory goals have been set. Basically it is used to determine the least expensive means to attain a goal—a goal which should have been set on the basis of comparative risk and balancing of costs. Choosing the least expensive path to a particular goal makes obvious sense because it guards against a clear and needless waste of society's efforts and resources. I know of a no valid argument in opposition to general use of the cost-effectiveness approach.

It is worth emphasizing that balancing of costs and benefits and cost-effectiveness analysis should be distinguished from cost-feasibility analysis. A cost-feasibility analysis in essence asks only whether money is available to pay for a requirement without bankrupting the Government or an industry. Although clearly an agency bears a heavy and almost always insurmountable burden in justifying economically infeasible requirements, a determination of cost feasibility is no substitute for, and no excuse for failure to engage in, a proper analysis of costs and benefits and a proper determination of the least cost approach to attain a particular goal.

Mr. Speaker, comparative risk analysis, balancing, and cost-effectiveness analysis should all be used in the context of formulating regulations for the nuclear waste repositories authorized under this bill, just as they should be

for other Atomic Energy Act activities. Failure to employ these three tools will result in imposition of arbitrary regulations to the detriment of taxpayers, utility ratepayers and the health and safety of the public. In sum, EPA and NRC should employ these approaches in discharging their duties under this legislation and under the Atomic Energy Act. Such is my intent in sponsoring and in voting for this bill.

HOUSE OF REPRESENTATIVES,
Washington, D.C., December 15, 1982.

Hon. HERMAN E. ROSER,
Assistant Secretary for Defense Programs (DP-1), U.S. Department of Energy, Washington, D.C.

DEAR HERMAN: As you know, final action by Congress on the nuclear waste bill is expected in the next few days. The bill provides a framework for siting, constructing and operating nuclear waste repositories. As part of that framework, the bill provides for issuance of standards by the Environmental Protection Agency and more detailed requirements by the Nuclear Regulatory Commission. I would appreciate your personal views concerning the factors the agencies ought to consider or the approaches which they ought to employ in discharging their obligations in this regard.

Sincerely,

MANUEL LUJAN, JR.

DEPARTMENT OF ENERGY,
Washington, D.C., December 16, 1982.

Hon. MANUEL LUJAN, JR.,
House of Representatives, Washington, D.C.

DEAR MANUEL: Thank you for your letter of December 15, 1982, requesting my views concerning the factors which should be considered and the approaches which should be employed in devising standards and requirements for nuclear waste repositories.

As you know, the Department of Energy (DOE), the Nuclear Regulatory Commission (NRC), and the Environmental Protection Agency (EPA) all operate under the basic guidance of the Atomic Energy Act that atomic energy activities should be so conducted and so regulated to protect the public health and safety. We are operating our facilities safely and effectively under this authority. Future high-level waste repositories are subject to regulation as provided by law. Regulatory requirements should be directed to the basic goal: protection of public health and safety. We firmly believe that nuclear waste facilities can be sited, constructed, and operated in a fashion which is safe, efficient, and fully protects the public health and safety and the environment from all significant hazards, whether radiological or non-radiololgical.

It is useful, however, to briefly clarify the basic approaches which should be employed in arriving at standards and requirements. First, we believe that regulatory goals should be set through appropriate use of comparative risk analysis. As we stated to the General Accounting Office (GAO) with respect to the development of radiation standards for decommissioning activities, Federal standards and requirements should be "realistic and balanced with consideration of risks and costs accepted by society for non-nuclear activities." The GAO agreed with that assessment (GAO, Cleaning Up Nuclear Facilities—An Aggressive and Unified Federal Program Is Needed 65-66, 1982). We also believe that the risks associated with radiation from atomic energy activities should be evaluated against the risks associated with exposure to natural background radiation. It makes no sense to impose costly controls to minimize an incremental exposure which is trivial in comparison to natural background.

Second, we feel that EPA and NRC regulations should be cost justified. If the risk is slight, so should be the cost of complying with regulations addressing it. This is supported by the federally chartered National Council on Radiation Protection and Measurement (NCRP) which declared, in its Report No. 43, that:

". . . numerical estimates of radiation-related risks, even when realistic, are of little use in a vacuum, i.e., without comparable numerical estimates of associate benefits, and of risks and benefits for alternative means to achieve the desired end."

Finally, we believe that the agencies should select the most cost-effective alternative to attain particular goals in order to avoid unnecessary expenditure of taxpayers' money.

We also believe that regulatory risk assessments should be based on the best available scientific information and should be realistic. We take notice of NCRP's admonition in Report No. 43 in which NCRP stated that it

". . . wished to caution governmental policy-making agencies of the unreasonableness of interpreting or assuming 'upper limit' estimates of carcinogenic risks at low radiation levels, derived by linear extrapolation from data obtained at high doses and dose rates, as actual risks, and of basing unduly restrictive policies on such an interpretation or assumption. The NCRP has always endeavored to insure public awareness of the hazards of ionizing radiation, but it has been equally determined to insure that such hazards are not greatly overestimated. Undue concern, as well as carelessness with regard to radiation hazards, is considered detrimental to the public interest."

Again, we appreciate this opportunity to express our views.

Sincerely,

HERMAN E. ROSER,
Assistant Secretary for Defense Programs.●

FRED MANOCHERIAN'S CRUSADE FOR HIGHWAY SAFETY

HON. STEPHEN J. SOLARZ

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 21, 1982

● Mr. SOLARZ. Mr. Speaker, the automobile has been important to our Nation's development, but like many other technological advances, this tool can be dangerous—fatally dangerous—when misused. Over 50,000 Americans die each year on this Nation's highways. Many of these deaths are due to driver error, yet we do not have adequate driver education programs. The National Highway Traffic Safety Administration has done much to improve the safety of vehicles, but little to improve the safety consciousness of those who drive them.

Mr. Fraydun Manocherian, who operates the New York Health and Racquet Club in New York City, is one citizen who has tried for many years to do something about this problem. On December 6, for example, he placed a full-page advertisement in the New York Times asking that 2 percent of the money that we intend to raise under this bill—one-tenth of 1 cent per gallon of gas—be set aside for such safety education as dramatizing the importance of good driver judgment, teaching safe driving techniques, making certain that all drivers are aware of traffic safety laws, making the public aware of the major causes of accidents, and demonstrating the horrible results of accidents that each week kill over 1,000 persons and maim or injure another 7,000.

I regret that the tightness of our current budget and the speed with which this legislation has had to be considered have made it impossible to enact Mr. Manocherian's proposal this year. I think that it is a good idea and one that should receive full consideration by the Committee on Public Works and Transportation in the new Congress. I commend Mr. Manocherian for his public spirit and encourage him to continue his efforts.

Mr. Speaker, I insert the text of Mr. Manocherian's proposal at this point in the RECORD:

[From the New York Times, Dec. 6, 1982]

TO ALL LEGISLATORS: THIS 9 YEAR OLD IS JUST ONE OF 55,000 STATISTICS.

If we knew that an epidemic in 1983 would cause the death of 55,000 Americans, would we do all we can to prevent it? An unexpected auto accident can make a very healthy person quite unhealthy in one second. Aside from killing 55,000 Americans per year, auto accidents disable more of us than any other cause. Auto accidents also cause more facial and body disfigurements than any other cause. This problem can be alleviated. The answer lies in your action now.

Substantial efforts have been made toward the development of safer cars and roads. But, to reap the full benefits of these programs, we must have a national effort to develop better drivers—the kind of drivers who prevent accidents.

Most automobile safety experts agree that 90 percent of accidents are ultimately caused by the driver.

It seems most likely an additional five cents tax will be imposed on gasoline. We respectfully suggest that one tenth of one cent per gallon of this tax so collected be used toward safety on our highways that are built, and are to be built. This one mill per gallon would raise over $100,000,000 annually. It would be an average cost of approximately one dollar per car per year.

A former Secretary of Transportation, John Volpe and his Auto Safety Administrator, Douglas Toms, estimated that a 15% reduction in accidents would save us 6 billion dollars annually. Even if this 100 million dollar national effort were to be 1% effective it would save us $400,000,000 and increase our chances of reaching our destination safely.

The proposed funds can be used by the National Traffic Safety Administration to achieve the following:

1. Dramatize the importance of good judgement on the part of the driver.
2. Teach safe driving techniques, laws and regulations.
3. Make the public aware of the major causes of accidents.
4. Demonstrate the horrible results of accidents that kill over 1,000 persons a week and maim or injure over 70,000.
5. Correlate all related research findings and convey such facts to drivers.
6. To take any and all other steps necessary to reduce this continuing carnage.

This is an opportunity for the government of the people, for the people to act to reduce the number one killer of our citizens up to the age of 44, and the number one disabler of all ages in America. Please consider having this suggestion incorporated as an Amendment to the five cent tax legislation. And—please don't disregard this idea—you may someday regret you did not do all you could.●

HON. GEORGE GOODLING

HON. CARL D. PERKINS

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 21, 1982

● Mr. PERKINS. Mr. Speaker, those of us who were privileged to serve in this House with George A. Goodling in the 1960's and 1970's were saddened by his passing on October 17 at the age of 86.

George Goodling served his Pennsylvania constituency well and honorably in his 12 years in Washington. He embodied the old virtues of steadfastness and integrity, and his political philosophy was rooted in the belief that the people's government ought to be honestly and efficiently run with a minimum of burden on the taxpayer.

While we differed on many issues in our voting, I could always talk to him as a friend, on a man-to-man basis, without rancor and with the reasonableness that characterized his service.

It has been a great pleasure for me to serve on the Committee on Education and Labor with George's successor—his able and distinguished son, Representative BILL GOODLING.

I know George was proud of BILL's contributions to the Congress during these past 8 years, and to be aware that the people of the 19th District of Pennsylvania continue to be represented by the high caliber of service.

All of us join BILL and the Goodling family in sadness at George Goodling's passing after a long and useful life.●

TRIBUTE TO GEORGE A. GOODLING

HON. RALPH REGULA

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 21, 1982

● Mr. REGULA. Mr. Speaker, I would like to say just a few words today in tribute to the father of my friend and colleague, BILL GOODLING of Pennsylvania.

George A. Goodling came to Congress in 1960 after having compiled a distinguished record of service as a school administration and member of the Pennsylvania legislature.

He served effectively as a Member of this body, the Agriculture Committee and Merchant Marine and Fisheries Committee. Even after his retirement, in 1975, he continued to be active in political affairs until his death 2 months ago.

It was my privilege to serve with George Goodling during my early years in Congress and I remember him well as a legislator to be respected for his dedication to the service of the people he represented.

On a personal note: George was part of an informal Longworth breakfast group that I was privileged to share as a newcomer to this body. His trenchant insights over coffee were a great help to me as a new Member of the Congress.●

HON. GEORGE GOODLING

HON. EDWARD J. DERWINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 21, 1982

● Mr. DERWINSKI. Mr. Speaker, it was my privilege to have served with the late Congressman, George A. Goodling, during his many productive years in the House of Representatives, and I join his friends in expressing my sorrow at his passing.

As a Member, George was a sincere, hard-working Representative for the people of Pennsylvania. I had great respect for George's judgment and counsel, and always found him to be a very warm, pleasant, and understanding individual.

George served with distinction on the Committee on Agriculture, where he became the second-ranking member, and on the Merchant Marine and Fisheries Committee. George was a man with great love for his country and great respect for his fellow citizens.

George served his country and his constituents in an outstanding manner. He was respected by all his colleagues on both sides of the aisle. The opportunity to have known and served with George Goodling during his years in Congress is a fond recollection I will long remember.

Like his father, BILL GOODLING has carried on the conscientious representation that was so well appreciated by the people of the 19th District of Pennsylvania. My deepest sympathy goes out to BILL and the entire Goodling family for their loss. We salute today a good friend, a distinguished Member of this body, and an honorable man who will be remembered.●

SECURITY FOR SOCIAL SECURITY

HON. HAROLD C. HOLLENBECK

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 21, 1982

● Mr. HOLLENBECK. Mr. Speaker, I submit the following article written by Tony Scoville, formerly a technical consultant to the House Committee on Science and Technology. This could not be a better time, as the task force on social security completes work on its study to explore the alternatives set forth by Mr. Scoville. I urge my colleagues consideration.

[From the New York Times, July 23, 1982]

SECURITY FOR SOCIAL SECURITY

(By Anthony Ellsworth Scoville)

WASHINGTON.—In January, a nationwide poll estimated that 68 percent of Americans under age 45 do not believe that Social Security will exist when they retire. In March, a follow-up poll confirmed those estimates. Throughout May and June, while preparing the 1983 Federal budget, Congress was paralyzed by the issue of Social Security benefits and financing.

Social Security must survive. Thirty-six million Americans receive benefits; 40 percent of them rely on Social Security for three-fourths of their household income. But Social Security could do far more than merely survive. It could provide a capital fund for America's economic rebirth, without which there will be no security for the elderly, few jobs for our children and unquenchable Federal deficits for the indefinite future.

The budgetary pressure will intensify. In 1945 there were 40 contributing workers for each Social Security recipient. In the year 2010, there will be only 2.2 wage earners for each beneficiary. This demographic time bomb could lead to a 50 percent increase in Social Security taxes, further reducing the earnings of working men and women while draining away funds for business investment.

Tinkering with cost-of-living adjustments and the retirement age will not provide the Social Security Trust Fund with a firm financial basis because payroll deductions are used to pay current monthly benefits, although people regard these deductions as savings for retirement. As a partial consequence, the United States has the lowest savings and investment rates of any industrial nation except Britain. If America is to complete economically, we must save more and we must invest strategically—on a prodigious scale.

Social Security taxes could be our largest untapped savings; they will equal $192 billion this year, $362 billion in 1989. If the Social Security Trust Fund were reconstituted as a prepaid capital fund, the amount available to invest could double the yearly total of all personal savings and could equal the value of the entire stock market in five years. By making substantially more capital and savings available, the pressure on interest rates would be greatly reduced.

A three-phase plan could maintain benefits, make Social Security self-supporting and generate more than $5 trillion (in 1982 dollars) in new investment over the next 50 years, 80 percent of which would be available in the next 30 years.

Under this plan, for 20 years, from 1982 through 2001, Social Security taxes would be increased by 3 percent of taxable wages. Surplus receipts would be invested through a capital investment fund. In the second phase, from 2002 through 2010, payroll deductions would be reduced from 18.7 percent to the 15.3 percent scheduled to be in effect at that time. For those nine years, deductions would pay for benefit checks while capital fund income would continue to be reinvested. In the third phase, after 2010, when people born in the postwar baby boom begin to retire, income from the capital fund would suffice to pay benefits while providing a small surplus to match the growing number of elderly through the year 2050.

Thirty years from now, in 2011, all Social Security taxes could end.

The capital fund would require yearly principal contributions of $43.3 billion (1982 dollars), which total only 38 percent of the 1981 individual tax cuts if those tax cuts were continued for 20 years. Indeed, the capital fund could easily be endowed if recent upper-income tax cuts were reduced by half. In the immediate future, from 1982 through 1986, last year's tax reduction provides $158 billion to business, most of which would have been invested anyway. Over the same period the capital fund could provide $264 billion (1982 dollars) for targeted, new business investment.

Solvency of the fund would depend critically on making investments that yield high returns over the long run. Economic data since World War II indicate that an 8 percent real return is feasible; Congress and the President, however, would have to avoid using the capital fund to bail out weak industries. Rather, supervised by a national investment board, the funds would have to be invested in high-growth sectors of the economy. Success would require the board to develop a long-range strategy for investment in human skills as well as in plant and equipment that anticipated technological opportunities while safeguarding the environment.

The Social Security Trust Fund's contribution to economic rebirth could be enormous. Its investment potential could provide security for the elderly by stimulating a new cycle of economic opportunity in the 1980's. True social security is each generation's trust in the opportunities and promise of the future. With that trust, each generation can secure its reward for a lifetime's progress and innovation in our nation's economy.●

HON. GEORGE A. GOODLING

HON. GLENN M. ANDERSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 21, 1982

● Mr. ANDERSON. Mr. Speaker, I rise to pay special tribute and honor to the memory of Hon. George A. Goodling. I had the privilege of serving with George on the Committee of Merchant Marine and Fisheries.

During his career in Congress, George continued to build on his reputation as a conscientious public servant intent on serving his constituents. George was a public school administrator and a representative in the Pennsylvania legislature in the years before 1960 when he was elected to Congress.

During my early years in Congress, I looked to George for leadership on the important issues. George was very active in all aspects of the legislative process. At Merchant Marine and Fisheries Committee markups, George was not only eager to help junior Members, but he was always aware of the details, the intent, and the consequence of the legislation that we were considering.

Perhaps more importantly, George realized that the outcome of the legislative process was not as important as the continuation of the process itself, and that no matter who was on the opposite side of a given issue, honest and cordial relations between the Members were critical to insure that the process would continue to work for the next issue, the next day, and the next Congress.

Mr. Speaker, I am pleased to see that our esteemed and admired colleague, BILL GOODLING, is carrying on in his father's fine tradition as a public servant and politician in the finest sense of the words.

In conclusion, Mr. Speaker, I wish to join my colleagues in remembering our good friend and most distinguished colleague, George A. Goodling.●

HON. GEORGE A. GOODLING

HON. LARRY WINN, JR.

OF KANSAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 21, 1982

● Mr. WINN. Mr. Speaker, George Goodling served Pennsylvania's 19th District with pride and distinction for 10 years and will be remembered on Capitol Hill as a hard-working legislator devoted to his work. George is not with us in person anymore, but he is very much alive in spirit and will always serve as an inspiration.

George Goodling was a perfect example of a dedicated public servant. He served admirably in the Pennsylvania State Legislature before entering Congress and, once he was in Washington, established himself as an eloquent spokesman for the 19th District of Pennsylvania. George served on the House Agriculture Committee where he became second ranking minority member and also was a member of the Merchant Marine and Fisheries Committee. After his retirement, he remained active in politics and helped his party in Pennsylvania with some vigorous campaigning.

George Goodling should also be thanked for giving us his son, BILL, who has become an excellent Congressman in his own right. I know how much BILL loved and respected his father and I can see the similarities between the two men. Both will be remembered as public servants who put the people first.

George Goodling was a good friend of mine. It was a pleasure serving with him here in the House.●

HON. GEORGE GOODLING

HON. MARJORIE S. HOLT

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 21, 1982

● Mrs. HOLT. Mr. Speaker, Representative George Goodling passed away on October 17, of this year. I feel very fortunate to have served in this House with George, until his retirement in 1975. He was a man of great integrity, dedicated to his district and to better government. When I first came here, he was one of the first Members to offer friendship, and he never waivered in that friendship.

I had the opportunity to speak in his district several times. During those visits to Pennsylvania, it was obvious how loved and respected he was, as both a gentleman and a legislator. George spent much of his time following retirement, in his orchards, where he grew some of the finest fruits I have ever eaten. He brought to Congress that special caring it takes to be a successful farmer, and I will continue to miss his expertise here in the House, and with his death, I will now miss his friendship.●

TRIBUTE TO GEORGE GOODLING

HON. DON FUQUA

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 21, 1982

● Mr. FUQUA. Mr. Speaker, I take this occasion to join my other colleagues who had the pleasure of serving in this House with the Honorable George Goodling of Pennsylvania in paying tribute to the memory of this fine legislator, who died on October 17.

Probably the greatest tribute which can be paid to a public official is to have established such a record of service that, upon retirement, his constituents elect another member of the same family.

So it was with George Goodling, whose dedicated service to the people of the 19th Congressional District of Pennsylvania was so great that upon

his retirement in 1975, the voters elected his son, BILL, to succeed him.

I take this opportunity to pay final tribute to the memory of George Goodling and to express condolences and sympathy to his family.●

HON. GEORGE GOODLING

HON. ED JONES

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 21, 1982

● Mr. JONES of Tennessee. Mr. Speaker, I rise today to join with my many colleagues who count among our life's blessings having known and served with our former colleague, George Goodling. When I first came to this body, I had the privilege of serving with him as a member of the House Committee on Agriculture.

I always found him to be knowledgeable, straightforward, and highly thought of among his colleagues. It did not take me long to find out why. A worthy political opponent, George Goodling contributed greatly to the dialog needed to shaping strong and effective agricultural programs for this Nation. He understood the importance of agriculture in our Nation's economy and worked diligently to insure that Government agricultural policy was sensitive to that prominence.

Since his retirement, I have had the opportunity to see him on occasion when he visited with his son, our colleague, BILL GOODLING, whose office is across the hall from mine. I was greatly saddened by the news of his death and want to express to his family my deepest regrets.

While there are no words that can reduce the grief of losing a loved one, George Goodling's family should know that those of us who knew him respected his judgment and cherished his friendship.●

JAMES SYMBOL

HON. WILLIAM (BILL) CLAY

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 21, 1982

● Mr. CLAY. Mr. Speaker, I want to use this opportunity to note the retirement of James J. Symbol after nearly 20 years of service to the Postal Service and our Nation in a variety of high-level positions in Portland, Oreg, Los Angeles, Calif., and the southern region of the Postal Service.

Mr. Symbol has taken affirmative steps to insure that minorities and women have been afforded an equal opportunity to achieve supervisory and managerial positions within the Postal Service. I understand that the number of women and minorities in these positions has increased 10-fold in those areas in which Mr. Symbol was responsible for operations.

Recently, the northwest area conference of the NAACP commended James J. Symbol for his courageous and morally correct positions in the area of affirmative action. The NAACP expressed its sincere gratitude for James J. Symbol's strong commitment to affirmative action within the Postal Service.

I join the northwest conference of the NAACP and others in applauding the extent to which James J. Symbol has gone to insure that the affirmative action policies of the U.S. Postal Service have been translated into action. I wish Mr. Symbol and his family well in the years ahead and invite all Americans to join me as we give him a hearty, "Well done."●

SCIENCE FOR AGRICULTURE

HON. WILLIAM C. WAMPLER

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 21, 1982

● Mr. WAMPLER. Mr. Speaker, today I have requested this opportunity to bring to the attention of my colleagues in the House a recent report entitled "Science for Agriculture" that included recommendations from a group of 15 leaders in Government, industry, universities, and a foundation. This report, now known as the Winrock report, has also been the subject of two commentaries in the press: The first appearing as an editorial in the New York Times of October 2, entitled "The Worm in the Bud" and the second as a lengthy article in Chemical and Engineering News of November 22, "Shakeup Ahead for Agricultural Research."

I was glad to note that Hon. GEORGE BROWN, my collegue from California and a major supporter of agricultural research in the Congress, participated in the 2-day session held at the Winrock Center at Morriltown, Ark., on June 14-15, 1982.

Most of the conclusions and recommendations contained in the Winrock report were generally consistent with the National Agricultural Research, Extension and Teaching Policy Act of 1977, title XIV to the 1977 farm bill and amendments to this in the Agriculture and Food Act of 1981. I would have preferred that the report would have included reference to title XIV to show agreements with existing law and congressional intent and to expose statutory provisions that were directed to the same overall aims proposed by the Winrock group.

First, the appraisal by the Winrock group of the importance of agriculture and its vital dependence on research for improved productivity and production agrees with the appraisal of the Congress. For the same reasons, agriculture itself and its needs were written in as the primary common denominator of purpose of title XIV.

Second in importance was the provision for an Assistant Secretary for Science and Education in the U.S. Department of Agriculture provided by the Congress in title XIV. For the first time Congress provided a leadership position in the front row of the Secretary's policy group that is dedicated to science and education issues important to agriculture. Secretary John Block, by choosing as the first incumbent, Dr. Orville Bentley, dean of agriculture at the University of Illinois, recognized the need for experience and knowledge of how research and education contribute to agricultural progress, how State and Federal investments in agricultural research can be assessed separately and interactively, and how agricultural research can be appraised in relation to other obligations of the Federal Government.

I recognize that knowledge of the past and present does not automatically translate into wisdom for the future. However, we are glad to hear that Dr. Bentley is already beginning to address future needs and plans through the long- and short-term planning and coordination authorities contained in title XIV. In the process, we are confident he will give due regard to the interdependencies involved, retain the virtues of existing institutions and systems of research and education and solicit and attract the inputs of their scientific and administrative leaders and the recommendations of others that will enrich the total system.

Third, the Congress reaffirmed the USDA-State research partnership in title XIV. A word of explanation is in order. I will use the State agricultural experiment stations as a case example recognizing that we have included other institutions in our reaffirmation of the USDA-State partnership. Some critics of agricultural research have addressed the State agricultural experiment stations as if they were freestanding research institutions. The principle Congress included in title XIV is the same as that stated earlier in the Hatch Act. "A unique partnership arrangement exists in food and agricultural research, extension, and teaching between the Federal Government and the governments of the several States * * *." The bond with the States for agricultural research was first forged in the Hatch Act of 1887 whereby States were encouraged through that legislation and subsequent Federal funding to establish experiment stations to serve the needs of the agriculture of their respective States. Congress in revising the Hatch

Act in 1955 reaffirmed this dominant purpose:

It shall be the object and duty of the State agricultural experiment stations through the expenditure of the appropriations hereinafter authorized to conduct original and other researches, investigations, and experiments bearing directly on and contributing to the establishment and maintenance of a permanent and effective agricultural industry of the United States, including researches basic to the problems of agriculture in its broadest aspects, and such investigations as have for their purpose the development and improvement of the rural home and rural life and the maximum contribution by agriculture to the welfare of the consumer, as may be deemed advisable, having due regard to the varying conditions and needs of the respective States.

State legislatures formally accepted this charge and, in almost all States, accepted the urging of Congress that the experiment station be placed in the land-grant college, now universities, provided for under the first Morrill Act of 1862. Thus, the purpose of the State agricultural experiment station was and is to serve the needs of agriculture through research. The Congress intended that the processes and organization of the research should be compatible with the policies and rules of the university and the State in which the station is located. As the investments of the State legislatures in their State stations have increased for the same agricultural purposes, the accountability to the U.S. Department of Agriculture for Hatch expenditures and to their State legislature for their inputs is first and foremost in terms of agricultural benefits from these public investments. As investors, the Federal and State Governments retain rights for questioning their current performances and can request future plans and intents. Therefore, it seems best to address appropriateness of suggestions for change in terms of the agricultural purposes of the State stations and the effects of such changes on the investors in their research. The same principles apply to the other research institutions named by the States to carry out the purposes of legislation fashioned by the Congress in the formal, continuing partnership mode.

Fourth, the Congress emphasized amounts and kinds of funding in title XIV.

We encourage increases in base funding as a useful and important public investment. All comprehensive analyses that have been brought to the attention of Congress in recent years show that agricultural research is underfunded. The prospective return rate on first increases in public base funding investments has been calculated to be as high in economic terms as in past decades. Returns as benefits in the range of 30 to 50 percent per year above the investment cost to include the approriate annual discount rate can be expected. Contributions to agricultural needs that are more difficult to assess in economic terms are also expected to provide social values well above the investment cost.

The Congress in title XIV also provided authorities for selective funding including special grants, competitive grants, and cooperative agreements. Our intent was to provide the Secretary with flexibility in funding authority to match program initiatives and intents. The report on "Science for Agriculture" proposes increases in competitive grants alone among the selective funding options.

The Congress on the other hand prefers to consider selective funding authorities as means for applying Federal funding incentives to research initiatives which are deemed by the USDA to be useful to the progress of agriculture and that funding levels be proportioned to the expected benefits. That concept would include but not be limited to the prospective investments in money or other resources from non-Federal sources.

The Congress has long questioned the assumptions in the report on selective funding on two counts. Special grants appear to be disdained as grants specified by the Congress. Most of the funds authorized under special grant authorities were originally proposed by the executive branch or by leaders of important agricultural sectors. Agricultural worth resulting in congressional initiative is as appropriate as in Executive initiative.

In conclusion, I reiterate that the report, "Science for Agriculture," deserves serious consideration as do other reports on agricultural research over the years prepared by noteworthy persons. Our greatest concern is the tendency of the more zealous supporters of the recommendations for change to contrast only the virtues of the new against the faults of the old even to the extent of condemning a system that is eminently successful in carrying out its primary purpose to help agriculture progress. The other side of the coin for new proposals and existing processes is often totally ignored.

We must not lose sight of the components of agricultural innovation across the continuum of research from the frontiers of knowledge to the farmers field. We must respect analyses that shows that there is a positive correlation between the number of branch stations in a State and its gains in agricultural productivity as well as the positive correlation between quality of basic research and long-term productivity gains. We also must recognize a great deal of research entrepreneurship in between that provides the essential continuum between the sophisticated laboratory and the working farm. Furthermore, we believe that support for quality of science at the basic science end should not include disdain for more practical research at the agricultural end.

Rather, we subscribe to the conclusion expressed by Dr. Emery Castle, president, Resources for the Future, who made a thorough study of the agricultural research system. He stated in testimony to the Subcommittee on Natural Resources, Agriculture Research and Environment, House Committee on Science and Technology on July 29, 1982.

In conclusion, I want to register my strong support for a strengthened, publicly support system of agricultural research and education in the United States. Our society has benefited greatly from past investment in the system. It is far from perfect, but in our attempts to reform it we risk destroying the essence of its uniqueness and productivity. We run risks from too much central coordination and planning, failure to understand the effects of different forms of financing, confusion over the proper role of public and private research, and danger that the credibility of the system will eroded.●

A TRIBUTE TO GEORGE GOODLING

HON. JOHN N. ERLENBORN

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 21, 1982

● Mr. ERLENBORN. Mr. Speaker, there is always sadness in paying tribute to a dear, departed friend. In the case of George Goodling, our former colleague from Pennsylvania, however, there is also a sense of pride for having had the pleasure and rare privilege of having known and worked with such a fine person.

George was first and foremost a good Christian who practiced what he preached. His Christianity was reflected in his legislative endeavors and his devoted representation and service to his constituents. It was reflected in his family life, as we know from our association with his son, BILL, who now serves basically the same constituency as his father did before him.

Thus, George lives on through his family, and especially through BILL. He will live on also through the George A. Goodling scholarship fund established at the Pennsylvania State University in his memory to help needy and worthy students from Pennsylvania's 19th District.

It is fitting and proper, I believe, that George Goodling be memorialized in these ways and that we honor him here today.●

HONORING GEORGE GOODLING

HON. JOHN P. MURTHA

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 21, 1982

● Mr. MURTHA. Mr. Speaker, it was my pleasure to serve in Congress with George Goodling. He was a man of honor, of dedication, of concern about the people he represented and the country he loved.

Goerge Goodling is remembered by the people he represented as someone who was always available, who always had time to talk to people and help with their problems. Even in his retirement he remained active, and continued to visit with his many friends and help throughout the community.

One of George's greatest loves was the Pennsylvania State University. He was very active with the university, particularly the York campus where he worked tirelessly to help the campus and create programs to help students complete their education.

Certainly, Congressman BILL GOODLING has followed in the tradition of his father in Congress. He has brought to Congress the same concern, compassion, and dedication that was a hallmark of George Goodling's career.

When you review the record of George Goodling in Congress, you see that it was in the highest traditions of Congress, and of service to his country. George Goodling was missed from Congress, and I know he is now missed by his family and friends. His life was one of service and dedication, of which his family, friends, and of us who knew and worked with him can be extremely proud.●

HON. GEORGE A. GOODLING

HON. ROMANO L. MAZZOLI

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 21, 1982

● Mr. MAZZOLI. Mr. Speaker, I would like to honor my late and good friend and our former colleague George Goodling who served in this House of Representatives with honor for many years.

Besides being a fine paddleball player—I know because I teamed up with him often—George was a skillful legislator and a hard-working member of the Agriculture Committee.

It is appropriate that we remember and revere George Goodling. He left behind, to carry the Goodling banner, a fine and talented son, BILL, so we still to this day, have the Goodling spirit in evidence in the House.●

HON. GEORGE GOODLING

HON. TOM BEVILL

OF ALABAMA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 21, 1982

● Mr. BEVILL. Mr. Speaker, the U.S. House of Representatives has been blessed with many able men and women throughout its nearly 200-year history. People from all walks of life have occupied this Chamber and have represented the views and concerns of our Nation's citizens.

However, one man who was especially suited to this important task was our friend and former colleague, George A. Goodling, of Pennsylvania. I was especially fond of George, during the time we served together in Congress.

George brought with him to Congress a solid background of service to the citizens of Pennsylvania, both as a public school administrator and as a representative of the Pennsylvania State Legislature. In both of those roles he was successful in identifying the needs of his community and making every effort to see that his fellow citizens received an opportunity to receive the many benefits which our country has to offer.

And all of us in this body are proud that George's son, BILL GOODLING, has followed in his father's footsteps, and now serves as a Member of Congress from the 19th District of Pennsylvania. It is easy to recognize the same fine qualities in BILL that his father brought with him to Congress.

George's death several months ago has meant a loss to all of us. But his service to his country provides a continuing legacy for his family, his former constituents and for the Nation.●

HON. GEORGE GOODLING

HON. E de la GARZA

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 21, 1982

● Mr. DE LA GARZA. Mr. Speaker, it just does not seem enough to say that George Goodling was a dedicated public servant. It was his life that he put into his work in Congress. Every day he had the same love of effort for his job.

Don George Goodling was my good friend in all his years in the House up to his retirement in 1975. Every year I sent greetings to him on his birthday, and I will truly miss this fine man. He and I threshed many a bail in the Committee on Agriculture and I will always remember his astute counsel and advice. It was my privilege also to serve with him on the Merchant Marine and Fisheries Committee—him from the landlocked hills of Pennsylvania and me from the shores of the Gulf of Mexico, but we pursued a common interest.

Mr. Goodling was a gentleman to the letter, and I will forever value the friendship that he and I maintained through the years. To his son, who has so competently followed him, and to his family I extend my genuine warm wishes and high regards.●

TRIBUTE TO FORMER CONGRESSMAN GEORGE A. GOODLING

HON. JACK BROOKS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 21, 1982

● Mr. BROOKS. Mr. Speaker, I want to take this opportunity to express my deepest sympathy to the family of our former colleague, Congressman George A. Goodling, of Pennsylvania's 19th Congressional District. His death last October 17, marked the passing of an outstanding leader and a dear friend of mine.

It was my distinct privilege to serve with Congressman Goodling from 1960 through 1964, and then again from 1968 through his retirement in 1975. The people of Pennsylvania's 19th District can be proud of the record of service he established and the fine representation he gave to his district and to his country. They could not have had a stronger advocate and he left an indelible mark in the House of Representatives.

The people of his district always knew they had a friend here in Washington with whom they could work on many projects of vital importance to the State of Pennsylvania.

He was a hardworking, capable member of an outstanding legislative delegation and he demonstrated time and again a spirit of determination to pursue goals important to his constituency. He was a forceful and effective member of both the Committee on Agriculture and the Merchant Marine and Fisheries Committee. His work in those areas will continue to be of great benefit to people across this Nation and they, too, will miss him.●

HISTORY PROVES MONETARY REFORM BRINGS ECONOMIC EXPANSION

HON. JACK F. KEMP

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 21, 1982

● Mr. KEMP. Mr. Speaker, the economic instability of the past 15 years, with the waves of inflation, deflation, and high interest rates that have been

so deleterious to the American and world economy, is unusual in our history. But it is not unusual for periods of experimenting with our money. Similar attempts at regulating the supply of money, for example, both here and elsewhere, have also led to credit crunches, government budget strains, and economic shrinkage.

The salient feature of the international economy over the last decade has been the Western experiment with managed, floating paper currencies. This experiment has been eclectic—drawing ideas from various schools of though ranging from the Keynesian prescription of interest rate targets to the monetarist attempt to regulate the money supply. All have failed. Without a reliable standard for our money, our monetary authorities will continue to force the American worker and investor to confine their role in the economy to one which is primarily static and self-protective. And without a new international monetary arrangement based on stable exchange rates, the declension from currency derangements to overlending to capital controls to trade wars will continue—a formula for world economic disaster.

In the five historical cases Alan Reynolds outlines below, each time the monetary authorities reformed their currencies according to the classical formula, a stable currency has been accompanied by a prolonged increase in employment and economic growth. Mr. Reynolds, vice president and chief economist of Polyconomics, Inc., is an expert on monetary and fiscal policy, and his lucid historical explanation of monetary reform in the December 6, 1982 Polyconomics newsletter merits the attention of my colleagues.

MONETARY REFORM AND ECONOMIC BOOM: FIVE CASE STUDIES 1792-1926

There is virtually no limit to how far an economy can shrink if government tax, trade and monetary policies are sufficiently destructive. But there is an upside risk as well—the risk of being unprepared for unexpected global economic expansion if there is a major shift to a superior policy regime. The pace of the stock market advance since August 12 suggests the possiblity of just such a fundamental change in the policy environment, leading to sustained economic achievement.

The purpose of this historical essay is to investigate the upper limits of growth. What conditions led countries to finally stabilize their currencies in the past? How rapidly did economies expand after shifting from monetary chaos to stability? What did these episodes have in common with each other and with the present? What is the potential of the current bull market?

Five experiences with monetary reform will be examined, concluding with some comments on the relevance of this history to the present world.

1. THE HAMILTON DOLLAR OF 1792: UNPRECEDENTED PROSPERITY

America's only hyperinflation occurred during the Revolutionary War. By April 1779, George Washington complained that "a wagon load of money will scarcely purchase a wagon load of provisions." Despite oppressive price controls, one index of wholesale prices (1800–59=100) rose from 78 in 1775 to 10,554 in 1780, then fell just as abruptly. The phrase "not worth a Continental" survives as a reminder.

In 1781, Alexander Hamilton wrote that "the only cure to our public disorders is to fix the value of the currency we now have . . . to a proper standard, in a species that will have the requisite stability." At Hamilton's urging, the Mint Act of April 2, 1792, finally fixed the value of the dollar to gold and silver (though by undervaluing gold, silver soon became dominant until 1834). Gold was $19.39 an ounce until 1834-37, when it was changed in steps to $20.67.

"The years 1793-1808," writes the historian Douglass North, "were years of unparalleled prosperity." It was, adds Louis Hacker, "a period of unexampled business expansion, one of the greatest, in fact, the United States has had . . . The exports of the country mounted from $19 millions in 1791 to $93 millions in 1801 . . . During the 1780's, only 33 chartered companies had been set up by the states; during the 1790's, the number of such new companies was 295."

The fiscal consequences of this hard money prosperity were dramatic. The federal budget deficit amounted to 28% of the expenditures in 1792, 21% in 1794-5. Aside from small receipts from the sale of land, federal revenues were mainly from a 5% tariff and excises on items like liquor and stuff, which were abolished in 1801. Yet customs duties tripled from 1792 to 1801, internal revenue quintupled, and the surplus by 1802 was almost as large as total spending.

Another benefit of the 1792 monetary reform was lower interest rates on the national debt, which had risen as high as 6%. "When the credit of a country is in any degree questionable," wrote Hamilton, "it never fails to give an extravagant premium . . . upon whatever is to be bought on terms of future payment." A modern historian, Stuart Bruchey, confirms that "the resurgence of public credit, by lowering the interest rates on government debt, led in turn to a reduction in the market rate of interest and thus cheapened the capital costs of investment." This easing of interest rates did not occur by restricting the "supply of money." The money supply rose at an annual rate of over 30% from 1799 to 1859, according to Gurley and Shaw, while wholesale commodity prices declined by less than 1% a year.

The rough price estimates available for the early U.S. appear to show some inflation from 1793 to 1796, and again in 1801 and 1805. But these price swings (as well as swings in output and exports) were mainly in farm products, particularly the volatile supply and foreign demand for cotton. Prices of such traded goods have to be considered in the international context.

One of the worst hyperinflations in history occurred after the French Revolution of 1789, until Napoleon restored the gold standard. England was also going through extremes of inflation and deflation while off of the gold standard from 1797 to 1821. The United States was a relatively tiny participant in this world market.

Like one of today's Third World countries, the U.S. economy relied heavily on a single export commodity (cotton), borrowed heavily from foreigners to finance development, and occasionally defaulted on those foreign loans. It simply was not possible under any monetary system to completely insulate the U.S. from the wars and monetary vandalism going on in Europe.

A devastating blow occurred with President Jefferson's trade embargo from December 1807 through March 1809 (U.S. exports fell 80% in 1808), the War of 1812, and the high U.S. tariffs of 1816 and 1828. Clearly, these problems were not a fault of the monetary system.

In the colorful language of the time, there were also "panics" and "crashes" about once every twenty years, though always while the gold standard is suspended Galbraith complains that "in the years of panic and ensuing depression economic growth certainly slowed and perhaps, on occasion, came to a halt." During the worst years, in other words, growth was zero or small. Farm prices certainly fell in the 1839-43 "depression," for example, but real GNP rose by 16%.

Anna Schwartz's economic history for the U.S. Gold Commission also implies great instability in the 25 years from 1834 to 1859, but her data show only three years in which real output fell at a 1% rate and one (1854) in which output fell by 4%. In the other 21 years, real growth averaged 5.5% per year, despite such growing pains as wildcat banking. Most monetary disturbances in the nineteenth century were, as the Gold Commission agreed, "attributable to the U.S. banking structure rather than the gold standard system."

2. ENGLAND IN 1821: A SUPPLY-SIDE BOOM

After 75 years of financial and industrial revolution under the gold standard, Great Britain abandoned the standard during the Napoleonic Wars, beginning on February 27, 1797. "The re-establishment of a metallic currency in Paris and finally, after paper credit experiments, a run of the English country banks, led to a drain of gold from Britain and a serious fall in reserves which led Pitt first to suspend cash payments by the Bank of England, and second, to attempt substantially to increase taxation." Willard Thorp's classic Business Annals record the results of that mix of fiscal and monetary policy:

1798: "Pitt presents income tax."

1798-1801: "Depression."

1802: "Income tax repealed. . . . Prosperity."

1803: "Income tax reestablished."

1804: "Mild depression."

Commodity prices doubled by 1815, then fell sharply. Britain leaped into protectionism with the infamous Corn Law of 1815, setting quotas on wheat imports to protect the landed aristocracy. Wheat prices had tripled from 1792 to 1812, and the Corn Law pushed wheat prices back up again in 1816 and 1817 as other prices and wages were falling.

"By 1816," notes Roy Jastram, "England was in a deep depression. There was stagnation of industry and trade generally; the iron and coal industries were paralyzed. . . . Riots occurred spasmodically from May through December."

Another cause of the riots, aside from the Corn Law, was tax revolt. "The most unpopular tax of all was the income tax," writes John Perry "and here the government was forced to give way to public opinion, abolishing the income tax in 1816." The economy then revived in 1817-18, but collapsed in bloody riots in 1819. At that point, the government finally turned to monetary reform, partly for the pragmatic (Hamiltonian) reason that by 1815 "interest on the national debt accounted for more than half of the

total government expenditure." The interest rate on consols (government bonds) rose above 5% in 1816, despite falling prices. This was a frightening interest rate, since consols averaged 3.6% from 1729 to 1931.

"In 1810 the government had ignored the advice of a Select Committee of the Commons that a return to the gold standard was necessary, but once the war was over it was increasingly difficult to reject similar demands." Pressured by circumstances, as well as by the "Radicals" (including economist David Ricardo), Peel's Committee of Inquiry in 1819 again recommended a gradual return to the gold standard. On May 21, 1821, the Bank of England resumed convertibility of their notes into gold.

What happened next is critical, since many economists share the opinion of a leading monetarist, Allan Meltzer, that "the decision to go back on the gold standard in the 1820s at the price that had prevailed in [1737-1796] . . . was followed by a difficult, hard adjustment."

T. S. Ashton, London's finest historian of the Industrial Revolution, offers a quite different assessment:

"In the early 'twenties many circumstances combined to produce high prosperity. The currency was established on a foundation of gold . . . Huskinson and his colleagues were active in pulling down tariffs, lowering excise duties, and removing restrictions from industry and trade. . . . A substantial part of the National Debt was converted from 5 to 4 or 3½ percent: in 1820 the yield on Consols had been 4.4, by 1824 it was 3.3 . . . and in the early months of 1825 short-term loans were being placed at a little more than 2½ percent."

John Derry likewise notes that "in 1820 prices were already rising and a year later prosperity had already achieved."

Asa Briggs adds that "the years between 1821 and 1825 justified promise and prediction. . . . The culminating point was reached in the years 1824-25, which some economic historians have considered as the first truly modern cyclical boom in British economic history. Certainly there was a stock market boom as well as a peak of industrial activity, and . . . the volume of domestic building broke all previous records."

3. ENDING THE GREENBACK ERA: ANOTHER 13-YEAR BOOM

The U.S. suspended the gold standard in December 1861, at the outbreak of Civil War. The price of gold rose 158%—from $20.67 to $53.34 by July 1864—and wholesale prices rose 153% over that period.

From 1865 to 1874, the United States attempted to regulate the value of money by controlling its quantity. This inspired an 1866 tax on state bank notes, a planned withdrawal of greenbacks until 1868 (followed by increases), and endless debates on how to define and control money. Regulating the quantity of money was not a new idea even then. As William Graham Sumner wrote:

"Nearly every nation which has ever used paper money had fixed its amount, and set limits which it has solemnly promised again and again not to pass, but such promises are in vain. A man might as well jump off a precipice intending to stop half way down. . . . In its more general effects, the paper currency with a fixed limit produces a steady advance in the rate of interest, and also a reduction in prices. . . .

"If we had a currency of specie value, we should get just as much as we need, and then we should know how much that is, but then, too,we should no longer care."

The National Bureau identified three postwar recessions from 1865 to 1878, with the economy falling in 68% of those months. Those recessions, like several others, were probably exaggerated by confusing lower wholesale prices with lower production. Yet most of the economic growth in this period—curiously emphasized by Friedman and Schwartz—did not occur until after an 1875 law announced the resumption of a gold dollar on January 1, 1879. Manufacturing output, for example, rose to a total of only 12% in the six years from 1869 to 1876, but rose 29% in the following three years. By any criteria, the nation's second experiment with managed money must also be judged a failure. That is, after all, why the United States was eventually compelled to again link the word "dollar" to something tangible.

As in Hamilton's time, a major incentive for returning to gold was to lower the interest rates on the national debt. Interest on a debt of $2.2 million was swallowing 35% of the budget in 1875. By 1882, the debt was still $1.9 million, but the interest rate on it had dropped by a third, lowering the interest expense to 22% of a smaller budget.

Bond yields had remained historically high through 1873—above 6%—despite falling prices and payment of interest in gold. Interest rates on daily "call money" averaged 10% in 1869, and 14% in 1873. After the announced intent to redeem dollars in gold, bond yields dropped steadily, with Treasury bonds remaining between 3.2% and 4.2% from 1879 to 1914. Common stock prices doubled from 1877 to 1881.

The gold standard was restored, without difficulty, in January 1879. An incredible economic expansion began within two months. The next four years were, according to Friedman and Schwartz, "characterized by an unusually rapid rise in the stock of money and in net national product. . . . The stock of money rose over 50 percent . . . and net national product in constant prices nearly 25 percent."

Growth of real income averaged 8.4% a year from 1878 through 1882. Growth of the money supply topped 20% in two years and averaged 12.6%. (Those who regard the gold standard as an austerity program, designed to restrict the money supply, clearly miss the point.) Inflation was about 1-3% by some measures, but this appears to have been mainly a cyclical recovery in commodity prices. The consumer price index did not rise at all. By 1882, raw steel production was 137% higher than it had been in 1878.

The fiscal results were again dramatic, even aside from the reduced interest rates on the debt. Federal tax receipts rose by 47% from 1879 to 1882, with no increase in tax rates or tariffs, and the budget surplus rose from $7 million to $146 million—over half of the total budget.

The achievement of this gold standard era as a whole can best be visualized by a sample of specific facts, mostly gathered from the Historical Statistics.

Industrial production rose by 534% from 1878 to 1913.

Manufacturing employment rose 51% from 1879 to 1889; 142% by 1914.

Real wage rates rose 28% from 1879 to 1889; real wage rates in manufacturing rose by more than 30% from 1890 to 1914.

The U.S. share of world manufacturing output rose from 23% in 1870 to over 35% in 1906-10.

Annual plant and equipment spending doubled in real terms from 1879 to 1884, doubled again by 1890, and rose ten-fold from 1879 to 1910.

Consumer durables doubled from 1879 to 1892.

The annual number of patented inventions was virtually unchanged from 1867 to 1878, then rose from 12,903 in 1880 to 25,313 in 1890, and 39,892 in 1914.

Copyrights were also flat from 1873 to 1878, then rose from 15,798 to 42,794 by 1890.

Production of rail freight cars rose from 9,000 in 1878 to 275,000 in 1907.

Manufactured fuel and lighting materials rose 382% from 1879 to 1914.

Production of coal rose 210% from 1893 to 1913; crude steel rose 715%.

Cotton used in textiles rose 260% from 1879 to 1909.

Paper and paperboard output tripled from 1900 to 1915.

Furniture production rose 263% from 1879 to 1913.

Electric power rose 18.4% per year from 1882 to 1914.

From March 1882 to May 1885, real growth slowed to about 1% a year. Britain had doubled the discount rate to 6% in early 1882, cutting imports from America, and there were strikes in the U.S. telegraph and railroad industries in this period. There was another brief slowdown in late 1890, when tariffs were raised and new legislation required more purchases of silver with new currency. Aside from those minor interruptions, the U.S. economy expanded rapidly from March 1879 through January 1893—almost 14 years. After rising by 8.4% a year from 1878 to 1882, real growth slowed to a respectable 5.3% a year from 1882 through 1892.

The U.S. economy then contracted sharply until mid-1894, and dropped again in 1896. This depression is commonly attributed to the gold standard, as is the unusually low level of farm prices in 1895-96. To the extent that monetary forces were to blame, however, the gold standard again proved to be the solution rather than the problem.

Most of the apparent deflation in 1894-96 was actually a relative decline in farm prices, which then accounted for over half of the wholesale price index. From 1892 to 1894, cotton production rose 36%, and the price fell 45%. In 1895, the supply of oats rose 23%, barley 41%, potatoes 53%. Prices fell. From 1894 to 1896, the production of corn increased by a whopping 65%, and the price fell 53%. Mary Ellen Lease of the Farmers' Alliance enjoined Kansas farmers to "raise less corn and more hell." Yet prices of wheat rose in 1894-96, as did cattle prices, indicating that the farmers' plight was not a general monetary phenomenon.

In July 1896, the Democrats nominated William Jennings Bryan for President, mainly on the theory that inflation could solve the farm glut. Ironically, every such success of those who attacked the gold standard actually contributed to the problem they were trying to solve. Indeed, the Bryan campaign was the main *cause* of the 1896 relapse, as contemporaries understood quite well.

A sympathetic historian, James Barnes, observed that "the nomination of Bryan really prostrated the men in the counting houses." The stock market began to tumble in mid-August, and reached the lowest point in more than 17 years. Hoarding of gold was "only one symptom of a general malady that pervades all circles," wrote *The Commercial and financial Chronical*, namely that "the business of the country is still being carried on in some measure almost ev-

erywhere under the weight of the free silver populistic scare."

Shortly before the election "in New York alone more than $1,000,000 of the government's gold was withdrawn in exchange for legal tenders. . . . A single brokerage house is reported to have sold over the counter $3,000,000 in gold in a single day. Interest rates on call money, which had ranged upward to 15% throughout the month, rose to 127%. . . . Long lines of men and women stood at the doors of the sub-treasury as well; before the day was over they had withdrawn more than $1,300,000 in gold."

Attempts to blame the farm-price decline of 1894-96 on a shortage of gold are incorrect in fact, as well as in theory. Annual world gold production increased every year from 1887 to 1899, by 190%. Nations are not driven off the gold standard by a loss of gold; they lose gold when they threaten to abandon the gold standard.

"The defeat of Bryan," noted Friedman and Schwartz, "is a convenient and dramatic date to mark the turning point." In a very real sense, Bryan's defeat marked another return to the gold standard, formalized in the Gold Standard Act of 1900. "Stock market indexes show a rise of close to 70 percent from August 1896 to August 1899. . . . The stock of money . . . bounded upward at an extraordinary rate: by 15 percent from 1897 to 1898, 17 percent from 1898 to 1899, 6 percent from 1899 to 1900, 15 percent from 1900 to 1901 and 9 percent from 1901 to 1902. . . . From 1896 to 1902, net national product in constant prices rose by 45 percent or at a rate in excess of 6 percent per year." The federal budget, which had been deeply in deficit, quickly moved into surplus with economic expansion.

The Federal budget deficit from 1894-99 provoked destructive fiscal policies. Tariffs were raised in 1890 and 1894, slowing export growth from 16% to 3% in 1891, and reducing exports by over 9% in 1895. An income tax was briefly enacted during the 1894 slump, and Teddy Roosevelt proposed to Congress in the Panic of 1907 that income and estate taxes be adopted to equalize fortunes. If these fiscal shocks did not initiate the simultaneous downturns, they were at least ill-timed.

Compelled, as usual, to choose between Republican hard-money and protectionism and Democratic soft-money and free-trade, the electorate returned the Democrats to office in 1913. Tariffs were eased a bit, but the income tax and Federal Reserve System were also created during a two-year recession that began in January 1913. The unemployment rate doubled and the 1915 deficit hit 8.4% of the budget. Before the U.S. entered the war, wholesale prices rose much more rapidly than the M2 money supply—at an 18% annual rate. The rapid prewar inflation appears to reflect a sharp drop in the willingness to hold dollars (a rise in velocity) that coincided with the birth of the Fed.

4. ENGLAND AFTER 1925: DEFLATION OR THE DOLE?

In April, 1925, Winston Churchill (then Chancellor of the Exchequer) returned England to a limited gold standard at the traditional prewar rate, the same as defined by Sir Isaac Newton in 1717. A pound would then be worth $4.86 in gold dollars. Even today, many economists accept the verdict of Keynes that this was massively deflationary and accounted for the high unemployment from that point on. Actually, most of the deflation occurred from 1920 to 1923, when wholesale prices fell by 48%. The prices of iron and steel (war materials) fell 65% from 1920 to 1925, but less than 8% from 1926 to 1929. Coal actually rose 26% in 1926, with a coal-led general strike, but that was obviously unsustainable. Wholesale food prices were fairly stable, down only 1.4% from 1923 to 1928. Cotton and wool prices peaked in 1924, then rose again in 1927 and 1928.

British wage rates stopped declining after 1924, and real income rose throughout the rest of the decade at a rate of nearly 4 percent per year. Real net national income per capita had fallen by 1.3% in 1915-24, compared with the previous decade, but rose 14.5% in 1925-34. Still, this was not the sort of vigorous boom that has typically accompanied every other return to a commodity standard. Unemployment dropped from 17% in 1921 to 9.7% in 1927, but continued to hover around 10% through 1929. Chronic unemployment was explained at the time by Jacques Rueff and Edwin Cannan, but the explanation was forgotten until it was recently revived by Daniel Benjamin and Levis Kochin of the University of Washington.

Unemployment remained high in Britain, and the recovery therefore weak, because of what Keynes called "the grave abuses of the dole." In 1920, unemployment benefits for a family of four had been 15% of average wages. After that, nominal benefits were increased several times while prices fell, and eligibility requirements were eased. Unemployment benefits rose to 48% of average wages in 1925, 54% in 1931. Almost anyone over the age of 16 could receive the dole after a few days if they had ever paid payroll taxes for 30 weeks. There was no limit at all on how long those benefits could be drawn. Even those who quit were eligible if they waited six weeks. These benefits were soon heavily subsidized out of general revenues, and the British tax load was probably "the world's heaviest."

Professors Benjamin and Kochin estimate that the liberalization of the dole added only 2.5-4% to British unemployment in 1921-25, but raised unemployment 5-8% in the gold standard years of 1926-31. Without that huge subsidy to leisure, and related tax on productive effort, the 1925 restoration of the gold standard would have been as successful as every other example.

On September 19, 1931, Great Britian casually let the pound float (sink) against gold, raising the discount rate from 4½% to 6% only after the event. As Keynes's biographer, Sir Roy Harrod, observed in 1971, "The British suspension of 1931 was followed by a decade of great disorder in the international monetary system."

Something else happened at the same time, however, that briefly improved Britain's *relative* performance within a collapsing world. In September, the dole was reduced by 10%, eligibility requirements tightened and the duration of benefits limited to 26 weeks. If leaving gold was of any help, it was only because an accelerating inflation after 1935 probably reduced real unemployment benefits until 1938. As usual, the retreat from hard money was soon accompanied by protectionism, with general tariffs imposed in January 1932 for the first time in nearly a century.

It is commonly believed that the British economy recovered about six months sooner than the U.S. because, as two monetarist economists recently wrote, "the U.K., abandoning gold in 1931, was able to avoid the further monetary contraction that took place in America." In short, "abandoning" gold supposedly made it easier for Britain to "reflate."

What actually happened, however, is that the pound remained convertible into gold, albeit at a variable price, while the U.S. suspended convertibility from March 1933 until February 1934. From the U.S. election of November 1932 until a year later, the British pound appreciated by 57% against the pre-Roosevelt dollar (gold at $20.67), and the British economy began to recover at the end of 1932. During the U.S. suspension, the Sauerbeck index of basic commodity prices rose 6.7% in Britain, while similar prices rose 41% in the U.S. The broader wholesale price index rose 30% in the U.S. from April 1933 to September 1934, while British wholesale prices were up only about 3% in 1934. The U.S. discovered that inflation is quite possible with high unemployment; Britain discovered that an earlier recovery was consistent with a stronger currency.

Both the U.S. and Britain recovered, however, aided by deposit insurance in the U.S. and lower real unemployment benefits in England. Stopping the U.S.-led deflation was necessary, but the deflation was not caused by the gold standard.

Before the Federal Reserve was established, the only serious deflations always occurred during periods when a country was *not* on a commodity standard, such as the U.S. in 1781-91 or 1865-78. This was because the public, under a commodity standard, could easily increase its liquid assets, as needed, by converting gold or silver into cash.

The severe deflations beginning in 1920 and 1929-31, however, illustrated the Fed's power to deliberately counteract this balancing force. The rise in the discount rate to a record 7% in June 1920, note Friedman and Schwartz, "was a deliberate act of policy involving a reaction stronger than needed since a gold inflow had already begun."

In 1931, too, "The U.S. gold stock rose during the first two years of contraction. . . . The United States did not follow gold-standard rules. We not only sterilized it, we went much further. . . . Foreign commentators were particularly critical of the monetary policy of the United States." The Fed, in short, more than neutralized the curative powers of convertibility in 1920-21 and 1929-31. Even as the world attempted to acquire more dollars by offering gold, the effort was thwarted by tightening in the face of falling commodity prices. In other words, the Fed bought gold and sold bonds. The Fed's loans and securities were reduced by 24% from 1928 to 1930 to offset $455 million in gold imports (over $600 million by 1931).

5. FRANCE IN 1926: THE POINCARE MIRACLE

Among major countries, the one least affected by the Depression and trade war was also the last to leave the gold standard in 1936—namely, France.

From 1919 to 1926, France had operated under a quantity rule for money, with legal limits on printing currency and monetizing government debt. Yet inflation continually increased more rapidly than the money supply because the demand for money fell. After Britain returned to gold, the French franc lost half its value against gold-convertible currencies in the year ending July 1926, and wholesale prices rose 50%.

Poincare formed a new government on July 25, 1926, and instituted a series of tax and monetary reforms by August 7. New currency had to be backed by added gold or gold-convertible foreign exchange. The top income tax rates were cut in half, and taxes

on inheritances and securities were also reduced, though some specific excise taxes were later adjusted for the previous inflation. Tax revenues were not increased in real terms, but were 15% lower in 1926 than in 1922.

The fundamental problem was monetary, but it had fiscal consequences. Although the budget deficit had shrunk by 68% from 1923 to 1925, the monetary collapse made it necessary to finance the debt with short maturities at escalating interest rates. Long-term interest rates had averaged about 3.2% under the prewar gold standard, but exceeded 10% by mid-1926. Within three months of the Poincare reform, however, the government was able to sell 40-year bonds at 7% to retire short-term debt. From August 1926 to August 1927, the commercial bill rate fell from 5.8% to 2%.

Looking back on the reform in 1929, Columbia Professor James Rogers wrote that "It should always be borne in mind that an almost entirely negligible reduction in the total debt has so far been accomplished. Mostly what has happened is that the extremely large and ever threatening current debt burden has been partially transferred to the future." That is, the stronger currency made it possible to sell long bonds, reducing the interest expense on the national debt.

The gold cover on currency (a form of quantity rule) proved too restrictive, and the economy slipped into recession in October, 1926. In order to arrest the sudden decline in prices, the franc was pegged to the dollar in December, effectively putting France back on the gold standard. The stock market rose immediately by 164% through February 1929—twice as fast as in the United States—and stocks remained higher even in 1933 than they had been in early 1926.

Real output *per capita* rose by 5.9% in 1928 and 9.5% in 1929, remaining above the 1927 level as late as 1934. The M2 money supply rose 10.7% in 1927, 16.3% in 1928 and 6.7% a year in 1929-31. Wholesale prices dropped slightly in early 1927, and were essentially unchanged in 1928-29.

THE RELEVANCE OF HISTORY

Other examples of the restoration of commodity standards are generally less relevant to the current world situation, because they occurred during extreme inflations. A brief review of what happened to Germany before and after World War I, however, highlights some similarities with more temperate monetary crises.

Germany had adopted a gold standard from 1876 to 1914, and experienced only one true recession (1891) in the entire period. After World War I, of course, Germany experienced the most famous hyperinflation on record—averaging 322% a month from August 1922 to November 1923. Thomas Sargent points out that the runaway inflation in Germany, as well as in Austria, Hungary and Poland, "were each ended by restoring convertibility to the dollar or equivalently to gold." Inflation was immediately ended despite a "rapid rise in the 'high powered' money supply in the months and years after the rapid inflation had ended." In Germany, for example, wholesale prices rose only 3.8% from December 1923 to December 1924, though M1 rose 261% in that period. Per capita production rose 67% from 1923 to 1925, and the related gains in real tax revenues balanced the budget.

In the other episodes examined earlier, however, the events leading up to monetary reform are more comparable to the current situation. These are some of the features these past periods had in common:

They were all initiated during the deflationary aftermath of a relatively moderate inflation.

Government budgets were an acute concern, usually with a combination of deficits, growing interest expense, and tax resistance.

There had already been many years of experience in trying to regulate or limit the quantity of money.

Interest rates were always historically high, particularly in real terms.

The results of monetary reform were also similar:

Real output always expanded very rapidly for at least four years.

The money supply grew even more rapidly.

There was no sustained inflation or deflation.

Interest rates were always reduced, and long-term rates almost never exceeded 5-6%.

The most recent return to a gold-based monetary system was Bretton Woods. In the first U.S. recovery under this regime, beginning in 1950, real GNP in the United States grew at a 13.5% annual rate for four quarter. The Bretton Woods system was reinforced from November 1961 to March 1968 by the London gold pool, which kept the price of gold firmly anchored at $35. Before that, real growth had averaged only 2.3% in the U.S. from 1956 to 1960. In the fourth quarter of 1961, however, when the gold pool began, real GNP jumped at a 10.6% rate and averaged 5.7% through the first quarter of 1966. Again, this was accompanied by rapid growth of liquid assets, 4-5% bond yields and little inflation. Annual growth of M2 averaged 8.1% from 1962 to 1965—not significantly different from the 8.5% rate of 1972-75, or the 8.6% rate from 1977 to 1980. Something else obviously changed in the latter years to account for the huge increase in price violatility, and equally dramatic slowdown of world output and trade.

Between March 1968 and August 1971, the United States severed any predictable links between the key reserve currency and the real world. The value of a dollar became a matter of continual guesswork. The results were exactly the same as in each of the historical episodes discussed before:

Waves of inflation followed by liquidation, bankruptcies and falling commodity prices.

Long-term interest rates usually rising, even during the periods of falling prices.

Longer, more frequent economic crises around a trend of slowing or falling production.

A shrinking tax base and rising government interest expense, producing government budget strains and tax resistance.

These same symptoms invariably arose during previous attempts to regulate the quantity of money, and the first reaction was usually to raise taxes or tariffs. It was only after the fiscal approach backfired that governments reluctantly turned to monetary reform. Circumstances, not theories, compelled the change, but only after at least a dozen years of growing discomfort.

The third American experiment with managed money began 11-15 years ago, which is about as long as has usually been tolerated in the past. In at least one respect—namely, the successive peaks of record-breaking interest rates—the recent experience has been among the worst. Whenever this occurred before, government officials have always turned to monetary reform, if only to alleviate the government's financial dilemma. When that happened, the results have never been subtle or gradual, but a sudden leap to a much higher and more stable growth path.

The reason for linking the dollar to commodities is not simply to stop inflation. A 1932-style credit crunch can do that—for a while. The stronger political incentive for restoring sound money is that it invariably unleashes an economic boom.●

THE CROP SURPLUS

HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 21, 1982

● Mr. HAMILTON. Mr. Speaker, I would like to insert one of my recent Washington Reports into the CONGRESSIONAL RECORD:

THE CROP SURPLUS

One of the most worrisome problems plaguing agriculture today is the growing surplus of crops—wheat, soybeans, and especially corn. Currently, the United States has about 152 million metric tons of stocks in excess of projected demand—almost two and one half times the ending stocks of just two years ago and enough to meet our domestic needs for nearly a year. It is our greatest surplus in more than 20 years, and it has resulted from three straight years of bumper crops at a time when export sales have lagged. Exports, which once siphoned off most of our excess, have dropped due to the worldwide recession, the strong dollar, aggressive expansion of markets by other countries, and fewer purchases by the Soviet Union. The massive surplus has led to the lowest grain prices in years, and it has caused a sharp increase in government payments to farmers. In percentage terms, these payments are rising faster than are outlays for defense or social security.

The surplus is being held in the farmer-owned reserve administered by the department of Agriculture (USDA), in the inventory of the USDA Commodity Credit Corporation (COC), and in free stocks. The stocks in the COC inventory, about 21 million metric tons, are government-owned. They accumulate as farmers who receive federal loans on their crops default on the loans when the market price is below the loan rates set by the USDA. Depressed market prices have caused the COC inventory to increase by 65 percent in the past two years. However, the bulk of the surplus, about 96 million metric tons, is being held in the farmer-owned reserve. The USDA provides incentives to farmers (such as subsidies for storage and higher loan rates) to store their crops when prices are low in order to drive prices up to s specific "trigger" set by the USDA. The farmer-owned reserve has been growing at an astounding rate, posting an increase of approximately 650 percent in only two years. Overall, the cost to the USDA this year for these two storage programs exceeded $2 billion, and it is expected to be significantly higher in 1983 since the surplus is much larger.

Other countries have much smaller surpluses than we do. We produce roughly one fifth of the grain in the world, yet we have almost three fifths of the world's surplus. Slight increases in trade and production by

other countries have caused a slight decline in their ending stocks, while our higher production and lagging exports have led to an increase of 240 percent in our ending stocks in the past two years. Major American reserves are necessary both to protect consumers from high prices as well as to minimize sharp price fluctuations for farmers, but too large a surplus depresses prices since prices for most crops are totally dependent on supply and demand. Experts claim that our current reserves are from 50 to 70 percent larger than is necessary or desirable.

A consensus has been growing among farm groups and government leaders that the traditional measures to cut surpluses, such as voluntary set-asides and export loan guarantees, have not been totally successful and need to be supplemented by new efforts. In this regard, a major change has taken place in the attitude of the Reagan Administration. Last year, Congress gave the USDA several specific powers to help the troubled farm sector, including authorization for export subsidies, a paid-acreage diversion, and an export credit revolving fund. The administration, however, chose not to use these powers, opposing "bailouts" for specific sectors of the economy and claiming that farm income would rise when the general economy recovered. The administration's position was that "agriculture is going to have to tough it out." Several factors, including the escalating COC expenditures and the failure to get significant concessions from our competitors in trade, have led the administration in recent weeks to reverse its earlier position. Among other things, it has announced a $1.5-billion, three-year "blended credit" program for foreign purchasers combining interest-free loans and federally guaranteed commercial loans; it is considering direct export subsidies; and it has proposed a "payment-in-kind" program to give some of the surplus back to farmers to "pay" them for reducing the amount they grow next year. Despite such efforts, the USDA has projected 1983 as the fourth straight year of record low farm income.

Overall, I believe that we must pursue several different approaches in our effort to reduce the surplus. First, we must look at alternative uses for the current stockpile, such as bartering more of it for strategic minerals and supplies or using some of it for the production of alcohol for government or military purposes. Second, we must trim our excess production, perhaps through a more attractive paid-acreage diversion or perhaps through a payment-in-kind program. However, we must be aware of the limitations of this general approach of cutting our production. The United States does not control enough of the market to raise prices automatically. Instead, sharp curtailment of our production might be seen by other nations as a chance to gain a greater share of the market.

It is clear to me that our primary emphasis should be on a third approach—aggressively expanding American exports. We must recognize that the American farm sector has been internationalized. Twenty years ago, we produced almost entirely for the domestic market and remained relatively isolated from external changes. Today, one of every three bushels of American grain is shipped abroad, and consequently the farm sector is highly sensitive to fluctuations in supply and demand in other countries, variations in exchange rates of currencies, and changes in foreign trade and agricultural policies. We must heed this reality and meet the present challenge head-on by developing a dynamic program to promote farm exports: expanding and improving our export credit programs, meeting our competitors' export subsidies with subsidies of our own, developing markets through an expanded program of food aid, revising aspects of our farm programs that price our goods out of the market, and guaranteeing that contracts to buy our farm products will not be voided for political reasons. Only then will we have achieved a more durable and lasting solution.●

A "LAMEDUCK" TRIUMPH: NUCLEAR WASTE POLICY ACT

HON. MARILYN LLOYD BOUQUARD

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 21, 1982

● Mrs. BOUQUARD. Mr. Speaker, the passage of the nuclear waste bill is the most dramatic evidence we have of constructive activity in this lameduck session. The final enactment of an articulated Federal Government policy on nuclear waste has been years in the offing and represents the work of numerous Members of the House and the Senate. At least seven House committees and three Senate committees were heavily involved in crafting final legislation which now awaits the President's signature.

This bill is a finely woven mixture of R&D features which complement a Federal repository program for permanent storage of high-level nuclear waste. Our Science and Technology Committee reported out our R&D version of the bill 1 year ago this week. I am pleased to note that the final legislation incorporates the major provisions of the bill (H.R. 5016) which I introduced nearly 1½ years ago. The bill authorizes construction of a test and evaluation facility for nuclear research and development so that the DOE can proceed with greater certainty in siting and constructing a long-term geologic repository. The generators of nuclear waste will pay for the site-specific R&D as well as the first commercial repository, that is, the program is to a great extent moved off-budget. Generic R&D will continue under Federal funding and our Energy Research and Production Subcommittee will be concerned about obtaining assurances that these activities complement the more site-specific test and evaluation facility work. I would encourage the Department of Energy to be aggressive in requesting a sufficient amount of funding in the fiscal year 1984 budget so that they can comply with the strong congressional intent of the Nuclear Waste Act.

Passage of this bill will be one of the major accomplishments of the 97th Congress, and I am extremely pleased that the full House has supported this effort to resolve, once and for all, the problem of uncertainties surrounding nuclear waste disposal.

Finally, I want to congratulate the three main committee chairmen on the House side, Messrs. FUQUA, UDALL and DINGELL; and the ranking minority members of the three committees, Messrs. WINN, LUJAN and BROYHILL, for their great efforts in seeing that this legislation was finally enacted into law.●

EXPLANATION OF SENATE AMENDMENT TO H.R. 3420

HON. NORMAN F. LENT

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 21, 1982

● Mr. LENT. Mr. Speaker, at this time, I would like to describe the Senate amendment to H.R. 3420 with which the House has just concurred. Title I of the Senate amendment deals with three technical changes to the Gas Pipeline Safety Act and the Hazardous Liquid Pipeline Safety Act.

Titles II through VII reflect many provisions contained within H.R. 6308, as passed by the House, and S. 1500, S. 1829, S. 2301, and S. 2430, as reported by the Senate Committee on Commerce, Science and Transportation. To the extent that the provisions contained within the Senate amendment are identical to, or substantially the same as, the provisions contained within these specific bills, reference should be made to the materials within the committee reports on such bills.

Title II of the amendment deals with the bankrupt Rock Island Railroad. It authorizes the Interstate Commerce Commission to set the purchase price for the acquisition of abandoned Rock Island lines in order to insure the continuation of essential service over those lines. It also establishes a labor protection program for Rock Island employees who are adversely affected by the railroad's bankruptcy. This program is based on the program established last year for Conrail employees and replaces a program previously approved by Congress which was struck down by the courts this year.

Title III of the amendment deals with the Northeast corridor improvement project. Basically, it clarifies the scope of the overall project and the availability for funds to operate service to Atlantic City, N.J. The amendment provides that the Secretary shall "expend or reserve for expenditure" funds out of the annual appropriations for the Northeast corridor improvement project in fiscal years 1983, 1984, and 1985 first for improvements to the rail line between the main line

of the Northeast corridor and Atlantic City, N.J. This language is included so that if circumstances over which the Secretary has no control make it impossible for him to actually expend funds out of the yearly appropriations first for the Atlantic City rail improvements and rehabilitation, then this language would permit other corridor project improvements to go forward as long as the Secretary first "reserves for expenditure" funds out of the yearly appropriations for the Northeast corridor project which are needed to accomplish the required improvements and rehabilitation of the Atlantic City rail line.

In addition, title III of the amendment makes funds available to consolidate railroad passenger service at Pennsylvania Station in New York City. These funds would be used for the rehabilitation of a rail line required to facilitate rail passenger service between Spuyten Duyvil on the Hudson line and the main line of the Northeast corridor. This proposal, referred to as the west side connection, would allow the Empire Service trains from upstate New York to connect directly with the Northeast corridor at Penn Station. The connection is expected to yield benefits of approximately $10 million a year.

Title IV of the amendment deals with railroad financial assistance. It extends the 505 preference share program for 3 years at a funding level of $55 million.

Title V of the amendment includes a number of miscellaneous provisions. One of these provisions reduces the current Conrail authorization in order to make $75 million available to the Northeast commuter authorities to insure the smooth transfer of commuter services now provided by Conrail. This provision also authorizes $15 million for the transfer of commuter rail operations in Chicago, and $35 million for the new Rock Island labor protection program.

Title VI of the amendment deals with the transfer of the Alaska Railroad. It provides for the orderly transfer of the Railroad from the Federal Government to the State of Alaska. In making this transfer, the Secretary of Transportation must be insured that the State will continue to provide rail service, assume certain rights and obligations, and protect the interests of the railroad's employees. It also provides for the expedited adjudication of Native claims to certain railroad lands.

Title VII of the amendment deals with railroad safety. It authorizes $29.3 million for fiscal 1983 and $31.4 million for fiscal 1984 to cover the rail safety activities of the Federal Railroad Administration. Further, it authorizes funding to assist the States in enforcing Federal safety laws, and funding for research and development.

Title VII also makes some substantive changes in the rail safety laws. The amendment to section 209(a) of the Federal Railroad Safety Act of 1970 is a clarifying amendment necessitated by the decision of a divided panel of the U.S. Court of Appeals for the Fifth Circuit in *Fort Worth and Denver Ry.* v. *U.S.*, No. 81-1405 (decided Dec. 6, 1982). That decision reversed the district court and set aside the revised freight car safety standards on the basis that the FRA was not empowered to issue strict liability standards under the Federal Railroad Safety Act of 1970. The amendment clarifies the original intent of the Congress and insures the effective operation of the freight car safety program. It embodies a strict liability standard in plain simple language, assuring that the 1970 legislation will be read in a way that is consistent with judicial decisions under the Safety Appliance Act, Locomotive Inspection Act, Signal Inspection Act, and the other railroad safety statutes. However, it is intended that the FRA will retain administrative discretion to condition responsibility for compliance with certain regulations on constructive or actual knowledge where fairness and proportionality so require.

It is expected that FRA will continue to use prudence in applying civil penalty sanctions under the freight car safety standards. FRA recognized in the preamble to those regulations that the purpose of civil penalties is to promote future compliance. As in the case of motor vehicle safety, the success of strict liability standards under the Federal Railroad Safety Act will be insured only if those subject to the standards have confidence that available sanctions will be applied fairly.●

A SUMMARY OF COMMITTEE ACTIVITIES DURING THE 97TH CONGRESS

HON. CLEMENT J. ZABLOCKI

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 21, 1982

● Mr. ZABLOCKI. Mr. Speaker, as chairman of the Committee on Foreign Affairs, I am pleased to present for the record a summary of committee activities during the 97th Congress.

Both the first and the second sessions of the Congress saw substantial contributions by the committee in legislation dealing with foreign affairs and in oversight on international issues.

All members of the committee joined in these productive efforts. They deserve our commendations for a job well done. I am further gratified that throughout the Congress the committee again maintained its tradition of bipartisanship on important foreign affairs issues.

From the convening of the 97th Congress on January 5, 1981, to adjournment on December 21, 1982, the committee authored 20 measures signed into law by the President. Another five had passed Congress by adjournment and were awaiting his signature.

In the House, 30 committee bills and joint resolutions passed during the Congress as did 53 concurrent and simple resolutions.

Among the committee's successful legislative efforts were bills for a 2-year security and economic assistance authorization, humanitarian assistance for Lebanon, export trading companies, a multinational force and observers in the Sinai, Export Administration Act amendments, Czech claims settlement, El Salvador presidential certification, and small business innovation development.

Among committee bills which passed the House but which the Senate failed to approve were radio broadcasting to Cuba and the resolution calling for a nuclear weapons freeze.

Numerous resolutions were approved by the committee, and later by both the House and Senate, in connection with human rights violations by the Soviet Union.

Some statistics indicating the extent of committee activities during the 97th Congress of interest are: 534 formal meetings, including 140 held by the full committee and 394 by the subcommittees; 1,071 witnesses heard during these meetings; 168 informal meetings, including 100 held by the full committee and 68 by subcommittees, to receive distinguished visitors and delegations; 148 distinguished visitors and 31 delegations received by the full committee or subcommittees at the informal meetings or other occasions during the Congress; and 33 committee reports filed with the House, 130 hearings printed, and 70 committee prints published for use of Members, other official personnel, and the public.

Mr. Speaker, I am proud of the record of the Foreign Affairs Committee in the 97th Congress and honored to be in its service. I look forward to further contributions by the committee in the new Congress.●

TRIBUTE TO LEO ZEFERETTI AND PETER PEYSER

HON. GERALDINE A. FERRARO

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, December 20, 1982

● Ms. FERRARO. Mr. Speaker, the New York delegation in the 98th Congress will sorely miss two veteran Congressmen, LEO C. ZEFERETTI of Brook-

lyn, and PETER A. PEYSER of Westchester County.

LEO ZEFERETTI came to this House in 1975, quickly rising into the ranks of leadership. As a member of the powerful Rules Committee, he was always a strong voice for New York and a spokesman for working people.

LEO ZEFERETTI never forgot his background as a corrections officer and crime fighter. As chairman of the Select Committee on Narcotics, he worked tirelessly to keep destructive illegal drugs out of our country and out of the hands of our young people.

Consumers and students will especially miss PETER PEYSER. He has never flinched from taking on powerful interests or the administration. In 1979, he led the fight to kill sugar price supports which would have cost American consumers billions of dollars. He became the House's leading defender of aid and loans to students seeking a college education. And he consistently supported vital child nutrition and school lunch programs.

The House, and New York State, have been richer for the service of these two outstanding Members of Congress. I will miss them and the Nation will miss them. I wish LEO ZEFERETTI and PETER PEYSER well in their new endeavors.●

TRIBUTE TO RETIRING NEW YORK MEMBERS OF CONGRESS: PETER PEYSER, LEO ZEFERETTI, AND SHIRLEY CHISHOLM

HON. TED WEISS

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, December 20, 1982

● Mr. WEISS. Mr. Speaker, I rise to pay recognition to three accomplished Members of New York State's delegation whose hard work and individuality will be sorely missed in the 98th Congress by me and by many others. I speak of three of my closest allies from New York who will not be returning in January, PETER PEYSER, LEO ZEFERETTI, and SHIRLEY CHISHOLM. I am proud to count all three among my friends.

As my colleague on the Education and Labor Committee, no member worked more tirelessly for education than did PETER PEYSER. Many Members saw him only as a voice of relentless dissent who stood his ground on the House floor no matter how unpopular his position. However, those of us who fought to maintain student aid programs in committee viewed him as an important leader in that cause. It is safe to say that he was in large part responsible for action taken by the Congress to restore funds for education programs the administration sought to cut.

Unfortunately, PETER became the victim of unfavorable redistricting and lost his seat for the 98th. However, those of us who have followed PETER's political course know that we will hear from him again. As a Republican in 1976, PETER surrendered his House seat to run for the Senate. He lost that contest, but returned to the House with renewed fervor as a Democrat in 1978. He was reelected in 1980.

Aside from the obvious political guile he exhibited in completing such a comeback amidst a party switch, PEYSER exercised unrelenting determination to return to public service. It is that determination which made him a forceful spokesperson for our democratic principles both on the House floor and in the Education and Labor Committee during the 97th Congress.

LEO ZEFERETTI also was forced to run in a district in which a large portion of the voters were not residents of his former district. He lost that election, but not his reputation in this body as one who gave careful consideration to every issue, especially those impacting New York.

As chairman of the Select Committee on Narcotics Abuse and Control, LEO sought to find a solution to the overwhelming drug problem that plagues our Nation by destroying so many lives. His background in law enforcement and criminal justice made him an effective advocate for efforts to control drug trafficking and he has introduced numerous pieces of legislation to improve Federal law enforcement of drug abuse. In addition, he has spoken out eloquently for improved health care, programs for the elderly, and economic development programs.

As a member of the powerful Committee on Rules, LEO gained respect as one who fought to promote open debate on a vast array of important issues.

Aside from all of these public accomplishments in Congress, which speak for themselves, I have known LEO ZEFERETTI as one of the most decent and honest Members of this body. He fought hard for what he wanted, especially if his own constituency benefited from his action. When he lost, he never lost his dignity.

Not often in life does a person enjoy the companionship of one as vibrant, intelligent, and dedicated as SHIRLEY CHISHOLM. Regretfully, she has chosen to retire from Congress to pursue other goals. I wish her well in her new endeavors, but I know too that she will continue to speak out against the powers which suppress the rights of women and minorities as she has done so eloquently for 14 years in Congress.

Every liberal who has practiced politics in New York City over the past two decades has grown to respect and admire Mrs. CHISHOLM. Her elections to the New York State Assembly in 1964 and to Congress in 1968 served as models for well-calculated rebellion within the system. Her brand of dissent, backed by intellect rather than disorder, offered thousands of disenchanted Americans, many women, and minorities, the hope that change could be accomplished from the pulpit, not only in the streets.

Upon the publication of her celebrated autobiography, "Unbought and Unbossed," she was already a true political hero in a torn nation that needed heroes. The title of her book framed for her an image which she has reinforced time and again by exhibiting individuality and creativity on many important issues.

Perhaps the apex of her popularity came in 1972, when she ran for the Democratic nomination for President, the first black woman ever to run for our highest office. Her candidacy became an important symbolic effort, especially to the millions of blacks and women who believed that their views were not being represented adequately by the Federal Government.

More recently, Mrs. CHISHOLM has directed her exquisite talents toward forging legislation to help the most disadvantaged in our society. As such, she has risen to prominence on the House Rules Committee. She championed landmark legislation that included millions of domestic workers in the coverage of the minimum-wage law.

Like PETER PEYSER and LEON ZEFERETTI, SHIRLEY CHISHOLM will be missed not only by those they represent or even by New York City alone. Indeed, the entire Nation will suffer when these three diligent public servants retire from public service.●

H.R. 6978, THE BANKRUPTCY COURT ACT OF 1982

HON. PETER W. RODINO, JR.

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 21, 1982

● Mr. RODINO. Mr. Speaker, I am extremely disappointed that the House will not act on the Judiciary Committee's bill to grant bankruptcy judges article III status under the Constitution, as required by the Supreme Court's decision in the Northern Pipeline case on June 28.

Congress failure to meet the Supreme Court's December 24 deadline could mean economic hardship for tens of thousands of American workers and the loss of millions of dollars in tax revenues recovered in bankruptcy proceedings. The large corporations that are now operating under chapter 11 bankruptcy may be forced to close if the bankruptcy court grinds to a halt on Christmas Day, substantially increasing unemployment across the country.

Congress inaction also undermines respect for the law by blatantly ignoring a constitutional mandate handed down by the highest court in the land. I feel strongly that when the Supreme Court hands down a ruling on a constitutional issue, that ruling must be obeyed. The Judiciary Committee met this responsibility with bipartisan support by reporting a bill in August to remedy the court problem in a simple and direct manner. The bill did not expand the bankruptcy court's numbers or its authority. It merely sought to accomplish what the Supreme Court has requested—to grant the court appropriate status under article III of the Constitution.

The bill, by itself, is not controversial. It became mired in controversy only when others wished to make it a vehicle for more comprehensive revisions in the bankruptcy laws.

An article III bankruptcy court is the only clear constitutional solution to the problem created by the Northern Pipeline ruling and, from the standpoint of judicial economy, cost to litigants, maximizing recovery to creditors, and successful rehabilitation of distressed companies, it is also the only practical option. A bifurcated or trifurcated jurisdictional system is fundamentally inefficient to the courts, creditors, and all parties in a bankruptcy proceeding, and is subject to constitutional doubt.

This constitutional question regarding the bankruptcy court system did not arise with the Northern Pipeline decision. The Congress has now examined this issue three times—in the 94th, 95th, and 97th Congresses. In both the 94th and 95th Congresses, the House reviewed the constitutional issues surrounding the bankruptcy courts and concluded that an article III bankruptcy court was constitutionally required. The House passed an article III bankruptcy court bill in the 95th Congress. In a compromise with the Senate, a non-article III court was created, however. It was this reluctant compromise court which was held unconstitutional in Northern Pipeline.

One constitutional scholar who testified before the subcommittee observed that:

> The Congress must realize that if it wishes to resolve this matter fully and responsibly, it must stop concentrating its attention on interim, stopgap measures and turn its energies to the long-run question. This means principally that Congress must stop losing sleep over the economic and social status of 220 bankruptcy judges and start to worry about the constitutional rights of 220 million American citizens. That * * * is the lesson of *Marathon Pipe Line.*

Aware of the necessity for prompt action in order for the Congress to comply wtih the October 4, 1982, deadline originally imposed by the Supreme Court in Northern Pipeline, the House Judiciary Subcommittee on Monopolies and Commercial Law immediately began hearings on possible legislative solutions to the constitutional problem. As a result of these hearings, I, along with Congressmen EDWARDS, MCCLORY, and BUTLER, introduced H.R. 6978, a bill to provide for the appointment of U.S. bankruptcy judges under article III of the Constitution, on August 12. On August 17, the subcommittee favorably passed H.R. 6978, and the Judiciary Committee ordered the bill favorably reported on August 19. The committee report on H.R. 6978 was filed on September 15 (H. Rept. 97-807).

I believe it behooves the House to have considered this important constitutional matter. It will be a poor reflection on the integrity of this institution to ignore the Supreme Court's decree.●

FOREIGN AFFAIRS NEWSLETTER

HON. LEE H. HAMILTON
OF INDIANA
IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 21, 1982

● Mr. HAMILTON. Mr. Speaker, I would like to insert my Foreign Affairs newsletter for December 1982, into the CONGRESSIONAL RECORD:

AMERICA, CHINA, AND THE SOVIET UNION

As American and Chinese officials met in Moscow for the funeral of Soviet leader Leonid Brezhnev, Americans were reminded of the complex, triangular relationship among the three powers. Since President Nixon's visit to China, Americans have thought of China as supportive of our policy of containing Soviet expansion. But when Soviet and Chinese officials hold high-level talks and express optimism about the prospects for improved Sino-Soviet relations, it is not a casual event.

Presidents Nixon, Ford, and Carter worked both to relax tensions with the Soviet Union and China and to secure benefit from Sino-Soviet tensions. SALT I in 1972 and the Helsinki accords on human rights in 1975 were manifestations of progress in our ties with the Soviet Union. More trade and access to new sources of energy were positive results of our ties with China. The main benefit of Sino-Soviet tensions for us was a new option toward the Soviet Union—that of using China as a countervailing power.

Today, our bilateral relations with the Soviet Union and China have changed. Soviet-American relations have deteriorated. We leveled sanctions in response to martial law in Poland and the Soviet invasion of Afghanistan. Arms control proposals were delayed and are now faltering. Soviet-American rhetoric has become shrill. This indicates to the Chinese that the Soviet-American accommodation of the 1970's has faltered. Sino-American relations have also deteriorated, but for reasons that are less well-known. Today, the Chinese suspect that we are uninterested in building on our relationship. President Reagan and many members of Congress are concerned about the abrogation of the Taiwanese-American treaty of mutual defense and Taiwan's loss of our recognition of its self-declared status as the official government of the Chinese people. Although the President continues to recognize China, he cut back cooperation. Also, he said that we would sell more arms to Taiwan. This prompted the Chinese to demand a halt to all such arms sales. After long negotiations, the United States and China recently signed a communique in which the United States promised not to sell arms to Taiwan in quantities exceeding levels of recent years, not to continue sales of arms indefinitely, and not to observe a "two-China" policy. For its part, China promised to continue its policies of peace toward Taiwan and full relations with the United States. Despite this communique, Sino-American relations have beome narrower. This indicates to the Soviets that our options with China are not what they once were.

There are other reasons for our loss of leverage in the complex, triangular relationship among the United States, China, and the Soviet Union. The Soviets see China as opposing Soviet expansion. Confronted with an economic mess at home, a costly arms race with the West, serious security problems in East Europe, and instability in Afghanistan and Iran, the Soviets want to lessen tensions with China, take advantage of the struggle for power in China after the death of Chinese leader Mao Zedong, and weaken the American position in East Asia. They are hoping to ease the military situation on the Sino-Soviet border. The Chinese have motives of their own in seeking with the new Soviet leadership a modest reduction in tensions. Beijing could be flirting with Moscow to stir America out of its coolness toward China, wanting to show the United States that it is independent and cannot be taken for granted. It sees the Soviet Union's internal problems as a chance to win concessions. China is puzzled by an American policy that is strong in anti-Soviet rhetoric but passive in dealing with the Soviets, ambiguous toward Taiwan but hesitant to push ahead in strategic discussions with China. Since they may believe that President Reagan will never deal with Moscow, the Chinese have apparently concluded that they have greater leverage with the Soviets. Chinese leader Deng Xiaoping may want to display flexibility toward Moscow to strengthen his hand with anti-western hardliners in the Chinese ruling circle.

The prospects for a significant Sino-Soviet reconciliation should not be exaggerated. China's foreign policy is still guided by a deep concern about the Soviet threat. The Soviets have shown no willingness to reduce the number of troops along their border with China, to leave Mongolia, or to get out of Afghanistan. They are not likely to accept a weakening of Vietnam's position in Southeast Asia. Because of ancient rivalries, hostility between the Soviet Union and China runs deep. Even their common communist ideology has not helped them enjoy good relations.

In approaching our relations with China and the Soviet Union, we should keep several things in mind. First, the basic question for us is whether China seeks a stance equidistant from Moscow and Washington (a policy that should not trouble us) or a genuine reconciliation with Moscow (a policy with vast strategic implications for us). Second, a modest improvement in Sino-Soviet relations is not necessarily bad: if the Chinese encourage Soviet withdrawal from Afghanistan, restore the integrity of Kampuchea, or abridge the Soviet commitment

to Vietnam, our interests would be well-served. Third, if we are not careful, our faltering relations with Beijing and Moscow could be major causes of Sino-Soviet reconciliation. Fourth, such a reconciliation would disturb Japan, our most important friend in Asia, by making easier Soviet efforts to influence events in the Far East. Fifth, we should not allow China to draw us into a bidding match with the Soviets.

American policy should seek to break the pattern of recent months. We should manage our bilateral relations with China and the Soviet Union on their own merits. As to China, the United States should resume political, economic, and, where advisable, military and technological cooperation. We should state emphatically that there is a mutual Sino-American interest in stopping Soviet expansion. We should encourage China's looking to us for help in modernizing its economy. As to the Soviet Union, the United States should muffle its rhetoric and move ahead with initiatives on arms control, Afghanistan, and Poland. We should test Mr. Andropov's expression of interest in improved relations.●

THE HONORABLE KEN HOLLAND

HON. DAN ROSTENKOWSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 9, 1982

● Mr. ROSTENKOWSKI. Mr. Speaker, as the 97th Congress draws to a close, many of our colleagues will not return to the 98th Congress.

I will especially miss my friend and fellow committee member, KEN HOLLAND.

He has been a source of strength for his State of South Carolina and its Fifth Congressional District.

KENNY is a legislator's legislator. He is not afraid to "tell it like it is." It is this attribute that has won him the respect and support of many of his colleagues.

His work on the Ethics Committee and his leadership of the Textile Caucus will be sorely missed in the 98th Congress.

On a personal level, I will miss KEN's strong support on issues before the Ways and Means Committee. His activities on behalf of the Democratic Tax Alternative last year were a source of inspiration and pride to me. I will not forget his actions.

I wish both KEN and his wife, Diane, health and happiness and hope that we will see KEN in public service again in the very near future.●

INDOCHINESE REFUGEES

HON. STEPHEN J. SOLARZ

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 21, 1982

● Mr. SOLARZ. Mr. Speaker, I would like to share with my colleagues the following article which recently appeared in Time magazine describing the harsh conditions encountered by Indochinese refugees—particularly in the NW-82 refugee camp in Thailand.

The plight of Indochinese refugees, vividly shown in this story, underscores the importance of a humane response from the United States and the rest of the international community to ease the suffering of these men, women, and children.

The article follows:

WAITING IN HOPE AND DESPAIR—INDOCHINESE "RESIDUALS" FIND THEY HAVE NO PLACE TO GO

The exodus of refugees from Indochina is a story of broken lives, broken dreams and broken promises. Since the fall of Saigon seven years ago, almost 500,000 boat people have passed through Southeast Asia to find new homes, mostly in the U.S., Western Europe and Australia. But an additional 175,000 refugees still languish in camps in Thailand. Because so many of them lack the skills deemed essential for resettlement elsewhere, they have come to be known in official jargon as "residuals," or people with "no guarantee of movement onward." The worst of these refugee camps is NW 82, a tropical purgatory 16 miles north of Aranyaprathet, a town on the Thai-Cambodian border. United Nations officials are not allowed to have a permanent presence in the heavily guarded enclosure. TIME Bangkok Bureau Chief David DeVoss was the first foreign correspondent permitted by Thai authorities to look inside NW 82. His report:

NW 82 looks more like a concentration camp than a refugee sanctuary. A barren mud flat smaller than a football field, it was originally designed to hold 800 people. Today it is home to more than 1,900 listless Vietnamese "land people," who singly or in family groups bribed their way across Cambodia, which is still occupied by 160,000 Vietnamese troops. Jumbled together inside 27 tents, the refugees each have a coffin-size sliver of space, 6 ft. by 3ft., in which to rest and sleep. Living conditions for new arrivals are even more crowded; they are housed in a series of bamboo tiers reminiscent of a 19th century slave ship.

Several months ago, the entire population came down with scabies. More recently, respiratory infections have been a problem, especially for the camp's 400 children. But the most serious malady is malaria. Nearly everyone has it, and some have suffered six or seven attacks. Says Tran Long, 27, a former mathematics teacher from Saigon: "Inadequate food and sanitation are our biggest problems. There are not enough latrines. The rainy season turns the camp into a cesspool."

Though it is surrounded by hostile anti-Vietnamese Khmer guerrillas and is within range of Vietnamese artillery inside Cambodia, NW 82 is not guarded by the Thai army. That task falls to the local militia, a sparsely equipped organization composed of former peasants, who are ill-disposed toward their Vietnamese charges. Several refugee women claim to have been raped, and men say that beatings are common. What is certain is that refugees who "misbehave" wind up spending the night in a red bamboo "tiger cage" 3 yds. long, 2 yds. wide and 1 yd. high.

Who is responsible for living conditions at NW 82? Thailand's supreme command insists, somewhat disingenuous, that it is the Geneva-based International Committee of the Red Cross (I.C.R.C.). The Red Cross vehemently denies any responsibility, other than medical, for the camp. Nearly a dozen Western embassies in Bangkok have joined the I.C.R.C. in asking the Thai government to move NW 82 away from the dangerous, malaria-infested border. But all the legations began to backpedal when the Thais said they would comply if the countries represented by the embassies agree to resettle all 1,900 refugees within 45 days.

Thailand's great fear is that it may be stuck with thousands like the residents of NW 82. During the first ten months of this year, 38,968 refugees were resettled, compared with 91,154 during the same period in 1981. Appearing before the executive board of the U.N. High Commissioner for Refugees in Geneva last month, Prasong Soonsiri, secretary-general of Thailand's National Security Council, blasted Western nations that have not honored their commitments to resettle Indochinese refugees. Said Prasong: "The lesson we learn is that being too merciful could lead us to bear an endless burden, and it cannot be forecast how much longer the Thai people would want to live with the problem."

Prasong is particularly angry at the U.S., which cut its quota for Indochinese refugees from 168,000 in 1980 to 100,000 in 1981. In the end the U.S. took in 73,000. What has happened is that the U.S. Immigration and Naturalization Service (INS) has new qualifications for refugees. Says a Bangkok-based U.S. official: "Someone who was a refugee in 1976 might not qualify as a refugee in 1982. A person must be able to show he has a good reason to fear prosecution. Conjecture is not enough."

During a five-day visit to Southeast Asia last month, U.S. Attorney General William French Smith discussed the problem with Thai officials. Smith said that Washington was not going to increase this year's quota of 64,000 refugees from Indochina, though he did promise that the U.S. would do its best to accept as many refugees as possible, up to the maximum quota.

Thailand has contributed to the problem through its policy of "human deterrence." In an effort to make the country unattractive as a sanctuary, the Bangkok government has decreed that no refugee arriving after August 1981 can leave for resettlement until every refugee who arrived previously has been moved out. The policy has proved a perverse punishment for many Laotians and Vietnamese who would meet American immigration requirements because they worked for the U.S. during the war years or have relatives in the U.S.

Despite the harsh conditions, most Vietnamese say they prefer living in NW 82 to returning to Viet Nam. Indeed, more than 600 land people cluster around hospitals in three border camps, hoping to get into NW 82. Says Nguyen Quoc Khanh, 41, a former lieutenant in the South Vietnamese army, whom the Communists sent to a jungle work camp for three years: "If we can get into NW 82, perhaps we can eventually get on a resettlement list. If you lived in South Viet Nam, you would understand why people have to flee. If it takes three years, I will wait." ●

REPRESENTATIVES TOM HAGEDORN AND ARLEN ERDAHL

HON. VIN WEBER

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 21, 1982

● Mr. WEBER of Minnesota. Mr. Speaker, two good friends from my home State of Minnesota will be leaving this Chamber at the end of the session, Representative TOM HAGEDORN and Representative ARLEN ERDAHL.

I have gotten to know both of these fine men over the years, and I must frankly say that this House and the people of this Nation will be losing great Representatives when they depart.

TOM has been the unabashed spokesman for rural Americans throughout the last four sessions of Congress. He is a principled defender of the free markets system in agriculture and fought hard to end the historic cheap food policy this country has had. He worked hard to change the estate tax law so family farms could be kept in the family. He worked hard to defend red meat producers when evidence falsely suggested their products caused cancer.

I have known TOM for a long time, all the way back to his first campaign for Congress when I served as his press secretary. Then and now, I admire them for standing up for conservative principles and for supporting President Reagan. He has worked hard to advance the conservative agenda of limited government, free enterprise, and individual liberty.

I will miss TOM.

My good friend ARLEN ERDAHL has been a spokesman for a compassionate America. He has fought the fight for handicapped citizens, for education for our people, and to end the international disgrace of poverty and malnutrition.

ARLEN served on the House Committee on Education and Labor. There he developed a national reputation for rational, thoughtful approaches toward meeting the needs of America. We have stood together on many issues. I will miss him.

Unfortunately, I believe the Nation will lose two great Representatives when TOM and ARLEN leave this Chamber. I hope they will continue to work for the America they believe in; their efforts have always been significant.●

EDMUND LEE HENSHAW, JR.

HON. GEORGE M. O'BRIEN

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Monday, December 20, 1982

● Mr. O'BRIEN. Mr. Speaker, I have a sneaking suspicion that if one were to ask a cross section of the Members and staff of the House exactly what the Clerk does, many would not know. But that is not bad. In fact, it is one of the highest compliments that could be paid the man all of us would rather not see retire this year, Ted Henshaw.

In theater there is an old expression that if an audience notices the lighting of a play, that lighting is not right. Similarly, if we of the House were to notice the many things the Clerk does, it would probably be because something about the way he was doing them was wrong.

Taking a look at the myriad responsibilities on the Clerk's shoulders is instructive on this point. Do you need to find out how you voted last year on a particular measure? Then you go to the tally clerk. Has someone on your staff done so well as to deserve a raise? It is the finance office that takes care of that. How about researching the history of a bill passed by the House 50 years ago? One would go to the House Library. Or make a tape for the radio stations back home? Or use the Legis system to keep up on legislation?

In all of these cases, and many more, it is the Clerk of the House on whom we ultimately rely. He is the one who makes sure the essential tasks get done, and done well, so that we can do the legislating for which we were sent here. The fact that we take so many of these crucial functions for granted shows how well they are executed.

During the last 6 years Ted Henshaw has had this responsibility. He had discharged it so well that some of us cannot imagine the House without him. We hate to see him go, but we understand his reasons for leaving. Ted, thank you for a job done so well that is was easy to rely on you.●

FIRST ANNUAL JUDITH E. McDADE SCHOLARSHIP AWARDED

HON. JACK F. KEMP

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 21, 1982

● Mr. KEMP. Mr. Speaker, Judy McDade was a neighbor of mine and one I was proud to call my friend. Before her tragic death in a mountain-climbing accident in Yosemite Park in 1981, Judy had already achieved a great deal. Academically, her performance was outstanding; she graduated with honors from both the Buffalo Seminary and Duke University. In pursuit of her studies in anthropology, and to further her goal of academic excellence, Judy spent a semester of her sophomore year in Kenya. Judy was a well-rounded young lady. Both she and her sisters, Grace and Diane, worked for me as interns and research assistants, and I was impressed by the wide variety of their interests, and by their dedication and their humanity.

This humanity is prevalent in all members of the McDade family, and it is typical of them that they created an important memorial to Judy's memory. The McDade family established a half-tuition, 4-year scholarship at Buffalo Seminary in Judy's name to be awarded to an incoming freshman who shows strong academic ability and financial need, with preference given to minorities. What more appropriate action could the family have taken which would have carried on the McDade tradition of dedication to academic achievement?

And what more appropriate recipient than Ut Bach Nguyen? Ut's family, refugees from the Communist regime in Vietnam, strive for academic excellence to better their own lives, and they function as an interdependent, supportive family unit. Although political circumstances kept the family apart for some 3 years, the family is now together in their own home in Buffalo, running a family business. The children are all excelling in school, in addition to working part-time evenings and weekends.

Ut transferred from a public high school to Buffalo Seminary because her teachers and counselors felt she would be better able to develop her abilities in an atmosphere where they would be more greatly challenged. Ut's progress at the seminary so impressed her teachers and the school's scholarship committee that they elected to award Ut the first Judith E. McDade scholarship. The committee felt that Ut exemplified the same qualities of character which had made Judy so special.

I would like to extend my congratulations to Ut and her family, and my best wishes to Ruth and Doug McDade, and their daughters, Grace and Diane. I plan to contribute to the scholarship fund, and I hope that some of you will be inspired to do the same.●

TRIBUTE TO REPRESENTATIVE JOHN BURTON

HON. TED WEISS

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 21, 1982

● Mr. WEISS. Mr. Speaker, I want to join in saluting the distinguished gentleman from California (Mr. JOHN BURTON) as he prepares to retire from a long and impressive career of public service. Since his election to the California State Assembly in 1965, he has proven himself a leader on an array of issues, particularly those which affect the truly needy in our society.

For close to two decades JOHN BURTON has consistently spoken for

what he, and his constituents, believe, even when it might be unpopular to do so. His was a prominent voice against the House Un-American Activities Committee in the late 1950's and early 1960's. And to this day he remains no less committed to protection of fundamental civil rights and civil liberties for all Americans regardless of ideology or belief.

For many years he has been an advocate for arms control and nuclear disarmament, and I know that he plans to maintain his commitment to ending the senseless nuclear arms race when he leaves this body. I have had the honor of serving with him on the Subcommittee on Government Activities and Transportation, where he has been a responsive and effective chairman.

His Subcommittee on Retirement Income and Employment of the Select Committee on Aging has made significant contributions to the income security of our Nation's senior citizens.

I regret that the gentleman has chosen to retire from this body. His participation will be sorely missed. At the same time I know that his personal involvement in the issues he has worked so hard for will not end. Congress and the Nation will miss his presence.●

SUBSTANTIVE BANKRUPTCY LAW CHANGES RELATING TO PERSONAL BANKRUPTCY

HON. PETER W. RODINO

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 21, 1982

● Mr. RODINO. Mr. Speaker, we do not have the time or the facts at hand to allow us to responsibly enact sweeping reforms of the personal bankruptcy law that would, in effect, totally repeal the historical fresh start concept of bankruptcy. And I believe we should have some hesitation in hastily embracing this radical proposal in the midst of this difficult economic period.

The General Accounting Office will complete a detailed study of personal bankruptcy early next Congress. When the constitutional problem in the bankruptcy court system is solved, the Judiciary Committee will finish its hearings on personal bankruptcy issues. I will introduced legislation to make those adjustments in the substantive bankruptcy law that are found to be warranted.

I believe that certain adjustments in the confirmation standard for chapter 13 plans are warranted, as well as certain other clarifying amendments relating to exemptions. However, other extensive changes that have been proposed are extremely far-reaching and controversial—particularly the so-called anticipated future income test. This would radically alter the fresh start concept that has been the bankruptcy policy of this country for almost 100 years and, in fact, is a proposal that Congress has specifically rejected several times in the past.

Consumer and labor groups, civil rights organizations, bar associations, bankruptcy judges, academics, and others have raised serious concerns about the ambiguity, the uniformity of application, the judicial impact, and the workability of this proposal.

The subcommittee is compiling and assessing all the data in order to arrive at practical and workable solutions. There is considerable hazard in adopting such far-reaching changes too quickly and on the basis of far too little information in this difficult economic time for so many Americans.●

MILITARY BALANCE

HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 21, 1982

● Mr. HAMILTON. Mr. Speaker, I would like to insert one of my recent Washington reports into the CONGRESSIONAL RECORD:

THE MILITARY BALANCE: QUESTIONS AND ANSWERS

Q. Is the United States inferior to the Soviet Union in military strength?

A. President Reagan believes so. He has said that "in virtually every measure of military power the Soviet Union enjoys a decided advantage." I am perplexed by his statement. It runs counter to the position of all of Mr. Reagan's predecessors—that the most basic measure of military strength shows the two powers roughly in balance. I cannot find a single high-ranking military officer who would exchange our armed forces in total for the armed forces of the Soviet Union. Moreover, even if Mr. Reagan is correct, it seems to me unwise for a Commander-in-Chief to denigrate our armed forces and to declare them inferior. Such talk can only encourage Soviet aggression.

My summary of how the military forces look would go like this: In strategic forces, we are far ahead in manned bombers and the warheads they carry. We are also ahead in the number of warheads on submarine-launched missiles, but the Soviet Union is ahead in submarines and submarine-launched missiles themselves. They have more land-based missiles. In ballistic-missile defenses, the Soviets are better off, but capabilities on both sides are low. In tactical aircraft, we are behind quantitatively, but our best interceptors are qualitatively better than the best the Soviets have. We are substantially in front in carrier-based airpower and aerial reconnaissance. In naval surface conbatants, we are doing better in carriers, both quantitatively and qualitatively. We also have a greater ability to supply our ships at sea, but the Soviet Union is ahead in cruise missiles which can attack ships. They have more attack submarines, but we lead in capacity to wage anti-submarine warfare. We are better able to airlift our forces over long distances. As to airlifts over short distances, the comparison depends on where the conflict takes place. In men under arms, the Soviet Union is ahead.

The comparative figures are important, though they do not tell the whole story. Assessing the balance is never a matter simply of totting up the figures. However, the figures do show trends in relative strength. By all accounts, Moscow is continuing to outdistance us in the numbers of weapons produced, and it is closing the gap in the quality of weapons. One reason for this is that the Soviets have devoted a larger share of their military budget to force modernization.

Q. Do the Soviets invest two or three times more than we do on defense?

A. The Soviet Union spends between 12 percent and 14 percent of its gross national product on defense; we spend between 5 percent and 6 percent. However, our gross national product is nearly twice theirs. If we add the defense spending of the western allies, we see $300 billion more on our side between 1971 and 1980. Moreover, the dollar-by-dollar comparison is misleading because the forces of the two countries are not really comparable item by item. Comparing figures without looking at mission, geography, the cohesion of the western allies, and the quality of forces distorts the result.

Q. Do the Soviets have more tanks, artillery pieces, aircraft, and ships than we do?

A. Yes, but the significance of this fact should not be overblown. We should not overlook the western allies or ignore the quality of our weapons. When the forces of the allies on both sides are totaled up, the numbers on each side are much closer. For example, American ships, though fewer than Soviet ships, are larger, except for some Soviet cruisers. Just as important, the total number of ships in the Atlantic Alliance exceeds the total number of ships in the Warsaw Pact.

Q. Is it true that the Soviet Union has 200 new Backfire Bombers, and is building 30 more each year, while many of our B-52's are old?

A. Yes, but again the view of the experts is that our old B-52's are better than their Soviet counterparts. Our total force of 316 active B-52's (with more than 30 in reserve) and 60 newer FB-111's is rated superior. Also, we are building two new bombers, the B-1 and the Stealth. The Soviet Backfire's reduced effectiveness at long range is another relevant factor.

Q. Does the Soviet Union have 1,200 warheads mounted on intermediate-range missiles in Europe, while we have none?

A. Yes, but not considered in this question are the hundreds of warheads carried on American aircraft in Europe or designated for use in Europe, or 162 British and French missiles capable of striking the Soviet Union. The western allies are scheduled to deploy 572 new missiles in Europe in late 1983, but the Soviets are also ahead in nuclear-capable aircraft in the European theater. These are areas where the Soviets have a clear edge, but something is being done.

Q. Has the Soviet Union put to sea 60 missile-bearing submarines in the past 15 years, while we have only recently put to sea our first missile-bearing submarine in 15 years?

A. Yes, but we are still far ahead in the number of warheads on submarine-launched missiles, and submarines remain the part of our triad least vulnerable to attack. Our submarines are on patrol 55% of the time; the newer Soviet ships do not do better than 15%. Ours are more immune to detection, and there is no serious danger to them

in the current Soviet anti-submarine arsenal.

Q. Did we freeze the number of long-range, land-based missiles in our triad in 1965?

A. Yes, but we have replaced and upgraded the missiles several times, with the result that they are far more capable than ever before. We have developed the technology to put more warheads on each missile, and in any case qualitative improvements are more important than sheer numbers. Because hardened missile silos can now be effectively attached, the large proportion of land-based missiles in the Soviet strategic forces will make the Soviet Union especially vulnerable.

In general, the figures do not show that the Soviets have the advantage in military power. The picture is complex and mixed. It is perhaps best described as a "balance of imbalances".●

JOHN L. BURTON

HON. NORMAN Y. MINETA

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 21, 1982

● Mr. MINETA. Mr. Speaker, I rise today to salute my spirited and distinguished colleague, Mr. JOHN BURTON. JOHN and I entered Congress together 8 years ago, and since that time, I have watched JOHN work as a truly outstanding public servant.

As the representative of California's Fifthh Congressional District and as a consistent political activist, JOHN always worked to improve our Government. JOHN demonstrated his compassion both as an ardent opponent of America's involvement in the Vietnam war and as a strong consumer advocate. I have seen JOHN take painstaking care in his work as chairman of the Government Operations Committee's Transportation Subcommittee, and that work paid off in the increased safety of all airline passengers.

Yet, JOHN BURTON brought even more than convictions and compassion to the U.S. Congress. He brought guts.

With candor, vigor, courage and an even-operating sense of humor, JOHN consistently challenged the truisms of our Federal bureaucracy, and in a system where people are too often comforted by the tonics of mutual approval, consensus and tradition, JOHN had nerve enough to criticize, dissent, and reform.

Congress will miss JOHN BURTON. I will miss him. And today, I am honored to join my colleagues in thanking this outstanding man.●

H.R. 5121

HON. RAY KOGOVSEK

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 21, 1982

● Mr. KOGOVSEK. Mr. Speaker, in passing the Federal Oil and Gas Royalty Management Act, the House of Representatives has taken an important step to reduce the over $2 billion lost annually by oil and gas producers to theft. This bill requires the Secretary of the Interior to initiate new inspection and accounting procedures to insure that theft losses are brought under control. These losses are estimated by the Department of the Interior to affect much of daily production in the United States.

Fortunately, American industry has already responded to the challenge offered by the goal of this legislation. Cypher Systems has developed a technological solution to the problem of monitoring inventories at remote sites in the oil and gas industry. This system, using microcomputer technology, allows the petroleum industry for the first time to measure accurately oil and other tank-stored fluids on even the most remote and widespread facilities operating from a central location—for example, company headquarters. A petroleum inventory manager using this system can instantly determine if an unauthorized removal of tank fluids is taking place. Access codes in the Cypher System allow operators to perform only those functions assigned to them.

By requiring inventory security systems on public oil leases, the Federal Oil and Gas Management Act of 1982 will set a standard for the petroleum industry which in time will insure that the U.S. Government, Indian tribes, and other oil and gas owners receive the full measure of royalties and other payments due them on their leases.●

EXEMPLARY TRAINING EFFORTS IN BERKSHIRE COUNTY

HON. SILVIO O. CONTE

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 21, 1982

● Mr. CONTE. Mr. Speaker, three summer youth employment programs (SYEP) in Berkshire County, Mass., have been designated as exemplary programs by the Massachusetts Department of Manpower Development. The prime sponsor for these programs is the Berkshire employment and training program that is under the directorship of Werner Elsberg.

The Taconic High School vocational exploration program, located in Pittsfield, Mass., provided 175 hours of skills training and occupational information to disadvantaged youth ages 14 to 21 in Berkshire County. In conjunction with the local school district, the program operated in July and August of 1982, servicing some 60 participants.

Located in Lee, Mass., the Lee High School vocational exploration program serviced 40 participants in July and August of this year. The program exposed CETA eligible youth to four different vocational clusters. In addition to "hands-on" exposure, participants received career information concerning training requirements, job descriptions, salary ranges, and regional openings.

The third exemplary program, the Mount Greylock High School vocational exploration program, is located in Williamstown, Mass., and serviced 60 participants in July and August of 1982. The program provided needed income, skills training, and occupational information to disadvantaged youth ages 14 to 21 in Berkshire County.

According to the Massachusetts Department of Manpower Development, the programs designated "best exemplify the range of innovative and successful program designs offered within the Massachusetts employment and training system." The program also exhibits a strong public/private sector linkage.

Mr. Speaker, I applaud the efforts of these training programs. In this desperate time of high unemployment, specifically designed and well administered programs such as the ones I just mentioned are necessary for a substantial and long lasting economic recovery.●

LEO C. ZEFERETTI

HON. FRANK ANNUNZIO

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Monday, December 20, 1982

● Mr. ANNUNZIO. Mr. Speaker, I rise in tribute to the Honorable LEO C. ZEFERETTI, who retiring at the close of the 97th Congress after 8 years of service to his constituents in the 15th District of New York.

Congressman ZEFERETTI began his career of service to our Nation as a Navy yeoman, second class, from 1944 to 1949, and was decorated with the American Theater, European Theater, and Victory Medals. He was also employed at New York City's Department of Corrections and was appointed to the New York State Crime Control Planning Board, and served as a representative on the National Conference on Correction and the Conference for a National Correction Academy. He was awarded the Order of St. Brigida, Cavalieri Commendatori, by the Italian Government.

He was elected to the 94th Congress in 1974, and compiled a splendid record of excellence and ability as a member of the House Education and Labor Committee, the House Merchant Marine and Fisheries Committee, the House Select Committee on Professional Sports, and the House Task Force on Pensions.

Few men have given more of themselves to good government, or have a more compassionate understanding of human problems than LEO ZEFERETTI. As a member of the House Rules Committee and the Select Committee on Narcotics Abuse and Control, he was in the forefront of efforts to implement meaningful solutions and effective action on behalf of the individual citizen.

Leo is a fine legislator and a distinguished leader, and he will be missed here in the House of Representatives. I extend to him my best wishes for continued success in all his endeavors.●

SENATE COMMITTEE MEETINGS

Title IV of Senate Resolution 4, agreed to by the Senate on February 4, 1977, calls for establishment of a system for a computerized schedule of all meetings and hearings of Senate committees, subcommittees, joint committees, and committees of conference. This title requires all such committees to notify the Office of the Senate Daily Digest—designated by the Rules Committee—of the time, place, and purpose of the meetings, when scheduled, and any cancellations or changes in the meetings as they occur.

As an additional procedure along with the computerization of this information, the Office of the Senate Daily Digest will prepare this information for printing in the Extensions of Remarks section of the CONGRESSIONAL RECORD on Monday and Wednesday of each week.

Any changes in committee scheduling will be indicated by placement of an asterisk to the left of the name of the unit conducting such meetings.

Meetings scheduled for Thursday, December 23, 1982, may be found in the Daily Digest of today's RECORD.

MEETINGS SCHEDULED

JANUARY 10

10:00 a.m.
Foreign Relations
International Economic Policy Subcommittee
To hold hearings on the effects of current economic problems on international affairs.
4221 Dirksen Building

2:00 p.m.
Foreign Relations
International Economic Policy Subcommittee
To continue hearings on the effects of current economic problems on international affairs.
4221 Dirksen Building

JANUARY 12

9:30 a.m.
Labor and Human Resources
Employment and Productivity Subcommittee
To hold hearings to review Federal programs which create certain job opportunities.
4232 Dirksen Building

JANUARY 19

10:00 a.m.
Foreign Relations
International Economic Policy Subcommittee
To hold hearings on the current international debt situation.
4221 Dirksen Building

JANUARY 25

9:30 a.m.
Finance
To hold hearings on the administration's assessment of the meeting of ministers to the General Agreement on Tariffs and Trade (GATT).
2221 Dirksen Building

Rules and Administration
To hold an organizational meeting, to consider its rules of procedure for the 98th Congress, membership assignments for the Joint Committee on Printing and Joint Committee on the Library, an original resolution requesting funds for operating expenses of the committee for 1983, to authorize tests of computer equipment in Senator's offices, and to consider other pending business.
301 Russell Building

JANUARY 26

9:30 a.m.
Rules and Administration
To hold hearings on Presidential and congressional campaign finance laws.
301 Russell Building

JANUARY 27

9:30 a.m.
Rules and Administration
To continue hearings on Presidential and congressional campaign finance laws.
301 Russell Building

FEBRUARY 1

10:00 a.m.
Foreign Relations
International Economic Policy Subcommittee
To hold hearings on proposed solutions to global economic problems.
4221 Dirksen Building

FEBRUARY 2

9:30 a.m.
Rules and Administration
To hold hearings on mass mailings and the use of postal patron mail.
301 Russell Building

FEBRUARY 3

9:30 a.m.
Small Business
To hold oversight hearings on the Small business investment company program of the Small Business Administration.
424 Russell Building

FEBRUARY 15

9:30 a.m.
Rules and Administration
To hold hearings on committee resolutions requesting funds for operating expenses for 1983.
301 Russell Building

FEBRUARY 16

9:30 a.m.
Rules and Administration
To continue hearings on committee resolutions requesting funds for operating expenses for 1983.
301 Russell Building

FEBRUARY 17

9:30 a.m.
Rules and Administration
To continue hearings on committee resolutions requesting funds for operating expenses for 1983.
301 Russell Building

FEBRUARY 22

9:30 a.m.
Rules and Administration
Business meeting, to consider committee resolutions requesting funds for operating expenses for 1983, and proposed legislation relating to Senate mass mailing.
301 Russell Building

FEBRUARY 27

10:00 a.m.
Foreign Relations
To hold hearings on the prospective nomination of Edward J. Derwinski, of Illinois, to be Counselor, Department of State.
4221 Dirksen Building

SENATE—*Wednesday, December 22, 1982*

(Legislative day of Monday, December 20, 1982)

The Senate met at 1 p.m. and was called to order by the President pro tempore (Mr. THURMOND).

The PRESIDENT pro tempore. The Senate will come to order.

Under the previous order, the Senate will stand in recess until 8 a.m., Thursday, December 23, 1982.

RECESS UNTIL 8 A.M., THURSDAY, DECEMBER 23, 1982

Thereupon, at 1 o'clock and 52 seconds p.m., the Senate recessed until Thursday, December 23, 1982, at 8 a.m.

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

SENATE—*Thursday, December 23, 1982*

(Legislative day of Monday, December 20, 1982)

The Senate met at 8 a.m., on the expiration of the recess, and was called to order by the President pro tempore (Mr. THURMOND).

PRAYER

The Chaplain, the Reverend Richard C. Halverson, D.D., offered the following prayer:

Let us pray:

Almighty God, Lord of Heaven and Earth, Who "giveth to all life and breath and all things * * *" in whom we "live and move and have our being * * *" we invoke Thy presence upon this final session. Nothing is too big for Thee, nothing is too small for Thee. Thou art the God of the universe and of the atom. The nations are as a "drop in the bucket to Thee," and "a sparrow does not fall to the ground but Thou dost know it."

Thy word makes plain that Thou dost "work in everything for good to them that love Thee and are called according to Thy purpose." We accept that profound reality for our Nation and ourselves. Bless the decisions made here that conform to Thy will and to the common good. Overrule in Thy grace the decisions made here which are contrary to Thy perfect plan and to the welfare of the people.

May Thy love and blessing abide upon the lives and loved ones of every Member of this large Senate family, and may the joy of Christmas infuse all our activities despite the hostility, the frustration, the disappointment, and the exhaustion of these past days. We pray in the name of the one whose birthday we celebrate.

The Lord bless thee and keep thee. The Lord make his face to shine upon thee and be gracious unto thee. The Lord lift up his countenance upon thee and give thee peace.

Amen.

RECOGNITION OF THE MAJORITY LEADER

Mr. BAKER. I thank the Chair.

SURFACE TRANSPORTATION ACT OF 1982

CLOTURE VOTE AT 9:30 A.M.

Mr. BAKER. Mr. President, I need not remind Senators, I am sure, that there will be a vote by unanimous consent today at 9:30 a.m. on cloture on the conference report to be followed at 11:30 a.m. by a vote on the conference report itself.

There are a few routine calendar items that may be cleared on both sides for action by unanimous consent but no other action will be done by the Senate this session.

Mr. HELMS. Mr. President, will the majority leader yield to me?

Mr. BAKER. I yield.

Mr. HELMS. Would the majority leader be interested in vitiating the time certain at 11:30 a.m. and going right to a vote if cloture is invoked?

Mr. BAKER. Yes, Mr. President, I believe so.

But could I say to my friend, as happy as I would be at that, I think I had better check my own list and see how that interacts with Senators' plans.

I thank the Senator for the suggestion and if he will permit me to take that suggestion and explore it I will have an answer within the next few moments.

Mr. HELMS. Very well.

Mr. PROXMIRE. Mr. President, if the majority leader will yield, on our side we wish to do the same thing very much and appreciate the suggestion of the Senator from North Carolina. It probably will be very helpful. We should check it out.

Mr. BAKER. Very well.

Mr. President, while I do that and being uncertain as to whether the acting minority leader wishes to speak now or reserve his time, let me put this request.

I ask unanimous consent that I may reserve my time for utilization during the remainder of this day.

I yield the floor so that the acting minority leader may seek recognition.

RECOGNITION OF THE ACTING MINORITY LEADER

The PRESIDING OFFICER (Mr. GORTON). The acting minority leader is recognized.

Mr. PROXMIRE. Mr. President, I shall take a minute and reserve the remainder of the time for the minority leader.

RUBBLE AND SHOVELS

Mr. PROXMIRE. Mr. President, Bertrand Russell addressed the House of Lords in 1945, four months after the bombing of Hiroshima. He said: "As I go about the streets and see St. Paul's, the British Museum, the Houses of Parliament * * * in my mind's eye, I see a nightmare vision of those buildings as heaps of rubble with corpses all round them. That is a thing we have got to face * * * throughout the civilized world."

Mr. President, I share the late Lord Russell's concern about the power of nuclear arms to destroy all that we hold dear. I hope the Capitol, the Supreme Court, and the Washington Monument will never be reduced to rubble, along with the rest of the country.

Anthony Lewis recently published an article in the New York Times, "Atoms and Politics," that is of great interest to those of us involved in the nuclear arms debate. According to Lewis, the defense policies of the Reagan administration are indefensible. Why? Key administration officials, such as Caspar Weinberger, Eugene Rostow, and Reagan himself, believe the best way to deal with the Soviets is to build and build and build more nuclear weapons to scare them into submission.

What is the rationale behind such a policy? First, many in the administration think that a superior nuclear force will strengthen our hand in solving regional conflicts with the Soviets, such as the situation in Afghanistan. Second, some argue that Soviet economic conditions are so strained that if we set a fast pace in the arms race, sooner or later they will have no choice but to negotiate arms limitations.

Lewis considers this approach foolhardy and dangerous, for two reasons. First, our gradual policy shift away from deterrence to deploying new first-strike weapons is alarming to our NATO allies. It appears to them as though we are courting nuclear disaster by flaunting an array of stunningly powerful weapons. Lord Zuckerman, a British defense expert, declared that the Reagan administration has sent "blood-curdling messages" to Europe with its defense policies.

Second, he argues, if we continue to invent and deploy new weapons, the temptations to use them may grow stronger. Indeed, we may be fooled into believing we can win a nuclear war with them. T. K. Jones, the Deputy Under Secretary of Defense, subscribes to this theory already. He once declared that the United States could "win" an all-out nuclear war, provided "there are enough shovels to go around."

This statement may sound funny, but the joke is on us if we laugh at it. For the fact is that the person who said it meant it, and furthermore, exerts influence over our defense policy. Lewis urges us to soothe our

allies and counteract this kind of mentality by recognizing the danger of destabilizing weapons, and doing all we can to keep new ones out of the arms race. In the future, he would like to see a renegotiated SALT II, and a comprehensive ban on testing of nuclear weapons. He argues both would be ultimately more constructive and amenable to peace than the anticipated arms buildup.

Mr. President, I ask unanimous consent that the Lewis article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the New York Times, Nov. 8, 1982]

ATOMS AND POLITICS

(By Anthony Lewis)

BOSTON, Nov. 7—The public campaign to stop the nuclear arms race, which has just had its greatest American success with voter approval of freeze resolutions, has to reckon with a central political fact: Many of President Reagan's key advisers on these questions want an arms race.

The men shaping nuclear weapons policy in this Administration are such intellectual hawks as Richard Perle, Assistant Secretary of Defense for International Security Policy, and Eugene V. Rostow, Director of the Arms Control and Disarmament Agency. They are carrying out in office their stated belief that the United States should challenge the Soviet Union by a massive nuclear buildup, for two broad reasons.

First, they argue, the U.S. will be able to apply pressure in regional confrontations with the U.S.S.R. if it has an edge in nuclear weapons. Such political leverage requires that we have not only superior deterrent weapons but a nuclear war-fighting capacity—and that we are ready, in Mr. Perle's words, "to move up the escalation ladder."

Second, they believe that an all-out arms race will put the Soviet Union under tremendous economic pressure, forcing it to accept limits on its weaponry. Mr. Reagan spoke from that premise when he said in the 1980 campaign that "the one card that's been missing" in arms control negotiations was "the possibility of an arms race." He has done everything he can in office to make that possibility a reality.

The ultimate aim of the nuclear hawks is deeper still. It is to confront the Soviets and force changes in their whole system: "To intimidate, disrupt and eventually transform the Soviet Union by the threat of nuclear war."

That characterization of the hawks' purpose comes from a gripping new book, "With Enough Shovels: Reagan, Bush and Nuclear War." It is by Robert Scheer, national correspondent of The Los Angeles Times, who over the last three years has interviewed Ronald Reagan, George Bush and many of the nuclear thinkers for his paper—and somehow got them to talk with chilling candor.

A particularly memorable Scheer interview was with T. K. Jones, Deputy Under Secretary of Defense, who said that with a good civil defense program, the United States could recover from all-out nuclear war in two to four years. The key thing, he said, was for people to dig holes and get under three feet of dirt: "If there are enough shovels to go around, everyone's going to make it." There is a lunatic hilarity to Mr. Jones, but of course he and the others are not really funny. What makes Mr. Scheer's book so powerful is that he takes the nuclear hawks seriously. And he treats them fairly, giving their views full expression and showing their human side.

The odd thing noted by Mr. Scheer is the huge gap between the ordinary family life of these men, their personal joy and pain, and the cold abstractions of their talk about nuclear war-fighting. It is as if they did not understand the danger of such talk—and of the weapons programs they are pushing to carry out their theories. To call a book "important" makes it sound worthily dull; this one is both essential and fascinating.

To understand the philosophy of the Reagan hawks is to appreciate why they arouse such anxiety among our European allies. The most moderate Europeans are terrified by the drift of American strategic thinking from deterrence to plans and weapons for actually fighting a nuclear war.

Lord Zuckerman, a noted British scientist and adviser to many governments, has said that the Reagan Administration's nuclear war-fighting theories send "bloodcurdling messages" to Europe. Writing in M.I.T.'s Technology Review, he says it may be impossible to hold NATO together if U.S. officials go on with their "talk of using nuclear weapons to render ineffective the whole of the Soviet political and military system."

All this indicates where the priorities lie for Americans concerned about the nuclear arms race. The immediate need is to stop the deployment of new weapons that would be destabilizing because they fit war-fighting doctrine: the MX, for example, whose characteristics would make it useful for a massive first strike, and the Pershing 2, which from bases in West Germany could hit Soviet targets in six minutes.

Is there any practical way to negotiate, with the Soviets, a freeze on the most terrifying aspects of the nuclear arms race? Yes—and the main elements of such talks are obvious now. They would include a renegotiated SALT II and a comprehensive ban on testing, the best way to stop the deployment of new weapons.

Can it happen? Is there any hope for such a limited, urgent negotiation? The answer is that there can be only if President Reagan is convinced that the nuclear hawks are leading him into a dangerous blind alley—convinced by other advisers, by Congress and by all of us.

VERY REAL NEED FOR THE GENOCIDE CONVENTION

Mr. PROXMIRE. Mr. President, in order to meet our full responsibility in the area of human rights, we must ratify the Treaty for Prevention and Punishment of the Crime of Genocide. Since 1967, I have stressed the vital importance of this treaty, and today, once again, I should like to state my belief in the very real need for ratification.

The right to exist is the most fundamental human right that any racial, religious, or ethnic group can possess. As a leader in the area of international human rights, the United States has worked hard to uphold civil and political liberties around the globe. However, our Nation—thanks to neglect by the Senate—has turned its back on one of the most critical proposals to advance worldwide human rights; the treaty to outlaw genocide.

Think of the depth of the Senate's neglect. In 1948, the United Nations unanimously approved the Genocide Convention, and our country not only signed it just 2 days later, but was the author and principal advocate of the treaty. Although President Truman sent the treaty to this body for its advice and consent soon after, it still remains in the Senate today. Ironically, the United States, which played a major role in drawing up the treaty, now stands silent on this essential human issue. And while we have neglected to take concrete action, over 80 other nations, including every major nation in the world except the United States, have ratified the treaty.

Mr. President, what keeps us from joining these other nations in their official stand against this heinous act? Certainly we cannot have forgotten the horrors of the Nazi Holocaust and our duty to prevent another episode of genocide in our century. In the last few years, genocidal actions have occurred in Asia and Africa, outrageous actions. Our human rights agenda must include an official condemnation of genocides. I urge the Senate to ratify this treaty which makes genocide an international crime!

Mr. President, I reserve the remainder of our time.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BAKER. I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

VOTING PROCEDURE

Mr. BAKER. Mr. President, in response to the generous offer of the Senator from North Carolina to consider rearranging the schedule today so that if cloture is invoked a vote would occur immediately on the conference report without any further debate or other intervening action, I said then and I repeat now that I will not put that question at this time, but some Members are on notice that it appears that request will probably be put. I wanted to reiterate it now and suggest that the request probably will be made to the Senate sometime between 9 and 9:15. So that Members who may hear me in their offices should be aware of the fact that it looks like we are going to be able to clear it on this side and that the request will be put a little later in the morning in all likelihood, and Members are now on notice of that possibility.

ORDER OF PROCEDURE

Mr. BAKER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. PRYOR. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. PRYOR. Mr. President, I ask unanimous consent that my remarks be made as if in morning business.

The PRESIDING OFFICER. Without objection, it is so ordered.

CONTINUING IRRESOLUTION

Mr. PRYOR. Mr. President, shame, disgust, and ridicule have been visited upon this body. Americans everywhere are bewildered and sickened by the way we have made a mockery of a once-revered institution. We have no reason for pride as we tuck our tails and slink out of this city.

The infamous lameduck session of Congress is thankfully breathing its final gasp, ending what one of my colleagues referred to as a "trial by ordeal."

Serious problems surfaced early in the regular session. On October 1, the new fiscal year began with only three appropriations bills completed. Four others were approved early in the lameduck session, leaving a total of six. Instead of dealing directly with each of these remaining and very important measures, we opted for a "continuing resolution," which shifts forward those funding levels approved in 1981 to cover programs through fiscal year 1983.

In other words, government by splinter and Band-Aid. As Senator HARRY BYRD of Virginia put it, "We call this legislation a continuing resolution. I think what it continues is total fiscal irresponsibility."

The continuing resolution, containing more than $425 billion, was sent to the Senate after being considered in committee for a total of 4 hours. We had 26 hours to pass the bill before the Government was scheduled to shut down. At one point, we were in session for 36 straight hours, considering such items as the MX missile, covert military operations in Central America, and Federal regulations of doctors and lawyers. The final bill was neither wise nor reasoned, and I voted against it. It would have given Rube Goldberg a case of the shingles.

Taken in isolation, our present fix is bad enough. Even worse is the growing perception that we are caught in the vise of a longstanding precedent. For the last 20 years Congress has opted to run the Government by a beastly contrivance called a continuing resolution. For two decades, we have seen 79 of these resolutions fund the Government in a stopgap, cut-and-paste funding mechanism. A record of this kind, to put it simply, is a blatant abdication of responsibility.

The problem the Senate currently faces lies neither in its leadership nor in any of its individual Members. Rather it goes to the center of its method of doing business.

Consider these facts, based on the first 6 months of 1982:

Item. Out of a total of 181 days, the Senate was in session for only 72. Votes on substantive legislation were taken on 32 days, with final passage taken on 15. That is a total of 15 days in 6 months.

The Senate was in session a total of 597 hours. Of that time, 198 were spent in recess and quorum calls. That means one-third of the Senate's time was consumed in quorum calls and recesses.

Also consider the following:

Item. We authorized defense funding before the budget limits had been established.

Item. The postal fraud bill, with over 340 sponsors in the House and Senate, died on the calendar after passing both bodies—because one Member objected to its final approval.

Item. We approved funding for housing programs without the required annual review of those programs.

Item. We debated school prayer and abortion in the context of an extension of the debt ceiling.

Item. Farmers, broken and destitute, came away from this session empty-handed.

In an age of high technology and instant change, the Senate continues to employ obsolete and clumsy procedures. Instead of lifting off like the Space Shuttle *Columbia*, it pokes along at the pace of a one-horse shay.

Among the Senate's most protected traditions is the filibuster, a rule whereby a handful of Senators can bring the entire Congress to a halt. Another absurdity is a looseness in the "germane" provision, which means that amendments dealing with defense, for instance, can be added to an agriculture bill, and vice versa. Still a third makes it possible to bring up a proposal time after time during the same session of Congress, even though it gets defeated on each vote.

Equally serious are problems of more recent vintage. The budget process has grown so complicated that in the current fiscal year the Senate was able to agree on only 3 of 13 appropriations measures. Institutional inertia and a lack of legislative discipline have caused the Senate to miss nearly all of the deadlines established in the Budget Act. There are now a total of 242 Senate and House subcommittees, many with conflicting and overlapping jurisdictions. Instead of charting broad national policy, the Congress has become bogged down with administrative details such as tax breaks for individual companies, pay raises, and what period to declare "National Cookie Week."

My colleague from Oklahoma, Senator DAVID BOREN, has called for the creation of a joint House-Senate committee to present proposals for a major overhaul of Congress. I think this would be a positive step, but perhaps a national commission formed outside Congress would have more credibility, since we have so little remaining.

The following areas need immediate attention:

First, stricter enforcement of the germaneness rule, which would allow us to consider only matters relevant to that particular bill; that is, defense amendments on defense bills. This would also encourage a coherent discussion of important issues.

Second, an absolute end to the "gentleman's agreement" by which one member can put a "hold" on a bill and keep it from being taken up by the Senate.

Third, a total reform of the filibuster rules, which today allow the majority view to become subverted entirely.

Fourth, a reaffirmation of the spirit and letter of the Budget Act, which set deadlines and spending ceilings, both of which are all too often ignored. Maybe we need the added discipline of forfeiting our own salaries when deadlines are not met.

Fifth, finally, a rule which provides that the legislative appropriations bill may not be considered until all other programs have been dealt with. If Members are threatened with a delayed or forfeited paycheck, we might find the time to take up the business of the country. We need deadlines and the added incentives to abide by them.

Maybe the sign of greatest hope is the renewed interest in reform brought about by this abominable session. I have seldom seen our own Members as sickened by the process that held us as its prisoners.

Someone said once that the desire for discipline is the true beginning of wisdom, and I believe that maxim continues to hold great truth today. That may be the only lasting truth to emerge from this lameduck session of Congress.

Mr. President, the system has crumbled and fallen on top of us. As we crawl out of the rubble, we must begin the painful process of rebuilding—if the Congress and country are to survive.

Mr. President, I suggest the absence of a quorum.

Mr. METZENBAUM. Will the Senator withhold?

Mr. PRYOR. I withhold.

The PRESIDING OFFICER. The Senator from Ohio.

CHANGES NEEDED IN SENATE RULES

Mr. METZENBAUM. Mr. President, I rise to discuss the matter of filibuster. I repeat on this floor what I have said on many occasions previously. That is that I do not believe in filibusters. Anytime the Senate is prepared to move to the point that 51 Senators can vote on a measure and no further debate will be in order, I will be prepared to support it. But I am a realist enough to known that over the years that approach has not been possible. We have moved somewhat in that direction to the point where 60 Members can vote on cloture.

I actually believe that we ought to move to a point where, when 51 Members are for a measure, they can pass it and the need for cloture would not be necessary.

Having said that, let us deal with the reality of the situation. We now do have cloture, and then we have a procedure under which it is possible to have postcloture filibusters, most of those by amendment. But in some respects, other procedures, parliamentary avenues, are available to those who engage in filibuster.

I am frank to admit without any reservations or embarrassment that I have used the postcloture filibuster by amendment on a number of occasions and have indicated my willingness to use it if necessary to stand up and fight for what I believed or against that which I did not believe.

That does not mean that I believe the procedure is right. I believe that it is right for any Member of the Senate—and I do not address myself to the pending issues; but, rather generally speaking, I believe it is right for any Member of the Senate to use such parliamentary procedures as are available under the rules. I believe the remedy for that is to change the rules.

Filibusters have been used over the history of our Nation against civil rights legislation, against proconsumer legislation, for proconsumer legislation, against anticonsumer legislation, and have been used for and against the people, as the case may be, over a period of many years. That still does not make them right.

It does not make them right when you use them for that which you consider to be correct and it does not make them wrong when someone else uses them.

Having said all of that, I stand on this floor to say that I do believe it is time for us to change the rules of the Senate, to change the rules so that postcloture, the filibuster by amendment route, cannot be used. I, for one, would be prepared to go even further than that if the majority of the Members of this body were prepared to do so. As a realistic fact, I think it would take two-thirds of the Members in order to change the rules.

I think the more rapidly we move in that direction, the better it will be for the country, and certainly, the better it will be for the image of the Senate. I stand here to pledge my full support for the change in the rules and my willingness, as one who has used those rules, to change the rules so that they may be applicable to all in the same manner. I think it may be better for the country when we do that.

Mr. EXON. Mr. President.

The PRESIDING OFFICER. The Senator from Nebraska.

SURFACE TRANSPORTATION ACT OF 1982—CONFERENCE REPORT

THE GAS TAX INCREASE

Mr. EXON. Mr. President, within the next 30 or 40 minutes, the Senate will be voting on the increase in the gas tax bill. There are many reasons that this Senator voted for cloture during the long debate on this matter before the U.S. Senate. Primarily, I was concerned about the fact that if we did not dispose of this gas tax increase bill in one manner or another, we would be putting aside other important considerations that this lameduck session should make. The fact of the matter is that the extended debate which led to a filibuster for hours and days, and at one time, almost 40 hours of the Senate being in session continually, put aside the important matter of agriculture. If there is one thing we have not accomplished in this lameduck session, if there is any significant step—even a tiny one—even a mention in any of the laws with regard to the terrible economic plight of our family sized farms today—it seems to me that history will eventually show that that filibuster and the tactics that were used will, beyond any other consideration, be the great failing of this lameduck session—if, indeed, it should have been called in the first instance.

In that regard, Mr. President, I would suggest that we think back a little bit as to what was the first reason given by the President of the United States in insisting that we be called back into this lameduck session. I believe the record will clearly show that it was supposedly brought about so that we could deal in a postelection discussion to solve the problems that confront the Nation with regard to social security. We were promised at that time, Mr. President, that the President's Commission on Social Security Reform would have made its report sometime in the first part of December 1982; that we would have that report and those recommendations before us so that we might proceed in an orderly fashion.

The facts of the matter are that we have no report. The Commission is not even meeting, but we are.

After that was shunted aside, then we came up with a whole series of new programs and proposals, and all of the ill feelings and ill will which many have said they have never previously seen on the floor of the U.S. Senate were caused primarily by the insistence of the White House that we pass a nonemergency gas-tax increase bill.

What a sad reason for keeping us here and putting us through what the Senate has been through for the last 2 or 3 weeks. I am very fearful that because of the understandable short temper of many of the Members of the Senate, we are about to vote on the gas-tax increase without full recognition of what is in that bill or what it does. No one can legitimately say that the gas-tax increase is an emergency measure. No one can make a case that this should not be put over and, given the due consideration and deliberation of the Congress in the regular session that begins next month, in January—Mr. President, what I am saying is that, as is often the case with lameduck sessions and certainly short sessions of the Congress, the pressure points are there to stop even will-considered legislation, let alone the measure that we shall vote on in about a half hour.

I also feel, Mr. President, that there is a chance that we shall not only vote on cloture, which is the key vote on this matter this morning, but also the bill likely will be passed without even reasonable floor debate as to the pros and cons of this measure.

I have noticed that the publicity given this has always been that it is a nickle-a-gallon increase in the gas tax. Mr. President, it is over a 100-percent increase in that tax from 4 to 9 cents. I distributed a "Dear Colleague" letter as of yesterday to my colleagues and outlined some of the more apparent—I emphasize the word "apparent"—shortcomings of this bill. I first suggest that a disproportionate share of the costs of this program are going to fall on rural America. Certainly, we should first recognize that 20 percent of this 5-cent increase goes for mass transit. I know of no reasoning or rational by which that portion of the tax could fall under the term of "user fee."

Furthermore, Mr. President, with regard to the agricultural sector of our economy, the previous understanding on the floor of the U.S. Senate with regard to the exemption for gasohol production was absolutely emasculated in the hurried and harried conference that was held on the bill.

I should also call the attention of my colleagues to the fact that highway safety, especially with regard to trucks, has been pushed off the road, if you will, in our haste to pass this legislation.

What is the hurry? That question has never been answered.

I guess the only reason we are supposed to pass this bill is that it will be a victory for the President of the United States. The morning press indicates that Senators are being flown back in Air Force planes to vote. What a way to run a Government. What a way, in the opinion of this Senator, to insure due deliberation on a very important matter.

Mr. President, I am not saying that under no circumstances would I be for a bill something like the one that we have. I am simply saying that it has not been thought through. It has not been subject to the usual scrutiny of the legislative process. I guess because the President wants the bill somehow we are supposed to pass it.

Let us talk for a moment, if we can, about truck safety. One of the other things that the conference did, as Senators will notice as they begin to take a look at the conference report, was to further increase the excise tax on truck tires.

Now, I do not necessarily per se object to that. It is new truck tires that they increased the tax on. On the other hand, Mr. President, they eliminated in its entirety any excise tax on truck tire recapping.

Now, what does that do? I suggest that with the financial strain on many truckers today, it is simply going to encourage the truckers to go to recapping because they escape the tax. That means that we are going to have huge, monstrous trucks running up and down our highways on retread or recapped tires. I think that most safety experts recognize that such a provision in the bill invites less than due respect for truck safety.

With regard to truck safety, Mr. President, this bill also authorizes wider and longer trucks on our highway systems.

I have not studied this issue in great detail, and I suppose that no Member of this body or the House of Representatives has looked at it because we have nothing to base this on with regard to committee hearings and committee consideration.

I would guess that probably wider and longer trucks might not prove to be a significant safety hazard on our Interstate System from that point alone, but as far as this Senator is concerned, if there are any of my colleagues that have information to the contrary, I wish they would make it known before the cloture vote, which I emphasize once again is the key vote today on this measure. I wish that they would tell me what studies we have that would indicate possible safety hazards for wider trucks and longer trucks on the primary and secondary roads of this Nation which would also have to accommodate those bigger trucks that many of us are very much concerned about.

In closing, Mr. President, I simply say that I am fearful that this bill is being rushed through without due consideration. It is a further tax, and we are not sure how equitable it is. I am confident that it is not equitable for rural America. I do not know whether it is fair for the rest of America or not.

If we need any more vivid evidence of the lack of planning, the fact that we seem in the Congress to be working in a knee-jerk fashion with regard to the economy of this Nation, last year, in 1981, this Congress set a record of supposedly making the largest dollar tax reduction in our history. And with the inclusion of this new increase in taxes, that I am certain will be one of the more regressive taxes that we have ever passed, we are going to set a record in 1982 of raising taxes dollarwise by the greatest amount in our history; 1981 was a tax-decreasing year; 1982 was a tax-increase year.

It seems to me, Mr. President, that this does not give a signal that we really understand what we are doing, with the serious economic difficulties facing most sectors of our society today. I certainly urge my colleagues to oppose the cloture vote, which in effect would cause us to reconsider this bill when we come in in regular session next year.

Mr. President, I suggest that that is the prudent action that we should take and resist the political pressure that is building up.

It is clear to this Senator that a great many of us have been caught, unfortunately, in a political shoot out, a political power play, if you will, between the White House and certain Members of this body. And because of that we are taking our eye off of our primary responsibility, which is only to pass legislation after we have carefully examined all facets of that legislation and how it will affect the public.

Mr. President, I yield the floor.

Mr. NICKLES addressed the Chair.

The PRESIDING OFFICER. The Senator from Oklahoma.

Mr. NICKLES. Mr. President, I would like to make just a few comments about the gasoline tax. As I am sure the President and most of this body are aware, I have opposed this tax from the outset. I initially began a filibuster in trying to delay it. I have not been active in the filibuster for the last week primarily because of my belief that it was obvious the majority leader was intent on getting a vote. I thought that the filibuster would be somewhat futile and possibly counterproductive, so I did not participate in it.

It is still my desire and hope, although I am not optimistic about the result, that the tax bill will be defeated. I do not really think we have time to closely examine it. I do not believe we have had a report filed from the Finance Committee or a report on the tax bill when it came before the Senate, a very comprehensive, very large, very detailed bill. Now we see the conference report—I have a copy of it on my desk—of I do not know how many pages. I would estimate it is well over 100 pages. A lot of it still has handwriting on it coming from the conference, a lot of things deleted, marked out, with no conference report to tell you really what was in the bill. It is a very confusing and very difficult bunch of papers with which to try to understand what is in the bill.

I compliment the majority leader. I think he has handled this bill in a very short period of time in a manner that is very positive and shows only his determination but, also, his willlingness to lead. I think he has led in a very difficult time because obviously several Members of the Senate had some very strong reservations about this bill.

I also compliment the administration. Secretary Lewis has worked diligently and hard. Mr. R. A. Barnhart and others have been pushing for this bill for some time and are to be complimented because it appears to be coming about.

However, Mr. President, I do not think that this bill should pass, and I shall outline briefly a couple reasons why it should not.

A lot of people have called it a jobs bill: We need to stimulate the economy. I personally fail to see how a tax increase and a spending increase will stimulate the economy.

Our economy is actually on the verge of bankruptcy and taking another $5.5 billion from consumers is not really going to have a stimulus on the economy. It may stimulate the construction industry, and it may stimulate the highway industry, but it certainly will not stimulate the rest of the economy. We are going to have $5.5 billion out of the economy, out of the pocketbooks of consumers and transfer it to the highway industry. So if anything it will be a wash, but I believe it will be a net job loss for most of the economy.

It certainly, in my opinion, is not good for my State of Oklahoma. This bill, as I look at it, is more of an income transfer. It is going to be taking $5.5 billion away from a lot of States and giving that to some other States. Some States have a net gain; some States a net loss. My State happens to experience a net economic loss under the trust fund.

We lost and have lost since the inception of this fund. We have actually only received 75 percent of the dollars that we have contributed. Compared to other States, Oklahoma's national

income per capita has been less than most other States. I do not really think that we can afford this. In the past we have been contributing something to the tune of $20 million a year more than we have received back, equaling over a half of billion dollars in contributions to the rest of the States. That was in the past with a 4-cent tax.

If this tax is enacted, going to 9 cents, our State contribution going to the other States we actually would estimate will probably increase to the tune of $60 million to $70 million a year.

Our State's present tax contribution on the 4-cent Federal tax is equal to about $115 million a year. Last year our State received $95 million back, for a loss of about $20 million.

If this tax is enacted we estimate that our State tax burden will probably be about $230 million, of which we only receive about $170 million in return, for a net loss of about $60 million a year.

So instead of just contributing $20 million a year to the Interstate System, we will be contributing something to the tune of $60 million outflow from Oklahoma. So that means we are going to have a jobs loss or jobs transfer and certainly I think a negative effect on the economy of our State of Oklahoma.

In the area of mass transit, a lot of people have called this tax a user's fee. Mass transit cannot be called a user's fee. We have a minimal amount of mass transit in Oklahoma. We estimate for that additional penny, that 1 cent that is set aside, or the 20 percent of the new tax that is going to mass transit, we estimate that about $20 million will be collected on our State, but that we will probably only receive something to the tune of $3 million or $4 million in return. So Oklahoma will be donating probably about $17 million to our Nation's mass transit system.

I look at the Metro and I see that they are going to have enormous losses this year. I look at the New York mass transit system, and I look at Chicago, all of which are having very large deficits year after year, and I question how much should Oklahomans be forced to subsidize those transit systems.

I think this causes a lot of hesitancy in our State on the part of Oklahoma farmers who had a net income last year of $14 per year, one of the lowest in the Nation. As everyone knows, the agriculture business is in a severe recession. Why should those farmers be subsidizing mass transit systems in New York or Washington, D.C.? It is an income transfer system.

I cosponsored with Senator BUMPERS I think an outstanding amendment, which was narrowly defeated, which would have returned to the States of origin 85 percent of that additional penny that is set aside for mass transit. We were defeated, and that is too bad because it just proves that this is really an income transfer.

I heard a lot of Senators who were debating that amendment say, "If this amendment were passed my State would lose $200 million." They have already taken our money and they have said, "This is our money now." They have already taken claim to it, and I expect after today it will be theirs.

But I have serious reservations about, one, calling it a user fee and also giving this income transfer to some States that run heavily subsidized mass transit systems.

Mr. President, there was in the Senate bill a provision that would minimize and reduce the amount of subsidy for mass transit. Most of that was deleted in the conference report as far as I have been able to find out. I think that is a serious mistake. I hate to see it.

I warned the President when we were visiting. He said, "I do not like mass transit subsidies coming from this bill and we want to eventually reduce them."

But as we now see the conference report the subsidies that were in the bill for mass transit and operating subsidies can actually be increased, so I think that is certainly a step in the wrong direction.

Mr. President, another reason why we should be opposed to this bill is the fact that Federal work cost a whole lot more than work done under State rules and State regulations. We estimate in our State of Oklahoma that if you build a road under Federal regulations it costs as much as 30 percent more than it does under State rules and regulations. This is because of laws that are, I think, outdated and in some cases certainly not warranted, such as Davis-Bacon.

As the President knows, I had an amendment on this bill that would have deleted the expansion of Davis-Bacon and what we have done under this legislation is expanded David-Bacon jurisdiction not to just include construction but to include even the four R's of reconstruction and maintenance repair. What we have done is ridiculous.

Some people like to call this a jobs bill. That expansion of Davis-Bacon will prove it is not a jobs bill, and that provision alone will cost thousands of jobs. It will cost jobs on the lower end of the economic cycle and it will transfer them to high-paid, high-cost jobs.

This bill also has a "Buy American" provision that will cost jobs and this domestic content provision will increase the cost of the project.

So there are a lot of rules and regulations that we have in our current law and even in this bill which will be expanded, which will make Federal work a lot more expensive than State work.

This bill increases the tax on truckers, particularly the heavier truckers, dramatically from $200 some up to something like $1,600 next year. That is a tremendous increase, and I think you will find that there will be a lot of independent truckers and others who will find this such a hardship that they will be out of business.

To summarize, I think this bill flies in the face of New Federalism. It takes away from the States their right to have control over their own excise taxes, to be able to take control and have responsibility over their own roads.

I believe in the State of Oklahoma we could probably build and actually get more mileage out of a 3-cent State tax than we could out of a 5-cent Federal tax.

Mr. President, in light of this and in view of the fact that we have brought it up so hurriedly, I hope that we will not invoke cloture today and if we do invoke cloture today that we will vote "no" on final passage of the tax bill.

I thank the President.

Mr. RANDOLPH. Mr. President, will my colleague yield?

Mr. NICKLES. I am happy to yield.

The PRESIDING OFFICER (Mr. RUDMAN). The Senator from West Virginia.

Mr. RANDOLPH. Mr. President, I served with the Senator from Oklahoma on a committee in the Senate and I know he gives to all legislation not only in that committee but here in this body very careful consideration. I am sure he will not misunderstand my question. Had he been a Member of the Senate in 1956 would he have voted for the Federal interstate highway program?

Mr. NICKLES. The answer to the Senator's question is I was not here in 1956. I do not know whether I would have or not. The gist of my complaint was not on the "original intent" of the law but the expansion of it, going to 9 cents.

But to answer the Senator's questions specifically I am not sure if I would have or not.

Mr. RANDOLPH. The Interstate System, in my opinion, has been one of the truly magnificent efforts of this country to bring the Nation together. I think that is proven by the very carefully study that has been made. Not only have the people of Oklahoma been able to visit with their families in other sections of the country and vice versa, but the products of the mines, factories, and the fields have moved over this network bringing to the consumers the products of Oklahoma and the other States of the Nation.

It has been a program that has brought America together rather than

to divide America and keep us from being one Nation closely knit and understanding of purpose.

That highway network, I say to my friend, is in a condition where it is deteriorating to a great extent. I am sure if he goes across the roads of his State, as I know he does, uses the bridges as he does, he will find in the latter case of bridges that they are not able to handle the cars, trucks, and vans, and many are now being used for pedestrians only. This is not an isolated case. This is true throughout America.

Having said that, I believe always that the Senate should debate, after adequate discussion, then make a decision. I shall respect the conscience and, let us say, the judgment of my colleague as he votes against this measure. I know he will accord to me the same feeling because I have believed through the years since 1937 that this highway program was an important development in the history of America, and we want to keep this network useful for the growing population which is now 240 million men and women. When it came into being in 1956, we were some 60 million or 70 million less.

Mr. President, the highway program of this Nation is important to its economic well-being. The conference report which we consider today will help future need.

I thank my colleague.

Mr. NICKLES. I thank my good friend and able colleague from West Virginia for his contributions in this area and in other areas; certainly in the labor field.

Mr. President, had I been here in 1956, I expect I probably would have voted for the Interstate Highway System, had it contained a more equitable fund distribution formula. I think it has resulted in our reaping a lot of benefits. I do have serious reservations about the expansion now that it is 90 percent complete, expanding the tax not only a slight increase, but moving it from 4 cents to 9 cents, and I think that in itself is a mistake.

I yield the floor.

The PRESIDING OFFICER. The Senator from Virginia.

Mr. WARNER. Mr. President, I shall be brief to allow my colleagues to share the remaining time.

Mr. President, I support the legislation before the Senate. There are in excess of 3,000 bridges in the State of Virginia that are structurally deficient today. I consulted with State highway authorities who have told me that these funds will allow Virginia to begin the needed repairs on those bridges.

Unsafe bridges and potholed roads are more than an inconvenience—they are a menace and a safety hazard. While this measure will not correct all of these repair problems, it will certainly go a long way toward insuring our peoples' very lives and properties are not endangered as they drive on our Nation's highways.

Mr. President, I am concerned about the inclusion of the Davis-Bacon Act in this measure, and I am also concerned that this conference report levies higher truck taxes than the level approved in the Senate version. However, the conference report does allow, in its phasing in of the truck taxes, time for Congress to further assess the economic impact of these taxes on both small trucking firms and on small businesses whose goods are transported on small fleet trucks. We should carefully look at this next year.

While this legislation is not perfect, some 4,000 jobs would be created in the State of Virginia between now and the 1st of April by passage of this measure. But, Mr. President, apart from the gas tax, it seems to me that there are other issues which are brought to mind by this rather prolonged and unusual debate.

First, the Senate will likely reexamine its rules; and, second, for some of us, and indeed this Senator, it has provided strong influence with respect to the issue of television in the Senate. Although not an outspoken opponent of televising the proceedings of the Senate, I have until now been very reluctant to support such a change. But this experience has convinced me that I shall support the majority leader in his effort to bring television in some fashion into the U.S. Senate. I think it is unlikely that certain aspects of this debate, particularly those of personal acrimony among Members, which are destructive and undermining of the great traditions of this institution, would have taken place, had our proceedings been televised. I want to preserve the rights of Senators to discuss and debate all measures. But there comes a time when the business of the Senate, which is the business of the Nation, must be allowed to move forward.

The PRESIDING OFFICER. The Senator from Massachusetts.

THE GAS TAX-HIGHWAY ACT

Mr. KENNEDY. I intend to vote against the passage of this legislation. For the reasons I have set out in my earlier comments on this measure, I believe that it is reactionary fiscal policy, regressive tax policy, redundant energy policy, and reprehensible transportation policy.

But I intend to vote for cloture, because I believe that the Senate is entitled to vote its will on this issue.

And with all respect to my colleagues, I want every Member of this body to understand that I am deeply concerned over the failure of the Senate as an institution to deal effectively with the multiplying crises that face and plague our Nation.

Twelve million Americans are out of work. Unemployment climbs higher with every passing month. Elderly Americans fear for the security of their retirement. Whole industries fear that some of their most respected firms may not see another Christmas or another annual report. Together, we are enduring the worst crisis in the American economy since the time of Herbert Hoover. In this holiday season, there are no jobs and precious little justice in the land.

The country burns, while the Congress fiddles. Three weeks ago, the Senate and the House of Representatives returned to Washington to deal with our pressing problems. And we have accomplished precisely nothing of any important value. All we did was to raise our pay, and turn away from all those who have lost their jobs.

And even on the overriding issue of nuclear survival, this proud Chamber was humbled to the level of debating the MX missile between the hours of 1 a.m. and 3 a.m. in the middle of night.

And so I want to record my protest here, in the strongest possible terms, that so many of us have been so put upon by so few for so little.

We are not debating war and peace, or a new world order, or whether all persons are created equal, or whether one region must yield to the greater good of the Nation as a whole.

No; we are not debating the state of the Union, but the state of our highways. We are talking about the width and weight of trucks, the potholes in our country roads, and the failing subways in our aging cities. And we are talking about 5 cents more in the taxes we pay for gasoline.

That is the poor stuff of which this ridiculous debate is made—and we deserve all the ridicule we are receiving, because all our wounds are self-inflicted.

We have suffered this outrage too lightly, and we have too easily permitted this historic Chamber to become the laughing stock of the Nation.

Perhaps we shall return refreshed from this adjournment, and simply note that the country has had a long laugh at our expense.

However, by the time the 98th Congress convenes in January, each of us will have had the opportunity to reflect on these recent Senate days. I feel that, if we are to recover from these moments and regain our stature as a great deliberative body, we must heed some lessons.

First, we must reform the arcane rules that invite a tiny willful minority of the Senate to defy their colleagues by tying this Chamber into a Gordian knot which even Alexander the Great could not have cut. I believe that the Senate rules must be revised, so that when they say cloture, they mean cloture. When the rules declare that debate shall end, then debate must end.

Second, those who grossly abuse the rights and privileges of Senate debate should not be able to do so with impunity. In this Chamber, we tolerate a great deal of obstruction that tries the patience of us all. The Senate works in our democracy because each of us is answerable to our constituents. But we are also answerable to each other.

If the Democratic Party controlled the Senate, and if one of my Democratic colleagues had harassed the Senate and embarrassed the Senate to the degree occasioned by the senior Senator from North Carolina, I believe that the Democratic Caucus would act to strip that Democratic Senator of the chairmanship of his committee.

I do not presume to advise my Republican colleagues about these matters, which are primarily their problem and their responsibility. But in the final analysis, we are neither Republicans nor Democrats but mere U.S. Senators, striving as best we can to do this Nation's important business. We have no such important business before us now.

So let me close by simply saying this—in January in the new Congress, if by some circumstance there should be a rollcall vote relating to the chairmanship of the Senate Agriculture Committee, I am confident that my colleagues on the other side of the aisle will find generous support on this side.

I hope that cloture will now be invoked, that the Senate will at last be permitted to vote on the 5-cent gasoline tax, and that this sorry spectacle in Senate history will finally be over.

CLOTURE MOTION

The VICE PRESIDENT. The hour of 9:30 a.m. having arrived, the clerk will report the motion to invoke cloture.

The legislative clerk read as follows:

CLOTURE MOTION

We, the undersigned Senators, in accordance with the provisions of Rule XXII of the Standing Rules of the Senate, hereby move to bring to a close debate on the conference report on H.R. 6211, the Surface Transportation Assistance Act of 1982.

Howard H. Baker, Jr., Mack Mattingly, Warren Rudman, Rudy Boschwitz, Bob Packwood, John Tower, Jake Garn, Pete V. Domenici, Nancy Kassebaum, Ted Stevens, Robert T. Stafford, Nicholas F. Brady, William S. Cohen, Robert Dole, Strom Thurmond, James A. McClure, Slade Gorton, Jennings Randolph.

SURFACE TRANSPORTATION ACT OF 1982—CONFERENCE REPORT

VOTE

The VICE PRESIDENT. The question is, Is the sense of the Senate that debate on the conference report to accompany H.R. 6211, the Surface Transportation Act of 1982, shall be brought to a close?

The yeas and nays are required and the clerk will call the roll.

The legislative clerk called the roll.

Mr. MATSUNAGA (after having voted in the affirmative). Mr. President, on this vote I have a pair with the Senator from Montana (Mr. BAUCUS). If he were present and voting, he would vote "nay." On this vote, I have voted "yea." Therefore, I withdraw my vote.

Mr. STEVENS. I announce that the Senator from Alabama (Mr. DENTON), the Senator from New Hampshire (Mr. HUMPHREY), the Senator from Kansas (Mrs. KASSEBAUM), and the Senator from Alaska (Mr. MURKOWSKI), are necessarily absent.

I further announce that, if present and voting, the Senator from Alabama (Mr. DENTON), would vote "yea."

Mr. CRANSTON. I announce that the Senator from Montana (Mr. BAUCUS), the Senator from Delaware (Mr. BIDEN), the Senator from Arkansas (Mr. BUMPERS), the Senator from Nevada (Mr. CANNON), the Senator from Ohio (Mr. GLENN), the Senator from South Carolina (Mr. HOLLINGS), the Senator from Washington (Mr. JACKSON), the Senator from Tennessee (Mr. SASSER), and the Senator from Nebraska (Mr. ZORINSKY) are necessarily absent.

I further announce that, if present and voting, the Senator from Ohio (Mr. GLENN), and the Senator from Washington (Mr. JACKSON) would vote "yea."

The VICE PRESIDENT. Are there any other Senators in the Chamber desiring to vote?

The yeas and nays resulted—yeas 81, nays 5, as follows:

[Rollcall Vote No. 468]

YEAS—81

Abdnor	Garn	Moynihan
Andrews	Goldwater	Nunn
Armstrong	Gorton	Packwood
Baker	Grassley	Pell

Biden	Hollings	Sasser
Bumpers	Humphrey	Zorinsky
Cannon	Jackson	
Denton	Kassebaum	

The VICE PRESIDENT. Are there any other Senators in this Chamber desiring to vote?

Mr. STENNIS. Mr. President, may we have order in the Senate?

The VICE PRESIDENT. The Senate will be in order.

On this vote, the yeas are 81, the nays are 5. Three-fifths of the Senators duly chosen and sworn having voted in the affirmative, the motion is agreed to.

Mr. BAKER. Mr. President.

The VICE PRESIDENT. The majority leader.

Mr. BAKER. Mr. President, there is a vote scheduled for 11:30 a.m. on the conference report, is there not?

The VICE PRESIDENT. The Senator is correct.

Mr. BAKER. I discussed this with the minority leader earlier. I do not know how many Senators wish to speak. I do not wish to press this unduly, but is there some possibility we might change that to 11 a.m.?

Mr. ROBERT C. BYRD. Mr. President, there is a distinct possibility we might change it, but not at this moment. There are some Senators on this side who want to speak. I do not know how long they will want to speak, but I assure the majority leader we can move the vote earlier than 11:30. I suggest that we wait just a little while before we get the unanimous-consent order changed.

Mr. President, let me say that 35 Democrats voted "aye" on cloture. So time and time and time again, the invisible minority in this body has cooperated and supported the effort to bring this debate to a halt. I think the record should show that without those 35 votes, even though many of us are against the tax itself, cloture would not have been invoked.

Mr. BAKER. Mr. President, the minority is certainly not invisible to me. I deal with it daily and we negotiate away more problems than we ever have to face because of the good offices of the minority leader and other Members. I express my gratitude to him and all Members on both sides of the aisle for making it possible to bring this matter to a concluding vote. I am grateful for it and I indeed will be grateful for it time and time and time again. [Laughter.]

Mr. ROBERT C. BYRD. Mr. President, may I respond to the distinguished majority leader?

The distinguished majority leader has indeed conferred with the minori-

ty leader time and time and time again. When I used the words "invisible minority," I did not mean to imply that it is a minority invisible to the majority leader. I meant it for the other end of the avenue, which, thus far over these 2 years, has pretty much considered the minority in the U.S. Senate as an invisible minority. We have been consulted but very little.

I just wanted the record to show that it has been the Democratic vote that delivered the bacon in this instance insofar as cloture is concerned, even though many of us are very opposed to the gas tax, while others of us support it.

Mr. HEFLIN. Will the Senator yield?

Mr. BAKER. Mr. President, I yield the floor if the Senator wishes to speak.

Mr. HEFLIN. I was going to ask the distinguished minority leader (Mr. ROBERT C. BYRD), you do not consider me invisible, do you? [Laughter.]

Mr. METZENBAUM. Will the majority leader yield for a question?

Mr. BAKER. Yes, Mr. President.

Mr. METZENBAUM. When we conclude our action with respect to the gas tax bill, will that mean the conclusion of the legislative business for this session of Congress?

Mr. BAKER. Yea, verily, I say without reservation.

Mr. President, there are, I guess, 10 or 15 minutes worth of things that are routine that have been cleared with the minority. I expect to do those. They obviously do not require the concurrence of the House. They are matters that can be dealt with in the Senate. I believe we have been very careful and scrupulous to try to get clearance on any one of those items. I do not think there is anything in there that the Senator from Ohio will be concerned about.

Mr. METZENBAUM. I thank the Senator.

Mr. PERCY. Mr. President, I should like to comment for 2 or 3 minutes on the matters before us. I ask unanimous consent that I be permitted to speak for 2 minutes on the resolutions at the desk to cause us to think about the processes through which we have been going on the appropriation and authorization processes. I ask unanimous consent for 3 minutes on that particular aspect.

I also ask unanimous consent that my remarks on the PIK program be included at the end of the discussion on this resolution.

The VICE PRESIDENT. Is there objection? Without objection, it is so ordered.

Mr. PERCY. I thank the Chair.

Mr. President, I would first like to say that the bill before us deserves the commendation of the President of the United States, the Vice President, certainly the Secretary of Transportation, Drew Lewis, and certainly the distinguished chairmen of our committees (Mr. DOLE and Mr. STAFFORD) who have worked without cessation to bring about this bill. It is a good bill.

For many years I have advocated a higher tax on gasoline. The present Federal tax has not been changed for over 20 years. During that time, our economy has changed significantly. We no longer have an economy that can count on an endless supply of cheap energy. Those days are gone.

The gasoline tax will help us in our continuing efforts to conserve these precious fuel resources. They are not unlimited. Someday they will run out.

This conference report will also help us rebuild the important transportation system that has deteriorated so badly in some places. The bridges and highways must be kept in top shape if we are going to keep the economy running smoothly. That transportation system is the envy of the world and is the basis of our efficient economy and standard of living.

From an Illinois perspective, this highway bill offers a great deal. Some of our top priority roads and bridge projects will finally get the attention they need. This is good news for our State which is a crucial transportation link in the country's highway network.

Our long hours of consideration of this legislation forged this very important program. As I discussed earlier with Senators DODD, DOMENICI, and STAFFORD, we need to have a more businesslike approach to our capital investments. The idea of a capital investment budget—like all major corporations have—needs immediate attention so we can address these needs—like highways and water systems—in an orderly and sensible fashion.

NEEDED: REFORM OF THE LEGISLATIVE PROCESS

Mr. PERCY. Mr. President, may we have order, please?

The VICE PRESIDENT. Order in the Chamber. The Senate will be in order. The Senator will suspend until the Senate is in order.

Mr. PERCY. Mr. President, I would particularly like the attention of the distinguished chairman of the Budget Committee and the Appropriations Committee, if Senator HATFIELD is here, simply to comment on a resolution that I am today sending to the desk for consideration of the Senate.

I am introducing today a resolution designed to reform our legislative process so that Congress can avoid repeating the unbecoming scene of the last several weeks regarding the continuing resolution.

There are Members on the floor who have been on the Government Operations Committee, now the Governmental Affairs Committee, who have worked with me through the years to see that we have a more sensible budgetary system and that we bring some reason to the process of authorization and appropriation. Regretfully, the hopes that we had for that process have not been fully achieved.

Seventy-eight percent of all funding legislation for the Federal Government of the United States has rushed through Congress in a few days because Congress has failed to act in a responsible fashion.

Senators were asked to vote for or against one piece of ill-considered legislation which will affect the lives of every American citizen. More than $420 billion was appropriated in the continuing resolution which we had less than 2 hours to study. Hundreds of amendments were added or deleted by the Senators and Congressmen in conference. [Repeated waivers of the Budget Act were required.] Authorizations were altered without thoughtful and considered judgment. Personal interests were inserted.

The result of the process is a bad piece of legislation and a humiliation for all of us who participated in the process. Under the threat of bringing the Government to a halt and throwing the Nation into economic chaos, many of us reluctantly voted for the continuing resolution because the consequence of not passing it would be even worse.

In the past few years on numerous occasions Congress has failed in this fashion to perform its constitutional responsibility in a timely and constructive manner. To allow this to continue is a disgrace.

Mr. President, I wonder if we may have order.

The VICE PRESIDENT. The Senate will be in order.

The Senator may proceed.

Mr. PERCY. Mr. President, no other Nation on Earth allows what has happened in this Chamber to happen. They have processes for it. Most of the European democracies have laws to provide for continued funding should the legislature fail to act.

We must do likewise. We must not allow this continuing resolution folly to be repeated.

The bill I am introducing today is not a panacea for all the ills of Congress. It is, however, a measure which will guarantee the continued functioning of Government, avoid increasingly common end-of-year fiscal crises and promote a more thoughtful legislative process. I hope that this is only the first of many pieces of legislation designed to reform the functioning of Congress. The American people deserve better than what their Congress is providing. Too often we blame others for the failure of our Government to perform effectively. We have no one to blame but ourselves if we do not institute necessary reforms.

I hope, Mr. President, that all of us will resolve, as we now adjourn and go home, to think through in the quietude of our homes what could we do to bring respect back to the Congress, what can we do to bring order out of chaos such as we have seen on the floor of the Senate as we have overridden the authorization and appropriation process. We have literally betrayed the Budget Reform Act of 1974 which we reported out and solemnly promised we would follow to bring order out of chaos. We have not done that. We have not finished our job.

Therefore, I send to the desk a resolution for printing which I hope will just be one of many ideas that can be brought forward by my distinguished colleagues to see if we cannot find a better way to do things.

Several Senators addressed the Chair.

Mr. STENNIS. Will the Senator yield?

Mr. NUNN. Will the Senator yield?

Mr. PERCY. I am happy to yield.

Mr. NUNN. I want to commend the Senator from Illinois. I think he is putting his finger on a number of problems that are bothering an increasing number of Senators. I do not pretend to know the answers, but we are duplicating efforts. We are going through a cycle that no one can ever catch up with let alone stay ahead of. I think we are seriously going to have to consider going to a 2-year appropriation and authorization cycle. We are having total duplication between authorizing committees and the Appropriations Committee where none of us have time to do the job that we are supposed to do. We are seeing the authorization committees become completely irrelevant. We never have a floor under expenditures and yet now we are not with a ceiling either. So you have to ask, what is the purpose of an authorizing committee?

I know of no purpose if there is no floor or no ceiling. The Budget Committee is becoming irrelevant in this kind of economic environment because the budget ceilings have no meaning when they are totally out of date, and everyone knows that. The Appropriations Committees are duplicating, the authorizing committees are duplicating. We are in a mess in terms of the fiscal situation in this body and in the Congress. I think the public perceives it, and I believe it is up to all of us as Members of this body to begin to find answers. We cannot continue to go on like this.

I commend the Senator from Illinois for his analysis of the problem. I hope we will all think about it.

Mr. STENNIS. Will the Senator yield?

Mr. PERCY. I thank my distinguished colleague. We have indeed worked together on the Governmental Affairs Committee on this matter.

Mr. President, I ask unanimous consent that I may continue for 5 additional minutes.

The VICE PRESIDENT. Is there objection?

The Chair hears none, and it is so ordered.

Mr. STENNIS. Will the Senator yield to me?

Mr. PELL. Will the Senator yield?

Mr. PERCY. I will be happy to yield in just 1 second. I want to make it absolutely clear that I believe the leadership of the Senate and the leadership of our respective committees, the Finance Committee, Appropriations Committee, and the authorization committees, have worked to the best of their abilities with the tools they had. But what they did not have was a process that would allow them to accomplish what they wanted to do.

I am very pleased to have the comments of my distinguished colleague from Georgia (Mr. NUNN), who served with us on the Governmental Affairs Committee for the years that we worked on the reform of the budget process. I commend him for his work.

I yield first to my colleague from Rhode Island (Mr. PELL), then to my distinguished colleague, the Senator from Mississippi, then to the distinguished Senator from Texas, and then to the distinguished Senator from New York.

Mr. PELL. I thank the Senator.

Mr. President, I ask unanimous consent to be made a cosponsor of the resolution.

Mr. President, while I have not cleared this with the Members on my side of the aisle, as an individual Senator, I think it an excellent thought to try to avoid the end run and the ignoring of the authorizing committees which occurs in many cases, conspicuously in the case of our Foreign Relations Committee.

I also hope that along this same line the leadership will take a close look at the imbroglio of the last few days to limit far more stringently the right of filibuster and think of some joint bipartisan way of amending the rules as well as along the lines of the resolution of the Senator from Illinois (Mr. PERCY).

The VICE PRESIDENT. Without objection, the Senator will be added as a cosponsor.

Mr. STENNIS. Mr. President, will the Senator yield to me?

Mr. PERCY. Yes, I believe the next Senator that I was to yield to was the Senator from Mississippi.

Mr. STENNIS. Mr. President, I think the resolution of the Senator touches on the most acute, most demanding subject matter that we have before us as a parliamentary body. And this is no attack of any kind on the committees, the Budget Committee included. Something has to be done, Mr. President, to enable us to fulfill our role, and the committee system is the victim, as I see it. The entire committee system is being crowded out in this process and does not have a real chance to make its usual contribution to the legislation that comes through the Senate. In our so-called role of court of appeals or whatever, it, we have slight chance now to fulfill that role due to the volume of the budget. The major committees are being lost in the shuffle and it cannot be remedied without reform along the lines that the Senator mentioned which will certainly have my support.

If we had not had two exceptionally fine floor leaders, we would still be in a wrangle and without accomplishments with reference to this session.

Mr. PERCY. I thank my colleague.

Before yielding to the next Senator—and I will in just 30 seconds—I should like to read the resolution which I submitted just for the purpose of provoking discussion, and hopefully there will be other better approaches offered:

S.J. RES. 272

In the event that a regular appropriations bill has not been enacted by the beginning of the fiscal year, funds will be made available at the rate specified in enacted authorizing legislation, or if such legislation has not been enacted, at the lower of the rates specified in the previous year's appropriation or the President's request.

I ask unanimous consent that Senators DIXON, PELL, and RANDOLPH be added as cosponsors of this resolution at their request.

The VICE PRESIDENT. Without objection, it is so ordered.

Mr. PERCY. I am happy to yield to my distinguished colleague from Texas.

Mr. BENTSEN. Mr. President, I thank the Senator from Illinois and I congratulate him on his attention to this problem of trying to bring a more orderly process to our appropriations procedure.

Let me refer for just a minute to the events of the last few days and the filibuster that took place.

I am not to say that we should not have filibusters because I think they do, at times, when we have great major issues before the country, serve a very useful purpose.

Often, we get into the question of judgment when a filibuster has gone beyond just advertising to the American people what is taking place in Congress and further informing them. Rather, it goes to a point that the Senate becomes unmanageable and something should be done to try to correct that. We have a situation where we had considerable bitterness during some of this debate, and unquestionably some scars are going to be left from that. Hopefully, the

Christmas spirit is going to moderate some of that bitterness.

But I do think that it is important that we continue to remember into the next session what took place here and that we do something to try to modernize the procedures of the Senate. That means that we are going to have to look at the period of time for which we lay over a cloture motion. We are going to have to look at the germaneness procedures here where time and time again when we know the Chair has ruled, and we know the Chair has ruled correctly as to the procedures of the Senate, the Members of this body, and I have done this at times myself, look not to the procedural question but look to the substance of whatever that amendment might be as to how it is going to be rated by some rating organization later, on our votes for that year.

Somewhere, we have to find the means to see that the Chair is sustained on these procedural points. We should direct our attention to that in the forthcoming year. We should look to the germaneness question. We should look to the postcloture question. Once we have 60 Members of this Senate say they are ready to proceed in an orderly manner to dispose of an issue, we should be able to do it without any filibuster taking place.

I hope that we will dedicate our efforts to modernizing the procedures of the Senate not for a major overhaul—that does not have to be—but for a few changes that will affect the germaneness question, the postcloture filibuster and to see what we can do insofar as laying over the cloture motion. If we have a few of those things, we will make this body a more effective body.

I really do not believe in this filibuster that we have seen that anyone really won. I do not think the Republicans won in this procedure, and I do not think the Democrats won in this procedure.

I think what we have seen is the reputation of this body as an effective institution deteriorated in the minds of the public. Most of them do not know who really led this fight or that fight; they just look at the institution itself. I think it is terribly important in the Democratic processes of this country that this institution continue to have respect in order that a democracy can prevail.

The VICE PRESIDENT. The 5 minutes allocated to the Senator from Illinois have expired.

Mr. PERCY. Mr. President, so I may yield to my distinguished colleague from New York, I ask unanimous consent that the Senator from Illinois have 3 additional minutes, one of which I wish to reserve to myself to conclude.

The VICE PRESIDENT. Is there objection to the request of the Senator from Illinois?

Mr. ROBERT C. BYRD. Mr. President, reserving the right to object, I think the Senator from Illinois has held the floor about long enough. Other Senators should be allowed to gain the floor in their own right. Some of the remainder of us wish to talk about this subject as well.

I will not object in this instance, but to any further request along this line I will object.

The VICE PRESIDENT. Without objection, it is so ordered.

Mr. STENNIS. Mr. President, if the Senator will yield to me, I will need time on this. I wish to speak on the bill. I want time on the bill as it is the pending matter here.

Mr. MOYNIHAN. Mr. President, do I understand the distinguished chairman yielded to me 2 minutes?

The VICE PRESIDENT. That is correct.

Mr. PERCY. Mr. President, I am happy to yield to the Senator from New York as the final speaker.

Mr. MOYNIHAN. Mr. President, I speak in the confidence that no one is listening.

Mr. MATHIAS. Do not be too sure of that.

Mr. MOYNIHAN. That can be a problem but when one is trying to avoid it, it sometimes happens.

I wish to make two points: The first is that the procedure in the last 4 weeks we have initiated brought through three committees of this body alone and we are about to pass one of the major transportation bills of American history.

That is an extraordinary performance for any legislative body, particularly a bicameral one in which there is no parliamentary ruling majority.

The procedures of the body have worked splendidly with respect to the highway matter.

Where they do not work is with respect to the budget which we cannot pass, and that is not procedural. We cannot pass the budget because the deficits are so ideologically disorienting to the majority that they dare not pass it.

It is not a matter of procedure. It is a matter of substance. An economic program that was to eliminate deficits has produced the largest in history and understandably the machinery is reluctant to bring them forth into law.

Do not look to procedure where the question is substance. I repeat, with regard to this particular matter before us today our procedures have worked beautifully.

Mr. PERCY. Mr. President, I welcome cosponsors of this legislation but even more I welcome any other approaches anyone can come up with to improve the workings of the Senate.

I thank the Chair and yield the floor.

The VICE PRESIDENT. The minority leader is recognized.

Mr. ROBERT C. BYRD. Mr. President, I do not want the floor at this point, but there are Senators here who want to speak on the measure that is to be acted upon.

After that, I will have something to say about my reflections on the Senate legislative process. But I think I can wait and let Senators speak on the measure and pass it and let Senators go who have to leave town and the remainder of us can stay around as long as we want to talk about the rules change.

I am not saying that any Senator should not speak on that. I think that is all right. But as far as I know, Mr. FORD, the ranking minority member of the Rules Committee, has something to say on this. But I am not seeking the floor in my own right at the moment to speak on that subject. I just want to see us get on with this business and get on with the vote and let Senators leave who have to leave. I know some who have to catch planes.

Mr. DOMENICI. Mr. President, I think this matter is so important that we should stay here until we solve it.

Mr. President, I was just being facetious.

I commend the Senator for introducing the legislation. Obviously, we need to fix up some things.

Once again I commend him for bringing the subject up. But I really do not think that we can resolve it today in any respect. Just consider one aspect of it: If we were to fund at the authorized level, if we did not have an appropriations bill, I hesitate to say how high a level we would be authorizing the appropriated accounts to get to.

But in any event, I commend the Senator for his efforts. I am sure many people agree with him and hopefully we will get something done early next year to resolve the kind of bottlenecks that our processes and procedures have created.

I thank the Chair.

ADMINISTRATIVE IMPLEMENTATION OF "PIK" AND EXPORT ENHANCEMENT PROGRAMS

Mr. HAYAKAWA. Mr. President, I am glad to see that we are drawing near the end of this rigorous trial physical stamina and mental agility known as the lameduck session of the 97th Congress. I am certain that each of my colleagues joins me in this sentiment and is looking forward to a brief period of rest and renewal during the holiday season with their friends and loved ones.

I feel that I would be remiss, however, if I failed to express my disappointment in the failure of this Congress to address in a meaningful way the terribly serious problem of foreign export subsidies which are at this very moment causing American farm producers and processors to lose opportunities for export sales. Each lost sale

only adds to our balance-of-trade deficit with the resultant impact on our economy and on the daily lives of millions of Americans. Despite our failure to pass the payment-in-kind or "PIK" program which had been proposed by the administration and which was introduced by Mr. COCHRAN and Mr. HUDDLESTON, I would like to state for the record my own personal desire—which I know many of my colleagues share—that the Secretary of Agriculture work within his presently existing authority to implement an administrative "PIK" program insofar as possible. Present laws gives the Secretary much discretionary latitude in administering the various price support and loan programs for U.S. farm commodities. I would suggest that the Secretary could legally implement many of the elements which we earlier attempted to clarify by means of S. 3049 and S. 3074.

BLOCK MUST MOVE ON PIK

Mr. President, despite the lack of final congressional action on the payment-in-kind program, a program to revitalize the agricultural economy of this Nation, I would like to urge Secretary of Agriculture Block to move ahead at once and issue regulations for the operation of the program. I believe he has the authority under existing statutes to proceed with PIK and I urge him to do so. Farmers all across America are in great need of assistance, this program should provide the help they need. If it were not for the politically motivated actions of a few in this body, I am sure we would have passed the measure. We cannot let those in this body who are more interested in their own political position than the plight of the family farmer stand in the way of sound agricultural policy. The Secretary of Agriculture must move at once, and get the PIK program into operation.

Mrs. HAWKINS. Mr. President, although the Senate was unable to vote on the payment-in-kind (PIK) legislation in the 97th Congress, I want to express my full support for the PIK concept which is to be administered by the Secretary of Agriculture. In light of this, I hope the Secretary will use, to the full extent possible, his current authority to implement this concept. This program will help utilize our surplus commodities and prevent the American taxpayer from paying for future Government purchases and storage costs.

Again, Mr. President, I support this concept.

SURFACE TRANSPORTATION ACT OF 1982—CONFERENCE REPORT

Mr. DOLE. Mr. President, may we have order?

The VICE PRESIDENT. The Senate will be in order.

The Senator from Kansas has the floor and will proceed.

Mr. DOLE. Mr. President, I think we should address the matter before us before we vote, and I agree with the distinguished minority leader. Some of us may want to make other remarks following the vote, but there are a number of Members who came to me and said they have planes to catch. If we could speed it up, we would appreciate that. Certainly, we wish to accommodate them.

Mr. ROBERT C. BYRD. Mr. President, will the Senator yield?

Mr. DOLE. I yield.

Mr. ROBERT C. BYRD. Mr. President, I do not mind having Senators speak on the need for changes in the rules. I do not want to see one Senator get the floor and hold it and yield out to other Senators. I think every Senator should have the right to the floor in his own right.

Mr. DOLE. I share that view.

Mr. President, as of 9:17 a.m. today, we have been on this bill 52 hours. We had 29 rollcall votes, 53 amendments, 4 cloture motions; 30 amendments sponsored by Republicans and 23 amendments sponsored by Democrats. We also have a breakdown of the time.

I believe it may come as a surprise to some, but when the time consumed is recorded it will probably show there was not much difference on which side took the most time during the consideration of this bill. So whether or not there has been a filibuster I guess depends on who suggested it and who interprets it.

There are a number of measures that were not even brought to the floor because of a threatened filibuster. For example the farm legislation, the PIK bill, the Senator from Montana refused to let us bring that to the floor. As to the bankruptcy bill, the Senator from Ohio did not want that legislation to come to the floor.

These refusals were not a real filibuster. The threat was there and there are a number of very important measures that never made it to the Senate floor because Members on both sides said, "If you bring it up, I am going to have an extended debate. In other words, we are not going to let it pass."

So, in this case, I believe we have a good piece of legislation and I believe it deserves the overwhelming support of Members on both sides of the aisle. I am not going to tell you why again, but I ask unanimous consent to have printed in the RECORD an analysis of the bill which has been prepared by staff along with a letter that I have sent to all of my colleagues, which was placed on their desks this morning, outlining what I think are some of the strengths of this legislation.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

UNITED STATES SENATE,
COMMITTEE ON FINANCE,
Washington D.C., December 23, 1982.

DEAR COLLEAGUE: On Thursday, December 23, the Senate is scheduled to vote on the "Surface Transportation Act of 1982." I urge you to vote for the bill.

The spending provisions of the bill authorize funding to repair the nation's roads and bridges, complete the Interstate Highway System and improve public transit facility. There is a consensus of opinion that this money ought to be spent and that delaying this expenditure would only require even greater outlays in the future. The regulatory provisions of the bill liberalize limits on truck weights, widths and lengths that have proved onerous to the trucking industry and whose elimination will improve trucking productivity significantly.

There is no budgetary free lunch, and these benefits—to the economy in general and the trucking industry in particular—must be paid for. The revenue title of the bill does this through two principal sets of provisions. First, the bill increases the taxes on gasoline, diesel fuel and other motor fuels from 4 to 9 cents per gallon. This tax increase is the basic revenue source provided by the bill. While an increase of 125 percent in the fuels taxes may appear to be onerous, it should be noted that this will only amount to a 4-percent increase in gasoline prices and that the new 9-cent tax will be significantly lower relative to other consumer prices, than the 4-cent tax was when it was enacted in 1959.

Second, the bill restructures the other highway trust fund taxes in order to bring them into closer correspondence with the damage that various users do to the highways. This involves lowering the relative tax burden on passenger cars and light trucks and increasing it on heavy trucks. As a result of the bill, the fuels tax will be the only highway tax paid by the ordinary motorist: present taxes on passenger car tires, tread rubber, and lubricating oil are repealed.

Many Senators have been concerned, quite properly, with the proposed increase in the heavy vehicle use tax. Even Senators who agree that heavy trucks ought to pay for a greater share of highway costs are fearful that the present recession is not an appropriate time for such an increase. The conference agreement was drafted with these concerns in mind. The increase in the use tax first takes effect on July 1, 1984, by which time economic recovery from the recession is expected to be well along. For small truck fleets, no increase takes effect before July 1, 1985. Furthermore, a new exemption from the tax for vehicles driven on the highways 5,000 miles or less each year will eliminate the tax for 90 percent of farm trucks, who currently pay a tax up to several hundred dollars per year. Thus, I believe that the bill represents a fair compromise between cost allocation principles and concern over the economic condition of the trucking industry.

I enclose a brief summary of the revenue provisions of the tax title of the bill.

Sincerely yours,

BOB DOLE.

CONFEREES' DECISIONS ON H.R. 6211

Chairman Bob Dole, Senate Committee on Finance, and Chairman Dan Rostenkowski, House Committee on Ways and Means, announce that the conferees on H.R. 6211 on Tuesday, December 21, 1982, made the fol-

lowing decisions on the revenue title of H.R. 6211, the Surface Transportation Assistance Act of 1982:

I. HIGHWAY RELATED TAXES

Gasoline tax and other fuels taxes

The bill increases the gasoline tax from 4 cents to 9 cents per gallon, effective April 1, 1983. Similar increases are provided for the taxes on diesel fuel, special motor fuels, and motorboat fuels. The present law exemptions from these taxes are continued for buses, State and local governments, nonprofit educational institutions, and farming use. The exemption for off-highway business use, which is currently 2 cents, is extended to the full tax. A new exemption from the tax is provided for 85 percent or more alcohol fuels from sources other than petroleum or natural gas. Taxicabs are provided a 4-cent exemption through September 30, 1984, and the conditions under which the exemption is provided are expanded through 1983, to include jurisdictions where ride-sharing is prohibited by local law.

Gasohol is exempt from 5 cents of the 9-cent tax. The 40-cent-per-gallon income tax credit for alcohol fuels and the 40-cent tariff on imported alcohol fuels are both increased to 50 cents. The gasohol rules apply through 1992.

The time for payment of the gasoline tax is generally increased by 5 days for independent refiners and for persons other than those who produce more than 1,000 barrels of crude oil per day.

Ground fertilizer applicators are given the same treatment as aerial applicators.

Tires, tread rubber and innertubes

The tax on highway tires is converted to a graduated tax based on weight. Tires 40 pounds or less, which include ordinary passenger car tires, are exempt. The tax will be 15 cents per pound for tires between 40 and 70 pounds, 30 cents per pound for tires between 70 and 90 pounds, and 50 cents per pound for tires over 90 pounds. The taxes on nonhighway tires, laminated tires, tread rubber and innertubes are repealed. These changes are effective January 1, 1984.

Lubricating oil

The present law tax on lubricating oil is repealed, effective on the day after enactment.

Truck-related taxes

The 10-percent tax on trucks and trailers whose gross vehicle weight exceeds 10,000 pounds is increased to 12 percent, and the weight thresholds are increased to 33,000 pounds for trucks and 26,000 pounds for trailers. The tax is converted from a manufacture into a retail tax. Roadrailer trailers are exempt from the tax. The present law tax on truck parts is repealed. These provisions are effective on April 1, 1983, for tax increases and on December 2, 1982, for tax reductions.

Heavy vehicle use tax

The heavy vehicle use tax is converted to a graduated tax effective July 1, 1984. The maximum tax is increased to $1,600 on July 1, 1984, $1,700 on July 1, 1986, $1,800 on July 1, 1987, and $1,900 on July 1, 1988. There is a one-year delay of this phase-in for fleets with 5 or fewer trucks. If a truck is retired from service during the year because of accident or theft, the use tax will be refunded on a pro rata basis. There is also an exemption for trucks used on highways for 5,000 miles or less.

Motor carrier operating rights

The basis adjustment for motor carrier operating rights where stock is acquired by a corporate purchaser is extended to individual purchasers.

II. TRUST FUND PROVISIONS

The Highway Trust Fund is extended from September 30, 1984, through September 30, 1988. The trust fund is transferred to the Internal Revenue Code. If unfunded authorizations exceed 2 years of Trust Fud receipts, Trust Fund apportionments are to be reduced proportionately.

The caps on the amount transferred to the Boating Safety Fund are increased from $20 million to $45 million, both with respect to the annual cap and the cap on the amount that can be accumulated in the fund.

An amount equivalent to a 1-cent-per-gallon gasoline tax is transferred to a Mass Transit Account in the Highway Trust Fund, money from which can be used for transit capital expenditures, including new projects.

III. OTHER TAX PROVISIONS

Energy credit

The 10-percent business energy credit is extended to chloralkali electrolytic cells, effective for 1981 and 1982.

Income tax filing requirement

The income tax filing requirement is modified to prevent the filing of unnecessary tax returns by persons receiving payments made by a State government to its residents.

Cruise ship deductions

Deductions are allowed for conventions and similar meetings held on cruise ships under certain conditions, limited to $2,000 per individual.

Tax-exempt dividends of mutual funds

All tax-exempt bonds are made eligible investments for mutual funds by adding provisions for tax exemption to the Internal Revenue Code.

Normalization method for public utility property

The bill makes more specific the rules under which public utilities lose the investment credit and accelerated depreciation when these tax benefits are flowed through too rapidly to consumers. A special transitional rule is provided for certain companies which may have violated these rules.

IV. SPENDING PROVISIONS

Social Security Act provisions

The bill adds certain types of energy assistance provided to AFDC and SSI recipients to items of income not counted as income for purposes of determining benefits under these programs.

Unemployment compensation

The bill provides from 2 to 6 weeks of supplemental unemployment compensation.

Mr. DOLE. Mr. President, I hope that we might move fairly quickly to a vote. I know the Senator from Idaho, the Senator from Rhode Island, and the Senator from Vermont wish to speak. I am going to yield the floor. I yield first to the Senator from Idaho and then I will yield the floor.

Mr. SYMMS. I thank the distinguished chairman for yielding. I thank him for his persistent and determined efforts to help us bring this bill to where it is today.

Mr. President, I should like also to pay special thanks in addition to the chairman of the Public Works Committee Senator STAFFORD, my good colleagues Senator RANDOLPH, and Senator BENSTEN and our committee and personal staff, Jean Schrag, Dick Harris, Anne Canfield, Sam Routson, Nadine Hamilton, and Kathy Cudlipp for their work on this vital piece of legislation.

Last night I took advantage of the opportunity to watch a cable TV program on which Ray Barnhart, the Federal Highway Administrator, spoke to the Alexandria Chamber of Commerce. I was particularly impressed with what Mr. Barnhart had to say and I have requested a transcript of that speech. He gave a very articulate expression of why a free market conservative would be supporting this legislation. It was one of the best logical analyses of what we are trying to do with this legislation, and why it is important to the country.

I ask unanimous consent that the transcript be printed in the RECORD.

There being no objection, the transcript was ordered to be printed in the RECORD, as follows:

SPEECH OF HON. RAY A. BARNHART

INTRODUCTION

We are indeed extremely fortunate today to have a gentleman who is probably the country's leading expert on the federal highway system.

Mr. Ray Barnhart, who is with us today, is the Federal Highway Administrator. He is a native of Illinois, and he was educated at Mariette College and the University of Houston and has worked both in underground construction and insurance.

He is a longtime community leader and a political activist. Mr. Barnhart served on the Pasadena, Texas City Council, and he was a member of the Texas State Legislature.

In 1979 he was appointed by the Governor of Texas to be one of the three commissioners of the State Department of Highways and Public Transportation.

In January of 1981, President Reagan appointed him to be the Federal Highway Administrator.

Please welcome Mr. Ray Barnhart. [Applause.]

Mr. BARNHART. Thank you very much. I have just come from the Hill doing God's work, preaching to the heathen masses and hoping that we might get some converts for a cause in which I truly believe, one that is so essential to the economy, the standard of living, and the quality of life of each and every one of us. And that is some additional funding for the Interstate highway program and federal highway system in general.

I think this Administration has taken some significant steps to address the very real problems which confront this country today. You hear a lot of criticism about the direction that has been taken by this President and this Administration, and yet I would plead with you to look beyond the headlines of the Washington Post. [Laughter.]

They have not been too kind to this Administration in many areas.

But they do an excellent job on transportation. I will tell you this, Mr. Feaver has done a superb job of accurate reporting, and I am indebted to him. There is some very, very good quality there, and I should not make light of that distinguished newspaper, I guess.

We have heard all kinds of stories about how this Administration is trying to deprive the poor of adequate resources to carry on their basic necessities, of how we are robbing the poor to pay the rich, and I think those are demogogic overstatements and certainly do not comport with fact.

We have made some significant changes in trying to alter the direction of this country. I am reminded that very early on, when I joined this Administration shortly after the President was sworn in and assumed the burden of government, that I walked into one of the leading members in the Democrat-controlled House of Representatives.

As I came into the room, he rose and said, "That son-of-a-gun Reagan rules the world, thank God." [Laughter.]

He said, "You realize, we couldn't continue in the direction we are going. But don't get me wrong. I have got problems out there in my district, and I am going to have a piece of you before this is out."

And I said, "That's all right, sir. I understand the system. You can use me and abuse me just so long as when the bottom line approaches you vote right."

I like to come in contact with people like that. The problem is that thus far he has yet to vote right. [Laughter.]

We do have some serious problems. But let's look at the record of what has transpired over the years.

When President Reagan assumed the oath of office, he assumed a budget deficit, not of the $15 or $20 billion that had been anticipated, but of some 70 billions of dollars. This was part of an accumulated national debt of a trillion dollars, whose interest payments alone will consume more than $2 billion every week this year—$2 billion a week to simply pay interest on past misdirected governmental programs that provide no job opportunities for the unemployed, no housing for the elderly, no medical assistance for the ill, and certainly no educational opportunity for those who must develop job skills in order to become productive taxpaying members of this society.

We have had to change some of the traditional boondoggles in Federal Government, and I think we have gone a long way. But as we do change that course and deny some of the extra largess that has been accorded to various groups, obviously you have an outcry of alarm.

And, unfortunately, as you get closer and closer into politics, you realize that there is very little opportunity to genuinely discuss truth in the political system, but only in broad generalities and demagogic terms do we appeal to the general public.

I do not fault people for having a wrong position on a given issue, for government is terribly complex. People become intimidated because of the size of it and the magnitude of the problems and thus draw back and too often refuse to participate.

It is for that reason that I am so grateful when I come before a Chamber of Commerce group, because I recognize that you have individual problems, as do I as a member of that private sector before I got into government. We are consumed with our own activities in trying to run a business, to meet a payroll, and we can't know all of the fine print in the various pieces of legislation.

I will just commit to you that in the bill that we have proposed, this gasoline tax, this user fee, that we have balanced all considerations to finally achieve some equity in this program.

You have only my word for that, and you do not have the benefit of the hours and hours of in-depth study that have gone into evaluating these various issues, but I would invite you to contact me at my office, where I do have an open-door policy, and I mean that with all my heart and soul.

I think one of the most serious problems we face in this country is misinformation; lack of understanding on these issues. I would like to talk to you a little bit about the highway program and why it is important to each one of us and why it is imperative that the Congress pass this increase in the user fee, the gasoline tax.

Some of the interest groups cry when I say, "Hey, it is a gasoline tax." They say, "It is a user fee." It is a user fee, but it was a gas tax when I was a kid and it is a gas tax now in the average person's mind, and I think we ought to level. It is a gas tax, but it is a different kind of tax, for it is user fee, and those people who benefit from the system must pay for that system.

I totally applaud that concept.

Why is this gasoline user fee increase so essential? Highways are much like our freedoms. We have accepted them. We have used them. We have not really thought deeply about them. Nor have many members of the Congress, and why should we?

When we realize that the Federal Aid Highway Program constitutes maybe $8 billion, out of a total government package of some 770 billions of dollars, we might think it is really insignificant until we stop to realize how we are dependent upon that program.

Over 90 percent of everything we eat, wear, use or produce moves on the nation's highways. As they become less efficient, transportation costs increase to each individual. We will pay out more than we would in a gasoline tax if we ignore the rehabilitation of the system.

Why? 20 percent of the gross national product is consumed in transportation costs. The average working person spends 14 percent of his or her income on transportation costs. That is why.

I know we have had some of the social elitists and in this area, too, who have tried to say that highways degrade the environment; that they interfere and downgrade our quality of life. And I say that is absolutely wrong.

They say highways are for big business, and they are not. Highways are the lifeblood of our economy. Highways are our jobs. They are our homes. They are our communities. They are our standards of living and our quality of life. We are all dependent upon them.

And I think it is time now that we begin to address the issue. When I go back to Texas and I tell my friends back there, say, "We have got to increase this user fee 5 cents.", they react in horror. They say, "Good heavens, we sent you up there to Washington to eliminate that massive bureaucracy, to stop the intrusion into state activities. You have sold out to the Eastern libs when you come back to advocate an increase."

And I say, "I haven't sold out. I haven't changed my philosophical underpinnings at all."

Historically, Texas has received 74 cents back out of every transportation dollar it sent up to Washington, D.C.

People say that is wrong; that we ought to get dollar back for dollar in. But I say that is wrong. We must not—as the Chairman of my Public Works Committee says, we must not allow this nation to become balkanized with good roads in one state and bad roads in another. Highways are important in this integrated system of free movement of people, and commerce is essential to each one of us.

It does no good for Texas to have good highways that end at the border of Arkansas or Oklahoma. And the same principle applies to all of us. Yet we have ignored this situation because we have looked at concrete roads and we have said as politicians, "Oh, well, we don't want to increase the tax burden. So we will let it go for another year."

But our roads are breaking up. We now have literally some 200 billions of dollars of highway needs that will be projected over the next dozen years. We must no longer delay addressing those issues.

And so we have said we are going to bite the bullet. As a responsible citizen, as a responsible conservative, I think we have to look at the real world as it exists, and then we have to gut up to the issue and be willing to meet that challenge. We have tried to do that in this program.

I get amused at some of the newspapers who say there is no need for an increase in the gasoline tax. I am reminded that when the gasoline tax was brought to 4 cents 23 years ago, most newspapers sold for a nickel or a dime, and they are now two bits and a dollar on Sunday.

The fact is that our gasoline tax has not been increased in 23 years at the federal level. The purchasing power of that 4-cent fee, which was established back in 59, is now about eight-tenths of a cent, and yet construction costs have escalated over 300 percent.

Why? Because of faulty workmanship? Because of crooked contractors? No, not on your life. That is not the reason.

We have refined our design of highways. We have designed the safest highways in the world. The interstates are tremendous public works projects that have design safety built into them.

If you will look at our rights-of-way, they are wider than they used to be. We have grade separations. All of these things add dollars.

And we consider the esthetics and the environment of those roadways on our communities and again on our quality of life, but we must pay for them.

All we have to so is look at the Woodrow Wilson Bridge that was built for about $12 million, and we recognize that we are going to resurface that degraded road decking on that bridge at a cost of some 26 millions of dollars, and then we will have to come back and widen as a cost of another $33 million.

We are trying to do it on the basis of a 4-cent gasoline tax that is 23 years outdated. We can no longer do that. That is why we must increase that user fee.

How we are involved in a great battle up here on the Hill trying to come forth with a program to support this basic program. It has three significant parts to it. It has the increase in the gasoline tax. It has a cost allocation study, and it has a truck size and weight provision.

All three elements must be put together if we are truly going to address the problems of our highways and equity to the consuming public.

What has not generally been understood is that for too long the passenger cars have been supporting the real big truckers. The tax spread has been inequitable to the average consumer.

Our figures from this cost allocation study show that, using the passenger car as the norm, the small economy car underpays its equitable share of the cost of the program; the pickup trucks and the light trucks significantly overpay in some categories almost 200 percent of what their fair share is; and the big truckers significantly underpay.

This poses a real serious dilemma, for the trucking industry is essential to the commerce of this country. And if we increase the burden, the cost of support to that trucking industry, we will ultimately pay as consumers. But for equity's sake, I think we must come up with a true evalution of how much each individual or each class of vehicle should pay.

That is what we have tried to do. And what has happened? We have a big hubbub on the Hill because the truckers are significantly threatened economically. The truckers industry is not well. They have serious economic probems. So we can't simply increase the burden that they share without giving them some offsetting productivity gains.

That is where we have the truck size and weight issue comes in. And so we are biting the bullet. We are mandating that we should go to a 102-inch width, on trucks.

Why? We now have a federal maximum of 96 inches. With the modular sizes used now in shipping and building, a piece of plywood four-by-eight, cannot fit in the trucks with a 96-inch maximum width. It means that those truckers cannot carry a full load in a cost effective manner.

We permit 102-inch vehicles on the road in buses, but we deny it on trucks. It does not make sense. And we believe that we can require the 102-inch maximum width on trucks with no compromise of safety, for we are only governing the use of the interstate system itself, and it is designed to accommodate those sizes.

Beyond that we are mandating the use of doubles, 28-foot length double trailers on the highways, and going to a 48-foot length on the single unit trucks. These sizes are used all over the country except for about 17 states.

We are also mandating a maximum minimum, if you will catch that, of 80,000 pounds in load. There are three states remaining who do not permit 80,000-pound loads within their state. They require a maximum of 73,280 pounds instead of the 80,000.

And what does that mean? It means that we are penalizing the consumer to the tune of millions of dollars because three states, and only three, keep their weight limit lower than the rest of the country. And they cry and say that is a state's right. And I say that is not a state's right, for the interstate program pays 90 percent of the cost of their interstate system. And because of the nature of interstate commerce and its importance to this country as a whole, I do not believe we can allow three states to interfere with that free movement of traffic.

We must penetrate that umbrella of state's rights in order to get uniformity and equity in transportation. We have other problems in the trucking industry that we are not addressing in this particular bill but which I have committed to address in future legislation, because it is so significant.

Let's talk about the burden that we have imposed on the trucking industry. Let me put it this way: If you had one tractor/trailer combination that you wanted to legalize to move interstate commerce in all of the contiguous 48 states, one tractor/trailer, you would have to make 84 applications to the various states; you would have 93 stickers on your windshield; and you would file 205 monthly—or quarterly and semiannual reports—for one vehicle.

We have 17,000 carriers involved in this kind of commerce. We have checked with one carrier alone, and his administrative costs only to handle the complications of this permitting run over a million dollars a year. And who pays for it? The unknowning consumer.

I have written to every governor in this country, pleading with them to address the issue of the multiplicity of permit requirements in their individual states, for some states require up to four different departments to issue permits on one vehicle.

We have allowed this bureaucracy to expand, and we have got to terminate it if we are going to maintain a healthy trucking enterprise, which is important to all of us.

So it becomes very complicated. We have come up with a proposal now for a 5-cent increase in diesel and gasoline, which would bring us up to 9 cents a gallon. That would run the average consumer approximately $25 a year, less than the cost of new front-end alignments and shock absorbers. You will save money. I know that is the same old political story we have heard for years. We are going to help you out. [Laughter.]

But it is true nonetheless. There have been allegations, and I suppose you have read them about how Federal Highway simply wants to expand its bureaucracy, and if we increase this user fee it means for an explosion of government. But this is not true.

Let me tell you that you have the best buy in all of Federal Government in your federal highway program, not simply because I am there, because I inherited a magnificent professional organization, but it is because these are professional engineers who are moved and motivated by that engineering mentality. We work with the states to respond to state needs.

The administrative costs of the Federal Aid Highway Program, including our millions of dollars in direct research and technology transfer, amounts to less than 2 percent of our budget, and with this increase that administrative cost will drop to 1.3 percent.

Federal Highway Administration is now staffed at a level less than it was at the height of the interstate construction program. We now have a staffing level less than it was in 1955, and I am very proud of it, because we have got some good, good professionals.

Unfortunately, in politics, you paint with a broad brush, and you get all those bureaucrats up there who are living off the fat of the land, and it is most unfair. I think it is true in some departments, but I do not believe it is true in the Federal Highway Administration and is—as a professional critic of government for many years, I can tell you that you ought to have confidence in the quality of many of the people who serve in this government.

I am very proud to be a part of it. But what are some of the other things we have done in trying to address the problems of the growth of this Federal Government?

It is astonishing when you stop to realize that the lag time in construction programs from the concept of the average highway until you can issue a contract is seven years, three months. Multiply that, on the average road, by the average rate of inflation, and you see that we have been more than doubling the cost of every project before we turn a spade of dirt.

What a tragic waste of public funds. And so one of the priorities of the Reagan Administration has been to review the regulation red tape. I know it sounds like a code word, but it is a very meaningful thing.

Because of our regulation reform, we have succeeded in cutting months off of the lag time in approvals of these projects. We are not denying people the right to be heard on their concerns on locations or environmental matters, but what we are trying to do is to fold all of those public hearing processes into one process so we can guarantee the right to be heard and then to make timely decisions.

There are those in this government who want to concentrate all power in Washington, D.C., instead of returning judgment matters back to the states where states can respond to local concerns far more effectively and efficiently than we can thousands of miles away.

There is a strong movement to deny us our standards on geometric design on the reconstruction, resurfacing of roadways. The Center for Auto Safety is currently suing me.

Well, they say, you can't trust the states to be concerned with safety of life and limb. Well, when I was a member of the Texas Highway Commission, I didn't believe that all truth and knowledge and wisdom and compassion and professionalism resided in the bureaucracy in Washington, D.C. And even though I am now a member of that bureaucracy, I still maintain that same principle.

We have concerned and professional people in the states who know far better than we the needs of their particular constituencies, and we are doing all that we can to diffuse that concentration of power here and return the prerogatives of management back to the states within the latitude that the Congress will permit. We have made great strides in that regard.

You know, I have wanted to say that—I mentioned earlier about all the stories about the hardships that this Administration has been thrusting on people, and they are not true. Certainly, you will find some instances of injustices. There is no question about it, and I don't condone it. But I think the general thrust of this Administration has been absolutely in the right direction.

They say we have cut down on support for basic necessities for people, and that is wrong. The Tax Research Foundation, not a partisan group—has compiled data saying that we—you and I—the taxpayers—spent over $500 billion last year on human services. I think that is a commendable record. Now we are trying to use it more efficiently and effectively, but we must have some continuing support from the taxpaying public.

There are those who want only to consume and not to produce. This Administration believes in profit. We want you to make a lot of it because we need your taxes to support us.

And I know the economy is tough. The Democrats are talking about jobs programs, creating jobs programs out of the highway program, and it will have that beneficial effect. But that is not primarily designed as a jobs program, but to serve this basic infrastructure upon which our whole economy depends.

We can, by using the Federal Aid Highway Program as the vehicle, create more meaningful jobs than any boondoggle program of simply tossing dollars out in short-term make-work projects.

That is why I am pushing this program so hard. As a business community, I hope you, too, will lend your voices in support of this program.

Some folks have said, well, why don't you cut out all the controversy about truck size and weights, cut out the controversy on cost allocation. Let's just put a nickel gas tax in and get it through.

I will tell you why that is not possible, why it is not desirable, why it is not fair. Because if you do that the average driver of the passenger car will increase his support of the highway program and the heavy commercial carriers' contribution will actually decrease from what it is now.

It would be easy to take that course of action, for those who pay the tab are not organized politically, do not have the powerful voices up on the Hill. But, I think that is wrong. I am an idealist, I guess, but I believe our system can work and will work if those of us who believe in it will contribute to it and be active in support of those principles which we preach about and talk about and pray about generally one day a week.

I have said for years our government will only be as good and as kind and as generous and as noble as you and I demand that it be. We have permitted government to get out of hand, and I recognize the problems of the business community. For too often we have been reluctant to take a stand on an issue for fear of alienating those on whose business we depend.

I say the condition of this economy, the condition of this country has taken us to the point where we can no longer take that easy way.

We elect someone and send them to government in Washington. We say, "Hey, you stand up and you take that difficult vote, and we will be by your side." But too often we are not by their sides, but we are three paces behind and ask them to cast that difficult vote.

We have got to become active and attentive and supportive of the people who represent us, or the quality of our government laws will be diminished.

I have pleaded with business groups for so long, and all across this country, in which we live, and if you do not raise your voices in support of good and proper principles there are other raucous voices who will dominate and determine the course of this country.

I think the situation is extremely critical, and especially at a time when unemployment, which is such a national tragedy, has captured the public mind. Too often we permit the commercial humanitarians to enact legislation for immediate headlines but not for a resolution of the underlying problem.

You are the ones who can dissuade the Congress from careless votes, from simply responding to an uninformed public ourcry, and that is why I say the quality of governmental programs will be dependent upon you.

I want to leave you with one last thought. This story I tell has been very meaningful to me, and it is a very true story.

I was with the President on the morning of the day he was shot. He said to me that morning words that I will treasure and remember all of my life. He said, "You know, I have often said these words publicly, but now I want to say them to you privately. When you come to make your decisions, I want you to base them not on what is in my best interest for reelection, but on the basis of what is right for this country."

It was a magnificent statement, and it is sometimes difficult to keep that philosophy in mind when you are confronted with the immediate demands of groups and recognize that the average person does not have the powerful solidified representation to make his point heard. But we are going to try to be true to those principles.

With your help and with the active support of organizations such as this, we will keep that commitment.

Mr. President, this Congress has not taken such a major step in highway legislation since 1956 when it established our National Interstate and Defense System. This legislation begins a new era in highway policy and will be a springboard for future legislation.

As chairman of the Transportation Subcommittee I am fully aware that, as major as this legislation is, it cannot and does not address all aspects of national highway policy. It merely sets the stage for meeting what will be new transportation needs. We must be prepared to meet these needs with new, innovative thinking. I foresee major changes in our approach to highway problems.

This must be done. We have the greatest, most free society the world has ever known. This is in no small part due to the fact that we have one of the most extensive, safe, efficient highway networks ever built in any country.

I am troubled that we have been relying on this transportation system this past decade without maintaining our commitment to its maintenance and upkeep. There is no way to avoid this problem. We cannot allow this underlying network to waste away and yet expect our economy to develop and expand.

We must have good roads. Roads are expensive and we must realize that if we are to prosper we must pay for them. This means that resources which are or might be spent in other areas must be spent on our highways to maintain them in a useable condition.

I am committed to the user-fee concept which is the basis for our highway program. This method, where those who use and benefit from our highways and roads, directly or indirectly, pay for them, is the most efficient and equitable system devised for funding our interstates, roads, and bridges.

This is a controversial issue. There are some who feel that this change in our national highway policy is not necessary. There are some who would wait saying that the matter has not been fully developed and considered.

To those who advocate such positions, let me say that they are wrong. Our commitment to our roads is necessary. This matter has been developed and considered. We as a nation gain nothing and will lose much if we delay longer. Our country's short- and long-term welfare is at stake.

I earlier on mentioned the fact that this bill does not solve all possible problems present or future. In fact, I am concerned with some matters which the bill itself raises. I am not comfortable with the position taken by the House and Senate on a number of issues. I think the position taken by the Congress on such matters as the extension of Davis-Bacon provisions to areas not now covered by these provision, is both unwise and detrimental to the purpose of this bill.

The position taken by the Congress on "Buy America" is not in the best interest of national industrial well-being.

These are matters which I will be reviewing in hearings in the upcoming session.

I am particularly concerned that the conference committee did not adopt the tax proposal which I helped work out and which the Senate adopted. I am concerned that the proposal set forth in the conference report will heavily impact on an industry vital to our country and of special importance to those of us in the West. This industry is the trucking industry which will be called upon to substantially increase what they as individuals pay into the highway trust fund based upon their highway useage.

Before the heavy duty use taxes are implemented a year and a half from now I fully intend to return to this issue for the purpose of specifically evaluating the impact these taxes will have on small, independent trucking firms and on farming operations which use trucks seasonally.

The House and conference committee failed to give adequate consideration to such impact and to the unique situation which western trucks users and operators find themselves in. We need to give this matter further consideration and I fully intend to do so.

Several Senators addressed the Chair.

The PRESIDING OFFICER (Mr. HAYAKAWA). The Senator from Pennsylvania.

Mr. HEINZ. Mr. President, I wish to ask a question of the distinguished Senator from Kansas concerning an income tax provision in the highway bill.

Mr. DOLE. Mr. President, may we have order?

The PRESIDING OFFICER. The Senate will be in order. There will be order in the Chamber so the Senator can be heard.

Mr. STAFFORD. Mr. President, parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. STAFFORD. Who has the floor?

The PRESIDING OFFICER. The Senator from Pennsylvania has the floor.

Mr. STAFFORD. The Senator from Vermont would like to be recognized following the Senator from Pennsylvania.

Mr. HEINZ. Mr. President, let me assure the Senator from Vermont that this will be an extremely brief colloquy with the Senator from Kansas.

Mr. ROBERT C. BYRD. Mr. President, I hope the Chair will follow the rules of the Senate in recognition of Senators.

The PRESIDING OFFICER. I will try to do so.

Mr. HEINZ. As I was saying, I wish to ask a question of the distinguished Senator from Kansas concerning an income tax provision in the highway bill. That provision clarified that the tax-exempt character of interest on certain obligations which were granted tax-exempt status outside of the Internal Revenue Code would be set forth in the Internal Revenue Code and, consequently, that the tax-exempt character of such interest to a regulated investment company or mutual fund would flow through to its shareholders. Unfortunately, the provision as it passed the Senate did not include an effective date.

It was my understanding that the provision was intended to be retroactive to taxable years beginning after 1975, which was the effective date in the Tax Reform Act of 1976 which allowed the status of tax-exempt interest to flow though a regulated investment company. Does the Senator from Kansas have the same understanding of that as I do?

Mr. DOLE. Yes. I might say the distinguished Senator from Pennsylvania offered an amendment. I do have the same understanding, and I understood the amendment was to be retroactive. Indeed, the revenue estimates in the Conference mark up materials reflect a retroactive effective date. I would like to assure the Senator from Pennsylvania that I intend to seek a technical correction next year to resolve any doubt on the effective date of the provision. In addition, the conferees intended that the retroactive effective date would not cause any obligations to lose their tax exempt status solely by reasons of this provision. Finally, the conferees intended to emphasize that, for the future, the Internal Revenue Code should be the sole source of tax exemption of interest on any obligations.

I thank the Senator.

Mr. HEINZ. I want to thank the Senator from Kansas for his clarification, and I am very pleased that it meets what I understood to be our interests.

Several Senators addressed the Chair.

The PRESIDING OFFICER (Mr. SYMMS). The Senator from Vermont.

BUY AMERICA

Mr. CHAFEE. I would like to clarify with the leadership of the Committee on Environment and Public Works, and with other conferees on title I of H.R. 6211, the conference provision dealing with buy-America requirements.

The agreement among conferees was very clearly to continue with one exception, the provisions of current law as contained in title IV of the Surface Transportation Assistance Act of 1978, Public Law 95-599. Do my colleagues agree?

Mr. STAFFORD. The Senator is correct.

Mr. RANDOLPH. The Senator is correct.

Mr. DOMENICI. That was the agreement.

Mr. MOYNIHAN. The Senator is absolutely correct.

Mr. CHAFEE. The one change that was agreed to was to increase, for highway projects only, from 10 to 25 percent, the price differential needed before foreign materials, rather than American, could be used on a project. All the other provisions of existing law, including the administrative interpretations consistent with current law, were to remain undisturbed.

Exemptions from the buy-America requirement for projects costing less than $500,000 are to be continued.

The requirement that products used must be substantially all from articles, materials, and supplies made in the United States is retained in the conference agreement.

The administrative interpretations of these provisions are not overturned by the conference agreement.

Do my colleagues agree that I have correctly described the conference agreement?

Mr. STAFFORD. Yes, the Senator from Rhode Island is correct.

Mr. RANDOLPH. Yes, I agree. The only change was to increase from 10 percent to 25 percent the price differential applied to materials for highways.

Mr. DOMENICI. The Senator's description is correct.

Mr. MOYNIHAN. The Senator from Rhode Island's description is totally correct.

Mr. CHAFEE. I thank my colleagues.

Mr. MOYNIHAN. Mr. President, will the Senator yield? May I, on behalf of this side of the aisle and the distinguished chairman state that the Senator from Rhode Island has stated exactly what my understanding of our agreement was.

Mr. CHAFEE. That is what the agreement was with the House and the conference.

Mr. STENNIS. Mr. President, it is with a considerable degree of reluctance that I have decided to support this highway bill. I am always concerned about raising taxes, particularly in a recession. However, it has become more and more apparent to me that the current rate of highway taxes, set back in the mid-1950's, is completely inadequate to maintain and replace our highways and bridges in an acceptable manner. This problem must be met. It will not go away. It will be here for years until it is met.

A good highway system is an absolute necessity for the economic well-being and growth, not only, of course, for my State, but for the entire country. Our economy moves on our highways.

This bill will go a long way toward improving the interstate roads, our State roads, and our county roads and bridges, the latter being so vital in moving the products of our farms and factories.

I know our truckers are rightly concerned over the sizable increase in their user fees. I note this bill properly delays the imposition of these new user fees until July 1984, and to July 1985, for firms with five trucks or less. This will hopefully give the trucking industry time to adjust to the new situation or even for adjustment in the bill of the tax in the Congress, if that should appear warranted at that time.

In summary, Mr. President, this bill, while not perfect, is a reasonable approach to insuring our roads and bridges are improved and maintained to an acceptable standard. To postpone this problem is to make it worse. I am convinced we should act now. Many of our bridges and many of our highway miles are in dangerous condition in Mississippi. The distribution of the funds collected from this bill will pay my State $1.35 for each dollar collected from my State.

The VICE PRESIDENT. The Senator from West Virginia is recognized.

Mr. RANDOLPH. Mr. President, only that the Record may be complete, accurate, and understood by some, perhaps, who have questioned the procedures under which this measure reaches the floor, I must remind our colleagues that this highway gas tax bill was produced within the two committees of jurisdiction in the Senate, the Environment and Public Works and the Finance Committees.

I want to further state that this measure has been in the making for almost 2 years. Sometimes it is said that you should bring a bill to passage very quickly or in a period after careful discussion. It is not in the last few days, the last few weeks or the last few months, but the Committee on Environment and Public Works, through the process of extensive hearings, over a dozen of them and many markups brought this legislation to the Senate. The excellent leadership of Chairman

SYMMS, of our Transportation Subcommittee, Chairman STAFFORD of the full committee and the cooperation of the entire committee, not that all would even vote for the measure as it now stands, brought forth this legislation. Sixteen members of our committee worked diligently over a long period of time to bring to this body the measure that will be voted on shortly.

I am not angry at any point in the legislative process. I may be disturbed, I may be saddened, I may wonder why my dear colleague, whom I know so very well, cannot see the issue as I see it. All of that is understood. But during the 34 years that I have been privileged to work on this historic Hill, I have approached the legislative process and the decisionmaking process as something that I counted as not only a responsibility to execute but a privilege as well.

And so, regardless of how Members in a few minutes will vote on this measure, I want each and every Member to know that this is not a statement of plausibility or nicety. I will recognize the judgment and the conscience of my colleagues as they vote on this measure. I only ask them once again, if there are Members who are still perhaps undecided, that they realize that this bill is not the best bill, it certainly is not the worst bill, but it is a necessary bill to bring into being the rehabilitation of the network of roads and bridges which, in a sense, came into being by the action of this Senate and the House of Representatives in 1956. If we brought into being a unifying force for this country—as we did—it is wrong, as I see it, to allow that force to crumble, to decay, to break apart. And it is my feeling that that is the process we are now experiencing. And I am hopeful—very, very hopeful—that the measure will pass.

I do not want to be misunderstood. I should not quote the Bible, I know. But the prophet Isaiah said, "A way shall be there for the redemption of his people." I hope I will not think in terms of being any prophet at all, but just a practitioner of that which is practical. I hope we will realize that the way, the way of America, a mobility, a people, a product, that we will, on this vote, give to the country, through the States, the opportunity to work within the Federal structure in a cooperative manner serving people, people, people. This measure deserves, I believe, our support.

In the State of West Virginia, approximately, 3,000 bridges are structurally deficient or functionally obsolete. The cost to repair or replace those structures is $1.5 billion. Between now and the year 2000, our interstate rehabilitation needs will be $600,000,000. This legislation will assist in meeting these needs as well as providing funds for completion of the Interstate Highway System in the State.

Mr. President, I also want to thank our staff for their fine work on their legislation. My thanks to Jean Schrag, Richard Harris, John Yago, Bailey Gerard, Lee Fuller, Linda Findlay, and Kathy Cudlipp.

Mr. FORD addressed the Chair.

The VICE PRESIDENT. The Senator from Kentucky is recognized.

Mr. FORD. Mr. President, I will take only about 2 or 3 minutes.

Mr. President, I do not like criticizing a colleague or his tactics. I have never done this before, I am very uncomfortable doing it.

But the events of the past few days where the Senate was brought to a standstill by the tactics of the Senators from North Carolina have pushed my patience and understanding to the limit. They and a couple of others have kept the Senate from enacting much-needed legislation. Their tactics have ridiculed the Senate rules. Their conduct, in my opinion, has crossed the boundary of expected senatorial courtesy.

To be sure, every Senator has the right to utilize the rules of the Senate to the best of his or her ability and to benefit for whatever purpose that he or she may desire. But those rules demand a certain amount of respect if they are to function and protect the institution of the Senate as a whole. The flagrant lack of respect for the rules and the consideration for its Members has done the Senate irreparable harm.

I happen to share the opposition of the Senators from North Carolina to this piece of legislation, even more so now that we have the conference committee's report. But I also recognize that there is a real and significant difference in expressing yourself and thwarting the rule of the majority, if a democracy is to function as the founders of this great Nation has intended.

One of the most cherished and distinctive features of the Senate throughout the years has been that it provides for reasonable delays in the consideration of legislation to protect the rights of everyone. The House of Representatives has no similar provision. And this is a distinction that should be protected and manintained at all costs.

However, in my opinion, what has happened these past few days—and I think it was evident this morning—poses real danger of destroying those rules. Reasonable positions, maintained in an unreasonable manner, are now a threat to reasonable consideration of legislation.

What will be the repercussions? The Senators from North Carolina have brought this body virtually to its knees, ostensibly to oppose an increase in the gasoline tax. "It will hurt the people of North Carolina," they say.

If that is what they are concerned about, why did they cast critical votes last summer that assured the passage of an increase in the cigarette tax? If they care about hurting the people in North Carolina, and in the tobacco community throughout this Nation, why did they not fight hard last summer? The tobacco community, indeed the entire farming community, needs to know what these two men have done to the tobacco coalition in this Congress.

Those of us from tobacco States have worked hard over the years to build a strong coalition of agricultural interests. We have stood together and together we have protected our farmers. But the Senators from North Carolina have destroyed decades of hard work in these last few weeks. They have made new enemies for tobacco. They have put our tobacco program in the greatest jeopardy it has ever encountered.

The actions of the Senators from North Carolina have generated considerable ill will among the Members of the Senate. I fear that I along with others will live to share the consequences. I have noted recently press reports where individual Senators, my friends, are contemplating various forms of retaliation. Some of the contemplated actions apparently will be directed at legislation and programs that affect the constituents of the Senators from North Carolina, especially small farmers and tobacco growers. I can appreciate my colleagues' anger and frustration. Unfortunately, however, a great many of my constituents have a lot in common with the people of North Carolina, and these programs are just as important to my people as they are to theirs.

Other Senators no doubt must say the same. Undoubtedly, any punitive measures aimed at these groups which are so important to the Senators from North Carolina will have an impact reaching far beyond the North Carolina borders.

The Senators have placed me in a very difficult position. I do not need the potential problems they are creating for my State and other States, where agriculture is an important industry. They are putting me in a spot which is not the least bit comfortable or, in my opinion, deserved, and I do not like it.

Mr. President, a lot of innocent people will suffer. Not me, but the poeple I love and I was sent here to serve. I wish that the Senators had thought of that beforehand. I hope that those who make those threats will reconsider for while self-satisfying, no doubt, they will end up doing more harm than they will good.

Mr. DECONCINI. Will the Senator yield?

Mr. FORD. I yield to the Senator from Arizona.

Several Senators addressed the Chair.

Mr. EAST. Mr. President, a parliamentary inquiry.

The VICE PRESIDENT. Will the Senator yield for a parliamentary inquiry?

Mr. FORD. I will be glad to do that.

The VICE PRESIDENT. The Senator from North Carolina.

Mr. EAST. As a point of parliamentary inquiry, since the speech of the Senator from Kentucky was obviously of a personal nature, directed at the Senators from North Carolina, would it not be appropriate as a parliamentary matter that we be allowed to respond to that charge? I think it is quite clear under any just, reasonable set of rules that we are entitled to respond to the comments which have just been made. I would hope that my colleagues would forebear and allow me or Senator HELMS to respond since clearly they were directed at the two Senators from North Carolina.

The VICE PRESIDENT. The Senator from Kentucky has the floor and he is not required to yield. He has yielded to the Senator from Arizona for a question.

Mr. DECONCINI. I did not ask him to yield for a question. I asked if the Senator from Kentucky would yield and I understand he has yielded.

The VICE PRESIDENT. That is the only right by which the Senator can yield, for a question.

Mr. DECONCINI. I thank the Senator from Kentucky for yielding.

I ask the Senator from Kentucky if his consternation and concern expressed here is of such a nature that it has been ongoing for some period of time and the recent example that we have just witnessed over the last couple of weeks has really brought it to a point where he believes that something ought to be done to change the rules under the which we operate.

Mr. FORD. The Senator is correct.

Mr. DECONCINI. May I go on with the Senator from Kentucky for a moment? Does the Senator agree that the last couple of weeks have been a sorry chapter in the history of this body and that for nearly 2 weeks the will of a clear majority of the Senate has been frustrated? I want to know if the Senator from Kentucky agrees that the one chance the farmers, in a depression situation, had to see something happen has been put aside because of this filibuster under the Senate rules. Does the Senator agree?

Mr. FORD. The farmers of this country need all the help that we can give them. It appears as a result of the filibuster that even though everyone admitted that the farm bill known as PIK was not the best or perfect, it was something that was needed this year in order for it to become effective in 1983, giving us an opportunity to come back and refine that. As a result, it is my impression that the farmers lost that opportunity.

Mr. DECONCINI. I thank the Senator. I would like to proceed with the Senator from Kentucky. It seems that the hopes of millions of unemployed Americans for an improved economy that might have had some breath of life over the last several weeks has been ignored. It has been ignored because, as the Senator from Kentucky so ably points out, some Members of this Senate put their personal desires ahead of the effort to do something about the ailing economy. Never have so many suffered so much from the obstruction of so few, in this Senator's mind. The world's "greatest deliberative body" that we like to call ourselves has been tyrannized and immobilized by a handful of men, whatever their motives, to prevent the will of the Senate and by using the rules of the Senate to prevent the economic recovery, in my judgment.

The rules were meant to guard the minority, not to give them license to dictate and cause harm to the Nation. Yet, that is what has transpired in the last days of this session.

I do not know what those who have treaded upon this for days on end believe they have accomplished. But if they think they serve the interests of this Nation and the people they represent back home I think they are sadly mistaken.

The Senator from Kentucky ably points out that just in the area of tobacco and farm programs indeed there is ill will. I urge the Senator from Kentucky and those others certainly not to bear any grudges or burn any bridges in the farm community for Arizona has the same interest, to see that we have a stable agricultural community in this country.

There are those of us here who will mark this day. I hope that the challenge will be met by the leadership on both sides of the aisle to do something about the rules. If we invoke cloture, it appears to me that cloture ought to prevail and then the issue ought to be decided. For us to labor through this holiday period, for us to have to stay here night after night, for us to have to be the laughing stock of the Nation in the way we conduct our business—I only say it is a sad for this body and not a proud one, regardless of the outcome of the pending legislation.

I want to thank the Senator from Kentucky for his leadership and ask the Senator if he intends to propose any rule change or participate in any rules change before the Rules Committee, seeing that he is the ranking member, and what his agenda might be in that area.

Mr. FORD. I thank my distinguished colleague from Arizona. We now have a group, the Pearson-Ribicoff Commission, putting together recommended changes, not only for rules but for the procedures and the committee structure. That recommendation should be coming shortly. When that appears before the Rules Committee we intend then to refine that, discuss it and debate it and send it to the Senate floor for the consideration by the distinguished Members of this body.

Mr. DECONCINI. I thank the Senator from Kentucky and I compliment him.

Mr. ROBERT C. BYRD. Will the Senator yield at that point for a question?

Mr. FORD. I will be delighted to yield.

Mr. DECONCINI. I want to thank the Senator for his leadership on the Rules Committee. On behalf of at least this side of the aisle, and I think the entire Senate, I thank him for addressing this important problem. I thank the Senator for yielding.

Mr. FORD. I yield to the distinguished Senator from West Virginia.

Mr. ROBERT C. BYRD. I will wait and obtain the floor later.

The VICE PRESIDENT. The Senator from Kansas.

Mr. DOLE. Mr. President, we are here to debate the highway bill and not to hear the chairman of the Democratic Senatorial Campaign Committee launch a campaign against the Senators from North Carolina. If we want to list the bills which have been blocked in this session, I will bring up the Pick bill, which was blocked by the Senator from Montana. We agreed to take his amendments if he would release it.

There is the bankruptcy bill, which was blocked by the Senator from Ohio. Was this a filibuster? Well, he said he would if we brought it up, so we could not bring it up.

Mr. DECONCINI. Will the Senator yield on that point?

Mr. DOLE. Let me finish. Then there was the CBI, the Caribbean Basin issue, which we tried to get to the floor. That was blocked by 12 Members on the other side of the aisle.

I do not intend to stand here and recite all the problems we have at this late stage. There is a lot of acrimony here and a lot of politics. Everyone is sort of piling on JESSE HELMS. That may be great fun but I do not think it will be particularly effective.

I just suggest that we are here to talk about a highway bill. We are here to discuss how we are going to put some people to work and whether or not this bill is going to pass. I thought we would go ahead and vote on the bill, then we could all have our fun

after the vote on the bill. I do not think, as the chairman of the Finance Committee and one of the managers of this bill, that we can stand here and let silence indicate that we agree with the remarks of the Democratic chairman of the Senate Campaign Committee. His remarks amount to a political campaign against one of our colleagues.

We are not very pleased at times with what happens on the other side. I have become frustrated with Senators on both sides. I have been through the works in 1976, where I was designated the hatchet man. That took a while to erase, but we all survive this business if we try.

It seems to me that we have a very good bill here. We should not mix this legislation in personalities. It is Christmastime, a holiday season; it is a time to be jolly.

A lot of jingle bells are ringing.

Mr. FORD. Will the distinguished Senator from Kansas yield?

Mr. DOLE. I yield without losing my right to the floor. Is it a question?

Mr. FORD. Yes. Would it disturb the Senator if he knew that many Senators are saying they are going to retaliate because of what has happened? I am just saying I hope they will not. You have never heard me get up on this floor and criticize anybody in 8 years. Just because I happen to be chairman of the Democratic Senatorial Campaign Committee, that did not keep your colleague from launching his campaign for the Senate next time. If the shoe fits—I am trying to protect my people. If you want me to do something different from that on the floor, that is fine. But as long as I am here, I am trying to protect my people.

Mr. DOLE. I am trying to protect your people, too. I am one of your allies. Do not drive me into a corner.

Mr. FORD. I am not driving you into a corner; 2 are driving ninty-eight into a corner.

Mr. DOLE. It is a big corner.

Mr. FORD. Is that a safe corner or a safe harbor.

Mr. DOLE. Mr. President, I would like to see if we could vote on this bill and get out of here. It seems to me we have reached a stage where you do not want to sit down because maybe somebody will get up with a stronger attack. Maybe I will have to stay here until 11:30.

Mr. MATHIAS. Mr. President, will the Senator from Kansas yield for a parliamentary inquiry?

Mr. DOLE. Yes.

Mr. MATHIAS. At an earlier point, the distinguished majority leader said we might advance the time for the vote. I am just wondering whether that has been done or is likely to be done, because it seems to me it is highly desirable to have it done.

Mr. EAST. Mr. President.

The VICE PRESIDENT. The Senator from Kansas has the floor.

Mr. DOLE. May I just——

Mr. MATHIAS. My inquiry is, have we advanced the time for a vote?

The VICE PRESIDENT. The Chair will respond. The time has not been advanced. The Senator from Kansas has the floor.

Mr. EAST. Mr. President, I would like again to make a parliamentary inquiry.

Mr. DOLE. I yield to the Senator for that purpose without losing my right to the floor.

The VICE PRESIDENT. Is there objection? Without objection, it is so ordered.

Mr. EAST. Mr. President, I am making a parliamentary inquiry in that, in view of the nature of the comments by the distinguished Senator from Kentucky, I think any fair or equitable rule of supposedly the greatest deliberative body in the world would allow the two Senators from North Carolina, if they so chose, to respond in some reasonable timeframe to his remarks.

I ask the cooperation of my colleagues that that be accorded me in some way or other. Simply trying to run out the clock after the attack was made—the comments were made—I think there arose this obligation on the part of this Chamber to give us some reasonable timeframe in which to respond. I am asking for that. The Senator from Kansas now has the floor.

The VICE PRESIDENT. The Chair responds to the Senator's parliamentary inquiry: A Senator is not required to yield on a question of personal privilege raised by another Senator. The Senator from Kansas has the floor.

Mr. DOLE. Mr. President, I am willing to yield the floor. I share the view expressed by the distinguished junior Senator from North Carolina. I am not trying to prevent the Senator from regaining the floor, but I do not want everybody to get mad here and vote against the bill. I do not mind a little combat, but I would rather do it after we vote.

Mr. SARBANES. Will the chairman of the committee yield for a further parliamentary inquiry?

Mr. DOLE. No, Mr. President, I want to say further to the Senator from Kentucky that we are all part of the farm coalition. I hope I have been supportive of the tobacco program. It is a hotly contested program, but it is a good program. The Senator from Kansas intends to support it in the future. That is one vote; and we do not raise tobacco in our State.

It seems to me we do not gain a great deal, even though there is a lot of frustration, and has been for several days about this bill. I did not realize this bill was so controversial. The 5-cent gas tax, in the view of this Senator, is a good bill.

With regard to the revenue title, the House and Senate conferees on the revenue title have arrived at a reasonable compromise level of taxes on heavy trucks.

The various levels of heavy truck use tax that have been proposed are:

Administration—$2,700 per year immediately;

House—$2,000 per year beginning January 1, 1984;

Senate Finance—$1,600 per year phased in from January 1, 1984, to July 1, 1985;

Senate—$1,200 per year phased in from January 1, 1984, to January 1, 1986;

Conference—$1,600 per year for 2 years, beginning July 1, 1984, increasing to $1,900 per year by $100 increments from July 1, 1986, to July 1, 1989.

At the highest level, which is not reached until 1989, the tax is still $100 short to the House level—which is imposed in 1984—and $800 short of the administration level—which would have been imposed immediately.

There will be no heavy use tax increase until July 1984. For the following 5 years, the total amounts paid on the heaviest truck—note: this is cumulative—under the various proposals would be: Administration, $13,500; House, $10,000; Senate Finance, $6,600; Senate, $4,280; conference compromise, $7,770.

On that basis, the compromise is only 40 percent of the difference between the Senate position and the administration proposal.

It is close to splitting the difference between the House and Senate.

Additionally, the conference committee compromise eliminates all taxes on truck parts, lubricating oil, inner tubes, and tread rubber. The Senate had retained all of those taxes on heavy trucks.

Now some additional points on the Senate-House compromise user-fee structure, the effect on heavy trucks:

First-time-use tax increase starts is July 1, 1984—later than both the Senate or House provisions which started increases on January 1, 1984.

Vehicles destroyed or stolen can get refunds for the remainder of the year on the use tax.

Owners of five or less trucks are allowed 1 year further on the phase-in.

Vehicles with less than 5,000 annual miles are exempt from the tax.

Heavy trucks:

Relieved of all the taxes on tread rubber—5 cents per pound.

Relieved of all their taxes on inner tubes—10 cents per pound.

Relieved of all their taxes on lubricating oil—6 cents per pound.

Relieved of all the current taxes on truck and trailer parts—8 percent of sales price.

Phase-in:

The phase-in provisions, including the 1-year delay in beginning the tax will allow time for the economy to improve and the size and weight productivity benefits to take hold. The trucking industry is a leading indicator of the economy and always performs well in a resurging economy.

We have dealt fairly with the trucking companies. They have been loading up on that side. The administration bill would have cost some of the heavier trucks over the 5-year period $13,500. The House bill was about $10,000. The Finance Committee went down to $4,400. The Senate bill itself went down to $4,200, the conference report was $7,700. That may seem extremely high, but this rate has not been adjusted for 20 years. In addition to that, I say to my friend about the impact it might have that none of these takes effect until July 1, 1984. There is a great deal of time there. If, in fact, we determine there has been too severe an impact on any one industry, we can make that correction. If it is an independent owner-operator with five or fewer trucks, the phasein will not begin until January 1, 1985.

It seems to me we have set the stage for a sound program, and I hope we can focus on the bill. We did our best in the conference. I know Senator STAFFORD and those in his conference and Senator GARN and others did their best. Some would indicate that we did not do well enough. I really hope we can just focus for whatever time we have before the vote on the bill itself. We all have time constraints and this Senator is not going to occupy the floor any longer.

Mr. EXON. Will the Senator yield for a question?

Mr. DOLE. I am happy to yield.

Mr. EXON. In the interest of fairness, would it not be a good idea, with a half-hour remaining, to get agreement if we could that the time be equally divided between majority and minority, so that we may have some equality of time in the half-hour left?

Mr. DOLE. I do not quarrel with anything. I do not divide the time, or give back the time. I do not know how the time has been divided in the past hour-and-a-half.

Mr. BENTSEN. Mr. President, I would like to ask the Senator from Kansas if we can explore the possibility—I understand the desire of the Senator from North Carolina to respond. Certainly, he should be given time to do that. But with the problem of some people trying to catch airplanes to get back to their States, if we could possibly advance the time, with the understanding that those who care to speak further will be able to do so—is there objection to advancing the time?

Mr. DOLE. The Senator from Kansas is now prepared to yield the floor.

Mr. EAST addressed the Chair.

The VICE PRESIDENT. The Senator from Kansas still has the floor.

Mr. DOLE. Mr. President, I understand the time has been about equally divided and if it would expedite matters, if it is satisfactory to everyone, we could divide the time. Does anybody object to dividing the time 15 minutes on a side? The minority leader is here.

Mr. ROBERT C. BYRD. There is no objection on this side.

Mr. DOLE. Any objection?

The VICE PRESIDENT. Without objection, the time will be equally divided between both sides.

Mr. ROBERT C. BYRD. In the control of the minority and majority leaders or their designee.

Mr. DOLE. Yes.

Mr. ROBERT C. BYRD. In that case I designate Senator BENTSEN.

Mr. BAKER. And I designate Senator DOLE.

Mr. DOLE. I yield 5 minutes to the Senator from North Carolina.

The VICE PRESIDENT. The Senator has the floor.

Mr. EAST. I would appreciate 5 minutes, and if I could have order in the Chamber, Mr. President, I would appreciate it.

The VICE PRESIDENT. The Senate is not in order. Senators are asked to take their seats.

The Senator from North Carolina may proceed.

Mr. EAST. Mr. President, we have seen here this morning from the distinguished Senator from Kentucky some comments upon the tobacco program and that issue as it relates generally to this gas tax bill issue. I should like to note that the Senator from Kentucky, for whom I have the greatest affection, is, of course, chairman of the Democratic Senatorial Campaign Committee, and I would like to bring to the attention of my colleagues he is saying exactly the same thing that the Democratic Party of North Carolina was saying yesterday in Raleigh. So if you wonder whether there may be some communication between the two, the answer to that would be, yes, in the affirmative.

Now, you might say, "Well, Senator, fine. What is your position on it as the Senator from North Carolina?" I have always in North Carolina—and I do here in the U.S. Senate—make this issue of the well-being of tobacco as an industry a nonpartisan issue. I have never in my State and I have never here on the Senate floor attacked any person in a partisan way on this issue, and I never will, because those who represent tobacco States know that the well-being of the tobacco industry transcends any partisan differences. We know that Democrats and Republicans in office, in North Carolina or here in the Nation's capital, are always united in their desire to see that the best interests of tobacco are served, and that is where I stand on the matter and will continue always to honor my own rule on that point.

Here would be the problem, you see, following another line of reasoning with the comment of the distinguished Senator. If you allowed yourself to be held hostage by threats of intimidation that you did not take positions on totally extraneous issues in conformity with someone else's wishes or they would retaliate on the tobacco program or some other area, that would be an untenable position to take. And knowing the character and integrity of the Members of this body, I know they would not do that. You would be totally impotent as a Senator if the word were out that you can be manipulated every minute by simply threatening something that is important to you. Fortunately, this body does not work that way. They respect that very diverse issues come before us and they must be dealt with on their own merit. That is what I am doing on the gas tax bill, and it has absolutely nothing to do with the tobacco program in North Carolina or here.

Now, the distinguished Senator from Nebraska (Mr. EXON) has pointed out in a very well-reasoned speech this morning the very adverse effect this gas tax bill will have on farms in the United States. I have an obligation coming from a great farming State, including tobacco, to resist the gas tax. So I must do that, just to represent my constituents. But they have nothing to do with each other. I think it is very unfortunate that the distinguished Senator, for whom I yield to no one in my admiration and respect as an individual and as a very effective legislator for his State and for tobacco interests, should have allowed the issue of partisanship to arise.

The VICE PRESIDENT. The Senator's 5 minutes have expired.

Mr. EAST. So I do appreciate the opportunity to have responded to that charge.

The VICE PRESIDENT. Who yields time?

Mr. EAST. I ask unanimous consent for another 30 seconds.

The VICE PRESIDENT. The Senator yields 1 minute.

Mr. EAST. I have appreciated the indulgence of my colleagues to allow me to respond to that. These are two separate issues and to be effective as a Senator and to maintain my personal integrity, I have to have the right to evaluate each and every issue on its own merit, and I think every Member of this body would understand and respect that right. The implications of intimidation are totally inappropriate, and I regret they were made. I wish to

say, finally, I am a great admirer of the distinguished Senator from Kentucky because the tobacco program has no greater defender than he in this Chamber.

The PRESIDING OFFICER. The Senator from Kansas.

Mr. SARBANES. Will the majority leader yield 1 minute?

Mr. BENTSEN. The Senator from Texas is delighted to delegate a minute to the Senator from Maryland.

The PRESIDING OFFICER. The Senator from Maryland is recognized.

Mr. SARBANES. Mr. President, I think in order to set the record straight it is important to quote a little parliamentary history. When the Senator from Kentucky was speaking earlier, the junior Senator from North Carolina (Mr. EAST) called on him to yield and asserted that he should do so. He later addressed a parliamentary inquiry to the Chair suggesting that it was necessary for him to do so but the Chair made it clear that it was not necessary under the rules. In light of that inquiry, I simply want to quote what occurred on the floor of this Senate not all that many hours ago. It reflects, in my judgment, the breakdown in civility and procedures in this body and shows an unwillingness by some to recognize that what is sauce for the goose is sauce for the gander.

The quote as set out in the morning paper is as follows:

Mr. (Paul) Tsongas: Will the Senator yield?

Mr. (John P.) East: No.

Mr. Tsongas: The senator used my name previously, and I would like to respond.

Mr. East: I understand that. A parliamentary inquiry. The fact that I used a name does not obligate me under the rules of the Senate to yield, will it?

Of course, the response which the Chair made earlier corresponded to the one it just made. I simply note that the very point that the junior Senator from North Carolina was asserting against the Senator from Kentucky only a few minutes ago——

The VICE PRESIDENT. The Senator's time has expired.

Mr. SARBANES (continuing). He himself invoked not long ago in the course of this debate.

Mr. LEVIN addressed the Chair.

Mr. BENTSEN. The Senator is recognized for 1 minute.

Mr. LEVIN. One minute would be fine. I have a question for the Senator from Kansas. As the Senator from Kansas knows, I along with Senator SPECTER offered an amendment which would extend unemployment compensation benefits from 2 to 6 weeks, depending on the State, for unemployed Americans to this gas tax bill. And along with the help of the Senator from Kansas and Senator DOMENICI and others we were able to finally affix this amendment extending unemployment benefits to the gas tax bill as it went through the Senate. Without this amendment two million Americans are going to exhaust their unemployed benefits by March. My question to the Senator from Kansas is this: Was this amendment retained intact by the conference? Is it on this bill?

Mr. DOLE. Yes, the modified Levin-Dole-Domenici-Specter amendment was maintained intact. And I commend the distinguished Senator from Michigan for his inititative. In my view, it should have been done, it was done, and would not have been done without his efforts and we appreciate it. I might say that had we been able to bring the CBI bill to the floor——

The PRESIDING OFFICER. The time of the Senator from Michigan has expired.

Mr. DOLE. I yield myself 1 minute—we were prepared to even add additional benefits but that may come later.

Mr. LEVIN. I thank the Senator.

Mr. MOYNIHAN. Mr. President, passage of this legislation brings us closer to a goal of regional equity in transportation policy.

Ever since an inspired civil engineer named Bertram Tallamy designed the New York State Thruway some 5 years before the inauguration of the Interstate Highway System, the State of New York has prided itself upon its advanced highway system.

Yet we have too often been shortchanged by the Federal Government when it comes to allocating money from the highway trust fund. Indeed until enactment of the Surface Transportation Assistance Act of 1978, New York was, year in and year out, paying more money into the highway trust fund than it was receiving. We took a step toward correcting this inequity in 1978, and now, with the passage of the Surface Transportation Assistance Act of 1982, we have at last righted the imbalance.

The bridge cap, an altogether arbitrary and unreasonable highway limit on the amount of money New York can receive under the highway bridge replacement and rehabilitation program, has been lifted from 8 to 10 percent—New York is entitled to 15.7 percent of bridge funds under the most recent Federal Highway Administration inventory. A new apportionment formula for primary roads, which more accurately reflects a State's funding needs, will increase New York's share from 5 to 5.7 percent. We have more than doubled the authorization for the Interstate 4R program, which provides for the reconstruction and repair of our older Interstate highways, a good number of which are in New York. Finally, for the first time, 1 cent per gallon of the increased gas tax will be dedicated to mass transit capital projects. Although allocation of the $1.1 billion thus raised will be discretionary, experience leads us to believe that New York will receive as much as $200 million of this sum.

This legislation is not perfect. Inequities still exist—the bridge cap, for instance, should be lifted entirely. But as one of the Senate conferees on this measure, I am proud to support it and I strongly urge my colleagues to do likewise.

Under this measure, New York State will receive $2.5 billion in highway funds over the next 4 years—fiscal year 1983 to fiscal year 1986—and should our recent proportion be maintained, some $800 million in mass transit funds. This makes for a total of $3.3 billion.

There has of course been a tax increase. However under the bill now passed, highway users in New York State will pay $2.1 billion in highway use taxes over the next 4 years, while the State and its various subdivisions will receive back some $3.3 billion. It is a rare day when New York obtains any advantage from the working of Federal funding formulas. It is a special day indeed when we obtain a margin of this magnitude. I would point out, however, that this scarcely makes up for a quarter century of being short changed.

THE HIGHWAY BILL—NEW YORK'S SHARE

[Fiscal years in millions of dollars]

Current law	1982	New law	1983	1984	1985	1986	Total
Interstate construction 5 percent	$150.7	Interstate construction 5 percent	$172.3	$172.3	$172.3	$172.3	$689.2
Interstate 4R, 2.4 percent	19.0	Interstate 4R, 3.7 percent [1]	69.5	85.5	99.7	112.2	366.9
Primary 5 percent	77.0	Primary 5.7 percent	90.1	121.5	121.5	140.4	503.5
Bridge replacement and rehabilitation, 8 percent	54.6	Bridge replacement rehabilitation, 10 percent	131.8	141.7	171.5	180.9	625.9
Urban 8.7 percent	67.5	Urban, 8.7 percent	67.5	67.5	67.5	67.5	270.0
Rural 3.1 percent	12.3	Rural 3.1 percent	19.6	19.6	19.6	19.6	78.4
	381.1		550.8	608.1	652.1	692.9	2,533.9

[1] The increase in New York's 4R apportionment from 2.4 to 3.7 percent is the result of an agreement between New York State and the Federal Highway Administration to remove tolls from the New York State Thruway in 1996. The agreement was made possible by a provision Senator Moynihan and Congressman Henry Nowak had included in the Surface Transportation Assistance Act of 1978 (Public Law 95-599.)

Mr. MATSUNAGA. Mr. President, I support the passage of the Surface Transportation Act, because immediate action is needed to create jobs and because of the need to repair our highways and bridges.

This legislation promises jobs for 320,000 workers; 170,000 of these workers will be in the construction trades, wherein the jobless rate is 22 percent. Some critics have argued that the measure is an antijobs bill, because the number of jobs it creates is negligible. My response is that 320,000 jobs is not negligible. True, the number of unemployed is great compared with the number of jobs promised by this legislation. But we must start at some point. Especially with the deletion of the jobs program from the continuing appropriations resolution, the highway jobs program is the only significant public works program that can be enacted this year.

The bill's critics also argue that the legislation will take away consumer money and consumer-related jobs. They argue that the purchasing power of consumers will be curbed as their money is taxed away by the proposed 5-cents-a-gallon excise tax increase on motor fuels. This Senator questions the validity of this assertion. Gasoline prices have fallen, but consumers are not spending this savings. Just as taxpayers are not spending their tax cut, they are not spending their price savings. Consumers are saving all the money they can get from their tax cut and from price cuts. Consumers are so apprehensive of the future, that they are reducing their spending and they are saving all that they possibly can. And when consumers are not spending, there is no reason for businesses to invest in new, expanded plants and equipment.

Something must be done to help consumers regain confidence in our economy. If individuals and businesses are not spending and are not making capital investments, the economy will come to a halt. We are already forced with a bankruptcy rate which is the worst, since the Great Depression of the 1930's. The Federal Government must install confidence in our economic future. It must maintain and even initiate economic activity when the future looks as dark as it does now, and inspire and motivate individuals and businesses to join in the upward movement.

None of the legislation's critics have questioned the need to repair our highway system. The infrastructure that keeps commerce going, is falling apart. Member after Member during the debate cited instances of bridge and road disrepair hampering commercial transportation as well as individual travel. However, the critics argue that the tax is regressive; it taxes the poor and the rich equally.

I believe the income-tax structure should be progressive. But there are areas where a uniform tax rate is appropriate. This is the case with the financing of the highway system. Rich and poor, businesses and individuals, use the Nations bridges and highways. All users ought to pay for their construction and maintenance, and they ought to pay in proportion to their use of the roads. H.R. 6211 attempts to do this.

The Surface Transportation Act is needed and its financing mechanism is appropriate. I support its passage and urge my colleagues to do likewise.

IMPROVING TRANSPORTATION SERVICES FOR HANDICAPPED PERSONS

Mr. CRANSTON. Mr. President, I want to reiterate my gratitude to the distinguished ranking minority member of the Banking Committee (Mr. RIEGLE) for offering on my behalf, during my necessary absence, my amendment—amendment No. 5011—to the gas-tax bill to improve transportation services for handicapped and elderly persons.

My remarks in support of the compromise on my amendment that is contained in the conference report were inserted, at the request of Senator RIEGLE, in the RECORD for December 21 at page S16028. Rather than restate them at this time, I would refer my colleagues to that portion of the RECORD.

However, I would like to add to my earlier remarks my thanks to the very able chairman of the Banking Committee (Mr. GARN) and committee staff assisting him, Phil Sampson and David Gogol, and to the distinguished chairman of the House Committee on Public Works and Transportation (Mr. HOWARD), and staff assisting him, Dick Sullivan and Clyde Woodle, for their excellent cooperation and very effective work on this provision.

I very much hope that the enactment of the conference report will result in the making of badly needed improvements in transportation services for our Nation's handicapped and elderly citizens. Thus, I am very grateful to both the House and Senate conferees for their fine work in resolving this issue.

Mr. THURMOND. Mr. President, after much very careful deliberation, I have decided to support the conference report on H.R. 6211, the Surface Transportation Act of 1982.

Mr. President, this measure is not perfect by any means. I believe, however, that we must take action now to begin rebuilding the surface transportation infrastructure of our Nation. Clearly, our Nation's roads and bridges are sorely in need of repair, and the prospects are for a worsening of this situation unless we promptly commit a larger share of our Nation's resources to the improvement of our surface transportation system. Through passage of this bill, we are demonstrating the willingness to make that commitment.

Moreover, Mr. President, at a time when so many Americans are out of work, this legislation offers the hope of new jobs—possibly as many as 320,000 new employment opportunities. This is not primarily a jobs bill, but it certainly should help to relieve the staggering high rate of unemployment and bankruptcy in the heavy construction industry.

Mr. President, while I have concluded that on balance this bill should pass, I remain deeply concerned about the potential impact of this legislation on several key industries. Specifically, I do not wish to see an undue burden placed on the trucking industry, which renders such great service and is so vital to our national economy. The sharp increase in the heavy vehicle highway use tax proposed by this bill could be too much to bear for many independent truckers and transport firms, unless we have a strong economic recovery. I am confident, however, that the economy is beginning to revive. With the phase in of the increased road-use tax provided in the conference report, and with the aid of a vibrant, growing economy, I am hopeful that the trucking industry will be able to absorb higher taxes.

Additionally, I am concerned about the new manufacturers' excise tax on tires contained in this legislation. Under the conference report, tire weight less than 40 pounds would carry no tax, tire weight between 40 and 70 pounds would carry a tax of 15 cents a pound, tire weight between 70 and 90 pounds would carry a tax of 30 cents a pound, and tire weight over 90 pounds would be taxed at the rate of 50 cents a pound.

Mr. President, this formula appears to impose a higher tax burden on steel-belted radial tires than on conventional bias-ply tires of the same size and load rating, despite the fact that the steel-belted radial tire is less damaging to the highway, more fuel efficient and a more technologically advanced product. If this new excise tax structure has the effect of creating a competitive disadvantage for manufacturers of radial tires, as these manufacturers fear, that would be most unfortunate. Clearly, it would not be in the national interest to discourage the purchase and use of a product—the steel-belted radial tire—which is inherently superior and more in keeping with our established goals of energy conservation, safety, and others.

Mr. President, I have discussed both the concerns of the trucking industry and those of the tire manufacturers with key administration officials in the Department of Transportation and the Treasury Department. I have

secured commitments from the administration, the Secretary of Transportation, and the Senate majority leader that they would cooperate in rectifying any undue burden imposed under this bill or any unreasonable tax contained in it. Certainly, for my part, I shall remain sensitive to the effects of this legislation on trucking firms operating on our highways and on radial tire manufacturers.

Mr. GRASSLEY. Mr. President, I rise to discuss the tax provisions of the Surface Transportation Act of 1982.

The conferees labored today to resolve the differences between the two bills, which were great in many instances. A primary area of controversy was the user fee imposed on the heaviest trucks. The administration proposed a $2,700 fee, the Senate adopted a $1,200 fee, and the Conference Committee settled upon a steeply escalating fee structure. In my opinion, this rapidly escalating fee schedule is too harsh. I would encourage Senator DOLE and other members of the Committee on Finance to reexamine the dramatic increases before it becomes effective on July 1, 1984, when the fee jumps from $240 to $1,600. As the elected representative of many individuals who are concerned with the efficiency of our national transportation system, I feel it is imperative we review this issue to be sure the industry can afford to pay the increased fees when they become effective.

Another disagreement I have with the work product of the conferees is their elimination of the 9-cent exemption for gasohol. The conference agreement contains a 5-cent exemption from the Federal excise tax for this important alternative fuel. Gasohol is currently 40 percent of the fuel consumed in my home State of Iowa. It is a clean, efficient fuel which is manufactured in the United States. For national security and conservation reasons, I strongly believe it is in the Nation's best interest to retain the full Federal excise tax exemption for this important fuel.

The conferees did make some headway in removing many of the smaller excise taxes which create paperwork problems for businessmen and the Federal Government. The conferees removed the tax on tread rubber and truck parts.

Additionally, the conferees retained an amendment which I authored which delayed the effective date of the user-fee provisions for 1 year for independent owner operators. Under Senator DOLE's able leadership, the class of independent owner operators eligible for the exemption was expanded from those truckers who own three tractors—power units—to those truckers who own five or fewer power units. This is an important modification for many of my constituents, which I approve.

No compromise is perfect. Working under tremendous time pressure, the Senate conferees endeavored to reach an agreement which would be acceptable to this body. There are many parts of this agreement, such as the increased user-fee structure and the elimination of the gasohol exemption, which I do not endorse. Nevertheless, the public works aspects of this legislation have some very tangible benefits for my State.

As I stated earlier, 68 percent of the pavement on Iowa's main road system is deficient. This represents nearly 18,000 miles of Iowa's road system which carries over 87 percent of our State's total traffic volume.

Well over 13,000 bridges in Iowa have been identified as deficient. These bridges fall into two categories—structurally deficient or functionally obsolete. Four hundred of these bridges need immediate repair.

Based upon present needs alone, it would take an average of $625.6 million annually to meet the growing backlog of road and bridge renewal needs. Notwithstanding this enromous need, it is estimated that Iowa will have only $342 million for road and bridge revitalization. Clearly, major action must be taken quickly to assure that our roads do not fall into disrepair.

Under the present level of Federal support, Iowa receives $94.7 million. With the passage of the conference report to H.R. 6211, Iowa will receive $143.5 million for fiscal year 1983. For fiscal year 1984, we will receive $152.5 million, plus another $63.4 million for interstate highway transfer projects. During the next year, $166 million, plus $63.4 million will be directed to Iowa's highway's and bridges. In fiscal year 1987, $177.5 million plus $63.4 million will be available.

Even with the increased gas and user taxes, our needs will not be completely met. But any additional road funds will help in order to keep our roads safe and well maintained.

Since there is no question that more money is needed, the real issues becomes how much should each user pay. An extensive Department of Transportation study, supported by the Congressional Budget Office, the American Association of State Highway and Transportation Officials, engineer and design professionals, and actual practitioners found great inequities in the sharing of highway costs associated with damage caused by various vehicles. This study found that by 1985, the current system of user fees will require automobiles to shoulder 100 percent of their cost responsibilities, 110 percent from pickup trucks and vans, 200 percent from single unit trucks, and 125 percent from single and double-trailer trucks of less than 70,000 pounds. Trucks over 70,000 pounds, however, will only pay 65 percent of their cost responsibility. Consequently, the DOT recommended changes in the excise tax system to shift the burden from other drivers to that of the heavy trucks in order to strike a more equitable balance.

The focus of our debate has seemed to center around the cost to heavy trucks, and this cost burden has been a great concern of mine. But in view of the fact that my State of Iowa has a wide range of trucks, I was interested in a breakdown of the distribution of trucks registered in Iowa. The Iowa Department of Transportation provided me with the following analysis. Six percent of trucks registered in Iowa are heavy trucks based in Iowa and would be required to pay the maximum fee under this new legislation. Another 8.5 percent are registered over 55,000 pounds; 33.5 percent are registered under 55,000 pounds, and 32 percent are registered over 26,000 pounds. The remaining 21 percent of trucks registered in Iowa fall under the international registration plan. These statistics indicate most trucks in Iowa will pay only a portion of the new fee increases.

Another very important point about this new legislation is that it contains significant benefits for truckers in terms of increased productivity. By 1985, truckers will enjoy nearly $5 billion annually in increased productivity from the changes in weight, length, and width limitations. By eliminating the barrier States of Missouri, Illinois, and Arkansas, truckers will gain $830 million yearly. By allowing doubles to travel in the East, $1.8 billion will be gained. $1.27 billion will be gained by allowing increased trailer lengths and $540 million in increased productivity will result from wider allowances.

These gains are very important. A great number of Iowa truckers now have to avoid the barrier States by driving hundreds of miles out of their way or they must haul loads far below their potential payload. These barrier States represent more than an inconvenience; they represent heavy profit losses. For the unfortunate truck operator caught overweight in these States, it means expensive fines. Just the other day, a trucker called my office to express his deep concerns about the increased costs of the proposed fees. Once the benefits were described, however, he felt very good about the bill. He had just been fined over $800 for an overweight load while traveling through Illinois. The elimination of these costly fines with the permission now to haul full loads provided this trucker with benefits far outweighing the cost of the additional fees. He stated that if more truckers were aware of these benefits, there would be much more support for the bill.

The lack of information about the benefits and actual costs of this new package, unfortunately, has caused a great deal of concern among the trucking industry. One must conclude that once the whole story is told, the merits of this legislation will become far clearer for all highway users.

For these reasons, I have decided to support this final package. As I stated, I would have preferred the Senate version, but this compromise package still holds considerable benefits for all highway users in our Nation.

Mr. MATTINGLY. Mr. President, I rise today in opposition to H.R. 6211, legislation to increase the Federal tax on gasoline by 5 cents a gallon, and to substantially increase user fees on a variety of products vital to the highway transportation industry.

In deciding to cast my vote against H.R. 6211, I sought answers to four questions—questions which I believe speak to the heart of the issue before the Congress here today.

One, is another tax increase on the American people necessary, and if so, when is the appropriate time to raise taxes?

Mr. President, I am not sure there is ever an appropriate time to raise taxes short of war or some other overwhelming national need. But I am sure that the appropriate time to raise taxes on the American people is not now. It is not right nor justifiable on economic grounds to raise taxes in the middle of a recession. When the overwhelming national need at the moment is economic recovery and growth, it makes no sense whatsoever to impede that growth with yet another tax increase. Especially a tax increase that falls the hardest in working people and small businesses, the very sector we should be encouraging.

There is another aspect to this issue of timing. For the first time in many years, gasoline prices at the pump have actually gone down. The result has been lower production costs for related businesses, lower costs of living for working people, and a lower rate of inflation. In the midst of this positive economic development, does it not make sense to reverse course and head in the wrong direction? I think not. So the answer to the first question is negative.

Two, will this legislation, this tax increase, create jobs? At best, Mr. President, the job-creating effect of this bill will be a wash. In other words, as many jobs will be lost in those industries directly affected by these tax increases as will be created by the Federal Government transferring the new revenue into other jobs. At worst, there will be a substantial job loss and a further blow to economic recovery. So the answer to the second question is negative.

Three, are added provisions of this tax increase bill, such as expanding Davis-Bacon provisions, justified by the overall intended effect of the legislation, which is to repair and rebuild the Nation's highways and bridges while at the same time putting people to work?

Again, Mr. President, the answer is negative. The expanded Davis-Bacon provisions alone will add unwarranted costs of from $300 to $400 million to the price of repairing the Nation's roads and bridges, while resulting in the loss of 40,000 jobs, according to the Congressional Budget Office. The expanded Davis-Bacon provisions alone are enough to warrant opposition to the bill.

Four, if a highway bill is that important, if the repair of our Nation's roads and bridges is so urgent that it cannot wait even 6 months, or until economy is headed out of recession and toward recovery, why then cannot $5 billion be found in some other area of the Federal budget to transfer into a highway program?

Mr. President, the answer to this last question is positive. The money can be found in this bloated Federal budget. The money can be transferred from some other less urgent program into a highway program. The Amerian people would support such a move.

So why a tax increase in the middle of a recession? This bill does not make good economic sense. It does not make good political sense. It does not make good commonsense. It is the wrong move, at the wrong time, for the wrong reasons. Therefore, Mr. President, I will vote against H.R. 6211.

Mr. JEPSEN. Mr. President, the measure before us gives me mixed feelings.

I fully realize the serious problems we face as a nation with our highway system.

There is a need to complete certain parts of the system—the Interstate—and there is a need to repair a large part of that system. And I recognize that this falls within the realm of the Federal Government to complete these necessary and vital tasks. However, I am concerned with the way we are going about raising the revenue to do the job.

The question we must ask ourselves is: Is what we are doing and the method we are using to do it the right way?

Truckers, motorists, State departments of transportation, Government officials, environmentalists, and average citizens—all have expressed serious concerns both for and against this measure. Some of the questions are easily answered. Others can only be guessed at.

From the material presented, I know how much tax will be paid by an 80,000-pound truck. But we have no idea how many truckers will go out of business because of what we are about to do here today.

Will this legislation create jobs? We do not know, and we all have our doubts.

It must be remembered that this legislation contains more than highway funds.

On the surface, if you look at the highway trust fund figures, Iowa does well. The amount of highway trust fund moneys coming into my State under the Conference formula—while not as good as those that would have been provided under the Senate formula—are apparently satisfactory for our current needs.

In the so-called outyears, we will once again be looking for a new authorization. It is hard to overlook this financial benefit for Iowa. Especially when one considers that there are 25,000 bridges in the State. Of those, 14,000 have some type of deficiency, and 400 are in immediate repair. They are now embargoed or soon will be. A total of 600 bridges will need some type of repair work in the next 5 years. And of the 4,500 bridges on the primary road system, 1,100 are more than 50 years old and are designed for 15-ton trucks, not 40-ton trucks.

It is hard to overlook the fact that Iowa has more than 3,000 miles of pavement which is over 50 years old. And one must keep in mind that design life expectancy is only 20 years. Also, there is 3,600 miles of substandard narrow road in a State road system which is 8,800 miles long. This road is narrower than 24 feet and in some places, as narrow as 13 feet.

One also should remember that there are two major bridges which must be replaced across the Mississippi River at Keokuk and Burlington. There is a new bridge under discussion in Davenport, and bridges must be replaced over the Missouri River on Highways 2 and 30.

This scenario can be repeated across the Nation, and underlines the need for this legislation.

Mrs. HAWKINS. Mr. President, I must vote against the "Surface Transportation Act of 1982" for several reasons. First, last year, the Florida State legislature overwhelmingly rejected a 5-cent increase in the gas tax. The people of Florida clearly reject the notion of an increase in the gas tax. Second, this gas tax is a regressive tax which hits the working people the hardest. Regardless of income, everyone must pay the same amount. Five cents a gallon might not sound like much, but this means $1 more every time you fill a 20-gallon tank. For the average driver, this means about $40 to $50 more a year.

Third, raising taxes during a recession is counterproductive. Increasing Federal revenues by $5.5 billion means that much less spending power in the hands of consumers. We should focus on strengthening our economy. If we

stimulate the economy, we will have the money to spend on capital improvements without a new tax. A 1-percent drop in unemployment improves the Government's revenues by $17.2 billion.

Fourth, increasing the Federal gas tax to repair roads and bridges is not a job for the Federal Government. President Reagan's New Federalism would dictate that if States want to repair their roads, they should raise their own gas taxes. Revenues raised at the State level would buy more since Federal contracts generally cost more than State contracts because Federal contractors must comply with Federal rules and regulations, Davis-Bacon for one.

The revenues from this tax increase would not be used to repair or improve city, county, or State roads. Instead, the revenues will be used to improve the Federal interstate highways. The average highway mileage on the noninterstate part of the highways greatly surpasses the mileage on the interstate roads. This Federal program will simply redistribute income—some States will be winners and others will be substantial losers. Instead of contributing $1 to a Federal program and getting back 85 cents, does it not make more sense to have a State program and get back exactly what you put in?

Finally, Mr. President, this bill has been rushed through Congress too rapidly. The conference committee concluded their work Wednesday, December 22, and produced a partially handwritten document nearly 2 inches thick. The next morning, the Senate was expected to vote on this legislation. This timeframe did not permit a thoughtful analysis on this bill. For these reasons, Mr. President, I cannot support the "Surface Transportation Act of 1982."

Mr. BRADLEY. Mr. President, two days ago the full Senate considered the Surface Transportation Act of 1982. As I said at the time, I wanted to deliver a message to the conferees that the Senate bill did not deliver enough Federal dollars to New Jersey.

I wanted to make clear that anything short of a fair deal for New Jersey would be unacceptable to this Senator. I am pleased to say that the message got through and with the help of Congressman JIM HOWARD of New Jersey the measure before us is a substantial improvement over the original Senate version. The bill before us boosts New Jersey's overall Federal aid for mass transit, highways, bridges, and roads by $106 million, a 34 percent increase over what we now receive under current law and $50 million more than the Senate bill I rejected 2 days ago.

First, the 4-R program which provides funds for the reconstruction, resurfacing, restoration, and rehabilitation of our interstate highways is kept as in current law, rejecting a Senate proposal to change the program. The Senate proposal would have changed current law by distributing funds to a greater extent on how many vehicles actually travel on the highways. Since vehicle traffic is, of course, responsible for most highway deterioration, it would have made no sense to change current law so as to provide less repair funds for States such as New Jersey with heavy vehicle traffic. The change by the House-Senate conferees means that New Jersey will get over $7.5 million each year for interstate repair which we would not have received under the Senate version.

The conferees also wisely rejected the proposal in the Senate bill which would have changed the bridge repair formula. The Senate bill would have ignored the different costs incurred by States in bridge repair and replacement, but the bridge program approved by the conferees is sensitive to the different costs and needs in different States and allocates the funds accordingly. This provision will mean an extra $10 million per year which New Jersey would not have received under the Senate version of the bill.

In the mass transit portion, the conference report clearly rejects the attempts of this administration to wipe out operating subsidies for New Jersey's hardpressed mass transit systems. While I am distressed that there is any reduction in mass transit, we have protected 80 percent of our mass transit operating aid for the next 3 years.

For the first time, mass transit operating subsidies have become a form of entitlement. No matter what pressures the White House brings to cut operating subsidies, States are assured that 80 percent of 1982 operating subsidies will come off the top of any transportation assistance. Thus mass transit will remain available to families of moderate means and States will be able to know what they will get from the Federal Government and to allocate their resources accordingly.

The conferees also fortunately rejected a Senate amendment which would have limited the authority of the Secretary of Transportation to provide mass transportation aid for capital investments. By rejecting this amendment, it is estimated that New Jersey will receive about $15 million more per year in mass transit investment aid than it would have otherwise received. In addition, for the first time the discretionary fund of the Secretary will be allocated by a formula that takes population into consideration and therefore means more for New Jersey.

It is true this legislation could have been better if we had adopted my amendment to exempt, from the tax, working families earning under $10,000; or if we had adopted the Democratic alternative which had a more generous jobs component and replaced the excise taxes with a revenue-raising plan to defer the July tax cut for incomes over $65,000.

Notwithstanding these reservations, I believe that on balance the bill before us is responsive to New Jersey's interests. It offers the prospect of substantial Federal funding to ease the burden of unemployment in my State and to improve the backbone of our economy, our transportation system.

The additional $106 million for New Jersey over current law—which is $50 million more for New Jersey than in the Senate-passed bill and which brings New Jersey's total Federal transportation assistance to $477 million—is expected to cost the State an additional $14 million that currently is not budgeted. But the work can be accomplished under this legislation is work that must be done for the health of our State's economy. Therefore I am hopeful that despite New Jersey's current budget crisis, the State government will see its way clear to take advantage of this important opportunity to repair our roads and bridges, to refurbish our mass transit system, and to put thousands of New Jerseyites back to work.

Mr. DIXON. Mr. President, I am pleased to see a final version of the Surface Transportation Act of 1982 finally before the Senate. There were times during the tortured legislative process this bill has been through that I thought it would never make it this far.

The bill has made it this far because it is good legislation, good for the country and good for Illinois. It is not without flaws. I do not support all of its provisions. However, it is vitally important legislation. We have, for too long, let our basic transportation systems deteriorate. This legislation is an essential step in the process of reconstructing our highways and mass transit systems. Without it, roads would continue to crumble and transit systems continue to run down.

The legislation will provide more than $27 billion in new money, financed by a 5-cent increase in Federal motor fuel taxes, for expansion of Federal highway and transit programs. Increased Federal revenues for highway and transit programs will mean greatly increased Federal support for transportation projects in Illinois.

Illinois will benefit from increases in overall funding and changes in apportionment formulas that work to provide more funds to areas with the greatest need. There are a number of provisions of particular importance to Illinois.

First, the bill caps the interstate transfer program construction cost adjustment mechanism based on costs of

construction as of June 30, 1980, rather than the September 30, 1983, date contained in the bill when it was first taken up by the Senate. The current severe recession has artificially reduced construction costs. I was pleased to offer the amendment changing the date to one that more accurately reflects true long-term construction costs. I am glad to see that my amendment is included in the final version of the bill before us today.

The bill also includes my amendment to clarify the interstate transfer program. It insures that project approval deadlines are not interpreted in a way that will unduly restrict States in making use of interstate transfer funds over the next 6 years or more.

Further, the bill makes two Illinois bridges—a bridge section of the Dan Ryan Expressway in Chicago, and the Clark Bridge over the Mississippi River at Alton, Ill.—priority candidates for funding under the discretionary bridge program. The Dan Ryan Bridge currently carries over 225,000 vehicles per day. It is in desperate need of upgrading, and the bill will provide the $60 to $70 million required. The Clark Bridge was built in 1928, is functionally obsolete, and the bill will provide the $80 million needed for its replacement.

The bill also makes the new bridge across the Illinois River at LaSalle-Peru eligible for discretionary bridge program funding. This amendment was offered in the Senate by my distinguished senior colleague from Illinois, Senator PERCY, and myself. The project is an essential part of the reconstruction of U.S. 51, one of Illinois' highest transportation priorities.

The bill, although it phases out the priority primary program, one of the chief funding sources for U.S. 51, demonstrates an awareness of the importance of the project by including a demonstration program that would provide additional funds for it. U.S. 51 is one of the key transportation arteries in Illinois, and greatly needs upgrading and expansion, so the funds the bill will provide is particularly useful.

The transit title of the bill also contains a provision of particular interest to Illinois, although, as I stated earlier, the general restructuring and expansion of the transit program will greatly benefit urban areas, both large and small, around the State.

The bill includes a provision I authored that will assist the regional transportation authority in the Chicago metropolitan area to purchase the commuter rail lines operated by the bankrupt Rock Island and Milwaukee Road Railroads. It directs the Secretary of Transportation to give priority to applications for discretionary capital funds needed to purchase such lines. This section will help insure that commuter rail service on the two bankrupt lines will continue without interruption, insuring that tens of thousands of area commuters will be able to continue to reach their jobs.

Mr. President, I have attempted to highlight some provisions in the transportation package of particular interest to my State. I want to thank the managers of the Senate and House versions of the bill for their consideration of Illinois' transportation needs. I also want to thank my senior colleague from Illinois, Senator PERCY, for his hard work and diligence. He and I have worked very closely together in seeing that issues of concern to Illinois in the transportation area are dealt with. Finally, I want to thank my colleagues, the Members of the Illinois delegation in the House of Representatives. Without their great efforts, the bill would not address Illinois' needs as well as it does.

Mr. HEINZ. Mr. President, the automobile has been important to our Nation's development, but like many other technological advances, this tool can be dangerous—fatally dangerous—when misused. Over 50,000 Americans die each year on this Nation's highways. Many of these deaths are due to driver error, yet we do not have adequate driver education programs. The National Highway Traffic Safety Administration has done much to improve the safety of vehicles, but little to improve the safety consciousness of those who drive them.

Mr. Fraydun Manocherian, who operates the New York Health and Racquet Club in New York City, is one citizen who has tried for many years to do something about this problem. Last Monday, for example, he placed a full page advertisement in the New York Times asking that 2 percent of the money that we intend to raise under this bill—one-tenth of 1 cent per gallon of gas—be set aside for such safety education as dramatizing the importance of good driver judgment, teaching safe driving techniques, making certain that all drivers are aware of traffic safety laws, making the public aware of the major causes of accidents, and demonstrating the horrible results of accidents that each week kill over 1,000 persons and maim or injure another 7,000.

I regret that the tightness of our current budget and the speed with which this legislation has had to be considered have made it impossible to enact Mr. Manocherian's proposal this year. I think that it is a good idea and one that should receive full consideration by the Environment and Public Works Committee in the new Congress. I commend Mr. Manocherian for his public spirit and encourage him to continue his efforts.

Mr. President, I ask unanimous consent that the text of Mr. Manocherian's proposal appear at this point in the RECORD:

There being no objection, the proposal was ordered to be printed in the RECORD, as follows:

[From the New York Times, Dec. 6, 1982]

TO ALL LEGISLATORS: THIS 9-YEAR-OLD IS JUST ONE OF 55,000 STATISTICS

(By Fraydun Manocherian)

If we knew that an epidemic in 1983 would cause the death of 55,000 Americans, would we do all we can to prevent it? An unexpected auto accident can make a very healthy person quite unhealthy in one second. Aside from killing 55,000 Americans per year, auto accidents disable more of us than any other cause. Auto accidents also cause more facial and body disfigurements than any other cause. This problem can be alleviated. The answer lies in your action now.

Substantial efforts have been made toward the development of safer cars and roads. But, to reap the full benefits of these programs, we must have a national effort to develop better drivers—the kind of drivers who prevent accidents.

Most automobile safety experts agree that 90 percent of accidents are ultimately caused by the driver.

It seems most likely an additional five cents tax will be imposed on gasoline. We respectfully suggest that one tenth of one cent per gallon of this tax so collected be used toward safety on our highways that are built, and are to be built. This one mill per gallon would raise over $100,000,000 annually. It would be an average cost of approximately one dollar per car per year.

A former Secretary of Transportation, John Volpe and his Auto Safety Administrator, Douglas Toms, estimated that a 15% reduction in accidents would save us 6 billion dollars annually. Even if this 100 million dollar national effort were to be 1% effective it would save us $400,000,000 and increase our chances of reaching our destination safely.

The proposed funds can be used by the National Traffic Safety Administration to achieve the following:

1. Dramatize the importance of good judgement on the part of the driver.

2. Teach safe driving techniques, laws and regulations.

3. Make the public aware of the major causes of accidents.

4. Demonstrate the horrible results of accidents that kill over 1,000 persons a week and maim or injure over 70,000.

5. Correlate all related research findings and convey such facts to drivers.

6. To take any and all other steps necessary to reduce this continuing carnage.

This is an opportunity for the government of the people, for the people to act to reduce the number one killer of our citizens up to the age of 44, and the number one disabler of all ages in America. Please consider having this suggestion incorporated as an Amendment to the five cent tax legislation. And—please don't disregard this idea—you may someday regret you did not do all you could.

Mr. METZENBAUM. Mr. President, I am going to vote against this legislation.

I have no higher legislative priority than helping to find jobs for the more than 11 million Americans, many of them Ohioans, who are out of work. I have spent countless hours in recent months working to ease the suffering

of the unemployed. So I yield to no one in my desire to create jobs.

But the fact is, this is not a jobs bill. It is a tax bill, masquerading as a jobs bill. It is not only a tax bill, it is a bad tax bill. The gasoline tax is unquestionably a regressive tax which falls most heavily on those least able to pay it. This administration and this Congress have already done enough to add to the tax burden of these people. Just a few months ago, we passed a bill doubling the cigarette tax and reducing the medical deduction. And 1 year ago we passed a tax bill whose benefits flowed mainly to the wealthy.

The tax might be defensible if it would, in fact, create hundreds of thousands of jobs. But that clearly will not be the result. Indeed, there is persuasive evidence that the tax will actually lead to a net reduction in employment. According to Martin Feldstein, Chairman of the Council of Economic Advisers, the tax may actually increase unemployment during the first year or two.

I believe Mr. Feldstein is correct.

I also believe that my State of Ohio will be among the biggest losers if this program is enacted.

In 1984, the first full year that the new tax would be collected, Ohioans would pay $510 million into the highway trust fund. Under the 85-percent guarantee contained in the bill, Ohio would receive $433 million in return, yielding a net loss under the highway portion of the bill of $76.5 million. I might point out that Ohio receives back 89 cents on each dollar donated to the fund. That is hardly ideal, but it is certainly better than provided under this legislation. I see no reason why my State should receive a smaller share of the trust fund revenues than it currently gets.

Ohioans would contribute $51 million to the transit trust fund and could expect to receive $80 million in return, a net gain of $29 million.

In sum, the State would lose $47.5 million if this program is enacted. How on Earth can I go back to the people of my State and explain to them that I not only voted to raise their taxes, but to make sure that they would not receive their fair share of those taxes?

What we have is a bill under which Ohioans would subsidize the creation of jobs in other States, chiefly in the Sun Belt, many of which have far lower unemployment rates than Ohio does. I invite the sponsors of the bill to explain that to unemployed steelworkers and other jobless Ohioans.

It would make far more sense for Ohio to simply impose its own 5-cents-a-gallon gas tax, knowing that all the revenue raised would benefit the citizens of our State.

In the final analysis, this legislation imposes a new, regressive tax, it will not return a fair share of that tax to Ohio and, indeed, will very likely lead to a net loss of jobs in the State while accelerating the flow of Federal aid—and jobs—to the less needy States in the Sun Belt.

To vote for this and then tell Ohioans that I voted for jobs would be a cruel sham. This legislation ought to be killed. Let us stop wasting our time with gimmicky programs that insult the jobless and let us get on with serious efforts to reduce unemployment.

Mr. DOMENICI. Mr. President, the conference agreement adopted an equitable approach toward the allocation of Federal aid primary funds that balances the needs of both rural and urban States.

The Senate bill allocated primary funds based on the historic formula of postal route-miles, State area and population. The House bill abandoned the traditional formula and proposed a formula based entirely on population that was biased toward urbanized States.

The conferees were able to agree on an approach to the primary formula distribution which is based on general revenue sharing. I proposed this approach to the conferees after seeing that we were confronted with a problem similiar to one that occurred when general revenue sharing legislation was considered years ago. In order to resolve the differences between two formulas based on totally different criteria, the conference agreement adopted the following approach:

The higher amount that each State would have received under either the House or Senate bill is first calculated. The total of these higher amounts will inevitably exceed the desired authorization level by a certain percentage.

The total of the higher amounts is then reduced by that percentage in order to insure that each State's allocation is adjusted by the same amount.

Finally, each State is guaranteed a minimum of one-half of 1 percent of all primary funds, and no State will receive an amount lower than it would have received under either the House or Senate bills.

I am satisfied that the primary funds distribution coupled with the mass transit funds guaranteed from 1 cent per gallon of the gasoline tax represent a balanced approach to this legislation. I can assure my colleagues that rural and urban interests are fairly and equitably represented.

WHAT IS WRONG WITH THE GAS TAX

Mr. PROXMIRE. Mr. President, what is wrong with the gas tax? Plenty. Before we engage in any spending program or raise any tax should not the Senate have the case made clearly and in detail?

Has it been made in this case? Emphatically no. Oh sure, people have complained about a street or a bridge in bad shape. And all of us who drive can cite instances where roads need repair and in some cases need that repair badly. But the Congress has had no thorough, systematic documentation of precisely why we we need to add to the $8 billion already in the Federal highway trust fund. No one has shown just where and how and why roads have deteriorated to a point where we must more than double the highway tax to meet the problem.

Do we need to spend more than the $8 billion now in the trust fund on our highways in a rush job right now? Maybe we do. But before we saddle that kind of mammoth additional burden on the American people why should we not know for sure that it is necessary.

Second, will this gas tax and this Federal spending program really help the roads and streets and bridges that need help the most? Answer: almost certainly not. This gas tax will not go primarily to improve city streets, or county highways or city or county bridges. That is the job that local gas taxes have to pay for. And what effect will a 5-cent increase in the Federal tax have on the ability of State and local governments to impose their gas taxes? You know the answer to that. It will make it more difficult in many cases much more difficult. So this tax not only has no basis in full, adequate hearings of the kind that any legislative body should absolutely require before it imposes such a burden. We run the real danger of making the condition of our streets and local highways worse—not better, worse—by imposing this tax because it will discourage local and State governments from imposing the tax they must pass to do the job on the local, county, and State highways where the job is needed far more urgently.

Third, to put the icing on the cake: When will this hurry up, rush tax take effect? This tax will not even go into effect until next April. Next April. So what is the hurry? The Congress comes back into session next month, in January. That would give us ample time to make this decision—with much more complete information—without the pressure of this hell-week of a "lameduck" session and the proximity of Christmas 2 short days away.

Mr. President, I do not think that most Senators realized that this big rush job would impose a tax that will not take effect until April, more than 2 months after we reconvene.

And fourth, this conference report makes the sad mistake of seriously worsening safety on our highways. It permits trucking firms to widen and lengthen truck size, making passing that much more dangerous on our highways. This may only marginally increase the danger on the Interstate highways, but there is a far more dangerous fall out here. This bill makes it far more likely that trucks built to

comply with the new national standard contained in this bill will also drive on State and county highways—not built for this increased size—and the result is certain to be an increase in accidents and undoubtedly more fatalities—no way we can avoid that and any thoughtful observer would have to concede that. Certainly this change made by the conferees deserves a chance for the Senate to examine it more carefully in February and March, particularly since this legislation does not take effect until April of next year.

Fifth, what is the prime reason why this has caught the fancy of Members of the Congress, in spite of the fact that it would increase gasoline taxes? Remember, it failed overwhelmingly before. Why does it have this kind of steam now? Answer: Easy, we now have the worst unemployment in 40 years, and this is supposed to be a jobs bill. Some deny that they think of this bill as such, but there is no way we could expect to increase—in fact double—the Federal tax without that broad national impression that this will increase the number of jobs. The fact is that virtually no one in the economics profession will tell you that this will create any new jobs, net. I repeat—net. Even the administration's own economists concede that for every new highway job this bill would provide, the $5 billion extracted from the public to pay for it will reduce public demand for other products and reduce jobs in other areas. This bill should not pass.

FEDERAL LANDS HIGHWAY PROGRAM

Mr. HUDDLESTON. Mr. Chairman, I want to commend the committee for recognizing the Federal responsibility by providing in the Surface Transportation Assistance Act of 1982 for a Federal lands highway program with authorizations for those roads on or serving Federal lands. The new Federal lands highway program, with its multiyear funding, will provide an essential long-range program to begin addressing the real needs of these neglected Federal facilities. I understand a portion of the park highway and parkway authorizations will be used for repair, restoration, and reconstruction of existing roads, and a portion will be used for new construction.

There are four major Federal parkways and park highways which Congress has previously approved and on which work has been started. These are the Foothills Parkway, the Cumberland Gap Highway relocation, the Blue Ridge Parkway, and the Natchez Trace Parkway. It is my understanding that it is the intent that, with the new authorizations provided in the parkway and park highway program, that priorities be established with respect to these four parkway and highway projects, such that they will be quickly undertaken and completed prior to the initiation of other new projects which may be eligible for funding under this important program.

Mr. STAFFORD. That is correct. It is the intent that the authorizations will provide for the early completion of these uncompleted facilities.

Mr. BAKER. I also commend the committee for its work on this program. While it is not necessarily sufficient to take care of all the needs, it does acknowledge the Federal responsibility and will help protect the initial investments to bring the current Federal highways to safe and maintainable standards and allow for the completion of these urgently needed facilities.

TEMPORARY MATCHING FUND WAIVER

Mr. HAYAKAWA. Mr. President, I would like to engage the floor manager in a colloquy regarding the section relating to the temporary matching fund waiver.

Mr. STAFFORD. This is the provision permitting the States to defer payment of their share of the costs of Federal highway projects until September 30, 1984. To qualify, the Governor must certify his State is unable to match the additional funds available through passage of the 5-cent gas tax increase.

Mr. HAYAKAWA. Is it the intent of Congress that States with balances in their highway accounts which are encumbered or committed to an existing program be judged to have insufficient match and therefore eligible for the temporary matching fund waiver?

Mr. STAFFORD. Yes, that is correct. States with highway account balances already encumbered or committed would be eligible for a temporary waiver of their matching funds under this provision.

Mr. HAYAKAWA. Thank you very much for this clarification.

RESURFACING STANDARDS

Mr. RANDOLPH. Mr. President, the compromise agreement between the House and the Senate provides that in the rehabilitation, repair or resurfacing of non-Interstate highways that the project should preserve and extend the life of the highway while enhancing highway safety. It is the view of the Senate conference that the phrase "enhancing highway safety" does not necessarily require as a part of project approval full design standards for this rehabilitation work.

While the goal is to enhance highway safety, we must do so in a manner that will maximize the number of miles which can be resurfaced and repaired, while improving highway safety. Full design standards, the committee believes, could be too onerous a burden to place on such 3-R work. The Senate conferees fully supports the enhancement of highway safety but believes that 3-R work can be done with safety enhancement without the necessity of full design standards.

Mr. STAFFORD. I concur with the views expressed by the ranking member of the Environment and Public Works Committee Senator RANDOLPH.

FOREST HIGHWAYS

Mr. RANDOLPH. Mr. President, the provision on limitation of obligations would require the Secretary of Transportation to distribute the obligation limitations among the States with the exception of administrative expenses and forest highways. Is it my understanding that the term "forest highways" as used in the section would mean all programs under the Federal lands highways program.

Mr. STAFFORD. That is correct.

VEHICLE WEIGHT LIMITATIONS—INTERSTATE SYSTEM

Mr. RANDOLPH. With regard to enforcement and the effective date of this section relating to vehicle weight limitations on the Interstate System, it is my understanding that a State's interstate apportionment will be withheld from any State not found to be in compliance with this section within an administratively determined period. This period should be established to give States time to bring their laws into compliance.

Mr. STAFFORD. Yes; that is correct.

Mr. DANFORTH. Mr. President, I would like to ask the distinguished Senator to clarify one provision of the bill dealing with the trailer lengths on combination vehicles. Do I understand correctly, Senator, that the reason for regulating truck lengths on the basis of trailer rather than overall vehicle length is driver safety?

Mr. PACKWOOD. The Senator is correct. During our deliberations on truck length earlier this year, it became apparent to the committee that some State overall-length restrictions would either prevent the use of longer, more efficient trailers or force truckers to use shorter tractors providing less cab space.

Mr. DANFORTH. Thank you, Senator. I agree completely that safety is the most important consideration in looking at truck size. Nevertheless, I am concerned that the bill as presently written could be interpreted as completely repealing State laws regulating overall length. Would not this mean, Senator, that until the States enact new trailer-length laws, any size combination truck could operate on the highways?

Mr. PACKWOOD. No, Senator, that is not our intent. The wording of the bill is meant to prohibit the enforcement of overall-length limits only to the extent that such laws preclude the operation of 48-foot trailers in tractor/semitrailer combinations and 28-foot trailers in tractor/double trailer com-

binations. In other words, in States which just regulate overall truck length—and that is most States—their law would continue to apply to prohibit single trailers over 48 feet or combinations over 28 feet until they choose to enact new laws.

Mr. BENTSEN. Mr. President, I intend to support the conference report on the Surface Transportation Assistance Act of 1982. I say that, Mr. President, recognizing that it is not a perfect document. No report ever is. No bill ever is. But, on balance, I believe that this bill merits my support. It addresses problems that have long needed to be dealt with. I think it is important not to characterize this legislation improperly. While it will result in increased employment in certain industries, it is not primarily a jobs bill. Rather, it is legislation to begin the process of improving our Nation's highway and mass transit systems and, in a larger sense, the process of improving our national infrastructure. There has been a crying need to develop this legislation long before we began this lameduck session. The Committee on Environment and Public Works through its Subcommittee on Transportation has heard testimony over the past decade on the need to increase funding of highway programs. We have acted to increase program levels, but because of the combined effects of substantial inflation in highway construction costs and lower revenues to the highway trust fund due to fuel-efficient vehicles, we cannot meet the needs with current levels. As we all know, Federal highway funding is supplied by the user taxes of the highway trust fund. I would not stand before the Senate and seek this increase in highway spending without increasing the taxes to the highway trust fund. It would be fiscally irresponsible to do so.

Mr. President, the bill we have before us takes those necessary steps. Further, it resolves a serious problem with the highway program that has existed for over 25 years by providing a guaranteed minimum allocation to each State of 85 percent of its contribution to the highway trust fund.

I recognize that many Members are troubled by the tax structure—particularly with respect to the taxes on heavy trucks. I would say to those Senators that this issue troubles me and it should certainly be addressed further. The conferees wisely delayed the imposition of this tax during the current economic problems facing the trucking industry as it is being deregulated. In addition to the study provided for in the bill, it would be appropriate for hearings to be conducted on the validity of the recently completed cost allocation and the economic implications of this legislation before the tax is imposed at its higher level. However, I do not believe that this important bill should be held back based on these uncertainties.

Let me also say that I am pleased that the conference bill provides the flexibility for new rail starts in the mass transit title. It is imperative that justifiable projects be constructed. In my State, the Houston area is developing a rail project and it deserves the opportunity to be constructed.

Finally, Mr. President, I would like to commend several people who have diligently worked to bring this legislation to this point. While all of the conferees worked hard to hammer out a fair compromise Tuesday, I want to especially acknowledge those with whom I worked on title I. Senator STAFFORD, the chairman of the Committee on Environment and Public Works, and Senator SYMMS, chairman of the Transportation Subcommittee, were diligent and dedicated in their efforts to fairly but strongly hold the Senate position on key issues. Senator DOMENICI crafted a critical compromise on the allocation formula for the primary program that was essential for many Senators. He and I were in close agreement on the approach to that issue, and I was pleased to work with him on the issue. But, I cannot imagine the development of highway legislation without the leadership of the senior Senator from West Virginia, Senator RANDOLPH. Next year, when the 98th Congress is underway, we will celebrate the 50th anniversary of his first service in the Congress. Throughout those years he has fought for the development of sound highway legislation time and again. Before others could appreciate the concept, he was advocating a national highway system—a concept that grew to the Interstate System that is now so critical to this Nation's commerce. In this conference he was equally insistent on finding the compromise to get a bill. Let me close by expressing my appreciation to both Secretary of Transportation Drew Lewis and Federal Highway Administrator Ray Barnhart. They have spent many long hours shepherding this legislation for the administration and were most helpful to me and responsive to my concerns. They deserve to see their labors and ours produce a result that means a tangible benefit to this country.

Mr. MELCHER. Mr. President, the power to tax is the power to destroy. That can be applied to the part of this bill that increases a series of taxes affecting truckers. Increasing the Federal taxes for fuel, tires, new trucks and repair parts are all taxes that relate to the use of the truck, all of which I would expect to relate to the miles of highway business affecting the owner-operator truckers and the trucking companies. The increase in the Federal highway use tax is another matter. A trucker who operates 10,000 miles per year or 100,000 miles per year pays the same amount. The tax now is $240 and will, under this bill, increase to $1,900—eight times greater; it is too much.

For those truckers affected by the recession and just hanging on, this series of increases jeopardizes their continuation in business, and for those truckers this onerous part would be due even though their highway revenue miles are down 30 to 70 percent. No miles, no money, but this tax goes way up.

Montana depends on transportation for our economic existence. Cattle, grain, lumber, and other products are trucked—most of it by owner-operators or small trucking firms. The costs are generally charged to the producer. And these producers are just hanging on too.

Montana depends on trucks for the competition that they can provide Burlington Northern. The Burlington Northern has a virtual monopoly on rail freight in Montana. Trucking deregulation has worked a staggering blow to small trucking companies and they are going broke. This 800-percent increase in the Federal highway use tax will force more to discontinue or fold into bigger companies, thus eliminating more competition.

The increase in length, width, and weight are already available to truckers in Montana by State law or special use permits. The additional revenue the bill raises is of great importance to Montana and will greatly help for safer, more efficient highways. I have been supportive of the bill, but this last version after the conference committee with the House now is just too high. They have upped the ante as if it were a poker game. I would fold. I now vote "no." The power we exercise in Congress to set taxes is an awesome power that has to be used prudently.

We need the owner-operator truckers and the independent small lines and this series of tax increases threaten their continuation in business.

Mr. MITCHELL. Mr. President, will the acting minority leader yield 2 minutes.

Mr. BENTSEN. The acting manager of the bill on this side will be delighted to yield 2 minutes to the Senator from Maine.

Mr. MITCHELL. Mr. President, I think that the discussion this morning is a fitting end to the session of this Congress that should not have occurred and once started should not have gone on as long as it did.

Mr. MATHIAS. Vote.

Mr. MITCHELL. I think we should bring it to a swift and merciful end.

Although the circumstances are very much different I think there are words spoken in the past which are very appropriate here.

In 1653 Oliver Cromwell addressed the English Parliament in an effort to

bring to a close a session that there went on too long, and he used these words, and I think they apply very well here. Cromwell said to that Parliament:

You have sat too long here for any good you have been doing. Depart I say and let us have done with you.

Mr. MATHIAS. Hear, hear.

Mr. MITCHELL. "In the name of God, go." [Laughter.]

Mr. MATHIAS. Vote.

Mr. MITCHELL. Mr. President, I say in the name of God, let us vote and go.

The VICE PRESIDENT. The Senator from Kansas.

Mr. DOLE. Mr. President, I am prepared to yield back the remainder of my time. Before doing that, I would like to state that we have checked with the Journal Clerk and debate on the floor amendments to H.R. 6211 was equally consumed by Republican and Democratic amendments. So I would not want anyone to go home for Christmas saying the Republicans dominated this debate.

I yield back the remainder of my time.

Mr. BENTSEN. Mr. President, I say that the Senator from Texas is prepared to leave and participate in the giveaway program back at home with members of his family, as I am sure the remainder of the Senate will with their families, also.

Is there anyone who wishes time on this side of the aisle?

The Senator sees none, and we are prepared to yield back the remainder of our time assuming the other side is.

Mr. DOLE. I have yielded back my time.

Mr. BENTSEN. I yield back my time.

The VICE PRESIDENT. All time is yielded back.

Mr. DOLE. Mr. President, I suggest the absence of a quorum.

The VICE PRESIDENT. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. DOLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The VICE PRESIDENT. Without objection, it is so ordered.

Mr. HELMS. Mr. President, I ask for the yeas and nays.

The VICE PRESIDENT. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The VICE PRESIDENT. The question is on agreeing to the conference report.

On this question, the yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. RIEGLE (when his name was called). Mr. President, on this vote I have a pair with the Senator from Ohio (Mr. GLENN). If he were present and voting, he would vote "yea." If I were at liberty to vote, I would vote "nay." Therefore, I withhold my vote.

Mr. STEVENS. I announce that the Senator from Alabama (Mr. DENTON), the Senator from New Hampshire (Mr. HUMPHREY), the Senator from Kansas (Mrs. KASSEBAUM), and the Senator from Alaska (Mr. MURKOWSKI) are necessarily absent.

On this vote, the Senator from Alabama (Mr. DENTON) is paired with the Senator from Alaska (Mr. MURKOWSKI).

If present and voting, the Senator from Alabama would vote "nay" and the Senator from Alaska would vote "yea."

Mr. CRANSTON. I announce that the Senator from Montana (Mr. BAUCUS), the Senator from Delaware (Mr. BIDEN), the Senator from Arkansas (Mr. BUMPERS), the Senator from Nevada (Mr. CANNON), the Senator from Ohio (Mr. GLENN), the Senator from Washington (Mr. JACKSON), the Senator from Nebraska (Mr. ZORINSKY), and the Senator from South Carolina (Mr. HOLLINGS) are necessarily absent.

On this vote, the Senator from Washington (Mr. JACKSON) is paired with the Senator from Montana (Mr. BAUCUS).

If present and voting, the Senator from Washington would vote "yea" and the Senator from Montana would vote "nay."

The VICE PRESIDENT. Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 54, nays 33, as follows:

[Rollcall Vote No. 469 Leg.]

YEAS—54

Cannon	Humphrey	Zorinsky

So the conference report on H.R. 6211 was agreed to.

Mr. STAFFORD. Mr. President, I move to reconsider the vote by which the conference report was agreed to.

Mr. DOLE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

(The text of the conference report is printed in the proceedings of the House of Representatives of December 21, 1982, at page 33372.)

Mr. DOLE. Mr. President, may we have order?

The PRESIDING OFFICER (Mr. MATTINGLY). Order in the Chamber.

CORRECTING THE ENROLLMENT OF H.R. 5470—TAX TREATMENT OF INDIAN TRIBAL GOVERNMENTS

Mr. DOLE. Mr. President, I call up House Concurrent Resolution 439 correcting the enrollment of H.R. 5470.

Mr. ROBERT C. BYRD. Mr. President, we cannot hear.

The PRESIDING OFFICER. Will there please be order in the Chamber. Those who want to talk, please get out of the Chamber. We still have business of the Senate to conduct.

Mr. ROBERT C. BYRD. Mr. President, the gallery should also be in order.

The PRESIDING OFFICER. Let us have order in the Chamber so the clerk can report the pending business.

The clerk will state the concurrent resolution by title.

The legislative clerk read as follows:

A concurrent resolution (H. Con. Res. 439) correcting the enrollment of H.R. 5470.

The PRESIDING OFFICER. Is there objection to the immediate consideration of the current resolution?

There being no objection, the Senate proceeded to consider the concurrent resolution.

Mr. DOLE. Mr. President, this matter has been cleared by the distinguished Senator from Louisiana and by everyone on this side. I know of no objection to its adoption.

The resolution would make a technical change to H.R. 5470, the periodic payments bill, which this body passed on Tuesday. H.R. 5470 included a provision which clarifies the tax treatment of Indian tribal governments. The legislation defines Indian tribal governments as the governing body of any tribe, band, community, village, or group of Indians that exercise substantial governmental functions as determined by the Secretary of the Treasury after consultation with the Secretary of Interior. The resolution

before us today would simply make it clear that this determination of Indian tribal status would have no implications beyond the tax treatment provided for in section 7871 enacted as part of H.R. 5470.

I know of no objection to the concurrent resolution.

The PRESIDING OFFICER. The question is on agreeing to the concurrent resolution.

The concurrent resolution (H. Con. Res. 439) was agreed to.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the concurrent resolution was agreed to.

Mr. LONG. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. ROBERT C. BYRD. Mr. President, will the acting Republican leader get an order for morning business so that Senators may speak?

ROUTINE MORNING BUSINESS

Mr. DOLE. Mr. President, I ask unanimous consent that we now have a period for the transaction of routine morning business not to exceed 20 minutes in length in which Senators may speak.

The PRESIDING OFFICER. Without objection, it is so ordered.

PAYMENT-IN-KIND PROGRAM

Mr. PERCY. Mr. President, the Senate was unable this month to turn to consideration of the President's proposal for a payment-in-kind program, known generally as PIK.

I understand from Secretary Block that the administration may move ahead and implement as much of this PIK program as it has the existing authority to do.

Certainly there is need for action in the Farm Belt and this program has great promise to it. I regret that the Senate was unable to pass the legislation to fully implement the PIK program.

Mr. President, I ask unanimous consent that a factsheet I have prepared on the PIK program be included at the end of my statement.

Mr. President, this PIK program is supported by all the major farm organizations. Certainly the corn growers and soybean producers in Illinois support it. PIK is a reasonable way to deal with the large production overhang we have.

There are a few areas where the Secretary of Agriculture will not be able to proceed because his authority is not clear. I encourage Secretary Block to implement a program within the bounds of his statutory authority. It is important to him, however, to come up to Congress the first of next year to seek legislation to clarify his authority to implement a truly effective program.

There being no objection, the factsheet was ordered to be printed in the RECORD, as follows:

PAYMENT-IN-KIND PROGRAM

PIK IN A NUTSHELL

The government would offer farmers an amount of commodity—expressed as a percentage of their base program yield per acre—for reducing acreage beyond what is called for in the 1983 programs for wheat, feed gains, rice and upland cotton.

The commodity offer could be less than 100 percent of the quantity taken out of production since production costs are avoided by the farmer, who could receive the same or greater net returns on fewer bushels.

PIK would be self-terminating, ending when excessive stocks have been eliminated, probably after the 1983 or '84 crop year.

OBJECTIVES

PIK would:

Reduce stocks while cutting production, lessening the overhang on the market in future years and enhancing prospects for a market-led recovery in farm prices.

Maintain supplies in the marketplace, showing that U.S. intends to be a reliable supplier abroad.

Reduce government outlays for farm programs (loan volume, storage and deficiency payments).

Implement sound conservation practices.

Lessen storage space problems.

STOCKS

Commodity stocks offered would most likely come from the farmer-owned reserve, existing Commodity Credit Corporation holdings, and regular loan stocks if necessary.

ELIGIBILITY

Participation in PIK would be conditional on participation in the regular reduced acreage program. Acreage withdrawn under PIK would be in addition to the regular program.

Acreage withdrawn would have to be devoted to conservation uses. Haying and grazing would be permitted on acreage already planted. Summer fallow rules require that the PIK acreage reduction would be comprised of acreage that would have been planted this year. Cross and offsetting compliance would not be required.

AMOUNT OF REDUCTION

Initial plans would be to offer reduced acreage participants a certain amount of commodity for withdrawing an additional 10 to 30 percent of their base (10-25 percent for upland cotton). The farmer will decide how much to withdraw within that range. The amount of commodity offered for withdrawing acreage has not been established to date.

The possibility would exist that if the 10-30 percent offer failed to reduce a sufficient amount of acreage, a supplemental mechanism would be activated to encourage withdrawal of the entire base acreage for a commodity on some farms. The following procedure would assure a smooth implementation of the supplemental mechanism:

At the time producers sign up for PIK, they can also bid on how much commodity they would need to receive per acre from the government to withdraw their entire base acreage. Then, if USDA decided to implement the supplemental mechanism of allowing entire base acreages to be withdrawn, the lowest bids from producers would be accepted first.

In summary, farmers would have the option of: (1) Participating only in the regular farm program; (2) Participating in the regular program, plus the 10-30 percent PIK; or (3) Withdrawing their entire base acreage if their bid is accepted; (4) Not participating at all.

PAYMENT PROCEDURE

Certificates for the commodity would be issued to participants and could be redeemed for ownership sometime after the first day of the marketing year for each commodity. The 1983 marketing year begins Oct. 1 for corn; June 1, wheat; and Aug. 1, rice and cotton.

After the participant takes ownership, he or she would be responsible for marketing decisions and accrued storage charges. He or she would have 4-6 months to take delivery of the commodity.

In cases where insufficient stocks are available locally for physical transfer of the commodity to the farmer, other options would be considered. Under one option, a farmer could assume ownership of the commodity at the location where it is stored. Or, CCC could agree to sell the commodity for the participants, who would receive the dollar value which prevails in the farmer's own area at the time of sale. Other options could also be considered.

MERITS OF THE PAYMENT-IN-KIND PROGRAM

Mr. DOLE. Mr. President, the current farm situation of burdensome surpluses for many commodities and weak demand dictates the need for bolder and more innovative farm programs. I believe the payment-in-kind (PIK) program is one such program that is sorely needed to reduce excessive stocks and lay the groundwork for price and income strength in the future.

Under the PIK program the Government would offer farmers an amount of commodity—expressed as a percentage of their base program yield per acre—for reducing their acreage.

The PIK program has many appealing and unique features:

Production can be reduced beyond that expected under the 1983 programs for wheat, feed grains, rice and upland cotton, and thus bring supply back in to closer balance with demand.

Stocks can be reduced at the same time that production is cut back, lessening the overhang on the market at harvest next year and enhancing the prospects for a market-led recovery in farm prices and incomes in future years.

The availability of market supplies will be maintained, signaling to exporters and importers that the United States fully intends to remain a reliable and consistent supplier when production adjustments are made. To meet our long-term export and food aid commitments, adequate reserves will be maintained.

Government outlays for domestic farm programs—for example, loan volume, storage payments, deficiency payments—should decline.

The PIK program unlike other emergency measures, is self-terminating when excessive stocks have been worked off.

Farmers would have the same or greater net returns while stocks are being reduced.

Sound conservation practices would be applied to a larger amount of acreage.

Storage space problems would be lessened.

Due to the size and scope of the PIK program, it is obvious that the payment limitation provisions of the 1981 Farm Act could be a limiting factor. It is imperative that these provisions be rescinded so that the effectiveness of the PIK program will not be jeopardized. If not, this could limit participation by many farmers who would otherwise be willing to put 10 to 30 percent or, perhaps, their entire base under the PIK program.

Consequently, Mr. President, I have today sent a letter to Secretary of Agriculture John Block urging him to proceed to announce the details of the administration's PIK program as early as possible in order for the required authorities to be in place for 1983 crops. I ask unanimous consent that the text of my letter be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

U.S. SENATE,
Washington, D.C., December 23, 1982.

Hon. JOHN R. BLOCK,
Secretary, Department of Agriculture, Washington, D.C.

DEAR MR. SECRETARY: It is unfortunate that the opposition of one Member of the Senate has prevented Congress from providing you with the additional authority needed to operate the Administration's Payment-in-Kind (PIK) program for 1983 crops. An effective production control program, combined with an aggressive effort to maintain and expand agricultural exports, is essential to the objective of reducing grain stocks and raising farm income.

Considering the pressing need to further control production of wheat, feed grains, cotton and rice in 1983, I urge you to proceed to announce the details and compliance requirements of the PIK program in early January, anticipating Congressional action as soon as possible in the new year. I will work closely with the Department to ensure that the authorities are in place to administer an effective production control and export incentive program for farm commodities in 1983.

Sincerely yours,

BOB DOLE,
U.S. Senate.

Mr. HUDDLESTON. Mr. President, I regret that Congress has been unable to complete action on S. 3074, the Agricultural Act of 1982. This legislation, which Senator COCHRAN and I introduced on December 3, provides for a payment-in-kind land conservation program for farmers, as well as other programs to assist our depressed agricultural economy.

The Secretary of Agriculture has stated that he believes that it is urgent that we move ahead with a payment-in-kind program for the 1983 crops, and that such a program can largely be carried out under existing authorities available to the Department of Agriculture.

I urge the Secretary to develop a payment-in-kind program for 1983 consistent with the authorities he has under existing law. I stand ready to work with the Secretary, over the several months, in putting the program in place.

I also urge the Secretary, in developing the payment-in-kind program, to incorporate the provisions of S. 3074, as reported by the Agriculture Committee, designed to protect farmers from any adverse effect of payment-in kind operations.

In particular, the Secretary should take care to insure that farmers will be shielded from any drop in market prices that could result from the release of Government-owned grain into the market under the program.

The Secretary should take steps to protect the economies of individual counties or local communities from undue concentration of diversion acreage under the program. Further, the Secretary should provide adequate safeguards to protect the interest of tenants and sharecroppers under the program.

The specific protections provided by S. 3074 address these and other areas of concern, and their inclusion in the Secretary's program will do much to encourage farmers to participate in the program.

Section 203 of S. 3074 is intended to improve the distribution of surplus commodities to needy persons. The Senate's action with regard to S. 3074 should not be interpreted as a lack of support for section 203 and for the Department of Agriculture's private sector inventory program announced by the Secretary of Agriculture on May 5, section 203 was agreed to unanimously by the Agriculture Committee. Further, I believe that the Secretary should use every available means to increase the consumption of surplus commodities, and urge the administration to publish the regulations implementing the private sector inventory program as soon as possible.

CONCLUSION

While the payment-in-kind program will help farmers deal with the severe slide downward in farm prices and income, more must be done.

Therefore, I also urge the Secretary to take additional steps, under other program authorities he already has, to alleviate the problems confronting U.S. agriculture.

THE PAYMENT-IN-KIND FARM PROGRAM

Mr. COCHRAN. Mr. President, I am very disappointed, as I know many of may colleagues also are, that Congress has been unsuccessful in efforts to complete action on S. 3074, the Agricultural Act of 1982. This legislation, which Senator HUDDLESTON and I introduced and sought to bring to the floor in the waning days of this lame-duck session, provided for a payment-in-kind land conservation program for American farmers, as well as additional provisions in export market development, to assist the Nation's seriously depressed agricultural economy.

Secretary of Agriculture John Block has indicated he believes it is imperative that we move forward with some type of payment-in-kind program for 1983 crops, and he believes that such a program can be implemented to a great degree by authority already existing for the Secretary and U.S. Department of Agriculture. I agree and I want to voice my support now for such action by the Secretary.

He can be assured that I am ready and willing to work with the Secretary, consistent with the authority he has under existing law, to develop and put in place a payment-in-kind program during the next several months. I call his attention in doing so to the provisions of S. 3074, as reported by the Senate Agriculture Committee, which are designed to help protect our farmers from adverse impact in a payment-in-kind program.

The Secretary should take particular care to insure that American farmers be protected against a drop in market prices resulting from the release of Government-owned grain stocks into the market.

I also urge the Secretary, in constructing and implementing a payment-in-kind program, to take appropriate steps to protect economies of local communities or individual counties from any undue diversion of acreage. He should also take action to provide adequate safeguards to protect the interests of sharecroppers and tenants under a payment-in-kind program.

The provisions of S. 3074, as approved by the Agriculture Committee, specifically address these and other areas of concern, and their inclusion in a program advocated by the Secretary would do a great deal to encourage America's farmers to participate next year.

Although a payment-in-kind program would go a long way in dealing with the drastic decline in farm income and crop prices, we must not stop there. The Secretary shall take additional steps, utilizing authority he already has under existing programs, to help remedy the serious problems facing American agriculture.

I can assure him and my colleagues that when the new Congress convenes in January, we will renew our legislative efforts to enact additional legislation addressing the agricultural situation in our country.

MILLICENT FENWICK: A LADY OF QUALITY

Mr. MATHIAS. Mr. President, in Jane Austen's time, as in her novels, the term, "a lady of quality," was well understood. Today, the phrase is foreign to our ears, but the concept should not be. It would mean something different today than it did to Jane Austen. It should imply a quality of intellect, a quality of character, and a quality of integrity rather than a quality of birth. In these modern terms, MILLICENT FENWICK is our lady of quality.

MILLICENT FENWICK brings to public life a profound comprehension of the context of our culture. She knows classical Greece where democracy was born and so she understands the blessings and the dangers of democracy.

Her life has been full and deeply involved with people. Because she has felt the pain of living as well as the pleasure, she has developed a compassion that illuminates her face and her being.

Her principles are so strong that she chose a path that led to defeat rather than compromise to win election to the Senate. Her abhorrence of money generated by political action committees and her refusal to accept it put her at a fatal disadvantage, but I have not heard her either complain or express regret. She was right and so she had her own victory.

As a lady of quality, MILLICENT FENWICK performed a unique function in the Congress well beyond her distinguished representation of the people of the Fifth Congressional District of New Jersey. She set a standard of excellence for all of us to aspire to equal. Although she will not be with us in the next Congress, her benchmark is set in the stones of the Capitol and we would honor ourselves if we were able to approach the standards of intellect, character, and integrity set by MILLICENT FENWICK.

Mrs. Mathias and I both look forward to a continued friendship with MILLICENT FENWICK and an association with her in the fight for a free and just society.

SENATOR SAM HAYAKAWA

Mr. CRANSTON. Mr. President, as the sun sets on the 97th Congress, I want to take this final opportunity to bid farewell to my friend and colleague, SAM HAYAKAWA.

Senator HAYAKAWA and I have had the privilege of representing the Golden State together for these past 6 years. We have found ourselves in disagreement on occasion, but where we have agreed on California issues, I believe we have worked effectively as a team to promote the interests of our State. And since SAM is such a pleasure to work with, I can only regret that our joint ventures were not more frequent.

I think Senator HAYAKAWA deserves particular thanks for the quality of his judicial nominations these past 2 years. I say this despite the fact that I was quite disappointed when Senator HAYAKAWA chose not to continue the California Judicial Selection Commission he and I had created and utilized during the 4 years of the Carter administration. I had at the time substantial misgivings about his decision to go it alone relying on a private advisory group. And while his choices have done little to correct the white male domination of the Federal bench and the judicial process in California, they were persons of high regard and excellent judicial or administrative potential according to all the reports I have received.

SAM was the first general semanticist to be elected to the U.S. Senate. He came to us as a brilliant author and a compassionate and humane man with a long and distinguished career of public service. One who knows him less well might be inclined to call SAM's Senate term a final climax to his public life. But I fully expect SAM to startle us all with something brand new.

So whether he goes to the moon, invents a new science, or opens on Broadway, I say, "The fates are with you, SAM"—never slow down.

Anyone who can warn the Senate not to try to "prevent the future from happening" has nothing to fear from the future.

THE MAIL ORDER CONSUMER PROTECTION AMENDMENT OF 1982

Mr. PRYOR. Mr. President, I strongly support S. 1407, the Mail Order Consumer Protection Amendment of 1982, as amended by the House of Representatives, and I urge its immediate approval by the Senate. I also wish that it could have been considered and approved by this body before adjournment.

S. 1407, as amended by the House of Representatives, will strengthen the investigatory and enforcement powers of U.S. Postal Service to combat the very serious and growing problem of mail fraud in this country. The bill will reduce the delays which currently exist in Postal Service investigations of violations of the false representations statute (39 U.S.C. 3005) and will discourage repeat violations of the statute.

S. 1407 was passed by the Senate on May 19, 1982, after careful consideration and approval by the Senate Governmental Affairs Committee and the Subcommittee on Civil Service, Post Office, and General Services. A field hearing was held on the legislation on October 13, 1981, in Little Rock., Ark. The legislation has been cosponsored by 28 of my Senate colleagues, including Senator HEINZ, the chairman of the Senate Select Committee on Aging, and Senator CHILES, the ranking minority Member.

Upon Senate passage of S. 1407, the Mail Order Consumer Protection Amendments of 1982, the House of Representatives Committee on Post Office and Civil service held 4 days of hearings and subsequently introduced new legislation. H.R. 7044, a revised version of the legislation which gives the Postal Service new mail fraud enforcement powers while also providing extensive safeguards against misuse of power, was reported by the Post Office and Civil Service Committee and approved by the House, with amendments, by a vote of 320 ayes, 61 nays, and 1 voting present, on December 13, 1982. The original House bill, H.R. 3973, introduced by Congressman CLAUDE PEPPER, has 298 cosponsors.

I originally introduced S. 1407 in the Senate due to my serious concern about the growing mail fraud epidemic in this country. Mail order shopping is a very legitimate and necessary business activity which is estimated to be a $25 billion a year business. While the vast majority of mail order firms are responsible businesses, unfortunately, many unscrupulous firms also exist. The Chief Postal Inspector, who testified at the Senate hearing, cited false representation schemes receiving $20,000 a day. In fact, the Inspection Service receives an average of about 20,000 mail fraud complaints each year, many of which currently go unchecked. Our Nation's consumers now lose millions of dollars annually to unscrupulous individuals who are now able to circumvent an antiquated 100-year-old postal fraud statute and who would prey upon the sick, the poor, and the elderly. New protections are urgently needed to help end the numerous abuses which have been documented.

Common fraudulent ads include those for phony gold coins, bogus land deals, and worthless work-at-home schemes.

Investigations by the House Select Committee on Aging under its distinguished chairman, Congressman CLAUDE PEPPER, have uncovered numerous other examples of mail fraud and false representations which have been perpetrated upon thousands of honest, hardworking Americans.

As a member of the Senate Select Committee on Aging, I became interested in this problem because, unfortunately, over 60 percent of the victims of these frauds are elderly citizens, most of whom are living on fixed incomes and literally counting their pennies. Many of the victims have lost their entire life savings and are provided very little recourse for recovery.

The Postal Inspection Service has major responsibility for preventing such mail fraud and false representation schemes. Unfortunately, their powers of investigation and prosecution are limited and in need of immediate improvement.

In order to investigate these cases of fraud, the Postal Service must send a postal money order for the suspected item and have the product tested. If false representation is apparent, the service must solicit the judgment of an administrative law judge as to whether the representations constitute fraud. If considered fraudulent, the service must conduct further investigation until the case is strong enough to be taken to the U.S. attorney.

By the time the Postal Service recognizes a suspected quack offer, orders the product and submits it for testing, the companies have often closed down their operation or moved it to another State. Even if the company is still in existence, the Postal Service's only recourse under present law is to ask for a hearing and a court order to block incoming mail from being delivered to the address advertised.

This legislation would correct current law in the following ways: The bill, as amended, would allow the Postal Service to purchase directly from advertisers samples of mail order products sold under potentially false advertising and would enable the Postal Service to immediately begin their investigation into the suspicious product. The Postal Service now purchases such samples by mail and the advertiser can forestall proceedings to enforce the statute by delaying shipment of the product.

This bill, as amended, also provides that the Postal Service, after a full adversarial hearing before an administrative law judge, may issue orders to require persons to cease and desist from engaging in false representation schemes. Currently, the Postal Service may only issue stop-mail orders, which are easily circumvented by experienced con men, who simply move to a new address under a new business name.

Mr. President, very careful steps have been taken in this legislation to assure due process with respect to the issuance of such cease-and-desist orders. Such orders may be issued only after full adversarial hearings before an administrative law judge, pursuant to the Administrative Procedure Act. The hearings which are already conducted by the Postal Service are in accordance with current regulations found at 39 CFR 952.14. Hearings are now held at the headquarters of the Postal Service, Washington, D.C., or other designated locations. Specifically, 952.15 provides that a party may file a request that a hearing be held at a place other than Washington, D.C., upon showing of convenience and necessity of the parties and the relevancy of the evidence to be offered.

I am particularly concerned that no undue hardship or unreasonable burden be placed upon parties through the location of hearings. I am pleased that the Postal Service now provides for hearings outside of Washington whenever it is necessary and convenient to the parties involved in the proceeding. I think it is fair and reasonable to do so. A review of the past practices of the Postal Service reveal that last year, 65 percent of hearings were held outside of Washington, D.C. I would encourage the Postal Service to maintain this policy and would request that statistics about the locations of hearings be presented in the regular reports of the Postal Service to the Congress.

The bill, as amended, also would allow the U.S. district courts to assess civil penalties of up to $10,000 per day against persons who repeat advertising schemes after an administrative law judge has determined, following an on-the-record-hearing, that the scheme violates the statute.

The bill, as amended, also prohibits the Postal Service from enforcing the statute against advertisements for books and publications which accurately reflect the contents of the product.

Mr. President, I urge the approval of this measure. It will give needed enforcement tools to the Postal Service to protect consumers and to fight fraudulent activities through the use of the mail.

An analysis of what the bill does and does not do is as follows, Mr. President:

FACT SHEET ON MAIL FRAUD BILL, AS AMENDED BY THE HOUSE OF REPRESENTATIVES

Purpose: To reduce delays on Postal Service investigations of violations of the false representations statute (39 U.S.C. 3005) and to discourage repeat violations of the statute.

Background: Legislation developed after extensive investigation of mail fraud by the House and Senate Aging Committees. House bill introduced by Congressman Pepper has approximately 300 cosponsors. S. 1407 was passed by the Senate on May 19, 1982. The House Post Office and Civil Service Committee held 4 days of hearings and introduced a clean bill, H.R. 7044. H.R. 7044 was passed by the House on December 13, 1982 by a vote of 320 ayes, 61 nays and 1 present, with a further amendment, which substantially revised the original Senate-passed bill.

As amended by the House, S. 1407 does—

1. Allow the Postal Service to purchase, directly from advertisers, samples of mail order products sold under suspected false advertising. The Postal Service now purchases such samples by mail and the advertiser can forestall proceedings to enforce the statute by delaying shipment of the suspicious product.

2. Allow the Postal Service—after full adversarial hearings before an administrative law judge—to issue orders to require persons to cease and desist from engaging in false representation schemes. Presently the Postal Service may only issue stop-mail orders which are easily circumvented.

3. Allow the U.S. district courts to assess civil penalties of up to $10,000 per day against persons who *repeat* advertising schemes after an administrative (on-the-record) determination is made that the scheme violates the statute. The court shall make an independent determination of guilt and determine the amount of the fine. This is intended to act as a strong deterrent to repeat violators.

4. Authorize semiannual reports on investigative activities of the Postal Service to provide for careful oversight by the Congress.

5. Authorize the Postal Service to develop and carry out a program designed to provide consumer education to the public on schemes involving false representation through use of the mails.

As amended by the House, S. 1407 does not—

1. Allow the Postal Service to issue civil investigative demands (a weak form of a subpoena power) to obtain access to documents relevant to suspicious advertising. This provision was dropped by the House after objections were raised.

2. Expand the current power of the Postal Service to police for mail fraud or any other statutory violation, nor is it a massive rewrite of the mail fraud statute. It simply will act to improve investigatory and enforcement powers to combat mail fraud, while, at the same time, taking into account all responsible concerns expressed regarding potential abuse of civil liberties.

3. Cost any money or create any new bureaucracy in government.

4. Permit the opening and inspection of mail without the prior issuance of a search warrant.

5. Allow the Postal Service to ban books from the mails. It will prohibit the Postal Service from enforcing the false representation statutes against advertisements for book and publications which accurately reflect the contents of the products.

6. Authorize search and seizure or cease and desist orders without due process of law. The civil investigative demand authority has been deleted and a cease and desist order can be issued only after full adversarial hearings before an administrative law judge. Also in permitting the Postal Service to purchase suspicious products to begin investigations, the Postal agent must accurately identify himself and state the nature of the conduct under investigation.

SEAN O'KEEFE—FAIRBANKS TO ANCHORAGE

Mr. STEVENS. Mr. President, today I rise to bring to the attention of my colleagues in the Senate a feat accomplished by a fellow Alaskan.

You all know, we Alaskans like to do things in a big way. In this instance, Sean O'Keefe of Fairbanks, Alaska, sought to break the world bicycle record from Fairbanks to Anchorage; a distance of 362 miles in 2 days.

Sean was successful. The first day he rode 202 miles. The second day he rode 160 miles. His effort is quite commendable.

One would think that after riding such a distance on a bicycle that a few weeks in a warm Jacuzzi would be in

order. No way, the ride is not over for Sean. The Fairbanks to Anchorage trek was only a warmup. His next goal is to ride 3,000 miles from San Francisco to New York. And he is in a hurry to do it because he is running out of time.

You see my friends, Sean is only 9 years old and he wants to complete the business at hand before he reaches the ripe old age of 10.

I urge my colleagues in the Senate to wish this ambitious Alaskan the best of luck in his endeavor.

TRIBUTE TO SENATOR HARRISON (JACK) SCHMITT

Mr. GOLDWATER. Mr. President. I have nothing but the warmest praise for our colleague from New Mexico, HARRISON (JACK) SCHMITT, for his outstanding service to the Senate and his tremendous contributions to American life through the space program.

During his stay in the Senate, JACK SCHMITT has been an immense asset to the Senate and he will be missed. It is with a sense of regret at his departure that I add my praise to the farewell tributes already offered to JACK SCHMITT.

JACK came to the Senate after distinguishing himself as an astronaut in the pioneer days of the space program. He spent 10 years in the early stages of the space program from 1965 to 1975. He was backup lunar module pilot for Apollo 15 and journeyed into space in 1972, on Apollo 17 mission to the Moon. He later became chief of scientist-astronauts, and rounded out his NASA career by becoming the space agency's Assistant Administrator for Energy.

I was present at the Apollo 17 blastoff to the Moon. I can tell you that it not only was impressive to see, but the benefits from it will someday be comparable to Columbus' voyage which led to the discovery of America. No one then paid much attention to Columbus but, if it had not been for him, we would not be here today and the world's greatest experiment in freedom would be unheard of.

JACK has accumulated 2,100 hours flying time in jets, helicopters, and spacecraft. He is a unique and dedicated American. We served together as Members of the Senate Intelligence Committee and the Commerce Committee. He was chairman of our Intelligence Committee's Subcommittee on Legislation and the Rights of Americans where he did yeoman's service in analyzing the President's draft Executive orders on intelligence activities and classification.

When he came to the Senate, I gladly stepped aside as ranking member of the Science, Technology and Space Subcommittee of Commerce to allow JACK to take the leadership position as I felt he knew more about this business than I did.

JACK will be greatly missed in the Senate. It is with sadness that I salute him as he prepares to move on to a new challenge. I wish him well in whatever he decides to do. I am sure it will be to continue to serve the people of our country for their benefit.

My best wishes to JACK and thanks for being in the Senate. His impact here was great. I am glad to have served with him. I know we will continue to hear good things about him as time goes by.

FUTURES TRADING ACT OF 1982

Mr. HUDDLESTON. Mr. President, Congress has approved H.R. 5447, the Futures Trading Act of 1982.

H.R. 5447 is important legislation that will improve and strengthen the regulation of the commodity futures trading industry.

In addition to extending the authorization for appropriations for the Commodity Futures Trading Commission and making other necessary amendments to the basic Federal statute governing the regulation of futures trading, H.R. 5447 contains a provision providing—in the event of any trade suspension or embargo—for the assured delivery of agricultural exports to foreign countries for a period of 9 months. However, the provison would not apply during periods of declared war or a national emergency.

This "contract sanctity" provision is of particular importance to the Nation's farmers. Its enactment will send a signal to the world that the United States is a reliable supplier of agricultural products. I was pleased to be the chief cosponsor of the provision in the Senate.

I urge the President to approve the Futures Trading Act of 1982.

I ask unanimous consent that there be printed in the RECORD: First, the text of the letter members of the Committtee on Agriculture, Nutrition, and Forestry have sent the President urging him to approve H.R. 5447; second, the text of the letter CFTC Chairman Philip McBride Johnson has sent the President urging the signing of H.R. 5447; and third, the conferees' explanation of the contract sanctity provision contained in H.R. 5447.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

COMMITTEE ON AGRICULTURE,
NUTRITION, AND FORESTRY,
Washington, D.C., December 21, 1982.

The PRESIDENT,
The White House,
Washington, D.C.

DEAR MR. PRESIDENT: We strongly urge you to approve the Futures Trading Act of 1982 (H.R. 5447).

This important legislation extends the authorization for appropriations for the Commodity Futures Trading Commission through September 1986. The bill also provides for (1) the imposition of fees for certain services provided by the Commission, (2) a division of regulatory jurisdiction between the Commission and the Securities and Exchange Commission, and (3) an increased role for the States in combating fraud. The bill is essential to the agricultural and futures trading sectors of our economy.

Some concern has been expressed about the contract sanctity provision of the bill relating to the export of United States agricultural commodities. This provision is particularly important to the farming and agribusiness community. The enactment of the provision will send a signal to the world that the United States is a reliable supplier of agricultural products.

While certain members of Congress favored a stronger contract sanctity provision, a majority of the members of the House and Senate carefully drafted the legislation to avoid impinging upon the prerogatives of the President in any significant way. We believe the provision in H.R. 5447 is consistent with the position you have taken on a number of occasions with regard to the export of agricultural commodities.

H.R. 5447 has strong bipartisan support, and it resolves a number of issues that have been outstanding for many years. It is responsible legislation, and deserves to be enacted into law. We earnestly hope you will sign the bill as soon as possible.

Sincerely,

WALTER D. HUDDLESTON, ROGER W. JEPSEN, MARK ANDREWS, DAVID H. PRYOR, PAULA HAWKINS, ALAN J. DIXON, PATRICK J. LEAHY, HOWELL HEFLIN, JESSE HELMS, RUDY BOSCHWITZ, RICHARD G. LUGAR, THAD COCHRAN, S. I. HAYAKAWA, BOB DOLE, ORRIN G. HATCH, DAVID BOREN, and EDWARD ZORINSKY.

COMMODITY FUTURES
TRADING COMMISSION
Washington, D.C., December 22, 1982.

The PRESIDENT,
The White House,
Washington, D.C.

DEAR MR. PRESIDENT: Awaiting your decision at this time is H.R. 5447, a lengthy bill reauthorizing the Commodity Futures Trading Commission for an additional four years and containing major improvements in the Commodity Exchange Act which this agency administers. Among those improvements are: Implementation of the New Federalism by providing a greater role for the States in the law enforcement area; recognition of private initiative by expanding the role of industry self-regulation; refinement of regulatory programs by eliminating unnecessary licensing and other burdens; streamlining of CFTC operations through program timetables and deadlines; and reduction in burden on taxpayers through recovery from regulatees of the cost of services provided by the CFTC.

The CFTC is a relatively young agency, founded in 1975 to provide public protection for those who rely upon the nation's commodity markets to aid them in managing the price-related risks of their commercial activities. Since the CFTC's formation, the commodities business has grown at an annual rate of roughly 60%, making it among the most dynamic sectors in our economy. The CFTC, through rigid management and the extraordinary dedication of its staff, has kept pace with the industry's

phenomenal growth despite only modest increases in its budget and staff. A chart depicting industry growth and CFTC resources is enclosed.

In October of this year, I placed in the record of a public CFTC meeting a summary of the agency's recent accomplishments. I am pleased to enclose a copy of that memorandum for your information. This period has been marked by recordbreaking productivity and increasingly reliable law enforcement.

H.R. 5447 will assure that the CFTC continues to be, pound for pound, one of the Government's most efficient and effective agencies. I urge that you sign H.R. 5447 for this reason, and would be pleased to discuss the matter with you or your aides at any time.

Yours respectfully,

PHILIP MCBRIDE JOHNSON,
Chairman.

CHAIRMAN'S STATEMENT—PROGRAMS, PLANS AND PRIORITIES MEETING

Today, we reflect once again on the accomplishments of the Commission in recent months, and we set the course for the next fiscal quarter. The documents before us recite dispassionately the gains realized, and the goals sought by the Commission. But the story of the Commission in recent months goes well beyond the contents of our briefing books. It is a story of pride, dedication and extraordinary productivity, made all the more remarkable in light of the special burdens imposed by a lengthy reauthorization process that continues to occupy much of the Commission's time and attention. This is an appropriate time to chronicle some of the achievements of the Commission over the past year or so, and to publicly credit our marvelous staff for a job that was done far better than we had any right to expect.

NATIONAL FUTURES ASSOCIATION

Industry self-regulation entered a new era when, roughly a year ago, the Commission approved the charter of the NFA. Since then, the Commission has worked closely with the leadership of the NFA to add flesh and muscle to the concept that it represents.

OPTIONS PILOT PROGRAM

After many years of study, the Commission developed a controlled experiment in exchange-traded options. Today, four contract markets are authorized to offer option products. Other applications are awaiting action, and an extension of the program to options on physical commodities is under consideration.

CASH SETTLEMENT CONTRACTS

For the first time in history, the Commission has approved futures contracts that are settled entirely in cash. The Eurodollar and Stock Index contracts have pioneered this concept. Cash settlement, where feasible, reduces the problems associated with physical delivery, especially during periods when supplies of the underlying commodity are scarce.

NEW CONTRACTS

Since the summer of 1981, the Commission has completed the processing of 39 new futures contracts and options, more than in all of its previous years combined. This has occurred without compromising the high standards set by the Commission, and only after intensive review of each proposal. Futures on wider spectrum of both domestic and foreign interest-rate risks are now available, the first gasoline contracts have been approved, and the advent of stock index futures offers a new form of price protection for segments of the investment community.

CUSTOMER PROTECTION

Responding to the lessons of the 1979-80 Silver Market, the Commission has taken several steps designed to reduce the likelihood of any repetition of the conditions existing at that time. Speculative position limits have been mandated for all futures contracts. Capital requirements have been stiffened to discourage the use of commodities to finance trading in the same futures. And the Commission has improved its ability to obtain market data from both foreign and domestic traders.

In addition, customer funds have been better protected by requiring that they be held in the strong hands of a clearing member. Dormant and low-volume futures contracts will receive closer scrutiny to assure that their terms remain appropriate and that their trading is conducted in an open and competitive manner. Rules to assure fair treatment of customers in bankruptcy proceedings are being designed at this time. And special customer protections have been built into the Options Pilot Program.

REGULATORY RELIEF

The Commission has eliminated the need for periodic re-registration for thousands of licensees. We have discontinued redundant reports, reducing that burden by roughly 350,000 submissions a year. And, today, we are seeking comment on the possible eliminations of hundreds of thousands of other documents through a revision of Regulation 1.33(a).

JURISDICTIONAL ACCORD

The Commission has entered an agreement with the Securities and Exchange Commission which more clearly delineates the two agencies' jurisdiction. That accord has been endorsed by the Congress, and will hopefully become law in the near future.

INTER-GOVERNMENTAL RELATIONS

The Commission has developed close relations with other Federal departments and agencies, and is forging a strong bond with State law enforcement agencies as well. Representatives from the Federal Reserve Board, the SEC, Treasury and Agriculture are invited to attend certain of our meetings. Our advisory committee now includes more State officials. Through cooperation, the Commission has joined with the SEC in enforcement efforts, and with a number of States in joint litigation. Our coordination with the Justice Department has been instrumental in nearly 100 convictions totalling almost 400 years of prison sentences.

ENFORCEMENT

The Commission's enforcement results have set new records in nearly all important areas—

Registration Sanctions: Up 50% over any prior year.

Criminal Convictions: Up 70% over any prior year.

Cease-and-Desist Orders: Up 100% over any prior year.

Permanent Injunctions: Up 105% over any prior year.

Persons Assessed Money Penalties: Up 108% over any prior year.

Customer Funds Protected: Up 130% over any prior year.

Trading Prohibited: Up 140% over any prior year.

Money Penalties Assessed: Up 500% over any prior year.

In the area of off-exchange boiler room operations, the Commission continued a campaign that has resulted in the shut down of over 100 of these operators, roughly 250 injunctions, the protection of millions of dollars of customer funds, and a score of convictions for criminal offenses.

Since the summer of 1981, the Commission has collected over $2 million in civil penalties for violations of the Act, more than in all of its previous history.

* * * * *

These gains and many others are attributable to the commitment and dedication of the Commission's able staff. Despite budget constraints, despite the drain of reauthorization, and regardless of the personal hardships involved, our Executive Director, General Counsel, Division Directors, deputies and staff have registered results that would be the envy of organizations far larger and older than the Commission. I want to take this opportunity to praise all of the men and women who have made this possible.

EXPLANATION OF THE CONTRACT SANCTITY PROVISION BY THE COMMITTEE OF CONFERENCE ON H.R. 5447

AGRICULTURAL EXPORTS

The Senate amendment prohibits the President, except in periods of declared war or national emergency, from prohibiting or curtailing the export of any agricultural commodity, or the products thereof, covered by an export sales contract when (a) the export sales contract was made prior to the announcement of action prohibiting or curtailing these exports and (b) the contract requires delivery within 270 days after the trade suspension is imposed.

The House bill contains no comparable provision.

The Conference substitute adopts the Senate provision.

SENATOR HAYAKAWA'S SERVICE IN THE SENATE

Mr. HAYAKAWA. Mr. President, serving in the U.S. Senate has brought much pleasure to me—as well as a fair amount of frustration. My membership on the Foreign Relations Committee has been a highlight of my service here. During the 4 years I have served on the committee I have been a member of the Subcommittee on Western Hemisphere, African Affairs, and East Asian and Pacific Affairs.

Although I have not been able to devote full attention to the Western Hemisphere Subcommittee, my interest there has focused on our relations with Mexico. Our two countries share difficult problems and it seems as though we Americans have a tendency to view our neighbors to the south with a paternalistic attitude.

Nevertheless, we have addressed successfully matters of mutual concern—for example, a treaty about stolen cars and aircraft. But other important matters remain unresolved. As many of my colleagues know I labored long and hard on the illegal immigration issue. I was afraid that the U.S. Congress would come up with a solution without

consulting the Mexicans about a mutually satisfactory solution. I recall that the bracero program failed to take into consideration the views of the Mexicans, which I believe was one of the reasons for its eventual demise.

Consequently I introduced legislation calling for a guest worker program. I traveled to Mexico City to meet with President Lopez-Portillo. He was gratified at my efforts and indicated that he agreed in principle with the concept. Unfortunately, I was unable to convince all of my colleagues on the merit of the guest worker program. I am grateful, however, that the House of Representatives did not pass the omnibus immigration bill until some of the difficulties surrounding the matter of illegal aliens are resolved. I only hope that these solutions will be pursued in concert with the Mexicans.

During the 96th Congress, I was the ranking minority member on the African Affairs Subcommittee. I first became acquainted with the African continent through my discovery of African art some 30 years ago. As I learned more and more about the culture which produced the art, I became more interested in the politics of the continent.

Furthermore, while I was president of San Francisco State College, we were involved in an exchange program with the Monrovia Consolidated School System in Liberia, in which we helped reform and organize their entire primary and secondary school system. The result was that many Liberians have degrees from San Francisco State and, in fact, almost half of the Education Ministry employees today have been associated with San Francisco State in some way.

During my visit to Africa last August I was able to spend 4 days in Liberia, and was greatly reassured by what I saw and learned. Head of State Samuel K. Doe and his administration have followed a course of moderation domestically and internationally. The Liberians have tried to create an environment which will encourage private sector participation. Obviously, education will be an important asset to Liberia if it is to develop along these lines. One of Liberia's greatest educational needs is teacher training, and I hope that we will soon see a reinstitution of an exchange program between San Francisco State and the Liberian Education Ministry.

Perhaps paradoxically a great source of both encouragement and of disappointment is the prospect for change in South Africa. I was encouraged by the recognition by many people in positions of responsibility in South Africa of the need for change. I find the proposals of the President's Council for constitutional reforms a significant step in the right direction—indeed in the South African context, a brave step.

Nevertheless, as long as blacks are denied citizenship and political participation and continue to be assigned against their will to "homelands" that the vast majority of them have never seen and never intend to move to, there will continue to be unrest. And that unrest will increase as the education and earning power of blacks increase. It is desirable for the future peace of South Africa that the homelands idea be merely a step toward a solution that offers hope—even a distant hope—for full participation by blacks in South African society.

To be sure, no one should underestimate the complexity of the problems South Africa faces. During my discussions with Anglican Bishop Desmond Tutu, an articulate black advocate of nonviolent change, he pointed out that blacks and whites must work together to extricate themselves from the current system. Yet I wondered if these changes can come quickly enough to avert serious social disorder. To the extent that blacks see South Africa's policies as punitive, the less likely it is that they will heed Bishop Tutu's call to stay with the peaceful course.

In view of this, I was especially disturbed by the recent attack on Lesotho by the South African Armed Forces. There are conflicting reports about the incident, but it is almost certain that among the 42 people who were killed there were innocent men, women, and children. This commando raid is the kind of punitive action that will not only further alienate those of us who wish to be supportive of South African efforts to achieve change but also is the kind of activity which will add to the unrest of the disenfranchised blacks.

There are other memories I shall have of Africa and her people—Botswana, a Texas-sized land of stark beauty, and of course, Zimbabwe. Botswana sets an outstanding example for other countries in its moderation, industriousness, and indifference to tribal divisions. Our friendly relations with that country should be carefully nurtured.

Zimbabwe is a different story. I know that many of my colleagues will recall my concern with Prime Minister Robert Mugabe's ability to govern in that country. After my visit last August I came away somewhat more assured of the possibility of stability and growth than I had been earlier. The government seems to be intent on responding to the needs of the people and has exhibited a refreshing pragmatism as it grapples with the task of rebuilding the nation after years of war and political and economic isolation. Zimbabwe is in a unique situation to set an example to the world in interracial, intercultural, and intertribal cooperation. I only hope that rationality will prevail and that the more radical elements will not be allowed to determine the political climate.

Finally, it was my very great pleasure to serve as chairman of the Subcommittee on East Asian and Pacific Affairs during the 97th Congress. During the past 2 years we have held 44 hearings—covering almost every aspect of that region of the world. U.S. interests in the vast Pacific basin are extensive and important. The Pacific not only provides ocean access to the western reaches of our continent for the tremendous trade which we have with our friends in Asia, but it also connects us with the Indian Ocean and the Persian Gulf where lies so much of the oil needed to sustain our economy and the economies of our friends and allies. The Pacific also constitutes the eastern border of the Soviet Union, as we all know, and thus provides ocean access to the Russians to threaten our interests in the area.

The Soviets occupy several Japanese islands, their military forces utilize bases in Vietnam, their extensive fleet prowls the waters of the Western Pacific and the Indian Ocean, and their assistance supports the occupation of Cambodia by the Vietnamese. The Pacific also borders, of course, China and Taiwan where our relationships have been troubled and difficult for more than a decade.

ASEAN, the countries of Indonesia, Malaysia, Singapore, Thailand, and the Philippines, is one of the most exciting areas of the world, an area in which the United States is deeply involved. Whether in the area of raw materials, markets, industrial development, agriculture, trade, or security, we are dependent on each other. We must recognize this interdependence and take advantage of the opportunities it offers. In this regard, it is often said that the ASEAN countries have made progress "in an Asian manner," not through rules and regulations but through consensus. There is much that we in this country can learn from this way of conducting business or for that matter, politics.

Our Nation engages in more trade across the Pacific than across the Atlantic. Therefore, it is ironic that I expect the most outstanding issue in the Far East will continue to be trade relations with Japan. It is true that Japan must open her markets to imports, especially agricultural imports, but it is equally true that our U.S. businessmen must learn to do business in Japan.

And we must find ways to encourage the Japanese to think beyond being a small island nation with limited resources. That is one reason why I introduced legislation giving the President authority to export Alaskan oil to Japan and, in exchange, to import a similar amount of oil from Mexico.

Obviously, there are many difficulties as well as benefits in this proposal. However, allowing Alaskan crude oil exports would be viewed as positive evidence of the U.S. commitment to remove trade barriers and to strengthen cooperation in international energy matters. Japan, with its high priority on security of supply, would be especially pleased with the change in policy. Mexico would also welcome the swap since lower transportation costs would lead to increased oil revenues at a time when its national debt, the largest in the Third World, continues to grow.

As some of my colleagues know, I had planned on holding a hearing to receive information on the administration's current thinking on the issue and to explore the foreign policy implications. Unfortunately, the administration was unwilling even to discuss the matter. Needless to say, I believe this was an unwise decision, particularly since the Export Administration Act comes under congressional review in the spring of 1983, and an issue of this magnitude needs thorough discussion.

Another frustrating issue, one in which I would like to think I could have made a difference, is the humanitarian issue of our American soldiers who are still unaccounted for as a result of the Indochina war. When I visited the ASEAN nations a little over a year ago, I was able to enter Laos, the first U.S. Senator to do so in some time. I was pleased with the tenor of discussions I had with the acting Foreign Minister and had hoped that we would begin to see some positive action from the Laos Government. So far the Laotians have not responded, but it is my feeling that if we in the United States treat this as a humanitarian issue, raising it above the level of political questions, we will eventually evoke some kind of cooperation from the Laotians. At least I hope so, Mr. President.

This brings me to the subject of human rights, and this applies not only to East Asia but I believe all over the world. So often we in this country have a tendency to assess the human rights situation in other countries on our standards. As a result, some of our allies and friends in East Asia are judged as not measuring up, for example, the Philippines, Indonesia, South Korea. Most certainly, I would like to see the fullest expression possible of basic human rights afforded to every individual, but we must look at each country and understand that in many instances they are very young democracies trying to find their own way, just as we did some 200 years ago. Some in fact are still dictatorships which we hope will find their way to becoming democracies.

In the meantime, we must encourage them with quiet expressions of concern. I believe this week we saw fruitful results of that policy. Kim Dae Jung was released from a South Korean prison. I am pleased that the Korean Government chose this course of action and feel confident that this is a sign of more positive human rights movement to come, not only in Korea but in the whole region.

Before concluding, I want to say a few words about the PRC and Taiwan. Insofar as Taiwan is concerned, there are, I believe, two issues of major concern to us. We must assure that Taiwan has the sufficient defense capability mandated by the Taiwan Relations Act. Nothing must be allowed to interfere with this requirement. Second, we must recognize that the honor of the United States is involved in our relationship with Taiwan. Our history will not let us escape this obligation and political expediency cannot be allowed to undermine our honor.

Having said this about Taiwan, let me turn for a moment to China. It is my conviction that the American people in great numbers value our relationship with China and wish to see that relationship expand in a mutually beneficial way. We as a great power—especially as a great power—cannot ignore 1 billion people, one quarter of the Earth's population, simply because they do not at the moment represent a major market for us or because their military forces are not now capable of a significant threat to our interests around the world. In the longer run, we would be judged as negligent of our responsibilities to the American people if we do not provide now for a satisfactory relationship with China and its talented people.

It will be a challenging task to develop this relationship with China, to preserve and protect the U.S. interests in the Pacific area, and this to promote peace, stability, and prosperity for the peoples of the Pacific basin, including most especially the American people.

Mr. President, it has been an honor to have been a part—even though it sometimes seemed as though it were an insignificant part—of this great endeavor. It is unfortunate that many Americans do not realize their role as a member of the world community. I know my colleagues on the Foreign Relations Committee and in this body will persist in their efforts to educate and inform our citizens as well as guide the administration in their making of foreign policy.

I am especially pleased that Senator MURKOWSKI will be serving on the Foreign Relations Committee and, I understand, as chairman of the East Asian and Pacific Affairs Subcommittee. I wish him well—I am confident he will do an excellent job and I know you will all assist him as you have assisted me. I look forward to writing, lecturing, keeping an eye on the Far East, and certainly a vacation. I am ready to move on to other things, California sunshine, but not without letting you know that I shall miss you all.

Thank you, Mr. President.

DEPARTMENT OF THE INTERIOR APPROPRIATIONS, 1983

Mr. STEVENS. Mr. President, the Senate has passed legislation involving the Interior appropriations bill. I ask unanimous consent that an additional colloquy offered by the Senator from Alaska and the Senator from Idaho be printed in the RECORD.

There being no objection, the colloquy was ordered to be printed in the RECORD, as follows:

COLLOQUY BETWEEN SENATOR STEVENS AND SENATOR M'CLURE ON INTERIOR APPROPRIATIONS

Mr. STEVENS. Mr. President, I would like to address a question to the manager of the Interior appropriation bill. It relates to the section, whereby titles conveyed by and easements and restrictions imposed by the Secretary of the Interior pursuant to section 506(c) of Public Law 96-487 are confirmed in all respects. Was it not the intention of the Senate in enacting that provision to legislatively dispose of a lawsuit pending in the U.S. District Court for the District of Columbia, styled *Sierra Club* v. *Watt, et al.*, docket No. 82-0700.

Mr. McCLURE. Yes; pursuant to section 506(c) of Public Law 96-487, the Alaska National Interest Lands Conservation Act, Congress directed the Secretary of the Interior to convey to Shee Atika, Inc., its land entitlements under the Alaska Native Claims Settlement Act of 1971, on North Admiralty Island, approximately 25 to 30 miles north of the village of Angoon. In doing this, Congress voided Shee Atika's land selections in the Hood Bay area, near the village of Angoon, and as a compromise, moved the selections away from the village. The Secretary of Agriculture, pursuant to section 506(c), designated appropriate easements, and so informed the Secretary of the Interior, who incorporated those easements into the conveyances to Shee Atika, as required by law.

The easements are required because the lands received by Shee Atika are private lands and under the Alaska Native Claims Settlement Act easements can be imposed on private lands conveyed to the Native corporations to permit access to public lands. The Secretary imposed 13 trail, or access easements, and 6 site easements of 1 acre each. Because these easements are a burden on private land for the benefit of the public, they are to be no more extensive than necessary, to permit access.

The Secretary also provided in the conveyances that the requirements of

section 22(k) of the Settlement Act also applied to the conveyances until December 18, 1983. Section 22(k) requires that lands located within the boundaries of a national forest shall be managed under the principles of sustained yield and under management practices for protection and enhancement of environmental quality no less stringent than such management practices on adjacent national forest lands.

Objections to the easements and restrictions were raised administratively, before the conveyances were issued, and on December 4, 1981, in a comprehensive administrative decision, signed by the Acting Secretary of the Interior, the objections were analyzed and rejected as without legal merit, and on December 9, 1981, the lands they were conveyed to Shee Atika.

In March, the Sierra Club sued Secretary Watt and others in the U.S. District Court for the District of Columbia, Docket No. 82-0700, challenging the validity of the conveyances and the easements and restrictions imposed. The Sierra Club did not and could not join Shee Atika because they sued in Washington, D.C., although Shee Atika, since it had received the conveyances, was the real party in interest. The Sierra Club then went to Juneau, in June, and in the recording district filed a lis pendens, making reference to the lawsuit in the District of Columbia and informing anyone that looked at Shee Atika's title to the lands conveyed that there was a lawsuit pending which sought "to invalidate the interim conveyances of real property dated December 9, 1981, from defendant Watt to Shee Atika, Inc." Because of this lis pendens there is a cloud on Shee Atika's title and it is unable to secure financing by using its lands as security. I understand that Shee Atika does not receive any funds under the Settlement Act.

Mr. STEVENS. That is correct. Shee Atika, does not share in the financial provision of the Settlement Act and only way it will be able to receive any economic advantage from the provisions of the Settlement Act is through the commercial development of the timberlands conveyed to it. Since the Settlement Act was passed in 1971, this means that in 1982, 11 years later, Shee Atika has yet to receive any economic advantage from the settlement, even though the stated policy of Congress in the Settlement Act was to accomplish the settlement "rapidly, with certainty, in conformity with the real economic and social needs of the Natives, without litigation." It is my understanding that the provision in the appropriation bill relating to Shee Atika is designed to accomplish this.

Mr. McCLURE. Precisely; in its lawsuit, the Sierra Club claims, among other things, that Shee Atika cannot harvest any timber on the conveyed lands, but that it must manage those lands as national monument lands by virtue of section 22(k); that section 22(k) runs from the date of conveyance rather than to 1983, as provided in the conveyance to Shee Atika; that additional easements should have been imposed, not only for access but for other purposes; that the lands should have been conveyed pursuant to restrictions that would preclude any commercial activity, including timber harvesting; that these private lands should be subject to the provisions of the Federal Land Policy and Management Act relating to public lands; that these private lands should be conveyed subject to a restriction that they be managed as national monument lands and if not so managed that the lands revert to the United States; that the policies and regulations of the National Environmental Policy Act of 1969 apply to these private lands; that section 101(b) of the National Environmental Policy Act was violated by the Secretary in conveying the lands to Shee Atika, even though the Congress by section 506(c) of Public Law 96-487 directed the Secretary to convey the lands; that the Secretary violated the provisions of the National Environmental Policy Act by not studying and developing alternatives to conveying the lands to Shee Atika, even though directed to do so by Congress; that the Secretary acted improperly in exercising his authority to review and decide the issues raised in the administrative challenge to the proposed easements; that somehow his actions violated the due process clause of the U.S. Constitution which provides that no person shall be deprived of life, liberty or property without due process of law; that his comprehensive review and decision, after briefs had been submitted by all parties and considered in the process was arbitrary and capricious and that because of the foregoing the Sierra Club has suffered a deprivation of constitutional rights and unless Secretary Watt's actions are declared unlawful and set aside the Sierra Club will suffer substantial and irreparable harm because they would be denied the right to use and enjoy the Admiralty Island National Monument in a manner intended by Congress. There are other allegations of a similar nature.

Mr. STEVENS. And it was the intent of the provision relating to Shee Atika to moot this lawsuit in all respects, is that not correct?

Mr. McCLURE. Absolutely; I believe my brief recitation of the allegations contained in the complaint is sufficient to show that it is without merit, and is designed to preclude the Natives of Shee Atika from receiving and enjoying the economic advantages of the lands promised to them under the 1971 Settlement Act. It is intended by this provision to clear the way for Shee Atika to commence the commercial harvesting of its timber as soon as practical, so it can benefit at this late date from the provisions and promises of the Settlement Act. Congress did not convey national monument lands to them, Congress conveyed private property to them as part of the 1971 settlement.

Mr. STEVENS. In conference, additional language was added to the Shee Atika amendment which reads:

Provided, That nothing herein shall be deemed to amend the Alaska National Interest Lands Conservation Act or the Alaska Native Claims Settlement Act.

As a member of the conference, it is my understanding that that provision was added to make it clear that our action in legislating away the lawsuit was in keeping with the intentions and provisions of the Settlement Act and the Alaska National Interest Lands Conservation Act.

Mr. McCLURE. Again, that is correct. The purpose behind the provision is to render the pending lawsuit, and that all of the claims that are made therein, moot, because those claims and allegations run contrary to the purposes and provisions of the Alaska National Interest Lands Conservation Act and the Alaska Native Claims Settlement Act and the actions taken by the Secretaries of Agriculture and the Interior pursuant thereto. If their actions had not been in compliance with those acts, we would not have taken the action we did, for we would not approve conveyances to Shee Atika, and the restrictions and easements, imposed thereon, if those conveyances, easements, and restrictions were in violation of either the Alaska Native Claims Settlement Act or the Alaska National Interest Lands Conservation Act. However, since those conveyances and easements and restrictions are in full compliance in all respects with the provisions of those acts, it was intended to confirm those conveyances, easements, and restrictions in all respects, as being in compliance to the maximum extent possible with the Alaska Native Claims Settlement Act and the Alaska National Interest Lands Conservation Act. We accepted the language of the House conferees because it makes absolutely clear that what was conveyed was in full compliance with the acts and there was nothing more the Secretaries should do, or for that matter, could do under any law. Shee Atika now can move forward to develop its lands commercially, for economic stability and growth.

Mr. STEVENS. Thank you Senator McCLURE. For the record I would also like to note that the land holdings conveyed to Shee Atika are not in the middle of the Admiralty Island National Monument, but rather are at the very edge of the monument and

therefore are not the type of private land in holdings that so often occur in Alaska.

In addition, the lands are 25 to 35 miles from the village of Angoon and comprise approximately 23,000 acres, while the Admiralty Island National Monument comprises approximately 980,000 acres. Pursuant to title VIII of the Alaska National Interest Lands Conservation Act, the Natives of Angoon have a priority subsistence right in those 980,000 acres. Therefore, the subsistence rights of the Natives are protected.

I have fought for balanced land use in Alaska. I am aware of the arguments and competing demands and positions. I am unable, however, to comprehend the vendetta that the Sierra Club and others are waging against Shee Atika. Apparently, they believe they should have a million-acre national monument rather than one of 980,000 acres.

I am happy to note that by the Shee Atika amendment to the Interior appropriation bill, we have rejected the allegations and challenges to Shee Atika's right to commence immediately the commercial harvesting of timber.

PIPELINE SAFETY ACT OF 1982—THE ALASKA RAILROAD PACKAGE

Mr. STEVENS. Mr. President, the Alaska railroad package passed the Senate on December 21, 1982, as title II of H.R. 3420, the Pipeline Safety Act of 1982.

Due to the extreme time constraints that we were forced to operate under the legislative history to the railroad title was not included in the RECORD. I ask unanimous consent that the proper interpretative documents for this bill be printed in the RECORD and that in the permanent RECORD they be printed prior to passage of H.R. 3420.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

ALASKA RAILROAD TRANSFER LEGISLATION
SECTION-BY-SECTION ANALYSIS

SECTION 1—TITLE

This section provides that the legislation may be cited as "Alaska Railroad Transfer Act of 1982."

SECTION 2—FINDINGS

This section states the reasons that the Alaska Railroad should be transferred to the State of Alaska. While the railroad has served the interest of the Federal Government in the past, today it primarily serves residents and businesses of the State. Further, the transfer is consistent with the Federal Government's efforts today to transfer programs to the States whenever appropriate. Finally the transfer is necessary in order to insure that in the future the railroad will be operated and it's services expanded to meet the needs of the State and the railroad users.

SECTION 3—DEFINITIONS

This section defines the major terms used in the legislation. Among those described is "rail properties of the Alaska Railroad." This definition is important because it describes the rail properties to be transferred. As defined in the legislation, rail properties means all right, title, and interest to real and personal properties held by or for the Alaska Railroad as of the date of enactment with limited exceptions, as follows: (1) The unexercised reservation to the United States in all patents to lands as provided for the construction of future rights-of-way; (2) the right of the Secretary of Transportation to exercise the power of eminent domain; (3) any money in the Alaska Railroad Revolving Fund that the Secretary and the State agree is needed to pay certain Federal obligations arising from operation of the railroad, which are not assumed by the State; (4) certain properties that the Secretary determines, with the consent of the State, to be necessary to carry out Federal functions after the transfer; and (5) certain properties in Denali National Park and Preserve.

This section defines "exclusive-use easement" as a surface easement for transportation, communication, and transmission purposes and support functions together with the right to use the subsurface if necessary for such purposes. The definition further guarantees subjacent and lateral support and entitles the easement holder to fence, afix, track fixtures and structures to and exclude persons from the land subject to the easement.

This section also defines the terms "State" and "State-owned Railroad". The definitions are broadly worded to give the State maximum flexibility in designating an appropriate organization for state ownership, operation, and management of the railroad after the transfer.

SECTION 4—TRANSFER AUTHORIZATION

This section establishes the primary transfer components. Under subsection (a), the Secretary of Transportation is required to transfer the rail properties of the Alaska railroad to the State without direct monetary consideration as soon as possible after four specified certifications are made.

Subsection (b) requires the Secretary of Transportation after consultation with the Secretary of the Interior to simultaneously deliver to the State the following documents on the date of transfer; (1) a bill of sale conveying title to all personal rail properties of the Alaska Railroad; (2) an interim conveyance of the real properties of the Alaska Railroad which are not subject to unresolved claims of valid existing right; (3) an exclusive license to use rail properties not conveyed above pending resolution of claims of valid existing rights in accordance with the review, settlement, and final adjudication procedures established in section 6(b); (4) an exclusive-use easement for railroad purposes and other existing uses to right-of-way lands located with the Denali National Park and Preserve and title to the improvements within that right-of-way. All other rail properties located in the park are transferred to the Department of the Interior for administration as part of the park.

Lands subject to an interim conveyance (including lands to be conveyed following the review, settlement and adjudication process discussed above), must be surveyed by the Department of the Interior within five years after the date of enactment pursuant to section 606(b)(2) of the interim conveyance. Following completion of the survey, the Secretary is required to issue a patent to the State.

Subsection (2) provides that interim conveyances and patents issued to the State must transfer all U.S. reservations for the Alaska Railroad except unexercised reservations for future rights-of-way under the 1914 Alaska Railroad Act. In addition, there shall be reserved to the Secretaries of Interior, Defense and Agriculture as appropriate existing easements for administration identified in the closing report. The appropriate Secretary may also obtain future easements with State consent. Existing and future easements may not interfere with operations and support functions of the Alaska Railroad.

The Park Service will continue to use and occupy through the Secretary of the Interior a small tract at Talkeetna, Alaska currently used for certain park activities. So long as this use or occupation does not interfere with railroad operations.

With respect to the required certifications, subsection (d) directs the Secretary of Transportation to find that the State will operate the railroad as a carrier in intrastate and interstate commerce. In addition, the Secretary is to certify that the State will assume the rights, liabilities and obligations of the Railroad. However, the State will not be responsible for claims or causes accruing on or before the date of transfer, or judgments rendered before the transfer, except those tort actions which result in claims in less than $2,500.

The Secretary must also find the State has established specified employee protection arrangements to apply during the two year period after the date of transfer. For those employees who are not officers and who choose to transfer to the State-owned railroad, the State must ensure that they are retained in their same positions, and unless otherwise agreed to, at least at the same level of compensation in effect at the time of transfer. These provisions are not to apply to those employees who are reassigned, retired, or separated for cause or lack of work.

Under this subsection, the State is to continue existing collective bargaining agreements during this two year period unless otherwise agreed to. This subsection further provides that these agreements are to be renegotiated during this period unless otherwise agreed to, and that they are to expire at the end of the two year period.

Finally, with respect to these employees, the State is to ensure that certain Federal benefits are retained. These include accrued leave, insurance, seniority rights, and cost of living increases. Also those employees who are transferred to the State-owned railroad but terminated or laid off, during the transition period, shall be entitled to priority of reemployment in the railroad and prior Federal service is to be counted in determining seniority for such purposes.

For officers of the railroad including the General Manager, Assistant General Manager, Assistant to the General Manager, Chief of Administration and Chief Consul, the Secretary must also certify that the State has agreed to retain those officers for at least one year from the date of transfer (except where separated for cause, resignation, retirement, or lack of work), at or above their base salary in effect on the date of transfer in such positions as the State may determine. As an alternative, the State may remove these employees upon payment of lump sum severance pay equal to their base salary for one year diminished pro-rata

for employment by the state owned railroad within one year of the date of transfer prior to separation. Benefit guarantees discussed above for officers are in effect for one year only.

The fourth certification requirement insures that the State will allow the Secretary of Transportation access to records of the railroad and employees as needed to carry out the remaining Federal responsibilities connected with the transfer.

SECTION 5—TRANSITION PERIOD

This section sets forth the activities which are to occur, or are not to occur, during the period of enactment of the Legislation and the date of transfer. Subsection (a) provides for joint submission by the Secretary of Transportation and the Governor of Alaska, no later than six months after enactment, of a report that describes in detail the rail properties of the railroad, the liabilities and obligations to be assumed by the State, and the sum of money, if any, in the Alaska Railroad Revolving Fund to be used by the Federal Government in carrying out it's remaining responsibilities.

Under Subsection (b), the State shall have access to properties of, and records pertaining to the railroad in order to evaluate and prepare for the transfer. Also the Secretary is directed not to take certain actions such as transfer, sale, or lease of the railroad properties or the obligation of railroad monies, without the consent of the State.

Finally, subsection (c) directs the Secretary prior to transfer to ensure that the railroad's accounting practices and systems conform to reporting standards set by the ICC. This action will facilitate the transition of the railroad to it's status as a regulated carrier in intrastate and interstate commerce.

SECTION 6—LAND TO BE TRANSFERRED

This section sets forth the status of the rail properties to be transferred and provides for the orderly adjudication of claims of valid existing rights to those properties. Subsection (a) specifies that the property to be transferred is excluded from selection or conveyance provided under amendments to ANCSA relating to the Cook Inlet Region, Inc., the Chugach Natives, Inc. and certain future Eklutna Village Corporation selections provided for in ANILCA.

Subsection (b) reinforces the Department of the Interiors existing responsibility to adjudicate third party claims and to issue written opinions and appropriate documents of title. Specifically, the Secretary of the Interior is directed to complete the determination of "smallest practicable tract" under section 3(e) of ANCSA within two years of the enactment of this legislation. Prior to initiating these adjudications, a 10-month period is provided whereby all affected parties are directed to make a good faith effort to review and settle as many of these claims as possible. This subsection specifies that until settlement or final adjudication, interim management of the railroad lands subject to claims of valid existing rights shall be in accordance with standards agreed to in the Memorandum of Understanding between the FRA, the State Cook Inlet Region, Inc. and Village Corporations. In recognition of the importance of maintaining exclusive control over right-of-way lands to ensure sufficient protection for safe and economic operation of the railroad, the final part of this subsection provides a process whereby Village Corporations are allowed to relinquish any claims to railroad lands within the right-of-way for subsequent transfer to the State. This provision further provides that failure to make such a relinquishment shall result in the conveyance to the State of all right, title and interest of the United States in the right-of-way free and clear of such claims.

Under subsection (c), any decision by the Secretary of the Interior pursuant to this section is open to review only by an action brought in the Federal District Court of Alaska and is to be expedited. The State is allowed to participate in such an appeal as well as in any agency proceeding. To ensure that the goals of this legislation are not frustrated, this section further provides that no injunctive or other relief can delay the transfer of the railroad or impede its operations.

Lands among the rail properties are expressly excluded by subsection (d) from selection by Cook Inlet Region, Inc. (CIRI) and Chugach Natives, Inc. under 43 U.S.C. §1611 and sections 1425 and 1430 of P.L. 96-487 (ANILCA). Since the passage of P.L. 94-204 (ANCSA) in 1976, incorporating the Cook Inlet Land Exchange Agreement (exchange agreement), the Secretary of the Interior and the State of Alaska have been attempting to ensure the land entitlement of CIRI under that complex provision is fulfilled in a manner consistent with the interests of the States, environmental concerns, and concerns of other public and private entities.

In one of the integral parts of the exchange agreement, the "in-region pool" provision, the Secretary of the Interior, in conjunction with the General Services Administrator, was charged with promptly identifying and creating a selection pool of federal lands within the Cook Inlet Region. The transfer of the Alaska Railroad through this legislation would exclude rail properties from possible placement in the "in region" selection pool, unless the State or Secretary of Transportation consent to its inclusion.

ANILCA amended ANCSA to allow for "in-region pool" selections to occur out of state. Since the existing exchange agreement allows the Secretary of the Interior discretion to enlarge the "in region pool" using out of region entitlement, the objective of this section is to reaffirm this secretarial discretion and to make clear that out-of-state properties can be placed into the "in region pool". This subsection also allows CIRI to negotiate with local governments to obtain the properties being selected.

Utilization of CIRI's current statutory rights to obtain Federal surplus property wherever located will be essential for fulfillment of its entitlement. Therefore, a more detailed provision is needed to insure the properties will be made available. This section adjusts CIRI's current statutory right by specifically requiring that both the Secretary of the Interior and CIRI obtain early notice of potentially available properties. The amendments also clarify the Secretary of the Interior's authority to offer properties under his jurisdiction to CIRI as partial fulfillment of CIRI's entitlements.

In addition, to increase to properties within Alaska that can be placed into the "in region pool", section 6 extends CIRI's "in-region" priority statewide.

The amount of property within the "in-region pool" has been for various reasons less than the minimum amount required. On three separate occasions the original deadline on January 15, 1978 has had to be extended to recognize this fact. To ensure fulfillment, section 6 lifts the deadline until the pool is complete but in no event later than July 15, 1987.

Subsection (e) expressly provides that the State shall be liable to a party receiving a conveyance of land among the rail properties for damage resulting in use by the State in a manner not authorized under the license provided in section 4.

SECTION 7—EMPLOYEES OF THE ALASKA RAILROAD

Subsection (a) of this section provides that those employees who transfer to the State-owned railroad and who presently participate in the Federal Civil Service System, may continue to participate in this system for as long as they continue to work for the State-owned railroad. However as an alternative, the State-owned railroad may provide such employees either in or substantially equivalent to those benefits the State provides it's employees under the State Retirement System. This section provides an exemption to the state alternative program for those transferred employees who are entitled to retire under the federal retirement system within five years of the date of transfer. These employees may elect to remain participants in the Federal system even if the State chooses to provide other benefits.

Subsection (b) of this section provides that those Federal employees who choose not to transfer to the State-owned railroad at the time the railroad is transferred to the State shall be entitled to all normal rights and benefits under federal law for discontinued employees.

Subsection (c) provides for similar protections for transferred employees whose employment with the State-owned railroad is involuntarily terminated during the two-year period following the transfer.

SECTION 8—STATE OPERATION

Subsection (a) of this section provides that after the transfer, the State-owned railroad shall be subject to the same Federal laws, with some limited section, as are other railroads, including the Interstate Commerce Act, the Federal antitrust laws (unless the State acts otherwise to invoke an exemption), and the railroad safety laws. The limited exemptions are the Railroad Retirement Act, the Railway Labor Act, the Federal Employers' Liability Act, and the Railroad Unemployment Insurance Act. All FRA memoranda which sanction noncompliance with Federal railroad safety regulations in effect on the date of transfer shall continue in effect according to their terms as "waivers of compliance".

In addition, subsection (a) exempts the State-owned railroad from any state or local statute specifying a minimum number of crew members that must be employed in connection with the operation of it's trains.

Subsection 9 (a) specifies that the State-owned railroad shall retain and manage it's own revenues. The purpose of this provision is to avoid the need for annual appropriations by the State for the railroad.

Subsection (b) of this section requires the ICC to promulgate an expedited, modified procedure for providing the State-owned railroad a certificate of public need and necessity.

This subsection also exempts ICC actions under this subsection from the National Environmental Policy Act and the Energy Policy and Conservation Act in order to ensure an expeditious process.

Subsection (c) of this subsection provides that the State-owned railroad shall be eligible to participate in Federal assistance programs on the same basis as other railroads,

including that provided for by the Railroad Revitalization and Regulatory Reform Act.

Subsection (d) of this section provides that the railroad properties within the Denali National Park and Preserve and Chugach National Forest shall be subject to applicable Federal Laws and regulations established for the protection of forest and park values. In making this determination, the appropriate secretary is to consult with the Governor of Alaska. Moreover, any determination by the Secretaries must be designed to avoid unreasonable interference with railroad operations. This subsection also requires that any decision to fence the right-of-way within Denali shall be subject to the concurrence of the Secretary of the Interior.

SECTION 9—FUTURE RIGHTS-OF-WAY

This section contemplates future rights-of-way for expansion of the railroad. Subsection (a) provides that the State or State-owned railroad may request the Secretary of the Interior, or the Secretary of Agriculture as appropriate, in consultation with the Secretary of Transportation to approve expeditiously pursuant to existing law, a right-of-way over Federal lands and applications for terminal and station grounds and material sites.

Subsection (b) specifies that any rights-of-ways and grounds and sites granted under this section must conform to the extent possible to the standards established in the Alaska Railroad Act of 1914.

Subsection (c) provides that a right-of-way granted under this section is subject to reversion in accordance with section 10 below.

SECTION 10—REVERSION

This section provides for the reversion to the United States of the properties of the Alaska Railroad if within ten years of the transfer such properties are converted to a use that would prevent the State-owned railroad from continuing to operate. As an alternative to the actual reversion of the properties, the State at its option, may pay the United States an amount determined to be the value of the properties at the time they were converted to a use preventing the railroad from operating.

Subsection (b) specifically provides that if the State discontinues use of any land within the right-of-way for a continuous period of 18 years, or upon a formal notification of discontinuance from the State, the State's interest in these lands will revert to the United States.

Subsection (c) further states that upon such reversion, these lands will be conveyed by patent to abutting land owners, except as specified in subsection (d). This latter subsection provides that the portion of the right-of-way within the Denali National Park and Preserve and the Chugach National Forest will revert to the Department of the Interior and the Department of Agriculture, as appropriate, for administration as part of these units.

Subsection (e) provides that if the State sells or transfers the railroad within five years after the date of transfer, the proceeds from the sale or transfer that exceed the cost of any rehabilitation and improvements and any liabilities incurred by the State shall be paid to the United States.

SECTION 11—OTHER DISPOSITION

To ensure that the railroad is transferred from Federal ownership, this section authorizes the Secretary of Transportation to otherwise dispose of the railroad if satisfaction by the State of the four conditions under section 4 cannot be certified within a year of the delivery of the report mandated under section 5. Consistent with the concern for continued rail service, this section directs the Secretary to give preference to a prospective owner who will continue to operate rail service.

SECTION 12—DENALI NATIONAL PARK AND PRESERVE

All rail properties within the Denali National Park and Preserve are transferred to the Department of Interior for administration as part of the park subject to the exclusive-use easement discussed above.

SECTION 13—APPLICABILITY OF OTHER LAWS

This section exempts actions taken under the legislation from the requirements of a number of Federal statutes, including the National Environmental Policy Act and those provisions of the Administrative Procedures Act not pertaining to judicial review. The reasons for these exemptions is to ensure that the transfer process is not delayed.

This section also clarifies that actions taken under this legislation do not constitute a disposal of surplus Federal property or a revocation of withdrawals made from or confirmed for the Alaska Railroad under a number of specifically named and generally referenced land laws, including the Federal Land Policy and Management Act. These clarifications are necessary in order to ensure that the rail properties do not become available for entry or selection by third parties as a result of actions taken under the legislation.

SECTION 14—CONFLICT WITH OTHER LAWS

This section provides that this legislation shall govern in the event in any conflict between this legislation and any other law.

SECTION 15—REPEAL AND AMENDMENT OF EXISTING LAWS

This section repeals the Alaska Railroad enabling act and to other related laws, and makes conforming changes to other Federal laws that mention the Alaska Railroad. These changes would become effective at the times of transfer or other disposition or at the time of any other disposition of the railroad pursuant to Section 11 of this legislation.

SECTION 16—SEPARABILITY

This section provides that if any section is held invalid, other sections shall not be affected.

Mr. STEVENS. Mr. President, the bill includes a complex provision that reorders and modifies Cook Inlet Region's rights in order to accommodate potential transfer of clearer title regarding the Alaska Railroad to the State of Alaska. Cook Inlet Region, Inc. under the legislation is agreeing to the modification and postponement of certain rights and the complete waiver, upon transfer of the Railroad property, of other potential rights which it has under 1976 and 1980 federal legislation. The valuable rights waived by CIRI include possible rights to developed property owned by the Alaska Railroad that are in key locations and are thought by the State of Alaska to be integral to its fiscally successful operation of the railroad. A number of these properties have inordinately high value even for developed properties in Alaska. As compensation for the surrender of rights to lands of the Alaska Railroad, the deferral of substantial existing rights under the 1980 legislation, and the further restrictions of the rights of Cook Inlet Region, Inc. as contained in an agreement described below, the Region will receive adjustments to the property rights attached to its "out-of-region" pool under the original Cook Inlet Settlement Agreement in 1976. The exchange values assigned to the portion of the "out-of-region" pool in the legislation are not intended to reflect the value of lands outside of the Cook Inlet Region, but are instead an agreed upon standard which recognizes a combination of values waived, deferred and modified with respect to Cook Inlet Region, Inc.

The legislation also directs the General Services Administration to execute a Memorandum of Understanding with Cook Inlet Region, Inc. and the Secretary of the Interior to assure that there is expeditious and cooperative fulfillment of CIRI's property entitlement. Under this agreement, Cook Inlet Region, Inc. agrees to defer the exercise of certain rights which are confirmed to it under this legislation and agrees to take, without its discretion, certain lands, as described in the agreement, when identified for it by the federal government in the interim. A ceiling of approximately one-half of its authority to bid and negotiate for federal properties outside the State may be used prior to October 1, 1983; furthermore, it shall not use such additional bid and negotiation authority as is provided in this legislation in exchange for its out-of-state entitlement until January 1, 1985. This period is designed to provide the federal government with the opportunity to locate certain properties within Alaska for selection by Cook Inlet Region, Inc. If the federal government locates such properties within the Cook Inlet Region, Cook Inlet Region, Inc. must make them to reduce and possibly eliminate its additional bidding and negotiating capability under this statute. Nothing in this agreement, however, reduces or affects the rights or veto power of the State of Alaska or other Native corporations.

The legislation also provides that where excess or surplus property is provided outside Alaska, such notice to state and local governments as is provided in the disposition of surplus property will be here provided. Finally, the legislation provides a maximum amount of acres or acre/equivalents which may be utilized to credit the Region's property account. It is anticipated that the amendment will be applied as part of and in a manner consistent with the original provisions of P.L. 94-204 and the Cook Inlet Settlement Agreement ratified therein.

Taken together, these deferments, waivers and agreements by the Region amount to a substantial reordering of the Region's prior rights. This package of amendments and the associated agreements have been developed in consultation with Cook Inlet Region, Inc. and it has consented to the waiver of these rights to property and the conversion of these rights to the mechanisms established under this legislation and associated agreement. These rights are in exchange for valuable property rights previously established and reduce a national obligation. As a consequence the fullfillment of the obligations of the Cook Inlet Settlement must be administratively recognized as the equivalent of a sale or other disposition which produces revenue for the federal government and reduces the national debt. If such recognition is not given to transactions consummated pursuant to these authorities. Cook Inlet Region, Inc. may be the subject of discriminatory treatment in negotiations and the existence of opportunities to fullfill its entitlement. This should not be the case for these fair market value property sales and that administrative steps should be

taken to assure that incentives for the fulfillment of these obligations exist including full accounting credit for such transaction in evaluating the efforts of federal agencies as coordinated by the President's Property Review Board.

Cook Inlet Region, Inc., by letter to Senator Stevens dated November 29, 1982, has indicated an intention to enhance the receipt of lands within its Region in order to expeditiously fullfill the redefined and adjusted "out-of-region" pool. This intention to take in-Region properties as the means of fulfilling its entitlement, would be formalized in an agreement which establishes an obligation of Cook Inlet Region, Inc. to take certain properties within its Region. I ask unanimous consent to print the attached detailed description of House amendments to assist administrators in interpretation of these provisions.

The material follows:

CIRI ALASKA RAILROAD AMENDMENTS

THe CIRI Alaska Railroad Amendments modify the rights and obligations of Cook Inlet Region, Inc., the State of Alaska and the Federal Government under the "Terms and Conditions for Land Consolidation and Management in the Cook Inlet Area." House Report No. 94-729 accompanying the bill which ratified the "Terms and Conditions" described the background of that Agreement at follows:

"From the outset of the implementation of the Settlement Act, there have been extreme difficulties encountered in adequately fulfilling the land entitlements of the Cook Inlet Regional Corporation under section 12(c) of the Settlement Act. Under the Statehood Act, the State had already obtained patents to much of the low-lying lands in the region, except for lands within the Kenai National Moose Range. In addition, the Secretary, in an agreement with the State of Alaska in 1972, committed additional lands to the State even though there had not yet been withdrawn sufficient lands for Cook Inlet Region. The subsequent efforts of the Secretary to fulfill his statutory obligation to Cook Inlet has yielded, for the region, selections largely comprised of mountains and glaciers, hardly the settlement contemplated by the Congress. Since early 1972, the Region has been attempting to resolve these issues by litigation, negotiation, and now by legislation.

"In the last eight months, a series of intense discussions with the Secretary, the State, and various other interested groups (including local government, mining interests, and evironmental groups) has resulted in a negotiated settlement entitled "Terms and Conditions for Land Consolidation and Management in the Cook Inlet Area." The document harmonizes conflicting interests, seeking to adjust an equitable settlement for Cook Inlet Region consistent with the needs of Alaska and the public at large. As such, it is more than a Cook Inlet Region, Inc. settlement. It seeks to resolve harmful jurisdictional conflicts and arbitrary ownership patterns within the Cook Inlet region. It opens for development lands that should be in private ownership and conserves for public use lands that should have that status."

Under the "Terms and Conditions" CIRI agreed to shift most of its statutory entitlement away from the populated Cook Inlet area into other regions in the State. Under IC(2) of the "Terms and Conditions" the Secretary was to attempt to place certain categories of land (e.g. abandoned or unperfected public land entries, surplus property, revoked Federal reserves, cancelled or revoked power sites, ASCSA 3(e) lands) located in the Cook Inlet region into an "in-regionpool" for CIRI's selection. The goal was to make 138,240 acres (6 townships) available to CIRI by January 15, 1978. Under IC(1) of the "Terms and Conditions" CIRI could select the remainder of its 29.66 townships entitlement outside of the Cook Inlet region. The deadlines in the Act have been extended by Congress. The latest extension of the in-region deadline expired on July 15, 1982. In 1980 the "Terms and Conditions" was amended by Congress to allow CIRI to purchase Federal surplus property throughout the United States with a money value given to its in-region entitlement.

The present amendments, like the original "Terms and Conditions", were agreed upon by Cook Inlet Region, Inc., the State of Alaska and the Federal Government after a series of lengthy discussions, and represent resolution of conflicting interests and a fair settlement for the parties. The amendments have been drafted to ensure that CIRI's entitlement is fulfilled and the Federal Government's obligation to Cook Inlet satisfied without further intervention by Congress. The following is a brief analysis of the various provisions of the amendments:

1. Section 12(b)(7). The amendments to subparagraph 7 give CIRI the opportunity to obtain Federal excess property. Excess property is property which is excess to the needs of the Federal agency which has been using the property. The term "excess property" is defined at 40 U.S.C. 472(d) and (e) and does not include property which is capable of being returned to the public domain. Before declaring excess property surplus to the needs of the Federal Government, GSA determines whether the property can be used by another Federal agency. If no other agency can make use of the property, GSA declares the property surplus to the needs of the Federal Government. Under existing law CIRI can obtain Federal surplus property by direct negotiation or by bidding for the property at a Federal surplus property sale. CIRI has had difficulty obtaining notice that Federal property was surplus. This amendment gives CIRI an opportunity to obtain Federal property at the excess stage before it beomes surplus property.

2. 12(b)(7)(ii)(A). This provision requires the Administrator of General Services to notify CIRI when he is reviewing Federal excess property for use by other Federal agencies. CIRI must notify the Administrator within fifteen days that it is interested in the property. The statute does not require the Administrator to convey the property to CIRI; the decision is discretionary. If the Administrator decides to convey the property to CIRI, the terms of the sale are negotiated between the parties. CIRI pays for the property from its entitlement bank account which is described in paragraph 4, below.

3. Section 12(b)(7)(ii)(B). This provision requires GSA to give notice to affected states and local governments that it is considering conveying excess property to CIRI and requires GSA to give the states and local governments such opportunity to obtain the property as is recognized in Title 40 of the United States Code. Title 40 has various provisions which give the Administrator of GSA and the Secretary of Health, Education and Welfare the discretion to convey certain kinds of Federal property to states and local governments. The Administrator's discretion to make such conveyances to states and local governments is protected by this provision.

4. Section 12(b)(7)(iii) and (iv). These provisions increase CIRI's "bank account" for purchasing excess and surplus property. CIRI is given a bank account for paying for surplus property consisting of a money value given to its remaining in-region entitlement of $500 an acre ($500 x approximately 130,000 acres). These amendments also add to CIRI's bank account by giving it a value of $250 an acre for thirteen townships of its twenty-three township out-of-region entitlement which it can utilize for purchasing excess and surplus property after the in-region "bank account" is exhausted. If CIRI obtains land in Alaska from either the in-region or out-of-region pool, its bank account is reduced. If it expends money in its bank account, its land entitlement is thereby reduced.

5. Section 12(b)(8)(i)(A). The Secretary's obligation to place certain categories of land (*e.g.* abandoned or unperfected public land entries, surplus property, revoked Federal reserves, cancelled or revoked power sites, ANCSA 3(e) lands) into the in-region pool under I(C)(2)(a) of the Cook Inlet "Terms and Conditions" terminates on the first day after July 15, 1984 that the sum of the acres or acre/equivalents identified for the in-region pool and the acres or acre/equivalents used by CIRI in purchasing excess or surplus property under Section 7 of the Act reaches 138,240 acres or acre/equivalents. (If a parcel of land is worth more than $500, each increment of $500 or portion of $500 is considered an acre/equivalent. For example, if one acre identified for the pool is worth $1,750, it will be considered 3½-acre/equivalents.)

6. Section 12(b)(8)(i)(B). The Secretary's authority to place land in certain categories from out-of-region into the in-region pool terminates on July 15, 1984 if the Secretary has fulfilled his obligation under I(C)(2)(a) as described in paragraph 5 or on July 15, 1987 even if the obligation is not fulfilled.

7. Section 12(b)(8)(i)(C). Under this provision the State of Alaska may prevent the Secretary from making land available to CIRI from the in-region pool if the State or a municipality requires the land for a public purpose. The State's "public purpose" veto takes affect on military land on January 1, 1985 and on all other lands when the Secretary's obligation under I(C)(2)(a) of the "Terms and Conditions" is fulfilled or on July 16, 1987, whichever occurs first. Until the State's public purpose veto takes effect, the State retains the authority it has under existing law to prevent the Secretary from making land available for selection by CIRI under I(C)(2)(a)(vi) and (c) of the "Terms and Conditions".

Under IC(2)(a)(vi) of the "Terms and Conditions", the Secretary may identify "other Federal lands" for CIRI's in-region pool only with the State and CIRI's concurrence. The State's concurrence will be required until the State's public purpose veto takes effect. "Other Federal lands" does not include lands which have been selected by or confirmed to the State under the Statehood Act.

Under IC(2)(C) the State can prevent the inclusion of 1,500 acres of abandoned or unperfected public land entries and cancelled or revoked power sites into CIRI's in-region pool. The State can also require the Secretary to consult with the Joint Federal-State Land Use Planning Commission to detemine whether private owneship of a given piece of property is incompatible with reasonable land management principles. The Joint Federal-State Land Use Planning Commission is

no longer in existence and this provision has become ineffective.

8. Section 12(b)(8)(i)(D). This provision states under which circumstances CIRI may obtain property of the Alaska Railroad. If the Alaska Railroad is transferred to the State, CIRI cannot obtain railroad land without the State's prior consent. If the transfer does not take place, the State can continue to withhold its consent if the State or one of its municipalities requires the land for a public purpose. The State's "public purpose" veto goes into affect immediately if the railroad is not transferred to the State. This provision is not independent authority for transfer of railroad land to CIRI.

9. Section 12(b)(8)(ii). CIRI and the Federal Government have disagreed on the interpretation of I(C)(2)(a)(v) of the terms and conditions which authorizes the Secretary to review Federal installations to determine if there is land which is not needed by the installation which could be made available to CIRI. BLM believes that the review should be limited to lands withdrawn by section 11 of ANCSA. CIRI believes that the review should take place throughot the CIRI region. In the amendments the review is authorized throughout the region unless CIRI and the Secretary enter into an agreement to limit the review. CIRI has agreed to enter into a side agreement with the Secretary limiting the review to the following properties:

(a) FAA:

(1) Homer VOR;

(2) Kenai VOR and airport (including PLO 2585 and ANS No. 11);

(3) Talkeetna VOR, NDB and airport;

(4) Fire Island VOR;

(5) Skwetna NDB.

(b) Coast Guard:

(1) Fire Island Race Pt.;

(2) Fire Island West Pt.;

(3) Kalgin Island;

(4) Two undeveloped lots on Government Hill, Anchorage.

(c) FERC:

(1) Power project 395 (Chackachama), provided, however, that the review is to be limited to T. 12 and 13 N., R. 15 W., Seward Meridian, and that a two hundred foot (200') right-of-way corridor for transmission lines and road access may be reserved to the State at a location to be specified by the State at a subsequent time not to exceed twenty years from receipt of conveyance by CIRI.

(d) Alaska Railroad properties, in the event such properties become available for selection pursuant to subsection 12(b)(8)(i)(D) of the CIRI Alaska Railroad Waiver Amendments.

10. Section 12(b)(8)(iii). Section I(C)(2)(b) of the "Terms and Conditions" authorizes the Secretary to place lands into the in-region pool from outside the region which are in the same categories as lands listed at I(C)(2)(a) (e.g. abandoned or unperfected public land entries, surplus property, revoked Federal reserves, cancelled or revoked power sites, ANCSA 3(e) lands) if the State concurs. Under this amendment the State will not withhold its concurrence unless the State or one of its municipalities needs the land for a public purpose.

11. Section 12(b)(8)(iv). This provision extends the deadline for CIRI's selection of its out-of-region entitlement for two years until April 15, 1985.

12. Section 12(b)(8)(v). This provision provides for a review by Congress in January 1985, to determine whether CIRI's entitlement is being fulfilled pursuant to the "Terms and Conditions" and the implementing legislation.

13. Section 12(b)(9). A new provision is added to the Act to protect third-party rights from encroachment by the "Terms and Conditions" as modified by these amendments. CIRI's waiver of an interest in lands within the Point Woronzof, Point Campbell, Goose Lake and Campbell Tracts in Anchorage is reaffirmed. Native selections under ANCSA are protected. The ANILCA 1425 Agreement among the State, the Municipality of Anchorage and Eklutna, Inc. is protected. Subsection 12(b)(9) prohibits the Secretary from identifying for CIRI's selection lands which have been selected by or confirmed to the State under the Statehood Act unless the State and CIRI reach an agreement concerning such a conveyance pursuant to Subsection 12(b)(11).

14. Section 12(b)(10). This provision amends paragraph I(C)(1) of the "Terms and Conditions" by expanding the out-of-region lands which CIRI can nominate for selection to include ANCSA 17(d)(2) lands as well as ANCSA 17(d)(1) lands and lands formally withdrawn by both provisions.

15. Section 12(b)(11)(i). This provision authorizes the State to enter into agreements to convey tentatively approved and patented State land to CIRI to fulfill CIRI's out-of-region entitlement. The State would then be entitled to make additional selections under the Statehood Act.

16. Section 12(b)(11)(i). This provision authorizes the Secretary to convey to CIRI land selected by the State prior to July 18, 1975 or pursuant to sections 2 and 5 of the State Federal agreement of September 1, 1972 if the State agrees to the conveyance to fulfill CIRI's out-of-region entitlement. The State would then be entitled to make new selections under the Statehood Act.

17. Section 12(b)(11)(i). This provision authorizes the State to convey to land directly to CIRI pursuant to an agreement with CIRI and the Secretary to implement sections 12(b)(11) (i) and (ii). The State would be entitled to make new selections under the Statehood Act if it conveys land to CIRI pursuant to this provision.

MESSAGES FROM THE HOUSE

ENROLLED BILLS SIGNED

At 8:05 a.m., a message from the House of Representatives, delivered by Mr. Berry, one of its reading clerks, announced that the Speaker has signed the following enrolled bills:

H.R. 2330. An act to authorize appropriations to the Nuclear Regulatory Commission in accordance with section 261 of the Atomic Energy Act of 1954, as amended, and section 305 of the Energy Reorganization Act of 1974, as amended, and for other purposes;

H.R. 2520. An act for the relief of Emanuel F. Lenkersdorf;

H.R. 5238. An act to amend the Federal Food, Drug, and Cosmetic Act to facilitate the development of drugs for rare disease and conditions, and for other purposes;

H.R. 5858. An act for the relief of Mocatta & Goldsmid Ltd., Sharps, Pixley & Co., Ltd., and Primary Metal and Mineral Corp.;

H.R. 6120. An act to reauthorize the Deep Seabed Hard Mineral Resources Act for fiscal years 1983 and 1984;

H.R. 6254. An act to amend title 3, United States Code, to clarify the function of the U.S. Secret Service Uniformed Division with respect to certain foreign diplomatic missions in the United States, and for other purposes;

H.R. 6804. An act to provide subsistence allowances for members of the Coast Guard officer candidate program, and for other purposes; and

H.R. 7356. An act making appropriations for the Department of the Interior and related agencies for the fiscal year ending September 30, 1983, and for other purposes.

The enrolled bills were subsequently signed by the President pro tempore (Mr. THURMOND).

HOUSE JOINT RESOLUTION REFERRED

The following joint resolution, previously received from the House of Representatives, was read the first and second times, and referred to the Committee on Rules and Administration:

H.J. Res. 636. Joint resolution directing the completion of the Vietnam Veterans Memorial in West Potomac Park in the District of Columbia.

HOUSE CONCURRENT RESOLUTIONS REFERRED

The following concurrent resolutions, previously received from the House of Representatives, were read and referred as indicated:

H. Con. Res. 236. Concurrent resolution to declare March 1, 1983, as "National Day of the Seal"; to the Committee on the Judiciary.

H. Con. Res. 437. Concurrent resolution expressing the sense of the Congress concerning the completion of the Vietnam Veterans Memorial in West Potomac Park in the District of Columbia.

ENROLLED BILLS PRESENTED

The Secretary reported that on December 22, 1982, he had presented to the President of the United States the following enrolled bills and joint resolutions:

S. 625. An act to revise the boundary of Voyageurs National Park in the State of Minnesota;

S. 717. An act for the relief of Carole Joy Maxfield-Raynor and Bruce Sherlock Maxfield-Raynor, wife and husband, and their children Charlton Bruce Maxfield-Raynor and Maxine Anne Maxfield-Raynor;

S. 835. An act for the relief of Jerry L. Crow and Ralph D. and Connie V. Hubbell.

S. 1364. An act for the relief of Jose Ramon Beltron Aivenda Ostler;

S. 1501. An act entitled the "Educational Mining Act of 1982";

S. 1838. An act for the relief of Cesar Noel Jump;

S. 1965. An act to designate certain lands in the Mark Twain National Forest in Missouri, which compromise approximately 6,888 acres, and which are generally depicted on a map entitled "Paddy Creek Wilderness Area" as a component of the National Wilderness Preservation System;

S. 1986. An act to provide for the use and distribution of funds awarded to the Blackfeet and Gros Ventre Tribes of Indians and the Assiniboine Tribe of Fort Belknap Indian Community in certain dockets of the

U.S. Court of Claims and of funds awarded to the Papago Tribe of Arizona in dockets numbered 345 and 102 of the Indian Claims Commission, and for other purposes;

S. 2059. An act to change the coverage of officials and the standards for the appointment of a special prosecutor in the special prosecutor provisions of the Ethics in Government Act of 1978, and for other purposes;

S. 2355. An act to amend the Communications Act of 1934 to provide reasonable access to telephone service for persons with impaired hearing and to enable telephone companies to accommodate persons with other physical disabilities;

S. 2636. An act to amend and extend the Tribally Controlled Community College Assistance Act of 1978, and for other purposes;

S. 2955. An act to establish the Cheaha Wilderness in Talladega National Forest, Ala.;

S. 3103. An act to amend section 1304(e) of title 5, United States Code; and

S.J. Res. 270. Joint resolution to designate 1983 as the "Bicentennial of Air and Space Flight."

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. PERCY (for himself, Mr. PELL, Mr. DIXON, and Mr. RANDOLPH):

S.J. Res. 272. Joint resolution to provide interim appropriation of the revenue for the support of the government; to the Committee on Appropriations.

SUBMISSION OF CONCURRENT AND SENATE RESOLUTIONS

The following concurrent resolutions and Senate resolutions were read, and referred (or acted upon), as indicated:

By Mr. BAKER:

S. Res. 526. Resolution appointing a committee to notify the President concerning the proposed adjournment of the session; considered and agreed to.

By Mr. ROBERT C. BYRD:

S. Res. 527. Resolution authorizing the President of the Senate and the President of the Senate pro tempore to make certain appointments after the sine die adjournment of the present session; considered and agreed to.

By Mr. BAKER:

S. Res. 528. Resolution authorizing the President of the Senate and the President pro tempore of the Senate to sign duly enrolled bills; considered and agreed to;

S. Res. 529. Resolution tendering the thanks of the Senate to the Vice President for the courteous, dignified, and impartial manner in which he has presided over the deliberations of the Senate; considered and agreed to.

By Mr. ROBERT C. BYRD:

S. Res. 530. Resolution tendering the thanks of the Senate to the President pro tempore for the courteous, dignified, and impartial manner in which he has presided over the deliberations of the Senate; considered and agreed to.

By Mr. THURMOND:

S. Res. 531. Resolution to commend the exemplary conduct of the distinguished majority leader; considered and agreed to;

S. Res. 532. Resolution to commend the extraordinary cooperative conduct of the distinguished minority leader; considered and agreed to.

ADDITIONAL STATEMENTS

SENATOR JOHN P. EAST

● Mr. DENTON. Mr. President, during the short time he has been in the Senate, Senator JOHN P. EAST of North Carolina has distinguished himself as one of its most courageous, articulate, scholarly, and effective Members.

Senator EAST has recently introduced the Judicial Reform Act of 1982. It is obviously the product of some of the most serious and painstaking background research which has ever been done in a bill of its kind. The proposal is a thorough, careful, probing analysis and prescription for facilitating a more healthy and constitutionally sound balance between the judiciary and the other coequal branches of our Government. I urge my colleagues to give it their most care consideration.

The Washington Times has discussed this legislation in three editorials in its issues of December 2, 8, and 15. Mr. President, I ask that these editorials be reprinted in the RECORD following my remarks.

The editorials follow:

[From the Washington Times, Dec. 2, 1982]

RESTORING THE CONSTITUTION

Sen. John East has fired the first resounding shot in what promises to be one of the most important congressional battles of the century. A few days before the election recess he introduced the Judicial Reform Act of 1982. This is no half-hearted attempt to redress this or that example of overreaching by the federal courts. The bill's 12 parts propose nothing less than to return the U.S. Constitution to its original "uninterpreted" state.

The several provisions would strip the federal judiciary of the legislative and executive authority it has usurped from Congress and the executive branch. It addresses every issue raised by the irrepressible judicial activism of the last several decades. The fight will be a glorious one.

The proper role of the federal judiciary has been one of the most intensely debated issues in this nation's history. Where, out of political cowardice, Congress has defaulted on its responsibility to resolve difficult and controversial disputes, federal judges have stepped into the vacuum. The result has been that too much of the most important "legislation" of the 20th century has been written, not be elected representatives, but by appointed judges.

Although some parts of the bill overshoot the mark, the Judicial Reform Act gives Congress the opportunity to reassert its unquestioned, if little-used, powers to shape and control the jurisdiction of the federal courts. Led by the Supreme Court, federal judges have redrawn political boundaries taken over school boards, directly interfered in prison administration, punished police by excluding completely reliable evidence, taken religion out of the schools, and even told doctors when they may—and may not—perform abortions. It is the premise of the East bill that Congress could—and should—accept its legislative responsibility to debate and decide these issues itself.

But it is not only Congress that will benefit from once again having the constitutional power the bill would retrieve. State governments will find themselves freed of the large and onerous burden of federal judicial second-guessing which has been grafted onto the Constitution by ever-broader interpretations of the 26 amendments. The powers reserved by the Founding Fathers to the states and to the people will be theirs once more.

Sen. East's legislation also includes provisions which would greatly improve congressional oversight of the federal judiciary, which would make the Supreme Court's membership geographically representative—as it was at the beginning, and which would in other ways reduce the tremendous power of the federal courts.

The Senate Judiciary Subcommittee on Separation of Powers, chaired by Sen. East, will schedule hearings after the 98th Congress convenes in January. We'll have more to say before then.

[From the Washington Times, Dec. 8, 1982]

ABOLISH THE EXCLUSIONARY RULE

Sen. John East's Judicial Reform Act of 1982 proposes to abolish the so-called "exlusionary rule" of evidence. It's about time. The rule bars evidence against a defendant in a criminal trial if the police or the prosecutor violated any constitutional rule or any other law while gathering the evidence. Judges do not—because the Supreme Court has said they may not—consider the value of the evidence when they apply the rule.

As interpreted by the Supreme Court, the Constitution absolutely prohibits a judge from looking at the evidence to determine whether it would have any value for the jury. If the means used to obtain the evidence breached any constitutional rule, then the evidence must be treated as if it had never existed. Obviously guilty defendants have gone free in cases such as these:

Stopping a speeder, the trooper notices something suspicious about the driver's behavior, and demands that the trunk be opened. Inside, he finds a gun with the driver's fingerprints on it. The gun turns out to have been used to murder a bank teller. The court suppressed the gun, keeping its very existence from the jury, because the Constitution, as the Supreme Court reads it, demanded that the officer have more than a "suspicion" to justify searching the trunk.

Because they suspect a businessman in dealing in drugs, detectives get a court order authorizing them to tap his phone. One morning they overhear a telephone conversation between one of the businessman's visitors and someone else; they are discussing their plan to murder an informant. The prosecution of the two plotters for conspiracy to murder collapses when the judge prohibits the use of the tape recording because the court order authorizing the tap didn't mention either of the defendants or indicate that the tap might find evidence of murder plots.

There is nothing in the Constitution that says that improperly obtained evidence must not be used. The exclusionary rule has been developed by the courts in response to the complete failure of the government to prosecute policemen who violate the law in the course of their duties. There are and always have been laws prohibiting the

police from using illegal methods of gathering evidence. Occasionally, overzealous police violated those laws in their desire to catch and convict criminals. Such police violations rarely were punished.

The exclusionary rule has been the judge's answer to the prosecutor's failure to discipline errant police. The courts are saying, "We're going to make it *pointless* for you to break the law; if you do something illegal to get the evidence, we won't let you use it. Period." Prosecutors don't indict wayward police because prosecutors have to work with the police day-in and day-out. And there are some prosecutors whose crusading enthusiasm sometimes leads them to condone or even encourage improper police tactics. Because no one else has taken on the task of making the police obey the law, the judges have imposed the exclusionary rule.

What is needed, obviously, is a way to preserve valuable evidence without giving the police any incentive to violate the law. Any solution must also accept the fact that some police will sometimes break the law and must be punished. The East bill provides such a solution. Under the bill, federal judges will have the power to punish, as a "comtempt of the Constitution," government conduct that breaks constitutional rules. But regardless of whether the rules are broken, the East bill will let the jury see and hear the evidence. And guilty defendants will be convicted.

[From the Washington Times, Dec. 15, 1982]

TOO MUCH HABEAS CORPUS

When a state court convicts a murderer and he loses all his appeals, all the way to the U.S. Supreme Court, they throw him in jail and lose the key, right? Wrong. If he has any brains, or knows a fellow con with some, he heads for the prison library and reads law books while he waits for a federal judge to rule that the procedure used to convict him was incorrect. Then he files a habeas corpus petition in the nearest federal court, and starts the whole legal process all over.

These things happen because the federal courts have expanded the writ of habeas corpus far beyond what the framers of the Constitution intended. Ever since a 1963 Supreme Court decision, state prisoners have had all but unlimited access to the federal courts to air pretty much any complaint they have about the way they were convicted.

Too much of the workload Chief Justice Burger complains about comes from the federal courts' leniency in taking habeas corpus petitions from state prisoners. Too many hours of state lawyers' time are consumed in explaining and justifying the essential fairness of what happened. And sometimes—not often but often enough—fairly convicted prisoners go free because a federal judge second-guesses the way the state judge handled the case, substituting his view of justice for what the other judge did.

Time was when habeas corpus couldn't be invoked unless the state violated its own procedures. That a federal court had different procedures didn't matter. But the feds got impatient with the way some uppity states didn't immediately snap to attention when the federal judges found a new way of doing things. The solution the federal judges found was simple—they started taking habeas petitions as a way of giving federal rights to state prisoners.

What the federal courts seem to have forgotten is that states have rights, too. The court procedures and rules of evidence that Alabama likes may not be Ohio's cup of tea. Wyoming citizens know and understand their ways of doing things even if they're different from what happens in Missouri. The growth of federal habeas jurisdiction threatens to swamp state criminal law in nationally uniform federal rules.

The Judicial Reform Act of 1982, introduced by Sen. John East, will get the federal courts out of the state trial business. The bill proposes to return federal habeas rules to what they were for the first 150 or so years of our history—a way for unfairly convicted people to show that their own state broke its own rules when it convicted them. That's justice.●

A DOCTOR OF FRONTIERS

● Mr. MOYNIHAN. Mr. President, I rise to call to the attention of the Senate a profile that appeared in Monday's New York Times of a wonderfully gifted pioneer of medicine—Dr. Chase N. Peterson.

Those who have followed the altogether heroic struggle of Dr. Barney D. Clark to become the first human to live with an artificial heart know that Dr. Peterson is the spokesman for Dr. Clark and his family and the vice president for health and sciences at the University of Utah.

He is also my former neighbor in Cambridge, Mass. The Petersons and the Moynihans shared many things, including an affiliation with Harvard and, appropriate for this season, a fondness for Christmas caroling through the neighborhood.

I would simply say of my dear friend that seldom has the force of events brought together a moment of history and a man better suited for that moment. Dr. Peterson is a doctor of frontiers—both of medicine and of his native Utah.

He will be best remembered, perhaps, for the events now transpiring in Salt Lake City. But he sould be known, too, for his dedication to his profession; dedication that has often found him carried thousands of miles through the high country to tend to patients, or forced to transmit directions for an operaton by shortwave radio to snowbound surgeons hundreds of miles away.

His frontier is different now for he is at the crest of a new wave in medical history. But his commitment is no different, and his achievement no less spectacular.

Mr. President, I ask that a profile of my cherished friend, from the New York Times of December 20, 1982, be placed at this point in the RECORD so that my colleagues may better know this singularly distinguished man.

The profile follows:

[From the New York Times, Dec. 20, 1982]

WINDOW ON THE HEART PATIENT: CHASE NEBEKER PETERSON

(By Lawrence K. Altman)

SALT LAKE CITY, December 19.—For almost three weeks, Dr. Chase N. Peterson has been the voice of calm in periods of high excitement and repeated crises in the extraordinary story of Dr. Barney B. Clark's struggle to be the first human to live with a permanent artificial heart.

Dr. Peterson's is the articulate voice of a man who dresses in tweeds, wears logger's boots and travels the University of Utah campus by moped.

It is also the voice of a man who has taken on many roles for which his training as a physician gave him no preparation.

His moves from practitioner to administrator have taken him in and out of medicine over the last two decades. Although the challenges have been unusual for a physician, they reflect his heritage as a Mormon, a member of a religion that stresses voluntarism, Dr. Peterson said in an interview.

Dr. Peterson, who will be 53 years old next week, spent 11 years away from medicine, from 1967 to 1978, first as dean of admissions and scholarships at Harvard College, then as vice president of the college for alumni affairs and development.

FRUSTRATED MEDICAL TEACHER

Now, as vice president for health sciences of the University of Utah and coordinator of the artificial heart program, Dr. Peterson is the spokesman for Dr. Clark, his family, and the surgical team.

At a news conference last week, Dr. Peterson described himself as a "frustrated medical teacher" who viewed the artificial heart story as an opportunity to educate the public about medicine.

He has earned high marks from reporters and colleagues for his ability to find cogent analogies and simple terms to describe complicated medical problems, as well as to say "I don't know" when stumped.

For example, in answering questions after Dr. Clark suffered seizures Dec. 7, Dr. Peterson had to deal with complexities of biochemistry and the possibility that the seizures had been brought on when too much of some vital substance had been washed from Dr. Clark's body by speeding up his heart and giving him diuretics. Dr. Peterson described this possibility as a "leaching process."

"That description might not be acceptable for a medical textbook, but it gets the point across," he said.

AN OCCASIONAL FUMBLE

Dr. Peterson does often ramble in answering questions, and occasionally he has fumbled.

When asked about the nutrition that Dr. Clark was receiving by feeding tube, Dr. Peterson described it as chicken soup. When skeptical reporters asked him if he really meant chicken soup, he said yes.

The next day, a chagrined Dr. Peterson apologized publicly to the hospital's nutritionists, saying that he was using the soup as an analogy.

Whenever a medical team finds itself in the spotlight because of some outstanding achievement, it becomes vulnerable to charges of grandstanding from the outside. Perhaps as a reflection of those pressures, Dr. Peterson stunned reporters last Monday by saying he would curtail the information given in future news conferences and by inviting them to go home.

He spoke at a time when the revovery of Dr. Clark, a dentist, was proceeding slowly and when Dr. Peterson was maintaining that Dr. Clark was just any postoperative patient.

The next day, however, Dr. Clark was rushed back to surgery because a valve broke in the artificial heart. Even more reporters arrived. Dr. Peterson invited them all to stay.

HARVARD AND YALE TRAINING

Chase Nebeker Peterson was born Dec. 27, 1929, in Logan, Utah. He went East for his education at the Middlesex School in Concord, Mass., and at Harvard where he was an undergraduate and earned his medical degree.

After further training in internal medicine and metabolism at Yale, Dr. Peterson returned to practice at the Salt Lake Clinic, to head medical education at the LDS Hospital, and to teach at the University of Utah here.

By this time, he had married Ane Grethe Ballif, a Utah native he met at Harvard. They have three children.

One day in 1967, while Dr. Peterson was examining a patient, he excused himself to take a call from Fred Glimp, a Harvard official. Would Dr. Peterson, who had recommended some high school students for entrance, become dean of admissions at Harvard College? Dr. Peterson declined at first, then accepted when the clinic granted him a leave.

What role might Dr. Peterson tackle next? He shrugged his shoulders and said perhaps a tour of duty as a Mormon missionary in Bolivia.

Perhaps politics. In 1981, only three years after he returned to Utah, Dr. Peterson's name was mentioned in Democratic circles as a potentially attractive nominee for the United States Senate.●

CLARIFICATION OF H.R. 7159—AMENDMENT TO THE CLEAN WATER ACT

● Mr. STAFFORD. Mr. President, it has come to my attention that there may be some uncertainty regarding the meaning of certain language contained in H.R. 7159, which was passed by both Houses of the Congress a few days ago.

H.R. 7159 allows certain relief from the requirements of the Clean Water Act for two pulpmills and papermills in California. One condition of this relief is the following:

(G) the applicant accepts as a condition of the permit a contractural obligation to use funds in the amount required (but not less than $250,000 per year for ten years) for research and development of water pollution control technology, including but not limited to closed cycle technology;

The question which now arises is, What exactly is the meaning of the term, "amount required?" It does not mean the amount which the Administrator determines, in her discretion, to be appropriate. In the view of this Senator, who authored the original version of the amendment, it means that amount which is necessary to support the research program established by the subparagraph.

This condition, as adopted by the House, is an evolved product of an amendment which this Senator originally offered during consideration of H.R. 7159 by the Committee on Environment and Public Works.

This original amendment read as follows:

(D) the applicant accepts as a condition to the permit a contractural obligation to use funds in an amount approximately equal to the costs of operation and maintenance of the treatment facility avoided through such modification, to be used for research and develpment of closed-cycle technology involving no discharge of pollutants at such facility;

Thus, the first version of the amendment would have required the full amount of the savings to be invested in the development of closed-cycle technology. Some objected to this version, however, on the grounds that the savings of the two plants might exceed the amount required to develop closed-cycle systems. The two plants should not be required to spend money merely for the sake of spending money, opponents said.

This Senator agreed that this was a legitimate criticism and modified his amendment. The second version read as follows:

(D) the applicant accepts as a condition to the permit a contractual obligation to use funds in the amount required (but not to exceed the amount approximately equal to the costs of operation and maintenance of the treatment facility avoided through such modification) for research and development of closed-cycle technology involving no discharge of pollutants at the same or similar facilities;

This is the first time the term "amount required" appears. It is clear from the context that the research and development program was to be fully supported, but an applicant would not be required to spend more than was actually necessary for its support.

During committee consideration, the amendment was revised, yet again, thus producing a third version. The term "amount required" was maintained, but a limit of $250,000 per applicant was imposed. In addition, the permissable uses of applicant's funds were expanded to include water pollution control technology, generally. While support of projects other than the development of closed cycle was discretionary, support of the first objective of the program—development of a pollution-free manufacturing process—was not. The research program was required to include one element, if no other. That one mandatory element was development of closed-cycle technology. And it had to be supported in "the amount required" to assure its development, except that a ceiling of $250,000 per applicant per year was imposed.

Thus, the version approved by the committee and reported to the Senate read as follows:

(G) the applicant accepts as a condition to the permit a contractural obligation to use funds in the amount required (but not to exceed $250,000 per year for ten years) for research and development of water pollution control technology, including but not limited to closed cycle technology;

In the Senate, however, this provision had to be amended yet again for passage of the bill to be obtained. One of the two amendments adopted by the full Senate deleted "to exceed" and substituted "less than," but still retained the term "amount required." In effect, the $250,000 ceiling imposed by the committee became a $250,000 floor. Thus, an applicant is now required to commit "the amount required"—that is the sum necessary to adequately support the research and development program—but in no event less than $250,000 per year.

It was in this form that the bill was adopted by the House and, if signed by the President, will become law. And, while this Senator objected to the bill, it will provide the basis for taking steps toward pollution-free technology for this industry. It also makes it clear that there is no cost-free relief from our environmental laws.●

LITTLE ROCK, ARK.

● Mr. PRYOR. Mr. President, those of us from Arkansas have known for a long time that Little Rock is among the best cities in this country and the world. It has all the assets, and none of the liabilities, that a true American town should have: Friendly people, access to transportation, a fine educational system, every possible recreational advantage.

What encourages me is that people throughout the country are beginning to see firsthand the distinct assets Little Rock has to offer. One of the recent expressions of this view is published in the January issue of Esquire magazine, written by Little Rock writer Gene Lyons.

I have known Gene Lyons for a number of years. His wife was on my staff when I was Governor of Arkansas. They are both splendid people in every way, and I think that what Gene Lyons has said about Little Rock should be read by every Member of the Senate.

I ask that this article be printed in the RECORD.

The article follows:

[From Esquire, January 1983]

LITTLE ROCK, ARK.: WHY I LIVE WHERE I LIVE

(By Gene Lyons)

Why Little Rock? Most people who ask don't really want to know. "Why on earth?" or "Why, of all places?" is the way I'm usually asked. To such inquiries I've learned to give the shortest and least provocative of answers: my wife was raised here. That usually does it.

But moving to Arkansas wasn't her idea. Let's put it this way: due to the circumstances of my birth and upbringing, as they say in eighteenth-century novels, I needed to invent a place to live. Mine is a simple tale of dislocation, very typical of my generation—the one born around World War II.

I was raised in New Jersey, a dense and very particular place to the sturdy Irish Catholic peasant clan I come from, but an unplace, at best a place between places, to me. First Elizabeth, a decaying industrial port city; then, when I was on the edge of adolescence, my family joined the great postwar migration to Beaver Cleaver country, buying a large, four-apartment investment of a home in the only tacky neighborhood of a suburb fifteen or so miles inland. As far as our relatives in Elizabeth were concerned, it might as well have been Utah. We quit seeing them except on ceremonial occasions, which became fewer in number each year. We also quit going to church every Sunday. My father had to work and my mother couldn't drive. There went the faith of generations. Religious and ethnic bias, along with class envy, prevented my parents from making any effort at all in the suburbs. So strong was their sense of who and what they were, it never seemed to have occurred to them that in such circumstances their *children's* sense of who and what *they* were would fade. An orphan of ethnicity and place, I needed to invent a place to live. Many Americans don't feel the need, but I did.

It didn't have to be Arkansas, but that's how it worked out. I found its backwardness appealing. Arkansas leads the nation in the production of chickens and rice; all the other numbers by which demographers and journalists purport to measure the quality of life are embarrassing. We sit at or near the bottom of the states in per capita income, literacy rate, quality of housing, teacher salaries, and number of physicians, libraries, and museums, and we lead the rest in the incidence of venereal disease and unwed teenage mothers. We rank forty-eighth in the payment of state and local taxes, yet the electorate clamors for cuts. You will hear liberals—we still have them—say, "Thank God for Mississippi," because our neighbor to the east totes up even lower in some categories than we do and has even worse image problems. But Mississippians reverse the compliment. I'm told, and call a plastic hose for stealing gasoline an Arkansas credit card. A few years ago when a local women's group made some noise about Memphis and Little Rock running one-two as the statistical rape capitals of the United States, a city director opined that we just have prettier girls than anywhere else. He has since been reelected. Arkansas is never mentioned on the network news unless something awful or embarrassing has happened.

Arkansas is the smallest state west of the Mississippi in land area but comprises several distinct geographical regions—from the Ozark and Ouachita mountains, thickly forested, sparsely populated, and running with white-water streams, to the cedar-filled bayous of the south and east, shallow, murky, and inhabited by water moccasins and alligators.

Although Arkansas was part of the Confederacy, only the plantation country near the Mississippi was fully settled at the time of the Civil War. The rest was—and, some would argue, still is—a frontier. Certainly nobody ever talks about the wonderful antebellum days, and the very idea of an Arkansas aristocracy is preposterous. Indeed, until I just wrote the phrase, I'd never heard it. What you will hear is that a man "has enough money to burn a wet mule" or that a woman is "so ugly she'd make a freight train take a dirt road." My wife is a city girl in a place where the words *city* and *country* are used to describe entities as different as the sun and the moon, but she has been known to refuse a second helping because she was "full as a tick."

Little Rock—the capital, business and financial center, rail and highway pivot, and only real city—sits on the Arkansas River almost exactly in the middle of the state, just where, as if it had been arranged by committee, the hills meet the flatlands. For a variety of cultural and historical reasons, we missed out on most of the great Sun Belt boom, and Little Rock remains as strongly flavored and provincial as it is possible for a contemporary American city to be, fancying itself the center of nothing more than the state of Arkansas. And that's a whole lot easier on the mind and spirit, I'm here to tell you, that being the imaginary hub of whatever metaphorical wheel you choose, whether it's the Free World. Art and Literature, or just Texas. In fact, living here is something like living in the capital of a remote and insignificant country. Arkansans are proud and touchy, resentful of condescending outsiders, yet bitterly self-critical. Just a little bit, in fact, like Irish Catholics. Yet provincialism confers a certain wisdom: most of us know that beyond a point achieved by almost everybody in North America, numbers have nothing at all to do with the sum of human happiness.

In Arkansas, anonymity is not one of your big problems. Not everybody knows everybody else, but it sometimes seems that way. We are not surprised to pick up the morning paper and read a story by someone we know about somebody else we know. (Little Rock has an excellent locally owned newspaper, *The Arkansas Gazette.*) For one who grew up near New York, the effect is like inhabiting an endless Victorian novel. You can feel like a bit of an insider without having to work at it. The city has roughly four hundred thousand citizens living in and around it, and the state about two million, so it isn't exactly village life, but a reasonably gregarious person who has been here a few years rarely meets someone with whom he hasn't a few acquaintances in common. The gossip is fantastic.

Little Rock is big enough to have all but the most esoteric professions and jobs represented but too small to permit tribalism. I commune at intervals with an obstetrician, several tennis pros, schoolteachers, a few varieties of lawyers, nurses, electricians, insurance salesmen, travel agents, a farm-equipment salesman, an architect or two, several housewives, shopkeepers, a couple of basketball coaches, waitresses, cops, a toxicologist, an economist, public-relations people, quite a few bureaucrats, at least one egg mogul, contractors, television and radio newspersons, restaurateurs, a judge, politicians . . . well, you get the picture. I could spend thousands of words detailing the familial and known or suspected sexual relationships among the above. Living in Arkansas, as a matter of fact, has spoiled my taste for the emptiness-and-sterility, grotesques-and-fools version of American culture served up by so many of our novelists. When you have a friend who works off tension by shooting baskets in his driveway while listening to cassette recordings of radio evangelists, you quit thinking categorically and lace up your sneakers.

Because gatherings of any size where one can be sure of meeting only persons of one's own tribe and world view are rare, civility tends to take precedence over free-spokenness among everyone but the most far-gone adepts of what is now called the Moral Majority, which has been regnant here under one name or another since territorial days without effecting a visible diminution of free-lance sin. Little Rock may not strike you as Sin City, but when the state legislature hits town from such rustic venues as Oil Trough, Fifty-Six, and Smackover, they tend to carry on like sailors landing in Singapore after six months at sea. When they are not passing resolutions in praise of Christianity, you understand.

Piety, moreover, goes only so far. Even heretics are admired if they have character and grit. My favorite example of this tendency was the general election of 1968, in which Arkansas elected liberal Republican Winthrop Rockefeller governor, reelected iconoclastic Democrat J. William Fulbright to the Senate at the height of the Vietnam War and gave George Wallace its Presidential vote. The only clear pattern that emerges is that each was seen as his own man. It also helped that latter two were from separate directions giving hell to Lyndon Baines Johnson, a prominent Texan of the era. We don't have much use for Texans here.

I love Little Rock too because the choices I've had to make are not so dramatic as they would be in New York, Washington, Los Angeles, or Boston. Comfort costs a lot less: in buying some I have not had to remove myself physically and, therefore, imaginatively from people who have less. My home is on a quiet street of fifty-year-old two-story houses between the state capitol and the University of Arkansas Medical Center. It is large and roomy, permitting me to work at home even when my two noisy boys are out of school. It costs $383 a month, taxes included. For a writer, that means freedom. My wife can drive to her job in less than five minutes. I can pedal my bike to the public tennis courts in ten minutes. There are two stadiums in the same park, one where the Razorback football team plays four or five times a year and the other for the Arkansas Travelers, a Class AA farm club of the St. Louis Cardinals. It's not the major leagues, but then neither are the ticket prices and parking problems.

My boys attend public schools—black majority, incidentally—to which they walk, as do all the other children in their classes. Little Rock schools, having had a longer history of intergration than anywhere else in the South, are totally integrated all over, but here in the middle of town, buses are not needed. The boys will attend the famous Little Rock Central High School. Whether they stay or leave, they will grow up knowing where home is and what it is. Right now they hang out at a local Boys' Club where two of Little Rock's and their and my athletic heroes played ahead of them: Brooks Robinson and Sidney Moncrief. Arkansas being Arkansas, they have something more than an imaginative relationship with both. My father-in-law coached Brooks and the families were close; when Moncrief played basketball for Arkansas (he's with the Milwaukee Bucks now), I wrote something about him that he liked, and he has been kind enough to remember my sons' names.

I love Little Rock because I can put a flatboat into the Arkansas River inside the city limits and enjoy freshwater fishing that is the equal of any in the United States, or

into any of a dozen beautiful, forest-ringed lakes within an hour's drive. I can load up four beagles and go rabbit hunting with old friends in soybean and rice fields in the Delta flatlands, little more than a half hour away, or leave town to the west and be so far gone into the hills that what few settlements one comes across seem frozen in time somewhere in the late Forties. I even like the climate—tornadoes, floods, and maddening heat waves notwithstanding. I'm not sure I could have survived here before air conditioning any more than I'd have been able to stand the social climate back in the bad old days before segregation was laid to rest, but I do like the sense of living in a place where the urban-rural balance is tilted toward the country. The weather means something, you see. I know they need rain out here a whole lot worse than I need to play tennis.

My work takes me away a lot and I get this funny feeling whenever I've been out of town for a while and find myself in an airplane approaching Little Rock. I look out at the Delta or the Ozarks, depending upon which direction the flight is coming from, and remember how strange it all seemed in 1966, when I first drove out here from the East to court my wife. Then, as the plane banks to approach the Little Rock airport, I am often reminded of those idealized American cities depicted patriotically in the Dick and Jane readers of my childhood. See, out there to the west are the hills and woods. A big, wide river comes cranking down the middle, and near the tall buildings downtown where Daddy works are the bridges where people cross the river. Look, there's the railroad yard and the airport! You can see factories, War Memorial Stadium, the hospitals, and Central High. The houses are smaller on the other side of downtown from where you stay, because that's where the poorer people live. East of town the land is flat and there are lots of farms and the river goes down the middle to the Mississippi. Everything is just about the right size and you can see it all at once and wonder about why things are the way they are. It's not the center of the world, or even a very important place, as places go, but it's the center of my world, and it feels like home.●

HOMER FERGUSON

● Mr. LEVIN. Mr. President, I bring to the attention of my colleagues the recent passing of former Ambassador and U.S. Senator, Homer Ferguson. Senator Ferguson served Michigan in the Senate with great distinction from 1943 to 1955. He is remembered as having been an outspoken and dedicated member of the Senate Foreign Relations and Appropriations Committees.

Prior to his 12 years in the Senate, Ferguson served as a circuit court judge for Michigan's Wayne County and was a faculty member of the Detroit College of Law.

Upon leaving the Senate in 1955, Homer Ferguson served as the U.S. Ambassador to the Philippines. A year later, he was named to the Court of Military Appeals. While practicing law, I had the honor of appearing before Judge Ferguson. I was greatly impressed by the fairness in which he presided over the Court of Military Appeals.

Homer Ferguson will be remembered as having served his State and his country honorably and well. I ask you to join me in extending our deepest sympathies to his widow, Myrtle Jones Ferguson, and the other members of his family.●

DEATH OF NAT FINNEY

● Mr. MOYNIHAN. Mr. President, only late yesterday did we learn that Nat S. Finney, a singularly distinguished journalist and the former chief of the Washington Bureau of the Buffalo News, died here in Washington.

He was a journalists' journalist—a man of impeccable objectivity with a knack for finding things out that frequently lay buried beneath the layers of official Washington. Thus it was he who reportedly broke the story that the Soviets were installing missiles in Cuba, the first report of what the world would come to know during 1962 as the Cuban missile crisis.

In 1948, Nat Finney earned journalism's highest distinction, for a series of articles on efforts by the Truman administration to impose censorship curbs on Federal civilian employees—a series that led to Mr. Finney's Pulitzer Prize for national affairs reporting.

He was known to all of the Washington press corps—especially those assigned to cover New York matters—and I would hope that the Senate would join them, and indeed all who cherish his skill, in mourning his loss.

Mr. President, I ask that an obituary from today's Buffalo News—the paper which Nat Finney served so well—and the New York Times, be printed at this point in the RECORD:

The material follows:

[From the Buffalo News, Dec. 21, 1982]

NAT FINNEY, 79, DIES; NEWS BUREAU CHIEF WAS PULITZER WINNER

WASHINGTON.—Nat S. Finney, 79, a Pulitzer Prize-winning journalist and former chief of the Buffalo News Washington Bureau, died Sunday (Dec. 19, 1982) in George Washington University Hospital here.

Mr. Finney joined The News staff in 1953 as Washington bureau chief and retired from the post in 1968.

Mr. Finney was reportedly the first newsman to reveal—on Aug. 26, 1962—that the Soviets were installing missiles in Cuba, information that led to the Cuban Missile crisis. The story was reprinted widely throughout the country.

A native of Stewartville, Minn., Mr. Finney received his bachelor's degree in political science from the Universtiy of Minnesota. He was a reporter for the Minneapolis Star in 1924-25 and again in 1928-29. From 1930 to 1933, he edited trade publications in Chicago, New York and New Orleans and then returned again to the Minneapolis Star as a reporter.

He served in the Washington Bureau of the jointly owned Minneapolis Star and Tribune and Des Moines Register and Tribune from 1941 to 1946, when he became manager of the bureau.

In 1948, he was awarded the Pulitzer Prize for outstanding national affairs reporting for his stories describing a Truman administation plan to impose censorship on ordinary activities of federal civilian agencies in peacetime.

That same year he received the Raymond Clapper Memorial Award for outstanding Washington reporting, and in 1949 Norway awarded him the St. Olaf Medal.

In 1950, Mr. Finney returned to the Star as editorial page editor, a position he held until selected for the Buffalo Evening News bureau chief's post in Washington.

In addition to his Washington reporting for the News, Mr. Finney covered assignments throughout the world for the newspaper, including a trip to France with President Eisenhower and a Vietnam journey with President Johnson.

While accompanying Vice President Nixon to the Soviet Union, Mr. Finney and two other reporters were held by secret police for two hours before he was released thanks to the interruption of Mr. Nixon.

Mr. Finney was inducted into the Hall of Fame of the journalistic society, Signa Delta Chi, in 1973.

In 1967, Mr. Finney realized the crowning achievement for a Washington correspondent—election to the presidency of the Gridiron Club, a prestigious 114-year-old organization limited to 50 Washington newsmen.

After his retirement, Mr. Finney continued to write for the News as a contributing editor.

His wife of 41 years, the former Flora Edwards, died in 1971. Mr. Finney later lived for a short period in Mexico, then returned to the capital area.

Lucian C. Warren, who succeeded Mr. Finney as News Washington Bureau chief, remembers Mr. Finney as "a very able journalist" and "a very fine man" whose winning of the Pulitzer and Clapper awards demonstrated his unique ability.

Mr. Finney is survived by a brother, Ross Lee Finney, Jr., of New York City.

A memorial service is scheduled for Jan. 10 in Washington.

[From the New York Times, Dec. 22, 1982]

NAT S. FINNEY, EX-REPORTER, WON PULITZER IN JOURNALISM

Nat S. Finney, a Pulitzer Prize winning reporter and former Washington, D.C. bureau chief for The Buffalo Evening News, died last Saturday in Washington after a brief illness. He was 79 years old.

In 1948, while working in Washington for The Minneapolis Tribune, Mr. Finney won his Pultizer for outstanding national affairs reporting for his description of the Truman Administration's efforts to impose secrecy on the affairs of Fedeal civilian agencies in peacetime.

A native of Stewartsville, Minn., Mr. Finney went to Washington in 1941 as a correspondent for The Tribune and Look magazine. In 1950, he returned to Minneapolis to become an editorial page writer for The Minneapolis Star.

He joined The Buffalo Evening News in 1953 as a correspondent in Washington, where he worked until his retirement in 1968.

A specialist on economic affairs and atomic energy, Mr. Finney was one of the first reporters admitted to Los Alamos Laboratory in 1945. He also covered the atomic tests at Bikini in the South Pacific in 1946.

Mr. Finney is survived by a brother, Ross Lee Finney, Jr. of Manhattan.●

EDUCATION AND HIGH-TECHNOLOGY

● Mr. GRASSLEY. Mr. President, the changing face of American industry, and the accelerated rate of technological change, are effecting significant reforms in the curriculum of the Nation's universities.

An active partnership is developing between universities and industries, partly for financial reasons, and partly to adapt to changing times.

In today's fast-paced technological environment, university equipment and facilities have become obsolete, while the feverish advancement has made it impossible for industry's managers to keep up with the changes in their fields. It has become necessary for education to occur closer to the source of production and service. The marriage, then, is a natural one.

Just last week I introduced legislation to spur community colleges and vocational training schools to train and retrain workers for increasing technical jobs. That legislation provides incentives and opportunities for modernizing state-of-the-art technological equipment for learning centers, for improving the expertise of their faculty, and for encouraging more direct contact between learning centers and industry.

Mr. President, an article entitled "Business and Universities: A New Partnership" appeared in last week's issue of Business Week magazine. It describes the cooperation taking place between universities and business, and the reasons why such a union is occurring. I ask that this article be reprinted in the RECORD.

The article follows:

BUSINESS AND UNIVERSITIES: A NEW PARTNERSHIP

After two decades of keeping each other at arm's length, business and universities are forging a powerful new alliance. What leaders both in the boardroom and on campus call "an active partnership" is aimed at stimulating U.S. innovation and productivity. "The marriage is fundamental to keeping U.S. companies competitve," says David McLaughlin, president of Dartmouth College and a former president of Toro Co.

So important is the new linkup that leaders such as Frank H. T. Rhodes, president of Cornell University, see a parallel with the 19th-century partnership between universities and government in agriculture that made the U.S. the granary of the world. "The results of those programs were spectacular. The same type of program in engineering and high technology could accomplish the same thing now," Rhodes predicts.

Business will pour more than $1 billion into the universities this year. It is funding more research on campus than ever before (page 61), lending its experts to teach courses, and helping colleges shape the education of students that it will eventually hire. Universities, in turn, are actively soliciting research funds and are reaching out with new educational services tailored specifically for business. "We have set out to educate in fields of importance to American industry—improving quality and productivity," declares George M. Low, a former National Aeronautics & Space Administration official who is now president of Rensselaer Polytechnic Institute.

CAUGHT IN A SQUEEZE

Both sides are motivated by urgent needs. Industry has seen its technological base erode in the face of intensifying foreign competition. And it is turning to universities both as a source of research talent and future employees. Says Arnold F. Kanarick, vice-president for human resources at Honeywell Inc.: "The rate of technological change behooves us to make these connections." The universities are caught in a financial squeeze that is being intensified by dwindling enrollments and cutbacks in federal support to education. Such shortfalls already have left many schools with badly outdated research laboratories and the inability to pay faculty salaries that are competitive with those in industry.

But the new partnership is also creating a deepening controversy. Some educators are concerned that the joint effort will turn the nation's universities into trade schools and that the growing emphasis on technology will come at the expense of the arts and humanities. Even the scientists are worried. They fear that the price of business involvement on campus will be a shift away from fundamental research to product-related development.

An increasing number of university administrators, however, are willing to take their chances with business, because the long-range financial outlook is so bleak. The college-age population will decline 15% by 1990. By then, older students will make up nearly half of the college population, forcing schools to offer different educational services to meet their needs. And small liberal arts colleges that get as much as 80% of their revenues from tuition and that do not have the experience or the resources to develop new markets will be hard pressed to survive. These small colleges already are losing students, and experts predict that as many as 300 of the nation's 1,250 private colleges may close their doors by the end of the decade. "Those colleges that don't have anything distinctive to offer will die," predicts Howard R. Swearer, president of Brown University.

This developing crisis on campus is forcing more and more schools to tighten their management practices. "Basically, we're getting more businesslike," explains Ross J. Pritchard, chancellor of the University of Denver. Hard-nosed management, in fact, has already bailed out some of the failing schools. When George Bugliarello took over in 1973 as president at Polytechnic Institute of New York, the school had fallen deeply in debt. "Polytechnic, like most universities then, did not have a very strong system of financial management," he recalls. "It was working on hope."

Bugliarello quickly instituted a fundraising effort, invested in short-term notes, solicited cooperative research with local industry, focused the school's curriculum on specific areas of academic strength, and, by 1977, had balanced the budget. "We started looking at every operation in terms of profits and losses," he says. His aggressive policies have been so successful that at the end of fiscal 1982, the school's operating budget contained a hefty surplus of $922,000—more than enough to wipe out the last remnant of debt.

The key to profitability for many schools is to position themselves as a major technological resource. In the six years since RPI's Low took over the respected but aging engineering school in Troy, N.Y., he has set up a number of creative programs aimed at serving existing industry and nurturing new high-technology companies in his area. Low's most recent coup was extracting $30 million from New York's legislature to construct a building to house a regional center for industrial innovation. With industry participation, it will carry out research and development in manufacturing productivity, computer graphics, and microelectronics. That center, like similar projects proposed in a number of other states, will concentrate on "whatever is at the forefront of innovation," says Low.

At the same time, schools are competing fiercely to set up industry-funded research centers on their campuses. Such efforts are already combining academic and industry talent in cutting-edge technologies, ranging from a microelectronics institute at Stanford University to a robotics center at Carnegie-Mellon University. A two-year-old collaborative project in robotics between Emhart Corp. and Worcester Polytechnic Institute has already paid dividends on its $1.5 million investment in equipment and management time. Students under the direction of faculty and Emhart managers have designed three robotics systems for the company.

Growing numbers of universities want to set up research parks near their campuses. They hope to duplicate the business-university cross-fertilization that spawned Northern California's Silicon Valley and Boston's high-tech concentration on Route 128. Princeton University's Forrestal Center is a good example of one of the more successful recent projects. Universities are visiting the center at the rate of one or two a month with the idea of launching their own centers. Says Robert Wolfe, project manager of the center: "Every school that has a piece of land thinks it's going to be a millionaire."

While universities try to lure business to the campus, faculty members are going off campus to form their own ties with business. They are serving as consultants and scientific advisers to large companies and as founders of their own ventures. "It provides an opportunity to react competitively with your peer counterparts and follow your technology into the marketplace," says Arden L. Bement Jr., vice-president for technical resources at TRW Inc. And, in some cases, the professors are bringing their businesses right on campus. At Kansas Wesleyan College, Thomas E. Duell, assistant professor of computer science, runs his own software company from the college department.

Such outside connections are not new, but abundant venture capital for high-technology startups has created a new breed of millionaire academic. Herbert W. Boyer, a University of California professor who is one of the pioneers in biotechnology, suddenly became worth $32 million when Genentech Inc., a South San Francisco gene-splicing company he helped found, went public with great ballyhoo in 1980.

Not all academics are rushing out to trade their mortar boards for pin-striped suits, however. But many increasingly are taking furloughs from teaching and research to gain business experience that they can bring back to the classroom. As part of a

faculty leave program at the Columbia University Business School, for example, James H. Scott, Jr., professor of finance, did six-month stints at both Goldman, Sachs & Co. and McKinsey & Co.

Another side of the new alliance is the more prominent role that business is playing in influencing what students are being taught. "Universities are giving industry a more active role in defining the qualifications and quality of students they are turning out," says TRW's Bement. At Eastern Michigan University, an industry advisory board helps to develop and evaluate all courses in the College of Technology. That group has already created four new undergraduate majors. "It's their program as much as it is ours," says Jeffrey T. Luftig, head of the school's department of industrial technology.

The universities are increasingly turning to industry to supply part-time professors and tapping executives to advise them on curriculums. One such executive is Richard B. Palmer, a former president of Texaco Canada Inc., who two years ago became the Duke University School of Business' first executive in residence. His task is to bring a more practical bent to Duke's MBA program. Although Palmer says that the school's faculty is still wary of him, business people "look to me for reassurance that what is being taught is pertinent to what is going on."

As a result of such efforts as Palmer's, Columbia, Carnegie-Mellon, and other schools have overhauled their MBA programs to include more courses in operations management that attack issues in manufacturing productivity. Other universities such as Northeastern have created specialized MBA programs to train executives in the new skills that they need to manage in a high-technology environment. And the University of California at Los Angeles has fashioned an information management MBA that teaches students how to manage a company when all of its corporate data are stored in a computer.

Business is also spending more money to help universities set up new programs. International Business Machines Corp. recently announced that it would donate $50 million to the five schools that come up with the best proposals for manufacturing engineering programs. At the University of Massachusetts' Amherst campus, a group of computer makers based in Massachusetts donated $2 million worth of computer equipment to create a computer science major for undergraduates. "We can't take our manpower for granted. If we do, we run the risk of finding ourselves with a work force that is inadequate or obsolete," explains Ray Stata, president of Analog Devices Inc.

Continuing education and the "retreading" of employees is turning into a growth industry. And the competition between the schools for students has grown intense. "We're marketing continuing education the way that you market toothpaste," says Roger W. Staehle, dean of the University of Minnesota's Institute of Technology.

Some schools, in fact, are bringing their classrooms directly to corporate headquarters. One "college without walls," Wor-Wic Tech Community College in Salisbury, Md., teaches its 1,500 students on the job and in nearby leased buildings.

AN UNEASY ALLIANCE

Many academics see continuing education as a future requirement in the training of managers and technical employees. They argue that the increasing pace of technological change has made it all but impossible for graduates to stay current in their profession throughout their careers. "Management today needs a lifetime of education, and universities should be on the cutting edge of providing that," says Thompson F. Keller, dean of the Duke University School of Business.

To meet that need, business schools such as UCLA's, Duke's, and Columbia's already are planning expanded programs. And a lifelong education scheme for engineers, which was proposed in October by faculty at the Massachusetts Institute of Technology, could become a model for other professions. It calls for industry, university, and professional societies to cooperate in a structured program of lifelong education that combines campus coursework, work experience, and on-the-job refresher courses.

For all the activity, the partnership between business and the universities is still an uneasy one. Growing faculty and university involvement with commercial ventures poses prickly issues of conflict within the academic community that "could fractionate research and research training to the extent that it could be detrimental to universities and students," says Donald Kennedy, president of Stanford.

Those potential problems continue to be the subject of a lively debate on the campus. Last summer, Kennedy and the presidents of several other major universities met in Pajaro Dunes, Calif., to develop guidelines for industrial-university interactions. But because the issues are so complex, no firm conclusions were reached. Now another meeting has been scheduled for mid-December at the University of Pennsylvania. "The key question has to do with industry control; very few schools have developed internal policy yet," says Peter W. Likins, president of Lehigh University.

"Some of the early research arrangements did not retain enough independence for universities," declared Rhodes of Cornell. MIT has been criticized for accepting $100 million to set up the Whitehead Institute of Biological Sciences, because its employees would also be granted professorships. A $23.5 million grant from Monsanto Co. to Washington University for microbiology research was hailed as a model for future agreements by the university but was criticized in academic circles because Monsanto retains exclusive patent rights and because a committee of eight scientists, four from the company, choose and monitor specific research projects. "That is far too close control for my taste," delcares one academic.

Some schools already are taking a hard line over the business dealings of their professors. Earlier this year, Harvard University dropped plans to buy stock in a company that was started by two of its professors. And the school asked Nobel prizewinner Walter Gilbert to choose between the professorship and Biogen, a biotechnology company that he founded in 1979. Gilbert gave up his professorship and is now chairman of the Swiss-based company.

The rush of universities into high tech is also raising concern in the humanities faculties. Liberal arts educators are alarmed at the deep cuts being made in their programs and at what they call the increasingly utilitarian emphasis of education. "There is great pressure to push funds in the direction of high technology," concedes Arnold R. Weber, president of the University of Colorado. "It's difficult to retain a commitment to the humanities at a time when the hot ticket is science and technology."

For now, at least, the potential gains seem worth the risks to both sides. "We're letting these partnerships go on in an act of faith that they will have significant value in the long haul," says Howard A. Schneiderman, vice-president for research at Monsanto. And if history repeats itself, the confidence on both sides in their ability to negotiate compromises without endangering the interests of either party will be justified. In the past, universities have weathered the threat of control and dominance from the church, then the state and federal government. Says James L. Miller, professor in the center for the study of higher education at the University of Michigan: "The new partnership illustrate the pragmatic ability of higher education and industry to adapt to changing times."●

FAILURE TO ENACT THE BANKRUPTCY IMPROVEMENTS ACT

● Mr. PRYOR. Mr. President, I felt compelled to speak today to express my concern about the Senate's failure to take final action on S. 2000, the Bankruptcy Improvements Act. I find it particularly regrettable in light of the support which has been expressed by Members of both Houses of Congress.

This much-needed legislation was drafted to address the problems which arose following the enactment of the 1978 Bankruptcy Reform Act. It is a comprehensive bill which is the product of extensive hearings and consultations with individuals involved with all aspects of bankruptcy. It seeks to restore balance to our Bankruptcy Code by allowing good faith creditors to recover lawful claims and also protect the interests of those in legitimate financial distress.

As pointed out by the Judiciary Committee, while many provisions of the revised Bankruptcy Code have had beneficial results, certain changes which were enacted have disrupted the delicate balance between debtors and creditors. The effects of these changes on those in the banking and business communities have been devastating.

Many representatives of the banking and business communities in my State of Arkansas have shared with me their first-hand experiences; and I am sure that my colleagues have had similar conversations. The problems which are being experienced are real and need to be rectified.

Earlier this year I urged expeditious action by the Judiciary Committee to provide this much needed relief. The committee in its wisdom approved this important legislation and forwarded it to the full Senate. However, we now find that it will not be possible for the Senate to take action on this important legislation before the close of this session of Congress. It is my hope that similar legislation will be given priority in the upcoming Congress. It de-

serves our consideration and merits our approval.●

REAGAN TAX CUTS SIMPLY DON'T EXIST

● Mr. EAST. Mr. President, there was an interesting article in the Washington Times of yesterday entitled "Reagan Tax Cuts Simply Don't Exist" and although I do not necessarily agree with every aspect of the article, I do think several of the observations made in it are worthy of the attention of the Senate and of the public.

With that in mind I ask that the article be printed in full in the RECORD.

The article follows:

JOHN LOFTON'S JOURNAL: REAGAN TAX CUTS SIMPLY DON'T EXIST

A front-page story in the Wall Street Journal says that President Reagan's economic program has become "a nightmare of unemployment and bankruptcy for many Americans—and a growing liability for the Republican Party." The Journal reports that Treasury Secretary Don Regan admits expecting too much too soon from the "tax cuts" effective so far. And one Journal headline asks: "Were the Tax Cuts Oversold?"

Tax cuts? How could something be oversold that doesn't really exist? Writing earlier this year in the Federal Reserve Bank of Philadelphia's publication "Business Review," economic analysts Stephen Meyer and Robert Rossana concluded:

"The phased-in 25 percent cut in personal income tax rates will have little effect on people's behavior, because few taxpayers will face lower tax rates in 1983 than they did in 1980, or in 1978. Bracket creep caused by continuing inflation, plus rising Social Security payroll taxes, mean that most families in most tax brackets will face the same or higher marginal tax rates on a given *real* income in 1983 than in 1980 or 1978. Thus it is unlikely that the personal income tax cuts adopted in 1981 will improve incentives to work or save."

Incidentally, the Meyer-Rossana analysis did not include the Reagan-Dole largest tax increase in history, which will increase taxes during the next five years by an estimated $227 billion.

Wall Street economist H. Erich Heinemann says that all the talk about taxes being cut is "an elaborate political shell game." Indeed it is and the taxpayers are the big losers. The Heritage Foundation's Walker Fellow in Economics, Thomas Humbert, says: "Despite the much-publicized 'Reagan revolution' in tax policy, the fully implemented tax cut will at best return the nation to the level of taxation in 1978. Even with the cuts, total revenues will increase $300 billion during the next five years. According to the Congressional Budget Office, tax levies will rise from $605 billion in 1981 to $923.3 billion in 1986."

An internal Treasury Department analysis reveals the following as regards average tax increases from 1981 to 1988, over 1980, for a family of four in constant 1982 dollars:

Taxes on a four-member family making $15,000 a year will increase by $85;

Taxes on a four-member family making $20,000 a year will increase by $63;

Taxes on a four-member family making $25,000 a year will increase by $34;

Taxes on a four-member family making $30,000 a year will increase by $37; and

Taxes on a four-member family making $40,000 a year will increase by $246.

Some tax cuts.

The Journal article also states as fact that President Reagan did win "substantial budget cuts" from Congress in 1981. But this assertion, too, is fiction. In a study just released by the Center for the Study of American Business, Dr. Murray Weidenbaum—who used to head the President's Council of Economic Advisers—notes:

"Using the CPI (consumer price index) as a deflator, the aggregate estimates for fiscal years 1982 to 1986 under the Reagan programs are shown on balance to be a bit higher than the Carter (budget) estimates by about $7 billion (or a little over $1 billion a year)."

So, to make a long story short: The so-called Reagan tax cuts don't really cut taxes, and the so-called Reagan budget cuts don't really cut the budget.

Almost a year ago, after virtually all the president's senior advisers (with the exception of Dr. Martin Anderson) had failed in their efforts to get him to raise taxes, Reagan aide Mike Deaver (who ironically was also a part of this unsuccessful campaign) observed:

"I learned something from this process. Never try to talk any man who holds deep convictions out of them for reasons of political expediency because it would destroy him."

Well, even though Deaver was unable to abide by his own wisdom, what he said is true. And the economic trouble the president is in is the result of politically expedient chickens of compromise coming home to roost with a vengeance.

It's nice to know that the near-destruction of the president was an education for Mike Deaver. But, I wonder: What did the president learn?●

ALASKA RAILROAD LEGISLATION

● Mr. METZENBAUM. Mr. President, last Tuesday, Congress approved legislation establishing the framework for the possible transfer of the federally owned Alaska Railroad to the State of Alaska. That measure was the product of exhaustive, painstaking, and complex negotiations between my staff, the staffs of the Senators from Alaska, Mr. STEVENS and Mr. MURKOWSKI, and representatives of the Governor of Alaska.

Because the final language was not agreed upon until literally minutes before the bill was passed, it was not possible to offer a detailed explanation of the compensation provision. I would like to take a few moments to outline the intent of this particular provision and to clarify the obligations of the United States Railway Association under the provision.

Quite simply, the USRA is required to determine the fair market value of the Alaska Railroad, taking into account the terms and conditions of the legislation. These terms and conditions relate to various environmental provisions, as well as provisions requiring the State to operate the Alaska Railroad as a railroad for 10 years. The USRA was directed to use "such procedures, methods, and standards as are generally accepted as normal and common practice."

I want to make it very clear that the language instructs USRA to determine fair market value. During negotiations, I explicitly rejected a proposed draft which would have ordered USRA to make a determination of the fair market value of the Alaska Railroad as an operating railroad. I further rejected proposals to specify the relevant standard to be used in the valuation process and specifically refused to agree to language which would have required USRA to consider what a prospective buyer would pay the United States for the Alaska Railroad. In fact, in place of such language I proposed, and we eventually accepted, the language authorizing USRA to apply the standard methods and procedures that are normal and common practice.

There is nothing in the compensation provision or anywhere else in the legislation which requires USRA to use the prospective buyer standard. Nor does USRA have the right to use its discretion in setting its own standards. I would not have agreed to the bill if such language were included. Any phrases, other than those explicitly written into the bill in determining fair market value, were rejected by me.

An early draft contained language telling USRA to make a complete accounting of all deferred maintenance, delayed capital reinvestment requirements, employment protection obligations, passenger service subsidies, OSHA compliance requirements, potential cash flows, and the real value of fixed assets. But I did not agree to this language and once again it was struck from the final version in favor of allowing USRA to determine the value if used in fair market value, and nothing else.

The provision, of course, does require the USRA to factor into the valuation an appraisal of the land and property to be transferred to the State. This appraisal shall be conducted in the usual manner, in accordance with generally accepted industry standards for appraising real estate, and shall consider the current fair market value and potential future value if used in whole or in part for other purposes.

Finally, we agreed verbally to change one provision of the law so that the State of Alaska would be required to operate the Alaska Railroad as a railroad for at least 10 years. Not 5 years, as was contained in earlier drafts.

It is unclear whether this change is in the final version. I hope, pursuant to the understanding between Senator STEVENS and I with regard to making

technical corrections in the bill early next year, that we can clarify this issue in the next session.

Again, I am delighted that we have been able to work out a compromise on this matter. I thank Senator STEVENS and his staff and Senator MURKOWSKI for their willingness to work until the final moments to forge a compromise.

THE ECONOMIC HEALTH OF THE WESTERN ALLIANCE

● Mr. LUGAR. Mr. President, on December 9, 1982, Ambassador Arthur Burns made a presentation on "The Economic Health of the Western Alliance" at the Deutsche Atlantische Gesellschaft in Bonn. As usual, Ambassador Burns delivered extremely thoughtful comments that demonstrate his keen insight into the economic issues that have been troubling the Western Alliance. For the benefit of those who have not heard his thoughts, I ask that the full text of his presentation be inserted in the RECORD.

The presentation follows:

THE ECONOMIC HEALTH OF THE WESTERN ALLIANCE

(By Arthur F. Burns, American Ambassador to the Federal Republic of Germany)

I wish to thank the Deutsche Atlantische Gesellschaft for the opportunity to address your members and friends this evening. Since its establishment a quarter of a century ago, your society has faithfully supported the fundamental objectives of the North Atlantic Alliance. You have never wavered in your devotion to peace or in your efforts to espouse the principles of individual freedom and democracy that constitute the moral foundation of NATO. In so doing, you have earned the gratitude of enlightened citizens of both your country and mine.

My purpose this evening, beyond expressing appreciation of your contribution to preserving international peace and freedom, is to discuss some of the economic issues that have recently been troubling the Western Alliance.

Economic factors inevitably have a significant impact on political attitudes that prevail in our respective countries, and they in turn can be decisive for the military effectiveness of the Alliance. In view of the immense role of the United States in world affairs, I shall concentrate on the economic relations between the United States and its European Allies. That these relations have been strained of late is a matter of common knowledge. That is reason enough for trying to see the American-European relationship in a sound perspective. Beyond that, it is vital to our Alliance to consider how well its economic underpinnings are being maintained and protected.

Since the end of 1979, both the United States and Western Europe have been experiencing considerable economic sluggishness or actual recession. That Western economies are vastly stronger than the economies of the Soviet bloc is a matter of considerable importance, but this can hardly justify complacency on our part. What needs to concern us is the state of our own economic health—how best to preserve and improve it. My first task this evening, therefore, is to examine briefly the sources of recent difficulties in the West.

The oil price shocks of 1973 and 1978 have certainly contributed to our economic problems. So too have other developments in the international marketplace, particularly the increasing challenge of Japan to some of our key industries as well as the new competition for a variety of Western manufactures from the more advanced of the developing nations. These external influences, however, have been less important for Western economies than difficulties of our own making.

During the early decades of the post-war period, the fiscal and monetary policies of Western Democracies were highly successful in maintaining reasonaly full employment and in improving social conditions. These very successes tempted governments during the 1970's to respond to the never-ending public pressures for governmental benefits by risking large budget deficits and easy money in the hope of expanding social welfare programs still further as well as attending to new environmental concerns. But by attempting to extract more and more goods and services from our economics without adding correspondingly to our willingness to work and save, we in the West inevitably released the destructive forces of inflation.

Under these conditions, it should not be surprising that tensions over economic issues have at times seriously tested the harmony that has generally characterized the political relations between the United States and its European Allies. When our individual economies are booming, there is little pressure on governments from their business or agricultural communities to protest or counteract activities being pursued in other countries. Such pressures tend to mount, however, in times of economic adversity. Difficulties that would be passed over under prosperous conditions then take on some importance—occasionally even a large importance. Gentle voices of spokesmen of economic interests are then apt to become loud and strident, and even the customary composure of academicians and high government officals tends to suffer. Human nature being what it is, that has been the usual experience of mankind and we have not escaped it this time.

There is, first of all, the issue of American interest rates. There can be no dispute over the fact that these rates have been extraordinarily high in recent years. Nor can it be denied that they served to attract funds to the United States from other parts of the world, that this movement of funds tended to raise interest rates in some European countries, and that business investment suffered to some degree as a consequence. If European complaints had stopped at this point, no one could reasonably quarrel; but many Europeans, including prominent government officials, at times went further and either stated or implied that American interest rates were responsible for the economic troubles in their countries. That line of thinking overlooked the fact that high American interest rates could not be responsible simultaneously for the still higher interest rates in France and the drastically lower interest rates in Japan. Needless to say, factors indigenous to individual countries—among them, the propensity of the public to save and the state of governmental budgets—always exercise some influence on interest rates.

Much of European criticism of American interest rates also stemmed from a misunderstanding of American policy objectives. Seeking to end the havoc wrought by inflation, our authorities proceeded on a principle that has been tested across the centuries—namely, that stoppage of inflation requires curbing the growth of money supplies. It is, of course, true that the high interest rates were in large part a result of our restrictive monetary policy. That does not mean, however, that we sought high interest rates.

On the contrary, the immediate effects of the restrictive monetary policy on interest rates and economic activity were by no means welcome, but this policy did achieve its fundamental purpose of curbing inflation in the United States. Since 1979, when the consumer price level rose more than 13 per cent, the rate of inflation has moved steadily lower. By coming down to less than 5 per cent this year, the inflation rate in the United States is now one of the lowest in the world.

The success of monetary policy in subduing inflation eventually made it possible for American interest rates to move to lower levels—partly through the inner workings of the marketplace and partly through adjustments of policy. The slowing of inflation encouraged the authorities to reduce monetary restraints, and the deepening of recession impelled them to do so. Economic conditions in the United States were, of course, primarily responsible for the consequent decline of interest rates, but our monetary authorities were also mindful of the benefits that the lower rates could bring to Europe. Since last year, when the rate that commercial banks charge their prime borrowers reached 21½ percent, the prime rate has fallen to 11½ percent. Open-Market short-term rates have been cut in half. Long-term rates on corporate bonds and home mortgages declined less, but they too have fallen materially. The greater part of these interest rate adjustments has occurred since June, and European rates followed American rates downward—although not to the same degree. As these financial developments unfolded, Europeans joined Americans in wishing that interest rates would move even lower, but what had previously been a significant source of friction within the Alliance virtually ceased being troublesome.

Another recent irritant to some members of the Alliance was the stand taken by the American government on intervention in foreign exchange markets. The effectiveness of such maneuvers in stabilizing foreign currencies had long been a subject of serious debate among financial experts, including central bankers. Nevertheless, governments of leading countries kept intervening with some frequency during the 1970's, in the hope of smoothing out some of the short-run fluctuations in the exchange market. Being critical of these policies, the Reagan Administration announced soon after it came into power that, in its judgment, foreign currencies are best left to the free market and that it would therefore refrain from intervening except under highly exceptional circumstances. Not a few financiers and Government officials welcomed this decision, and even some who questioned it were more concerned with the political consequences of non-intervention than with its intrinsic economic merits. There were, nevertheless, some determined European critics of the new American policy, and they made their influence felt—most notably at the Summit meeting held this June at Versailles.

While Americans held to their basic position at that meeting, they did propose that a committee of international experts study the results of past experience with intervention. By agreeing to such a study, all participants tacitly admitted the possibility that some of their views on intervention might need to be revised. Since then, the United States has gone further in the direction favored by its critics by actually intervening several times—albeit on a modest scale—in the market. There is reason for hoping that the foreign exchange study now under way may further contribute to narrowing the differences between the United States and some of its Allies. And if good will should be aided by good fortune, so that both interest rates and inflation kept coming down in our respective countries, the fluctuations of exchange rates would of themselves narrow and thus reduce both the impulse to intervene and the inclination to fret over the issue.

A far more serious conflict between the United States and its Allies was stirred by the decision of several European countries to support the construction of a Siberian natural gas pipeline. This conflict reached a climax when the American government, feeling morally outraged over the Soviet Union's role in suppressing the newly won freedoms of the Polish people, proceeded to forbid shipments by American firms of materials and equipment needed to build the pipeline. This prohibition was later extended to European subsidiaries and licensees of American firms. These actions led to acrimonious charges and debates, and some political observers on both sides of the Atlantic felt that American reaction to the crisis in Poland may have given rise to a crisis of the Alliance.

That danger, fortunately, was surmounted. Not only was damage to the Alliance kept down, but the pipeline controversy actually helped to steer Western thinking about foreign policy onto a sounder track.

In the course of pondering the sanctions imposed against the Soviet Union, the American government undertook a review of Western economic relations with the Soviet Union in the hope of developing a policy that, unlike the pipeline sanctions, could prove of lasting benefit to the Alliance. It soon became clear that this would require more resolute dealing with elements of incoherence in Western foreign policy. The reasoning that led to this conclusion was straightforward. On the one hand, NATO countries were devoting, year after year, vast resources to our common defense against the Soviet threat. Simultaneously, however, partly through private banks and partly through government agencies, we in the West kept lending during the past decade vast sums of money to the Soviet Union and its satellites. At times, this was even being done at subsidized interest rates. In view of the high priority that the Soviet Union assigns to its military establishment, the financial resources that the West so liberally put at the disposal of the Soviets thus indirectly helped to strengthen their already formidable military establishment. To make matters worse, the Soviet Union continued to take advantage of the weaknesses in our controls on the export of militarily related products and technology.

These considerations were persistently pressed by the American government on its Allies during the past year. For a time, they were resisted by European governments, partly because of displeasure over the pipeline sanctions, partly also because of concern that the American initiative could lead to an East-West trade war. But as the American government made clear that its basic aim who simply to steer Western policy into a path that was more consistent with Allied security interests, controversy and recrimination gradually yielded to quiet voices of reason.

On November 13, President Reagan was able to announce that agreement had been reached on the need to consider Allied secruity issues when making trade arrangements with the Soviet Union. More specifically, the United States and its partners agreed, first, that new contracts for Soviet natural gas would not be undertaken during the course of an urgent study of alternative sources of energy; second, that existing controls on the transfer of strategic items to the Soviets will be strengthened; third, that procedures for monitoring financial relations with the Soviets will be promptly established; and fourth, that the Allies will work to harmonize their export credit policies. In the eyes of the American govenment, these measures will promote Allied interests more effectively than the pipeline sanctions. The President therefore concluded his statement by announcing their removal. Long and difficult negotiations on ways of carrying out the agreed measures are undoubtedly still ahead of us, but the pipeline crisis as such has fortunately come to an end.

In other areas of economic policy—particularly defense burden-sharing and trade issues—the United States continues to have major differences with its European partners. Difficulties of this type have troubled the Alliance almost from its beginning, and in one form or another they are likely to remain troublesome in the years ahead. Even here, however, we have generally managed to work out our problems, and we have had some limited successes during the past year that are noteworthy.

The distribution of defense burdens among Allies inevitably raises difficult questions of equity. Many Americans, especially members of Congress, have long felt that the United States is bearing an excessive part of the heavy costs of the Alliance. In view of the financial stringency that has developed in my country, such criticisms of Europe have recently intensified. Our NATO partners usually respond by reminding us that their spending on defense rose steadily during the 1970's while real American spending kept falling off. That is entirely true, but it does not tell the whole story. Official statistics indicate that defense spending reached 7.9 per cent of the gross domestic product in the United States during 1970. The highest corresponding figure for each or our major Allies fell short of 5 per cent in that year. While the defense outlays of the United States decreased during the 1970's, this gap has never been closed. Confronted with these facts, European governments are inclined to observe that monetary figures fail to capture all costs involved in the defense area, particularly the conscription of soldiers that exists in most of their countries. Such remonstrances, however, are not always accepted by Americans, as the lively discussions that have been resounding in our Congressional halls indicate.

Whatever the mertis of ongoing debates among members of the Alliance, the Reagan Administration recognizes that some of the military proposals now before Congress would seriously weaken the Alliance. Not only that, they would also encourage the Russians to remain unyielding in the vital arms control negotiations now under way in Geneva. Those dangers have not escaped the attention of European leaders. In fact, many Europeans have long shared the widespread American belief that Europe is not doing enough for its own or for the common defense. Financial stringency is nowadays no less a problem in Europe than in the United States. In spite of that, the German Government has recently taken steps that should help Americans to see the problem of defense burden-sharing in a better perspective. Several months ago the Federal Republic signed a treaty with the United States under which it agreed to commit 90,000 reservists in support of American combat forces in the event of war. More recently, Minister Manfred Woerner announced that the new German budget provides a significant additional contribution for constructing vital NATO military facilities in Europe. These measures had long been urged by Americans on the German government. The fact that they have been adoped at a difficult time should certainly help to quiet American concerns.

Differences between the United States and its Allies over international trade issues also have a long and checkered history. From the end of World War II through the 1970's the broad trend of Western policy has been towards increasing liberalization of international trade and investment. And there can be little doubt that this trend contributed enormously to the prosperity of the West and other parts of the world. While the United States led the world toward an open trading system and unrestricted foreign investment, this policy—except for agriculture—was generally supported in Europe, particularly in the Federal Republic of Germany. Unfortunately, but not surprisingly, the deep recession of recent times has by now stirred up strong protectionist sentiment in many European countries and also in the United States.

The Reagan Administration has stoutly resisted Congressional moves toward protectionism—thus far with considerable although incomplete success. During the recent ministerial meeting of the the parties to the General Agreement on Tariffs and Trade, the United States fought especially hard for an unequivocal commitment by the world's trade ministers to phase out existing measures restricting international trade and to refrain from taking new restrictive measures. The debates over this principle and on specific trade issues were protracted and at times bitter, but at the end American initiatives brought only modest results. Assuming professorial garb, Mr. Brock, the American trade representative, judged the result as deserving hardly more than a grade of "C"—an assessment that few informed observers have questioned.

From an American viewpoint, the most disappointing aspect of this meeting was the failure to convince the European Community to modify some aspects of its agricultural policy. For many years the Community has maintained farm prices above the world level. Surpluses therefore developed, and in order to move them into world markets the Community subsidized their export. As long as this policy was confined to protecting farm sales within the Community, the United States accepted it—although not without protest. But once the subsidization led to large exports to third-country markets, a more serious problem arose for American farmers and agricultural exporters of other countries. With farm incomes in

the United States currently at their lowest level since the 1930's, American protests against the Community's agricultural policy have become increasingly insistent. The Community however has refused to budge, maintaining among other things that the issue of its subsidies had already been settled in earlier negotiations. This and other arguments of the Community have not softened American attitudes; and unless this agricultural controversy is soon settled, there is a serious possiblity that the Congress will pass retaliatory legislation next year. This would be so damaging for both the United States an Europe that I continue to believe that some mutual accommodation will be worked out.

Such a result, indeed, was achieved in connection with another trade dispute that for a time resisted every attempt at resolution. For many years the world steel industry has suffered from excess capacity and, as so often happens under such conditions, various countries—including some in Europe—made export subsidies available to their steel producers. As a consequence, large quantities of steel produced with the benefit of government subsidies have penetrated the American market in recent years. American steel manufacturers, who do not receive subsidies, sought to limit this vexing competition. They took advantage of a law that enables an industry to veto certain governmental efforts to work out trade arrangements with other countries. Despite this formidable obstacle, the American government finally reached an agreement with the European Commission that imposes moderate quotas on exports of various steel products to the United States.

To me, as to other confirmed free traders, this agreement has brought little joy. However, the practical choice that both Americans and Europeans faced in this instance was not between protectionism and free trade, but rather between degrees and kinds of protectionism. If the negotiations on steel quotas had failed, existing American law would have required prompt imposition of punitive duties on steel imports. Worse still, it seemed likely that in that event the Congress would legislate still more drastic protectionist measures. The negotiated settlement clearly violated the salutary principle of free trade, but is also forestalled more serious consequences. To this extent, it is not only a tolerable arrangement, but one that has served to reduce political tensions between the United States and its Allies.

The conclusion that I feel can justly be drawn from my review of the recent steel and other economic disputes within the Alliance is reassuring. To be sure, there have been excesses of political rhetoric on both sides of the Atlantic and, occasionally, misguided actions as well. Nevertheless, the United States and its European Allies have succeeded in working out—or at least in muting—most of their troublesome differences over economic issues. Our ability to accomplish this mutual accommodation under difficult conditions demonstrates that the moral, political, and security interests that unite us are strong enough to overcome even divisive economic issues. That at any rate has proved to be the case thus far, and from that we can surely draw encouragement for the future.

We must temper, however, any feeling of optimism that international economic conditions will improve so much in the near future that they will be unlikely to cause or intensify political strains within the Alliance. It is by now widely recognized that the weakness of the international economy during the past three years is the aftermath of the inflationary pressures released during the 1970's. It is not so clearly understood, however, that our recent economic difficulties reflect more than the normal vicissitudes of the business cycle. They reflect also a certain loss of business dynamism—that is, a gradual weakening of the underlying forces of economic growth in the Western world.

Liberal fiscal and monetary policies had served us well over a long generation in fostering full employment and improving the social environment. They might have continued to work benefically if they had not been carried to excess. But, unfortunately, traditional rules of financial prudence were thrown to the winds. As a result our Western economies have become so highly sensitive to the dangers of inflation that liberal financial policies can no longer be counted on to perform their earlier constructive function.

Of late, government and business thinking in the Western world has focused on creating an environment that is more conducive to business innovation and private capital investment than it has been in recent years. Responsible leaders in our respective countries frequently emphasize not only the need to practice moderation in the monetary area, but also the need to bring about some reduction from the high levels that both government spending and taxes have reached relative to the size of our respective national incomes. Even France, which moved for a while in another direction, has recently adopted a rather restrictive monetary policy, besides announcing the intention to restrain further expansion of budgetary deficits. With earlier economic policies now in general disrepute in the West, and the newer policies not yet fully tested, deep concern about the economic outlook has spread during the past year or two in the United States as well as throughout Western Europe.

Such pessimism can be overdone. In the United States at least, the aggregate output of the economy has remained virtually unchanged during the past six months or so, and there are now numerous indications that the groundwork for recovery has been laid. As noted earlier, both inflation and interest rates have come down sharply. Stock and bond prices have risen dramatically, thereby adding hundreds of billions of dollars to the net worth of individuals and business entities. Of late, consumer spending for goods and services has increased modestly. Residential construction has been moving upward again this year; home sales have recently revived; and the financial condition of mortgage-lending institutions has improved. The upward climb of wages has slowed materially; industrial productivity has recently perked up; and corporate profits have begun to increase. These improvements have been offset thus far by sharp deterioration of merchandise exports and business investment in new plant and equipment. Nevertheless, it seems likely that a gradual recovery of aggregate production and employment will get under way in the United States within the next few months.

With the possible exception of Great Britain, the immediate outlook for Europe is less favorable, in large part because of the greater rigidity of its labor markets. But it is reasonable to expect that any improvement in the American economy will be felt before too many months pass also in Western Europe.

Unemployment, nevertheless, will remain high in the West for an uncomfortable period, since the pace of recovery is likely to be slow in the present instance. There are compelling reasons for this gradualness. First, there are as yet hardly any signs that contracts for business construction or orders for business equipment have begun to increase either in the United States or in Western Europe. Second, most of the larger banks throughout the West must now realize that their lending policies, both at home and abroad, were excessively liberal during the 1970's. They will consequently be more cautious lenders—perhaps excessively cautious lenders—in the years immediately ahead. Third, many of the less developed countries—not only Mexico, Brazil and Argentina, which lately have figured so heavily in the press—are at present unable to make timely payments of the interest or principal that is due on their overextended indebtedness. These financial difficulties constitute a grave, but I believe still manageable, danger to the international banking system. Under the best of circumstances, however, great austerity will need to be practiced in many of the less developed countries, and their reduced imports will inevitably restrict the pace of Western economic recovery over the next two or three years, if not longer.

If my assessment of the economic outlook is anywhere near the mark, political tensions on account of economic difficulties may well continue to trouble the Alliance. To make progress on economic issues in the years immediately ahead, it is particularly important that every country avoid "beggar-thy-neighbor" policies. We cannot afford to think in terms of winners and losers when it comes to solving our common problems. It is essential, therefore, that member countries of the Alliance mobilize the vast economic and political statesmanship that is at their disposal. Cooperation among economic ministries, finance ministries, central banks, private commercial banks, and international financial agencies, which has not always been close, must become very much closer. The heads of Western governments, who thus far have been reasonably successful in controlling the disease of protectionism, must work still more earnestly toward this vital objective. Meetings among members of the foreign policy and defense establishments of the Alliance must occur still more frequently, and become more thorough as well as more timely, so that misunderstandings among their governments are kept to a minimum.

These, ladies and gentlemen, are the paths to confidence in the security and prosperity of the industrial democracies that are joined in the brotherhood of the Atlantic Alliance.●

JOSEPH MEYERHOFF

● Mr. SARBANES. Mr. President, for many years the city of Baltimore's civic and cultural life has been greatly enhanced by the extraordinary efforts of one of its leading citizens, Joseph Meyerhoff.

A businessman and civic leader of unique foresight, Joseph Meyerhoff has been a philanthropist whose generosity parallels that of Baltimore's great contributors, Johns Hopkins, George Peabody, and Henry Walters. Their contributions have created the

cultural richness that marks the city's much-recognized urban renaissance.

This past year Joe Meyerhoff's philantropy opened a new and dramatic era in the rich cultural life of the city of Baltimore with the opening of the Joseph Meyerhoff Symphony Hall. This stunning centerpiece of Baltimore's cultural landscape is but one manifestation of the generosity of Jose Meyerhoff. A long-time patron and president of the Baltimore Symphony Orchestra, Joe Meyerhoff has had the vision to make this dream a reality.

Mr. President, on January 12 the Advertising Club of Baltimore will present Joseph Meyerhoff with its "Man of the Year" civic award in recognition of his outstanding contributions to the greater Baltimore community. I ask my colleagues to join me in expressing our deep appreciation to him for his example of community involvement, and I ask that the article from the Baltimore Sun magazine be inserted in the RECORD.

The article follows:

"YOU CAN'T TAKE IT WITH YOU"—JOE MEYERHOFF

(By John F. Kelly)

At first, he didn't want to do it.

"Another goddam interview?" he sputtered. "What the hell for? Nobody wants to read about me. They've read too much about me already."

But this is different, the caller told him. This is for the symphony.

There are, it is said, three or four things in life that Joseph Meyerhoff cannot say no to. One of them is the Baltimore Symphony Orchestra.

He hesitated—and then surrendered.

"But no hero stuff," he admonished "I don't want a lot of nonsense about what a great hero I am."

He laughed, a low, sardonic laugh. "Nobody'd believe it, anyway."

It is the sort of remark anyone who knows Joe Meyerhoff would expect him to make. It is not, they are quick to point out, false humility. He is not fishing for compliments.

"He's proud as hell of what he's accomplished," says a close friend and business associate, "but he doesn't particularly like the limelight. He prefers to let his deeds speak for themselves."

They speak eloquently.

There is scarcely an organization—professional, civil, religious, educational, cultural, economic or philanthropic, on the local, state, national or international level—that has not benefited from Joe Meyerhoff's largesses, and that has not honored him in some way for it.

He has received honorary degrees from seven colleges and universities, four of them in Israel.

He was cited for distinguished citizenship by Governors McKeldin and Tawes.

He received the Louis D. Brandels award from the Zionist Organization of America for exemplary service to the State of Israel.

He was given the first citizen's award for voluntary service to the city of Baltimore.

Shortly after the state Board of Public Works voted to name the new symphony hall after Mr. Meyerhoff, an editorial in The Sun referred to him as one of "the great philanthropists in Baltimore history," and compared him to George Peabody, John Hopkins, Henry Walters and Enoch Pratt.

Although the recognitions obviously pleased him ("That's pretty good company"), in almost the next breath he growls that he's not trying to win friends and influence people.

"I don't have to impress anybody."

He pauses and jabs a finger in the air.

"The things I do, I do because I believe in them. If I didn't (believe in them), if I didn't think they were important, I wouldn't do them. That's the way I operate."

He leans back in his chair and smiles. It's an almost pixieish smile.

"A reporter for another paper [*The Jewish Times*] interviewed me the other day and asked me how I felt about having the symphony hall and all those other buildings named after me. Did it embarrass me? I told her I didn't like it at first—but I got used to it."

There it is again—that same dry, self-deprecating wit. He seems to use it as a foil; as a way to divert attention from himself.

It is a thoroughly charming trait in a millionaire.

Joe Meyerhoff is a slim tanned, wisp of a man a shade over 5-feet-5. He was 83 in April, but he looks at least 10 years younger.

He is alert, attentive, even somewhat feisty. He likes to answer questions with questions.

"Why don't you retire?"

"Why?"

"Well . . . why not?"

"What would I do?"

He speaks quietly, rarely raising his voice, yet there is an unmistakable air of authority about him. He is obviously used to getting things done—his way.

Not long ago, he told the president of a large insurance company to stop using intermediaries to solicit funds.

"Pick up the phone and do it yourself," he instructed him. "And while you're at it, don't call so many meetings. The worst thing you can do is have more meetings than you need."

Mr. Meyerhoff doesn't walk, he scuttles, darting out of his office on the 21st floor of the First Maryland building on South Charles street, bound for a meeting or for another of those interminable last-minute inspection tours of the symphony hall that strike fear in the hearts of workmen putting the finishing touches on the building.

"I'm sure they hate to see him coming," a family member chuckles. "He goes through [the symphony hall] like a cyclone and when he sees something he doesn't like, he tells them to change it."

Mr. Meyerhoff is probably as well qualified to change things as anyone. He's been a builder for more than 60 years.

He's chairman of the board of Magna Properties, a real estate development firm that he and his son, Harvey M. (Bud) Meyerhoff, who's president and chief executive officer, formed in 1979, after liquidating Monumental Properties.

Analysts called the liquidation of Monumental "one of the largest real estate transactions in U.S. history."

Mr. Meyerhoff shrugs. "It was big. But I don't know if it was that big."

Shareholders reportedly received a total of almost $600 million from the sale. The Meyerhoffs have about a 30 percent interest in the company, which would have made their share of the proceeds somewhere in the neighborhood of $180 million.

Mr. Meyerhoff laughs. "It was big," he says, avoiding the implication, relishing the joke. "But I don't know if it was that big."

He's certain, however, that most of the estimates of his personal wealth are highly exaggerated.

Three years ago, *Jewish Living Magazine* listed Mr. Meyerhoff and his wife Rebecca, among the country's wealthiest Jewish families. The magazine estimated the Meyerhoffs to be worth "between 75 millon and $100 million."

"That's a bunch of stuff," Mr. Meyerhoff snorts. "The money we realized [from the liquidation of Monumental] was all split up among the children and the grandchildren—10 or 12 or 15 people in all."

The fact remains, however, that he's wealthy enough to donate $10 million (of the $23 million total) to the construction of the symphony hall that bears his name—and not feel the pinch.

"Oh, yeah," he says with a mischievous grin. "I've got a few bucks left. I haven't spent it all yet."

Mayor Schaefer is thankful for that.

"I shudder to think what the cultural life of Baltimore would be like without Joseph Meyerhoff," the mayor says "I can assure you that without him—and others who feel the same way—it would be very adversely and seriously affected."

The mayors of several Israeli cities would probably utter a reverent "Amen" to that.

In the past 20 years, Mr. Meyerhoff estimates he's given "about $5 million" to Israel for construction of "various capital projects," including six libraries, several pavilions and a technical college.

That figure does not include the money that he's donated anonymously to Israel through the United Jewish Appeal and other charitable organizations.

He's never gotten around to adding it up. No matter: He's given it gladly.

"In my family, it was taken for granted that being a Jew and being interested in what was Palestine and is now Israel were one and the same thing."

It was also taken for granted that everyone has an obligation to the community.

"My parents felt—and instilled in us—a belief that you should endeavor to leave things a little better than you found them. I've always tried to practice that."

"Joe Meyerhoff doesn't fit the usual pattern of famous people who allow their names to be used for a cause," says Pat Deering, a managing partner at Coopers & Lybrand, an accounting firm, who has known Mr. Meyerhoff for almost 30 years. "He insists upon getting involved in the cause—and he does."

Mr. Meyerhoff was born in Russia, the fifth of Oscar and Hannah Meyerhoff's six children. He was 7 years old when the family left Russia for the United States.

His father had been head of a local self-defense group formed to fight the pogroms. He was suspected of hiding weapons, arrested, and sent to jail.

"The police came and searched the house, looking for guns," Mr. Meyerhoff says. "I suspect they were there somewhere, but they couldn't find them so they eventually released my father, and as soon as he got out he and my mother packed up and left.

"That was in 1906. I was 7 years old, and I don't remember a thing about Russia. I'm surprised I don't, too, because I was a pretty bright kid. That's what they always told me, anyway."

The family came straight to Baltimore after landing in New York. Mr. Meyerhoff's

father had a sister living here, and she and her husband helped the family get settled.

They lived in East Baltimore for two years and then moved to Druid Hill avenue, above North avenue, in 1908. There, his father opened a meat market.

His parents had difficulty adjusting to the new world, but none of the children seemed to.

"I don't think it was more than a few months before we were speaking English, for example. My father wouldn't allow Russian to be spoken in the house so he and my mother spoke Yiddish and we spoke English and between the two we managed to communicate."

Mr. Meyerhoff attended public schools, including School No. 49 in the 1200 block Cathedral street. The building, ironically, stands almost directly across the street from the new Meyerhoff symphony hall.

(The contrast is striking: The traditional brick schoolhouse, trimmed in brownstone, and the graceful, sweeping lines of the Pietro Belluschi-designed symphony hall—variously described by wags as an Art Deco ocean liner or a hat worn by a member of the Royal Lichtenstein Band.)

Mr. Meyerhoff went to City College, playing third base on the baseball team and "reserve defense" on the basketball team, and graduated in 1916. That fall, he enrolled in the night school law program at the University of Maryland.

"I didn't have any great love for law," he says, "but I didn't know what else to do. I had to work [at the store] days so going to law school nights was the only thing that made sense."

He lost interest after his first year in law school, however, and dropped out. In July, 1918, he enlisted in the army and was assigned to the Student's Army Training Corps at the Johns Hopkins University.

"It was wonderful. We went to classes and trained and pretty soon the war was over and two days after they signed the armistice, we were discharged. The only thing I didn't like was the business with the gun. I couldn't keep the damned thing clean. That and sticking the bayonet in the dummies. I never liked that.

"I wasn't a bad soldier, though. I was small, but pretty muscular and I had quick reflexes. I still have. I went from baseball to tennis to golf and I still play a pretty fair game of golf.

"But it's the goddamdest game. You can hit the ball a mile, but it all depends on your short game and your putting."

(Bud Meyerhoff laughingly says his father "probably gets as much fun out of winning a couple of golf balls in a low-putt game as he does watching one of his stocks go up.")

Mr. Meyerhoff returned to law school after his discharge from the army and graduated in 1920. That summer, while waiting to take the bar exam, he went to work for his brother, Morris, who was building houses on Glen avenue, near Park Heights.

"He said to me, 'You're not doing anything, come on out and help us sell some lots.' The following year, I started building a few houses on my own."

He also married Rebecca Witten. They met while she was a student at Eastern High School and he was in his first year of law school.

"He seemed like such a man of the world—and I felt like such a little girl," Mrs. Meyerhoff recalls. "To me, he was already a big success."

The Meyerhoffs—he was 22, she was 18—went to the White Mountains in New Hampshire on their honeymoon. A day or two after they arrived, someone told him he looked "too young to be married," and he started growing a moustache. It's the same shoestring moustache he sports today. It gives him a faintly continental look.

Back in Baltimore, Mr. Meyerhoff continued to practice law, handling most of his brother's legal business until 1924, when Morris Meyerhoff ran into financial problems and declared bankruptcy.

Mr. Meyerhoff, who was responsible for paying several notes he endorsed for the company, refused to declare bankruptcy. He vowed to pay every cent and, furthermore, he would not join a country club until the notes were paid.

"It took me 10 years to do it, but I did it. I must have finished sometime in 1935 because I joined a country club in 1936."

"If Joe Meyerhoff gives his word, that's it," says Frank Baker, retired chairman of the Monumental Corporation, which merged with the Joseph Meyerhoff Corporation in 1969.

Mr. Baker, who is also one of the city trustees, says it's doubtful he would have talked to anyone else about a merger of the two companies.

"I always had the highest regard for his integrity."

"I want the people I do business to have confidence in me," Mr. Meyerhoff says. "I want them to know I'm a man of my word. I have a saying, 'I was honest before I had money,' and I think—I hope—the people I deal with know that and believe it."

Mr. Meyerhoff gave up law shortly (except for one brief period in the early 1930s) after his brother's bankruptcy, confining his efforts to the building trade.

"I never really wanted to be a lawyer, anyway," he says. "I wanted to build. It's exciting, challenging and creative. There's something going on all the time."

Plus there's a lot more money in it.

"That's probably true," says Mr. Meyerhoff's son, Bud. "But with Dad the chase is everything. It always has been. That's why he doesn't retire. He's having too much fun."

For the first few years, Joe Meyerhoff concentrated on building rowhouses. Later, he built houses to order. He started on Northern parkway and eventually built custom homes in Guilford, Stoneleigh, Homeland and Roland Park.

He's probably as proud of the houses as he is of anything he's built.

"I built damned good houses, solid houses, and I always took great pride in them. Hell, there are second and third generations living in some of them today."

He began building his first apartments during World War II.

Today, he estimates he built more than 15,000 individual and group homes in the Baltimore area and another 17,000 apartments in Maryland, Pennsylvania, Georgia and Florida.

In addition, he built 19 shopping centers, including Edmondson Village, Eastpoint, Westview and Hillendale.

(Mr. Meyerhoff built One Slade, a luxury, high-rise apartment house in northwest Baltimore, 10 years ago after friends persuaded him "there were no decent apartment houses around." He agreed. He sold his home and moved in himself as soon as it was finished.)

Other than houses, what he built, he usually kept—even though he "hated managing them."

"The first thing I always did after I finihsed [building an apartment house or a shopping center] was give them to someone else to run. But I didn't sell them. I didn't build them to sell. I built them for investment."

While many other builders went out of business during the Depression, Mr. Meyerhoff continued to build houses. He built them in Brooklyn, Northwood, Waverly, wherever he could get land and financing.

"What else was I going to do?" he says, "People had to have houses and I had to eat."

Bud Meyerhoff, who joined the business in 1948, shortly after graduating from the University of Wisconsin, remembers his father "worked like hell" during the Depression.

"But, you know," he adds, "the only way I knew there was a Depression was by counting our cars. We always had two cars. Then, all of a sudden, we only had one car. That lasted for about two years and then things must have gotten better because we returned to being a two-car family."

Despite his father's workload, Mr. Meyerhoff says, "dad always found time for the family." He remembers the two of them used to get down on the floor after dinner to shoot marbles.

"My wife would probably say I didn't give [the children] enough time." Joe Meyerhoff says. "But I gave them as much as I thought they needed. I tried to be a good father as well as a good provider."

"He was a marvelous father," Mrs. Meyerhoff says. "The children [Peggy Meyerhoff Pearlstone, who died in 1974. Eleanor Meyerhoff Katz, who lives in Florida, and Bud] adored him; they still do. He wasn't terribly strict, but he made it clear he expected certain thing of them, and if he said 'no,' it was 'no,' and they knew it."

Shortly after the war ended, Joe Meyerhoff decided it was time to begin giving something back. He started arranging his business affairs so he could devote more time to volunteer activities.

He became president of the state and national home builders' associations. He got involved in Jewish charities, first as campaign chairman and then as president of the Associated Jewish Charities and Welfare Fund of Baltimore.

He served on the building committees of the Jewish Community Center, the Baltimore Hebrew College and Provident Hospital.

He headed the Israel Bond Drive in 1953 and was named to the national campaign cabinet of the United Jewish Appeal in 1955. Six years later, he became national general chairman of the UJA.

He was president of the Palestine Economic Corporation, which later merged with the Israel Discount Bank, and financed several capital projects in Israel, including a $20 million pipeline from the Red Sea to the Mediterranean.

He was appointed to the Maryland Board of Public Welfare in 1953 by Governor McKeldin and later represented the board on the Maryland Planning Commission.

He became chairman of the Planning Commission when it was reorganized in 1959 and, at his urging, the state built Gunpowder State Park and acquired a large part of the land now being developed at the University of Maryland's downtown complex.

(A local developer calls acquisition of the downtown land "a stroke of genius. . . . Can you imagine what the land would cost if [the state] had to go out and buy it today?"]

Then, in 1952, a serious rift developed between Joe Meyerhoff and his yonger brother, Jack, who had joined the firm (then known as the Property Sales Company) in 1936.

Feuds among members of the two families reportedly affected relations between the brothers.

They quarreled, the business was dissolved and the assets were divided—in some cases, Mr. Meyerhoff confirms, simply by "taking turns picking them out of a hat."

The split was acrimonious. Jack Meyerhoff, who now lives in Florida, joined the Rouse company. Joe Meyerhoff formed the Joseph Meyerhoff Corporation. The brothers are "still bitter, still estranged," according to family sources.

In the 1960s, shortly after Mr. Meyerhoff became president of the Baltimore Symphony Orchestra, a second bombshell struck.

Civil rights groups attacked him for maintaining segregated housing. They picketed his house, and threatened to picket a performance of the BSO at the Lyric, but later called it off.

Mr. Meyerhoff says he resisted renting to blacks because he "had a responsibility to the people already living in [the apartments]."

Besides, he says, "I didn't want it to be a voluntary thing, with some doing it and some not, I wanted a law making [open-housing] compulsory for everyone."

Those who know Joe Meyerhoff say they "can't imagine a less likely candidate" for racist.

"It's absurd to think that this man was—or is—in any way prejudiced," says George L. Russell, Jr., an attorney and former associate judge of the Supreme Bench of Baltimore City, who worked with Mr. Meyerhoff on the Provident Hospital building committee in the mid-1960s.

"Without Mr. Meyerhoff, there wouldn't have been a new Provident Hospital. He was concerned about the plight and the health of black people and his commitment to the black community was unparalleled."

So, as it turned out, was his commitment to the Baltimore Symphony Orchestra.

He remembers the day an informal delegation from the symphony visited his office in 1964 and asked him to "help rescue" the floundering symphony orchestra.

Until then, he says, he and his wife had been subscribers and modest contributors.

But not much else.

"I enjoyed going to concerts, and I went whenever I could, but I certainly wasn't actively involved in it. I believed in it as a community activity, as a cultural resource. I think cities should have good orchestras. They help attract people."

Mr. Meyerhoff says he went home and told his wife he'd been asked to become head of the symphony.

"I laughed and said. 'Can you imagine that? I wouldn't have that headache for anything in the world.' She looked at me and said, 'Why not? Somebody's got to help.' "

"My husband's a very dedicated, determined person," Mrs. Meyerhoff says. "Once he starts something, he's going to see it through. When he told me they wanted him to be president [of the symphony] I said, 'Well, you've been looking for ways to help. Here's your chance.'

"Of course, I had no idea it would come to anything like it has. He put practically every brick in that building."

Just as he declines to take full credit for his business success ("No one builds a business alone, he has to have help"), Joe Meyerhoff refuses to say he was responsible for bailing out the Baltimore Symphony Orchestra.

"Ive had so much help it's unbelievable," he says.

That help, be adds pointedly comes from every sector of the community. Not just Jews.

"I get awfully tired of hearing how if it wasn't for the Jewish community there wouldn't be ajy symphojy—or any kther cuhtural activity in the city, for that matter* It's not true."

While most of the top 10 contributors tk the symphony are indeed Jews, he concedes, the same is not true of those who have contributed $100,000 or more, or of those on the symphony's board of directors.

Only about 30 percent of the $100,000-and-over contributors, and less than a quarter of the 63 board members are Jewish.

"But what goddam difference does it make, anyway?" Mr. Meyerhoff demands. "We're not in a popularity contest. We all want what's best for the city. If someone says, 'Here's a gift,' who the hell cares if the person giving it is a Jew or a Martian? He's giving it, isn't he?

"I take pride in being a Jew. But I also take pride in giving—and I don't give because I feel I should, I give because I believe in it. If I didn't, I couldn't go out and ask others to give their time and money to the project. They'd see right through me.

"Besides, once you've taken care of your children and your grandchildren, what are you going to do with your money? You're sure as hell not going to take it with you. So why not spend it? Why not do what you can to help make life a little richer for others? I think that's a pretty nice legacy."●

RESCUE AT SEA

● Mr. COHEN. Mr. President, for the five crew members aboard the *Robert Powell,* December 12 will be remembered as a day of horror—and heroism. Fifty miles off the Maine coast in a blinding snowstorm on a wave-tossed sea, the 124-foot fishing trawler began taking water through its engine room and started sinking into the Atlantic Ocean.

During the 3 hours between 11:30 a.m. and 2:30 p.m., Capt. James Dow learned that Coast Guard helicopters were grounded and that its nearest rescue vessel was 12 hours away. The boat that was later to reach the Robert Powell was another fishing vessel, the Kathleen and Julie II, captained by a 23-year-old fisherman whose persistence and bravery were to be demonstrated in a remarkable rescue. Thomas Bayley, of Scarborough, was a real-life hero that day.

The following account of that Sunday's dramatic events, written by Kendall Holmes of the Maine Sunday Telegram, tells of the various attempts to spot the sinking Robert Powell in the stormy Atlantic, and of the desperate, last-resort efforts by a young fisherman to hoist five nearly freezing men aboard his boat. I offer this inspirational story to my colleagues as evidence that the spirit which traditionally has marked the New England fishing community is as strong today as ever before.

I ask that the article be printed in the RECORD.

The article follows:

[From Maine Sunday Telegram, Dec. 19, 1982]

RESCUE AT SEA: A LITTLE LUCK, A LOT OF HEROISM SAVE THE ROBERT POWELL'S CREW

(By Kendall Holmes)

It was one of those cold, cloudy and forgettable days along the Maine coast last Sunday. Fifty miles out to sea, a true-to-life drama was unfolding—a series of events from which legends grow and from which heroes are made.

Early Sunday, the weathermen had been predicting a snowstorm would sweep up the coast, the year's first major snowfall. The intense storm veered out to sea instead, where it whipped the Atlantic into an icy caldron.

Heavy snow and sea smoke reduced visibility to near zero.

Gale winds were kicking up 25-foot swells.

The temperature was near zero.

And the Robert Powell was sinking.

It had been a leisurely morning for the Robert Powell's crew. Two days earlier, the crew had left Portland harbor for a 10-day fishing trip on the Georges Bank, about 120 miles northeast of Cape Cod.

Now, because of the snow and the winds, the crew was laying off for the day. They stopped fishing, pointed their 124-foot side trawler into the waves and were weathering the storm.

Lamond "Snooky" White, 36, the Powell's cook, had stood watch until about 8:30 that morning. Afterward, he went below to take a nap.

White awakened shortly before 11 a.m., fixed himself a cup of coffee and started to cook lunch. He fixed a dinner of pork chops, boiled potatoes, string beans, sauerkraut and salad. It was a dinner that would largely go uneaten. For about the same time White began cooking, the Robert Powell's engineer, Daniel Dow, noticed his ship had a problem.

A leak had developed somewhere in the vessel's engine room. Water was pouring into the engine room quicker than a pump could get rid of it.

Dow, 48, walked up to the wheelhouse to tell the captain—his brother—about the problem. "I was having a good read when he came in," said Capt. James Dow, 32. "I just had about 50 more pages to read in Centennial," James Michener's 909-page epoch about a Colorado town.

Daniel Dow returned to the engine room to look for the source of the leak. He couldn't find it. The vessel was taking on more water. At about 11:30, Daniel Dow relayed this information to his brother, who decided he should contact the Coast Guard and some other fishing vessel in the area.

At first, neither of the Dow brothers thought the problem was significant.

The Robert Powell—named for a captain who died at dea of a heart attack—was not the type of vessel that anyone expected to sink. The 16-year-old vessel had a steel hull and a good reputation. It was part of the fleet of the Rockland-based F. J. O'Hara Corp. Fishermen will tell you that O'Hara maintains his fleet better than almost anyone on the East Coast. Indeed, the Powell had been drydocked for about six weeks last summer for an overhaul. "They maintain high standards," Capt. Dow was to

say later. "In 55 years, they had never lost a boat."

But back in the engine room, the leak was intensifying. While Capt. Dow hadn't yet conceded that his ship might sink, he knew he had a problem, and he wanted help.

The messages he was receiving back from the Coast Guard weren't encouraging. Coast Guard helicopters, based at Cape Cod, couldn't take off because of the snow and wind. The nearest Coast Guard ship was 12 hours away.

Closer to the scene was a Japanese fishing trawler and two local fishing vessels. One was named the Tripolina, the other, the Kathleen and Julie II.

Around noon, the captains of all three vessels decided to head toward the Robert Powell. Despite the limited visibility, finding the Powell wouldn't be a problem. The boat was equipped with equipment accurate enough for Capt. Dow to plot his position to one-tenth of a microsecond of longitude and latitude—or within 50 feet.

About the same time, the Dows told their other three crew members of their boat's worsening problem. White had just finished cooking lunch. Only deckhand Clarence "Chuck" Doyle, 54, had an appetite after learning of the boat's problems.

White himself was getting nervous. Three months before he was born in 1950, his father and uncle both died in a fishing accident off the Maine coast. Now, White wondered if he might face the same fate. He left the galley and went to his room to get a pack of cigarettes. As he walked, "I could see a lot of water coming in. I didn't feel too hungry after that."

As the Powell continued to fill with water, Capt. Dow urged his men not to get shook up. But he told them to get ready, just in case something happened. Crew members donned warmer clothing, put on life preservers and checked the life raft. Capt. Dow continued to relay information about his boat's condition and location.

Only one of the three vessels trying to reach the Powell was succeeding. It was the Kathleen and Julie II, a 95-foot boat captained by 23-year-old Thomas Bayley of Scarborough.

Bayley began fishing three years ago. A year ago, he took his father, who owns the Kathleen and Julie II.

When the Robert Powell's first distress calls came in, Bayley was more than 30 miles away. The Tripolina was much closer—apparently only about 11 miles away. But the Kathleen and Julie II was upwind from the Robert Powell. It was able to head at the sinking ship at a speed of 8 to 9 knots an hour, while the Tripolina—trying to head back into the storm—could make no headway. "With the storm, we were heading in that direction anyhow," Bayley's cook, Roland Caron, said later. "We decided to go for it because we thought that maybe we could be of some help."

Back inside the Robert Powell, the water was getting deeper. It filled the engine room and still, it kept rushing in. About 2:30 p.m., the boat's electical system was overcome with the water. Capt. Daw's radio went dead.

In another 15 minutes, he was forced to order his crew to abandon ship. Then, as today, the source of the leak remained a mystery.

Dow's crew had been busy making all the preparations they could think of—all the while hoping that another boat would soon appear out of the fog and snow. As the crew prepared to abandon ship, deckhand Carl Rogers, 59, grabbed two cans of Schlitz beer and stuffed them into the pockets of his jacket. He did it, he said later, "kind of as a joke, a lark." The rest of the crew appreciated his humor, he said.

The Robert Powell "rolled down hard" when a wave hit it a few minutes later, Rogers said. "We all had to make a mad dash towards the raft. When they roll down and then they don't roll back up again, you know you're in trouble."

The crew tumbled into a 4-by-8 foot raft. It was covered on its sides and top by a fixed canopy, and on its two ends by curtains. Water immediately began sloshing in through the curtains, and the crew began bailing. "As we were bailing, one of the beers fell out of my pocket," Rogers said. "The engineer picked it up and said, 'This must be yours.' I was the only one aboard who drinks Schlitz."

As crew members continued to bail, they had one immediate problem: Their raft seemed to be sinking. Capt. Dow recalled later that when he and his crew first boarded the raft, it had bumped hard against the sinking Robert Powell several times. "What I found out later was that the release valve was set . . . so that if you do bounce off something you don't blow a compartment, you just lose air. We thought we were leaking and sinking. We may not have been."

Not that it mattered as nightfall approached, as the raft filled with water and as several crew members' faces began to turn purple from the cold.

One of the last things the Coast Guard told Capt. Dow before the Robert Powell's radio went dead was that a Canadian Air Force plane was in the area, trying to locate the ship.

A plane appeared soon after the crew tumbled into the raft. Members assumed it was the Canadian plane. In fact, it was a Brunswick Naval Air Station P-3 Orion, heading to Brunswick from a five-month stint in Iceland.

The plane's pilot, Dewey Nelson, had picked up a call from the Coast Guard and decided to join in the search. He located the sinking Robert Powell, located the life raft and then spent about 45 minutes circling the area.

Rogers remembers sighting the Orion once. Capt. Dow thinks he saw it three times. Low on fuel, the plane then returned to Brunswick. As it left, it dropped a radio beacon into the water—a tool to help Bayley locate the raft.

But Bayley was doing fine on his own.

Using readings supplied by Capt. Dow before the Robert Powell sank, Bayley and several other fisherman had been plotting the troubled boat's course. They found the boat was drifting southwest at 4 miles per-hour.

Bayley stayed on that course after he lost contact with the sinking ship. He assumed the raft would drift in the same direction as had the boat. he told his father later that he never varied from this course.

As the Kathleen and Julie II approached the area of the life raft, Bayley's crew members took turns standing watch on the bow of the boat, and on its rigging—trying to find the raft. They searched for nearly an hour and a half.

It was shortly before 5 p.m. when the drama began to reach its climax. Crew member Peter Eagen was standing watch on the bow of the Kathleen and Julie II. Eagen is from Rockland, as were four of the Robert Powell's five crew members, and he had fished in the past with some of the Powell's crew.

The crew in the life raft spotted the Kathleen and Julie II and they sent up a flare. Eagen spotted the flare. "Another 15 minutes, we'd have been gone," White said later. "The water was up above our waists in that raft."

The adventure was far from over, however, for Bayley still had to steer the Kathleen and Julie II through rough seas, getting it beside the raft without running it over. And then he had to figure a way to hoist the crew out of the raft. Seas were so rough that, "one minute we'd be looking down at his deck, the next we'd be looking up at the bottom of his boat," Capt. Dow said.

Bayley got his boat alongside the raft. His crew tossed a rope overboard. With Dow's crew hanging onto one end of the line, Bayley's men pulled the raft to the stern of the Kathleen and Julie II. They hooked the rope to the boat's net reel and tried hauling the raft on board.

But the raft was too soft, too full of water. The reel wouldn't work.

"No one had any idea of how to get us up," said White. "But finally, the captain, he comes out of the wheelhouse and hollers to us that 'We're not going to lose you now.' And then he hollers for somebody to grab his feet."

Bayley was ordering his crew to lower him down a ramp at the stern of his boat, head first. "Tom leaned over the stern ramp. We grabbed his feet and he bellied down the ramp. We all had a hold of him, and he just pulled the guys up, one by one." Bayley's cook, Caron, said later.

The rescue was completed.

And while the Robert Powell's crew was cold, wet and tired, all were uninjured. Later that night, Rogers drank the two cans of Schlitz he had pocketed as his ship went down. A day later, the Robert Powell's crew members were reunited with their families when the Kathleen and Julie II steamed back to Portland harbor.

Bayley was modest about his role in the rescue. He volunteered no information about how he had lowered himself over the side of his boat. In fact, by the time word of his feat began to circulate around the fishing community, Bayley and his crew had resumed their fishing trip. They are due to return Monday or Tuesday.

Caron, 30, stayed behind on personal business. "We were lucky and they were lucky," he said later in the week. "Just think of all those things that could have gone wrong and didn't. You have to believe in something."

The members of the Robert Powell's crew, meanwhile, began to pull their lives back together. All must now look for new work.

When reunited with his wife Monday night, White promised he would spend the holidays at home with her and his two children. He promised not to seek work again until after New Year's Day. The new job, as the old, will be with a fishing boat, said White. "It's the only life I know."

ATTACKS AGAINST MEMBERS OF THE LEGAL SERVICES CORPORATION

● Mr. ARMSTRONG. Mr. President, I have been perplexed to read the recent attacks against members of the Board of Directors of the Legal Ser-

vices Corporation for their acceptance of compensation for their time spent on Corporation business. I have looked into this matter and have learned this is not a new practice. Members of the Board have been paid a daily consultant fee since 1975.

What is new apparently, is that this Board is taking seriously its statutory responsibility to insure that the Legal Services Act is complied with by those who received over $225 million in grants and contacts from the Corporation this year. In vigorously enforcing the act and instituting reforms this Board stepped on the toes of those who profited from the status quo, and I cannot help wondering if this attack on the Board members, over the consulting fee issue, retaliation for the reforms this Board has instituted such as the prohibition on the practice of laundering Legal Services Corporation funds through its local programs to fund other organizations; prohibition of lobbying with taxpayer funds which strictly enforces the terms of the last continuing resolution; and the action taken by this Board to force local programs to either or properly expend over $41 million in unspent fund balances which this Board discovered had been improperly banked by local programs.

It appears to me the $150,000 paid in fees to 11 Reagan appointed Directors has not been wasted, it may even be the best spent money in the Legal Services budget. It was spent to insure that the $241 million given by the Congress to this program was lawfully used. To insure this, the Reagan Board had to work harder, spend more time, and therefore spend more money to change the status quo than the prior Boards which maintained the same status quo which Congress found totally unacceptable.

For example, one Board member, William J. Olson, was compensated $19,000 for over 650 hours devoted to Corporation business. He attended 21 of 28 of the Board's Committee and Board hearings and meetings in 1982—only 9 meetings of any kind were held in 1981—he served as Chairman of the Board from January through March, coauthored regulations with complicated procedures on denial of refunding for recipients and limitations of class actions, participated in the review of over 350 applicants for the position of President of the Corporation, worked with the Justice Department to defend successfully the Reagan Board against five separate judicial attacks by former Board members, participated in protracted confirmation hearings before the Senate Committee on Labor and Human Resources, and worked on all aspects of Corporation business, almost always at total odds with the holdover staff at the Corporation.

Rather than profiting on this work, he lost substantial income in the process. The $29 per hour paid to Board members was of course well below his hourly billing rates as a private attorney, but it was also below the cost of his office overhead expenses. Therefore, for every hour he worked for the Corporation in 1982 he had to subsidize the costs of maintaining his law office from other legal work.

Mr. Olson has devoted to Legal Services almost one-half of this year's billable time at these same rates, while spending substantial sums to hire other lawyers at much higher billing rates to do work for his other clients.

When we ask an individual to serve on the Board of a quasi-governmental corporation such as Legal Services, or the Corporation for Public Broadcasting, or the Overseas Private Investment Corporation, or the Board of Governors of the Postal Service, we ask them to devote the time necessary to perform their statutory responsibilities. During the Senate confirmation hearings these Board members were asked to commit the time necessary to do the job. This Board did what we expected, and performed better than any prior Board of the Corporation.

It may be easy to demagogue about the money paid to Directors to govern a quasi-public Corporation but it is not fair. But with the flagrant violations of the law by this Corporation that have been addressed by this body on many occasions, to not have spent substantial time to bring the program into line with the law would have been unforgivable.

Those who oppose reform at the Legal Services Corporation can be expected to attack the reformers. But I urge those who support reform at the Corporation to look twice before they criticize those who have fought daily for 1 year to successfully achieve those reforms which the Congress had been unable to otherwise obtain for a decade.

Those who have given of their time and talent at substantial personal financial loss, such as Mr. Olson, deserve our appreciation. They have mine.●

SOLDIER OF PEACE

● Mr. MOYNIHAN. Mr. President, I rise to call to the attention of the Senate the obituary of a major figure in 20th-century science, an outstanding public servant and a tireless crusader for disarmament and world peace. This obituary of George B. Kistiakowsky—"Kisty" as we who were privileged to know him—appeared in the Boston Globe of December 8.

Professor Kistiakowsky was an immigrant to this blessed land an he was possessed of that special patriotic fervor common to those who find refuge and safe harbor at our shores. Born in Kiev in the Ukraine, he was a young—then a sergeant—recruit in the Army that battled Lenin's Bolsheviks after the 1917 revolution. Attaining his doctorate in Berlin, he came to America and quickly made a place for himself in that international exile elite which forged new pathways in science and led the world into the nuclear age.

As head of the Manhattan project explosives division at Los Alamos, N. Mex., he designed the trigger for the first nuclear explosion and was witness to the event. After observing the test at Alamagordo on July 16, 1945, he was quoted as saying:

I am sure that at the end of the world—in the last milisecond of the Earth's existence—the last human will see what we saw.

Later, as science adviser to President Eisenhower and in private life, he campaigned for a test-ban treaty, for the SALT agreements and for genuine arms reduction. A key figure in the development of nuclear weapons, disarmament was his passion.

I ask that the obituary as it appeared in the Boston Globe be printed in the RECORD.

The obituary follows:

GEORGE B. KISTIAKOWSKY, PRESIDENTIAL SCIENCE AIDE

(By Edgar J. Driscoll, Jr.)

George B. Kistiakowsky, internationally known professor emeritus of chemistry at Harvard University, the second person to hold the office of assistant to the President for science and technology and a key figure in the early development of nuclear weapons, died yesterday. He was 82.

Following a 3½-year battle with cancer, he died quietly in his sleep at his home on Hudson St., Cambridge, where he lived with his wife, Elaine.

Prof. Kistiakowsky retired a Abbott and James Lawrence professor of chemistry in 1971, after 41 years on the Harvard faculty. Upon his retirement, the Kistiakowsky lectureship in Harvard's chemistry department was established in his honor.

For his work on the first atomic bomb in World War II, he was awarded in the President's Medal of Merit by President Harry S. Truman. He received the Medal of Freedom, the nation's highest civilian award, from President Dwight D. Eisenhower, and President Lyndon B. Johnson later awarded him the national Medal of Science.

In recent years he became one of the nation's most vigorous and respected crusaders against the nuclear arms race.

AN EXPERIMENTALIST

Widely honored for his scientific achievements, the lanky (6-feet-3), balding, bright-eyed scientist was an experimentalist rather than a theory-maker, a shirt-sleeve chemist who preferred to work in the laboratory himself to investigate a problem. Through the years colleagues praised his wide choice of key problems to probe, his skill in devising the means for carrying out laboratory tests, and his shrewd interpretation of experimental results.

As one of the world's foremost experts on explosives. Prof. Kistiakowsky prepared the triggering device that used chemical explosives to detonate the first atomic bomb. He

was chief of the Los Alamos Laboratory of the Manhattan Project at the time.

When the top-secret bomb was exploded in the New Mexico desert in 1945, he recalled: "I was up close, but didn't have sense enough to hop into a trench just before the bomb went off. I was knocked into it—with the other boys, though—when the bomb went off."

He, like other scientists attending that historic event, was overwhelmed by what they had wrought. "What the last human being on earth will see is what we have seen this morning," he told the New York Times science reporter.

Thirty-seven years later, he told The Boston Globe that today's nuclear stockpiles and scenarios are "unbelievable" and that most of his surviving colleagues are appalled by what has grown out of a rudimentary atomic device.

At a later date he had to show his President's Medal of Merit to officials of the town of Lincoln, who had questioned his qualifications for dynamiting tree stumps on property that he owned there.

As chairman of the Council for a Liveable World, Prof. Kistiakowsky, known as Kisty to his friends, pushed hard in recent years for world disarmament and traveled the globe calling for control. "After working so long on those weapons, I came to the conclusion the time had come to control them," he said in 1980, warning of a nuclear wipeout unless there is stern arms supervision.

He also believed firmly that "scientists can no longer live in an ivory tower supported by public funds. They must step down from the tower and become concerned with social issues of the day," such as pollution and spoilage in the environment, more civilian applications to basic research and more progress in the health sciences, he said.

CHAIRED EISENHOWER COMMITTEE

The Russian-born scientist was Special Assistant for Science in the Eisenhower Administration, and chaired Eisenhower's Science Advisory Committee. [The first person to hold that position was James R. Killian, former president of MIT.] Prof. Kistiakowsky served on that body from its inception in 1957 until 1963, when his appointment ran out. However, he continued to work with Defense Secretary Robert McNamara under the impression that his activities would help de-escalate the Vietnam war. When this did not happen, Prof. Kistakowsky severed his connection with the Pentagon in 1967.

When he was named Eisenhower's Special Assistant for Science and Technology, the highest scientific post in the nation, he faced a stormy set of controversies, such as the space program, just then getting started, and negotiations for the test-ban treaty. He resigned to return to Harvard 1½ years later.

He also was delegate to Geneva talks on the reduction of the danger of surprise nuclear attacks and was a member of the Ballistics Advisory Committee of the Air Force and Defense Department.

As a working scientist, Prof. Kistiakowsky concentrated on the kinetics of chemical reactions. Besides the atom bomb, he had taken a prominent part in developing jet propulsion and bazookas.

One of his earliest contributions in World War II was a special explosive, known by the code name of Aunt Jemima. This was developed at the explosives research laboratory in Bruceton, Pa., which he established and ran as chief of the explosives division of the National Defense Research Committee. At his suggestion, the explosive was made to resemble flour and was mixed with flour. Manufactured by the ton, it was then smuggled into Japanese-held areas of China for use in sabotage. It could be passed off as flour and even baked into bread without exploding.

"To test it," the down-to-earth scientist said, "we chewed some of it and then took it out and blew up a bridge with it."

HIGHEST CHEMISTRY HONOR

In addition to the President's Medal of Merit and the Medal of Freedom, Dr. Kistiakowsky held the King's Medal of the United Kingdom for Services to the Cause of Freedom, the exceptional Service Award of the U.S. Air Force, the Willard Gibbs Medal, the Ledlie Prize, the Nichols Medal, and the Joseph Priestly Award of the American Chemistry Society, the highest honor in U.S. chemistry.

He also held honorary degrees from Harvard, Princeton, Columbia, Brandeis and Oxford Universities; the Universities of Pennsylvania and Rochester, Williams College, Carnegie Tech and Case Institute of Technology.

His Harvard citation read: "Swift and explosive force, your imaginative talents have both widened our knowledge of chemical structures and enriched the life of this university."

He was a former vice president of the National Academy of Sciences, and held memberships in the Royal Society of London, the American Philosophical Society and the American Academy of Arts and Sciences. He also was an honorary fellow of the Chemical Society of London and a member of the American Chemical Society.

In 1973, he was named a visiting scholar at MIT's Center for International Studies.

A man whose face reflected both intelligence and humor, the distinguished physicist-chemist was chairman of the department of chemistry at Harvard from 1947 to 1950. For several years he was on the Admissions Committee for Harvard College and was a member of the faculty committee on athletics, regularly attending home football games and other sports events. An avid athlete, he believed in keeping fit. In earlier years, one of his passions was horseback riding. He continued skiing until the age of 75 when sailing and gardening became his principal outdoors activities.

Friends like to recall the time a fellow professor was building his own terrace and forgot to clean out his concrete mixer at the end of the day. Next morning its contents were hard as rock. Coming to the rescue, Prof. Kistiakowsky studiously calculated the exact charge to blast out the concrete without blowing up the mixer. It worked like a charm.

WAS BORN IN KIEV, RUSSIA

Prof. Kistiakowsky was born Nov. 18, 1900, in Kiev, Russia, the son of Bogdan Kistiakowsky, a professor at Kiev University, and Mary (Berenstam) Kistiakowsky. His grandfather and great-grandfather also were university professors in Russia. He attended private schools in Moscow and Kiev.

During the Russian revolution of 1918–1920 he fought the Bolsheviks as a tank soldier in the White Russian Army. After its defeat, he spent almost a year in concentration camps in Turkey and the Balkans, but finally reached Germany where he entered the University of Berlin. There he obtained his PhD after four years of study under the renowned chemist, Max Bodenstein.

Prof. Kistiakowsky, who always held his slender frame with ramrod stiffness, worked with Prof. Bodenstein after graduation, then came to this country in 1926 as an International Education Board Fellow at Princeton University. He became an assistant professor at Princeton and taught there two years, before joining the Harvard faculty in 1930. At Harvard he was assistant professor of chemistry 1930–33; associate professor 1933–37; and professor of chemistry 1937–59 and from 1961 until retirement. He became a naturalized citizen in 1933.

He had served as chairman of the science board and a director of Itek Corp. and as a director of the Cabot Corp.

Prof. Kistiakowsky leaves his wife, the former Elaine Mahoney; a daughter by his first wife, Vera Kistiakowsky who is professor of physics at MIT; and two grandchildren, Marc Laurenz and Karen Marie Fischer.

Funeral services will be private. Memorial services will be held at Harvard.

THERE SIMPLY IS NOT ENOUGH TIME

George Kistiakowsky made his last public remarks in an editorial in the December issue of the Bulletin of the Atomic Scientist, commemorating the 40th anniversary of the first nuclear explosion.

He closed the editorial with these words:

"The political leaders of powerful nations continue uttering pious words about their love of peace, but the arsenals keep growing, the stability of nuclear peace is being undermined and the proposals for arms controls negotiations on both sides are so unbalanced as to be obviously non-negotiable.

"As one who has tried to change these trends, working both through official channels and, for the last dozen years, from outside, I tell you as my parting words: Forget the channels. There simply is not enough time left before the world explodes. Concentrate instead on organizing with so many others who are of like mind, a mass movement for peace such as there has not been before. But the threat of annihilation is also unprecedented. Then lead the movement so that, instead of the few now in Washington, many will be elected to Congress who have a true and unbreakable commitment to search for peace."●

AFGHANISTAN: 3 YEARS UNDER THE SOVIET BOOT

● Mr. PRESSLER. Mr. President, as we prepare to leave Washington at the end of this 97th Congress to join our families in the warmth and comfort of this holiday season, we should not forget that in numerous places around the globe others far less fortunate than ourselves will not be free to enjoy this Christmas. There are many in the world who today are subject to oppression. We must remember that it was 3 years ago during the Christmas season that the Soviets invaded Afghanistan, a nation that did not and could not pose a threat to Soviet national interest and security. Three years later, the Soviet occupation continues.

There are over 100,000 Soviet troops in Afghanistan today. There right to remain there comes exclusively from military might. The overwhelming majority of Afghani citizens reject their presence in Afghanistan. The Soviet presence continues to be resisted.

Many Afghani freedom fighters have lost their lives in this effort and large numbers of civilians have been the subject of reprisals. Chemical weapons are reportedly being used both against freedom fighters and innocent men, women, and children. Millions of Afghanis are refugees, having been forced to flee to shelter in neighboring Pakistan.

Three years after the invasion, there are no signs that the Soviets are ready to end their occupation. Despite heavy losses in Soviet personnel, it appears that the Soviets will not leave Afghanistan until they have created a permanent puppet regime in Kabul or placed some areas of that unfortunate country under direct Soviet control.

Mr. President, I ask that a December 16, 1982, article from the British newspaper, the Guardian, be printed in the RECORD. This article, based upon an interview with a highranking Afghani intelligence officer who has defected, suggests some possible Soviet plans for the future of Afghanistan. It makes for somber reading. I ask Members to remember the plight of Afghanistan as we give thanks for our own good fortune this holiday season.

The article follows:

INTERVIEW WITH LT. GEN. GHULAN SIDDIQ MIRAKI

(By Alexander Thomson)

Frustrated by the Soviet Union's humiliating failure to defeat the Islamic resistance movement in Afghanistan, the late President Brezhnev once planned to annex the entire country to the Soviet Union. Later, he wanted to dismember it and put the northern part of the country between the Soviet border and the Hindu Kush mountains under complete Soviet control instead of relying any longer on the Afghan Army and police to help to end the three-year-old rebellion.

Lieutenant-Genral Ghulan Siddiq Miraki, who gave these revelations here yesterday, is the highest-ranking Afghan intelligence officer to defect to Pakistan since the civil war began.

His account, in a wide-range and exclusive interview, disclosed the extent of confusion among Soviet advisers over how to escape from the Afghan quagmire. He also said that senior KGB officers were angry with Brezhnev's blunder in sending troops into Afghanistan in December 1979 and that the new Soviet leader, Yuri Andropov, as well as the then prime minster, Aleksey Kosygin, had opposed it.

Lt. General Miraki was one of only four deputies to the head of KHAD, the KGB-trained Afghan secret police. Western diplomats have confirmed his former status and career details. No one can totally discount the possibility that he might still retain a link with the KGB and be part of a disinformation campaign. But it is pointed out that the Pakistani authorities have given him an extensive debriefing and political asylum.

Speaking in the frontier city of Peshawar where he is being kept at a well guarded but undisclosed address by the Hezb-e Eslami-e organization, Lt. Gen. Miraki said that the Afghan leader, Babrak Karmal, was summoned to Moscow last December where he was instructed by Brezhnev to hold a national conference of the ruling PDPA which in turn would call a congress to end the party's international (as published) faction-fighting, and publicly endorse him as party leader and president.

With the increased legitimacy, Karmal could then call for massive Soviet reinforcements to defend Afghanistan. Once these Soviet troops were installed, Karmal would opt to join the Union of Soviet Socialist Republics. Karmal did call a national conference of the PDPA in March, the first such meeting since the 1978 revolution, but it lasted barely 30 hours, failed to unite the two warring factions of the party, Khalq and Parcham, produced no consensus and harmed Karmal's credibility.

A congress was out of the question. According to Lt. General Miraki, Brezhnev told Karmal that if they failed in this major task, Afghanistan would be dismembered—with nine northern provinces, including Kabul, coming under complete Soviet control. The rest of the country would be left to its fate.

The Russians were particularly interested in the northern provinces of Afghanistan which included Badakshan, Balkh, Jowzjan and Meymaneh. The people on the northern side of the Hindu Kush range are mostly of Uzbek and Tajik origins. They migrated to Afghanistan when the Russians took over the states of Central Asia. They still have the same Uzbek and Tajik culture and language, a fact which Russians clearly considered to their advantage while planning to take over these provinces.

Lt-General Miraki said that in conversations with senior KGB officials with whom he worked, it was clear that they felt that Afghanistan could have been controlled without the use force. The KGB view was that Brezhnev made a fundamental mistake by pursuing the revolution without taking account of local customs.

Lt-General Miraki insisted that his account of Brezhnev's plan was not a Kabul rumor but solid fact. He said he had heard it from a high ranking member of the government and a highly-placed Soviet source from Tajikistan.

During his interview in Peshawar, Miraki said he had been a member of KHAD, of its previous incarnations, for 25 years. In the early sixties he had gone to West Germany for specialist training, and before moving to Kabul he had been the commander of KHAD in the southern region with headquarters in Qandahar. One of his main responsbilities in Kabul was the running of KHAD's training centre for political commissars.

A Western diplomatic source in Islamabad confirmed the substance and this account of his career. But what has surprised diplomats is the revelation by the general that despite being one of the most senior KHAD commanders in Afghanistan he was also a key member of the fundamentalist Hezb-e Eslami-e organization which has close links with the Muslim Brotherhood and wants to create a pure Muslim state, adhering strictly to the Koran.

The general said he was in constant contact through couriers with the head of Hezb-e Eslami-e Gulbuddin Hekmatyar in Peshawar. Earlier this year, when the general had wanted to defect because he felt his life was in danger, he had been ordered by Gulbuddin to stay. He had manage to deflect suspicion by framing another KHAD officer in circumstances he would not make clear.

He again felt his life in danger last month and was given permission by Hezb-e Eslami-e to defect together with his wife, his son and his daughter. They drove in the general's car to a guerrilla-controlled area close to Kabul where they made contact with Hezb-e Eslami-e agents. From there the were taken to the Pakistani border.

With him during the interview was Brigadier (Habibullah Hidayati), the head of KHAD's "Department Five" which is responsible for infiltrating guerrilla groups inside Afghanistan and mounting operations against the Afghan resistance in Pakistan. He has also recently defected and says he is a Muslim brother. Both men spoke extensively about the power of the mujahedeen and how it had penetrated KHAD and almost every other government department.

Miraki says he is not the only member of KHAD who is a "Muslim brother." He says the organization is riddled with mujahedeen. Indeed, there are young resistance activists at the KHAD "academy" he ran in Kabul. They knew each other but he knew them all.

Western diplomats in Islamabad who keep a close watch on Afghanistan confirm the extent to which KHAD has been infiltrated. Indeed, all government departments, the army, the airforce and the police have men who are actively working for the mujahideen. The KGB is aware of this but there appears little it can do.

Guerrillas are regularly tipped off about imminent Soviet operations, wanted men elude dragnets, key resistance figures who are arrested manage to escape. Lt-General Miraki gave one example of a government attempt to roundup 56 resistance supporters inside the garrison in Ghazni three months ago. All but three or four managed to elude capture.

Lieutenant-General Miraki said he knew of plans to infiltrate Pakistan's sensitive Baluchistan Province where there are fears that the insurgency of the seventies by Baluchi separatists could be revived.

According to Miraki, in an attempt to ease the pressure on the overcrowded gaols, between 50 and 60 people were brought before the firing squads each day. Some of them he knew but could not help. Names and addresses were not recorded. "Many families think their relatives are still in gaol. But for many of them they are not. They are dead. Killed by the regime."

General Miraki said that the Russians were also resorting to more desperate measures in the countryside. He said there was evidence of chemical weapons being used. He quoted one specific example. In August of last year he said he was sent an official message from the KHAD chief in Bamain and a letter from the governor of the province saying that chemical weapons had been used against the mujahideen. But the wind changed direction and the gas was blown back on the Russians, killing many.

During a four-hour conversation, the spy chief turned guerrilla spoke of resistance operations inside the Soviet Central Asian republics, which he said were under threat. He said there was evidence of a revival of Islam; and Hezb-e Eslami-e cards were being widely distributed. He said he heard from Russian advisers that last September there was a week of clashes between guerrillas and police inside the Soviet Union north of the Afghan border town of Andkhvoy.

Miraki says the Kabul regime and its Soviet allies are using extreme measures in an attempt to regain control of the city, which almost nightly is subjected to bombing attacks, assassinations and hit and run raids by guerrillas. The general said that

there were widescale arrests of guerrilla suspects many of whom were shot out of hand. Others were subjected to beatings and electric shocks at KHAD interrogation centers. The repertoire of torture was more extensive than this, according to Miraki, but he became flustered as he tried to recall and recount some of the more gruesome methods used.

He spoke of suspects being confronted by their children and wives during questioning. If answers failed to come, the wife would be "abused," the children killed. He tried several times to be more specific but failed. If it was grotesque piece of acting it was exceptionally convincing. "Let me put it this way. Tyrants once tied a man's wrists and ankles to four horses and tore him apart. That is the only method they do not use in Kabul. It is worse than Genghis Khan, worse than Hitler."

Lt-General Miraki, Brigadier (Hidayat) and another recent defector, Air Force Brigadier Mohammad Sarwar Sinwari, the chief of operations at Kabul's Khwaja Rawash airbase, have all claimed that the bulk of the Kabul regime's efforts are directed against one resistance organisation, the Hezb-e Eslami-e of Gulbuddin Hekmatyar. They may not be impartial because all three happen to be members of the organisation. But it is remarkable, nevertheless that Gulbuddin has been able to recruit such high-level commanders into his fundamentalist party.

It is the most uncompromising party, a hard line, tightly disciplined group primarily opposed to the Soviet Union but also implacably opposed to "Western imperialism." Although some Western diplomats dismiss the importance of Hezb-e Eslami-e in the Afghan guerrila war, others consider him a major force to be reckoned with.●

A WITNESS KNOWN AS THREE DOTS AND HOW HE WAS PUT AT RISK

● Mr. HATCH. Mr. President, citizens will not help us fight organized crime if the Government that asks their help cannot assure their safety.

Organized crime exists. In some places, it runs and ruins the lives of an entire community. In one such community since the early twenties, very few have broken the ring of silence to confess or complain about organized crime. Those few that did have been cast, by those that they seek to expose, from jobs, homes and community if they were not killed instead.

In the late seventies, the U.S. attorney in that judicial district made another run at organized crime. He encountered exactly the same problems getting evidence.

One man the Government begged to come forward and help them was a man known as Three Dots. He came forward. The Government had no evidence against him. He had no record of past felonies or violence. He thought it was the right thing to do, to help. However, the investigated learned of his role, threatened to kill him and the Government offered him a way out, protection. He accepted their help. He had little choice. He was admitted to the U.S. Marshals Service witness security program.

Rather than secure him safety, the U.S. Marshals Service compromised it: First, by whom they put him with; second, by whom they used to move his furniture when he finally found a home; and third, by inadequate funding to meet his expenses at a time (a) when his wife was due to give birth, (b) when he had no permanent lodging, (c) when he had no permanent job, and (d) when he had no false identity to present to get employment or otherwise conceal who he had been.

Out of desperation, he told the press of his plight but not of the investigation or the tortuous route that brought him to Oklahoma. In short, he did not breach his security. Despite the fact that he preserved his anonymity, his desperate cry for help was sufficient to throw him out of the program, terminate him, just weeks before his child was born this past August. Broke, the Department promised him money to meet his expenses provided that he take a psychological test that, it was stated, might justify excluding him from the protection and funding that he would not have needed if he had turned his back on his Government when it begged he cooperate.

Three Dots asked me to help. He came to my offices. Through my special counsel, I asked the Office of Enforcement Operations in the Department of Justice to assure me that they would admit Three Dots to the program if he took the test. They repeatedly refused to give any such assurance.

An independent psychologist thereafter tested the witness known as Three Dots; he concluded that Three Dots was normal.

Following the preliminary investigations reflected by my remarks, I requested of the Associate Attorney General Rudolph Giuliani that the Department promptly reinstate the witness in the witness security program. It was the first and only communication I had with Mr. Giuliani. I was informed he was responsible for matters involving both the Office of Enforcement Operations and the U.S. Marshal Service.

On December 9, 1982, Associate Attorney General Giuliani told me in writing that he was "ready, willing and able to take the necessary action to solve this problem immediately," to give the assurance requested and readmit the witness. With that, the witness took the test, was readmitted, and has since been relocated.

I commend the Associate Attorney General for his prompt attention to this matter for ending the long night of terror for Three Dots and his family.

But more need be done. Perhaps not for this witness but for past and prospective witnesses. I beseech the Department of Justice to reexamine carefully the entire witness security program as it is fraught with failings that must be eliminated for they blunt or destroy any witness' willingness to cooperate.●

TRIBUTE TO VERNA KEAYS KEYES

● Mr. WALLOP. Mr. President, I would like to bring to the attention of the Senate the recent passing of Verna Keays Keyes (Mrs. A. C.), a native of Wyoming and a lifelong resident, who designed our State flag.

In 1916, after graduating from the Chicago Art Institute, Verna Keyes entered and won a competition sponsored by the Daughters of the American Revolution organization to choose a design for Wyoming's State flag. Her design of a white buffalo bearing the seal of the Equality State set against a field of blue was adopted by the Wyoming State Legislature in 1917, virtually unchanged from her original drawing.

In my view, Mrs. Keyes' distinctive design embodies the spirit of Wyoming and her people, and I appreciate the opportunity to bring her enduring contribution before the Senate.●

TRADE RELATIONS WITH JAPAN

● Mr. PERCY. Mr. President, one of the thorniest foreign affairs issues to confront the United States this year has been our trade relations with Japan.

A year ago our trade ambassador, David MacDonald, was negotiating in Japan to open that market further to American products. Our trade deficit with Japan has been running recently at over $10 billion with even wider deficits projected in the future. American businesses seeking to sell their products in Japan have encountered numerous trade barriers and have been frustrated in their efforts.

Certainly the Japanese have made an effort to open up their market more for foreign-made goods. Yet the Japanese market is still substantially more closed to foreign goods than is our own market. And when American manufacturers see the comparatively easy time Japanese companies have in entering our market, it makes this inaccessibility all the more frustrating. Ambassador MacDonald has recently certified in a report to Congress that there has been very little progress.

A number of companies now feel that we have been too tolerant of some Japanese trading practices in the United States and they have taken action to make trade fairer. One of the best known of these is the Houdaille Industries petition asking the President to exercise his statutory author-

ity to protect the American machine tool building industry by suspending the U.S. investment tax credit for certain Japanese machines.

Mr. President, this is an important and precedent-setting case. It is one that the Senate endorsed this week when it passed a resolution urging the President to act on the Houdaille petition. I am pleased to have been a cosponsor of this measure. Although it does not have the force of law, we hope it will send a signal to the Japanese that the U.S. Senate is growing increasingly concerned about the question of market access. Numerous Illinois businesses—from auto parts to machine tools to candy bars—have told me about their difficulties in selling their products in Japan. Yet their Japanese counterparts have almost unlimited access here. It simply is not fair and it is time for Japan to make fundamental adjustments in its approach to international trade.

The Houdaille petition is a complicated one but I have recently read an excellent explanation of it by former Senator John Sherman Cooper.

Mr. President, I ask that Mr. Cooper's statement on the Houdaille Industries petition be included in the RECORD at the close of my remarks and I commend it to my colleagues and others who have an interest in making our trade with Japan more equitable.

The statement follows:

THE OBSERVATIONS OF FORMER SENATOR JOHN SHERMAN COOPER ON WHY THE PRESIDENT SHOULD GRANT THE HOUDAILLE PETITION

The petition filed by Houdaille Industries, Inc., on May 3, 1982, asks the President of the United States to exercise the authority provided him by Congress to protect the United States against the unfair cartel policies and practices of Japan by suspending the qualification of Japanese-made numerically controlled machining centers ("NC machining centers") and numerically controlled punching machines ("NC punching machines") for the United States investment tax credit.

The authority of the President to grant such relief by Executive Order is provided by Section 103 of the Revenue Act of 1971, 26 U.S.C. § 48(a)(7)(D).

The responses of the Government of Japan to the petition describe the petition as unfriendly and without reason for its exercise. The facts, so precisely developed by Petitioner, however, contradict Japan's response. Japan's government and the individual members of its industry trade associations, particularly those which manufacture the two high technology NC products at issue and sell these products in the United States, are in open violation of Section 103 of the Revenue Act of 1971. They are now, and have been for years, subject to the penalty of the withdrawal of the investment tax credit, which Section 103 provides for the protection of the United States.

Opponents have argued that trade of the two products is a minor part of total U.S.-Japanese bilateral trade and presumably is of no great importance. This argument evades their larger consequences. The two Japanese NC products are of the greatest importance to the whole of the United States, its commerce, its industry, its workers, and its national security.

Supported by Japan's development and maintenance of its machine-tool cartel, various Government-controlled subsidies and other unjustifiable discriminatory practices, described by Petitioner, Japanese producers have captured approximately 50 percent of the U.S. market in NC machining centers and nearly 40 percent of the U.S. market in NC punching machines.

This situation has another, larger, and more dangerous effect upon the U.S. economy. U.S. industries of all types must change and improve their equipment and techniques and educate their workers in this era of necessary development of high technology products, if they are to compete in commerce and, indeed, if they are to survive. The U.S. economy should not be forced to be dependent upon Japanese advanced technology, secured by unfair trade practices and subsidies. The U.S. Government now contributes to this dependence by its unwise provision of an investment tax credit subsidy for the purchase of such Japanese manufactured capital goods.

Of chilling inportance in considering Houdaille's petition is the relation of unfair imports to the whole of our national security, both its economic and defense consequences. This surely will be recognized by the Administration.

Our defense industry, if it is to keep current with the sophisticated weapons, both strategic and conventional, being developed in the world today, must have available high technology components, produced in the United States, which cannot be shut off on the decision of a foreign country.

Concern over this issue has been voiced by members of Congress, in studies and reports of the Armed Services and other Committees. These concerns, including a C.I.A. memorandum, are cited throughout the petition, and particularly at pages 142-150. They speak of the "weaknesses" in the United States Defense Industrial Base.

"Weaknesses" in our Defense Industrial Base is a sad commentary on our defense posture. This ought to be an surely is a matter of preeminent concern to our Government and people. In this critical and dangerous period of world crises, the defense of the United States must be assured. It is a primary responsibility of our Government and people.

In considering the petition of Houdaille, it is important to recall the economic circumstances prevailing in the United States in 1971, which led to the enactment of the 1971 Revenue Act. The country was in a recession and, as the debate in the Congress unequivocally shows, there was growing concern over the adverse impact of foreign exports, on the deterioration of U.S. industrial production, and growing unemployment.

President Nixon quickly recognized the serious economic situation and initiated his New Economic Policy. In August 1971 he announced a wage and price freeze, suspended the convertibility of dollars into gold, and by Executive Order imposed a 10 percent surcharge on all imported goods.

The Congress acted promptly. On October 5, 1971, Chairman Colmer of the House Committee on Rules, reported for House consideration the bill, H.R. 10947, which had been introduced by Congressman Mills, Chairman of the Committee, and the ranking member, Congressman Byrnes. Congressman Mills, in his opening statements, emphasized that one of the important purposes of the proposed legislation was to promote industrial efficiency and employment in the United States through its job development investment credit. He and others, including the Minority Leader, Congressman Joseph Martin, commented on continuing U.S. balance of trade deficits caused by discriminatory trade practices of foreign countries.

I was a member of the U.S. Senate in 1971 when the Revenue Act of 1971 was enacted. I voted for its final passage and against several amendments whose purpose was to insure that the investment tax credit would be available unconditionally to foreign products equally with American products. I was present throughout the debate, was keenly aware of the recession which caused the economic measures taken by President Nixon, and supported the provisions of H.R. 10947.

It is significant that in evaluating the economic conditions which prevailed in 1971, the Congress and the Administration had the foresight to look to the future. H.R. 10947 authorized the President to forestall discriminatory trade practices which had contributed to the recession of that time by swift and decisive action. It is the same authority Petitioner asks the President to use today.

It is instructive to remember that the President's protective authority of H.R. 10947 drew upon criteria found in section 252(b) of the Trade Expansion Act of 1962. The Trade Expansion Act of 1962, H.R. 11970, was initiated by President Kennedy, also in a time of recession, with the predominant purpose of increasing fair, competitive world trade and thereby increasing employment and economic activity in the United States.

I was a member of the U.S. Senate in 1962, during the consideration of H.R. 11970, heard the debate, and voted for final passage. During the debate members protested the increase of foreign exports and consequent narrowing trade balances as a factor in the recession. The Congress responded by granting authority to the President to act decisively to meet the challenge of cartels, foreign imports and products, and other unjustifiably discriminatory practices. President Kennedy signed the bill into law.

In enacting the Trade Expansion Act of 1962, the Administration and Congress were careful to include a delegation of authority to the President to protect United States commerce.

The Revenue Act of 1971, supported by President Nixon and the Congress, took similar precautions to protect the United States by providing to the President authority to act against foreign exports by suspending the gift of the U.S. investment tax credit, when a country "engages in discriminatory or other acts (including tolerance of international cartels), or policies unjustifiably restricting United States Commerce."

It was not a hasty decision, but one thoughtfully worked out in the House and Senate. The House Ways and Means Committee and the Senate Finance Committee wrote different versions for section 103. Amendments offered to delete or weaken the language of section 103 were debated and defeated. The final version, still in force today, was adopted in the House-Senate conference, then approved by both Houses, and was in the bill signed into law by President Nixon.

If the President invokes the authority provided to him, it may be asked what effect

would it have upon Japan, which protests to vigorously and defensively against its use.

It would not prevent Japan from continuing to export the two NC products to the United States. Indeed, after the United States industry is given a reasonable period of time in which to recover from the unfair Japanese trade practices, Japan could earn the privilege of having its NC machining centers and NC punching machines once again qualify for the United States investment tax credit subsidy if it will offer these products in fair competition with similar U.S. products, through elimination of its cartel and other discriminatory practices, which it has fostered for many years with full knowledge of the penalties of section 103 of the 1971 Act.

Since Japan has not observed fair trade practices, its two NC products should be denied an unusual and wholly unreasonable benefit—the investment tax credit established for the benefit of U.S. industry—which the Japanese machine-tool industry has enjoyed as a gift, while, under the guidance of its government, this industry has dealt unfairly with U.S. industry, workers, and U.S. security.

What effect would the President's action have on other countries?

It may be argued that at a time of world economic difficulty when international meetings scheduled to commence this November will consider certain trade, currency and monetary matters, it would be disruptive for the President to take the requested action which is his right. In my judgment, however, the present moment—before these important international meetings get underway—is precisely the right time for the President to take this action and thereby express the commitment of the United States to free, nondiscriminatory trade. It would be a firm statement of U.S. standards to which nations similarly committed could not object, and the conviction such an action would express should enhance the leverage of the United States in its essential task of correcting unfair trade practices.

If the United States allows Japan to continue its unfair trade practices, and fails to act against the unfair takeover of United States markets by these two NC Products from Japan, by using the penalty approved by Congress, it would be a signal to other countries as well as Japan that the United States is not strong in its commitment to free and fair trade, and that unfair practices against it will be tolerated.

What effect would decisive action by the President have in the United States?

I do not know that it would have immediate economic effect. But American industry and American workers—many of them tragically out of work because of the unfair export of their jobs to Japan—would have the assurance at this very difficult time that the Government of the United States is concerned with their interests, and will protect them fairly and wisely against discriminatory practices in world trade. The present deficit in our balance of trade, of approximately 24 billion dollars, deserves action.

It would give to U.S. industry the necessary confidence to use its resources to develop the high technology products upon which its future, that of American workers and the American economy depend.

The requested Presidential action is also of vital importance for the protection of our national security. The American defense industry must not fall behind Japan in high technology and lose the resources and time to develop now superior processes and components for U.S. weapons. The purpose of U.S. defense capability is to deter war. The security of our allies is inseparable from that of the United States. Some may be angry over U.S. sanctions related to the Soviet pipeline, but decisive favorable action by the President of the United States on the Houdaille Petition prior to the November meeting could cause our allies to consider how their own security is buttressed by such evidence of a firm United States commitment to act against the erosion of its security and economy by a foreign trade policy, unfair and discriminatory in its practices.●

NOTICE OF DETERMINATION BY THE SELECT COMMITTEE ON ETHICS

● Mr. WALLOP. Mr. President, it is required by paragraph 4 of rule 35 that I place in the CONGRESSIONAL RECORD this notice of a Senate employee who proposes to participate in a program, the principal objective of which is educational, sponsored by a foreign government or a foreign educational or charitable organization involving travel to a foreign country paid for by that foreign government or organization.

The Select Committee on Ethics has received a request for a determination under rule 35 which would permit Mr. James H. Dykstra, of the staff of Senator COHEN, to participate in a program sponsored by the Hebrew University of Jerusalem in Jerusalem from January 9-18, 1983.

The committee has determined that participation by Mr. Dykstra in the program in Jerusalem, at the expense of the Hebrew University of Jerusalem, to participate in seminars on American/Israeli relations, is in the interest of the Senate and the United States.●

Mr. ARMSTRONG addressed the Chair.

The PRESIDING OFFICER. The Senator from Colorado.

THE SENATE RULES

Mr. ARMSTRONG. Mr. President, like most Senators, I am eager to complete the work of the day and to begin the long-awaited holiday recess. But I simply am reluctant to let this session adjourn without commenting briefly upon the exchange or remarks this morning preceding the final vote on the highway bill.

A few weeks ago, one of our colleagues, not one of those who participated in the debate this morning and not one who was particularly identified in any way with the highway bill, was holding forth on the floor in a most unpopular way. Bill after bill would be called up and he raised an objection to bill after bill, thereby preventing these proposals from even being considered.

It was evident at that time that there was a distinct undercurrent of hostility within the Chamber toward that Senator, not a member of my party. I went over to him and I said this:

I disagree with your position on most of the issues you have raised tonight, but I admire your style. I think you are doing the right thing.

It is in exactly that spirit that I want to stand up and associate myself at least in some degree with the two Senators from North Carolina who have been criticized most unfairly during the proceedings this morning and during some of the proceedings before today.

Mr. President, I am not going to comment on any of the specific observations that have been made. I think the Senator from Kansas was correct in his characterization of those observations, and I believe that in the test of time the personal issues which have been raised, which, in my view, came very close to violating the rules of the Senate, will be seen for what they are, and anything I may say about them will not be important either way, except that I want to express in a personal sense my admiration and friendship for both Senators from North Carolina.

But I do not want to let this session conclude without making an observation or two in regret of what has been said about how the rules of the Senate have been used. I think the emotional statements which have been made here this morning are way off the mark and that the Senator from New York (Mr. MOYNIHAN) was much closer to the mark when he said the rules have functioned well.

The rules have not failed us, the procedures of the Senate have not failed us, in the consideration of the highway bill. They have succeeded. The majority has not been thwarted, the majority has worked its will. One or two Senators have not prevented this body from reaching a conclusion and doing so in quite a timely manner, I might say.

It may seem to some, because of the season of the year, that this debate has been drawn out a long time. But, in fact, the debate has not been very lengthy, just a few days on a bill of great importance.

I want to make two observations about the purpose for which rules permit Senators, even one Senator, to require the Senate to consider matters at some length. That is not to indulge the personal pique or the personal desires of any Senator. It is for a much larger public purpose. That purpose is twofold: First of all, to require the passage of enough time that issues will be seriously considered.

I can recall, and I am sure other Senators can recall, when issues have come through here in a great hurry and, as a consequence, Senators simply did not know in any detail what they

were voting on. I can recall many instances where issues have come up for debate and extended debate has ensued of a filibuster, or parliamentary devices have been used, to delay the final disposition of that measure and during the course of that delay a change in consensus has occurred, as a result of news reports, messages from home, debate here on the floor. Minds have been changed.

That is exactly the reason why the rules of the Senate, unlike those of the other body, provide that even one or two Senators that feel very strongly about legislation may prevent its passage at least for a time, so that those who may have an interest in such legislation out in the country can respond, can react, can marshal their arguments, that editorials can be written, that constituents can contact their Senators. On many occasions in the life of this Senate, legislation which seemed destined to certain passage in a hurry was delayed and, as a result of new judgments formed during the delay, was in fact modified or defeated.

I think that is a wholesome and healthy process.

The mere fact, Mr. President, that the result was not finally changed as a result of the filibuster, if one may properly call it that, which I doubt, of the extended debate, of the issues raised by our colleagues from North Carolina does not invalidate the purpose of their effort.

I want to call attention of all Members and anyone else who cares to listen to the fact that this was not an objection by one or two Members but, in the final analysis, despite extraordinary pressure behind this bill, no less than 33 Senators thought it wise to vote against final passage. How many of those Senators would have voted in favor of it had it not been for the arguments and time consumed by Senators who objected to it I do not know.

I just want to point out that the rules have not been abused. They have been used in a courteous and proper way and to good effect.

Mr. LONG. Will the Senator yield at that point?

Mr. ARMSTRONG. I will be very happy to yield to the Senator.

Mr. LONG. Let me say this, as one who was managing the bill for the minority side and voted for the bill: The Senator is absolutely correct. Those Senators had every right to do what they did.

When Senators agree with a bill they are very happy to cooperate in expediting its passage. When they do not agree with it, they feel more tolerant to those who insist on taking more time to explain their views and to consider it.

We have to keep in mind that we are sworn here to uphold the Constitution and to defend this country against all enemies, foreign and domestic. If and when the day should come that any Member of this body feels that a measure would be the undoing of this Republic, it is not only his right but it is his duty to stand up here and make his case and to speak at considerable length if need be, as long as he has a chance to persuade people that he is right about the matter.

If it be one of those situations where the public can be marshaled and expressions from outside this Chamber can make the Senate see the light of day or see wisdom that it had not seen prior to that time, again it is the duty of that Senator to make that fight.

People do not want weakhearted Senators. They want people who have the courage to fight for their beliefs and they want people who have the courage to fight even though it might risk their political future. They expect that of good Senators. When Senators believe strongly in what they are doing, it is to be expected that they will make a fierce fight for their position.

To say that they can do other than that, because people want to go home for Christmas, for example, is not what we came here for. In the last analysis, there are not many people in this country who get to take 1 week or 2 weeks off for Christmas. Most Americans have work to do in those days.

The Senator is eminently right in what he is saying. Though it is painful for some of us who have to break a filibuster and tiresome for those who have to listen to those speeches, we have to accord others the same right that we reserve for ourselves when we are convinced that we are right.

Mr. ARMSTRONG. I thank the Senator for his observations. Coming from a Senator with vast experience in this body, I find his comments especially meaningful.

I want to make a couple of other points, Mr. President. I do so as a Senator who did not support the filibuster and who voted repeatedly for cloture, even though I opposed the bill.

In the same spirit that the Senator from Louisiana has pointed out, there is a second reason why Senators may legitimately, properly, and honorably, even though it may be unpopular, use the rules for extended debate, parliamentary tactics, and points of order. That is to test the willpower of the majority, because it is imperative in our system not only that the majority rule, but that if a minority in this body has a very keen, determined feeling, it may not be overridden by a casual majority but only by a determined majority.

The very thing we have tested by coming here today on an inconvenient date, causing Senators to delay their travel plans, puts to the test that underlying theory of our system because, even though there clearly was a majority for the passage of this bill, if, in fact, a number of Senators had not been interested enough in the passage of this bill to give up their travel plans and had not attended the session this morning, it would have been defeated. That, in fact, has happened on many occasions: There have been many bills which have been defeated by a determined minority who held the floor long enough that others lost interest. They went home. Somebody said that the winners in this place are the last ones who are still on their feet when everybody else is asleep or drunk. There is an element of truth in that, Mr. President. It is not a laughing matter, but it goes to the very heart of our system.

The majority must prevail, but the majority must not prevail over a determined minority unless it cares enough to extend itself to exercise the rights of the majority.

That is the second reason why I believe that, even though they did not prevail, the Senators who have caused this extended debate on this matter have done us a service.

I have another point to make. Before I do, I see the Senator from Idaho is here. Before I make that point, I am glad to yield to him to make an observation.

Mr. McCLURE. Will the Senator yield without losing his right to the floor?

Mr. ARMSTRONG. I am happy to yield.

Mr. McCLURE. Mr. President, I thank the Senator from Colorado not only for yielding but for making his statement. I have listened for the past couple of days to a number of people who are feeling personally abused in their own plans and who have taken it on themselves to castigate others who felt very strongly, regardless of whether I felt as strongly-or not.

I opposed the bill and I voted against the bill. I voted for cloture. I think the will of the majority did prevail.

I think the Senator from Louisiana accurately pointed out that if you have a strong feeling, you have an obligation to say so and act so. I think the Senator for Louisiana again reminded the Senate that we would probably be televising this debate if it were not for the Senator from Louisiana. Maybe the public is better served for not having seen what we have done in the last few days, even though I am in favor of television in the Senate.

I think the Senators who have exercised their rights under the rule—and incidentally, they did not press it to the ultimate. They did make accommodations with the majority when they saw how strongly the majority felt. The debate was lengthened longer than some would like, longer than most would like, but shorter than they could have insisted upon under

the rules. So there has been accommodation by those who did want the passage of this bill.

I do not think we should close this session without that kind of remark having been made about those who took actions that I did not support but which I think they had the right to take. I think the Senator from Colorado and the Senator from Louisiana have contributed to putting this matter into a proper perspective. I very much appreciate what the Senator from Colorado has done here today.

Mr. ARMSTRONG. Mr. President, I am grateful to the Senator from Idaho for his observations. He is one of the foremost authorities on the rules and customs of the Senate, so his comments are proportionately meaningful.

Mr. PRYOR. Mr. President, will the Senator yield?

Mr. ARMSTRONG. I am very happy to yield to the Senator from Arkansas.

Mr. PRYOR. If the Senator will yield to me for one moment, I do appreciate the remarks of the distinguished Senator from Colorado, the distinguished Senator from Louisiana, the distinguished Senator from Idaho, and others.

If I could, Mr. President, I would like to talk about a rule that is not in the rule book, not in either of these two volumes. That is that gentleman's agreement, so to speak, whereby one Member of this body can stop cold turkey—or cold lameduck, I should say—any bill which has passed the Senate, passed the House, is on the calendar, and has been lying at the desk for days or weeks. I think this is an abominable agreement.

I only say to my friend from Colorado that, this year, after hearings in the Senate, hearings in the House, extensive debate and discussion, and voting which has already taken place on the postal fraud bill, which was sponsored by approximately 300 Members in the other body, by approximately 30 Members in this body, a piece of legislation that is aimed at curtailing the fraudulent advertising perpetrated on primarily the elderly citizens of America—after this bill has been passed once by the Senate and once by the other body, after we have worked out agreement after agreement, and after we have amended those objectionable areas out of this legislation, now this bill is sitting right here at our desk and it is going to die because one Senator in this body has said, "I object to it." I think that this is something we have to change.

Senate procedure does not even make reference to this sort of thing, I say to my friend from Colorado.

I only hope that when we come back in January, we shall take cognizance of the fact that this unprinted rule is possibly unfair. It serves basically as a filibuster at the desk.

I would like, Mr. President, to say that there were three objectors. I would like to thank the two objectors with whom, within the last 3 days, we have been able to work out suitable colloquy, suitable understandings, whereby they have accepted this legislation. I would like to say there is still one objector in this body who is holding this legislation up and, Mr. President, I think this is abominable.

I would also like to say that I intend to place elsewhere in the RECORD some background on the Mail Order Consumer Protection Act which explains more carefully the need for this legislation and to explain exactly what this bill does and does not do.

Mr. ARMSTRONG. Mr. President, I can well understand the frustration expressed by the Senator from Arkansas. On another occasion, I might perhaps wish to enter into a lengthy colloquy on the point he has raised, but let me say to my friend as he departs for the holidays, I have been a victim of the same circumstances he has described. I do not share his disapproval of the technique.

I recall vividly in the closing days of Congress 2 years ago a bill in which my State had a great interest, an important interest, a lasting interest, which bill was not controversial, but which nonetheless was held up at the desk for months as the result of an objection by just one Senator. As the session adjourned, that bill died, to the great disadvantage of my State. In fact, it worked to such disadvantage in my State that a number of people were thrown out of work as a consequence of it. But I can assure the Senator that, in the end, while one Senator or a small minority can prevent the passage of worthy legislation, it is only temporary. Again, a majority will rule in this Chamber.

I am happy to report that, in the specific instance the Senator has just cited, in the closing hours of this session, the legislation was passed. I have seen that happen over and over again.

The Senator from Idaho mentioned that the Senator from Louisiana objects to the televising of the Senate. It is as a result of his objection that we are not going to take that up this year. At least, that is my understanding. On another occasion, we shall take it up and we shall have an extended debate. The Senator from Louisiana may, in the course of that debate, convince a majority of the Members of this body that we should not televise the Senate.

In the meantime, he has prevailed for a second reason I mentioned earlier. That is that the minority in this case is more determined in its conviction than is the majority. That is, I believe there may be a majority at this time for televising. Both of those are legitimate, the delay to marshal time for objections to be made and arguments to bring about a consensus and the determination of the majority.

I say to my friend from Arkansas that I understand his frustration, but I would be concerned if he proposed a cure that would be worse than the ill.

I have only one more point to make, but I am glad to yield to the Senator from North Dakota if he wishes to make a comment.

Mr. ANDREWS. I would appreciate it if the Senator will yield to me.

Mr. President, my remarks will be brief.

In listening to the very important point that my good friend and colleague from Colorado has brought up, I cannot help but think that the great American public is not going to be too impressed by those of us in the Senate complaining about not being able to get home for Christmas. After all, we all worked our tails off trying to get elected to do the Nation's business, and as long as the Nation's business remains to be done, we ought to be here doing it.

Now, if we are getting closer and closer to the time when we would all prefer to be home with our families for Christmas, that is our fault.

And instead of moaning and groaning about it, we ought to see if we could do it a little differently.

Along this line, there are two changes in Senate rules and procedures that come to my mind that should be adopted to allow the orderly process of business and also to protect the interests of the minority.

Our good friend and colleague, the distinguished majority leader, has said he favors televising the Senate. I happen to favor that, too, because it is the people's right to know and to see what goes on on this floor in their name and on their behalf.

But televising the Senate as we now operate, Mr. President, will be less than, shall we say, a great attention grabber because they would focus on empty desks, interminable quorum calls, and a lack of continuity in conducting the Nation's business.

Along that line, my suggestion would be, Mr. President, that when we bring up a bill, the floor managers of that bill have it read title by title, and if there is an amendment to title I, those Senators interested in amending title I be there on the floor; that once you have read off title I, it is closed for amendment. That means you do not have to stand up and inconvenience all of the Senate for one Senator who might want to extend his lunch hour or something downstairs.

It also means that if five or six Senators are interested in title I and they are engaging in debate and they close off that debate, 2 hours later a colleague will not come back in and start another debate on the same matter that totally negates what was said

before when those who took the time to come in in the first place are not still on the floor. That would be one suggestion.

The other suggestion, Mr. President, would again be a simple one. Looking at cloture, and admitting to having served in the other body a lot longer, I think cloture, the unlimited debate, and the filibuster are a great tradition and a great need for this legislative body, but it is what happens after cloture that is so idiotic. You go on and on and have a whole other filibuster.

It would be my suggestion, briefly, for those who are going to consider this in the weeks to come, that when we invoke cloture, it be invoked by naming the two Senators who will be for or against a particular bill on which cloture is applied and then we have 8 hours or 10 hours of debate, with the time divided equally between those two Senators so that they can apportion it to the people who truly want to speak on the bill, so the Senate can have that type of orderly debate and so the country's needs will be carried out in a proper manner.

Mr. President, it seems to me that if we could adopt some kind of ruling like that, people would think a lot longer before they vote cloture in the first place, and, second, when we do invoke cloture, we would have an orderly postcloture debate instead of the harum-scarum, hit and miss stuff that we have had. So if we can go into the next Congress, Mr. President, learning from what we have gone through in the last 2 or 3 weeks, the people's needs will be well served and we will have a lot better Senate to televise to the Nation.

I hope we can look at those two changes and accept part or maybe all of them as a means of moving the Senate's business.

Mr. THURMOND. Mr. President, will the Senator yield?

Mr. ARMSTRONG. I will be happy to yield to the Senator.

Mr. THURMOND. Mr. President, I commend the able Senator from Colorado and the able Senator from Idaho for the words expressed and I associate myself with their remarks.

I feel very strongly that anyone who has convictions on a matter has a right to express them and even to go to cloture, as was done in this matter, and they should not be condemned for that.

I feel, however, that we must amend this postcloture rule because this is something that in years gone by was not practiced. It has reached the point now where getting cloture does not end debate at all. There ought to be a time when debate can be ended. I hope the Rules Committee will come up with a suggestion to that effect so that we can move on with the people's business. When any part of a country is affected or the State of any Senator is affected, however, I do feel that he has a right to debate questions and go to cloture.

I do think there is a distinction, however, between debating indefinitely on ordinary legislation and on some great constitutional issue. Where there is a great constitutional issue involved, then it seems to me that one is warranted in taking sufficient time or going to the lengths necessary to bring that to the attention of the country. In those instances, I feel that no one should be condemned if he follows that course.

I wish to thank the Senator.

Mr. LONG. Will the Senator yield on my time?

Mr. ARMSTRONG. I am very happy to.

Mr. LONG. If the rules are to be amended, we should provide a rule for germaneness by 60 percent majority. Presently, it takes a 60 percent majority to obtain cloture, and cloture requires germaneness.

Now, there will be times when we would be able to proceed expeditiously with a measure if we could limit the measure to germaneness somewhat along the lines of the suggestion made by the Senator from North Dakota. If we can hold Senators to germaneness on a measure, dispose of that measure and then go to the next one, we could make more orderly and expeditious progress than if we keep wandering all over creation debating and voting on everything under God's green Earth on a single bill. If we can compartmentalize what we are trying to do. We can settle first one matter and then settle something else. I hope that we will look at that.

It should not be any real problem to agree on a rule to shorten the cloture procedure and to shorten the time after cloture. That should be easy enough to work out among Senators, and every one of a hundred Senators ought to be privileged to make his suggestions as to how that might be done.

Let me make the point about the television issue since that was brought up.

If this debate had been on television, it would have gone a lot longer. At some point we are going to have to decide who makes the decision, is it the Senators or is it the people out in the hustings, because there is no doubt in my mind if a Senator from North Carolina had known that his lengthy speeches were being heard, and knew that a great number of people across the country might have rallied to his side and that would have supported an argument for still more debate, in order that the opponents hopefully could muster even more opposition to the measure, with the prospect of getting more people into it.

In other words, if we put the Senate on television, it sets the stage for one carrying on a debate over an even longer period of time in the hopes that he can muster public opinion across the country and that public opinion will crystalize to change votes in this Chamber.

One more point we must consider when we get into all this.

The Senator from Louisiana has not said he is against television under all circumstances. I have no objection to television on ceremonial occasions or television where in the judgment of this Senator it will promote the national interests, and there can be those cases.

What the Senator from Louisiana objects to is the type thing that would be counterproductive to the national interests. Just as when we amend our rules we should be sure that what we are doing is going to be a net gain for the country, if we act on television we should be sure that it is going to be a net gain for the country in the way it would be handled. It should be carefully considered.

I hope that when we get into the next year, we will take the same careful precautions to be sure that we are advancing the Nation's interests when we change the rules about television just as we do when we change the rules about the filibuster, cloture, germaneness, and the rest of it.

I thank the Senator.

Mr. ARMSTRONG. Mr. President, the observations of the Senator from Louisiana underscore why the forthcoming debate on televising the Senate will be among the most interesting thought provoking, significant, and meaningful that have occurred in this Senate, and I for one shall reflect upon what he has said, and I am looking forward to that.

Mr. President, let me sum up my remarks.

I have already said why I think it is unfortunate that Senators were criticized for the proper exercise of their rights under the rules. I do not want to reargue that case.

I do wish to just sum up by correcting a couple of factual errors that might otherwise be left unchallenged in the RECORD.

Two Senators did not tie up this body. Thirty-three Senators voted against this legislation.

Second, this is not the only bill that has been delayed. In fact, many have been killed, including the PIK bill, the CBI bill, and others which could be mentioned.

Finally, I wish to express the heartfelt concern that Senators must not give in to the temptation to become personal in their observations and to threaten other Senators. That is one of the sorriest aspects of this lame-duck session, and I think upon reflection I trust all Senators, certainly most, who have spoken in an intemperate way will think better of their

remarks and will see fit as the spirit moves them to apologize.

It is not within the customs and traditions of the Senate in my observation for Senators to become so concerned about the passage or defeat of a particular bill as to threaten other Senators on unrelated legislation.

I regret that that has occurred, and I expect with a brief time for reflection all Senators will share that sentiment. Certainly they should share that sentiment.

As we think about whether or not we want to change the rules or how we want to relate to one another as Senators, we could well reflect that at some time or another every Member of this body is likely to be in the same position that our two colleagues from North Carolina have found themselves in this morning. I have been. Others in the body today have been in that position of being in the minority, sometimes in a very small minority, sometimes defending an unpopular cause, sometimes winning out in the end and often not.

I think if Senators will look into their own hearts and their experience they will know what I am saying is true, that at some time or another we are all going to be in that position.

So with that, Mr. President, I wish all Senators a blessed and Merry Christmas and a Happy New Year.

I yield the floor.

Mr. ROBERT C. BYRD. Mr. President, I hope we can get home in time for Christmas.

The distinguished Senator from Mississippi has been patiently waiting to be recognized and so have I. I defer to him.

The PRESIDING OFFICER (Mr. MATHIAS). The Senator from Mississippi is recognized.

Mr. STENNIS. Mr. President, I will tell you I will not take much of the time of any Member.

Mr. President, I was not going to speak on this question of the revision of our rules relating to the filibuster or prolonged debate, or by whatever name it is called, but I do want to add this: That I am very much encouraged to see the new manifestation of interest in the realization across the board that is absolutely necessary to do something about this period that follows the voting of cloture and there is the major flaw.

In the old days, if I may recall, we would have battles here that lasted 2 or even 3 weeks, including several nights, but whenever the vote was taken, if cloture was invoked all of us who were opposed to cloture respectfully got our hats and coats and went home and let the Senate vote. The Senate has expressed its will. It had cut off debate. We proceeded, of course, and we voted. But we had proceeded under the rules, and all these other delays that we have now that are so perplexing to the membership and the leadership came in later, and that is where part of the cure must be found.

Another point, if I may emphasize this, I think with the continuing resolutions that we have for a year, the increase of the national debt resolution, the budget resolution that under our rules come here and all of them subject to amendments without limit, you might say, it takes primarily the whole year to either get into these proceedings or get out, with regard to these resolutions, where anything is relevant and germane, and if it is not, we just vote that it is anyway and go on and have the vote on the merits.

There must be something done about what is germane at these various periods. I think we have to cover that provision in the rules. I have talked to the Parliamentarian some about it. I am not versed enough in it to say what should be done, but I think we have to make an about-face there, and here is the complaint I have as I see it.

In the field of legislation, I think the most good the Senate does is in the committee system. It is there that we get the work of the members, we get their hardheaded commonsense, we get their judgments, we get their disclosures, one member to another and help each member form a judgment, and thereby there is a chance for that bill to come out of there with provisions that represent the judgment of the membership and, therefore, a rather good cross-section of what is better for the Nation.

Then in the old days that committee came here to the floor generally and defended that bill. They stood together. If there was any exception it took a good, strong explanation on the floor by the one who was explaining why he was not following the committee.

And many times if that bill got in jeopardy and was about to be substantially amended, and I have seen it happen right here within reach of where I am standing now, those committees would take that bill back on motion. The chairman would get up and make a motion that the bill be recommitted, and the ranking minority member would back him up in it.

Senator Millikin, the chairman of the Finance Committee, used to sit there, and Senator George used to sit here the way I am now to the left, the ranking minority member, and they would carry that vote. They would take that bill back and they would consider that amendment and pass on it and come out and give the reasons for the action, and the bill would usually move through.

That was the judgment system, as I see it, of the committees at the very best, and we have to go back to that. We just lost the benefits of it.

So that is my contribution, if it is contribution, toward the rewriting, the reprograming, and the new approaches to our problems now in view of this greatly increased massive amount of legislation that comes before us every year.

There has to be some way to take care of these resolutions without their dominating everything.

Here we are just getting through with this year, and we have to go right into a new one.

EXTENSION OF PERIOD OF TIME FOR ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, I ask unanimous consent that the time for the transaction of routine morning business be extended under the same terms and conditions until not later than 12:30 p.m. Mr. President, I ask that Senators may speak for not more than 5 minutes each, if I may do so. There is still wrap-up work to do, and I would like to do this and go through the formalities involved. I do not want to cut anybody off. If there is a need for additional time beyond that, we will provide it.

Mr. ARMSTRONG. Mr. President, was it the leader's intention that the 5-minute rule apply to the remaining 30 minutes?

Mr. BAKER. Yes.

(Mr. MATHIAS assumed the chair.)

TRIBUTE TO SENATOR HOWARD W. CANNON OF NEVADA

Mr. STENNIS. Mr. President, certainly one of the great strengths of this institution is the broad variety of talent, insight, and judgments represented in the membership. Senator CANNON brought all of these in full measure.

As a practicing lawyer, he brought to the Senate a practical sense of the law that is so essential to us who make the laws. I particularly value his service as a fellow member of the Armed Services Committee. His dedication to the defense of this country was exceeded by no one.

His distinguished service as chairman and ranking minority member of the Commerce, Science, and Transportation Committee provided the strong leadership so necessary to keep the country strong and vigorous in those areas.

I shall miss him as a friend and colleague. The Senate and the country are the better for his long and distinguished service and will miss his wise counsel. He has served his State and the Nation well.

TRIBUTE TO SENATOR SAMUEL I. HAYAKAWA

Mr. President, I would like to join with my colleagues in paying tribute to a fellow Senator and friend who is retiring from the Senate.

I have been privileged to serve with Senator HAYAKAWA, a most distin-

guished scholar and educator, who blessed this body with his counsel, wisdom, and great patience. His service to the Senate as a member of the Agriculture, Nutrition, and Forestry Committee has earned respect and acclaim of the agricultural community. As a member of the Foreign Relations Committee, he has brought a voice of reason and sensibility to the foreign relations policy of the United States.

As he so heroicly demonstrated when he was the president of San Francisco State University, Senator HAYAKAWA is a force to be reckoned with. The courage to stand by his convictions, which was recognized nationwide, has carried to the Senate.

He has been a man for his time—as a scholar he distinguished himself as an international authority on our language. At San Francisco State, he distinguished himself as a great educator, leader, and citizen. As a Senator he carried on as a clear voice for reason. Clearly a man of conviction and integrity. We have been honored by his membership. I wish him well in his future work. He is a great American.

TRIBUTE TO SENATOR HARRISON SCHMITT OF NEW MEXICO

Mr. President, one of the greatest adventures initiated in our time is the exploration of space. I had the privilege of participating in the initiation of the space program and have continued to follow the effort with great interest. We all recognize how much the great achievements of this program have contributed to the advancement of our Nation in science and technology. It is widely recognized that we as a nation have prospered in a positive, material way because of the discoveries and inventions which came out of the space program. But this program's greatest achievement is the contribution to the Nation's wealth in human capital. The thousands of men and women who participated in this program are a tremendous storehouse of knowledge and experience which will continue to serve our Nation for generations to come.

At the forefront of the men and women in the space program are those selected to serve as astronauts. They are men and women of exceptional courage and ability who are bonded by an experience which only a few have shared. One of these men is Senator HARRISON SCHMITT of New Mexico. A man with great intellectual ability; a man with great energy; a man recognized for his tenacity and spirit. He has distinguished himself as an astronaut and as a Member of the Senate. He is a leader for our future.

His special interest and experience in energy and science has made his contribution to the Nation as a member of the Senate especially timely. His counsel and advice was extremely valuable during a very difficult period in the Nation's history. He has served New Mexico and the Nation well. I am confident in his ability and know that he will continue to serve and distinguish himself as a leader and citizen of our Nation.

TRIBUTE TO THE LEADERSHIP

Mr. STENNIS. Mr. President, I thank the Chair and I thank the Senator from West Virginia.

Let me add one other thought. We have been through all of this now, this session, but if we had not had two exceptional Members here, extraordinary Members, resourceful in their leadership, in their knowledge of the bills and the situation, Senator BAKER of Tennessee and Senator BYRD of West Virginia, had it not been for them—and there is no reason why I should brag about them—I am able to judge them to a degree—if it had not been for that condition we would be far from completing our labors here.

I want to personally and officially thank each one of them for the very fine work they have done day and night, in and out, always on the ball, and fair, I think as impartial as they can be in their roles, and I commend them both very highly and I appreciate the fact we have them.

I believe each one of them has been elected for another year without any promises made, and we are all very happy about it.

Mr. ROBERT C. BYRD. Mr. President, I want to thank the distinguished Senator from Mississippi for being the most courtly, the most courteous, and most dutiful Member of the Senate I have known in my 24 years in the Senate. I thank him for his remarks, I thank him for his service, and I thank him for the inspiration he provides to the rest of us.

Mr. BAKER. Mr. President, will the Senator permit me to reply to the Senator from Mississippi? I cannot think of a single Member in this Chamber whose remarks would be more gratefully received by me than those remarks just made by the Senator from Mississippi.

He is indeed an institution in this great institution of the Senate. I have always treasured his example. I respect his point of view and I most often follow his lead. I am doubly grateful for his remarks.

Mr. STENNIS. I thank both Senators.

ENFORCING THE SENATE RULES

Mr. MATSUNAGA. Mr. President, it is frequently said that the omnipotent moves in mysterious ways. I presume now that we can all agree to that oft-quoted explanation of the unexplainable. Judging from the remarks made here relative to the need for a change in the Senate rules, perhaps the so-called lameduck session ends on a favorable note.

While I agree that it has been poignantly demonstrated in this special session that there is a need to limit post-cloture filibuster, I wish to point out that it is oftentimes not a change in the rules which is required, but an enforcement of existing rules. I have noted the laxity in the enforcement of the floor rules on the part of the Chair. In the House—and I served there for 14 years prior to coming to the Senate—there is a much more stricter enforcement of the House rules, and as a consequence it is able to conduct its business in much shorter time, even with a membership of more than four times the Senate. I believe that much of our dilemma can be eliminated by putting someone in the Chair who has been properly briefed as to the applicable rules and procedures. If a Senator refuses to review the rules before he is assigned as acting President pro tempore, then he ought not be appointed to preside over the Senate.

It has been especially noticeable during this lameduck session that the Chair was not cognizant of blatant violations of the rules and frequently had to be reminded about the applicable rules by the minority leader. I think much of our woes can be eliminated by better performance on the part of the presiding officer.

I am happy to note that nearly every Member who took the floor agrees that we should have a change in the rules relative to postcloture filibustering. That, I think, is a must. I have other suggestions. I will not take the Senate's time to bring them up at this time, but I would suggest this: In the next Congress the Rules Committee should take this matter very seriously, hold hearings, take suggestions from Members as well as from experts in the field on the outside, and then come forth with concrete recommendations to the Senate.

I must say, Mr. President, that the Senate leadership has been put under question by the press during this lameduck session. But the leadership on both sides of the aisle behaved admirably under the rules, and I wish to congratulate and commend the leadership on both sides of the aisle for bringing this session to the ending that it has come to, and truly a favorable ending in that it projects a better 98th Congress. This Senator, for one, still takes great pride in his membership in this great institution—the most deliberative body on the face of this Earth.

Mr. ROBERT C. BYRD. Mr. President, I do not know of any Senator who exemplifies civility and friendliness more than does the Senator from Hawaii (Mr. MATSUNAGA). I think we can use more civility around here.

Mr. BAKER addressed the Chair.

Mr. ROBERT C. BYRD. I wanted to change the subject, if I may.

Mr. BAKER. I just wanted to thank the Senator.

Mr. ROBERT C. BYRD. I yield.

Mr. BAKER. Mr. President, if the Senator will permit me to express my thanks for the remarks of the Senator from Hawaii, his remarks about the leadership and his characterization of it as joint leadership, which it is; people who are not as familiar with the Senate as is the Senator from Hawaii mistake the fact that frequently while we are adversaries, more often than not we share the responsibility in moving the business of the Senate from a procedural standpoint, and I thank him for acknowledging that, and I thank him for his kind words.

Mr. THURMOND. Mr. President, will the Senator yield?

EXTENSION OF TIME FOR ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, before I yield, I ask unanimous consent that the time for the transaction of routine morning business be extended to not later than 1 p.m.

Mr. ROBERT C. BYRD. Mr. President, will the Senator make it 12:45 p.m.?

Mr. BAKER. I will make it this minute if we can do it. Yes, I will revise the request to make it until 12:45.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is ordered.

Mr. ROBERT C. BYRD. Mr. President, I yield the floor temporarily.

TRIBUTE TO THE LEADERSHIP

Mr. THURMOND. Mr. President, I rise to extend my congratulations to the leaders of the Senate, especially the majority leader and the minority leader, for their accomplishments of this session.

I think the staff we have here at the desk is the most competent we have had since I have been here. I think the staff on the Republican side and the staff on the Democratic side are more efficient than I have seen here in my 28 years.

Mr. President, I especially wish to commend the able majority leader for all he has done in providing outstanding leadership at this past Congress, 2 years. I do not know of any man on our side of the aisle who could have pulled the differing, divergent views of the Senators together and accomplished what he has done.

The very fact we got through the continuing resolution was because of his tenacity and his determination to get it done. The same thing applies to the Highway Improvement Act, and we could name many other things.

I will not take the time now to list the various pieces of legislation that this Congress has enacted, but I want to say that a great many valuable pieces of legislation have been enacted. There have been some things that have not gone through that I felt should have gone through: Some parts of the crime package, the regulatory bill, the immigration bill, the constitutional amendment to balance the budget, and other things.

But I wanted to especially pay a tribute to the majority leader. I also want to congratulate the minority leader for the cooperation he has given to the majority leader. I think we have the two ablest leaders right now—majority and minority leaders—that we have had in the 28 years I have been in the Senate. We appreciate what they have done to promote the work of the Senate and their accomplishments for the good of the people of this Nation. We all wish them a happy Christmas and a New Year filled with good health and happiness.

TRIBUTES AND COMMENDATIONS

Mr. STEVENS. Mr. President, the 97th Congress has been a productive one. We have taken steps to strengthen the economy, lower interest rates, and provide for the defense of our Nation. This would not have been possible without the able leadership on both sides of the aisle.

The majority leader, HOWARD BAKER has handled his responsibilities with authority, yet accommodation; direction yet deference. His unique leadership qualities have enabled Republicans and Democrats to enjoy a workable and productive relationship. It has been an honor and a privilege to work with him, not only during the last 2 years, but during the prior years when he handled the duties of minority leader with equal aplomb.

The majority in the Senate would have been hard pressed to accomplish as much had it not been for the cooperation, dedication, and statesmanship of the minority leader, ROBERT C. BYRD. His expertise in parliamentary procedure, respect for the institution, and understanding of the role of the majority as well as the minority have been invaluable to the Senate as well as the Nation. He is, in all respects, a leader.

Finally, Mr. President, as we close the 97th Congress, I take this opportunity to commend the staff of the U.S. Senate for their long hours of service and their dedication. All of the staff, personal and committee, guards, dining room staff, postal staff, cleaning staff, the official reporters of debates, clerks, pages, cloakroom attendants and many, many others have put in long hours and have done an excellent job. They deserve our thanks.

TRIBUTE TO THE PRESIDENT PRO TEMPORE

Mr. ROBERT C. BYRD. Mr. President, I am sure the distinguished majority leader would want to share with me my words of thanks to the distinguished President pro tempore. He is one of the most considerate Members of this body. I know from my own personal experience just how considerate and how thoughtful he is, and I want to thank him.

He is a man who is absolutely fearless. I heard the late Richard B. Russell once say that about STROM THURMOND—he is absolutely fearless. He has tremendous courage and is also very courteous. He always has been very courteous to me and very considerate and very understanding.

I am, indeed, proud of the statement he has made concerning the little part that I have played in the conduct of the business of the Senate.

Mr. BAKER. Will the Senator yield?

Mr. ROBERT C. BYRD. Yes.

Mr. BAKER addressed the Chair.

The PRESIDING OFFICER. The Senator from Tennessee, the distinguished majority leader.

Mr. BAKER. I thank the Chair.

Mr. President, I wish to join the minority leader in expressing my thanks as well for his generous remarks. I have often commented in private and I would now like to say publicly, using the Senate as a forum for the occasion, that STROM THURMOND, of South Carolina, makes a major contribution to the welfare of this country. I would like to say to my colleagues, Mr. President, that in my experience, and based on the reading of the history of this institution, that I have not known of a President pro tempore who has made a greater contribution and who has taken more seriously the responsibilities that go with that high office.

I fully expect, Mr. President, that before this session is concluded, more formal statements will be made on behalf of the Senate in respect to the service of the President pro tempore. But before that is done, I wish to express my personal appreciation to him for the remarks that he has just uttered.

PROPOSED SENATE RULES CHANGES

Mr. ROBERT C. BYRD. Mr. President, I hope that Senators have had a chance to make their comments about the need for changes in the rules of the Senate. I think there are 100 Members here who want to see changes, but I do not think we are going to make those changes this afternoon.

I have spoken to the distinguished majority leader a few days ago about the matter. I think we came to a conclusion that we wanted to appoint,

either by resolution or simply by just going ahead and appointing a group of Senators to work with the Rules Committee and with the Ribicoff-Pearson effort to make some recommendations for changes in the rules.

I think it will be interesting, very interesting, to see 100 Members of the Senate come together on changes in the rules; 100 Members agree that there ought to be changes; and there should be. But I think they all should have an opportunity to make that input. If the majority leader is agreeable, we could get together during the next 2 or 3 days, or during the holidays, and name some Senators to work together with the Rules Committee and with former Senator RIBICOFF and former Senator Pearson in making some recommendations, and to solicit ideas from all Senators so that everyone will have an input. I think that that is the only orderly way in which we can proceed. And even then it is going to be extremely difficult to get 100 Senators to agree on everything. But perhaps some improvements can be made in the Senate rules that will enable us to bring them into the late, late part of the 20th century in some respects.

Mr. BAKER. Will the Senator yield?

Mr. ROBERT C. BYRD. Yes.

Mr. BAKER. Mr. President, I entirely agree with the minority leader. Indeed, I would wish to confer with him further during the holiday period, if we may do so, to designate Senators on both sides of the aisle to discuss this matter and present their views—I hope their views on a unanimous bipartisan basis—to us, that is the joint leadership, to consider how we proceed.

As has been pointed out, the Senate has already, by resolution, requested two of our distinguished former colleagues, Senator RIBICOFF and Senator PEARSON, to examine the situation. I expect we will have a report from them in due course, perhaps as early as February.

I will not wait for a resolution on this part. I am perfectly prepared to go forward with the designation of an appropriate number of Senators. I will represent to my friend the minority leader that I will consult with him before I leave town, which will be after Christmas now, and we will try to work that out.

Mr. ROBERT C. BYRD. I will be very happy to work with the majority leader. I do not think we should wait until the next session. I think when we talk about changes in the rules we ought to take a new look at the Budget Reform Act as well.

EXPRESSION OF THANKS, APPRECIATION, AND PRAISE

Mr. ROBERT C. BYRD. Mr. President, this last, arduous week of the 97th Congress has brought into particularly sharp focus the valuable contributions of Senate staff. Their work has a direct and important impact on the quality of legislation that is produced by Congress, and this holiday season of giving provides an appropriate opportunity to express my personal appreciation to those who help Senators discharge their duties.

Few staffs in Congress have a broader mandate of responsibility, work under more pressure and for longer hours than does the staff of the Democratic Policy Committee in the Senate. Abby Saffold, Charles Kinney, and Martin Paone are well known to all Senators for their thorough, effective, and courteous work on the Senate floor. Although they serve the Senators on my side of the aisle on scheduling and other floor matters, they are a vital part of the bipartisan mechanism of the Senate.

I particularly single out Abby, Charles, and Marty for their tireless efforts on behalf of my colleagues on this side of the aisle. I thank them for their diligent attention to detail, for their unfailing dedication, for their concern for the interests of Democratic Senators, and for their constant, congenial, and courteous presence. I commend them on their close working relationship with those on the majority side who perform similar duties—Howard Green, secretary for the majority; John Tuck, assistant secretary for the majority; and Elizabeth Baldwin, floor assistant.

I have found Elizabeth Baldwin to be exceptionally capable, courteous, and understanding. Regardless of the pressures of the Senate and the lateness of the hour, she is always extremely cordial and considerate. I take this occasion to express my personal appreciation for those fine qualities. Democratic Senators are grateful for this cooperative relationship between the majority and minority floor staffs.

In our role as the minority, the Democratic Policy Committee staff has stepped in to fill this void and consistently has provided extremely useful issue-related information and coordination to all Democratic Senators. Rob Liberatore, staff director of the Democratic Policy Committee, is intelligent and hard working. He has been instrumental in facilitating the work of the committee. I might add that we intend to continue this work after 1984 as well—should we be so fortunate as to regain the majority in the Senate.

The domestic issues staff has been ably led by Susan Manes, and the international affairs/defense staff has been effectively directed by Dick McCall, the committee's deputy staff director.

Most Senators are familiar with the accurate and thorough Democratic legislative bulletins, the weekly legislative updates and economic data reviews, the analyses of Senate voting histories, individualized voting records, and indexes of Senate votes. All of these invaluable materials are prepared under the direction of the Policy Committee and especially under the direction of Beth Shotwell, the committee's chief clerk. These publications are designed to provide Senators with information useful to them in analyzing public policy issues and the history and record of the Senate.

I also want to express my appreciation of the Policy Committee's communications office, headed by Greg Schneiders, for their ambitious and productive efforts with the press offices of Democratic Senators.

I thank Terry Sauvain, the secretary for the minority, for his hard work for Democratic Senators. He, too, has done an outstanding job, and I wish him well in his new position as minority deputy clerk of the Appropriations Committee. Following in his footsteps will be Patrick Griffin, who will be the new secretary for the minority in the 98th Congress. Pat previously has served on the Democratic Policy Committee floor staff and as my executive assistant for floor operations. I look forward to working with Pat in the next Congress.

I also commend Patrick Hynes, assistant secretary for the minority, the cloakroom staff—Thomas Gonzales, Bob Bean, Bill Norton, Joe Hart, and Tom Kelly—and all the fine pages for their understanding good cheer and helpfulness in the conscientious performance of their responsibilities.

Bill Hildenbrand, the Secretary of the Senate, and Howard Liebengood, the Sergeant at Arms, have served the Senate well—both as individuals and as the leaders of their hard-working staffs who perform numerous tasks. I particularly appreciate the devoted service of Jeanine Drysdale in her position as executive assistant to the Sergeant at Arms, as well as that of the doormen and all the Sergeant at Arms' and Secretary of the Senate's employees who work around the floor and the lobby.

The Senate's work is facilitated by many people, but few people are more associated with the day-to-day important work of the Senate than are those gentlemen who man the desk below the Presiding Officer. I speak of Bob Dove, Alan Frumin, and Joseph Strickland, the Parliamentarians; Bill Farmer, the legislative clerk; Scott Bates, assistant legislative clerk; Jim Thorndike, the journal clerk; and Vince Del Bazo, the bill clerk.

Fred Sparrow, the enrolling clerk, serves as a vital link in the legislative process, and I appreciate the efficient manner in which he discharges his duties.

I want to express a special thanks to our Chaplain, the Reverend Mr. Halverson, whose prayers and spiritual guidance enrich this body enormously. I look forward to his thoughtful prayer which starts each day of our session.

Mr. President, there are simply too many people who work long and hard to help this august body function for me to name each and every one of them. The Capitol Police, the employees of the press galleries, the employees of the Senate restaurants—all contribute to the operation of the Senate. I am very proud of all these loyal employees of the public. They should take great personal pride in the part they play in serving the public's interests.

To all those who labor in the Senate, be it in the spotlight or in the shadows, I thank every one of them and wish them a peaceful and blessed holiday season and a new year filled with hope and promise.

HOWARD BAKER'S WASHINGTON

Mr. ROBERT C. BYRD. Mr. President, as this tumultuous special session of the 97th Congress draws to its close and as we prepare at last to leave this city—some of us, at least—for our home States, I wish to call my colleagues' special attention to a fine work of our distinguished majority leader—a work which he has accomplished not in this Chamber but in his beloved darkroom.

This work is a book of photography entitled "Howard Baker's Washington," and as the noted columnist Haynes Johnson observes in this past Sunday's Washington Post, this book offers a warmhearted look at Washington, sensitively and interestingly recorded, a real delight for anyone who loves this capital city.

I wish that someone 100 years ago in this body would have done the same, because, after all, I think it takes someone within this body to really understand the body, understand its history, understand what goes on, and have the perspective for future historians, future college professors, judges, and lawyers who are interested in Washington and the Capital of the Nation and the Federal legislature a history of all of these things. I think it requires someone who has that inside perspective.

HOWARD BAKER has that perspective. He is an excellent photographer. While I am only a third-rate fiddler, he is a first rate photographer. And I want to say that those of us who know him well know that if the distinguished Senator from Tennessee (Mr. BAKER) had his "druthers," he would spend a great deal more time behind the camera than in front of a camera.

This book—and I appreciate his having given me a copy—is persuasive evidence of his photographic talent, his intimate knowledge of this city and its traditions, and his winning way with the written word and the photograph, which, in words I shall paraphrase, takes the place of a thousand words. As Mr. Johnson says, "On its own, the text is well worth the price, for BAKER writes with refreshing candor and a nice leavening of humor. Interspersed throughout are striking passages that take you quite by surprise."

Mr. President, I know my colleagues on both sides of the aisle join me in congratulating our good friend from Tennessee on this literary and artistic achievement, and I ask unanimous consent that the text of Mr. Johnson's column in the Washington Post of December 19 be inserted in the RECORD at this point.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Washington Post, Dec. 19, 1982]

BOOKS AT CHRISTMAS: BY THESE PRESENTS SHALL THEY KNOW YE

(By Haynes Johnson)

In my family, on Christmas mornings past, you knew you could count on each person receiving two certain gifts: a book and a record.

Whatever the big present of that particular year would turn out to be—the red, two-wheeler Schwinn bicycle forever fixed in memory as it stood gleaming before the lighted tree; the chemistry set with its small vials, test tubes and little boxes of compounds positioned proudly before the other presents; the wondrous telegrapher set with accompanying long lines of wires and Morse code instructions that, after lines were strung and distant contact established, quickly became the bane of every member of the household and of neighbors, too—the best Christmas morning moment always came after the initial exploration of presents. A special holiday glow took hold as I slipped upstairs to my room, there to disappear while I burrowed myself in my new books. There were always more than one.

I don't mean to suggest that they were the immortals of literature, nor that I precociously, studiously or with grim immediacy set about the task of self-improvement. They were a joy and lasting Christmas treasure, those adventures, romances and histories, simply because of the pleasure they gave.

In that spirit, I have been mulling over books I plan to give friends and family this season. Again, as in seasons past, I am selecting them not so much for their deathless qualities, but for the pure pleasure they have given me this year and, I trust, will now give to others.

Three in particular come to mind. Two are by authors named Baker, and one by a Brooks. They have in common charm, warmth, sensitivity, intelligence and, in one case, a heartbreaking sort of eloquence that, I believe, will cause it to be long remembered.

The first of these to come my way this year was a slim volume of essays, "Lulu in Hollywood," about the early days of filmmaking, in the silent era of the 1920s, by actress Louise Brooks. I was attracted to it by a review citing the expert testimony of none other than William Shawn, editor of The New Yorker, who began his introduction to Brooks' book by writing:

"It should not come to us as a surprise that a film actress can write, but, so narrow are our expectations, it does. We are even more surprised when it turns out that the actress is one of the great beauties of all time." And who concludes: "How it happened that this supremely observable woman should herself have become a brilliant observer of others, I don't know. Nor can I understand how this born center of attention, who might have been doomed to passivity, was all the while paying astute attention to those around her. What I do understand is that she writes marvelously, in a style that is all her own: direct, graceful, terse, exact, piercing, radiant."

Well, after such a buildup, I had to find out for myself if Shawn's tribute was deserved or if the great editor, perhaps indulging an old crush, had uncharacteristically overstated the case for Louise Brooks. He was, of course, correct. Her little book is a gem, filled with lovely touches of self-deprecating humor and insight and, so unlike the ghost-written trash that pours forth as confessions by other aging film stars these days, written with admirable honesty. A fragment only of her style:

"Early in the autumn of 1925, when I was 18, two film companies, Metro-Goldwyn-Mayer and Paramount, each offered me a five-year contract. Not knowing what to do about either contract, which would separate me from my dream of becoming a great dancer, I went to my best friend, Walter Wanger, for advice. How sweet he was then: a brilliant, laughing young man of the world whose heart remained very tender. He had taken me under his protection after meeting me while I was a specialty dancer in the Ziegfeld Follies and after discovering that my blase insolence was a masquerade. It amused him to find that the decadent black-and-white Aubrey Beardsley makeup covered a sprinkling of Kansas freckles."

The second of the books is by a newspaperman of long-established professional standing. Russell Baker's "Growing Up" is more than another journalistic memoir, a form also tiresomely overworked these days. It is an extraordinarily moving account, written with great taste, dignity and elegance of expression, about the breakup of a family amid the Great Depression. There could not be a more appropriate book for this season of new hardships for so many nor one that carries such a timeless message.

I approached the last of the books with the most doubt of all. It was by a politician, one who has displayed presidential ambitions, no less: Senate Majority Leader Howard H. Baker, Jr. of Tennessee.

At first blush, its title seems to reinforce the idea that another political book, boosting another political career, has been loosed among us. They are surely among the dreariest, and dullest, sorts of works being published, but happily "Howard Baker's Washington" is not among that genre.

He offers us a photo album of Washington and its people, composed of pictures he has taken over the years as part of his continuing hobby and, as he says, "great saving grace." To Baker, photography "permits me to relieve my anxieties and to escape from the frustrations or the disappointments or even the exhilaration of the moment. Pho-

tography gives me the opportunity to establish fresh perspectives."

His book accomplishes just that and, surprisingly, more. It's a warmhearteed look at Washington, sensitively and interestingly recorded, a real delight for anyone who loves this capital city. It comes with an intriguing text that Baker decribes as "ruminations" about politics and politicians, presidents and traditions. On its own, the text is well worth the price, for Baker writes with refreshing candor and a nice leavening of humor. Interspersed throughout are striking passages that take you quite by surprise.

"I had an experience in observing the C&O Canal pageant [where on Sundays volunteers dress up in Civil War uniforms]," Baker writes, "that I found almost too eerie to acknowledge. Watching those 'Union soldiers' around the campfire chilled me because it sent a wave of 'recollection' through me that I once had visiting the battlefield at Vicksburg. I'm more than half convinced that I lived an earlier life and that I was a soldier killed in that war. Whether or not such is the case matters little.

"The significant fact is that we live in a place and a time in which our connections with history are alive and strong. It is a history that extends itself into the present and future, and its deeply felt presence in Washington continues to reenergize the city."

What's more, he adds to an appreciation of the real Washington, not the false portrait so often depicted by current political leaders. That alone brings joy to this Washington resident.

On that note, may the holidays provide the best gifts of all in pleasure and peace for you and yours.

Mr. BAKER. Mr. President, has the minority leader concluded his remarks?

Mr. ROBERT C. BYRD. I have.

TRIBUTE TO THE MINORITY LEADER

Mr. BAKER. Mr. President, let me express my deep appreciation to the minority leader for his remarks on my literary effort, if it deserves that name at all. I was taken by surprise, but I am grateful in the extreme.

In this very city, which we both respect so much and for which both of us have great feeling, I have heard people say that certainly the majority leader and perhaps even the minority leader are frustrated, that being a Senator or even the leader is their secondary ambition in life.

If I could take pictures as well as the minority leader can fiddle, I might agree with him. But I cannot. I have to confine myself to doing the best I can.

I am extremely grateful for the kind remarks of the Senator from West Virginia.

Let me say one thing in all seriousness. I enjoyed doing that book. It is an accumulation of photographs over a number of years. But that was really not the part I enjoyed the most. I enjoyed writing the text and relating my own feelings about the city, which I did not know I had until I started putting pen to paper. That came from a part of my subconsciousness.

When the Senator mentions a feeling for the history of this city, I have to point out that I do not know a soul who has a better and more complete understandng and feeling for the history of the Senate and of this city than does the minority leader.

The periodic speeches that he made on the history of the Senate will stand, I am convinced, as a milestone for recording the contributions of this body to our Nation's progress. Not only we but historians of the future will be deeply grateful to him for centuries to come for that insight.

I wish to express my gratitude to him for his remarks from that perspective, as a historian who understands the Senate and this Federal City.

Mr. ROBERT C. BYRD. I thank the distinguished Senator.

RECORD OPEN UNTIL 5 P.M. TODAY

Mr. ROBERT C. BYRD. Mr. President, may I ask the distinguished majority leader whether or not he intends to leave the RECORD open for a day or so for Members who wish to insert material?

Mr. BAKER. Mr. President, I am advised by the Secretary of the Senate that keeping the RECORD open today would be no problem at all, but since tomorrow is a holiday it would require extraordinary effort on his part and perhaps great expense.

Mr. President, I ask unanimous consent that the RECORD remain open for the insertion of statements for the remainder of this day, not past the hour of 5 p.m.

INTERIM RECORD—DECEMBER 29

Mr. President, it has also been called to my attention that provision has already been made for an interim RECORD to be printed not later than December 29, 1982, at the direction of the Joint Committee on Printing. The material for that may be delivered to the Office of the Official Reporters of Debates on the House side and to room S-220 on the Senate side, Monday through Friday between the hours of 9 a.m. and 3 p.m.

Has the Chair granted my request that the RECORD remain open today?

The PRESIDING OFFICER. It has not been granted.

Mr. BAKER. I renew the request.

The PRESIDING OFFICER. Is there objection to the request of the majority leaders? If not, without objection, it is so ordered.

Mr. BAKER. Mr. President, could I inquire of the minority leader if he is prepared to take up the wrap-up file?

Mr. ROBERT C. BYRD. Yes.

Mr. BAKER. Mr. President, I ask unanimous consent that the time for routine morning business be extended.

The PRESIDING OFFICER. Without objection, it is so ordered.

DISCHARGE OF COMMITTEES FROM CONSIDERATION OF HOUSE JOINT RESOLUTION 630, H.R. 6519, H.R. 5027, AND H.R. 4568

Mr. BAKER. Mr. President, I have a request for four committees to be discharged from the consideration of certain measures that have already reached us from the House. Let me list the four and ask en bloc that the committees be discharged from their consideration.

I ask unanimous consent first that the Energy Committee be discharged from further consideration of H.R. 4568; that the Government Affairs Committee——

Mr. LONG. Mr. President, will the distinguished Senator state the title of the bills?

Mr. BAKER. H.R. 4568 is the conveyance of land to Albuquerque, N. Mex. Next is to discharge the Government Affairs Committee from consideration of H.R. 6519 dealing with IRS interns. Next is H.R. 5027, that the Governmental Affairs Committee be discharged from further consideration of H.R. 5027, to designate the building known as the Walter E. Hoffman U.S. Courthouse. The fourth and final discharge request is to discharge the Committee on the Judiciary from further consideration of House Joint Resolution 630 on the 150th anniversary of the founding of Greene County, Mo.

First, Mr. President, I ask that these committees be discharged as requested, and second, I ask that the Senate proceed to their consideration en bloc.

The PRESIDING OFFICER. Is there objection?

Mr. ROBERT C. BYRD. Mr. President, there is no objection so far as I know to the discharge of these committees as requested and no objection to proceeding.

Mr. LONG. Mr. President, is there any material in those bills not relevant to the title of the bill?

Mr. BAKER. Mr. President, I am told by our clerk that there is no irrelevant material. They are all simple and straightforward and correctly described in the request.

The PRESIDING OFFICER. Is there objection to the request? Without objection, it is so ordered. The committees are discharged.

The clerk will report the first bill.

Mr. BAKER. Mr. President, I had hoped to consider all four measures en bloc. I make that request.

The PRESIDING OFFICER. Is there objection to the consideration of these measures en bloc? If not, without objection, it is so ordered.

FOUNDING OF GREENE COUNTY, MO.

The joint resolution (H.J. Res. 630) to commemorate the 150th anniversary of the founding of Greene County, Mo., was considered, ordered to a third reading, read the third time, and passed.

CONVEYANCE OF CERTAIN LANDS

The bill (H.R. 4568) to direct the Secretary of the Interior to release on behalf of the United States certain restrictions contained in a previous conveyance of land to the city of Albuquerque, N. Mex., and for other purposes, was considered, ordered to a third reading, read the third time, and passed.

WALTER E. HOFFMAN U.S. COURTHOUSE

The bill (H.R. 5027) to designate the building known as the U.S. post office and courthouse in Norfolk, Va., as the "Walter E. Hoffman U.S. Courthouse."

Mr. WARNER. Mr. President, I would like to join my colleague, Representative G. WILLIAM WHITEHURST, in support of H.R. 5027.

This legislation will name the U.S. courthouse in Norfolk, Va., in honor of Judge Walter E. Hoffman.

Judge Hoffman, who retired from the bench in 1974, has the distinction of serving more years as a judge in the eastern district of Virginia than anyone in history—28 years.

As both a judge and as a member of the Southern Football Officials Association, during which he officiated at 112 major college football games, Judge Hoffman made all of his calls according to the rules—never on the basis of political expediency.

It gives me a great deal of pleasure, Mr. President, to see Judge Hoffman receive this honor which he so richly deserves.

Mr. President, I thank the leadership for expediting this matter.

The bill was considered, ordered to a third reading, read the third time, and passed.

ACCESS TO CERTAIN RECORDS BY INTERNAL REVENUE SERVICE INTERNS

The bill (H.R. 6519) to amend title 5, United States Code, to allow student interns of the Internal Revenue Service to have access to certain information required by such students in the performance of their official duties.

Mr. STEVENS. Mr. President, H.R. 6519 allows the Internal Revenue Service to use legal interns more completely than they presently are. The IRS has used second and third year law students under authority given in the Civil Service Reform Act of 1978. Present law, however limits their usefulness to the IRS because they are forbidden access to certain tax returns and return information. Currently that information is available only to IRS employees. When this bill was considered on the floor of the House of Representatives, some technical amendments were made at the request of the Department of the Treasury to tighten up the coverage of the bill. The version of the bill we are considering here today is fully supported by the administration as evidenced by the letter sent to the chairman of the Committee on Post Office and Civil Service, the Honorable WILLIAM D. FORD. I ask that the text of that letter be printed in the RECORD.

This legislation will permit legal interns participating in recognized programs in the IRS to have access to certain information necessary for the performance of their duties.

The letter follows:

DEPARTMENT OF THE TREASURY,
Washington, D.C., September 28, 1982.

Hon. WILLIAM D. FORD,
Chairman, Committee on Post Office and Civil Service, U.S. House of Representatives, Washington, D.C.

DEAR MR. CHAIRMAN: On May 27, 1982, Representative Schroeder introduced H.R. 6519, a bill to permit student internships at the Internal Revenue Service. The Department of the Treasury strongly supports this legislation. We do recommend two slight technical changes, however.

The Civil Service Reform Act of 1978 included a provision (5 U.S.C. 3111) which permits the head of an agency to accept the uncompensated volunteer services of students enrolled in high schools, trade schools, colleges, or universities. Under this provision, the Internal Revenue Service has utilized the assistance of second and third year law students to perform legal research, assist in the preparation of cases for trial, and perform other similar functions. The Civil Service Reform Act provision specifies, however, that student volunteers shall be considered Federal employees only for purposes of compensation for injury and tort claims. Section 6103(h)(1) of the Internal Revenue Code provides that returns and return information are open to inspection by or disclosure to officers and employees of the Department of the Treasury for tax administration purposes. Thus, under present law, student volunteers would not be considered Treasury Department employees for purposes of the disclosure statute, and their usefulness is seriously impaired because in the course of performing volunteer services they cannot have access to tax information.

H.R. 6519 would amend 5 U.S.C. 3111 to treat students performing volunteer tax administration services for the Department of Treasury as Federal empioyees for purposes of section 6103(a)(1), (h)(1), (k)(6), and (l)(4), and section 7213(a)(1) of the Internal Revenue Code. Thus, returns and return information could be disclosed to and by student volunteers for tax administration purposes, and they could have access to tax information for necessary use in Treasury personnel matters. Similarly, these student volunteers would be subject to criminal sanctions under section 7213 of the Internal Revenue Code for willfully making an unauthorized disclosure of returns or return information.

We would suggest two minor, technical changes to the bill. First, we would add to the list of affected disclosure provisions in the bill a reference to 5 U.S.C. 552a. That section, added by the Privacy Act of 1974, restricts disclosure of certain information, but provides an exception for disclosure of information to employees of an agency who require the information in the performance of their duties. By treating student volunteers performing tax administration services for the Treasury Department as employees of the Department, disclosure of necessary information would be permitted under section 552a, consistent with the objectives of H.R. 6519.

Second, as a technical drafting matter, we would clarify that I.R.S. student volunteers will be treated as employees of the Treasury Department (in addition to being employes of the United States). Because the bill provides only that I.R.S. student volunteers are treated as employees of the United States, and not, specifically, as employees of the Treasury Department, a question could be raised whether such student volunteers are authorized to receive confidential information under the statutory provisions authorizing disclosure to employees of the Treasury Department.

Accordingly, we propose the following modifications to H.R. 6519:

(1) Strike out "and" on page 2, line 5 of the bill.

(2) Strike out line 9 on page 2 of the bill and substitute "persons; and".

(3) Add following line 9 on page 2 of the bill:

"(5) Section 552a of this title (relating to the disclosure of records).

"Such students who provide voluntary service for the Department of Treasury shall, in addition, be considered employees of such Department for purposes hereof."

We urge that the Committee give favorable consideration to this bill as a means of expanding the usefulness of the student volunteer program. There would be no budgetary impact. As specified by 5 U.S.C. 3111, no I.R.S. employees would be displaced.

The Office of Management and Budget has advised that there is no objection from the standpoint of the Administration's program to the submission of this report.

Sincerely,

DAVID G. GLICKMAN,
Deputy Assistant Secretary (Tax Policy).

The bill was considered, ordered to a third reading, read the third time, and passed.

Mr. BAKER. Mr. President, I move to reconsider the votes by which the various measures were passed.

Mr. ROBERT C. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT OF TITLE XIII, UNITED STATES CODE

Mr. BAKER. Mr. President, there is one other item before we turn to the final formalities of this session of Congress, consideration of H.R. 7410. I ask the distinguished minority leader if he

is prepared to proceed to that measure.

Mr. ROBERT C. BYRD. Yes, Mr. President, I am.

Mr. BAKER. I ask the Chair to lay before the Senate H.R. 7410, a bill dealing with the quarterly financial reports of the Federal Trade Commission.

The PRESIDING OFFICER. The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (H.R. 7410) to amend title 13, United States Code, to transfer responsibility for the quarterly financial report from the Federal Trade Commission to the Secretary of Commerce, and for other purposes.

Mr. BAKER. Mr. President, I ask unanimous consent that the bill be considered as having been read the first and second times and that the Senate proceed to the immediate consideration of H.R. 7410.

The PRESIDING OFFICER. Without objection, it is so ordered.

TRANSFER OF THE QUARTERLY FINANCIAL REPORT FROM THE FTC TO THE CENSUS BUREAU

Mr. PERCY. Mr. President, H.R. 7410, which passed the House yesterday evening, provides for the transfer of the Quarterly Financial Report (QFR) from the Federal Trade Commission (FTC) to the Census Bureau.

Since 1947, the QFR has been performed by the FTC. It provides very current aggregate statistics on the financial earnings of U.S. corporations and is used to make quarterly and annual estimates of the gross national product. In short, it is an important statistical indicator for the Nation.

The administration has determined that the QFR would be better administered by the Bureau of the Census—the Nation's primary statistical agency—than by the FTC, which is an investigatory and rulemaking body.

Let me reassure my colleagues, who may be friends or foes of the FTC, that this bill deals solely with the transfer of authority for a single statistical activity. It does not impair or otherwise strip the FTC of any other existing authority or function. As drafted, the bill has the full support of the FTC, the Census Bureau, the U.S. Chamber of Commerce, the National Association of Manufacturers, and, of course, the administration.

Time is of the essence, since the next QFR is scheduled to be taken later this month. The Census Bureau needs this bill in order for the mandatory compliance provisions of title 13, United States Code to apply.

I urge my colleagues to support this bill so that the bill can be promptly transmitted to the President for his signature.

The bill is open to amendment. If there be no amendment to be proposed, the question is on the third reading of the bill.

The bill (H.R. 7410) was read the third time, and passed.

Mr. BAKER. I move to reconsider the vote by which the bill passed.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

THANKS TO THE SENATE STAFF

Mr. BAKER. Mr. President, I sincerely thank the officials and the officers of the Senate—William Hildenbrand, Howard Greene, Howard Liebengood, and Terry Sauvain; they are the most dedicated of officials, and they are my friends.

I thank the floor staff on both sides of the aisle.

On the Republican side: Howard Greene, John Tuck, and Elizabeth Baldwin; on the Democratic policy side: Abby Saffold, Charles Kinney, and Marty Paone; the legislative scheduling staff—Lynne Grant and Cindy Oravecz; the GOP cloakroom staff—Marcia Gambrel, John Doney, Brad Smith, and George Cartagena; the Senate officials at the desk—Bob Dove, Bill Farmer, Scott Bates, Jim Thorndike, Bill Lackey, Vince Del Balso, Joe Strickland, and Allen Frumin.

I express our thanks to Russell Walker, editor in chief, and Jeanie Bowles, assistant editor, of the CONGRESSIONAL RECORD; and to the Official Reporters of debates: William Mohr, Ben Firshein, Charles Reynolds, Frances Garro, Frank Smonskey, Ronald Kavulick, and Jerald Linnell.

I also thank the Democratic, and Republican pages, doormen, police, the support staff-janitors, restaurant staff, the Chaplain, Dr. Halverson, and others for their diligent and dedicated service during the activities of the 97th Congress.

The PRESIDING OFFICER. Without objection, it is so ordered.

APPOINTMENT OF COMMITTEE TO NOTIFY THE PRESIDENT

Mr. BAKER. Mr. President, I send a resolution to the desk and ask that it be stated by the clerk.

The PRESIDING OFFICER. The clerk will state the resolution by title.

The assistant legislative clerk read as follows:

A resolution (S. Res. 526) appointing a committee to notify the President concerning the proposed adjournment of the session.

The PRESIDING OFFICER. Is there objection to the present consideration of the resolution?

There being no objection, the resolution was considered and agreed to as follows:

Resolved, That a committee of two Senators be appointed by the Presiding Officer to join a similar committee of the House of Representatives to notify the President of the United States that the two Houses have completed their business of the session and are ready to adjourn unless he has some further communication to make to them.

The PRESIDING OFFICER. The Chair appoints the majority leader and minority leader as members of the committee.

AUTHORIZATION FOR CERTAIN APPOINTMENTS

Mr. ROBERT C. BYRD. Mr. President, I send a resolution to the desk and ask that it be stated.

The PRESIDING OFFICER. The resolution will be stated by title.

The assistant legislative clerk read as follows:

A resolution (S. Res. 527) authorizing the President of the Senate and the President of the Senate pro tempore to make certain appointments after the sine die adjournment of the present session

Mr. ROBERT C. BYRD. Mr. President, I would like for it to be read in full so we can know what those certain appointments are.

The assistant legislative clerk read as follows:

S. RES. 527

Resolved, That notwithstanding the final adjournment of the present session of the Congress, the President of the Senate and the President of the Senate pro tempore be, and they are hereby, authorized to make appointments to commissions or committees authorized by law, by concurrent action of the two Houses, or by order of the Senate.

Mr. ROBERT C. BYRD. I thank the Chair and I thank the clerk.

The PRESIDING OFFICER. Is there objection to the present consideration of the resolution?

There being no objection, the resolution was considered and agreed to.

AUTHORIZATION OF THE PRESIDENT OF THE SENATE AND THE PRESIDENT OF THE SENATE PRO TEMPORE TO SIGN DULY ENROLLED BILLS

Mr. BAKER. Mr. President, I send to the desk a resolution and ask that it be stated.

The PRESIDING OFFICER. The resolution will be stated.

The assistant legislative clerk read as follows:

A resolution (S. Res. 528):

Resolved, That notwithstanding the sine die adjournment of the two Houses, the President of the Senate and the President of the Senate pro tempore be, and they are hereby, authorized to sign enrolled bills and joint resolutions duly passed by the two Houses and found truly enrolled.

The PRESIDING OFFICER. Is there objection to the present consideration of the resolution?

There being no objection, the resolution was considered and agreed to.

THANKS OF THE SENATE TO THE VICE PRESIDENT

Mr. BAKER. Mr. President, I send another resolution to the desk and ask that it be stated.

The PRESIDING OFFICER. The resolution will be stated.

The assistant legislative clerk read as follows:

A resolution (S. Res. 529):

Resolved, That the thanks of the Senate are hereby tendered to the Honorable GEORGE H. W. BUSH, Vice President of the United States and the President of the Senate, for the courteous, dignified, and impartial manner in which he has presided over its deliberations during the second session of the Ninety-seventh Congress.

The PRESIDING OFFICER. Is there objection to the present consideration of the resolution?

There being no objection, the resolution was considered and agreed to.

THANKS OF THE SENATE TO THE PRESIDENT PRO TEMPORE

Mr. ROBERT C. BYRD. Mr. President, I send to the desk a resolution and ask that it be stated.

The PRESIDING OFFICER. The resolution will be stated.

The assistant legislative clerk read as follows:

A resolution (S. Res. 530):

Resolved, That the thanks of the Senate are hereby tendered to the Honorable STROM THURMOND, President pro tempore of the Senate, for the courteous, dignified, and impartial manner in which he has presided over its deliberations during the second session of the Ninety-seventh Congress.

The PRESIDING OFFICER. Is there objection to the present consideration of the resolution?

There being no objection, the resolution was considered and agreed to.

NOTIFICATION OF THE PRESIDENT

Mr. BAKER. Mr. President, I invite my colleague, the distinguished minority leader, to join me to execute the resolution of the Senate as a committee of two Senators to wait upon the President of the United States and notify him that we have completed our business. In order to gain time to do that, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMENDATION OF THE MAJORITY LEADER

Mr. THURMOND. Mr. President, I send a resolution to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will state the resolution.

The assistant legislative clerk read as follows:

A resolution (S. Res. 531), to commend the exemplary conduct of the distinguished Majority Leader.

Resolved, That the exemplary conduct of the distinguished majority leader, the Honorable HOWARD BAKER, JR., from the State of Tennessee is deserving of the highest commendation of the Senate. The fair and just and able manner in which Senate business has been scheduled and managed are a source of pride to the Senate as a whole and the thanks of the Senate is here by tendered to the Honorable HOWARD BAKER, JR., majority leader, United States Senate.

The PRESIDING OFFICER. Is there objection to the present consideration of the resolution?

There being no objection, the resolution was considered and agreed to.

COMMENDATION OF THE MINORITY LEADER

Mr. THURMOND. Mr. President, I send a resolution to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will state the resolution.

The assistant legislative clerk read as follows:

A Senate resolution (S. Res. 532), to commend the extraordinarily cooperative conduct of the distinguished minority leader.

Resolved, That the Senate extends its thanks to the distinguished minority leader, the Senator from West Virginia, the Honorable ROBERT CARLYLE BYRD. The extremely cooperative and able manner in which the minority leader has approached his duties as protector of the rights of the minority have been duly noted and the Senate commends the minority leader for his understanding, his devotion to the rules of the Senate, and for his outstanding leadership.

The PRESIDING OFFICER. Is there objection to the present consideration of the resolution?

There being no objection, the resolution was considered and agreed to.

Mr. BAKER. Mr. President, I wish to express my thanks to the distinguished President pro tempore and to the Senate.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

REPORT OF THE COMMITTEE TO NOTIFY THE PRESIDENT

Mr. BAKER. Mr. President, now I am happy to report on behalf of the committee appointed by the Senate to wait upon the President that we have concluded our assignment. The distinguished minority leader and I have had the privilege of speaking with the President on the telephone just now to inquire of him if he had further business that he wished to present to Congress. He indicated that he did not.

He asked that we convey to the Senate and all its Members his wishes for a Merry Christmas and a Happy New Year and that he looks forward to our service together next year.

THE GREAT ANCHOR OF GOVERNMENT—THE U.S. SENATE

THE 97TH CONGRESS

Mr. BAKER. Mr. President, no less a constitutional expert than James Madison called the U.S. Senate "the great anchor of Government." History may well record that the Senate served as an anchor for our ship of state during the second session of the 97th Congress. It cannot be denied that our Nation is beset by unpredictable winds and rough waters—the economic, social, and political crosscurrents of this given place in history. It is equally true that the Senate has striven to exert a steadying influence in these uncertain times.

Being an anchor, I hasten to say, is by nature a stressful and difficult job. Like the winds and the waves in a storm, political interests are straining to sweep us away in their chosen direction—oftentimes in many directions at once. Those who believe that the ship of state must move swiftly on its way are dismayed at the seeming lack of motion. At the same time those who yearn for calmer waters are dismayed by the commotion: An anchor may foreclose an ill-charted course but it does not prevent the ship from buffeting.

Madison's almost poetic metaphor for the Senate can perhaps be carried too far; but the central point ought to be clear. We live in troubled times; a final judgment on our stewardship would be premature. For those of us who wear the mantle of politicians, these are by no means favorable times. At one and the same moment, our Nation is faced with a host of problems for which easy or straightforward answers are not available. We confront, all at once, faltering productivity, high interest rates, a heavy burden of public and private debt, challenges in competing for world markets; the passing of the age of cheap energy; rising costs of Government; potential decay in the Nation's infrastructure; distressingly high levels of unemployment; the threat of inflation; and concern about the status of public and private morality and traditional American values.

The Senate has traditionally been considered the institution the Nation could look to for maintaining an historical perspective—surely a needed viewpoint in public policy after recent

years of social and economic upheaval. Yet, only nine current Senators were Members of this body before 1960. We constitute a Senate that reflects the changes in a nation that has undergone dramatic and sometimes traumatic changes.

Theodore H. White has observed:

Many of our problems flow out of American goodwill, trying to do everything for everybody. The 1960's and 1970's were a period of goodwill gone awry.

White has further noted that the past two decades of goodwill resulted in high promises to everybody, "promises to save the cities, promises to take care of the sick, the old, the universities. By 1980 we had promised ourselves almost to the point of national bankruptcy." We are a nation facing the reality that we are living beyond our means. It has been calculated that between the midsixties and early eighties the gap between the Nation's assets and liabilities grew almost tenfold—from $366 billion to $3 trillion. This is a dangerous erosion of the capital America needs to maintain economic growth.

This awesome growth in debt reflects a nation continuing to make demands on a government and economy that probably could not be met in the best of times. Daniel Yankelovich has reviewed survey data of the past three decades to document public response to economic conditions. He found that:

In the past 10 years, a significant shift in American attitudes has taken place—from an optimistic faith in an open-ended future to a fear of economic instability. We now find a nation hovering between an older postwar faith on expanding horizons and a newer sense of lowered expectations apprehension about the future, mistrust of institutions and a growing sense of limits.

Such hovering between choices was reflected in our most recent elections. Political pundits have devined no clear direction from the electorate, a sense of ambivalence, an unwillingness to make the hard choices ahead.

Yet, to say that we have hard choices ahead presupposes that we have the freedom to choose. However, another trauma that we have to face as a nation is that we do not have complete control of our own destiny. The demands of Americans on their Government and economy may well be overwhelmed by the demands of the Third World for a new economic order. Inflation and high unemployment are global problems. Choices to be made by the United States may well be made by other nations for us. Decisions of OPEC, the Japanese auto industry and the Soviet military massively complicate the problems of the United States and severely limit the solutions to be offered. Decisions designed to address problems from shining sea to shining sea may well have to extend to the Indian Ocean.

Perhaps reflecting the public's dismay at these accumulating problems, the 97th Congress was an instance of divided Government—a situation that will continue in the 98th Congress. Having the Congress controlled by different parties—in this case Republicans in the Senate, Democrats in the House of Representatives—is a rarity in our modern political history. Only twice before in this century have there been divided Congresses: The 62d Congress (1911-13) and the 72d Congress (1931-33). In the first case, President William Howard Taft confronted a Republican Senate and a Democratic House, and in the second President Herbert Hoover had to cope with the same configuration. Now President Reagan finds himself in a similar situation Perhaps it is only coincidental, but in all three cases it has been the Senate and the White House that have been in Republican hands.

Divided partisan control accentuates the tensions that the constitution builds into the relationships of the two chambers. As is well known, the framers deliberately established dissimilar modes of constituting the House and Senate to permanently nourish different propensities and inclinations. The constitutional disparities are reflected in inter-Chamber differences in size terms of office constituencies, and constitutional duties. Even though constitutional arrangements have changed dramatically over the years since 1789, one can rest assured that those different propensities and inclination are as wide discernible on Capitol Hill.

Nor is the Senate an easy body to charactize. "It is very difficult to form a just estimate of the Senate of the United States," Woodrow Wilson—perhaps the most astute student of the Congress—remarked in his 1907 Blumenthal lectures at Columbia University. "Nobody has been more discussed; nobody has more misundestood and traduced." Wilson went on to describe the variety and unpredictability of the Seattle in the following terms:

It is impossible to sum up the Senate in any single phrase or summary description. For the Senate is as various as the country it represents. It represents the country, not the people: The country in its many diverse sections, not the population of the country, which tends to become uniform where it is concentrated.

This diversity of opinion and debate is at once a source of strength and an object of puzzlement or disparagement on the part of critics. Even to those who serve in this body, it is cause for wonderment and frustration. The late Everett McKinley Dirksen, my father-in-law, often lamented the yoke of leadership in such an individualistic institution:

There are one hundred diverse personalities in the U.S. Senate. O Great God, what an amazing and dissonant one Hundred personalities they are. What an amazing thing it is to harmonize them. What a job it is.

The truth of those sentiments has fully come home to me in the past 2 years. The Senate's free and relatively unfettered debate has, for good or ill, been remarked upon throughout history, and is a pertinent issue even today.

Laying aside the question of efficiency or effectiveness of the Senate's floor procedures—a matter that is now being given systematic study and that will presumably engage our attention in the 98th Congress—there is doubt that this body is fulfilling its historic role of providing a forum for the most pressing issues of public concern. Woodrow Wilson was only one of many observers who admired the Senate for

Those habits of free and open debate which clear its mind, and to some extent the mind of the public, with regard to the Nation's business, doing much towards making legislation definite and consistent, and against those great additions to its efficiency which spring from its observation of "slow and steady forms" of procedure, from the immediate election which gives it independence, and from its having a national and August cause for existing.

Speaking as a leader concerned about the orderly processing of floor business, I must confess moments of frustration with my colleagues' habits of free and open debate. Nonetheless, it must be conceded that the Senate remains true to its traditional purpose as the place where full and careful consideration is given to the most momentous and complex problems.

Weighty as issues were in the middle of the last century when the Senate led the Nation in debating such issues as slavery, tariffs, and westward expansion, they were relatively few in number and occurred over a period of years or even decades. As President John F. Kennedy was fond of remarking, the Clays, Calhouns, and Websters of the 19th century had the luxury of devoting a whole generation or more to debating and refining the few great controversies at hand. In most cases, moreover, the battlelines were clearly drawn between the political parties and factions.

Our present predicament could not be more different. The issues we confront are almost too numerous to count. Moreover, they defy simple categorization. Viewpoints of Senators—or, for that matter, of the public—are not easily described or predictable. Our partisan loyalties or philosophies of Government fail to reach into the nooks of such issues. The issues are crosscutting and interrelated. And, as was noted before, they do not admit of simple solutions.

In the 97th Congress, the Senate has aired many of these issues in all their detail and complexity. In more than a few cases, this Chamber provided vir-

tually the only forum for full and free discussion of such issues. Given the political divisions in the country at large, it would be unreasonable to expect that quicker or tidy legislative solutions would emerge in each and every case, even in a majority of cases. However, the public discourse has been significantly advanced by what we have done here in this Chamber.

A final role played by this Senate is that of serving as an adviser, and at times a counterweight, to the executive branch. Woodrow Wilson went so far as to observe that in legislative-executive relationships, the Senate was "no longer a legislative Chamber, but—a consultative executive council." The constitutional underpinnings of the Senate's unique role are of course its unique duties to advise and consent to Presidential appointments and treaties. Our duties toward the executive are underscored by the fact that the President and the Senate majority are of the same political persuasion. Thus the majority leadership of this body has a special obligation to see to it that the President's initiatives are accorded full and fair hearing on Capitol Hill. By the same token, we have a special duty to advise the President and his counselors concerning parliamentary strategies and tactics.

The obligations which the President's partisans on Capitol Hill carry as his allies and colleagues are complicated by the fact that we are, after all, located at opposite ends of Pennsylvania Avenue. President Kennedy once remarked how different things looked from the White House vantage point than they had appeared to him in the Senate. We of the majority are loyal to the President and we share his goals; but we serve different constituencies and have different constitutional responsibilities. Neither the Constitution nor historical precedents offer simple formulas for working out these different roles.

This second session has made its mark with several important legislative accomplishments. The first budget resolution for fiscal year 1983 directed certain House and Senate committees to recommend changes in law to bring spending and revenue levels into conformity with targets established in the resolution.

To further fulfill the requirements of the first budget resolution, the Senate Finance Committee and House Ways and Means Committee reported and Congress passed the Tax Equity and Fiscal Responsibility Act of 1982, that raised revenues by $98.3 billion and lowered spending by $16.8 billion for the same 3-year period. It also authorized $4.8 billion for airport development projects.

Additionally, Public Law 97-253, the Omnibus Reconciliation Act of 1982, called for legislative changes to effect budget savings consistent with the first concurrent resolution on the budget for fiscal year 1983. For example, prevailing high interest rates, coupled with weak farm income for the third year in a row, led the Senate to authorize a 20-percent set-aside for wheat and rice acreage. The law also revised the dairy price support system.

The distinguished Senator from South Carolina, Mr. THURMOND, introduced Senate Joint Resolution 58, which prohibits the adoption of any budget in which outlays exceed total receipts, unless approved by a three-fifths vote of each House of Congress. The measure passed the Senate on August 8, 1982.

To focus on the critical and unacceptable situation of unemployment, an important new law was passed to create job training. S. 2036, introduced by the distinguished Senator from Indiana, Mr. QUAYLE, authorized "such sums as necessary" for training programs operating by States in combination with local area governments and private industry councils. This new employment training program will replace the Comprehensive Employment and Training Act.

The Housing and Urban Development-Independent Agencies appropriation bill, Public Law 97-272, made special legislative note of our elderly and handicapped by appropriating $453 million for section 202 housing for these individuals, as well as $4 million for congregate services, and $1.350 billion for operating subsidies for public housing.

The Voting Right Acts was extended for 15 years; despite significant progress, continued attempts to deny or abridge voting rights on account of race, color, or language-minority status justified continuation of Federal supervision of the electoral process of covered jurisdictions. A new section 203 required provision of bilingual registration.

Regulatory reform was a major issue this Congress, in response to general public concern, and S. 1080, introduced by the distinguished Senator from Nevada, Mr. LAXALT, would make substantial changes in the basic notice and comment procedures required for informal rulemaking and would establish statutory requirements for regulatory analysis. This followed the President's fervent wishes to reduce the size and scope of the Federal Government; the bill passed the Senate in March.

To maintain a strong and secure defense, the Congress passed the Department of Defense Authorization Act, which provided $253.6 billion in budget authority and $214 billion in outlays. The decisions were difficult in view of the economy and the budget deficits, but it was the strong sense of the Senate to provide substantial increases for defensive efforts.

Concern among the public and in Congress about the size of the nuclear arsenals of the United States and the U.S.S.R. as well as the future strategic arms control led to the introduction of Senate Joint Resolution 212, by the distinguished Senator from Illinois, Mr. PERCY, which commended President Reagan's START proposal and states that a new arms control agreement should "sharply reduce" the number of missiles and warheads. It was reported in July.

This Congress also confronted immigration law and policy, which the Senate felt was in dire need of reform. S. 2222, sponsored by the distinguished Senator from Wyoming, Mr. SIMPSON, and passed by the Senate, addressed the following issues: Control of illegal immigration, and reform of legal immigration, legalization, and as sense of the Congress that English and no other tongue is this country's official language. There are also stringent penalties for violating the prohibition against employing unauthorized aliens.

The Senate Committee on Evironment and Public Works has been working on revising the Clean Air Act, which expired at the end of 1981. They have proposed several salient amendments, including those dealing with hazardous pollutants, interstate pollution control, and acid precipitation prevention.

Because of high interest rate and the sluggishness of our economy, savings and loan institutions were particularly hard hit. Mr GARN, the distinguished Senator from Utah, and chairman of the Banking, Housing and Urban Affairs Committee, sponsored legislation entitled "The Garn-St Germain Depository Institutions Act of 1982." The law includes provisions to restructure and broaden the powers of depository institutions in an attempt to lessen the sensitivity of thrift institutions, and increases the flexibility of the Federal regulatory agencies to respond to troubled despository institutions (Public Law 97-320).

Operating in an environment of divided Government, the Senate can exert leadership in mediating, between the White House and the other body to fashion legislative solutions that would otherwise be impossible. That has certainly occurred in 1982. In several critical instances, salient legislative accomplishments would simply not have been possible without the Senate's legislative prowess. These achievements rank high in any assessment of the Senate's workload in the 97th Congress, as they unquestionably will when the history of this era is written.

It is both my hope and expectation that the Senate will continue to serve as an anchor in the 98th Congress. The complexities and obstacles will no

doubt be present, but they will be met by a will and conviction and determination that will insure responsible action, and responsible governing.

Now Mr. President, I ask uanimous consent that a poem by Emily Dickinson be printed at this point in the RECORD.

There being no objection, the poem was ordered to be printed in the RECORD, as follows:

Each Life, Converges to some Centre—
Expressed—or still—
Exists in every Human Nature
A Goal—
Embodied scarcely to itself—it may be—
Too Fair
For Credibility's presumption
To mar—
Adored with caution—as a Brittle Heaven—
To reach
Were hopeless, as the Rainbow's Raiment
To touch—
Yet perservered toward—sure—for the Distance—
How high—
Unto the Saint's slow diligence—
The Sky—
Ungained—it may be—by a Life's low Venture—
But then—
Eternity enable the endeavoring
Again.

ALTERNATIVES AND ACCOMPLISHMENTS OF SENATE DEMOCRATS—97TH CONGRESS

Mr. ROBERT C. BYRD. Mr. President, today marks the end of the 97th session of Congress and the Senate. It would be premature at this moment, so close to the closing of the session, to attempt an accurate assessment of it. The final judgment, rightly so, will be left to history.

However, while an over-all analysis is perhaps inappropriate at this time, it is not to soon to review the many, many contributions made by Senate Democrats to the total debate on the national agenda.

After all, this session has been a unique one for us. It marked the beginning of what I hope will be our very short-lived role as the "loyal opposition." In some ways our having to adjust to nonmajority status has been difficult—honesty compels me to say this. But, learning to do it well has been rewarding. For indeed, we have made major contributions, and done so sometimes in the face of a process which has not often included us, and a White House that seeks not our counsel.

If it had, it would have found a thorough and consistent set of alternatives, especially in the areas of social security, budgetary matters, jobs, and interest rates. These are also the areas it has focused on, but with which we still find ourselves in such deep, deep trouble.

A review of the record for the last 2 years clearly shows that for every major policy question facing the Senate, Democrats had alternatives. Sometimes they were targeted in nature, sometimes more sweeping. These votes create a record which speaks for itself.

THE 97TH CONGRESS, FIRST SESSION OF THE SENATE

In the first session, more than 100 key votes were cast in which two-thirds or more of the Democrats were opposed by two-thirds or more of the opposing party. These votes obviously reflect the philosophical middle of each party. They illustrate the nature of the Democratic alternatives.

Senate Democrats expressed from the beginning a willingness to work with the administration. Although we were deeply skeptical of the radically new directions of Reaganomics, we tried to join, broadly speaking, in giving the President what he wanted.

We did try to target the 1981 budget cuts more sensibly, to moderate and custom tailor them, and base them on realistic projections. We tried to make the cuts more fiscally prudent, sensitive to different economic circumstances, and more carefully targeted. We tried to make the tax cuts fairer. It is not fair for about 40 percent of the cuts to go to 5 percent of the people. But the President effectively controlled Congress last year, and after offering and losing many counterproposals, most Democrats voted for final passage of the President's budget and tax bills.

The Democratic test for each part of the Reagan/Stockman package was decided upon early in the session. It was to ask: Is this proposal fair to all? Will it work? And does it promote a unified, secure, and prosperous America? It was not our intention to be obstructionist, as our record on final passage shows. We would have been more involved partners if we had been asked to join in the process, but we were not.

Our strategy for the session, then, became one of trying to insure that the Reagan/Stockman policies did not unfairly burden one group or region while benefitting another; or make short-term savings only to insure greater long-term costs, higher deficits, and more unemployment; or further burden the most vulnerable among us.

Government services can be cut back selectively. Democrats in fact proposed five times to cut back on excessive bureaucratic spending for travel, public relations, procurement, entertainment, political appointees, and consultants. Each time they were defeated by a united majority. But this same majority defended, with enormous energy and commitment, across-the-board and disproportionate cutbacks in investments that make human beings more productive—like education, health care, adequate nutrition, job training, and social security.

Democrats have strongly supported new investments in plants and capital equipment. We voted for the accelerated depreciation clauses to give businesses a fighting chance against inflation when they invest in expensive machinery. We voted to lower the effective capital gains tax rate from 20 to 15 percent, but were defeated by strong opposition.

Unfortunately, the investment incentives to invest we supported cannot override an economy characterized by high Federal deficits, high interest rates, and high unemployment. Businesses cannot be expected to make new investments in the face of record productivity decreases. Businesses cannot be expected to make new investments in the face of high prime rates, coupled with a deep recession. The supply-side effects of the business tax cut will take hold only when interest rates fall, and the economy begins to recover. The Reagan/Stockman program has doomed the supply-side effort from its inception.

Not only has the administration's overall program been internally flawed, as the resulting 18 month recession has shown, it has also been too narrowly focused. Human skills require investment as well. But the administration has framed the debate as a choice between investment in machinery and investment in human skills. A productive society must have both.

True supply-side programs would include investment in human capital and public infrastructure as well as in factories. No country can prosper without educated, healthy, trained, well-fed citizens living in towns and cities that are not falling apart.

Part of the Democratic record of the first session can be characterized as an effort to add people into the supply-side equation. Democrats are proud of their leadership in economic programs that are in place, many of which help sustain our way of life. We view our future as one that will continue to require investments in humans as well as in machinery and equipment. Without this commitment to fairness, no other decisions will make a positive difference.

Much has been made of the so-called mandate received in the 1980 election. This license has obviously come to mean many things to many people. We doubt, however, that the American people's desire for a better government meant dismantling social security, taxing the middle class to support the rich, cutting back on energy research, closing job training programs, taking school lunches away from millions of children, reducing hospital benefits for veterans, or putting higher education out of reach for qualified students from middle income families.

We doubt that the American people's desire for government reform in-

cluded a desire to change funding levels and program benefits without hearings, without debating the merits, without a discussion of national priorities. We doubt that the "mandate" reflected a desire to substitute theater for substance in government, transforming the debate over the national agenda into a debate over the budget, discarding whatever idea could not be reduced to a number. There is no substitute for Congress doing the hard work of government, choosing and sorting-through, working in cooperation with, not at the direction of, the executive branch. In the first session, the majority pushed through the Senate a budget reconciliation bill which contained budgets normally considered in 20 or 30 separate bills. By lumping everything into one very hastily prepared, enormous bill, it became virtually impossible for Senators to gauge the impact or seriousness of the changes. The debate which was circumvented, however, will not go away. The issues will return with urgency.

Senate Democrats believe Americans wanted the sorting out of priorities, and a search for a more effective and efficient delivery of services. They did not want a wholesale dismantling of programs, nor a foisting on overburdened State and local government of new costs, at precisely the time administration policies have caused record high unemployment, record budget deficits, record high interest rates, and a deep recession.

Although this was a very partisan session of the Senate, where we Democrats were not included in the formation of many of the radical policy changes that were put in place, we were very successful in targeting in on and preserving a select group of high priority programs: social security and school lunch were among the most important saved. Democrats, in their drive for a more equitable program, also successfully sponsored the All Savers' Certificate program and the elimination of the marriage penalty in the tax code. The Salvadoran amendment tied additional economic and military assistance to continued reform efforts by the Salvadoran Government.

I think it would be useful at this point to review the Democratic alternatives offered in each major policy area in the first session, as well as the reasons for our differences with the proposals of the opposing party.

THE ECONOMY

When the Democrats lost the White House, the American economy was well on its way to a robust recovery. In fact, everything that Ronald Reagan promised to do was occurring under Jimmy Carter. In the first quarter of 1981, real GNP was rising at a very strong 8.6 percent, and unemployment was declining, as were inflation and interest rates.

By July, all that had changed. The schizophrenic economic program of tight monetary and loose fiscal policies put an abrupt end to recovery, hiked interest rates and threw millions of people out of work. There was nothing inherited or accidental about it. The warnings have been coming for some time from within the President's own party. George Bush called Reaganomics "voodoo economics" last year. HOWARD BAKER called it a "riverboat gamble"; David Stockman, a "Trojan horse"; and Richard Snelling, an "economic Bay of Pigs."

From the start, a fast recovery was promised. Their plan was supposed to be greeted by a surge of business, consumer and investor confidence. Just the opposite has happened. In the same month that their plan was passed, we sank into a recession, the stock market turned sour, and people began to lose their jobs.

It is obvious that the public and the business community do not share the administration's blind faith in an economic gimmick that was first sketched out on the back of a cocktail napkin. The cocktail napkin economy of the Reagan administration has turned recovery into recession.

Their program is having exactly the effects that most economists, and many Senate Democrats, predicted it would have—recession, massive budget deficits, and a grossly unfair transfer of benefits to the very wealthy, and burdens to the working men and women of this country.

Because we saw what lay ahead, we offered an alternative tax plan, and an alternative budget plan. In the end, however, we were forced to vote up or down on the President's program.

There is probably no more explicit example of the Democratic commitment to fairness than the record votes on the economy in the first session.

Twenty-nine times during the session, Democrats and Republicans split sharply on economic policy votes.

Democrats voted overwhelmingly for amendments to close tax loopholes, protect the small businessman, promote productive investment, balance the budget, and put a ceiling on the national debt, but were opposed in lock-step.

Democrats tried four times to bring balance to our Federal budget by trimming the excesses from last year's tax bill. We tried to promote small business and productive investment through targeted tax policies. We tried to make the tax cut more fair for those earning under $50,000 a year, for our Nation's elderly, and for married couples. In each case, these efforts were defeated by a united opposition.

Even an attempt by Democrats to restore nutritious school lunches to the 2 million children cut off by this administration was defeated.

Democratic amendments to close the tax straddle loophole and to give tax relief to small businesses as well as to giant corporations were initially defeated.

Democrats tried to restore funds for the Economic Development Administration, but were defeated on a party line vote, as they were in three measures urging lower interest rate policies on the administration.

In the beginning, Democrats had alternatives. That these alternatives were not accepted is obvious from reading the economic statistics in any business section of any newspaper, or more graphically, in driving down Main Street in almost any town or city.

SOCIAL SECURITY

During the Presidential campaign, Candidate Reagan promised the American people that his administration would protect the integrity of the social security system, and that "no one presently dependent on social security is going to have the rug pulled out from under them and not get their checks."

When President Reagan came before Congress to argue the merits of his Federal budget-cutting plan, he promised that social security retirement benefits would be preserved in full—exempt from budget cuts—as part of the Nation's "safety net" of social programs.

The President then asked Congress to take away the social security minimum benefit payment for 3 million American retirees as part of his first budget-cutting bill, as well as for cuts of $88 billion in social security benefits over the next 5 years. The Reagan social security plan meant immediate, severe, and permanent reductions in promised benefit protection.

The magnitude of social security benefit cuts requested by the President was unprecedented: a 40-percent slash in retirement income for people who must retire at age 62; a reduction of almost one-third in the disability insurance program's operations; and a 23-percent cut in total promised benefits. Under the plan, no future age 62 retiree would have received an annual benefit as high as the official poverty level.

When the Reagan administration began its assault on the social security system in order to subsidize large tax breaks for the wealthy and to reduce huge, record-setting deficits caused by mismanagement of the economy, Senate Democrats rallied in unity to make President Reagan keep his promises.

In May of 1981, Senate Democrats forced a vote rejecting the President's plan of immediate and deep cuts in early retirement benefits. The road to

preserving the minimum benefit payment for retired Americans was more rocky: five times Senate Democrats rose to preserve the payment and each attempt was defeated by a party line vote.

Democrats did not intend to make the minimum benefit a partisan issue, but partisan politics directed from the Office of Management and Budget resulted in party line votes time and time again. During the budget process, the administration forcefully and consistently argued for elimination of the benefit. OMB and its Senate allies contended that repealing the $122 monthly payment would not hurt retirees because the financially needy could always apply for welfare.

Only after it became obvious that Democrats would not give up on the question of preserving the minimum payment for retired Americans, and that the issue would never go away, did the White House and its allies in the Senate turn around.

Twelve times in the first session, Democrats and the opposing party divided sharply on a range of social security votes. Although most often unsuccessful in the face of this and White House opposition, Democrats did demonstrate a deep commitment to maintaining the social security system, believing that the success of the system is dependent upon the people's faith in government's commitment to the program.

Until the Reagan administration, the U.S. Government had been honorbound to retired Americans and to contributing workers and employers to protect the integrity of the system. Until the Reagan administration, the challenge of social security had been to provide an adequate retirement income for aging Americans.

In a partisan Senate, where straight party-line votes seem to be the order of the day, rejection of the Reagan administration social security plan and restoration of the social security minimum benefit represent cherished victories for Democrats.

HUMAN RESOURCES

For millions of vulnerable Americans, it is now more difficult to pay for college, find job training, go to a health center, get a hot lunch at school, receive unemployment compensation, apply for an economic development grant, or enroll a youngster in a Head Start program.

The administration's comprehensive assault on human needs programs has diminished the capacity of every community to deliver services and insure equal opportunity to its citizens. At times they succeeded in reducing programs by 25 percent.

Democrats proposed restoring funds for the Pell grant program, which targets aid to financially needy young people who have the talent but not the money to pay for college. The President remarked in a press conference that he had read the help wanted pages of the Washington Post, and noticed many available jobs and commented that we just have to train people for them. His budget proposals, which attack the Pell grant program, deny people that training.

Democrats proposed restoring a portion of funds cut from the title I compensatory education programs for disadvantaged children.

Democrats proposed restoring approximately half of the 25-percent cut contained in the reconciliation resolution for job training programs designed to improve the skills of the American workforce so that productivity and economic growth can be sustained.

Democrats proposed a modest increase above the administration's request for the CETA youth demonstration program, since some 2 million young Americans are jobless and will remain jobless if they face the future without skills or training.

Democrats proposed maintaining the current levels of funding for preventive health care and primary community health care programs. Every dollar cut from prevention means more money spent to treat preventable disease, more money lost because of sick leave in the workforce, and more human suffering which cannot be measured in dollars.

The Democrats proposed restoring current funding levels for childhood immunization programs, which were cut 25 percent by the Reagan budget. The dramatic decline in childhood disease in the United States is indisputably due in large part to this program.

Democrats supported the continuation of a separate program to provide services for rape victims.

Democrats proposed restoring some of the already drastically reduced funding for maternal and child health care programs.

Democrats proposed restoring funding for mine health and safety inspection programs.

Democrats proposed restoring $200 million of the administration's $2.2 billion reduction in school lunch funds.

Democrats proposed restoring enough funding to the unemployment insurance system to make unnecessary a new regulation which would force an unemployed worker to accept any job offer after 13 weeks of unemployment.

Democrats proposed amendments to the second concurrent budget resolution which would have protected the entitlement programs from budget cuts.

Democrats proposed a sense of the Senate resolution expressing deep concern over the administration's proposals to eliminate housing assistance for the Nation's elderly and low-income citizens, and to terminate the community development block grant and urban development action programs.

Democrats proposed exempting Head Start, Community Health Centers, and Older Americans Act programs from an arbitrary across-the-board appropriations cut.

Each of these amendments was defeated by a disciplined and united majority party.

GOVERNMENT WASTE

Democrats tried repeatedly to cut back on government waste, but were defeated by solid party votes time after time. The majority showed that their support for cuts in waste, fraud, and abuse falters when the budget axe passes too near their own interests.

They approved cuts in child nutrition, heating assistance for the elderly, and social security benefits. But they voted down Democratic amendments to cut their own administration's travel, consultant, and public relations spending.

Democrats united for five separate votes that would have cut excessive bureaucratic spending, but were defeated by a solid wall of opposition each time. We were out voted on attempts to slash Government supply purchases, and political appointments.

ENERGY AND ENVIRONMENT

In the first session, Democrats offered six amendments to preserve a balanced national energy policy. The Reagan administration supported deep cuts in spending for solar and fossil fuel research, conservation, and synthetic fuel development. These Democratic amendments represented an attempt to restore necessary funds and to equalize budget cuts between alternative and fossil research, conservation, and nuclear power programs. There were also efforts to restore funds for programs to ease the burden of high energy prices on low-income households.

A bipartisan energy policy has been developed over three administrations. It is designed to reduce U.S. dependence on imported oil by encouraging domestic production and the development of alternative sources of energy and conservation. The Reagan budget has permanently changed this policy, without consideration of the long-term effects these changes will have on economic security. They have singularly focused on nuclear energy to the detriment of any and all other potential alternatives.

There has also developed a bipartisan congressional consensus on environmental issues. This administration, however, by drastically reducing funding for the Environmental Protection Agency and the Council on Environmental Quality, has made it unlikely that the Clean Air Act, the Clean Water Act, the Toxic Substances Control Act, the Solid Waste Disposal Act, and the Conservation Recovery Act

will be enforced to their optimum. Democrats believe these cuts will make necessary and important environmental goals more difficult to reach in the future, and more expensive.

DEFENSE

There is a consensus on the need to strengthen significantly our national defense. Democrats, in spite of the rhetorical onslaught of the past Presidential campaign, historically have joined in any prudent effort to strengthen America.

During Senate consideration of the defense appropriations bill in December of 1981, however, it became apparent to Democrats that the defense plan in the bill was substantially weaker than the one advertised by the Reagan administration. Democrats designed and introduced their own program, in an effort to correct these imbalances.

Twelve times the majority marched together to defeat Democratic amendments to the defense appropriations bill designed to strengthen our conventional and strategic capabilities.

Democratic amendments calling for a stronger and larger Navy, additional funds for the B-52, a prohibition on shifting funds from Stealth to the B-1 bomber, and protection of the B-1 from cost overruns, garnered enough support for passage.

Democrats proposed restoring funds to provide an adequate aerial refueling capacity to allow sufficient support for the Rapid Deployment Force in the Persian Gulf. They were defeated.

Democrats proposed adding $148 million to allow the Army to reach a 60-day inventory of ammunition, instead of the present 40-day level. The Army's mobilization plan calls for a 180-day inventory of ammunition. The majority defeated this amendment, as well as a more modest proposal to add $100 million for this purpose.

Democrats proposed adding $60 million for the Army's force modernization program, slashed in the administration's September budget.

Democrats proposed restoring the funds necessary to maintain two full carrier battle groups required to defend the Persian Gulf.

Democrats proposed forcing the Department of Defense to increase competition in the procurement of defense equipment.

Democrats offered two amendments ($250 and $200 million) for development of Stealth technology in order to assure an operational Stealth bomber at the earliest feasible date.

Democrats, in an effort to cut waste in the defense budget, proposed eliminating provisions which anticipated, and funded in advance, cost overruns in the B-1 and MX programs.

Democrats proposed giving congressional endorsement to the administration's publicly announced policy that the United States would not undercut existing SALT agreements in the course of building up strategic programs, so long as the Soviets exercise the same restraint.

The majority defeated each and every one of these amendments.

FOREIGN AFFAIRS

A bipartisan foreign policy develops when there is a true working partnership between the executive and legislative branches. Democrats historically have recognized the wisdom in this constitutionally prescribed cooperation. In the first session, however, they were not able to persuade their Senate counterparts to view the debate over foreign policy on independent grounds.

On the very important issues of aid of El Salvador, nuclear proliferation, and the separation of the Peace Corps from ACTION, the Democrats were successful. On nine other occasions they were thwarted.

Democrats repeatedly raised their concern over administration proposals to assist Pakistan, El Salvador, and Chile. They challenged the rationale and wisdom of the proposal to sell AWACS to Saudi Arabia. The majority refused to agree to a Democratic sponsored mandate to ban trade across-the-board to the Soviet Union if it invaded Poland. They also opposed a cut-off of oil imports from Libya.

The United States provides Libya with 40 percent of its oil revenues, while Libya continues to foster international terrorism, send hit squads into the U.S., and act aggressively in Africa. Democrats tried to bring the economic weapon to bear, so that U.S. dollars would no longer be availabe to finance these operations. They were turned back.

Democrats have traditionally opposed the merger of the Peace Corps with ACTION. This concern grew when the Reagan Administration nominated an individual with a background in military intelligence to serve as the Director, feeling this breached the traditional separation of the Peace Corps from any connection with intelligence activities. The attempt at separating the agencies succeeded.

Democrats were defeated in their efforts to disapprove the sale of AWACS, sidewinder missiles, and F-15 conformal fuel tanks to Saudi Arabia. Democratic concern centered over transferring some of our most sophisticated military technology to a country with which we did not have a formal security relationship, endangering Israel's security and precipitating an arms race in one of the most volatile regions of the world.

And finally, although then-Secretary Haig was on record in support of an across-the-board trade ban on the Soviet Union if it, or its allies, invaded Poland, Democrats were defeated when they attempted to place the Senate on record in support of the same position. The majority marched in lockstep to a last minute change in administration policy, and voted down the measure, leading some to wonder what the administration's policy on Poland was.

THE 97TH CONGRESS, SECOND SESSION OF THE SENATE

The second session had somewhat fewer items on the agenda than the first. The record is equally clear, however, on the broad range of alternatives offered by Senate Democrats. All the votes mentioned below involve two-thirds of Democrats being opposed by at least two-thirds of the majority.

THE ECONOMY

Senate Democrats continued their considerable effort of the first session to modify the tax excesses of Reaganomics, which shifts the tax burden radically away from the wealthiest and toward the middle and lower classes. Democrats believe that for a tax system to work it has to be progressive, and for a budget to work revenues must be reasonably close to outlays. Neither is the case in Reaganomics.

Yet each of the several times Democrats sought to adjust the tax cut in favor of middle and lower income taxpayers, to help out the small business person, or to defer overzealous revenue reductions until the economy could afford them, they were defeated.

Democrats also voted in June 1982 against further increasing the public debt limit. Taken together with the subsequent debt extension in late September the public debt will increase an unbelievable 38 percent since Democrats lost control of the Senate. These enormous, unprecedented increases in the national debt are the result of economic policies—both fiscal and monetary—which have turned an economy which was recovering at the start of the Reagan administration into a financial quagmire.

The excesses of Reaganomics forced the administration to fashion the largest tax increase in history, representing a total supply side flip-flop. Taxes will be raised $99 billion over the next 3 years, further raising health costs, burdening small businesses, and increasing excise taxes. Democrats opposed this measure, but their effort to improve it with the Bradley "fairness amendment" was rejected on an almost straight party line vote.

THE BUDGET

Democrats again tried to open the budget process to more debate and adjust the budget priorities to reflect a greater balance. However, attempts to change the rules so there could be more than a minimal, pro forma debate on major legislative items were defeated. Democrats were opposed to restricting debate on a budget which

called for raising approximately $100 billion in new taxes, projected deficits of nearly $250 billion through 1985, cut medicare and medicaid, and capped COLAs.

A little more than a month after voting for a record increase in the public debt, the majority refused to modify in the slightest a constitutional amendment to balance the budget. Democratic attempts to at least require the President to submit a balanced budget, or to allow for overrides in the case of military or national emergencies, were rejected.

Finally, the majority this session amended the tax bill with an airport development bill, although Democrats argued that this was inappropriate legislation under reconciliation rules. The Democratic concerns were overridden by the opposing party.

HUMAN RESOURCES

Programs to provide for the education and nutritional well-being of children, job training, unemployment insurance, health care, and adequate housing for all have suffered the most under Reaganomics. This session was no exception.

Senate Democrats tried to protect the elderly from new out-of-pocket expenses under medicare and medicaid and to retain home health care benefits, and were rebuffed, as they were in trying to retain current levels of deductions for health care.

Compensatory education programs of all kinds, as well as cost effective nutrition programs for low income nursing mothers and infants absorbed large cuts, as they did last session, despite Democratic efforts. Student benefits for children of deceased veterans and disabled workers were also cut.

At a time when unemployment is at a 40-year high, and the number of discouraged workers is at an all-time high, Democrats sought to keep work incentive programs as part of AFDC, sought to maintain the summer youth jobs program, and sought to provide adequate extended unemployment benefits for those new millions who have lost their jobs. They were beaten by the majority, who did succeed in considerably increasing the unemployment tax on businesses.

SOCIAL SECURITY, VETERANS, RETIREES

The majority controlled Budget Committee voted, just hours after unanimously rejecting President Reagan's budget, to cut $40 billion from social security.

Senate Democrats twice sought to reject this action and ensure that COLAs would be paid fully and on time, and reconfirm congressional support for preserving and strengthening the social security system. They were rejected twice. But the opposition then caved in and offered their own nearly identical amendment which was passed unanimously without a record vote.

Democrats were equally successful in maintaining current retirement benefits for railroad retirees. Although their contributions support this fund and the 1974 retirement act assures them this money, the majority party sought to reduce or cap their COLA. Senate Democrats succeeded in fully funding this account.

The opposing party did, however, reject other efforts to maintain current COLAs for military and Federal retirees and veterans, while refusing to apply the same cap to their own annuities. They also succeeded, at a disastrous time for the home building industry and home buyers, in adding a user fee to VA mortgage loans.

ENERGY AND ENVIRONMENT

Taking the lead from the White House, the majority party in the Senate once again showed little regard for safeguarding against some of the most serious environmental problems facing us. Funds were cut again from the budget for the cleanup of toxic and hazardous waste dumps, and other EPA programs, in spite of growing public concern over the health hazards involved. EPA funds have not been cut 39 percent in the last 2 years.

Democrats also tried, unsuccessfully, to fund fully the strategic petroleum reserve, a system designed to provide energy insurance against a very volatile Middle East situation. This false economy could severely limit our capacity to respond to an international energy emergency.

Democrats were also rebuffed in an attempt to make bidding for oil and gas exploration more competitive. Noncompetitive leasing practices were successfully retained.

DEFENSE AND FOREIGN AID

Given the extent of disarray in our economy, severely restrictive interest rates, record unemployment, and huge deficits, Senate Democrats tried to moderate slightly the growth of defense expenditures. Expenditures cannot continue at their current rate if we hope to alleviate the deficits, bring down interest rates, and begin the economic growth that will put people back to work.

Yet, an attempt to reduce from 6.8 to 6.0 percent the 3-year average real growth in defense failed, as did other, less far reaching attempts at defense economies. The majority earlier refused to install an independent Inspector General to audit the Department of Defense, rejecting as Democratic amendment and offering their own weakened version. Ultimately, the tougher Democratic version was adopted in the conference report on the bill.

THE "LAMEDUCK" SESSION—JOBS, TAX FAIRNESS, AND INTEREST RATES

During the late summer and fall of 1982, the economic news has grown worse with each passing month. The unemployment rate has risen to a post-war high and continues to climb. Business failures have set post-depression records. Private charities have seen their resources depleted and, unable to meet the massive increases in requests for their assistance, have turned to Government for assistance.

When Congress returned for the lameduck session the last week of November, Senate Democrats were ready with a comprehensive legislative package to counter the continuing economic slide, to aid those who are unemployed to obtain work, and to increase the duration of unemployment benefits for those who remain unemployed.

The package offered by Senate Democrats was designed to be added to the highways and mass transit legislation submitted by the administration.

First, it substituted tax reform for the regressive gas tax increase proposed by the administration. Under the Democratic alternative, the third year of the Kemp-Roth tax cut would have been suspended partially for 3 years for those with taxable incomes between $50,000 and $65,000, and suspended completely for 3 years for those with higher incomes. This method of increasing revenue would have more than paid for the highways and mass transit proposal approved by Congress as well as the additional jobs creation, public works, and unemployment assistance programs proposed by Senate Democrats—and left several billion in unneeded revenues which could have been used to reduce the budgetary deficit.

The Democratic jobs package also contained $1 billion for sewer and urban water system construction and repair; $2 billion for a labor-intensive community public works program which would have provided funding to cities and States for hiring unemployed workers to make light repairs and rehabilitation of public buildings, roadways, bridges, and other capital facilities; $200 million to begin immediately to retrain and relocate displaced workers from declining industries such as steel and autos; $400 million for the rehabilitation and modernization of public housing facilities; $100 million each for reforestation and timber stand improvement work and for senior citizens community service employment; and $30 million for abandoned mine reclamation. All of these expenditures would have contributed significantly to the improvement of public capital facilities, while creating over 350,000 direct jobs and nearly as many indirect jobs—over and above the estimated 320,000 jobs anticipated from the program proposed by the administration. The Democratic package also contained $750 million in credit for the expansion of agricultural exports, since farm income is down to an historical low, while farm foreclosures are at an historical high.

Finally, the Democratic package contained $700 million in extended unemployment benefits for the long-term unemployed who cannot find work during the severe recession.

Although the majority party in the Senate offered no alternative of any kind, they defeated the Democratic proposal by a virtually pure party line vote of 53 to 44.

Subsequently, Senate Democrats offered a separate measure covering unemployment insurance. The Senate accepted that proposal with minor alterations, and it remains a part of the gas tax/highway and mass transit legislation passed by Congress last week. It is, in fact, the only step approved by Congress for aiding the 12 million plus unemployed persons who must face the holiday season without income this year.

A BALANCED MONETARY POLICY

In August of 1982 Senate Democrats took the only major policy initiative of the last 2 years with regard to monetary policy. With 40 cosponsors in the Senate, and over 70 in the House, they introduced the Balanced Monetary Policy Act of 1982.

The heart of this bill was a requirement that the Federal Reserve Board reestablish the traditional relationship between interest rates and inflation. Historically, short-term interest rates like the prime rate have run 1 to 4 percentage points above inflation. This is a level we can live with and that can give us jobs and economic growth.

The Democratic bill did not require Congress to tinker with the technical details of monetary policy on a day-to-day basis. Rather, the act mandated the broad, fundamental goals of balance, public disclosure, and stability. This bill made affordable interest rates once more a clearly-defined national goal. It restored balance to our monetary policy by requiring the Board to set targets for both money growth and real interest rates. In recent years, the Board has veered from one extreme to another—from ignoring inflation to ignoring high interest rates and the deep recession they cause. This bill was intended to stop this economic extremism and get us back to a balanced, commonsense middle-of-the-road policy.

And there can be absolutely no doubt that the current monetarist policies of the Federal Reserve Board have contributed to the enormous slowdown in our economy.

Today, 12 million Americans are out of work, and 3 million of them lost their jobs since Ronald Reagan became President. The unemployment rate stands at 10.8 percent, the highest level since the Great Depression. Over 500 small businesses are failing each week, and the rate is above that of 1929. Home and farm foreclosures are at levels unknown since the 1930's. The automobile and construction industries have been devastated.

In 1981, domestic auto production and sales declined to 20 year lows, and 1982 has proven even worse for U.S. automakers. In June of this year, sales of domestically produced passenger cars declined to an annual rate of only 4.6 million, a decline of more than 12 percent from last June's depressed sales rate.

The impact of high interest rates has been even more devastating on the housing industry. In 1981, new private housing starts and sales of new single family homes declined to all-time record lows and, as with the auto industry, conditions have declined even further in 1982.

In the face of widening economic disaster, in the face of immeasurable human suffering, in the face of pleas by corporate executives, conservative economists, and office holders of both parties for a change in the economic policy, the President and his underlings have on reply except to blame others for their mistakes and to assure us that prosperity is just around the corner.

The monetary policy bill was a realistic attempt to reach that corner.

At about the time this legislation was introduced by Senate Democrats, the Federal Reserve Board seemed to move to a less monetaristic posture. Interest rates and the stock market recorded their strong approval. Interest rates dropped swiftly, and the stock market soared to record levels. Then, just as the Christmas (1982) sales season was approaching, the Federal Reserve Board began to send mixed signals that left both the stock market and interest rate levels hovering nervously in anticipation, awaiting a clear signal.

Senate Democrats again took the initiative. On December 18, 1982, a Democratic-sponsored resolution on monetary policy passed 93 to 0. This resolution was clearly an outgrowth of the earlier bill. It sent a clear signal to the Fed, the only signal sent on monetary policy by the Senate in 2 years.

This amendment was meant to encourage those members of the Federal Reserve Board of Governors who know that a more balanced monetary approach must be taken in the face of a still declining economy. It was meant to discourage those diehard monetarists on the Board who may not believe that the fate of 12 million unemployed and 6.6 million underemployed Americans is enough to cause a change in monetary policy.

Most importantly, this amendment, which has become law, should prevent a return to simplistic monetarist prescriptions and offer a ray of hope to our international allies who have suffered greatly under the monetarist regime, and a ray of hope to our businesses who are waiting for a chance to invest in new production for America.

Hopefully, this resolution will signal the beginning of the end of the 18 month recession that has so devastated the economic and human landscape of America.

ROCK ISLAND ARSENAL

● Mr. PERCY. Mr. President, earlier this session I had the pleasure of returning to Illinois to visit the Rock Island Arsenal. I would like to pay tribute today to the dedicated men and women who contributed with such professionalism and skill to the accomplishment of the arsenal's vital defense mission.

Rock Island Arsenal is responsible for the manufacture of gun mounts, artillery, recoil mechanisms, gun carriages, small arms, aircraft weapons, and related spare parts. It is also tasked with the assembly of tool sets and basic issue items (BII) for United States and foreign countries. In addition, the arsenal provides administrative, logistical and facility support for the headquarters, U.S. Army Armament Materiel Readiness Command and other tenants.

The arsenal is currently producing gun mounts for a number of self-propelled vehicles, including the Army's newest tank, the M-1 Abrams. In late November, Col. Paul Greenberg, the Rock Island Arsenal commander, delivered the first three arsenal-produced M-1 gun mounts to the Army 2 weeks ahead of schedule. Prior to this ceremony, all gun mounts for the Abrams have been manufactured by private industry. Given the long production run that is planned for the M-1, though, the Army determined that Rock Island Arsenal could provide a much needed second production source. The arsenal is now working on a first installment order for another 280 gun mounts.

During my visit, I was especially gratified to discover that business at the arsenal is booming and employment there is up, not down. During the last fiscal year, the arsenal conducted almost $134 million worth of business and received $172 million in new work orders. As a result, the arsenal entered fiscal year 1983 with a healthy backlog of scheduled manufacturing projects. A large number of these projects involve orders for military equipment from foreign countries.

Moreover, as a consequence of congressional action this year on H.R. 6758, which was introduced in the House by WILLIAM GOODLING and in the Senate by Senator HEINZ, Rock Island Arsenal should be able to conduct an additional 5 to 15 million dollars' worth of business in producing gun mounts for export. Prior to the

enactment of this bill, the U.S. Government had been prohibited from selling military equipment produced in U.S. Government arsenals to contractors if the contractors intended to include these items in commercial exports to friends and allies. H.R. 6758, which I was pleased to cosponsor, lifts this prohibition and authorizes these sales.

To cope with the additional workload, Rock Island Arsenal announced in October that its civilian work force would be increased by 359 spaces, for a new total of 3,008. The increase means that employees already on board but in excess of the previous ceiling did not have to be let go, and additional personnel were hired. Over 500 applications were received for the needed machinist and engineering positions. Should an insufficient number of qualified applicants be found, the arsenal may call upon the recently enacted Illinois jobs training program to develop the necessary skills.

Mr. President, before closing I would like to point out to my colleagues that Rock Island Arsenal is slated to undergo a major revitalization and modernization project that will require funding over the next several fiscal years. This $235 million facility modernization project, known as Rearm, will be the first major renovation at Rock Island Arsenal since World War II. The average age of machines currently in use at the arsenal is 29 years. Under the Rearm program, the arsenal will receive $142 million worth of new equipment, including 84 state-of-the-art numerically controlled machine tools, and $92 million in construction projects.

Once the Rearm project is completed, Rock Island Arsenal will be better equipped to meet peacetime weapons manufacturing requirements and better prepared for a mobilization surge should world conditions so warrant. I am confident that the Senate will continue to support the vital defense responsibilities performed by the arsenal and fully fund the upcoming Milcon requests for this important facility.●

EXECUTIVE AND OTHER COMMUNICATIONS

The following communications were laid before the Senate, together with accompanying papers, reports, and documents, which were referred as indicated:

EC-4692. A communication from the Director of the Office of Management and Budget, Executive Office of the President, transmitting, pursuant to law, a cumulative report on budget rescissions and deferrals for December 1982; pursuant to the order of January 30, 1975, referred jointly to the Committee on the Budget, the Committee on Appropriations, the Committee on Foreign Relations, the Committee on Agriculture, Nutrition, and Forestry, the Committee on Armed Services, the Committee on Energy and Natural Resources, the Committee on Commerce, Science, and Transportation, the Committee on Labor and Human Resources, the Committee on Finance, and the Committee on Governmental Affairs.

EC-4693. A communication from the Assistant Secretary of the Navy (Shipbuilding and Logistics), transmitting, pursuant to law, a report on the conversion of the Administrative Telephone Service function at the Navy Public Works Center, Pearl Harbor, Hawaii, to performance under contract; to the Committee on Armed Services.

EC-4694. A communication from the Deputy Assistant Secretary of Defense (Administration), transmitting, pursuant to law, the report on prime contract awards over $10,000 negotiated under section 2304(a)16 in the interest of national defense or industrial mobilization for the second half of fiscal year 1982; to the Committee on Armed Services.

EC-4695. A communication from the Assistant Secretary of Commerce for Communications and Information, transmitting, pursuant to law, agency comments opposing the enactment of cable television copyright legislation; to the Committee on Commerce, Science, and Transportation.

EC-4696. A communication from the Deputy Director of the Minerals Management Service, Department of the Interior, transmitting, pursuant to law, an application for refund of excess royalty payment by Tenneco Oil Exploration and Production, Marathon Oil Co., Mitchell Energy Corp., ARCO Oil and Gas Co., and General American Oil Co. of Texas; to the Committee on Energy and Natural Resources.

EC-4697. A communication from the Secretary of the Interior, transmitting, pursuant to law, a report on the soil survey and land classification for the Salt River Pima-Maricopa Indian Reservation for irrigation; to the Committee on Energy and Natural Resources.

EC-4698. A communication from the Director, Policy Planning and Analysis, Department of Energy, transmitting, pursuant to law, the annual report entitled "Economic Impact of Energy Action;" to the Committee on Energy and Natural Resources.

EC-4699. A communication from the Acting Assistant Legal Advisor for Treaty Affairs, Department of State, transmitting, pursuant to law, a report on international agreements, other than treaties, entered into by the United States in the 60-day period prior to December 8, 1982; to the Committee on Foreign Relations.

EC-4700. A communication from the Chairman of the Council of the District of Columbia, transmitting, pursuant to law, copies of legislation adopted by the Council on November 16, 1982; to the Committee on Governmental Affairs.

EC-4701. A communication from the Chairman of the Council of the District of Columbia, transmitting, pursuant to law, copies of legislation adopted by the Council on November 16, 1982; to the Committee on Governmental Affairs.

EC-4702. A communication from the Chairman of the Council of the District of Columbia, transmitting, pursuant to law, copies of legislation adopted by the Council on November 16, 1982; to the Committee on Governmental Affairs.

EC-4703. A communication from the chairman of the Council of the District of Columbia, transmitting, pursuant to law, copies of legislation adopted by the Council on November 16, 1982; to the Committee on Governmental Affairs.

EC-4704. A communication from the chairman of the Council of the District of Columbia, transmitting, pursuant to law, copies of legislation adopted by the Council on November 16, 1982; to the Committee on Governmental Affairs.

EC-4705. A communication from the chairman of the Council of the District of Columbia, transmitting, pursuant to law, copies of legislation adopted by the Council on November 16, 1982; to the Committee on Governmental Affairs.

EC-4706. A communication from the chairman of the Council of the District of Columbia, transmitting, pursuant to law, copies of legislation adopted by the Council on November 16, 1982; to the Committee on Governmental Affairs.

EC-4707. A communication from the chairman of the Council of the District of Columbia, transmitting, pursuant to law, copies of legislation adopted by the Council on November 16, 1982; to the Committee on Governmental Affairs.

EC-4708. A communication from the Deputy Assistant Secretary of Defense (Administration), transmitting, pursuant to law, a report on a new Privacy Act system of records; to the Committee on Governmental Affairs.

EC-4709. A communication from the District of Columbia Auditor, transmitting, pursuant to law, a report entitled "Follow-up to the Water Bill Policies and Procedures;" to the Committee on Governmental Affairs.

EC-4710. A communication from the Chairman of the Administrative Conference of the United States, transmitting, pursuant to law, the first annual report on agency activities under the Equal Access to Justice Act; to the Committee on the Judiciary.

EC-4711. A communication from the Director of the Federal Judicial Center, transmitting, pursuant to law, the 1982 Annual Report of the Federal Judicial Center; to the Committee on the Judiciary.

EC-4712. A communication from the Secretary of Education transmitting, pursuant to law, a report on the consolidation of 29 programs into block grants; to the Committee on Labor and Human Resources.

EC-4713. A communication from the Commissioner of Rehabilitation Services Administration, Department of Education, transmitting, pursuant to law, notice of expected submission of the Annual Report by June 1, 1983; to the Committee on Labor and Human Resources.

EC-4714. A communication from the Chairman of the Task Force on Environmental Cancer and Heart and Lung Disease transmitting, pursuant to law, the Task Force's fifth Annual Report; to the Committee on Labor and Human Resources.

EC-4715. A communication from the Superfund Study Group transmitting, pursuant to law, a report on injuries and damages for hazardous wastes—analysis and improvement of legal remedies; to the Committee on Environment and Public Works.

EC-4716. A communication from the Principal Deputy Secretary of the Navy for Shipbuilding and Logistics transmitting, pursuant to law, a report on the decision to convert the motor vehicle operation/maintenance function at the Naval Air Station, Key West, Fla., to performance under contract; to the Committee on Armed Services.

EC-4717. A communication from the Principal Deputy Assistant Secretary of the Navy for Shipbuilding and Logistics transmitting, pursuant to law, a report on the conversion of the night shelf stocking func-

tion at the Navy Commissary Store, Portsmouth, Va., to performance under contract; to the Committee on Armed Services.

EC-4718. A communication from the Principal Deputy Assistant Secretary of the Navy for Shipbuilding and Logistics transmitting, pursuant to law, a report on the conversion of the night shelf stocking function at the Navy Commissary Store, Little Creek, Va., to performance under contract; to the Committee on Armed Services.

EC-4719. A communication from the Principal Deputy Assistant Secretary of the Navy for Shipbuilding and Logistics transmitting, pursuant to law, a report on the conversion of the supply support function at the Naval Shipyard, Philadelphia, Pa., to performance under contract; to the Committee on Armed Services.

EC-4720. A communication from the Principal Deputy Assistant Secretary of the Navy for Shipbuilding and Logistics transmitting, pursuant to law, a report on the conversion of the night shelf stocking function at the Navy Commissary Store, Yorktown, Va., to performance under contract; to the Committee on Armed Services.

EC-4721. A communication from the Secretary of Energy transmitting, pursuant to law, the quarterly report on Biomass Energy and Alcohol Fuels; to the Committee on Energy and Natural Resources.

EC-4722. A communication from the Secretary of the U.S. Postal Rate Commission transmitting, pursuant to law, a report on a recommendation for establishing subclasses of first class mail for ZIP plus 4; to the Committee on Governmental Affairs.

EC-4723. A communication from the Chairman of the National Diabetes Advisory Board transmitting, pursuant to law, concerns of the Board relative to biomedical research programs; to the Committee on Labor and Human Resources.

EC-4724. A communication from the Comptroller General of the United States transmitting, pursuant to law, a report entitled "Block Grants for Housing: A Study of Local Experiences and Attitudes;" to the Committee on Banking, Housing, and Urban Affairs.

EC-4725. A communication from the Comptroller General of the United States transmitting, pursuant to law, a supplemental report to the report entitled "Block Grants for Housing: A Study of Local Experiences and Attitudes;" to the Committee on Banking, Housing, and Urban Affairs.

EC-4726. A communication from the Clerk of the United States Claims Court transmitting, pursuant to law, a copy of the Court's judgment order for the plaintiffs in Lawrence Zane, et al., etc. v. The United States, Nos. 212, 213; to the Select Committee on Indian Affairs.

EC-4727. A communication from the Commissioner of Patents and Trademarks transmitting, pursuant to law, a report on the automation of the Patent and Trademark Office; to the Committee on the Judiciary.

EC-4728. A communication from the Secretary of Health and Human Services transmitting, pursuant to law, a report on the implementation of the Age Discrimination Act of 1975; to the Committee on Labor and Human Resources.

ADJOURMENT SINE DIE

Mr. BAKER. Mr. President, if there is no further business to come before the Senate, I move, in accordance with the provisions of House Concurrent Resolution 438, that the Senate do adjourn sine die.

The motion was agreed to, and at 1:13 p.m., the Senate adjourned sine die.

MESSAGE FROM THE HOUSE RECEIVED DURING THE SINE DIE ADJOURNMENT

Under the authority of the provisions of the Senate Resolution 528 (Ninety-seventh Congress, Second session), a message was received from the House of Representatives announcing that the Speaker had signed the following enrolled bills and joint resolutions subsequent to the sine die adjournment of the Ninety-seventh Congress:

S. 503. An Act to authorize the purchase, sale, and exchange of lands by Indian tribes and by the Devils Lake Sioux Tribe of the Devils Lake Sioux Reservation of North Dakota specifically, and for other purposes;

S. 705. An act to authorize the Secretary of Agriculture to convey certain National Forest System lands, and for other purposes.

S. 1540. An act to revise the boundaries of the Saratoga National Historical Park in the State of New York, and for other purposes;

S. 2273. An act to amend the Earthquake Hazards, Reduction Act of 1977 to extend authorization of appropriations, and for other purposes;

S. 2863. An act to amend title 28 to provide protection to all jurors in Federal cases to clarify the compensation of attorneys for jurors in protecting their employment rights, and authorizing the service of jury summonses by ordinary mail;

S. 3105. An act to modify the judicial districts of West Virginia, and for other purposes;

H.R. 9. An act to designate components of the National Wilderness Preservation System in the State of Florida;

H.R. 2475. An act to modify a withdrawal of certain lands in Mono County, Calif., to facilitate an exchange for certain other lands in Mono County, Calif., and for other purposes;

H.R. 2481. An act for the relief of Cynthia Gambon Rabena;

H.R. 3420. An act making technical corrections to the Natural Gas Pipeline Safety Act of 1983 and the Hazardous Liquid Pipeline Safety Act of 1979, and for other purposes;

H.R. 3731. An act to amend the Act of October 19, 1973 (89 Stat. 466) relating to the use or distribution of certain judgment funds awarded by the Indian Claims Commissoin or the Court of Claims;

H.R. 3809. An act to provide for the development of repositories for the disposal of high-level radioactive waste and spent nuclear fuel, to establish a program of research, development, and demonstration regarding the disposal of high-level radioactive waste and spent nuclear fuel, and for other purposes;

H.R. 3963. An act to amend the Contract Services for Drug Dependent Federal Offenders Act of 1978 to extend the periods for which funds are authorized to be appropriated;

H.R. 4001. An act to authorize the exchange of certain land held in trust by the United States for the Navajo Tribe, and for other purposes;

H.R. 4350. An act for the relief of Arthur J. Grauf;

H.R. 4491. An act to exempt the U.S. Capitol Historical Society from certain taxes;

H.R. 4496. An act to grant Federal recognition to the Texas Band of Kickapoo Indians to clarify the status of the members of the band: to provide trust to the band, and for other purposes;

H.R. 4566. An act to reduce certain duties, to suspend temporarily certain duties, to extend certain existing suspensions of duties and for other purposes;

H.R. 4568. An act to direct the Secretary of the Interior to release on behalf of the United States certain restrictions contained in a previous conveyance of land to the city of Albuquerque, N. Mex., and for other purposes;

H.R. 4746. An act for the relief of Kin Chi Eng Sims;

H.R. 5002. An act to improve fishery conservation and management;

H.R. 5027. An act to designate the building known as the U.S. Post Office and "Courthouse in Norfolk, Va., as the "Walter E. Hoffman United States Courthouse";

H.R. 5029. An act to designate the Federal building in Fresno, Calif., as the "B.F. Sisk Federal Building";

H.R. 5121. An act to insure that all oil and gas originated in the public lands and on the Outer Continental Shelf are properly accounted for under the direction of the Secretary of the Interior, and for other purposes;

H.R. 5161. An act to designate certain lands in the Monongahela National Forest, W. Va., as wilderness; and to designate management of certain lands for uses other than wilderness;

H.R. 5447. An act to extend the Commodity Exchange Act, and for other purposes;

H.R. 5456. An act to amend the Plant Quarantine Act of August 20, 1912, as amended, to eliminate certain unnecessary regulatory requirements;

H.R. 5470. An act to amend the Internal Revenue Code of 1954 with respect to the tax treatment of periodic payments for damages received on account of personal injury or sickness, and for other purposes;

H.R. 5633. An act for the relief of Dana Bradford Baretto;

H.R. 6679. An act to authorize the Secretary of Agriculture to assess civil penalties with respect to violations of certain acts relating to the prevention of the introduction and dissemination into the United States of plant pests, plant diseases, and livestock and poutry diseases, to increase the amount of criminal fines which may be imposed with respect to violations of such act, and for other purposes;

H.R. 5826. An act to provide for the reinstatement and validation of U.S. oil and gas lease numbered W-24153;

H.R. 5916. An act to declare certain Federal lands acquired for the benefit of Indians to be held in trust for the tribes of such Indians;

H.R. 6024. An act to authorize appropriations for the U.S. International Trade Commission, the U.S. Customs Service, and the Office of the U.S. Trade Representative for fiscal year 1983, and for other purposes;

H.R. 6056. An act to make technical corrections in the Economic Recovery Tax Act of 1981 and certain other recent tax legislation;

H.R. 6211 An act to authorize appropriations for construction of certain highways in accordance with title 23, United States Code for highway safety for mass transpor-

tation in urban and rural areas, and for other purposes;

H.R. 6243. An act to provide for the distribution of Warm Springs judgment funds awarded in docket numbered 198 before the Indian Claims Commission, and for other purposes;

H.R. 6419. An act to direct the Secretary of the Interior to release certain conditions contained in a patent concerning certain land conveyed by the United States to Eastern Washington University;

H.R. 6519. An act to amend title 5, United States Code, to allow student interns of the Internal Revenue Service to have access to certain information required by such students in the performance of their official duties;

H.R. 6538. An act to designate the Federal building in Lima, Ohio, as the "Tennyson Guyer Federal Building";

H.R. 6993. An act to revise, codify, and enact without substantive change certain general and permanent laws related to transportation as subtitle I and chapter 31 of subtitle II of title 49, United States Code, "Transportation";

H.R. 7005. An act to to amend the Federal Seed Act with respect to prohibitions relating to interstate commerce in seed mixtures intended for lawn and turf purposes and prohibitions relating to importation of certain seeds and for other purposes;

H.R. 7093. An act to amend the Internal Revenue Code of 1954 to reduce the rate of certain taxes paid to the Virgin Islands on Virgin Island source income, to amend the Social Security Act to provide for a temporary period that payment of disability benefits may continue through the hearing stage of the appeals process, and for other purposes;

H.R. 7143. An act to amend the Foreign Assistance Act of 1964 to extend for an additional year the Agricultural and Productive Credit and Self-Help Community Development Programs;

H.R. 7154. An act to amend the Federal Rules of Civil procedure with respect to certain service of process by mail, and for other purposes;

H.R. 7159. An act to amend the Federal Water Pollution Control Act to allow modifications of certain effluent limitations relating to biochemical oxygen demand and pH;

H.R. 7316. An act to establish the National Park System Visitor Facilities Fund, and for other purposes;

H.R. 7336. An act to make certain technical amendments to improve implementation of the Educational Consolidation and Improvements Act of 1981;

H.R. 7378. An act to codify without substative change recent laws related to money and finance and to improve the United States Code;

H.R. 7406. An act to designate a certain Federal building in Springfield, Ill., the "Paul Findley Building";

H.R. 7410. An act to amend title 13, United States Code, to transfer responsibility for the quarterly financial report from the Federal Commission to the Secretary of Commerce, and for other purposes;

H.R. 7420. An act to name the fish hatchery at the Warm Springs Dam component of the Russian River, Dry Creek, Calif., project as the Don H. Clausen Fish Hatchery;

H.R. 7423. An act to recognize the organization known as former Members of Congress;

S.J. Res. 101. Joint resolution designating "National High School Activities Week";

S.J. Res. 240. Joint resolution to authorize and request the President to designate the week of January 16, 1983, through January 22, 1983, as "National Jaycee Week";

S.J. Res. 258. Joint resolution to authorize and request the President to designate the month of December 1983 as "National Closed-Captioned Television Month";

S.J. Res. 260. Joint resolution to designate the period commencing January 1, 1983, ending December 31, 1983, as the Tricentennial Anniversary Year of German Settlement in America";

S.J. Res. 264. Joint resolution to designate the week of March 13, 1983, through March 19, 1983, as "National Children and Television Week";

S.J. Res. 271. Joint resolution resolution to make technical corrections in certain banking and related statutes;

S.J. Res. 459, Joint resolution authorizing the President to proclaim May 13, 1983, as "American Indian Day";

S.J. Res. 619, Joint resolution designating January 17, 1983, as "Public Employees Appreciation Day";

S.J. Res. 630, Joint resolution to commemorate the 150th anniversary of the founding of Greene County, Mo.; and

S.J. Res. 635. Joint resolutions establishing the dates for submission of the Budget and Economic Report.

The enrolled bills and joint resolutions were subsequently signed by the President pro tempore (Mr. THURMOND) on January 3, 1983, during the sine die recess.

ENROLLED BILLS AND JOINT RESOLUTIONS PRESENTED

The Secratary reported that on January 3, 1983, he had presented to the President of the United States the following enrolled bills and joint resolutions:

S. 503. An act to authorize the purchase, sale, and exchange of lands by Indian tribes and by the Devils Lake Sioux Tribe of the Devils Lake Sioux Reservation of North Dakota specifically, and for other purposes;

S. 705. An act to authorize the Secretary of Agriculture to convey certain National Forest System lands, and for other purposes;

S. 1540. An act to revise the boundaries of the Saratoga National Historical Park in the State of New York, and for other purposes;

S. 2273. An act to amend the Earthquake Hazards Reduction Act of 1977 to extend authorizations of appropriations, and for other purposes;

S. 2863. An act to amend title 28 to provide protection to all jurors in Federal cases to clarify the compensation of attorneys for jurors in protecting their employment rights, and authorizing the service of jury summonses by ordinary mail;

S. 3105. An act to modify the judicial districts of West Virginia and for other purposes;

S.J. Res. 101. Joint resolution designating "National High School Activities Week";

S.J. Res. 240. Joint resolution to authorize and request the President to designate the week of January 16, 1983, through January 22, 1983, as "National Jaycee Week";

S.J. Res. 258. Joint resolution to authorize and request the President to designate the month of December 1983, as "National Closed-Captioned Television Month";

S.J. Res. 260. Joint resolution to designate the period commencing January 31, 1983, as the "Tricentennial Anniversary Year of German Settlement in America";

S.J. Res. 264. Joint resolution to designate the week of March 13, 1983, through March 19, 1983, as "National Children and Television Week"; and

S.J. Res. 271. Joint resolution to make technical corrections in certain banking and related statutes.

PRESIDENTIAL APPROVALS

A message from the Preident of the United States reported that he had approved and signed the following bills and joint resolutions:

On December 20, 1982:

S. 764. An act to provide for protection of the John Sack cabin. Targhee National Forest in the State of Idaho.

S. 2177. An act to amend title III of the Colorado River Basin Project Act, Public Law 90-537 (82 Stat. 885), as amended by Public Law 95-578 (92 Stat. 2471), and Public Law 96-375 (94 Stat. 1505).

On December 22, 1982:

S. 1444. An act to authorize the Administrator of General Services to donate to State and local governments certain Federal personal property loaned to them for civil defense use, and for other purposes;

S. 1681. An act to designate the southern Nevada water project the "Robert B. Griffith water project."

S. 1894. An act to permit Indian tribes to enter into certain agreements for the disposition of tribal mineral resources, and for other purposes.

S. 2034. An act to designate the lock and dam known as the Jones Bluff lock and dam, located on the Alabama River, as the "Robert F. Henry lock and dam."

S. 2710. An act to establish the Charles C. Deam Wilderness in the Hoosier National Forest, Ind.

On December 23, 1982:

S. 2611. An act to amend the Peace Corps Act.

S. 3073. An act to provide for the distribution of the U.S. Information Agency film entitled "Dumas Malone: A Journey With Mr. Jefferson."

On December 29, 1982:

S. 816. An act to amend the Clayton Act to modify the amount of damages payable to foreign states and instrumentalities of foreign states which sue for violations of the antitrust laws.

On December 30, 1982:

S. 823. An act to provide for the payment of losses incurred as a result of the ban on the use of the chemical Tris is apparel, fabric, yarn, or fiber, and for other purposes.

On December 31, 1982:

S. 187. An act to authorize the Secretary of the Interior to convey certain lands near Miles City, Mont., and to remove certain reservations from prior conveyances.

S. 1340. An act to provide for the use and distribution of Callam judgment funds in docket numbered 134 before the Indian Claims Commission, and for other purposes.

S. 1735. An act to provide for the use and distribution of funds awarded the Pembina Chippewa Indians in dockets numbered 113, 191, 221, and 246 of the Court of Claims.

S. 3113. An act to make certain minor and technical amendments to the Job Training Partnership Act.

On January 3, 1983:

S. 625. An act to revise the boundary of Voyageurs National Park in the State of Minnesota, and for other purposes.

S. 717. An act for the relief of Carole Joy Maxfield-Raynor and Bruce Sherlock Maxfield-Raynor, wife and husband, their children Charlton Bruce Maxfield-Raynor and Maxine Anne Maxfield-Raynor.

S. 835. An act for the relief of Jerry L. Crow and Ralph D. and Connie V. Hubbell.

S. 1364. An act for the relief of Jose Ramon Beltron Aivenda Ostler.

S. 1501. An act entitled the "Educational Mining Act of 1982."

S. 1838. An act for the relief of Cesar Noel Jump.

S. 1965. An act to designate certain lands in the Mark Twain National Forest in Missouri, which comprise approximately 6,888 acres, and which are generally depicted on a map entitled "Paddy Creek Wilderness Area" as a component of the National Wilderness Preservation System.

S. 1986. An act to provide for the use and distribution of funds awarded to the Blackfeet and Gros Ventre Tribes of Indians and the Assinboine Tribe of Fort Balknap Indian Community, in certain dockets of the U.S. Court of Claims and of funds awarded to the Papago Tribe of Arizona in dockets numbered 345 and 102 of the Indian Claims Commission, and for other purposes.

S. 2059. An act to change the coverage of officials and the standards for the appointment of a special prosecutor in the special prosecutor provisions of the Ethics in Government Act of 1978, and for other purposes.

S. 2355. An act to amend the Communications Act of 1934 to provide reasonable access to telephone service for persons with impaired hearing and to enable telephone companies to accommodate persons with other physical disabilities.

S. 2955. An act to establish the Cheaha Wilderness in Talladega National Forest, Ala.

S. 3103. An act to amend section 1304(e) of title 5, United States Code.

S.J. Res. 270. Joint resolution to designate 1933 as the "Bicentennial of Air and Space Flight."

On January 4, 1983:

S.J. Res. 258. Joint resolution to authorize and request the President to designate the month of December 1982 as "National Closed-Captioned Television Month."

On January 8, 1983:

S.J. Res. 101, Joint resolution designating "National High School Activities Week."

S.J. Res. 240. Joint resolution to authorize and request the President to designate the week of January 16, 1983 through January 22, 1983, as "National Jaycee Week."

S.J. Res. 264. Joint resolution to designate the week of March 13, 1983, through March 19, 1983, as "National Children and Television Week."

On January 12, 1983:

S. 503. An Act to aurhorize the purchase, sale, and exchange of hands by Indian Tribes and by the Devils Lake Sioux Tribe of the Devils Lake Sioux Reservation of N. Dak., specially, and for other purposes.

S. 705. An act to authorize the Secretary of Agriculture to convey certain National Forest System lands, and for other purposes.

S. 1540. An act to revise the boundaries of the Saratoga National Historical Park in the State of New York, and for other purposes.

S. 2273. An act to amend the Earthquake Hazards Reduction Act of 1977, to extend authorizations of appropriations, and for other purposes.

S. 2863. An act to amend title 28 to provide protection to all jurors in Federal cases to clarify the compensation of attorneys for jurors in protecting their employment rights, and authorizing the service of jury summones.

S.J. Res. 271. Joint resolution to make technical corrections in certain banking and related statutes.

On January 14, 1983:

S. 3105. An act to modify the judicial districts of West Virginia, and for other purposes.

S.J. Res. 260. Joint resolution to designate the period commencing January 1, 1983, and ending December 31, 1983, as the "Tricentennial Year of German Settlement in America."
